

Embedded Generation

TCMF

30th September 2009

nationalgrid

The power of action.™

What is wrong?

- ◆ Arrangements differ: E&W; Scotland; Offshore
 - ◆ C13 – small Generators discount - ‘reasonable endeavours’ obligation – April 2011
- ◆ TNUoS gives circa £18/kW benefit for embedded
 - ◆ Embedded generator vs similarly sited directly connected gen
- ◆ BSUoS gives benefit
 - ◆ 2 x BSUoS
- ◆ Impact on competition and cost reflectivity?
- ◆ TADG
- ◆ Interaction / Integration with DNUoS

Next steps

- ◆ Consultation to be published exploring alternative models for embedded generation
 - ◆ Question the need for more fundamental exit reform?
