

Grain LNG Overview

2024

Who is Grain LNG?

The largest LNG terminal in Europe.

A completely independent operator and the only terminal in the UK able to process the full global range of LNG.

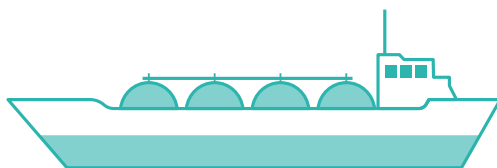

We have multiple international long term capacity holders.

VENTURE GLOBAL **LNG**

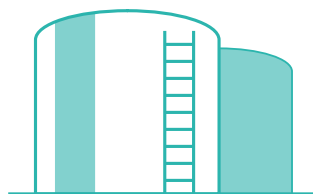

Capacity Offering 2029

The bundle will be offered from 1st October 2029.
Bidders can select between a term of 5 years, 10 years or out until July 2045.

42 berthing slots¹

200,000 m³ storage²

125 GWh/d regasification²

Maximise your market flexibility

Designed for independent ventures

Solo bid

Bids
£/annum

Joint bid

Collaborate and amplify your potential

Catered to facilitate joint ventures

Additional opportunities & potential diversification services

02

CO2 Processing – Initiate an industry cluster's CO2 processing to decarbonise power stations, with plans to expand to other emitters

04

Small Scale LNG Marine – Develop ssLNG Marine service to support the decarbonisation of the marine sector

River Medway

01

Berthing slots

Storage

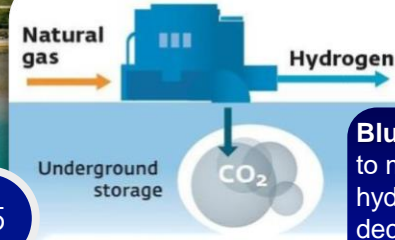

Regasification

Capacity Sales - as LNG demand increases, firm contracts will be key to minimise any outstanding balance in demand met by spot cargoes.

03

Solar, battery & Wind – Offer a sustainable power solution for regasification, improving efficiency, resilience, and black start capabilities, aligning Grain with the energy transition

05

Blue Hydrogen – This is crucial to meeting the UK's future hydrogen demand and advances decarbonisation efforts for the peninsula's small industries
