## Volume III - Part 1 of 4:

**Appendix 1.1 – Competent Experts**

**Appendix 4.1 – Draft Outline Code of Construction Practice (CoCP)**

**Appendix 5.1 – National Grid’s Response to EIA Scoping Opinion**

**Appendix 7.1 – Air Quality Assessment Methodology**

**Appendix 7.2 – Air Quality Baseline Data**

**Appendix 7.3 – Air Quality Assessment Results**

**Appendix 8.1 – Habitat Report**

**Appendix 8.2 – Terrestrial Invertebrates Report**

**Appendix 8.3 – Reptile Report**

**Appendix 8.4 – Breeding Bird Report**

## Volume III - Part 2 of 4:

**Appendix 8.5 – Wintering/Passage Bird Report**

**Appendix 8.6 – Bat Roosting Report**

**Appendix 8.7 – Bat Activity Report**

**Appendix 8.8 – Hazel Dormouse Report**

**Appendix 8.9 – Otter and Water Vole Report**

**Appendix 8.10 – Species of Principal Importance Report**

**Appendix 9.1 – Baseline Information and Preliminary Contamination Risk Assessment**

**Appendix 9.2 – Preliminary Minerals Resource Assessment**

**Appendix 10.1 – Health and Wellbeing Baseline Statistics**

**Volume III - Part 3 of 4:**

**Appendix 11.1 – Historic Environment Baseline Report**

**Appendix 11.2 – Historic Environment Assessment Tables**

**Appendix 11.3 – EACN Substation Geophysical Survey Report**

**Appendix 12.1 – Hydrology and Land Drainage Baseline**

**Appendix 12.2 – Flood Risk Assessment Screening**

**Volume III - Part 4 of 4:**

**Appendix 13.1 – Landscape Baseline and Assessment**

**Appendix 13.2 – Visual Baseline and Assessment**

**Appendix 14.1 – Construction Noise and Vibration Data**

**Appendix 14.2 – Construction Traffic Noise Assessment**

**Appendix 14.3 – EACN Substation Operational Noise Assessment**

**Appendix 15.1 – Built Assets within 1km of the Local Study Area**

**Appendix 16.1 – Traffic and Transport Baseline Conditions**

**Appendix 16.2 – Future Baseline**

**Appendix 16.3 – Traffic and Transport Preliminary Construction Effects**

**Appendix 17.1 – Long List of Other Developments**

**Appendix 17.2 – Short List of Other Developments**

**Appendix 17.3 – Preliminary Assessment**

# 1. Introduction

# 1. Introduction

- 1.1.1 This Historic Environment Baseline Report has been prepared to support the Preliminary Environmental Information Report (PEIR) for Norwich to Tilbury and should be read in conjunction with Chapter 11: Historic Environment in Volume I of the PEIR.
- 1.1.2 This report presents the baseline historic environment resource for aspects of the historic environment, which may potentially be impacted upon by the Norwich to Tilbury Project (the 'Project'). The baseline identifies, describes, and collates the baseline historic environment resource identified from desk-based sources, walkover and setting survey within the draft Order Limits and study areas for the Project.
- 1.1.3 The report provides an assessment of the heritage value of the historic environment resource (made up of individual heritage assets, including built and archaeological and designated and non-designated) within the Project's study areas. Assessment of value includes any contribution made by the respective heritage asset's setting.
- 1.1.4 The assessment of value, made in this report, has been carried through to Chapter 11: Historic Environment in Volume I of the PEIR. As part of the assessment process, this report identifies those heritage assets that do not interact with the Project and therefore would not experience any effects. This could be through a lack of physical interaction and therefore no potential for physical effects, and/or due to the land within the draft Order Limits making no contribution to the setting of the heritage asset, and therefore no potential for changes to setting to affect the value of the asset. Where the Project does not interact with a specific heritage asset, these have been excluded from further assessment in the PEIR.

## 1.2 Project Background

- 1.2.1 The Project is a proposal by National Grid to reinforce the high voltage power network in East Anglia. The reinforcement is needed because the existing transmission network, even with current upgrading, would not have sufficient capacity for the new renewable energy (a substantial proportion of which is generated by offshore wind) that is expected to connect to the network over the next ten years and beyond. Completion of the Project, together with other new reinforcements across the country will meet this future energy transmission demand both in East Anglia and across the UK.
- 1.2.2 Further details of the Project are included within Chapter 4: Project Description of the PEIR in Volume I of the PEIR.

## 1.3 Report Structure

- 1.3.1 The structure of this Baseline Report is outlined below:
  - 1) Introduction including outline methodology
  - 2) Archaeological and historical background - a high level summary of the Project route, by period

3) **Baseline** – this chapter is split into the eight geographical sections of the Project: Sections A through to section H. For each section the location, topography, geology, historic landscape, archaeological and built heritage assets are covered. Project sections are detailed below

4) **Bibliography**

1.3.2 This report is also supported by a series of Annexes which include supplementary information including:

- Annex A **Figures** (see below for full list)
- Annex B **Gazetteers**, providing a full catalogue of assets considered in the baseline of this assessment
- Annex C **Methodology**, providing a detailed breakdown of the methodology used to establish the assessment.
- Annex D **Walkover Survey**, conducted by the Project to support baseline understanding
- Annex E **Scoped Out Listed Buildings**, providing the rationale for scoping out of individual listed buildings within the Historic Environment study areas

1.3.3 The following figures have been produced to accompany this report and are presented in Annex A:

- Figure A11.1: Designated and Non-Designated Heritage Assets

1.3.4 No historic maps have been re-created as figures for this Project.

1.3.5 The eight geographical sections are based on local authority boundaries where possible. The rationale for splitting the Project into geographical sections is to enable readers to find the locations of interest more easily to them. The eight sections are:

- Section A – South Norfolk Council
- Section B – Mid-Suffolk District Council
- Section C – Babergh District Council, Colchester City Council and Tendring District Council
- Section D – Colchester City Council
- Section E – Braintree District Council
- Section F – Chelmsford City Council
- Section G – Basildon Borough Council and Brentwood Borough Council (and part of Chelmsford City Council)
- Section H – Thurrock Council

1.3.6 Relevant legislation and policy for historic environment is included in Chapter 11: Historic Environment in Volume I of the PEIR.

## 1.4 Aims

1.4.1 The aims of this report are as follows:

- Establish the nature of the historic environment (both designated and non-designated assets) within the Project's draft Order Limits and study areas
- Assess the value of the Project's historic environment resource
- Assess the potential for any previously unrecorded below ground archaeological remains to survive in the draft Order Limits, which could be impacted by the Project
- To inform the assessment of the need for any further archaeological investigations to support baseline understanding
- To aid in establishing the scope of the historic environment Environmental Impact Assessment (EIA)

1.4.2 This report does not attempt to assess the potential impacts of the Project on the heritage resource, or the significance of effects; this will be carried out in subsequent stages of the EIA, i.e., as part of the Environmental Statement (ES) Chapter.

## 1.5 Methodology

1.5.1 A detailed statement has been prepared, outlining the proposed methodology for the cultural assessment of the Norwich to Tilbury Project. The detailed methodology, including consulted sources of information for data gathering, is appended to the main structure of this report (Annex C). Therefore, details of the methodology are not repeated in the principal structure of this report.

1.5.2 Key aspects of the methodology are:

- Assessment focuses on the terrestrial archaeological and built heritage resource. There is no study of the historic marine environment or inter-tidal regions of the River Thames
- Use of three study areas as agreed through the EIA Scoping Report (National Grid, 2022) and Scoping Opinion (Planning Inspectorate, 2022):
  - 250 m study area established from the draft Order Limits, for data collection and assessment on non-designated heritage assets
  - 2 km study area established from the draft Order Limits, for assessment of effects to setting of all designated heritage assets
  - 3 km study area established from the draft Order Limits, for assessment of effects to setting of designated heritage assets of the highest significance (scheduled monuments, grade I and II\* listed buildings and grade I and II\* registered parks and gardens)
- Discussion is led by groupings of assets in their respective archaeological periods, to understand the overall development of the Project's historic landscape and to support the assessment of heritage value through an understanding of setting

1.5.3 The Baseline Report produced to support the PEIR has drawn on the following sources:

- HER data for known archaeological sites, monuments, find spots and events
- Local authority websites have been viewed for information on locally listed buildings

- Data sets of designations from Historic England's National Heritage List for England
  - Conservation areas have recently become available as a data download from Historic England. Data for conservation areas were cross referenced with the local authority websites to ensure accurate data was used
  - Archaeological reports (grey literature) on archaeological interventions within the draft Order Limits as the key consideration area for archaeological potential
  - Published archaeological journals and monographs, local history books and pamphlets, including local history websites as appropriate
- 1.5.4 The Baseline Report will be updated to support the ES chapter with the inclusion of the following additional data:
- Historic maps, including OS, estate maps, enclosure maps, tithe maps and military plans, all available scales of OS maps will be utilised
  - Recent aerial photography, including imagery taken for the Project in 2022
  - Historic aerial photography
  - LiDAR data
  - Protected lanes data from relevant Local Authorities
  - Walkover and setting survey results for areas surveyed beyond the end of September 2023
  - Desk-based information for any areas of the draft Order Limits and associated Study Areas not currently included in assessment
- 1.5.5 The HER data provided by Suffolk contains confidential information regarding the location of certain heritage assets. Within the text of the Baseline Report general location information, in order to identify the general area within a Project section where the asset is located, is provided but no grid references are included and these assets are not shown on the figure.
- 1.5.6 The established criteria for assigning heritage value, is presented in Table 1. Assessment of value is supported using Historic England's 2008 Conservation Principles.

**Table 1: Heritage Value Assessment Criteria**

Value	Criteria
Very High	<p>World Heritage Sites (including nominated sites) inscribed for their cultural heritage importance</p> <p>Assets that can contribute significantly to acknowledged international research objectives</p> <p>Assets of acknowledged international importance</p>
High	<p>Scheduled monuments (including proposed sites)</p> <p>Grade I and II* listed buildings</p>

Value	Criteria
	<p>Grade I and II* registered parks and gardens</p> <p>Registered battlefields</p> <p>Conservation areas containing buildings of predominantly high value</p> <p>Non-designated assets of the quality and importance to be designated</p> <p>Assets that can contribute significantly to acknowledged national research objectives</p>
Medium	<p>Grade II listed buildings</p> <p>Grade II registered parks and gardens</p> <p>Conservation areas containing buildings of predominantly medium value</p> <p>Assets that contribute to regional research objectives and/or have exceptional quality in their fabric or historical associations</p>
Low	<p>Locally listed buildings, or those of equivalent quality in their fabric or historical associations</p> <p>Assets of local importance</p> <p>Assets compromised by poor preservation and/or poor survival of contextual associations</p> <p>Assets of limited value, but with potential to contribute to local research objectives</p>
Negligible	<p>Assets with very little or no surviving archaeological/historical interest</p> <p>Buildings of no architectural or historical note; buildings of an intrusive character</p>
Unknown	<p>The importance of the resource has not been ascertained/is inaccessible</p>

## **2. Archaeological and Historical Background**

## 2. Archaeological and Historical Background

### 2.1 Introduction

- 2.1.1 The following chapter provides a general summary of the historic environment baseline of the Project, organised by Project Section and period. The summary for each section can be read without reference to any of the other section summaries. The introduction to each Project Section in Chapter 3: Baseline includes a description of location, topography, and geology.

### 2.2 Background Summary by Project Section and Period

#### Section A – South Norfolk Council

- 2.2.1 The designated heritage assets of Section A comprise: six scheduled monuments; two registered parks and gardens (one Grade II\*, one Grade II); 391 scoped in listed buildings (25 Grade I, 31 Grade II\* and 335 Grade II), and nine conservation areas. There are 304 non-designated heritage assets identified in Section A comprising findspots, moated sites, cropmarks, geophysical anomalies, parkland, earthworks and 20th century military assets as well as 11 buildings largely comprising post medieval farmsteads, but also including a derelict brickworks and a cold war bunker.
- 2.2.2 The cultural heritage resource of Section A is distributed throughout its bounds and is representative of human activity following the retreat of the ice as the Late Devensian glaciation came to an end, through to the Cold War following the Second World War (WWII) of the 20th century. Findspots of Upper Palaeolithic and Mesolithic worked flint indicate human communities of hunter-gatherers crossed the land bridge which connected the British Isles to mainland Europe and followed the retreating ice and tundra conditions northwards. These communities left very little physical evidence of their existence other than their stone tool industries, but the distribution of the worked flint suggests these hunter-gatherers exploited the river valleys for their resources and as routes through the landscape. The Neolithic period is represented by more widespread and concentrated lithic scatters likely reflecting dispersed human activity as the population grew following the introduction of farming. The Bronze Age is again largely represented by scatters of pottery and flintwork but excavated pits and ditches suggest the intensification of farming resulting in the physical manipulation of the landscape. The cropmarks of several potential barrow sites (burial mounds) are recorded in Section A and a good proportion of these are situated close to the river network and would likely have been understood as an ancestral claim of tenure over the landscape and its resources and potentially highlight rivers as tribal boundaries. The Iron Age saw further population increase, the intensification of farming and the establishment of villages as identified through several archaeological investigations within Section A. The prehistoric period is also represented in Section A by two scheduled monuments comprising: the 'Camp in Village' (**1003984**), the earthworks of which are considered to represent the remains of an Iron Age defended settlement or hillfort; and 'Sites discovered by air photography at Markshall' (**1002887**), which

are cropmarks likely of Bronze Age barrows and Iron Age/Romano-British enclosures.

- 2.2.3 The Romano-British period saw the continued occupation of some farmsteads and settlements, the abandonment of others and the founding of larger settlements as represented by the scheduled monument 'Venta Icenorum: Roman town and associated prehistoric, Anglo-Saxon and medieval remains' (**1021463**). Venta Icenorum was founded in approximately AD 70 and laid out with streets and insulae on a grid pattern, probably on the site of an Iron Age and Romano-British settlement of the Iceni tribe. The settlement was a Civitas Capital which functioned as an economic, cultural and administrative centre for its region. The scheduled monument 'Roman sites outside town walls' (**1003954**) records Roman assets beyond the bounds of Venta Icenorum and comprise: the flint foundation of a Roman building excavated in 1846; a Roman building, huts and section of road excavated in 1938; and cropmark and excavated evidence of Roman buildings, including a Romano-Celtic temple; and a wall nearly 400ft (122 m) long interpreted as the western boundary of a temple precinct. Elsewhere across Section A, the Romano-British period is represented by excavated remains and hundreds of findspots comprising metalwork, coins, pottery and building material that in places are so concentrated they likely represent settlements and cemeteries. One such concentration, for example, is located on land 500 m south-east of Fundenhall and partially within the draft Order Limits (**1130**) and likely represents a Romano-British settlement site which became the focus of an Anglo-Saxon cemetery.
- 2.2.4 The early medieval (Anglo-Saxon) period in Section A is represented by the scheduled monument 'Anglo-Saxon cemetery SW of Markshall Farm' (**1003953**), which suggests the possibility of Saxon settlement activity on the periphery of Venta Icenorum (**1021463**). The presence of a more nucleated settlement pattern in the early medieval period is reflected by the dozens of towns, villages and hamlets recorded by the Domesday Book of 1086. Elsewhere across Section A, the early medieval period is represented by finds of metalwork and pottery and the predominance of items considered to be grave goods suggest the locations of three Anglo-Saxon cemeteries. The first (**1187**) being located on farmland 440 m north-east of Tacolneston and 460 m west of the draft Order Limits; the second (**1246**) on farmland 400 m north-east of Shelfanger and just clipping the western edge of the draft Order Limits; and the third (**1130**) on farmland partially within the draft Order Limits and 500 m south-east of Fundenhall and immediately south of Hapton Road. The discovery of a bronze bowl on the Shelfanger site (**1246**) led to the identification of a richly furnished early/middle Saxon female burial (**1276**) located 360 m west of the draft Order Limits. The grave goods included: a necklace with a gold openwork pendant in the centre, flanked by two gold spacer beads, and then two gold coins of Merovingian King Sigebert III as pendants; a continental pottery bi-conical bowl with cordon and grooved decoration; a copper alloy bowl; an iron knife; 13 copper alloy chatelaine rings with punched ring and dot decoration; and a copper alloy chatelaine ring with a fragment of a possible decorated girder hanger attached to it.
- 2.2.5 The medieval period within Section A is predominantly represented by findspot and artefacts recovered during fieldwalking and metal detector surveys. There are as well, several churches and moated sites dating to the medieval period as well as settlement centres that have medieval origins. There are almost 40 Grade I and Grade II\* medieval churches within the Section A 3 km study area, reflecting the huge influence of the Church over the medieval landscape and the human population therein. The numerous moated sites in the area (10 within the 250 m study area), likely represent a network of manorial sites which defined the economic, social, and

administrative organisation of rural life. The manorial system evolved as a result of the distribution of English land among the Norman nobility. Land was the primary source of wealth and power, and the king granted vast estates to his loyal followers, who in turn became lords of these manors. The lord of the manor had the authority to administer justice through the manorial court, manage the estate's resources, and demand labour and services from the peasants. His residence, the manor house, was a symbol of his authority and status within the manor. The medieval period also saw the establishment of new settlements and the expansion of numerous settlements identified in the Domesday Book, but some such as Gowthorpe (**1232**) and Kenningham (**1067**) fell out of use and were deserted. The medieval period is also represented by the 15th century and later scheduled monument 'Newton Flotman Bridge' (**1002885**), which crosses the Tas on the south-eastern outskirts of Newton Flotman, 2.4 km north-east of Flordon and 1.7 km south-east of the draft Order Limits.

