Modern slavery
Our statement on slavery and human trafficking 2020
Introduction

As CEO of National Grid, it is important to me that everyone working for National Grid or on our behalf can expect decent working conditions, work freely and receive fair pay in return. Modern slavery is a serious global issue and we recognise the important role we can play in helping to eradicate it. Respect for human rights is incorporated into our employment practices and our values.

National Grid is committed to keeping customer and employee wellbeing and safety as priority during the international pandemic. During these unprecedented times we understand more than ever the need to focus on people in our business, supply chains and our communities. We recognise and are monitoring the heightened risks associated with Covid-19 and the impact that is having on the supply and distribution of key items to maintain the safety and well-being of our employees and those working on our behalf. We continue to engage with our suppliers to address risks and provide support, identifying any opportunities where we can act to minimise any heightened modern slavery risks that may occur. We have also partnered with charities both in the UK and US, offering our time and expertise and providing financial donations to those who are most vulnerable in our communities.

Our approach to delivering our commitments made in our 2019 statement has continued to be through engagement and collaboration with stakeholders and suppliers. We have incorporated elements of modern slavery controls into our responsible procurement plan and have now developed our modern slavery risk assessment tool into a broader sustainability assessment tool, which will be implemented during 2020 and which will also enable our suppliers to utilise this same approach through their own supply chains. We have been especially focused on industry areas which we know are potentially high risk, such as construction, where we are working with our supply chain partners to begin to understand what is happening right the way through the supply chain and how we can collaborate to drive improvements. We have also been helping our people to develop knowledge and understanding of modern slavery, so that we can spot the signs in our everyday lives and feel confident to take any action necessary.

I’m proud of the progress we have made this year, but we know we can never be complacent. In this statement, for the financial year ending 31 March 2020, we describe what we have been doing to prevent modern slavery and our plans for continuous improvement over the coming year, as required by the UK Modern Slavery Act 2015. The statement applies to National Grid plc and each of the specifically named subsidiaries (see last page of document). The boards of each of these subsidiaries have reviewed, approved and adopted this statement.

I have signed this statement on behalf of the Board of Directors of National Grid plc following its approval on 28 July 2020.

John Pettigrew
Chief Executive

# Our progress summarised

<table>
<thead>
<tr>
<th>In our last statement, this is what we said we would do:</th>
<th>This is what we have delivered this year, against the commitments we made:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Broader strategic positioning will be developed over the coming years as part of an approach to recognise our total societal impact and how we can drive positive change and measure our effectiveness.</td>
<td>We have committed to responsible procurement in our 5-year plan to 2026, which we have submitted to our regulator, Ofgem. This includes our commitment to the real living wage, promoting equal opportunities and using our influence in the sector through industry initiatives to identify and address potential exploitation risk <em>(page 9).</em></td>
</tr>
<tr>
<td>Ongoing engagement with suppliers and expansion of supplier workshops and engagement in our US businesses.</td>
<td>We held a supplier workshop in the US to engage and build action plans with suppliers identified as potentially high risk. We also hosted a modern slavery masterclass in the UK, with peer organisations, facilitated by an industry expert <em>(page 9).</em></td>
</tr>
<tr>
<td>Develop and implement a process for managing any reported/suspected human rights issues.</td>
<td>We have implemented a process for managing any reported/suspected human rights issues, so that all our colleagues know what to do if they have concerns or if issues are highlighted through our supplier screening tools <em>(page 9).</em></td>
</tr>
<tr>
<td>Further development of our training programme and material to target high-risk areas.</td>
<td>We have delivered awareness training to consider human rights, inclusive of modern slavery where relevant, in the strategic sourcing process to our procurement teams. We are now developing a further detailed programme of training on how to embed sustainable procurement into the strategic sourcing process <em>(page 12).</em></td>
</tr>
<tr>
<td>Embed human rights considerations into the sourcing process as part of our Corporate Social Responsibility (CSR) risk assessment</td>
<td>We have worked with the industry to enhance the due diligence questions on modern slavery in Achilles, a tool widely used by utilities to prequalify suppliers for tender events. We have developed a broader Sustainability Assessment Tool that includes human rights considerations. This is being rolled out across our Procurement function and will be formally embedded to ensure it is used consistently and effectively <em>(see page 10).</em></td>
</tr>
<tr>
<td>Continue to use our influence as a client to raise awareness and drive change.</td>
<td>We have supported supply chain Corporate Social Responsibility (CSR) industry events to help build awareness and drive change through collaborative initiatives <em>(see page 9).</em></td>
</tr>
<tr>
<td>Ongoing engagement with the Supply Chain Sustainability School (SCSS) and utilising their resources in our organisation and with our suppliers.</td>
<td>We have promoted the use of the Supply Chain Sustainability School (SCSS) training materials within our supply chains.</td>
</tr>
<tr>
<td>Work with at least one of our construction partners to carry out a ‘deep dive’ on how they manage risk lower down in their supply chain.</td>
<td>We are working with our construction partners on our Hinkley Point project to review how they manage risk lower down in their supply chain <em>(see page 10).</em></td>
</tr>

