DESTINATION

EN ROUTE

FLEET

Focus on two key emerging sectors

Ultra-rapid charging at Motorway Service Areas

- 54 Strategic Sites
- Technology agnostic – delivering future proofed capacity for all scenarios

Depot charging for fleet operators

- Supporting large fleet operators with their transition to fully electric

Energy networks solving a transport problem

Have we seen this pace of change before?

Supporting market development

- Extensive stakeholder engagement to understand the challenges of electrifying transport.
- Developing technical solutions and potential commercial models.
- Proactive thought leadership.
- Wide engagement outside of traditional sectors to develop new relationships with different types of customers.