- 2.2.6 The post medieval period within Section A of the Project is characterised by the introduction of large-scale infrastructure, principally for transport, communication, and drainage, alongside the continued agricultural development and management of the landscape. The post medieval assets comprise registered parks and gardens, listed buildings, conservation areas, non-designated buildings, excavated archaeological features and finds derived from metal detector and walkover surveys. The increasingly industrialised farming industry, with its links to wider markets and greater demand provided by access to the rail network, required more labour, which in turn led to the urban expansion of many settlements. The two registered parks and gardens in Section A are of post medieval date and comprise the Grade II\* listed 'Intwood Hall' (**1000320**) and the Grade II 'Rainthorpe Hall' (**1000292**). Of the 391 scoped in listed buildings of Section A, 348 are of post medieval date with the majority of these being farmhouses and associated barns and cottages, reflecting the intensification of the farming industry.
- 2.2.7 The modern period within Section A is characterised by an increase in industrial infrastructure, the advent of military sites and the continued agricultural management of the landscape. Heritage assets are limited to the Grade II listed 'Tacolneston War Memorial' (**1470006**), 20th century military assets including a World War One (WWI) military airfield (**1037**) located 2.5 km north-north-east of Winfarthing and partially within the draft Order Limits, and a Cold War bunker (**1310**) located in the grounds of the Grade II listed Quaker's Farmhouse (**1373606**).

## Section B - Mid Suffolk District Council

- 2.2.8 The designated heritage assets of Section B comprise: 14 scheduled monuments, 408 scoped in listed buildings (29 Grade I, 29 Grade II\* and 350 Grade II), and eight conservation areas. There are 3591 non-designated heritage assets identified in Section B comprising excavated remains, findspots, Portable Antiquities Scheme (PAS) records, moated sites, railways, canals, woodlands, cropmarks, burnt mounds, a milestone, Roman roads, parkland, earthworks and 20th century military assets as well as 89 buildings largely comprising post medieval farmsteads and outbuildings, but also including a bridge and a chapel.
- 2.2.9 The cultural heritage resource of Section B is distributed throughout its bounds and is representative of human activity following the retreat of the ice as the Late Devensian glaciation came to an end, through to WWII in the middle of the 20th century. Findspots of Upper Palaeolithic and Mesolithic flintwork, including an Upper/Terminal Palaeolithic to early Mesolithic flint scatter (**2002**) of the Ahrensburgian long blade

industry (9700 - 9400 BC) found on land on the southern flank of the Waveney valley at the northern limit of Section B, indicate human communities of hunter-gatherers crossed the land bridge which connected the British Isles to mainland Europe and followed the retreating ice and tundra conditions northwards. These communities left very little physical evidence of their existence other than their stone tool industries, but the distribution of the worked flint suggests these hunter-gatherers exploited the river valleys for their resources and as routes through the landscape.

- 2.2.10 The Neolithic period is largely represented by more widespread and concentrated lithic scatters likely reflecting dispersed human activity as the population grew following the introduction of farming. There are, however, the potential remains of two long barrows (**2011**, **2010**), a causewayed ring ditch (**2008**) that may represent the remains of a Neolithic causewayed enclosure or henge monument, and excavated settlement remains (**2601**). The Bronze Age is represented in Section B of the Project by cropmarks of potential funerary monuments, and scatters and findspots of lithics, pottery and metalwork, including a hoard, recorded by the Suffolk HER and by the Portable Antiquities Scheme. The greater visibility of the Bronze Age in the archaeological record likely reflects population growth and shift to a more sedentary existence reflecting the intensification of farming, whilst the presence of funerary and ceremonial monuments suggests organised and likely stratified communities. The potential funerary monuments are represented by ring ditches, some with internal pits, which may be the remains of ploughed out round barrows. A good proportion of the barrow sites are situated close to the river network and would likely have been understood as an ancestral claim of tenure over the landscape and its resources and potentially highlight rivers as tribal boundaries. The hoard, found on farmland within the draft Order Limits north-west of Needham Market, comprised 81 copper alloy artefacts including socketed axe heads, winged axe heads, swords, sickles and a large amount of casting waste. The Iron Age saw further population increase, the intensification of farming and the establishment of villages as identified through several archaeological investigations within Section B. The period is also represented in Section B by numerous artefact scatters and findspots largely comprising coins, pottery and metalwork.
- 2.2.11 The Romano-British period in Section B of the Project is represented by archaeological remains comprising evidence of domestic activity and agricultural practice, and scatters and findspots of pottery, building material and metalwork recorded by the Suffolk HER and by the PAS. The PAS data indicates widespread Romano-British activity, although many of the records likely reflect stray losses or perhaps the effects of manuring. There are, however, a number of finds concentrations that likely indicate the location of a building or farmstead and others that probably relate to settlement and funerary sites. Notable examples include: a Romano-British and Anglo-Saxon artefact scatter (**2164**) located near Wortham that is suggestive of a Romano-British and Anglo-Saxon period inhumation and cremation cemetery; A large concentration of 1204 Romano-British artefacts (**2166**) between Wickham Street and Finningham suggestive of settlement activity; a concentration of 598 Romano-British artefacts (**2134**) near Barking suggestive of settlement activity; and concentrations of Romano-British artefacts near Burgate Great Green (**2162**), north of Barking (**2159**) and near Great Bricett (**2145**) that may indicate the locations of buildings or farmsteads.
- 2.2.12 The early medieval period in Section B is represented by the more nucleated settlement pattern of dozens of towns, villages and hamlets recorded by the Domesday Book of 1086. Elsewhere within the Section, and as noted above, there is a Romano-British and Anglo-Saxon artefact scatter (**2164**) located near Wortham

that is suggestive of a Romano-British and Anglo-Saxon period inhumation and cremation cemetery. The early medieval period is also represented in Section B by archaeological remains comprising an inhumation at St. John's House Hospital c. 1.5 km south-west of Palgrave (**2191**); a possible 'hut site' 320 m east of Worthing (**2195**); and by numerous findspots and low-density artefact scatters recorded across the Section.

- 2.2.13 The medieval period is represented in Section B of the Project by archaeological remains comprising evidence of domestic activity, agricultural practice and scatters and findspots of pottery and metalwork recorded by the Suffolk HER and by the Portable Antiquities Scheme. There are as well, several churches and moated sites dating to the medieval period as well as settlement centres that have medieval origins. There are 34 Grade I and Grade II\* medieval churches within the Section B 3 km study area, reflecting the huge influence of the Church over the medieval landscape and the human population therein. The numerous moated sites in the area (20 within the 250 m study area), likely represent a network of manorial sites which defined the economic, social, and administrative organisation of rural life. The manorial system evolved as a result of the distribution of English land among the Norman nobility. Land was the primary source of wealth and power, and the king granted vast estates to his loyal followers, who in turn became lords of these manors. The lord of the manor had the authority to administer justice through the manorial court, manage the estate's resources, and demand labour and services from the peasants. His residence, the manor house, was a symbol of his authority and status within the manor. The medieval period also saw the establishment of new settlements and the expansion of numerous settlements identified in the Domesday Book. Several of the moated sites noted above are scheduled monuments and comprise: 'Burgate Hall moated site' (**1017331**) c. 1.5 km south of Worthing; 'Moated site at Stubbing's Entry' (**1016700**) c. 1.4 km south-west of the centre of Mellis; 'Westhorpe Hall moated site and associated fishponds' (**1016697**) on the eastern edge of Westhorpe; 'Russell's Hill moated site' (**1006000**) c. 750 m south-east of Cow Green; 'Rookyard Farm Moats' (**1451408**) on the northern outskirts of Old Newton; 'Chapel Farm moated site' (**1006050**) 140 m north of Lower Farm Road, Ringshall Stocks; 'Great Bricett moated site' (**1006048**) on the western edge of Great Bricett; and 'Offton Castle' (**1006049**) c. 380 m south of the centre of Offton. Section B also contains two further scheduled monuments comprising 'Chantry (site of)' (**1006030**) at the western end of Badley Lane, Badley, and 'Medieval ringwork in Burgate Wood' (**1016699**) within Burgate Wood and 150 m west of the Burgate Hall moated site scheduled monument (**1017331**).
- 2.2.14 The post medieval period within Section B of the Project is characterised by the introduction of large-scale infrastructure, principally for transport, communication, and drainage, alongside the continued agricultural development and management of the landscape. The post medieval assets comprise listed buildings, conservation areas, non-designated buildings, excavated archaeological features and finds derived from metal detector and field walking surveys. The increasingly industrialised farming industry, with its links to wider markets and greater demand provided by access to the rail network, required more labour, which in turn led to the urban expansion of many settlements. Of the 408 scoped in listed buildings of Section B, 307 are of post medieval date with the majority of these being farmhouses and associated barns and cottages, reflecting the intensification of the farming industry. There are also, however, a few country houses and public houses.
- 2.2.15 The modern period within Section B is characterised by an increase in industrial infrastructure, the advent of military sites and the continued agricultural management

of the landscape. Heritage assets of the modern era are limited to the site of a former pillbox (**2301**) c. 190 m north of Barking village, four WWII assets (**2300**) c. 2 km south-east of Ringshall, and the site of the demolished Sproughton/Burstall Patrol Auxiliary Unit Operational Base (**2302**) c. 2 km south-west of Bramford.

## Section C - Babergh District Council, Colchester City Council and Tendring District Council

- 2.2.16 The designated heritage assets of Section C comprise: nine scheduled monuments; one registered park and garden (Grade II); 322 scoped in listed buildings (17 Grade I, 31 Grade II\* and 274 Grade II), and eight conservation areas. There are 234 non-designated heritage assets identified in Section C comprising findspots, cropmarks, post-medieval farmsteads, moats, and 20th century military assets.
- 2.2.17 The cultural heritage resource of Section C is distributed throughout its bounds and is representative of human activity from the palaeolithic period through to the Cold War following WWII in the mid to late 20th century. A single findspot of a Palaeolithic axe (**3002**) has been identified within Section C, which although underrepresented for the time period does indicate that communities of hunter-gatherers crossed the land bridge which connected the British Isles to mainland Europe and followed the retreating ice and tundra conditions northwards. These communities left very little physical evidence of their existence other than their stone tool industries, but the distribution of the worked flint suggests these hunter-gatherers exploited the river valleys for their resources and as routes through the landscape.
- 2.2.18 The Neolithic period is represented by more widespread and concentrated lithic scatters likely reflecting dispersed human activity as the population grew following the introduction of farming. Four Scheduled Monuments also dating to the Neolithic Period are located within Section C and comprise a 'Site discovered by aerial photography S of King's Wood' (**1006022**) interpreted as a henge, a 'Henge 70 m north east of Cross Cottages' (**1019078**), a 'Round barrow W of Lawford Hall' (**1002125**) in the form of a bowl barrow, and a 'Settlement site NNE of Lawford House' (**1002157**), likely to be a causewayed enclosure but also referred to as a henge. These assets suggest the locations of possible tribal boundaries or settlement activity in the case of the enclosure, but also the area being utilised as part of a wider religious landscape in the case of the henge monuments. The Bronze Age is further represented by scatters of pottery, tools and flintwork but excavated pits and ditches suggest the intensification of farming and settlement resulting in the physical manipulation of the landscape. The scheduled monument of a 'Crop mark site S of Ardleigh' (**1002146**) marks the location of a multi-period cropmark complex site, with archaeological material indicating a middle Bronze Age funerary 'urnfield' as well as six rings ditches producing further urned cremations of a similar type and date. Funerary sites and potential barrow locations (burial mounds) within Section C would likely have been understood as an ancestral claim of tenure over the landscape and its resources. The Iron Age saw further population increases, with an intensification of farming and settlement growth as has been identified through archaeological investigations within Section C. Possible Iron Age settlement activity has been suggested at various locations within Section C, for example at the scheduled 'Crop mark site S of Ardleigh' (**1002146**) outlined above, as well as five late Iron Age farmsteads (**3016**) showing activity up to the early medieval period, south of Wick Farm.
- 2.2.19 The Romano-British period in Section C is represented by archaeological remains comprising evidence of domestic activity, travel, finance, and settlement recorded in

the HER, by PAS, and Historic England. The PAS data indicates widespread Romano-British activity, although many of the records likely reflect stray losses or perhaps the effects of manuring. These finds include artefact scatters of coins, pottery, tiles, brick, oyster shell, and a stone figure (**3037**). Romano-British artefacts were found throughout Section C but a concentration of assets in Ardleigh (**1002146**), north-east of Colchester, illustrates the long-term multi-period settlement of the area, and finds including burials, ditches, pits, pottery, and kilns, indicate that the settlement was of considerable size and importance. Colchester, or Camulodunum, was an important military site and settlement during the Romano-British period, and the cropmark site (**1002146**) sits equidistant in the landscape between Colchester to the south-west and the river Stour to the north-east. The discovery of possible roman roads in this area (**3207** and **3035**) illustrates trade and travel in this area, as a possible 'commuter' settlement between the river and inland. Further north on the Essex/Suffolk border, the remains of a possible bridge (**3024**) was recorded on the same site as a bridge from a later period.

- 2.2.20 The early medieval period in Section C is represented by the more nucleated settlement pattern of towns, villages and hamlets recorded by the Domesday Book of 1086. These settlements follow the natural landscape within the Stour Valley and their communities would have utilised the river and its tributaries, as well as its farming landscape to support their livelihoods. It is also represented by HER data and PAS finds. These finds include a square enclosure cropmark (**3186**) c.2 km south of Chattisham that indicates a former probable moat, and an earthwork of a former enclosure (**3096**) in the area around Ardleigh. Other findspots indicative of early medieval activity within the section include a strap fitting (**3069**), a Viking-style brooch (**3081**) and a stirrup (**3093**).
- 2.2.21 The medieval period is represented in Section C of the Project by archaeological remains representing agricultural activity, and scatters of findspots recorded by the HER and PAS. Finds recorded throughout this section include but are not limited to artefact scatters, findspots of personal belongings (jewellery, mounts, buckles, strap ends, jettons) and materials (tiles, pottery), cropmarks of field boundaries and enclosures, a bridge (**3129**), multiple farmsteads, and a churchyard (**3091**). There are several churches and settlements which have their origins in this period throughout Section C. The types of listed buildings can be categorised into churches and farmsteads (which dominate this selection), and domestic dwellings. The number of these types of buildings and their locations within or outside settlements indicate the importance of religion to rural farming communities in the medieval period. There are a few moated sites within Section C, for example Scheduled Monuments in Chattisham (**1019889**) and Shelly (**1019815**), and non-designated moats in Burstall (**3103** and **3047**), Shelley (**3042**), and surrounding the Church of St Lawrence in Wenham Parva (**1033410**). The moated sites in this section likely represent a network of manorial sites which defined the economic, social, and administrative organisation of rural life. The manorial system evolved as a result of the distribution of English land among the Norman nobility. Land was the primary source of wealth and power, and the king granted vast estates to his loyal followers, who in turn became lords of these manors. The lord of the manor had the authority to administer justice through the manorial court, manage the estate's resources, and demand labour and services from the peasants. His residence, the manor house, was a symbol of his authority and status within the manor. The group of listed buildings (**1003759**, **1033405**, **1033410**) and scheduled monument (**1003759**) at Wenham Castle are an excellent example of a medieval manorial site.