</table>
An introduction to our business and our values

National Grid is an international electricity and gas company at the heart of one of the greatest challenges facing our society – delivering clean energy to support our world long into the future. Based in the United Kingdom (UK) and the United States (US), we play a vital role in connecting millions of people safely, reliably and efficiently to the energy they use. Our company headquarters are in London. For the year ending 31 March 2020, our annual group turnover was £14.5 billion.

Our purpose
is to Bring Energy to Life. We believe it is crucial to have a clear sense of what we stand for as a company.

Our vision
is to be at the heart of a clean, fair and affordable energy future.

Our values
are that every day we do the right thing, find a better way and make it happen.
Our business (UK)

Electricity
We own the high voltage network in England and Wales and are responsible for transporting electricity from where it is produced and for facilitating the connection of assets to the transmission system.

In 2019 a separate subsidiary of the National Grid group was established, the Electricity System Operator, which is responsible for ensuring supply and demand is balanced across the UK transmission system.

Facts and figures
2,312 km of underground cable
7,212 km of overhead line
347 transmission substations.

Gas
We own and operate the high-pressure gas transmission network in Great Britain and are responsible for making sure gas is transported from where it is produced.

As the Gas System Operator, we are responsible for ensuring that supply and demand are balanced on a day to day basis in real time.

Facts and figures
7,630 km of high-pressure gas pipe.

Our business (US)

Electricity
We own and operate transmission facilities across upstate New York, Massachusetts, New Hampshire, Rhode Island and Vermont. We own and operate electricity distribution networks in upstate New York, Massachusetts and Rhode Island.

Facts and figures
396 transmission substations
730 distribution substations
14,659 km of overhead line.

Gas
We own and operate gas distribution networks across the Northeastern US and are responsible for connecting customers to the energy they use.

Facts and figures
57,427 km of gas pipelines.

National Grid Ventures

National Grid Ventures and other partners
National Grid ventures manages our portfolio of businesses that operate globally alongside our core regulated operations.

The business comprises commercial operations in energy metering, electricity interconnectors, renewables development and the storage of liquified natural gas (LNG) in the UK.

In 2019, we completed the acquisition of Geronimo, a leading wind and solar developer in North America.

Facts and figures
3 interconnectors operating
3 interconnectors in development
7.8 GW interconnector capacity
8.8 m gas meters
1,000,000 m³ LNG tank space.
Our people

We recognise the value of our people. We employ a diverse workforce consisting of over 23,000 people globally, mainly in the UK and the US and operate policies and procedures (see page 7) to ensure the highest standards of ethical conduct. Equality and fairness are very important to us. As a responsible business we pride ourselves on treating all employees fairly, ensuring that they are provided with a respectful, safe and secure environment.

Our recruitment programme is designed to ensure equal opportunities, compliance with local legislation and that all our people have the appropriate rights to work. We use employment agency partners for attracting temporary workers and they are contracted to uphold the same standards of employment that we offer our direct employees. Contract Managers actively manage our employment agency partners, to monitor that they are meeting our employment requirements, including carrying out any relevant screening, paying the Real Living Wage and adopting the “employer pays” principle. This means that no employee of National Grid should ever have to pay to obtain access to temporary or permanent work within our organisation or supply chain.

We carefully monitor this area and believe that the policies and processes we have in place mean that the risk of forced or trafficked labour being employed directly by National Grid and its employment agencies is very low.

