

# Proposals for Uxbridge Moor substation

Opportunity to have your say – Feedback form

National Grid is developing plans to build a new electricity substation ('Uxbridge Moor') on land bordering our existing substation in Iver. This is needed to connect several customers to our electricity network to the west of London.

## Fulfilling our duty to provide power

The national electricity network has recently seen a significant increase in demand for electricity. In the Iver area a large number of organisations have requested new power connections from National Grid, and as a regulated business, we have a legal obligation to meet these requests. The Uxbridge Moor substation will help us do that.

Before we submit a planning application towards the end of 2023, we are inviting the local

community to get involved through a public consultation. Your views will help shape our plans and the positive legacy we hope to leave for the community.

## Have your say

This consultation is an important opportunity for local residents, stakeholders and others to learn about the draft proposals and give their views.

Please complete this feedback form and return to us using the contact details below. Alternatively, you can visit our project website to provide your feedback online.

**Please ensure you submit your feedback by Friday 6th October 2023.**