- 2.2.22 The post-medieval period in Section C is characterised by the introduction of large-scale infrastructure, principally exemplified by the railways (**3244** and **3168**) and canals (**3245** and **3194**), as well as the continuation of agricultural development and management of the rural landscape. The post-medieval assets comprise designated and non-designated historic buildings, conservation areas, and finds recorded by the HER and PAS. The industrialisation of Britain in this period saw the mass-movements from rural areas into urban centres, and this was reflected in the architecture, the building of new dwellings and amenities, and the loss of or change to historic field boundaries due to the enclosure of farmland.
- 2.2.23 The modern period within Section C is characterised by military sites and the continuation of agricultural management of the landscape, as well as some post-war boundary loss within the agricultural landscape (**3223**). There is one designated heritage assets for this period, the Grade II listed 'Ketelfield and Attached Garden Terrace and Steps to the South elevation' (**1416968**). The military sites include RAF sites and airfields, operation bases and posts, a pill box, a road barrier, and an ammunition shelter. WWII activity is well represented in the record for this area due to the area's strategic position in relation to the east coast and its proximity to mainland Europe.

## Section D - Colchester City Council

- 2.2.24 The designated heritage assets of Section D comprise: eight scheduled monuments; 280 scoped in listed buildings (12 Grade I, 26 Grade II\* and 242 Grade II) and three conservation areas. There are 154 non-designated heritage assets identified in Section D broadly comprising findspots, cropmarks, settlements, buildings and ruins, farmsteads, moated sites, roman road and 20th century military structures.
- 2.2.25 The cultural heritage resource of Section D is distributed throughout its bounds and is representative of human activity following the retreat of the ice as the Late Devensian glaciation came to an end, through to WWII in the middle of the 20th century. This section provides evidence from across the prehistoric period, spanning from the Palaeolithic to the Iron Age, with a total of 37 assets informing understanding of this period. Findspots of Mesolithic worked flint indicate human communities of hunter-gatherers, providing some evidence of the region's inhabitants during this period and their use of the landscape and indicates that communities of hunter-gatherers crossed the land bridge which connected the British Isles to mainland Europe following the retreating ice and tundra conditions northwards. The 'Wissington Ring Ditch Cluster' (**1003758**) is a scheduled monument located approximately 1 km north of Little Horkesley. This cluster comprises two prominent ring-ditches and a cluster of smaller circles, reflecting a complex of features associated with probable Neolithic or Bronze Age activity, likely representing burial mounds or ritual structures.
- 2.2.26 Another scheduled monument dating to the prehistoric period is the 'Small Multivallate Hillfort known as Pitchbury Ramparts' (**101995**) situated in a rural location with agricultural fields to the south and dense woodland to the north. The hillfort offer insights into Iron Age settlement patterns, featuring earthwork boundaries and revealing information about the character and duration of its use. A prominent Iron Age site in the region, although located outside the study areas of the Project, is the Late Iron Age oppidum of Camulodunum (modern-day Colchester). Camulodunum was one of the most prominent Iron Age settlements in southeastern Britain and played a pivotal role as a hub for political, economic, and social activities, characterized by substantial fortifications. Other notable Iron Age occupation features include those near Fossetts Lane, Park Lane in Langham, and Holly Tree Farm in

Boxted. These sites contribute valuable information about settlement practices, activities, and potential industrial endeavours during the late pre-Roman Iron Age.

- 2.2.27 During the Roman period Camulodunum played a central role as a colonia and the capital of Roman Britain. The draft Order Limits intersect the hinterland of Roman Colchester, unveiling a rich archaeological heritage. Section D encompasses various Roman assets, including two scheduled monuments and numerous non-designated sites catalogued by the Essex HER. Among these, the remains of a Roman road, 'Stane Street,' stand out, connecting Colchester to Coggeshall and highlighting the advanced road network established during this period. The area near Great Tey/Marks Tey/Little Tey reveals a Roman villa (**1013516**), a scheduled monument of high value, providing insights into Roman lifestyles. Excavations at another scheduled monument, Court Knoll (**1003757**), situated near Great Horkesley/Little Horkesley/West Bergholt, provided evidence of Romano-British occupation. The site potentially continued in use, or was later reused, during the medieval period, possibly as a manor. Additionally, Romano-British artefacts, pottery, and structural remnants from across the region contribute to our understanding of occupation and activities. The Romano-British period assets within Section D are diverse, ranging from roadways and villas to earthworks and burials.
- 2.2.28 During the early medieval period the North Essex claylands and North Thames Basin became home to a relatively dense population of Saxon settlers. This era, although limited in archaeological visibility, witnessed the establishment of a distinct settlement pattern by the late 11th century as evidenced by entries in the Domesday Book of 1086. This documented settlements like Fordham, Wormingford, West Bergholt, Aldham, Stanway, Great and Little Tey, offering a glimpse into the settlement pattern of the region in this period. These settlements reveal an agricultural and pastoral economy centred around dispersed settlements and intricate field systems. Section D of the Project may not have direct representations of the early medieval period, but many present-day villages, hamlets, and churches likely trace their origins to this era.
- 2.2.29 Evidence for the medieval period emphasizes the continuity of settlement patterns and agricultural practices. This period is represented through dispersed settlements, mixed farming, and archaeological evidence such as charcoal-rich pits and medieval pottery sherds. Notable structures, including Grade I listed churches such as 'Church Of All Saints' (**1222737**) 'Church Of St Mary Wiston' (**1351854**) and 'Church of St Barnabas' (**1238806**) contribute to the understanding of the medieval landscape. The 'Medieval Moat at Marks Tey Hall' (**1477794**) is a scheduled monument, located south of Marks Tey. This well-preserved site encompasses the surviving arms of a rectangular moat encircling Marks Tey Hall. The moated site not only provides valuable archaeological and paleoenvironmental insights but also has a documented history tracing the lineage of the Tey family and the site's evolution over centuries. Its setting, intertwined with the Grade II\* listed 'Marks Tey Hall South Barn' (**1224577**) and other structures, adds to its historical significance.
- 2.2.30 The post medieval period in Section D is characterised by notable changes in transportation, communication, and drainage, leaving a lasting imprint on the landscape. Noteworthy was the development of the agricultural sector, which led to the expansion of established medieval settlements, driven by intensified farming practices. Evidence for the impact of this beyond the settlements themselves is demonstrated at Marks Tey, through the scheduled monument 'Circular Brick Kilns at W H Collier Brick and Tile Works' (**1020999**). This industrial site, created in 1863, consists of two circular kilns and their associated brick working floor, offering valuable insights into both 19th-century brick manufacturing and indirect evidence for the expansion of settlements and industry as this drove the demand for bricks. The

previous rural character of the area was however preserved, featuring scattered villages, hamlets, and farmsteads surrounded by enclosed field systems. The post medieval assets broadly comprise listed buildings, conservation areas, non-designated buildings, excavated archaeological features and findspots, many of which represent this intensification of farming activity within Section D during this period.

- 2.2.31 In the modern period the assets within Section D of the Project include WWII remains and infrastructure developments. The scheduled 'World War II Eastern Command Line at Chappel Viaduct' (**1020687**) demonstrates various defensive structures strategically positioned around the Chappel Viaduct, designed to act as a stop line in event of invasion. The Boxted WWII Airfield (**4063**) provides evidence of the operational history during World War II, with remnants of runways and perimeter tracks still visible. Other World War II assets include pillboxes, an ammunition shelter, anti-tank rails, and road barriers, contributing to the broader system of Eastern Command Line defences. Notable is the 'Road Barrier / Anti-Tank Pimple, New Road, Fordstreet' (**4042**), marked by a unique pyramid-shaped anti-tank pimple.

## Section E - Braintree District Council

- 2.2.32 The designated heritage assets of Section E comprise: ten scheduled monuments; one registered park and garden (Grade II); 200 scoped in listed buildings (19 Grade I, 14 Grade II\* and 167 Grade II), and six conservation areas. There are 160 non-designated heritage assets identified in Section E broadly comprising of findspots, moated sites, farmsteads, cropmarks, geophysical anomalies, parkland, earthworks and WWII infrastructure associated with RAF Rivenhall (**5239**).
- 2.2.33 The cultural heritage resource of Section E is distributed throughout its bounds and is representative of human activity following the retreat of the ice as the Late Devensian glaciation came to an end, through to WWII in the 20th century. Findspots of Upper Palaeolithic and Mesolithic flintwork indicate human communities of hunter-gatherers crossed the land bridge which connected the British Isles to mainland Europe and followed the retreating ice and tundra conditions northwards. These communities left very little physical evidence of their existence other than their stone tool industries, but the distribution of the worked flint suggests these hunter-gatherers exploited the river valleys for their resources and as routes through the landscape. The Neolithic period is represented by more widespread and concentrated lithic scatters likely reflecting dispersed human activity as the population grew following the introduction of farming. The Scheduled Monument of a Neolithic long mortuary enclosure and later Bronze Age round barrow (**1017230**) in the floodplain of the River Blackwater further suggests the presence of possible tribal boundaries or a claim to the tenure over the landscape. The Bronze Age is further represented by scatters of pottery, tools and flintwork but excavated pits and ditches suggest the intensification of farming and settlement resulting in the physical manipulation of the landscape. The cropmarks of several further potential barrow sites (burial mounds) are also recorded in Section E and would likely have been understood as an ancestral claim of tenure over the landscape and its resources. The Iron Age saw further population increases, with an intensification of farming and settlement growth as has been identified through archaeological investigations within Section E. At Cressing Temple (**5033**) a possible middle Iron Age settlement has been suggested nearby, with the Cressing Temple area itself utilised for agricultural activities. One further example within Section E is at Rivenhall Airfield where middle Iron Age pits and late Iron Age ditches and gullies associated with settlement activity (**5134**) have been discovered, with the

investigations suggesting an active settlement during the late Iron Age to Romano-British period, possibly located to the south and west of the investigations.

- 2.2.34 The Romano-British period saw the continued occupation of some farmsteads and settlements, the abandonment of others and the founding of larger settlements. High-status villa sites also appear for the first time in this period such as the Scheduled Monument of 'Roman villa, Anglo-Saxon hall, cemetery and church site, around and to the north and east of St Mary and All Saints Church' (**1013831**). The villa complex comprised at least four buildings, associated ancillary structures and features and a footpath which later became the focus of an early medieval (Anglo-Saxon) cemetery and a church. Elsewhere across Section E, the Romano-British period is represented by excavated remains, findspots comprising metalwork, coins, pottery and building material that in places are concentrated enough to likely represent potential settlement locations. One such concentration, for example, has been identified through archaeological investigations at the Scheduled Monument of Cressing Temple (**1002122**).
- 2.2.35 The early medieval period in Section E is represented by two scheduled monuments including the 'Roman villa, Anglo-Saxon hall, cemetery and church site, around and to the north and east of St Mary and All Saints Church' (**1013831**) mentioned above, and the 'cemetery 150 m east of Easterford Mill' (**1013515**). Such activity is suggestive of nearby early medieval settlement activity. The presence of a more nucleated settlement pattern in the early medieval period is reflected by the dozens of towns, villages and hamlets recorded by the Domesday Book of 1086. Elsewhere across Section E, the early medieval period is represented by activity including early medieval (late Anglo-Saxon to Saxo-Norman) remains associated with the moat of the Anglo-Saxon manor at Cressing Temple (**1002122**), building fabric within medieval period ecclesiastical buildings such as the Church of St. Etheldreda (**1147914**), and the foundations of the 'Church of St Mary and All Saints' (**1169594**). These assets are also suggestive of nearby settlement and burial activity.
- 2.2.36 The medieval period within Section E is represented by five scheduled monuments including 'Coggeshall Abbey' (**1018865**), Cressing Temple (**1002122**), 'Blunts Hall ringwork' (**1012098**), 'Great Loyes moated site and fishpond' (**1008979**), and the 'Moated site and two fishponds at Black Notley churchyard, 20 m east of St Peter's and St Paul's Church' (**1013763**). In broad terms these scheduled monuments represent a heavy ecclesiastical presence within Section E in the medieval period. This is best demonstrated by the presence of Coggeshall Abbey and a number of further church complexes. Cressing Temple is of particular note as the location of a medieval chapel and moat associated with the Knights Templars, recorded as the first recorded settlement of the Knights Templar in the UK. This reflects the huge influence of the Church over the medieval landscape and the surrounding population. A number of moated manorial sites, farmstead complexes, and settlement centres have also been identified dating to the medieval period. The numerous moated sites in the area likely represent a network of manorial sites which defined the economic, social, and administrative organisation of rural life. This includes the registered park and garden (RPG) of 'Faulkbourne Hall' (**1000341**) with 16th century origins underlying the current 19<sup>th</sup> century gardens. The manorial system evolved as a result of the distribution of English land among the Norman nobility post 1066. Land was the primary source of wealth and power, and King William I granted vast estates to his loyal followers, who in turn became lords of these manors. The lord of the manor had the authority to administer justice through the manorial court, manage the estate's resources, and demand labour and services from the peasants. Manor houses were also a symbol of authority and status within the manor. The medieval

period also saw the establishment of new settlements and the expansion of numerous settlements identified in the Domesday Book, but some such as Faulkbourne (**5018**) fell out of use and were later deserted. The medieval period is also represented by defensive fortifications such as the scheduled monument of 'Blunts Hall ringwork' (**1012098**) overlooking the River Brain.

- 2.2.37 The post medieval period within Section E of the Project is characterised by the continued use of manorial hall and farmstead complex locations, and the introduction of more large-scale infrastructure. This was principally for transport, communication and drainage, alongside the continued agricultural development and management of the landscape through more industrial level activities such as mill houses, such as 'Pointwell Mill House' (**1170230**). The post medieval assets broadly comprise of listed buildings, conservation areas, non-designated buildings, excavated archaeological features and findspots, many of which represent more intensive farming activity within Section E during this period. The increasingly industrialised farming activity, with its links to wider markets and greater demand provided by access to the rail network, required more labour, which in turn led to the urban expansion of many surrounding settlements.
- 2.2.38 The modern period within Section E is characterised by an increase in industrial infrastructure, the advent of military sites and the continued agricultural and industrial management of the landscape. Silver End 'model village' (**CA1** and **5195**) dates to this period and was constructed between 1926 and 1932 to provide accommodation and amenities for the workforce of Crittalls Manufacturing Company Ltd., 90% of whom were disabled ex-servicemen. The remaining modern period asset of particular note is Royal Air Force (RAF) Rivenhall (**5239**) constructed by the United States Army Air Forces (USAAF) and opened in 1942 during the height of WWII. The base was used by both the RAF and USAAF for various fighter command and bomber command units during the war, after which the base remained as a reserve base until 1956 when it was finally closed. Some of the land associated with the base was then leased to the Marconi Company. The northern half of the airfield has since become Bradwell Quarry.

## Section F - Chelmsford City Council

- 2.2.39 The designated heritage assets of Section F comprise: five scheduled monuments; two registered parks and gardens (one Grade II\*, one Grade II); 236 scoped in listed buildings (three Grade I, 12 Grade II\* and 221 Grade II), and six conservation areas. There are 131 non-designated heritage assets identified in Section F comprising findspots, moated sites, farmsteads, funerary activity, cropmarks, geophysical anomalies, earthworks and military assets (dating from WWI, WWII and the Cold War).
- 2.2.40 The cultural heritage resource of Section F is distributed throughout its bounds and is representative of human activity following the retreat of the ice as the Late Devensian glaciation came to an end, through to the Cold War. Findspots of Upper Palaeolithic and Mesolithic flintwork indicate human communities of hunter-gatherers crossed the land bridge which connected the British Isles to mainland Europe and followed the retreating ice and tundra conditions northwards. These communities left very little physical evidence of their existence other than their stone tool industries, but the distribution of worked flints suggests these hunter-gatherers exploited the river valleys for their resources and as routes through the landscape. The Neolithic period is represented by concentrated lithics as well as a pit, hearth and postholes, likely reflecting dispersed human activity as the population grew following the introduction

of farming. The Bronze Age represents a time of farming intensification resulting in further physical manipulation of the landscape. The Bronze Age is largely represented within Section F by scatters of pottery and flintwork as well as cropmarks of a possible ploughed out barrow and linear features (**6010**) within a field south of Mashbury Road. The barrows in this period would likely have been understood as an ancestral claim of tenure over the landscape and its resources, with the potential to also highlight tribal boundaries. The Iron Age saw further population increase, the intensification of farming and the establishment of villages as identified through archaeological investigations within Section F. The principal example Iron Age activity within Section F is the Scheduled Monument of 'Settlement Site at Ash Tree Corner' (**1002140**) which forms part of an extensive pre-Belgic, Belgic and Romano-British settlement located on the slopes of the Chelmer Valley.