In the UK, we are committed to paying our employees, trainees and contractors working on our behalf, at least the Real Living Wage, as set by the Living Wage Foundation.

In the US, we pay all our employees at least the minimum wage.

Our employees are at the heart of what we do which is why we’re proud to be one of 118 companies who participated in the 2019 Workforce Disclosure Initiative. This initiative is encouraging transparency from companies on how they manage workers with the goal of improving the quality of jobs in company operations and supply chains.
Diversity

All our employees are supported by internal health and wellbeing programmes and have access to an employee assistance helpline, which is a confidential service that provides support across a range of areas including emotional support, debt and legal advice. Employees can also join trade unions.

More information about the diversity of our workforce

23,069 employees across the UK and US.

73% of our workforce is based in the US.

27% of our workforce is based in the UK.

25% of our workforce are female.

43 years is the average age of our employees.

18% of our workforce are from ‘minority’ racial or ethnic heritage.

78% of employees would recommend National Grid as a good place to work.

Our supply chains

We work with around 6,000 suppliers across our global organisation and spend over £5bn with them. Our Spend Profile details the top 10 countries where our suppliers are located.

We spend 42% of our total annual budget with these 25 organisations.

The standards we expect, relating to working conditions, pay and workers’ rights for those working in our supply chain, are mandated into our contracts through our supplier code of conduct (see page 7).

During these unprecedented times of the global pandemic, we are adhering to government guidelines in relation to how we carry out our work and manage our projects and those suppliers who are working alongside us. Additionally, we have sent an open letter to all of our suppliers, providing links to our Covid-19 response and contact information should they have any issues or concerns.

At least 99% of what we spend with our direct suppliers is in countries ranked as low risk by The Global Slavery Index.
Our policies

We know that setting clear expectations is very important. Summarised below are our policies, which collectively set the standards we require, encompassing the prevention of modern slavery in the workplace and in our supply chains. Our policies are supported by an internal business management system, that outlines what we do and how we should do it, ensuring that we live up to our values. We regularly monitor compliance with our policies and report on how we’re doing to our executive and audit committees.

<table>
<thead>
<tr>
<th>Policy</th>
<th>Scope</th>
<th>Relevance to modern slavery</th>
</tr>
</thead>
<tbody>
<tr>
<td>Code of Ethical Business Conduct</td>
<td>This is our company code of conduct that is applicable to employees and sets out our values and how we expect employees to behave whilst working for National Grid.</td>
<td>It includes sections on discrimination, harassment, bullying and human rights and sets out National Grid’s commitment to zero tolerance to all forms of corruption as well as the avenues available for raising concerns and how we will protect those who “speak up” about a concern.</td>
</tr>
<tr>
<td>Supplier Code of Conduct</td>
<td>This is sent to all our suppliers on an annual basis and sets out the standards we expect our suppliers to work to and which they should extend into their own supply chain, whilst working for National Grid.</td>
<td>It includes reference to the key international labour standards and the ethical trade initiative base code.</td>
</tr>
<tr>
<td>Recruitment (internal)</td>
<td>Our internal recruitment policies ensure that employees have equal opportunities, the relevant rights to work and are employed in line with all local legislative requirements.</td>
<td>The recruitment checks in place safeguard human rights, minimising the risk of directly recruiting someone who is being forced to work or is being trafficked.</td>
</tr>
<tr>
<td>Inclusion and diversity (Internal)</td>
<td>This policy sets out National Grid’s commitment to providing an inclusive, equal and fair working environment for all.</td>
<td>Recognises and respects the importance of an inclusive and diverse workforce.</td>
</tr>
<tr>
<td>Supplier Diversity Policy</td>
<td>This policy sets out National Grid’s commitment to providing equal opportunities to suppliers and the promotion of an inclusive and fair working environment for those that work for us in our supply chain.</td>
<td>Recognises and respects the importance of an inclusive and diverse supply chain workforce.</td>
</tr>
<tr>
<td>Disciplinary (internal)</td>
<td>This policy sets out what actions will be taken where employees deliberately break the requirements set out in the Code of Ethical Business Conduct.</td>
<td>All employees know what is expected of them and the consequences for misconduct.</td>
</tr>
<tr>
<td>Anti-Financial Crimes Policy</td>
<td>This policy sets out our commitment to prevent financial crime and corruption. It applies to all employees and those who work on our behalf.</td>
<td>References modern slavery and sets out the duty of all employees to be vigilant in guarding against and reporting unusual activity or payments.</td>
</tr>
</tbody>
</table>
Our policies in action

Responsible business charter

This year we will be launching our responsible business charter which articulates what ‘responsibility’ means to National Grid. We have identified five areas where we can make the most impact on society: The environment, the communities we serve, our people, our economy and our governance. We are developing ways to monitor our progress transparently.

