

Operational electricity demand forecasting and electricity demand information workshop

Wednesday 29 November, London

Andrew Ryan
Balancing Services Manager
Network Operations
National Grid

Reminder ----- Purpose

- ◆ To identify, through market participation (i.e. this workshop):-
 1. Areas to **improve information** flow for electricity demand
 2. To explore whether further demand –related information could be released to the market, resulting in providing a **better signal to the market**

Industry make better informed decisions and Users can improve their self-balancing ahead of Gate closure hence

National Grid perform better residual balancing role