- 2.2.41 The Romano-British period saw the continued occupation of some farmsteads and settlements such as at Ash Tree Corner outlined above, and the abandonment of others. High-status villa sites also first appear in this period a number of which have been identified within Section F, such as the Scheduled Monument of 'Roman Villa 200 m east of Howletts' (**1011809**). This villa complex is visible as cropmarks and comprise of buried archaeological features and deposits including building foundations, pits, and ditches. Elsewhere across Section F, the Romano-British period is represented by excavated remains, findspots comprising metalwork, coins, pottery and building material, road networks, as well as funerary and religious activity. Some examples of this within Section F include a Romano-British cemetery, evidenced by cremation urns (**6080**), a temple at Stacey's Farm (**6062**), and part of a Roman road found during archaeological investigations in 1959 (**6081**).
- 2.2.42 No early medieval records have been recorded by the HER within Section F of the Project. However, numerous settlements recorded in the Domesday Book of 1086 are located within Section F and are suggestive of these settlements being present during this period prior to the Norman Conquest.
- 2.2.43 The medieval period within Section F is represented by three scheduled monuments including 'Gubbion's Hall moated site' (**1016802**), 'Barn near King John's Place' (**1002166**), and a moated site known as 'Franklin's Island' (**1017002**). In broad terms these scheduled monuments represent a number of moated sites within Section F which likely represent a network of manorial sites which defined the economic, social, and administrative organisation of rural life. The manorial system evolved as a result of the distribution of English land among the Norman nobility post 1066. Land was the primary source of wealth and power, and King William I granted vast estates to his loyal followers, who in turn became lords of these manors. The lord of the manor had the authority to administer justice through the manorial court, manage the estate's resources, and demand labour and services from the peasants. Manor houses were also a symbol of authority and status within the manor. The medieval period also saw the establishment of new settlements and the expansion of numerous settlements identified in the Domesday Book. A number of farmstead complexes, and settlement centres have also been identified dating to the medieval period within Section F. Parish boundaries dating to this period have also been identified, including Border Wood (**6017**), an ancient, semi-natural linear woodland containing a large ditch and bank. A heavy ecclesiastical presence within Section F in the medieval period is also demonstrated by the presence of 10 churches, such as the Grade I listed Church of St. Mary the Virgin (**1171104**). This reflects the huge influence of the Church over the medieval landscape and the surrounding population.
- 2.2.44 The post medieval period within Section F of the Project is characterised by the continued use of manorial hall and farmstead complex locations, and the introduction

of more large-scale infrastructure. This was principally for transport, communication and drainage, alongside the continued agricultural development and management of the landscape through more industrial level activities such as mill houses, such as the roundhouse of a post mill (**6147**) located at the southern limits of Chatham Green. The post medieval assets broadly comprise of listed buildings, conservation areas, registered parks and gardens, non-designated buildings, excavated archaeological features and findspots, many of which represent more intensive farming activity within Section F during this period. The increasingly industrialised farming activity, with its links to wider markets and greater demand provided by access to the rail network, required more labour, which in turn led to the urban expansion of many surrounding settlements.

- 2.2.45 The modern period within Section F is characterised by an increase in industrial infrastructure, the advent of WWI, WWII and Cold War military sites and the continued agricultural and industrial management of the landscape. Good examples of military installations within Section F of this period include, a WWI Second Class Royal Flying Corps night landing ground was located at Broomfield Court, Chelmsford (**6011**), an ammunition shelter (**6087**) to the south-east of Great Leighs, an Auxiliary Unit Operational Base to the south of Great Leighs (**6088**), a number of WWII pillbox and floodlight locations, and also a Cold War nuclear monitoring post (**6089**) north of Little Waltham.

## Section G - Brentwood Borough Council and Basildon Borough Council (and part of Chelmsford City Council)

- 2.2.46 The designated heritage assets within Section G comprise: six scheduled monuments; on Grade II\* registered parks and gardens; 91 scoped in listed buildings (5 Grade I, 12 Grade II\* and 74 Grade II), and eight conservation areas. There are 36 non-designated heritage assets comprising of: findspots, moated sites, cropmarks, assets identified from documentary/ cartographic sources, earthworks, settlements, a fishpond, railway crossings, a Roman road and 20th century military assets.
- 2.2.47 The cultural heritage resource is scattered throughout the Section and represents activity from the prehistoric period to the modern era. There are several undated features which, if they were to be archaeologically investigated, could reveal their date and character. The prehistoric period is underrepresented in Section G, for both designated and non-designated. This is likely due to lack of investigation and recording of heritage assets from the period rather than reflective of an absence across Section G. In fact, it is likely that Section G hold similar archaeological remains for this period as in other sections in Essex. The known prehistoric assets include; two Mesolithic flint hand axes, a Neolithic hand axe, the scheduled remains of two Bronze Age bowl barrows, including urns, and an Iron Age urnfield at Nosey Woods (**1019485**). This was a multi-phase scheduled monuments and appears in most of the time periods and is located close to Billericay, approximately 2.2 km to the east of the draft Order Limits.
- 2.2.48 The Roman is also underrepresented in this Section, although the assets that have been identified do suggest that there is settlement and other activity within this area. This is likely due to lack of investigation and recording of heritage assets from the period rather than reflective of an absence across Section G. Further investigation, partially where the Roman road (**7032**), which cuts across the draft Order Limits, could reveal more previously unrecorded archaeological remains from this time period. The scheduled remains at Nosey Woods (**1019485**) includes an urnfield. Burnt material was found close to the cemetery suggesting that cremations were

happening in situ, or the pyre remains were interred with the burial. A scheduled villa (**1008895**) and associated buildings and field boundaries was located 985 m to the west of the draft Order Limits within the norther part of the Section. The finds recovered from this monument, and the layout of the buildings, shows that the villa was a high-status residence.

- 2.2.49 No early medieval records have been recorded within the draft Order Limits or study area for Section G. There are, however, numerous settlements recorded in the Domesday Book within the Section indicating a strong Anglo-Saxon presence in the area prior to the Norman Conquest. The medieval period is represented across the Section mainly by settlements, most of which have continued on into the modern period. This includes heritage assets such as listed buildings, scheduled monuments, fishpond, moats and documentary or cartographic evidence. Some of the conservation areas began within this time period. The medieval period is rich in assets which show that this area of Essex was thriving during this time. The setting of the majority of the built assets have retained their historical setting, if only slightly altered which makes a considerable contribution to the value of the assets.
- 2.2.50 The post medieval period is well represented, mainly by settlements (and assets connected with them) some of which show continuation from the medieval period. This includes conservation areas, listed buildings, archaeological remains, find spots and documentary or cartographic evidence. The setting of the majority of the built assets have retained their historical setting, if only slightly altered which makes a considerable contribution to the value of the assets. Non-designated cropmarks of non-extant field boundaries show that the land has altered since this time by the creation or larger fields by the development of modern farming techniques. These assets add to local historical knowledge of how the land was worked during this time period.
- 2.2.51 The modern period for Section G comprises of assets from WWI and WWII which shows how the local population defended their villages and practiced vital trench digging. These aid in the understand where of there were certain critical or important junctions, roads etc. Nosey Woods (**1019485**) contains WWI slit trenches. These are a rare survival and are well preserved. The asset was also used during WWI, this time for ammunition storage.
- 2.2.52 The assets with uncertain date are mainly represented by cropmarks which offer a variety of hints as to what they could be and from what time period they are from. Once these assets have been archaeological examined, they function and date can, within reason, be established but until then they are unknown, and no conclusions can be made.

## Section H - Thurrock Council

- 2.2.53 The designated heritage assets of Section H comprise: 14 scheduled monuments, 79 scoped in listed buildings (6 Grade I, 10 Grade II\* and 63 Grade II), and nine conservation areas. There are 99 non-designated heritage assets identified in Section H comprising excavated remains, findspots, a moated site, railways, cropmarks, Roman roads, railways, buildings, earthworks and 20th century military assets.
- 2.2.54 The cultural heritage resource of Section B is distributed throughout its bounds and is representative of human activity following the retreat of the ice as the Late Devensian glaciation came to an end, through to the Second World War in the middle of the 20th century. Findspots of Upper Palaeolithic and Mesolithic flintwork, including Upper

Palaeolithic artefacts of the Chellean lithic industry (8003) found on Saffron Garden Farm, indicate human communities of hunter-gatherers crossed the land bridge which connected the British Isles to mainland Europe and followed the retreating ice and tundra conditions northwards. These communities left very little physical evidence of their existence other than their stone tool industries, but the distribution of the flintworks suggests these hunter-gatherers exploited the river valleys for their resources and as routes through the landscape.

- 2.2.55 The Neolithic period of Section H is dominated by the scheduled monument 'Causewayed enclosure and Anglo-Saxon cemetery 500 m ENE of Heath Place' (1009286). The causewayed enclosure comprises three circular ditches, interrupted by irregular causeways, c.160 m in diameter, which became the focus Iron Age occupation and at least five Anglo-Saxon round barrows. Elsewhere, the Neolithic is largely represented by more widespread and concentrated lithic scatters and sparse archaeological remains, likely reflecting dispersed human activity as the population grew following the introduction of farming.
- 2.2.56 The Bronze Age is extremely well represented in Section H and the assets include two scheduled monuments comprising: a 'Springfield style enclosure and Iron Age enclosures south of Hill House, Baker Street' (1009287), which comprises an external ditch, c.70 m in diameter, with an entrance and traces of a circular building and pits within; and the 'Crop mark complex, Orsett' (1002134), which is multiperiod asset spanning from the Bronze Age to the Roman period, but dominated by Bronze Age remains comprising roundhouses, associated features and a round barrow. Investigation of the multi-period palimpsest of archaeological remains west of Mucking identified three phases of Bronze Age activity, including a large ring ditch, 38 m in diameter with internal buildings, fences, pits, cremations, and a sunken-floor structure and another Springfield enclosure: the South Rings enclosure (8059), which comprised two concentric ditches 4 m wide by 1.5 m with an external diameter of 75 m enclosing an area of 0.44 ha. Elsewhere the Bronze Age is represented but further archaeological remains, artefact scatters, findspots and a hoard of five Late Bronze Age middle Bronze Age rapiers and palstaves (8119). The greater visibility of the Bronze Age in the archaeological record likely reflects population growth and shift to a more sedentary existence reflecting the intensification of farming, whilst the presence of funerary and ceremonial monuments suggests organised and likely stratified communities.
- 2.2.57 The scheduled monuments 'Springfield style enclosure and Iron Age enclosures south of Hill House, Baker Street' (1009287) and 'Crop mark complex, Orsett' (1002134) remained in use in the early Iron Age, whilst the scheduled monument 'Causewayed enclosure and Anglo-Saxon cemetery 500 m ENE of Heath Place' (1009286) became the focus of a middle Iron Age enclosed settlement. The archaeological palimpsest at Mucking was greatly contributed to in the Iron Age, whilst elsewhere in Section H the period is represented by further archaeological remains, cropmarks, and artefact scatters and findspots.
- 2.2.58 The Romano-British period in Section H of the Project is represented by archaeological remains identified at the scheduled 'Crop mark complex, Orsett' (1002134) and at Mucking where buildings, a cemetery, a double ditched enclosure, further enclosures, granaries, metalworking, a mortuary enclosure, pottery kilns and trackways were all recorded. Elsewhere in Section H the period is represented by further archaeological remains including a settlement site on the East Tilbury Foreshore on the banks of the river Thames (8154), cropmarks, and artefact scatters and findspots.

- 2.2.59 The early medieval period in Section B is represented by the more nucleated settlement pattern of dozens of towns, villages and hamlets recorded by the Domesday Book of 1086. Elsewhere within the Section, the scheduled monument 'Causewayed enclosure and Anglo-Saxon cemetery 500 m ENE of Heath Place' (1009286) includes five large round barrows two of which have been excavated revealing Saxon inhumations in wooden coffins; whilst a large amount of substantial sized pits which are likely to be early Saxon grubenhaus are recorded at the scheduled monument 'Crop mark complex, Orsett' (1002134). The Mucking palimpsest site was also the focus of Anglo-Saxon activity with evidence of buildings including grubenhaus, inhumations, cremations, metalworking and enclosures has been recorded. Elsewhere in Section H the period is represented by cropmarks, and artefact scatters and findspots.
- 2.2.60 The medieval period is represented in Section H of the Project by archaeological remains comprising evidence of domestic activity, agricultural practice and scatters and findspots of pottery and metalwork. There are as well, several churches and a moated site dating to the medieval period as well as settlement centres that have medieval origins. There are nine Grade I and Grade II\* medieval churches within the Section B 3 km study area, reflecting the influence of the Church over the medieval landscape and the human population therein. The moated site likely represents an element of a network of manorial sites which defined the economic, social, and administrative organisation of rural life. The manorial system evolved as a result of the distribution of English land among the Norman nobility. Land was the primary source of wealth and power, and the king granted vast estates to his loyal followers, who in turn became lords of these manors. The lord of the manor had the authority to administer justice through the manorial court, manage the estate's resources, and demand labour and services from the peasants. His residence, the manor house, was a symbol of his authority and status within the manor. The medieval period also saw the establishment of new settlements and the expansion of numerous settlements identified in the Domesday Book. Elsewhere in Section H there are several more listed medieval buildings and two scheduled monuments comprising: 'Bishop Bonner's Palace' (1002196), which comprises the remains of a circular enclosure surrounded by a ditch c. 50ft wide, possibly indicating the presence of a moat at the site said to have been the residence of the Bishop of London; 'Dene holes in Hangman's Wood' (1002156), which comprises several shafts up to 25 m deep each with three side chambers.
- 2.2.61 The post medieval period within Section H of the Project is characterised by the introduction of maritime military defences, large-scale infrastructure, principally for transport, communication, and drainage, alongside the continued agricultural development and management of the landscape. The post medieval assets comprise listed buildings, conservation areas, non-designated buildings, excavated archaeological features and finds derived from metal detector and field walking surveys. The increasingly industrialised farming industry, with its links to wider markets and greater demand provided by access to the rail network, required more labour, which in turn led to the urban expansion of many settlements. The majority of the listed buildings of Section B are of post medieval date with the majority of these being farmhouses and associated barns and cottages, reflecting the intensification of the farming industry. There are also, however, a few country houses, public houses and seven scheduled monuments. The monuments comprise 'Earthworks near church, West Tilbury' (1002199); 'East Tilbury Battery' (1013880) built in 1889 to 1890 to support Coalhouse Fort (1013943) with long-range fire; 'Coalhouse Fort battery and artillery defences' (1013943), which the foundations of a Henrician blockhouse coastal battery, a Victorian late 19th century fort, a late 19th century

Quick-Firer battery and a low-level radar tower dating from World War II; 'Tilbury Fort' (**1021092**) a spectacular example of a late 17th century coastal fort with 19th and 20th century alterations; 'Gravesend blockhouse' (**1005120**) a 16th century defensive structures; 'New Tavern Fort, Gravesend, including Milton Chantry' (**1013658**), an unusually complete example of an 18th with an earlier chapel or chantry associated with the Lepper Hospital of St Mary the Virgin at Milton by Gravesend; and 'Shornemead Fort' (**1484434**), a coastal fort built between 1861 and 1871 for the purpose of defending the Thames estuary.

2.2.62

The modern period within Section B is characterised by an increase in industrial infrastructure including Tilbury Power Station (**8020**), military sites and the continued agricultural management of the landscape. The heritage assets of the Modern era is dominated by WWI and WWII assets and these include two scheduled monuments. These assets comprise 'Bulphan World War II bombing decoy, 850 m, and 890 m south-west of 'Doesgate Farm' (**1020998**), and 'Second World War anti-aircraft battery at Bowaters Farm' (**1012185**), which comprises eight concrete gun placements with connecting roads and vehicle parks, magazines, and command post, forming two groups of anti-aircraft artillery.