Grid 4 Good (G4G)

G4G is one example of our responsible business initiatives. Through G4G, National Grid, in the UK and US, is working closely with the energy industry to identify what roles are needed to help address the challenges of tackling climate change and achieving the net zero target. G4G will help to fill these roles by accessing untapped talent, targeting disconnected young adults from deprived backgrounds. People will be given access to training and careers they thought may never have been possible, promoting diversity in the energy industry workforce and creating social mobility.

Covid-19 Pandemic – National Grid’s response to helping the vulnerable in our communities

At a time when the world is facing its gravest challenge in generations, with seismic effects on society and the global economy, it is more important than ever that National Grid plays its part as a purpose-led, responsible business. During the period of lockdown, our response has focused on the immediate needs of people in our communities and we have given our time, expertise and resources to help the COVID-19 response in many different ways.

In the US, we have stopped debt collections and disconnections. We have also supported US small businesses by redirecting our contact centre resources to help them understand what federal aid is available to them. In addition, we have helped to power field hospitals on both sides of the Atlantic, we have made and donated Personal Protective Equipment to healthcare professionals, and we have refurbished 1,000 laptops to help with home schooling and skills training in the UK.

Alongside all of these actions, we have donated more than $1,250,000 to community organisations across Massachusetts, Rhode Island and New York State to help those most affected by COVID-19. This has included support for first responders, provision of meals for children and families in need and funding for food pantries. In the UK, we have donated £400,000 to the National Emergencies Trust, which supports victims of domestic disaster, £1,100,000 to the Trussell Trust, Britain’s biggest foodbank network, and £100,000 to the University Hospitals Birmingham Trust.

We have also match-funded our colleagues’ own fundraising efforts throughout the pandemic, and supported those who can, to volunteer in their local communities.

An example of how G4G has helped in the fight against exploitation

One of our colleagues came to the UK in 2015 as a refugee. Not knowing anybody in the UK or having any family to turn to, she was put in contact with people from her native country who offered to help. Unfortunately, she was exploited financially and emotionally by these people whom she had put her trust in, resulting in her finding shelter in a YMCA hostel. Whilst living at the hostel she saw a G4G leaflet offering workshops to support people getting into paid work and education. She attended these workshops and was given the opportunity to share details of her background and skill set which was relevant to the gas industry.

The National Grid employees that were facilitating the workshops put her in contact with the relevant business area in National Grid who recruited her into an existing role that was vacant at the time. This opportunity has allowed our colleague to thrive as an individual and become self-sufficient once again whilst also enabling the industry to benefit from her skillset. These circumstances could have been very different had she not felt able to move away from those that exploited her or found an opportunity through G4G.
Due diligence
We continue to collaborate across the industry and work with our suppliers to improve approaches to mitigate risks of exploitation.

We pre-qualify most of our UK procurement activities using a vendor registration system operated by Achilles called the Utilities Vendor Database (UVDB). During 2019 we worked with the Achilles steering group, which is attended by industry representatives, to improve and enhance the questions asked in relation to modern slavery, so that they go beyond basic compliance. These are due to be implemented during 2020.

We continually review external media and use supplier screening services to check for adverse reports, fines or sanctions against our direct suppliers and have a process in place to act on anything that is highlighted, in a timely and appropriate way. For example, risk of use of conflict minerals was reported against our IT supplier. We worked with the supplier to ensure they had the right due diligence procedures in place.

We recognise the importance of having responsible and sustainable procurement processes in place and as part of our RIIO 2 regulatory plans for 2021–26, we have included our responsible procurement action plan.

