

Charging Condition 3: Intermittent Generation

TCMF

21 February 2006

Patrick Hynes

nationalgrid

The condition

- ◆ Review, invite and to consult on alternative methods of treating intermittent generation
- ◆ Bring forward changes by April 2007
- ◆ If no changes publish a report
- ◆ Questionnaire sent out in June 2005
- ◆ Initial conclusions
 - ◆ TCMF December 2005
 - ◆ CISG January 2006
- ◆ Draft report for CISG March 2006
- ◆ Publish Summer 2006

Issued covered at CISG

- ◆ Interpretation of GB SQSS
 - ◆ Deterministic approach - minimum
 - ◆ Economic assessment - investment level
- ◆ Effect of different treatment
 - ◆ transport model
 - ◆ tariff model
- ◆ Is there sufficient evidence to justify treating intermittent generation differently in the charging arrangements?
- ◆ Other issues
 - ◆ SQSS review
 - ◆ CUSC interaction
 - ◆ RETS evidence

Summary

- ◆ '60%' comes from the deterministic criteria
- ◆ Actual investment is set by economic assessment
- ◆ No evidence that economic investment proposed for current schemes is less for intermittent
- ◆ Deterministic approach in GB SQSS is under review
- ◆ No justification at present to change charges for intermittent generation
- ◆ Will be kept under review
- ◆ Final report Summer 2006