# 3. Baseline

## 3. Baseline

### 3.1 Introduction

- 3.1.1 This desk-based assessment outlines the current baseline understanding of the Project's Historic Environment. The findings of the assessment are presented from Section A of the Project in the north to Section H in the south and by chronological order.

### 3.2 Section A: South Norfolk Council

#### Location

- 3.2.1 Section A of the Project is in the County of Norfolk and wholly within the District Borough Unitary of South Norfolk. The Project arises in the north at the National Grid Norwich Main Substation c. 2.4 km south of Norwich and c. 600 m south-west of the village of Dunston. From its northern limit, Section A of the Project heads in a generally south-south-west direction, by-passing the settlements of Mulbarton, Tacolneston, Shelfanger and Bressingham before terminating at the County border with Suffolk in the Waveney River valley approximately 2.4 km west of the market town of Diss. Section A of the Project accounts for approximately 30 km of its overall length.

#### Topography

- 3.2.2 The topography of Section A is characterised by the Tas river valley and its tributaries to the east of the Project and by a plateau of higher land to the west. From its northern limit at the National Grid Norwich Main Substation (35 m aOD), the Project crosses a gently undulating landscape climbing to a high point of 45 m aOD c. 1 km west-northwest of Flordon. From this point the Project crosses a tributary of the Tass at 25 m aOD; the Project then climbs again and passes through and undulating landscape with a high point of 55 m aOD south-east of Tacolneston. The Project then crosses the Tass at 26 m aOD before following higher ground to south-east of Shelfanger at 48 m aOD where it crosses a tributary of the Waveney Valley at 33 m aOD. The Project again climbs to 52 m aOD north-east of Bressingham before descending to the Waveney Valley and the County border at 25 m aOD.
- 3.2.3 The topography of Section A has been shaped by the Tass and Waveney Valleys, which have formed as natural drainage channels for the higher, plateaued land around them. This has created a gently undulating landscape of higher ground marked by dry and wet valleys. The Tass flows north towards Norwich where it feeds into the Yare, whilst the Waveney flows generally eastwards before turning north-west of Lowestoft and feeding into the Yare west of Yarmouth.

#### Geology

- 3.2.4 The solid geology of Section A consists entirely of chalk of the Lewes Nodular, Seaford, Newhaven, Culver, and Portsdown Chalk Formations. For the most part, the superficial deposits comprise chalky till of the Lowestoft Formation with sporadic

patches of sand and gravel of the Sheringham Cliffs, Happisburgh Glacigenic and Leet Hill Formations, which largely define the Tass Valley and its tributaries. The southern reaches of the Tass Valley system also include sand and gravel of the Lowestoft Formation, whilst the dry valley tributaries contain superficial head deposits of clay and peat formations. The base of the Tass Valley system contains alluvial clay, silt, sand, and gravel. The Waveney Valley superficial deposits comprise peat, head clay, river terrace sand and gravel, Croxton Member sand and gravel, Ingham Formation sand and gravel and alluvial clay, silt, sand, and gravel.

## Historic Landscape Characterisation

- 3.2.5 The northern limit of the Project north of Swainsthorpe is in National Character Area 84: Mid Norfolk, which is a long-settled agricultural landscape, where arable land is enclosed by winding lanes and hedgerows, interspersed with woodland and heath, and dissected by pastoral river valleys. The remainder of the Project in Section A is in National Character Area 83: South Norfolk and High Suffolk Claylands, which is characterised by a relatively high and predominantly flat clay plateau, incised by numerous small-scale wooded river valleys creating complex slopes (Natural England accessed 17/03/2023).
- 3.2.6 The South Norfolk landscape is further divided into a series of seven Landscape Types as defined in *South Norfolk Landscape Assessment: Landscape Character Areas of the Rural Policy Area* (LUC, 2006). The northern half of the Project in Section A runs approximately north-east/south-west parallel to the Landscape Character Area (LCA) A1: The Tas Rural River Valley on higher ground to the north-west. On its route to the west of Tibenham, the Project passes in and out of LCA B1: Tas Tributary Farmland, LCA D1: Wymondham Settled Plateau Farmland, and LCA E1: Ashwellthorpe Plateau Farmland. From Tibenham, the Project passes through LCA E2: Great Moulton Plateau Farmland, LCA B4: Waveney Tributary Farmland, and LCA A5: Waveney Rural River Valley at the County border.
- 3.2.7 The tributary farmlands (LCA B1 and B4) are characterised by gently undulating landform created by small tributary valleys and are transitional landscapes between the upland plateau and river valley landscapes. There are scattered, small farm woodlands including Ancient Woodland; sparse hedges and hedgerow trees; and a dispersed, evenly distributed settlement pattern of small farmsteads and nucleated villages. The tributaries are elusive, often hidden within the landscape by topography or trees and there is an intricate network of small rural roads often bounded by banks or ditches. The plateau farmlands (LCA D1, E1 and E2) are a distinct flat and elevated landform with large fields of arable monoculture with long views of the district from the plateau edges and across the plateaus. There are mature remnant oak hedgerow trees and straight plateau-top roads with wide grass verges and ditches. The plateaus are sparsely settled with scattered small nucleated and long linear settlements and have isolated churches, moats, and farm ponds.
- 3.2.8 The Historic Landscape Characterisation (HLC) data supplied by the Norfolk Historic Environment Records (HER) (Norfolk Landscape Archaeology/English Heritage, 2009) indicates Section 1 of the Project is dominated by **negligible value** 20th century agricultural enclosure and **low value** 18th to 19th century enclosure. The 18th to 19th century enclosure were part of the 'Georgian Landscape' which was largely the result of agricultural improvements leading to the consolidation and realignment of field boundaries, and the enclosure of marginal lands such as commons and wastes. Improvements in farming practices were also made, such as drainage, manuring, ley crops and crop rotation, and the resulting changes in the

field systems covered not only the agricultural central region but also extending into the Fens and Broads. The distribution of these HLC types does not seem to be influenced by the tributary and plateau farmlands LCAs, however, the enclosures on the plateaus tend to be larger. As well as the 18th to 19th century enclosure noted above, the Georgian Landscape is also represented within the draft Order Limits by **medium value** enclosed meadow (HNF48540, HNF36415, HNF36552, HNF42179), parliamentary fen enclosure (HNF36660) and carr woodland (HNF42177, HNF42178).

- 3.2.9 The pre-18th century landscape has been very much fragmented and/or incorporated to later landscapes. It is, however, represented within the draft Order Limits by **medium value** pre-18th century enclosure (HNF48451, HNF48510, HNF48511, HNF42461, HNF41656), Pre-18th century fen enclosure (HNF42143, HNF42144), anciently enclosed grazing marsh (HNF42274), and enclosed common land (HNF48487, HNF40950). Three parcels of **low value** 18th-20th century woodland plantation (HNF32517, HNF32616, HNF36549) are also noted in the draft Order Limits.

## Conservation Areas

- 3.2.10 There are eight conservation areas in Section A of the Project and their assessment is presented here arranged north to south.
- 3.2.11 The **medium value** Stoke Holy Cross conservation area (**CA21**) is located on the western edge of the settlement and 1.3 km east-south-east of the northern extent of the draft Order Limits at the National Grid Norwich Main Substation. The small conservation area is focused on a Grade II listed **medium value** mill (**1373207**) that is located on a bridge over the Tas river and labelled Stoke Mill (corn) on the first edition OS map of 1882. A mill in Stoke is mentioned in a deed dated 1306, and reference made again in an old record in 1482. The current building on the site dates to 1747, although it was significantly rebuilt in 1853 following a serious fire. In the latter part of the 18th century, it was used to manufacture paper and only later adapted into a flour mill and mustard milling business (SNC 2012a). Stoke Mill was leased to the Colman family in 1814 and as the business prospered starch and mustard factories were added, as was warehouse and a granary with a school above established by the Colmans. A windmill was added in the early 19th century and by 1845, both it and the mustard mill operated entirely by steam power. The mill complex went in to decline as the requirement for continued expansion could not be accommodated, and so the Colmans moved to new premises in Norwich when the lease expired in 1862. Most of the associated industrial buildings were demolished over the ensuing years with only the ruins of the granary and part of the Blue Warehouse remain in a recognisable form. A Mr Brock bought the mill in 1936 and used it to mix cattle feeds until the 1960s after which its fittings were removed. The ground floor of the mill is now in use as a restaurant while its upper floors remain unused. The conservation area also includes the medium value Grade II listed Stoke Mill House (**1169680**) and the undesignated Mill Cottage, which may have been converted from the old mustard factory. The conservation area has both historical value and evidential value as an example of medieval and post-medieval industrial activity in the area. The association with the Colman family and their business contributes to the historical value of the asset.
- 3.2.12 The setting of the conservation area is informed by its river valley location and by the interrelationships of the listed mill and the other listed and non-designated buildings in the complex. The setting is further informed by the former water courses of mill

created to provide power. The approach to the conservation area from the south-west is a key view. The setting of the asset makes a considerable contribution, but due to the local topography, and development, mature copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.13 The **medium value** Mulbarton conservation area (**CA52**) covers the northern third of Mulbarton, 820 m west of the draft Order Limits. The conservation area covers a large green, or common, defined by common edge settlement, which is an important medieval and post medieval settlement form characteristic of Norfolk and Suffolk (SNC 2017) and contributes to the evidential and historical value of the asset. The triangular high ground of the common, containing grassland and clumps of trees, is defined by The Common to the north-east, The Common (Lower) to the south and the B1113 Norwich Road to the north-west. A large pond surrounded by houses in the main part of the village at the northern apex of the common is a key focal point adjacent to the medieval Grade II\* listed Church of St Mary Magdalen church. Farmland to the north-west and north-east provided a strong rural character, but the later 20th century development of Mulbarton lies to the south.
- 3.2.14 The medieval church is the only building of the period, but the moat associated with the Grade II listed early 17th century Old Hall (**1050700**) support a medieval date for the establishment of the common. Much of the development along The Common and Norwich Road dates to the post medieval period, although there has been some minor 20th century infill development; whilst development along The Common (Lower) almost entirely of 20th century date, a notable exception being the Grade II listed 18th century Mulbarton Hall.
- 3.2.15 Key views of the conservation area are on the approaches along Norwich Road to the north and south-west and along Rectory Lane to the south-east; across the green from the defining throughfares; and from within the common where glimpses of farmland, particularly to the north-west, are framed by mature trees and common edge buildings.
- 3.2.16 The setting of the conservation area makes a considerable contribution to its value, but due to there being no identified key views to the east and screening in the intervening landscape by development and mature tree lined hedgerows, the setting does not extend to the draft Order Limits.
- 3.2.17 The **medium value** Shotesham conservation area (**CA53**) comprises two elements arranged to the east and west of the Shotesham Beck, a small tributary of the Tas river. The eastern half of the conservation area is focused on the village of Shotesham and arranged around Brooke Road, The Street and Rodger's Lane. At its closest, the eastern half of the conservation area is 2.8 km east of the draft Order Limits, and as its setting does not extend to the draft Order Limits, it is not discussed further.
- 3.2.18 The western half of the conservation area lies 300 m to the west and at its closest, 1.45 km south-east of the draft Order Limits. The western half of the conservation area encompasses Shotesham Park; a 'designed' landscape of open parkland dotted with trees, enclosed by dense belts of woodland, and centred on the Grade I listed Shotesham Hall (**1304783**) and associated Grade II listed assets. The conservation area also includes the Grade II listed The Mill House (**1304779**) to the north, and the non-designated assets East Keeper's Cottage on Keeper's Road, The Lodge on Mill Lane, and Park Farm on Norwich Road. The park, which is not a registered park and garden, is a landscape in the style of Capability Brown intended for the grazing of deer, for riding and walking, and to provide carefully designed approaches to, and

views from, Shotesham Hall. Today, much of the tree cover survives but the open land now serves as horse paddocks and agricultural land (SNC 2018). The conservation area has evidential and historical value derived from the surviving elements of the landscaped park and the listed and non-designated buildings within the conservation area that contribute to the understanding of this asset as a designed landscape.

- 3.2.19 The setting of the park is informed by the interrelationships between the designated and non-designated built assets within and views to and from the park's focal point, the hall at its centre. The dense belt of woodland largely encompassing the park allowing for only very occasional glimpses of the rural landscape beyond and emphasising its insular nature. The setting of the conservation area makes a considerable contribution to its value, but due to the mature woodland belt and development, copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.20 The **medium value** Tacolneston conservation area (**CA19**) encompasses the northern third of the linear settlement, which covers the historic core of the village as recorded on the first edition OS map of 1884. The conservation area has two foci, the southern of which includes the Grade II\* listed Manor Farmhouse, the Grade II Pelican Inn, several other Grade II listed buildings and the non-designated Tacolneston Primary School at its southern limit. Except for single properties to the north and south of Hall Road at its intersection with the B1113 Norwich Road, the buildings of this section of the conservation area are arranged on the south-eastern flank of Norwich road with the north-western flank of the road lined by a woodland belt defining the south-eastern limit of Tacolneston Park, which is associated with Tacolneston Hall 570 m to the north-west. The northern focus of the conservation area is centred on the Grade I listed Church of All Saints, just to the north-west of the Norwich Road - Hurn Lane intersection. The Grade II\* listed Old Hall and associated Grade II assets is located on the southern flank of Norwich Road opposite the church. The conservation area has historical and evidential value as an example of a linear settlement with good time-depth.
- 3.2.21 The setting of the conservation area is informed by views along Norwich Road including the designated buildings as well as non-designated buildings the majority of which are recorded on the first edition OS map of 1884. The setting is further informed by the interrelationships between the built environment and its relationship with the rural landscape. The significance of the rural landscape is emphasised by the mid-section of conservation area between the two foci, which provides clear, open views of farmland to the north and south. Further views of the rural landscape are experienced as the conservation area is exited along Norwich Road to the north and Hurn Lane to the east. The setting of the conservation area, therefore, makes a considerable contribution to its value, and due to the view of the Project from Hurn Lane, the setting extends to the draft Order Limits.
- 3.2.22 The **medium value** Forncett conservation area (**CA23**) is arranged linearly along Low Road on the western flank of the Tas Valley linking Forncett St Mary in the north with Forncett St Peter in the south. The draft Order Limits is 710 m to the west of Forncett St Mary at its closest point. The buildings of the conservation area are largely on the higher, western flank of Low Road with the eastern limit of the conservation area marking the limit of the floodplain. Exceptions to this are at the northern and southern limits of the conservation area where the Tas meanders away from the villages. The bends in Low Road, with trees and hedges, only enable two or three buildings to be seen at any one time in a series of individual building groups. These typically comprised a farmhouse with barn and outbuildings, separated from

one another by fields, hedges, and tracks. More recently, these gaps have seen modern infill development. The character of the village is still determined more by the relationship of buildings to the landscape and trees, than to one another. A church stands at end of the conservation area, each set back from the road largely screened by trees, which limits their effect. At either end also is a large house in spacious grounds: the Old Rectory in St Peter's and Forncett Manor, originally built as a rectory, in St. Mary's. But again, their position and abundant trees screen them from the road (SNC 2021a). The conservation area has historical and evidential value as an example of a dispersed linear settlement.