Collaborating to improve industry standards

We know we don’t have all the answers. We strongly believe that sharing best practice and learning from peers and subject matter experts is not only efficient but also essential, if we are to drive up standards right across the industry. We regularly engage with best in class organisations including BT, Network Rail, SSE, United Utilities, Sellafield, Balfour Beatty, Murphy Group, Mace, Costain, Siemens, Transpower and Electricity North West. We recently hosted a Modern Slavery Master Class and invited industry partners to attend, this focused on common areas for improvement and provided participants with suggested action areas.

We are members of a number of working groups that are designed to drive change on a broader scale and continue to engage across the industry on best practice approaches for addressing the risk of modern slavery. Here are some highlights:

**United Nations Global Compact Modern Slavery Working Group** – We are sharing knowledge and best practice approaches to addressing the risks of modern slavery.

**Gangmasters Labour Abuse Authority – Construction Protocol**

We are continuing to promote the construction protocol within our supply chains and use of their tools and materials.

**Supply Chain Sustainability School (SCSS)**

We are collaborating with industry partners and are promoting the use of the SCSS resources and tools including those focused on modern slavery. In 2019 we hosted a workshop on embedding sustainable procurement which was attended by a number of suppliers and supply chain partners.

We have been actively involved in the SCSS labour working group that has resulted in a People Matter Charter which we are signatories of, alongside many of our main contractors.

**Chartered Institute of Purchasing and Supply**

We are promoting chartered status within our procurement community which requires completion of the annual ethical responsible procurement training.

**Slave Free Alliance**

We have committed to participating in a utilities sector modern slavery working group hosted by Slave Free Alliance with the objective of reducing the risks of modern slavery by raising awareness in the sector and exploring cross sector initiatives.
Risk assessment and management
We have embedded our sustainability risk assessment tool to consider potential risks at the initial stages of sourcing activity.

In 2017 we carried out a risk assessment of our top 250 suppliers (based on spend) and we used this to do more detailed risk assessments and action planning with those companies who were potentially high risk. We have shared the approach that we took to do this with our supplier community providing transparency and also an opportunity for them to utilise the tool further down their own supply chains.

Since the introduction of the initial modern slavery risk assessment, we have developed a sustainability assessment tool that includes human rights considerations around decent working practices alongside other sustainability criteria. In the UK, the tool maps to the relevant Achilles utilities vendor database (UVDB) questions and requires a positive response. The majority of the questions are mandatory at the pre-qualification stage of our sourcing process. In the US, questions are integrated into the sourcing process and evaluated in the contract award.

This approach is referenced in our strategic sourcing process training and is being integrated into sourcing events.

Through our UK RIIO-2 Framework contracts (these are the contracts which will take us through our next regulatory price control period) any risks identified at the sourcing stage will be reviewed and managed through the contract management processes as part of range of health checks.

In the instance where a supplier is either unwilling or unable to provide the relevant evidence, this could result in a formal process to review the contract and influence the allocation of any future project work over the Framework period.

To better understand any potential risks, we will be working closely with our Tier 1 contractors on a large construction project – Hinkley Point – to map out the supply chains involved and identify where the risks may arise. An example of the focused review and engagement that is taking place is shown on the right.

We provide all our suppliers with access to the assessment tools we have developed for identifying and combatting exploitation in supply chains. These are made available on our supplier webpage.

In January 2019, we announced that 3 construction contracts worth £300m had been awarded as part of the Hinkley Point C Nuclear Power Station project. The contracts were awarded to J. Murphy & Sons Ltd. (to build the underground cables), Balfour Beatty (to build the T Pylons) and Siemens (to build the new substation).

Our initial engagement has been with Murphy & Sons Ltd. to map their supply chains associated with establishing the haul roads for the site. They have shared with us the assessment process they are going through to select the Tier 2 level suppliers. For the road infrastructure, this includes understanding what quarries will be used to source raw materials and what human rights controls they have in place.

This is a big project that is due to complete in 2025 and we will continue to map and track the supply chain back to the source materials so that we can fully understand the potential risks on our large-scale projects where there are likely to be numerous tiers in the supply chain.

We will be monitoring this project closely and as our knowledge about modern slavery or exploitation risks develops, we will address them during this project and transfer learning and mitigations to other similar projects.
Promoting an open culture
We provide training to our employees and continually promote a ‘speak up culture’ which we measure through our employee engagement survey.

