# Appendix 10.1 Cultural Heritage Gazetteers

This Appendix presents the gazetteers of cultural heritage assets considered in assessment at PEIR stage. This appendix should be read in conjunction with the main cultural heritage chapter (Chapter 10: Cultural Heritage (Volume II)) and viewed alongside the respective figures (Volume IV).

The gazetteers are listed as follows:

- Scheduled Monuments
- Listed Buildings
- Conservation Areas
- Registered Parks and Gardens
- Non-designated heritage assets.

All assets can be viewed on Figure 10.1 (Volume IV), which accompanies the main cultural heritage chapter.

Within the individual tables, a column presents whether the individual asset is scoped in or out of discussion within the main chapter. Where an asset is scoped out, a final column provides reasoning for its scoping out.

This appendix is finished with Table 6, which presents the non-significant effects anticipated from potential impacts by the Project.

Dimlington stadal/ deposits of geoarchaeological and / or palaeo-environmental potential	High	Impact on deposits of geoarchaeological and / or palaeo-environmental potential during drilling works associated with installation at Easington (HDD or micro-tunnelling).	It is anticipated that installation at the Easington landfall will be via HDD or micro-tunnelling, from the top of the cliffs to seaward of the inter-tidal zone. It is reasonable to assume that if deposits of geoarchaeological or palaeo-environmental significance are located within the till cliffs they represent a tiny fraction of a much more extensive landscape. Impact from linear installation methods would therefore be localised.	Archaeological excavation and recording	Not Significant