- 3.2.23 The setting of the conservation area is informed by the topography and agricultural history of the Tas Valley, and its sinuous morphology as it hugs the valley side. The setting is also informed by the Grade II listed buildings which are scatter throughout the conservation area and by the Grade I church to the north and south. The roadside development is largely one plot deep and so views of agricultural land to the east and west are open and clear emphasising its significance. The setting of the conservation area, therefore, makes a considerable contribution to its value, but due to the topography of the Tas Valley, the setting does not extend to the draft Order Limits.
- 3.2.24 The **medium value** Winfarthing conservation area (**CA20**) encompasses the historic core of the village, extending from the intersection of the B1077 Short Green and Hall Road in the north to the primary school on the B1077 The Street in the south and eastwards along Church Lane (SNC 2021b). There is limited small-scale residential development to the north and south of the conservation area. At its closest, the conservation area is 510 m to the west of the draft Order Limits. The historic buildings, except for the medieval Grade I listed Church of St Mary, and the 19th century Grade II listed Church Hill Farmhouse are plastered/rendered 17th century timber frame farmhouses and cottages with either pantile or thatched roofs. The conservation area has historical and evidential value as an example of a linear settlement containing a small, nucleated core focused on the church.
- 3.2.25 The setting of the conservation area is informed by views of its historic buildings in key positions, the positive contribution of trees and natural spaces and the largely sympathetic modern infill development. The Street is itself a linear development of single plot frontages with a few historic buildings located along its length with infill development. The subtle curves of The Street and the secluded areas around the Church and Church Lane, help to create several interesting and varied internal views shaped and enhanced by mature trees, hedges, and walls. Church Lane is more intimate, with an informal group of historic buildings set amongst mature trees and open green spaces. The setting of the conservation area, therefore, makes a considerable contribution to its value. Views out of conservation area to the agricultural land beyond are limited and the view to the Project in the east is largely screened or interrupted by tree growth and by mature tree lined hedgerow boundaries. There are, however, more open views to the east from the church graveyard and so pylon tops may be visible above the intermittent treeline. The setting of the conservation area, therefore, extends to the draft Order Limits.
- 3.2.26 The **medium value** Gissing conservation area (**CA54**) encompasses two separate areas of settlement with one to the north-west clustered around Upper Street and the other to the south-east focused on Lower Street. The intervening landscape and that to the south is included in the conservation area as it constitutes the remains of the former parkland of the old hall, which was demolished in c. 1700 (SNC 2021c). Gissing is located 3 km east of Winfarthing and at its closest is 1.8 km east of an draft Order Limits access road with the main working area 2.2 km to the west. The

cluster of housing around Upper Street lies between Wash Lane to the north and Chequer's Lane to the south and includes ten Grade II listed buildings comprising largely 16th to 18th century timber frame plastered houses and cottages as well as Gissing Hall which was built c. 1840 in the Tudor style but has a 17th century wing to the rear. The Grade II listed Marlers Farmhouse and its listed outbuilding are located 300 m to the west on the northern flank of Chequers Lane.

- 3.2.27 The cluster of housing around Lower Street include the medieval Grade I listed Church of St Mary, an associated Grade II War Memorial, an 18th century terrace of three dwelling, an early 19th century cottage and the 17th century timber frame Crown Public House. Also included in the conservation area in the Lower Street location is the non-designated community hall (the former school) directly to the north of the church and the village bowling green to the south. Two further Grade II listed buildings are situated in the heart of the former parkland 470 m south-west of the church and comprise two 17th century barns likely associated with the former hall. The parkland itself has now largely been cleared and is arable in nature, however, some thick tree belt plantations survive, particularly to the west, and a mature copse now covers two medieval moats directly to the north of the old hall barns. The conservation area has historical and evidential value derived from the cluster of historically significant listed and non-listed buildings within the settlement. The former parkland lends some historical value to the conservation area, however as the parkland is now largely arable this contribution is limited.
- 3.2.28 The setting of the conservation area in the Upper Street area is informed by its buildings being arranged along rural lanes, slightly set back and with extensive mature landscaping and hedging which limit views to the relatively flat open countryside beyond. The main house in the village, Gissing Hall, is set back from the road within its grounds and hidden from the street and public viewpoints; only its crenelated towers and roofline can be partially glimpsed through the hedgerow. Between Marlers Farmhouse to the west and the other houses in Upper Street there are two long rectangular village meadows, which are included in the conservation area as former parkland. The setting of the conservation area around Lower Street is informed by the irregular clustering of buildings around small greens around the church. The church and community centre and the Crown Public House are in effect the centre and heart of the village. The group of buildings are viewed within a relatively spacious rural setting with open aspect to fields to the east and views across from Rectory Road when approaching the village from the west. The church is very prominent along Lower Street and the church's round tower is visible from surrounding fields. The setting of the conservation area, therefore, makes a considerable contribution to its value, but due to the surviving former parkland tree belts and development and mature tree lined hedgerow boundaries in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.29 The **medium value** Burston conservation area (**CA22**) encompasses the historic core of the settlement, which is focused on the Grade II\* listed medieval church of St Mary and to the west and east of Mill and north of Diss Road. Burston is located approximately 2 km south-south-west of Gissing and at its closest point is 1.5 km east of the draft Order Limits. Listed buildings within the conservation area comprise the afore mentioned church, three 17th century Grade II listed timber frame structures and the Burston Strike School built in 1917 (SNC 2021d).
- 3.2.30 The setting of the conservation area is informed by its relatively dispersed nature with buildings fronting onto historic lanes and with no consistency in curtilage size, building orientation, buildings lines or setbacks, which contributes to the more informal rural character of the village. There are, however, only limited views of the

open countryside from within the village due to extensive tree coverage in the centre of the village. Later infilling has concentrated development along Diss Road to the west, and there is a large, modern estate to the east of Rectory Road, which all lie outside the conservation area. The setting of the conservation area, therefore, makes a considerable contribution to its value, but due to the tree coverage within the village, later development to the west along Diss Road and development and mature tree lined hedgerow boundaries in the intervening landscape, the setting does not extend to the draft Order Limits. The conservation area has historical and evidential value as an example of a dispersed settlement, however modern infill has diffused this somewhat.

- 3.2.31 The **medium value** Diss conservation area (**CA51**) encompasses the historic core of the settlement focused on Market Place, Market Hill, Denmark Street, St Nicholas Street, Shelfanger Road and Mount Street and important green spaces at Fair Green, the Mere and Park, Rectory Meadows, and the Parish Fields. The conservation area contains numerous listed buildings and non-designated building of townscape significance largely arranged on the street plan previously mentioned. A small portion of the conservation area is detached from the main area and focused on Victoria Road, The Old Coaching Place, Waveney Road, and Vince's Road where it encompasses two Grade II listed buildings and several buildings of townscape significance (SNC 2012b). The conservation area has historical and evidential value as an example of a historic town core containing elements that contribute to the town's development and function such as the market place the Mere which has variously served as the towns water supply and sewage disposal but also played a large part in the shape of the town as it developed. The Diss conservation area is located at the southern limit of Section A and at its closest at Fair Green 720 m east of the draft Order Limits, however, the historic core of the settlement and so the conservation area itself lies 1.6 km to the east-northeast of the draft Order Limits.
- 3.2.32 The setting of the conservation area is informed by the views of the townscape along the afore mentioned thoroughfares and views of the listed buildings and buildings of townscape significance that line these routes. The setting is further informed by the experience of the green spaces and the panoramic view from the park, over the Mere to the church tower beyond is a key view within the conservation area. There are also several smaller spaces that make a positive contribution to the form and character of the town including yards along Market Hill, the Market Place, Mere's Mouth, and the yards off St Nicholas Street. A key feature of the town is how these spaces are often linked by a network of alleys, back courts and thoroughfares which add significantly to the character and appeal of the town. The setting of the conservation area, therefore, makes a considerable contribution to its value, but due to its insular nature its setting does not extend to the draft Order Limits.

## Baseline Introduction

- 3.2.33 The following historic environment baseline for Section A of the Project is presented by chronological archaeological period and from north to south. Section A is further broken down into geographic subsections to allow the reader to orientate and to locate where on the appropriate figure a particular heritage asset is illustrated. These geographic subsections are largely defined by current settlements but also occasionally by landscape features such as high points and valleys and by anthropogenic features such as roads and railways. Each subsection of Section A is introduced and described only in the first archaeological period where it is appropriate to be used to avoid repetition.

## Prehistoric Period

### Palaeolithic

- 3.2.34 There are three **low value** assets dating to the Palaeolithic within Section A of the Project. A 'Palaeolithic worked flint...with patination and scratching' is part of a multi-period assemblage (**1005**) found during a fieldwalking exercise within the draft Order Limits, 600 m north-west of Grade II listed Banyard's Hall (**1373609**) and 2.3 km east-south-east of the village of Bunwell.
- 3.2.35 Asset (**1216**) is a possible Upper Palaeolithic flint blade found 560 m south-west of the draft Order Limits by a metal detectorist in a field in the Waveney Valley and immediately north of the Section A/Section B boundary. It is possible that this asset is related to a concentration of terminal Palaeolithic to Mesolithic flintwork (**2000** – see Section B below) identified at Wortham Ling just over the County border in Suffolk and 170 m east-south-east of the blade findspot (**1216**). These assets in combination likely represent the activities of hunter-gatherer communities exploiting the river valley for its resources and as routes through the landscape and as such both have evidential value.
- 3.2.36 Fieldwalking and metal detector surveys on land on the northern bank of the river Waveney c. 600 m south-west of the outskirts of Diss and partially within the Order Limits has resulted in a **low value** multi-period finds assemblage (**1335**) of evidential value. The assemblage includes several late Upper Palaeolithic long blades including one lightly bruised blade segment and several with shallow ventral retouch, and four tools derived from long blades, including one end scraper, one double-ended scraper on a blade segment, one piercer on a distal end of blade and a serrated blade.

### Mesolithic

- 3.2.37 The Mesolithic period is represented in Section A by worked flint recovered from 16 locations. These assets consist of single or very few items recovered as surface finds or as residual material in later period contexts.

### Dunston and Mangreen Hall Farm

- 3.2.38 Dunston is a small village associated with the Grade II listed Dunstall Hall (**1373206**) and located on the western flank of the Tas Valley, with the Tas and the valley floor to the east. Mangreen Hall Farm is situated 1 km to the west-northwest of Dunston on higher ground and is associated with the Grade II\* Mangreen Hall (**1366150**). The development of Dunstall Hall and its grounds as a hotel and spa with associated golf course and quarrying of the land around Mangreen Hall Farm has resulted in numerous archaeological investigations. This fieldwork, coupled with cropmark data and finds amassed during several metal detector surveys undertaken in the general area, has produced a detailed archaeological record including evidence of Mesolithic activity.
- 3.2.39 A multi-period finds assemblage (**1022**), including a **low value** Mesolithic flint serrated blade, was found during a metal detector survey within the bounds of the scheduled monument Venta Icenorum: Roman town and associated prehistoric, Anglo-Saxon, and medieval remains (**1021463**). Evaluation trial trenching immediately to the south of the survey area recovered residual **low value** Mesolithic flints from excavated Roman-British archaeological remains (**1144**) constituting a trackway and associated features. The survey and evaluation areas are located 150 m east of the draft Order Limits and within the Tas Valley to the west of the river. The

flintwork likely represents Mesolithic exploitation of the riverine environment and its resources.

- 3.2.40 Fieldwalking, evaluation and excavation at Mangreen Hall Farm immediately north of the draft Order Limits and 450 m west of the evaluation and survey in the Tas Valley noted above, identified undated ditches, gullies and pits and a small Romano-British inhumation cemetery (**1182**). These investigations resulted in as multi-period finds assemblage that included **low value** Mesolithic flintwork including a flint blade and a flint two-orthogonal platform blade core. This site occupied higher ground overlooking the Tas Valley and its resources to the east.
- 3.2.41 A **low value** early Mesolithic flint blade core (**1208**) was found during a metal detector survey of land west of Mangreen Hall Farm. The survey area is located 180 m north-west of the draft Order Limits on higher ground, that may have provided a vantage point over lower ground to the west and south.
- 3.2.42 Overall, the archaeological resource at Dunston and Mangreen Hall farm has evidential value for the contribution it makes to our understanding of human activity in this location from the Mesolithic period onwards.

### Swainsthorpe and Mulbarton

- 3.2.43 Swainsthorpe is a small village at the eastern edge of the study area and situated on the north-western flank of a tributary of the Tas Valley at c.32 m aOD. The village of Mulbarton is located 2.4 km to the west on higher ground at c. 50 m aOD to the west of the study area. The settlements are linked east/west by Rectory Lane/Church Street and Brick Kiln Lane runs approximately parallel to this route c. 1.2 km to the south. A large proportion of the farmland to the north and south of these routes has been the subject of geophysical survey, field walking survey, metal detector survey and trial trenching resulting in a detailed archaeological record for the area.
- 3.2.44 Metal detecting and fieldwalking surveys ahead of the development of a site to the north of Church Road c. 600 m west of Swainsthorpe resulted in a multi-period finds assemblage (**1195**) that included **low value** prehistoric flintwork and a Mesolithic/early Neolithic flint core. This site just clips the draft Order Limits to the east and is situated in a shallow, dry tributary valley of the Tas.
- 3.2.45 Several examples of **low value** Mesolithic flintwork were recovered during the archaeological evaluation of land south of Brick Kiln Lane, Mulbarton in 2015. The lithics, comprising blades, cores, flakes, and an end scraper, were recovered as residual finds in later prehistoric, largely Bronze Age, features (**1270**). The site is situated partially within the draft Order Limits on a south-east facing slope overlooking the lower ground of a tributary of the Tas and the lithics may represent the remnants of a hunting camp located to provide views across the tributary valley. Overall, the archaeological resource at Swainsthorpe and Mulbarton has evidential value for the contribution it makes to our understanding of human activity in this location from the Mesolithic period onwards.

### Flordon and Fundenhall

- 3.2.46 Flordon is a village located just within the eastern edge of the study area and it is situated on the north-eastern flank of a tributary of the Tas Valley at c. 31 m aOD with the valley floor at 21 m aOD to the south-west. The village of Fundenhall is located 3 km to the west and is situated on higher ground at c. 62 m aOD. The intervening farmland has been the subject of numerous metal detector surveys, during which non-metallic artefacts were collected, resulting in a detailed archaeological record for the area.

- 3.2.47 A small assemblage of flint flakes loosely dated to the Mesolithic to Bronze Age periods were found during metal detector surveys of land around the Grade II\* listed Flordon Hall in 2015 and 2017. The **low value** flints were part of a larger, multi-phased assemblage of artefacts (**1289**) found during the surveys. The survey area is located immediately south-east of the draft Order Limits and occupies slightly higher ground above a tributary of the Tas to the east and south.
- 3.2.48 Several metal detector surveys on land 500 m south-east of Fundenhall, immediately south of Hapton Road and partially within the draft Order Limits recovered a large multi-period finds assemblage (**1130**), which contained a **low value** Mesolithic flint blade. The site is located partially within the draft Order Limits and situated on higher ground overlooking a tributary of the Tas Valley to the south-east. Overall, the archaeological resource at Flordon and Fundenhall has evidential value for the contribution it makes to our understanding of human activity in this location from the Mesolithic period onwards.

### **Forngett St Mary and Tacolneston**

- 3.2.49 Forngett St Mary is a village on the eastern edge of the study area on the western flank of the Tas Valley at c. 29 m aOD with the floor of the valley to the east at c. 22 m aOD. The village of Tacolneston is located 2.2 km to the west outside the study area on higher ground at c. 64 m aOD. The settlements are linked by the east/west aligned Cheney's Lane and the farmland to the north and south of this route has been the subject of numerous metal detector and fieldwork surveys, during which non-metallic artefacts were also collected, resulting in a detailed archaeological record for the area.
- 3.2.50 Metal detector surveys focused on a large field 330 m east Tacolneston. Over the years, the surveys amassed a large, multi-phased finds assemblage (**1145**), which included a possible **low value** Mesolithic flint blade. The survey area is 600 m west of the draft Order Limits and occupies slightly higher ground overlooking a shallow tributary of the Tas Valley to the north. Overall, the archaeological resource at Forngett St Mary and Tacolneston has evidential value for the contribution it makes to our understanding of human activity in this location from the Mesolithic period onwards and is suggestive of a potential prehistoric settlement in this location.

### **Bunwell Hill and the Tas Valley**

- 3.2.51 Bunwell Hill is an area of high ground at 65 m aOD, now occupied by the village of Bunwell, 2.3 km north-west of the draft Order Limits. The hill is situated between shallow tributary of the Tas Valley to the west and east with the Tas Valley itself running approximately east/west to the south. Metal detector surveys and chance finds has resulted in the following **low value** Mesolithic assets:
- Two Mesolithic flint blades in a multi-period finds assemblage (**1066**) recovered from a field immediately south-east of the junction of Bunwell Hill and The Turnpike, 2 km south-south-east of the village of Bunwell and 240 m north-west of the draft Order Limits
  - A Mesolithic/early Neolithic broken flint microblade and one small patinated flake in a multi-period assemblage (**1075**) recovered immediately south of survey area (**1066**) and 240 m north-west of the draft Order Limits
  - A possible Mesolithic rod microlith in a multi-period finds assemblage (**1087**) recovered from a field partially within the draft Order Limits, 160 m east of the Grade II listed Banyard's Hall (**1373609**) and 2 km south-east of the village of Bunwell

- A Mesolithic flint tranche axe with a three-sided borer flaked on the butt end (**1070**) was found within the draft Order Limits in a field south of Prince of Wales Road and 270 m south-east of Bunwell Hill
- Two Mesolithic blade-like flint flakes in a multi-period finds assemblage (**1083**) recovered from farmland north of Prince of Wales Road, 90 m north of the draft Order Limits and 2 km south-east of the village of Bunwell

3.2.52 The Mesolithic assets noted above were recovered from the skirt of the hill at around 52 m aOD a little down from the summit before the land drops further into the valleys to the west, south and east. It is possible that the higher ground of Bunwell Hill provided Mesolithic hunter-gatherer communities with better drained, dryer ground on which to establish temporary occupation sites which may have been revisited as part of the seasonal exploitation of the valleys and their resources.