Speaking up
We continually promote openness and transparency and provide avenues available to all employees and those working on our behalf to raise concerns. We have confidential helplines available globally, operating 24/7. Details of these helplines are available on our website, in our Code of Ethical Business Conduct and Supplier Code of Conduct and on posters that are displayed in our offices and at our construction sites.

We take all allegations of any type of unethical or illegal behaviour very seriously and we have dedicated ethics and business conduct teams who are trained to deal with all reported concerns sensitively and thoroughly. We carry out independent investigations and take any relevant action. Any findings from our investigations are reviewed at our regional ethics and compliance committees, which are made up of senior leaders from within our organisation, whose role is to oversee the ethical standards of the company and monitor the effectiveness of our speak up programmes. Each year we track metrics through our employee engagement survey.

We also provide summaries of metrics, allegations and findings to our group executive and audit committees together with regular updates on our ethical programmes, including modern slavery.

We encourage anyone to raise concerns through our helplines which operate 24/7 by phone or email.

Through our recent employee engagement survey, we know that 76% of our workforce believe they can safely raise an ethical or compliance concern using our helplines.
Raising awareness
We provide a programme of training to all our employees

Training and awareness

Our induction programme provides training and awareness of our company values and our Code of ethical business to all new starters. In addition, we have ongoing mandatory training for all employees on topics related to our Code. The key elements of our Code are incorporated into our supplier code of conduct including our approach to combating modern slavery.

During 2019 we assessed the training needs associated with managing supplier engagement around sustainable procurement and decent working practices. As a result, our global procurement professionals are receiving training on Supply Chain Corporate Social Responsibility (CSR). This is focusing on sustainable procurement which includes modern slavery awareness, embedding our sustainability assessment tool and understanding of the process for raising concerns.

We have also raised awareness of our supplier code of conduct within our contract management community and will be providing additional support during 2020 to help them understand the processes that are in place and how to frame conversations with their suppliers around the human rights agenda, including modern slavery.

We are encouraging our suppliers to utilise the free training and resources that are available through the SCSS and we will be tracking this via the supplier dashboard.

We promote relevant initiatives within our supply chain including the people matter charter and the construction protocol, which we believe will drive industry changes as more organisations sign up to these initiatives.

In 2020 we will be developing training for our UK based employees to further raise awareness and understanding of the signs of modern slavery. As a responsible business we can help inform our people and our supply chains so that we all have the knowledge and confidence to recognise and report any related concerns that we may witness in our everyday lives.
# Measuring our effectiveness

We continually review the measures we have in place to check our progress and ensure our programmes are effective. We use this information to build our future plans.

Focus areas for 2020

We are fully committed to work on the following activities during 2020. We will continually monitor risks and the working environment in respect of Covid-19 and recognise that this may alter what we focus on and how we deliver the commitments below.

- Develop and implement training on modern slavery for employees, focusing on awareness, spotting the signs and common risk areas in our everyday lives.
- Develop due diligence programme around our responsible procurement plan identifying areas of initial focus, for example, promoting awareness and assurance of payment of the real living wage in the UK in areas where low wages are a potential risk.
- Utilise existing site visits to incorporate visual modern slavery checks focusing on construction sites where there is the potential for low-skilled labour, for example, demolition work and ground clearance.
- Establish a sustainability ambassador network in procurement to support delivery of our responsible procurement agenda through our category teams.
- Identify and utilise scorecard metrics from the SCSS to monitor supplier engagement and capability on sustainability.
- Develop action plans within our business to support the requirements of the people matter charter and promote this with our suppliers.
- Share our recognised good practice and associated materials that relate to the well-being of employees, with our supply chains.
- Continue the deep dive on the Hinkley Point project to map the supply chain and understand what modern slavery risks and controls are in place further down the supply chain. This important work will provide learning which we can transfer to other similar projects.
- Track progress on actions plans developed from supplier engagement sessions.

Governance
Our Regional Ethics and Compliance Committees assess our approach to modern slavery and oversee progress. Our Group Executive Committee and the Board receive reports on how we are doing and guide our future focus, to review and enhance the actions we are taking to improve our approach and that of our suppliers.
