

Condition 5 – Publication of long-term tariffs

TCMF

24 October 2006

nationalgrid

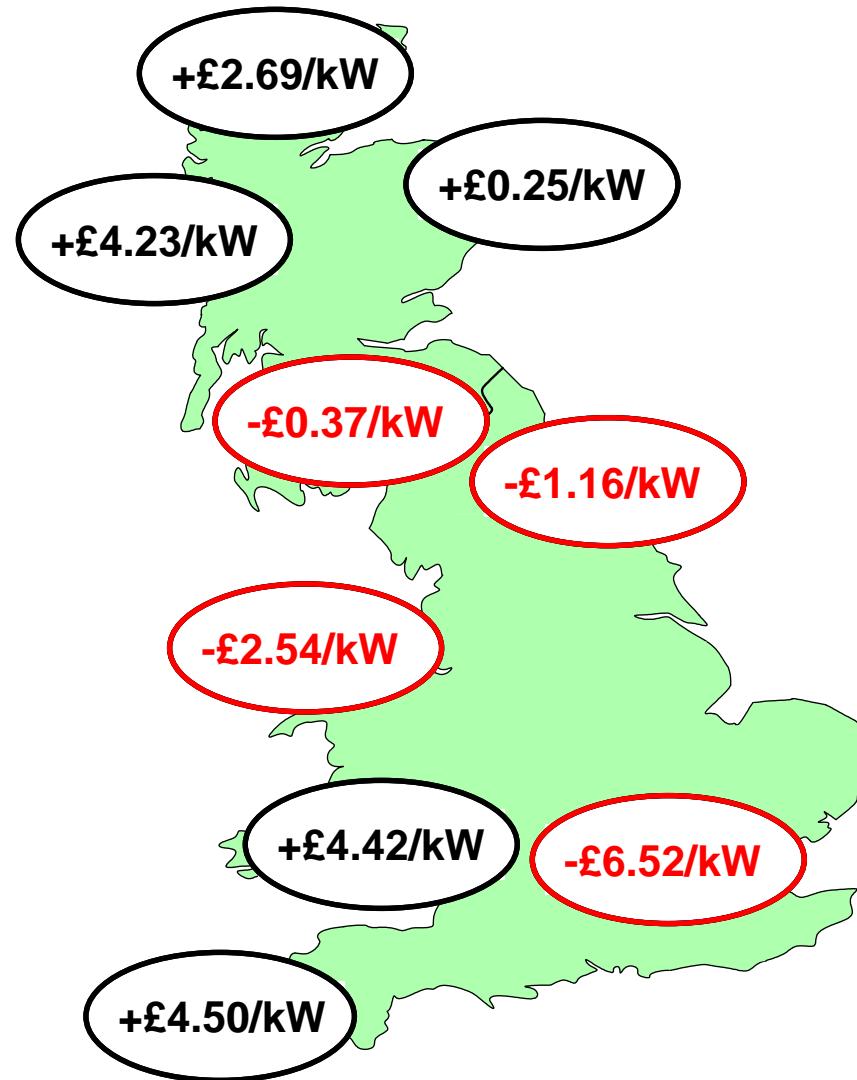

Condition 5

The Authority requests National Grid to publish information at least once a year on the forecast future (at least five years) path of tariffs under a range of credible scenarios (consistent with those already contained in the Seven Year Statement) as soon as practicable and no later than April 2006.

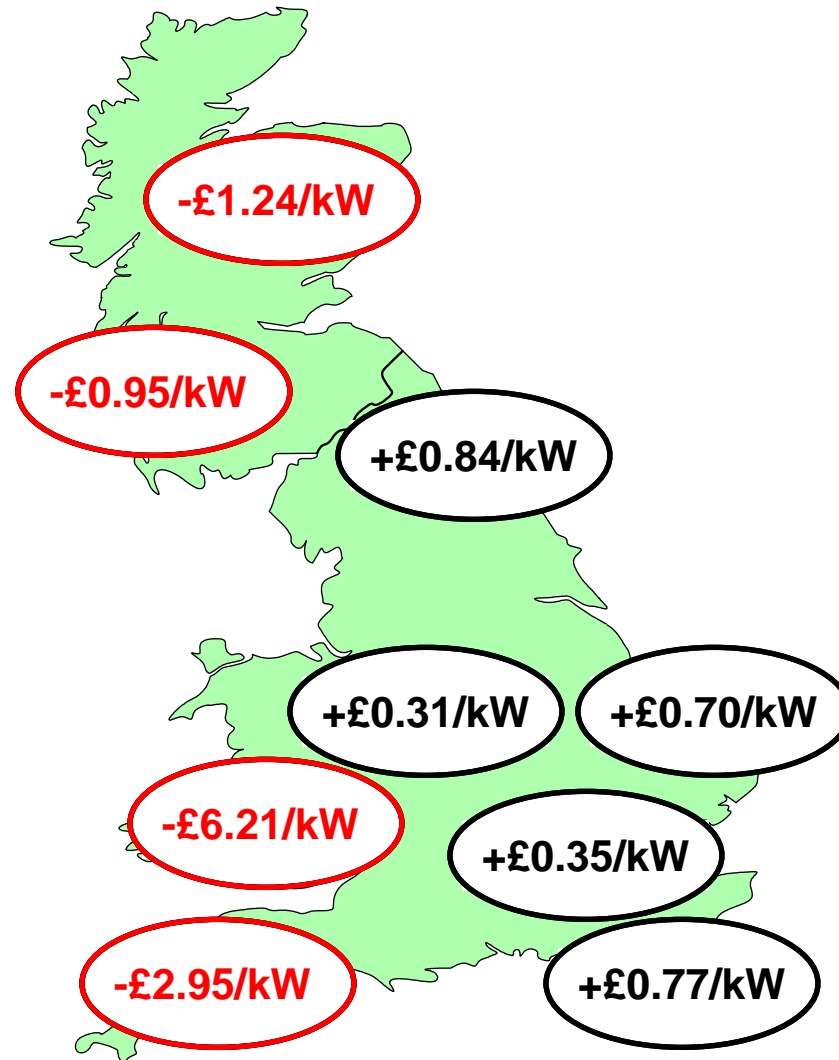

2006 Information Paper

- ◆ Published in September 2006
- ◆ Forecasts future path of **locational** element of the TNUoS tariff
- ◆ Uses the current TNUoS charging methodology and 2006/7 DCLF ICRP Transport & Tariff Model, updated to reflect GB SYS data
 - ◆ Transmission system reinforcements
 - ◆ Contracted generation position
 - ◆ DNO demand forecasts
- ◆ All data is now publicly available to enable Users to undertake their own sensitivity analysis

Baseline generation tariffs (2006/7 - 2011/12)

Baseline demand tariffs (2006/7 – 2011/12)

Next steps

- ◆ Comments invited on
 - Timing of publication
 - Relevance of content
 - Format
 - Sensitivity analysis
- ◆ Questions?