3.2.53 The potential importance of the Tas Valley and its network of tributaries to Mesolithic communities is supported by Mesolithic flint finds from fields on the southern side of the Tas Valley, c. 1.3 km south of Bunwell Hill. Metal detector surveys of fields between 1981 and 2013 resulted in considerable multi-phased finds assemblages (**1058**, **1062**), which included a **low value** late Mesolithic/early Neolithic flint blade in assemblage (**1058**) found partially within the draft Order Limits and a **low value** Mesolithic blade in assemblage (**1062**) found partially within the draft Order Limits. The survey areas are located on the Tas Valley floor and the slightly higher ground of the southern flank of the valley. Overall, the archaeological resource at Bunwell Hill and the Tas Valley has evidential value for the contribution it makes to our understanding of human activity in this location in the Mesolithic period.

### Bressingham and the Waveney Valley

3.2.54 Fieldwalking and metal detector surveys on land on the northern bank of the river Waveney c. 600 m south-west of the outskirts of Diss and partially within the Order Limits has resulted in a **low value** multi-period finds assemblage (**1335**) of evidential value. The assemblage includes a Mesolithic tranche axe and three Mesolithic microliths (obliquely blunted points), one microlith fragment (failed micro-burin), one notched microblade, and four blade cores including one very small, neat microblade core.

### Neolithic

3.2.55 The Norfolk HER holds 34 Neolithic records for the study area in Section A. These assets consist of single or very few items recovered as surface finds or as residual material in later period contexts. These assets suggest that there are low levels of dispersed human activity which seems to be focused within river valleys. There is limited, if any, evidence for settlements dating to this period.

### Dunston and Mangreen Hall Farm

3.2.56 Mangreen Hall Farm is located just outside the construction zone immediately to the north and its land has been the focus of several archaeological investigations ahead of mineral extraction. The farm is situated on higher ground with lower, rolling land to the south and west and the Tas Valley to the east. This fieldwork (**1182**), noted above, resulted in the recovery of a mixed-period finds assemblage that included two early Neolithic flint single-platform flake cores, three early Neolithic flint single-platform core, one Neolithic flint end scraper, Neolithic blades, and retouched blades. This **low value** material was, however, unstratified or residual in later period archaeological features and therefore has limited evidential value.

- 3.2.57 The evaluation trial trenching undertaken immediately to the south of the scheduled monument Venta Icenorum: Roman town and associated prehistoric, Anglo-Saxon, and medieval remains (**1021463**), identified Iron Age and Romano-British archaeological remains (**1144**) that contained residual **low value** Neolithic flintwork. The residual nature of the flint means it has limited evidential value.
- 3.2.58 Excavation in advance of the construction of the Dunston Hall golf course on the western flank of Dunston, immediately east of Ipswich Road and 160 m south-east of the draft Order Limits, identified residual **low value** early Neolithic and Neolithic flintwork recovered from later prehistoric, Roman, and Anglo-Saxon archaeological features (**1136**). Once again, these finds have limited evidential value. This site is situated on land overlooking the Tas Valley to the east.

### Swainsthorpe and Mulbarton

- 3.2.59 Moving southwards, archaeological fieldwork to the north and south of Church Road 200 m to 600 m west of Swainsthorpe has found evidence of Neolithic activity. Metal detecting and fieldwalking surveys ahead of the development of a site to the north of Church Road resulted in a multi-period finds assemblage (**1195**) that included prehistoric flintwork and a **low value** Mesolithic/early Neolithic flint core. This site clips the western edge of the draft Order Limits and is situated within a shallow, dry tributary valley of the Tas.
- 3.2.60 Fieldwalking south of Church Road partially within the draft Order Limits identified a mixed-period finds assemblage (**1229**) that included Prehistoric flintwork and an early Neolithic flint core. Likewise, further fieldwalking immediately to the east, and partially within the draft Order Limits, recovered more multi-period finds (**1230**) including **low value** prehistoric flintwork and a Neolithic flint scraper. The Church Road sites west of Swainsthorpe are situated on higher ground with tributaries of the Tas Valley and the Tas Valley itself to the east.
- 3.2.61 1.1 km to the south-west of Swainsthorpe, Brick Kiln Lane runs east/west parallel to Church Road c. 1.2 km to the south and links Mulbarton to the west with the A140 Ipswich Road to the east. Fieldwork to the south of Brick Kiln Lane has resulted in the following **low value** Neolithic records:
- Several examples of Neolithic flintwork were recovered during the archaeological evaluation of land 350 m south of Brick Kiln Lane. The lithics, comprising flakes, cores, blades, and scrapers, were recovered as residual finds alongside Mesolithic material in later Prehistoric, largely Bronze Age, features (**1270**)
  - A fieldwalking survey undertaken immediately to the east of the evaluation area recovered a mixed-period finds assemblage (**1235**), which included a scatter of Prehistoric and Neolithic flintwork including a Neolithic core and a late Neolithic core
  - A Neolithic polished flint axe head (**1017**) was found immediately north of the evaluation site
  - A Neolithic polished flint axe head (**1009**) was found in 1951 on land 400 m south of the fieldwalking survey
- 3.2.62 The find sites south of Brick Kiln Lane are situated partially within (**1270**), clipping the eastern edge (**1235**), 70 m north-west (**1017**), and 650 m south-east (**1009**) of the draft Order Limits on a south-east facing slope overlooking the lower ground of a tributary of the Tas and the lithics may represent intermittent use of the higher ground

providing views across the tributary valley and its resources and as such these finds have evidential value.

### Flordon and Fundenhall

- 3.2.63 Continuing to the south, the land within and around the draft Order Limits to the north and west of Flordon and east of Fundenhall has been subjected to numerous metal detector surveys during which non-metallic surface finds were also collected. Surveys of the land around an unnamed farm 440 m north of The Street and immediately east of the draft Order Limits recovered a multi-period finds assemblage (**1289**) including Prehistoric flintwork and a **low value** Neolithic/Bronze Age flint fabricator. These find have evidential value for the contribution they make to our understanding of human activity in this location.
- 3.2.64 Neolithic **low value** findspots with limited evidential value are also recorded south of The Street comprising a Neolithic flint scraper (**1068**) found 400 m south-east of draft Order Limits, 700 m west of Flordon; and a Neolithic flint core (**1069**) found 140 m south-east of the draft Order Limits, 970 m west of Flordon. The unnamed farm to the north of The Street is situated on higher ground at 37 m aOD to the north of a tributary of the TAS Valley at 22 m aOD, whilst the findspots are situated on higher ground to the south of the tributary at 40 m aOD.

### Forngett St Mary and Tacolneston

- 3.2.65 Numerous metal detector and fieldwork surveys, during which non-metallic artefacts were also collected, has resulted in a detailed archaeological record for the Forngett St Mary and Tacolneston area.
- 3.2.66 A 'large' **low value** Neolithic polished flint axe head (**1201**) with evidential value was found close to the bottom of the Tas Valley at c. 27 m aOD, 1.4 km north-north-east of Forngett St Mary and 1 km east of the draft Order Limits. The HER record states that the axe may have served as a ceremonial object, presumably based on its size. The HER entry quotes a Portable Antiquities Scheme (PAS) for the asset, but this could not be found.
- 3.2.67 Metal detector surveys focused on a large field 330 m east Tacolneston and 600 m west of the draft Order Limits. Over the years, the surveys amassed a large, multi-phased finds assemblage (**1145**), which included **low value** prehistoric flints comprising a Neolithic blade, an early Neolithic retouched flake and Neolithic/Bronze Age retouched flakes, scrapers, a combination flint tool, a flake, and a borer. These find have evidential value for the contribution they make to our understanding of human activity in this location. The survey area occupied slightly higher ground overlooking a shallow tributary of the Tas Valley to the north.
- 3.2.68 Metal detector surveys undertaken in the tributary valley bottom at 42 m aOD and on its northern flank at 50 m aOD 1.5 km north-east of Tacolneston and immediately west of the draft Order Limits resulted in a multi-period finds assemblage (**1164**), which included **low value** prehistoric worked flints including a Neolithic/Bronze Age retouched flake. These find have evidential value for the contribution they make to our understanding of human activity in this location.
- 3.2.69 The land to the south-east of Tacolneston has been subject to numerous metal detector and field walking surveys and many of these have identified evidence of Neolithic activity with evidential value. This **low value** resource with evidential value for the knowledge it provides of human activity in the area comprises:

- Neolithic flints recovered from the site of a deserted medieval/post medieval settlement (**1089**) recorded on a 1565 survey as Rattongate and Haliards. The site is located 10 m north of the draft Order Limits south of Long Stratton Road and 400 m south-south-east of Tacolneston
- Four worked Neolithic flint were recovered as part of a multi-period finds assemblage (**1093**) from farmland located partially within the draft Order Limits immediately south of the deserted medieval/post medieval settlement (**1089**) and 700 m south-south-east of Tacolneston
- A polished flint axe head (**1001**) found in a field outside the draft Order Limits 230 m west of the deserted medieval/post medieval settlement (**1089**) and 700 m south of Tacolneston
- Neolithic flint flakes in a multi-period finds assemblage (**1103**) found on land partially within the draft Order Limits immediately south of the deserted medieval/post medieval settlement (**1089**) and 750 m south-south-east of Tacolneston
- Three flint flakes, two scrapers and a leaf-shaped arrowhead in a multi-period finds assemblage (**1108**) found on land just clipping the north-western edge of the draft Order Limits immediately east of deserted medieval/post medieval settlement (**1089**) and 8600 m south-east of Tacolneston

### Bunwell Hill and the Tas Valley

3.2.70

Bunwell Hill is an area of high ground at 65 m aOD and the skirt of the hill at c. 52 m aOD was a focus of Mesolithic activity as described above. Neolithic activity with evidential value has also been recorded in this area and the **low value** evidence of this comprises:

- One retouched flake and several unmodified flakes in a multi-period finds assemblage (**1005**) found during a fieldwalking exercise within the draft Order Limits, 600 m north-west of Grade II listed Banyard's Hall (**1373609**) and 2.3 km south-east of the village of Bunwell
- A Neolithic flint knife in a multi-period finds assemblage (**1087**) recovered from land partially within the draft Order Limits and 2 km south-east of the village of Bunwell
- A Mesolithic/early Neolithic broken flint microblade and one small patinated flake in multi-period finds assemblage (**1075**) found during fieldwalking land 220 m west of the draft Order Limits and 1.3 km south-south-west of the village of Bunwell
- A Neolithic polished axe in a multi-period finds assemblage (**1052**) found during a metal detecting survey on land 270 m south-east of the draft Order Limits and 2.6 km south-east of the village of Bunwell
- Two Neolithic flint scrapers in a multi-period finds assemblage (**1083**) found during metal detector surveys of land 90 m north of the draft Order Limits and 2.1 km south-east of the village of Bunwell

3.2.71

The Tas Valley turns from its general north-north-east/south-south-west course to the west where it skirts around the south facing aspect of Bunwell Hill. The Tas Valley, likely due to its resources, attracted Neolithic activity and this is demonstrated by **low value** finds of evidential value comprising:

- A Neolithic/Bronze Age retouched flint flake and scraper in multi-period finds assemblage (**1049**) found during metal detector surveys on land partially within draft Order Limits and 3 km south-south-east of the village of Bunwell
- A late Mesolithic/early Neolithic flint blade in a multi-period finds assemblage (**1058**) found during a metal detector survey of land partially within the draft Order Limits on the valley floor and 3.1 km south-south-east of the village of Bunwell
- A flint core, eight scrapers, one flake with straight edge retouch, 14 flakes or blades, a laurel leaf roughout, a Mesolithic/early Neolithic flint blade and a Neolithic/Bronze Age flint blade in a multi-period finds assemblage (**1062**) found during fieldwalking and metal detector surveys of land partially within the draft Order Limits on the valley floor and its southern flank, 3.3 km south-south-east of the village of Bunwell
- Neolithic worked flints including scrapers, flakes and a knife, and Neolithic/Bronze Age flints in a multi-period finds assemblage (**1118**) found during fieldwalking and metal detector surveys of land partially within the draft Order Limits on the valley floor and 3 km south-south-east of the village of Bunwell
- A Neolithic/Bronze Age flint flake in a multi-period finds assemblage (**1065**) found during metal detector surveys of land within the draft Order Limits 2.8 km south-south-east of the village of Bunwell

### Shelfanger and Winfarthing

- 3.2.72 The villages of Shelfanger and Winfarthing are both recorded in the Domesday Book, and both are in the largest 20% of settlements recorded. Both settlements are located on the north/south aligned B1077 with the eastern limits of Shelfanger situated inside the 500 m study area and southern half of Winfarthing within the 500 m study area 1.9 km to the north. The farmland to the east of these settlements has been the focus of several metal detector and field walking surveys, during which non-metallic artefacts were also collected, resulting in a detailed archaeological record contributing to our understanding of human activity in the area and of evidential value.
- 3.2.73 A **low value** Neolithic polished axe head, made of stone (**1021**) was found close to the summit of a ridge of higher ground 650 m east of the draft Order Limits and 2.3 km north-east of Shelfanger. The HER record describes the asset as a 'greenstone axe', which may suggest it is a Group VI axe from the axe factory on Great Langdale in the Lake District.
- 3.2.74 A large, multi-period finds assemblage (**1190**) was collected during fieldwalking and metal detecting surveys on land 110 m west of the draft Order Limits and 620 m north-east Shelfanger. The survey area is close to the head of a shallow tributary valley of the Tas with the floor of the valley just to the west. The finds assemblage included **low value** lithics comprising a Neolithic flint scraper, a late Neolithic/ early Bronze Age plano-convex or discoidal flint knife and a Neolithic/Bronze Age flint flake.
- 3.2.75 Metal detector surveys on land 400 m north-east of Shelfanger and just clipping the western edge of the draft Order Limits resulted in a multi-period finds assemblage (**1246**) that included an early Neolithic **low value** retouched flint flake. This parcel of land is located immediately south of the field that produced the finds assemblage (**1190**) and is situated on the eastern flank of the tributary valley at 45 m aOD in the east to 38 m aOD in the valley floor in the west.

## Bressingham and the Waveney Valley

- 3.2.76 Bressingham is a dispersed village located partially within the study area on land at c. 56 m aOD with the Waveney Valley floor and the Norfolk/Suffolk County border at 22 m aOD c. 1 km to the south. The farmland to the north-east through to the south-east of the settlement has been the focus of several metal detector and field walking surveys, during which non-metallic artefacts were also collected, resulting in a detailed archaeological record for the area.
- 3.2.77 Close to the southern extent of Section A, immediately north-west of Bressingham and 250 m west of the draft Order Limits, a **low value** polished Neolithic flint axe with evidential value was found as part of a multi-period finds assemblage (**1041**) recovered during a fieldwalking survey. The survey area is on higher land with the Waveney Valley to the south.
- 3.2.78 A **low value** Neolithic flint sickle (**1334**) of evidential value was found before 1935 at Roydon Pit on the southern edge of Roydon and c. 110 m east of the Order Limits.

## Bronze Age

The Bronze Age is represented in Section A by HER records representing early, middle, and late Bronze Age activity. Most of the records represent lithic surface finds or residual lithics in later contexts, although some subsurface features have been identified including pits and ditches with the latter indicating land division likely related to farming. There are also cropmarks of ring ditches suggestive of barrows, raising the possibility of funerary activity. Most of these potential barrows have yet to be archaeologically investigated, particularly around the Fornsett St Mary and Tacolneston area. However, given the level of occupation activity within this area of the Project it is not unreasonable to assume that there would be high status burials in the form of barrows located close to these areas.

