National Grid fundraise to help Round Oak School save Music of Life Programme

Variety show taking place to raise money to save Music of Life programme at Round Oak School, Warwick. Tickets on sale at Bridge House Theatre box office

12 Apr 2017

Pupils from Round Oak School, Warwick, will be performing in a variety show that is taking place to enable their Music of Life programme to continue.

The variety show has been organised by staff from National Grid’s choir, Gridtones, to help raise money to continue funding the programme. Round Oak choir, the Gridtones and other National Grid acts will be performing on 18th May at 18.30pm at the Bridge House Theatre, Warwick.

Round Oak are a special education school and one of National Grid’s Employability Partner schools. The Music of Life programme provides numerous mental health and wellbeing benefits to the pupils.

Gerarda Berger-Byrne from Round Oak School said: “Our pupils really enjoy the Music of Life Programme and it makes a great difference to the pupils and teachers alike. We are looking forward to performing at the variety show and we are already practicing. The money raised will enable the school to continue their music programme which would mean a great deal to staff, pupils and their families.”

Tickets are available from the Bridge House Theatre box office.
National Grid is one of the largest investor-owned energy companies in the world and was named Responsible Business of the Year 2014 by Business in the Community. This accolade acknowledges all of our efforts in getting involve with the things that really matter to us and to society. We own and manage the grids that connect people to the energy they need, from whatever the source. In Britain and the north-eastern states of the US we run systems that helps deliver gas and electricity to millions of people, businesses and communities.

In Britain, we run the gas and electricity systems that our society is built on, delivering gas and electricity across the country. In the North Eastern US, we connect more than seven million gas and electric customers to vital energy sources, essential for our modern lifestyles.

National Grid in the UK:
- We own and operate the electricity transmission network in England and Wales, operating it across Great Britain
- We own and operate the high pressure gas transmission system in Britain
- We also own a number of related businesses including LNG importation, land remediation and metering
- Our portfolio of other businesses is mainly concerned with infrastructure provision and related services where we can exploit our core skills and assets to create value. These businesses operate in areas such as Metering, Grain LNG Import, Interconnectors and Property. National Grid Carbon Ltd is a wholly owned subsidiary of National Grid. It undertakes Carbon Capture Storage related activities on behalf of National Grid.

National Grid in the US:
- National Grid delivers electricity to approximately 3.5 million customers in New England and upstate New York
- We own 3.8 gigawatts of contracted electricity generation, providing power to over one million LIPA customers
- We are the largest distributor of natural gas in northeastern U.S., serving approximately 3.6 million customers in New York, Massachusetts and Rhode Island.

Notes to Editors:
National Grid is pivotal to the energy systems in the north eastern United States. We aim to serve customers well and efficiently, supporting the communities in which we operate and making possible the energy systems of the future.

National Grid in the UK:
- We own and operate the electricity transmission network in England and Wales, with day-to-day responsibility for balancing supply and demand. We also operate, but do not own, the Scottish networks. Our networks comprise approximately 7,200 kilometres (4,474 miles) of overhead line, 1,500 kilometres (932 miles) of underground cable and 342 substations.
- We own and operate the gas National Transmission System in Great Britain, with day-to-day responsibility for balancing supply and demand. Our network comprises approximately 7,600 kilometres (4,760 miles) of high-pressure pipe and 618 above-ground installations.
- As Great Britain’s System Operator (SO) we make sure gas and electricity is transported safely and efficiently from where it is produced to where it is consumed. From April 2019, Electricity System Operator (ESO) is a new standalone business within National Grid, legally separate from all other parts of the National Grid Group. This will provide the right environment to deliver a balanced and impartial ESO that can realise real benefits for consumers as we transition to a more decentralised, decarbonised electricity system.
- Other UK activities mainly relate to businesses operating in competitive markets outside of our core regulated businesses; including interconnectors, gas metering activities and a liquefied natural gas (LNG) importation terminal – all of which are now part of National Grid Ventures. National Grid Property is responsible for the management, clean-up and disposal of surplus sites in the UK. Most of these are former gas works.