## Dunston and Mangreen Hall Farm

- 3.2.79 Aerial photography has identified a large area of dispersed **low value** cropmarks (**1261**) with evidential value 250 m east of the draft Order Limits and within Dunston Park, the grounds of the Grade II listed Dunston Hall (**1373206**). The cropmarks indicated fragmentary enclosures, ditches, and field boundaries of possible prehistoric to Roman, however, the cropmarks in the northern half of the park have been lost through the construction of the Dunston Hall golf course.
- 3.2.80 Archaeological excavation, partially within cropmarks area (**1261**), in advance of construction of a golf course revealed multi-period archaeological remains (**1136**) including **low value** ditches and pits containing Bronze Age pottery sherds and worked flint. These are of evidential value. The site is situated on the western flank of Dunston, immediately east of Ipswich Road and 160 m south-east of the draft Order Limits.
- 3.2.81 Further trenching related to the construction of Dunston Hall golf course immediately to the north of (**1169**) and 220 m south-east of the draft Order Limits identified multi-period archaeological features (**1147**) that included **low value** Bronze Age ditches of evidential value containing Bronze Age pottery sherds. Some of the (**1171**) features correspond to cropmarks identified by the HER separately as (**1262**).
- 3.2.82 Dunston Park occupies land on the eastern flank of the Tas Valley. The land is undulating between 29 m aOD and 10 m aOD with the valley floor to the east at 6 m aOD.

- 3.2.83 A large **medium value** multi-period cropmark complex (**1325**) is located in a V-shaped parcel of land at the northern extent of the Order Limits between the A140 to the west and the railway to the east with Dunston c. 220 m to the south and the scheduled Roman town of Venta Icenorum (**1021463**) immediately to the east. The complex includes the cropmarks of three ring ditches (**1318**) which are all 14 m in diameter and are extremely uniform in their plan and arrangement: approximately 7 m apart. The size is towards the lower range for Bronze Age round barrows, although examples of this size do occur. If shown to be barrows, the asset would be of **medium value** based on its evidential value. It has been suggested that the assets may be the remains of Iron Age roundhouses, but the encircling ring ditches are continuous making this unlikely.
- 3.2.84 Mangreen Hall Farm is located 880 m west-north-west of Dunston and immediately north of the draft Order Limits on higher ground at 42 m aOD. Land to the south and east of the farm has been quarried and archaeological fieldwork ahead of phases of extraction have revealed the following **low value** Bronze Age remains with evidential value:
- Fieldwalking and subsequent trial trenching immediately east Mangreen Farm and just north of the draft Order Limits identified multi-period archaeological features and finds assemblage (**1182**) that includes a late Neolithic/early Bronze Age thumbnail scraper, an early Bronze Age scraper, late Bronze Age core fragments, end scraper, side scraper and pottery, and Bronze Age pits
  - Fieldwalking, metal detecting and subsequent trial trenching immediately east of Mangreen Farm and partially within the draft Order Limits identified multi-period archaeological features and finds assemblage (**1184**) including significant prehistoric flint tool and flake scatters that included a core, flakes, a retouched flake, and scraper of probable late Bronze Age date, and late Bronze Age ditches and pits
  - Fieldwalking, metal detecting and subsequent trial trenching immediately south of Mangreen Farm and partially within the draft Order Limits identified multi-period archaeological features and finds assemblage (**1185**) that included significant prehistoric flint tool and flake scatters of probable late Bronze Age date, and late Bronze Age/early Iron Age subsurface pits
  - Metal detector survey of land 900 m south of Mangreen Hall Farm and partially within the draft Order Limits resulted in a multi-period finds assemblage (**1218**) that included a copper alloy late Bronze Age awl. Subsequent archaeological trial trenching identified multi-period archaeological features and finds assemblage (**1271**) that included late Bronze Age to Iron Age ditches pits, pottery, and possible field system
- 3.2.85 Overall, the Bronze Age activity in this location suggests agricultural activity with a possible focus on the Tas valley.

### Swainsthorpe and Mulbarton

- 3.2.86 The geophysical survey of land 700 m south-east of Mulbarton, 330 m south of Brickkiln Lane and partially within the draft Order Limits identified two sides of a likely incompletely detected enclosure occupying a slight plateau in the north-westernmost part of this site at 45 m aOD (Bartlett, 2015) overlooking the lower ground of a tributary of the Tas at 27 m aOD to the south-east. The subsequent evaluation of the site identified archaeological remains (**1270**) including the enclosure ditches. Pottery recovered from the upper fills of the ditch was late Bronze Age to Iron Age in date suggesting the enclosure likely had Bronze Age origins. A middle Bronze Age date

has been suggested based on its morphological similarity with middle Bronze Age rectilinear enclosures identified at several locations in Norfolk. The Bronze Age remains have evidential value and of **medium value** if associated with settlement activity.

3.2.87 It has been suggested, based on features recorded on an 18th map, that a field immediately north of Brick Kiln Lane, 850 m south-south-west of Swainsthorpe and 390 m east of the draft Order Limits contained at least one Bronze Age round barrow with evidential value (**1011**). There is, however, no corroborative evidence either on aerial photography or through geophysical survey and it is likely the site relates to either an infilled pit or an underlying geological feature. The field in which this asset was recorded was trial trenched in 2023 (not part of the Project). The record of the archaeological remains encountered has yet to be published at the time of writing. Given the uncertain nature of the evidence for this asset being a round barrow this asset is of **low value**.

3.2.88 The cropmarks of a possible Bronze Age barrow (**1031**) identified on aerial photographs are recorded in a field 600 m north of Swainsthorpe and 490 m east of the draft Order Limits. There is, however, some uncertainty to the origin of the cropmarks and they may represent an infilled pit or an underlying geological feature. This asset has evidential value for the potential it must contribute to understanding of the archaeological resource in the area but is of **low value** due to the uncertainty of evidence for this being a barrow.

The cropmarks of possible fragmentary enclosures, a ring ditch, field boundaries and ditches of unknown date (**1256**), are visible on aerial photographs 250 m north of Swainsthorpe and 120 m east of the draft Order Limits. It has been suggested the ring ditch might represent a Bronze Age round barrow, but again, there is some doubt over the archaeological origin of some of these cropmarks and, therefore, some uncertainty remains over the significance of this site, therefore, this asset is of **low value** but has evidential value.

### Flordon and Fundenhall

3.2.89 The HER records cropmarks of ring ditches interpreted as the potential remains of **medium value** Bronze Age barrows with evidential value 20 m south-east of the draft Order Limits and 880 m north-west of Flordon (**1030**); and 1.3km north-west of Flordon and 400 m north-west of the draft Order Limits (**1183**).

3.2.90 HER asset (**1183**) falls within a larger monument comprising the cropmarks of a **medium value** possible Bronze Age barrow cemetery (**1328**) of evidential value, which is located c. 1 km north-west of Flordon and partially within the Order Limits. The cemetery comprises four ring ditches arranged approximately north/south on ground to the east of a watercourse. From north to south the assets comprise (**1330**), (**1331**), (**1329**) and (**1332**). The southernmost ring ditch (**1332**) is located within the Order Limits, however, is very faint and its identification is tentative.

3.2.91 The land within and around the draft Order Limits to the north and west of Flordon and east of Fundenhall has been subjected to numerous metal detector surveys during which non-metallic surface finds were also collected. Evidence of Bronze Age activity collected during these surveys comprises the following **low value** assets with evidential value for the contribution they make to knowledge of the Bronze age resource in the area:

- A copper alloy late Bronze Age socketed axe fragment and a copper alloy Bronze Age chisel fragment in a large multi-period finds assemblage (**1130**) recovered from farmland partially within the draft Order Limits and 500 m south-east of

Fundenhall and immediately south of Hapton Road. The survey site is gently undulating and overlooks a tributary of the Tas Valley to the south-east

- The butt end of a middle Bronze Age copper alloy palstave in a multi-period finds assemblage (**1131**) recovered from farmland immediately north of Fundenhall Road, 980 m east-south-east of Fundenhall and 130 m east of the draft Order Limits
- A Neolithic/Bronze Age flint fabricator and possibly associated undated Prehistoric flintwork in a multi-period finds assemblage (**1289**) recovered from land around an unnamed farm 440 m north of The Street, Flordon and immediately east of the draft Order Limits
- A late Bronze Age socketed axe head fragment in a multi-period finds assemblage (**1280**) found 600 m north-west of Flordon and partially within the draft Order Limits

### Forngett St Mary and Tacolneston

- 3.2.92 The HER includes a record based on documentary sources (**1006**) that state that, in 1465 '100 shillings' worth of Roman coins were found when Nunmete Hill was excavated. Nunmete Hill may have been a **medium value** barrow of possibly of Bronze Age or Roman origin. This asset has evidential value for the contribution it makes to the archaeological resource and historical value for the evidence it provides of historical interest in understanding and recording the Roman period. The HER places the asset on the western edge of Forngett St Mary immediately north of Cheney's Lane and 320 m east of the draft Order Limits.
- 3.2.93 Documentary sources are also quoted by the HER to suggest the site of a second possible **medium value** barrow site (**1007**) on the western edge of Forngett St Mary 110 m west of Nunmete Hill immediately north of Cheney's Lane and 230 m east of the draft Order Limits. A 1575 source states that the road to the north of this area was called 'Galgrym Road'. The word 'Galgrym' is thought to derive from a word for 'gallows', suggesting that there were once some gallows in this area. It is also recorded that in 1809 a mound in this area called 'Old Groggams' was levelled, and it may be that this was a gallows site. This asset has evidential and historical value.
- 3.2.94 The placename 'Barrow Field' (**1042**) is apparent on the tithe map for Forngett St Mary labelling a field 700 m south-south-west of Forngett St Mary and 630 m east of the draft Order Limits. The placename 'Barrow Field' is marked on the Forngett tithe map. This suggests that there may have been a Bronze Age barrow on the site. Given the limited evidence for the remains at this point this asset is of **low** value and has evidential value.
- 3.2.95 Metal detector and fieldwalking surveys within this area have produced several multi-period finds assemblages that have enhanced the archaeological record. Many of these finds' assemblages include **low value** Bronze Age artefacts with evidential value and they are described here:
- A multi-phased finds assemblage (**1145**) recovered from farmland 330 m east Tacolneston and 600 m west of the draft Order Limits. The survey site occupies slightly higher ground overlooking the head of a shallow tributary of the Tas Valley to the north. Bronze Age artefacts comprise Neolithic/Bronze Age flint scrapers, two Neolithic/ Bronze Age flint flakes, an incomplete middle Bronze Age copper alloy palstave, and a middle/late Bronze Age copper alloy two-edged knife. The size of this assemblage indicates that it could be evidence of a settlement site

- A multi-phased finds assemblage (**1158**) recovered from farmland 880 m east of Tacolneston and partially within the draft Order Limits. The survey site occupies slightly higher ground overlooking a shallow tributary of the Tas Valley to the north. Bronze Age artefacts comprise two Bronze Age copper alloy palstaves
- A multi-phased finds assemblage (**1164**) recovered from farmland 1.5 km north-east of Tacolneston and immediately west of the draft Order Limits. The survey site occupies the northern flank of the tributary of the Tas Valley directly opposite survey area (**1168**) and slopes downhill from the north to the valley floor to the south. The only dateable Bronze Age artefact comprises a Neolithic/Bronze Age retouched flake, although updated Prehistoric worked flint was also recovered that might belong to the period
- A Bronze Age barbed and tanged flint arrowhead (**1002**) found on farmland 630 m south-south-west of Tacolneston and 430 m north-west of draft Order Limits.
- A multi-phased finds assemblage (**1139**) recovered from farmland immediately south of Fornsett St Mary and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 150 m to the east. The recovered Bronze Age artefacts comprise a Middle Bronze Age copper alloy socketed spearhead, two Bronze Age copper alloy spearheads and a Bronze Age copper alloy axe head
- A multi-phased finds assemblage (**1167**) recovered from farmland on the western edge of Fornsett St Mary immediately north of Cheney's Lane and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 980 m to the east. The only Bronze Age artefact recovered comprises part of middle Bronze Age spearhead
- A multi-phased finds assemblage (**1283**) recovered from farmland immediately south-west of Fornsett St Mary, south of Cheney's Lane and 230 m east of the draft Order Limits. The survey site is situated on the northern flank of a shallow tributary of the Tas Valley that slopes downhill from the north to the south. The only Bronze Age artefact recovered comprises a late Bronze Age chisel

### Bunwell Hill and the Tas Valley

3.2.96

Metal detector and fieldwalking surveys undertaken across the rural landscape to the east through to the south of Bunwell Hill and within the Tas Valley have resulted in several multi-period finds assemblages providing a detailed archaeological record for the area. Bronze Age **low value** with evidential value artefacts recovered during this survey work comprise:

- A Bronze Age socketed copper alloy axe head in a multi-period finds assemblage (**1005**) recovered from farmland within the draft Order Limits and 2.3 km east-south-east of the village of Bunwell
- A Neolithic/Bronze Age retouched flint flake and scraper in multi-period finds assemblage (**1049**) recovered from farmland partially within draft Order Limits and 3 km south-south-east of the village of Bunwell
- A Bronze Age metalworker's hoard including fragments of a socketed axe, a hammer, a knife, a gouge, an annular collar, a barbed spearhead, and several unidentified objects in a finds assemblage that also included Roman items (**1057**) recovered from farmland 760 m south-east of the village of Bunwell and 220 m west of the draft Order Limits

- A Bronze Age socketed copper alloy point in a finds assemblage that also included Mesolithic and Neolithic lithics (**1083**) recovered from farmland north of Prince of Wales Road, 90 m north of the draft Order Limits and 980 m south-east of the village of Bunwell
- An early Bronze Age copper alloy flat axe fragment in a multi-period finds assemblage (**1129**) recovered from farmland 720 m south of the village of Bunwell and 260 m west of the draft Order Limits
- A Bronze Age copper alloy palstave fragment and a socketed axe head fragment in a multi-period finds assemblage (**1087**) recovered from farmland partially within the draft Order Limits and 2 km south-east of the village of Bunwell
- A middle Bronze Age tip of a copper alloy socketed spearhead, with rounded midrib and slightly bevelled blade and two undated cast bronze fragments (**1059**) recovered from farmland within the draft Order Limits and 2.1 km south of the village of Bunwell.
- A Neolithic/Bronze Age flint flake in a finds assemblage that also included a Medieval artefact (**1065**) recovered from farmland within the draft Order Limits 2.8 km south-south-east of the village of Bunwell
- An early Bronze Age stone mace head fragment in a multi-period finds assemblage (**1104**), which also includes undated lithics that might be contemporary with the mace fragment, recovered from farmland 3.2 km south-east of the village of Bunwell and 420 m south-east of the draft Order Limits
- A flint flake and a flint scraper of Bronze Age date in a multi-period finds assemblage (**1118**), which also includes undated lithics that might be contemporary with the Bronze Age material, recovered from farmland on the Tas Valley floor partially within the draft Order Limits and 3 km south-south-east of the village of Bunwell
- Neolithic/Bronze Age flint flakes, blades and scrapers, an early Bronze Age barbed and tanged arrowhead, and Bronze Age flakes, scrapers, a borer, and pottery in a multi-period finds assemblage (**1058**), which also includes undated lithics that might be contemporary with the Bronze Age material. The finds were recovered from farmland on the southern side of the Tas Valley, c. 1.3 km south of Bunwell Hill and partially within the draft Order Limits

### Shelfanger and Winfarthing

- 3.2.97 A large, multi-period finds assemblage (**1190**) was collected during fieldwalking and metal detecting surveys on land 110 m west of the draft Order Limits and 620 m north-east Shelfanger. The survey area is close to the head of a shallow tributary valley of the Tas with the floor of the valley just to the west. The **low value** finds assemblage with evidential value included a late Neolithic/early Bronze Age plano-convex or discoidal flint knife, a Neolithic/Bronze Age flint flake and undated lithics, some of which may be Bronze Age in date.
- 3.2.98 Metal detector surveys on land 400 m north-east of Shelfanger and just clipping the western edge of the draft Order Limits resulted in a **low value** multi-period finds assemblage (**1246**) with evidential value that included a Bronze Age copper alloy flat axe.

## Bressingham and the Waveney Valley

- 3.2.99 Metal detector and fieldwalking surveys undertaken across the rural landscape around Bressingham, the Waveney Valley and the draft Order Limits to the east have resulted in several multi-period finds assemblages providing a detailed archaeological record for the area. Bronze Age **low value** artefacts with evidential value recovered during this survey work comprise:
- A late Bronze Age socketed axe fragment in as multi-period finds assemblage (**1204**) recovered from farmland 2.3 km east of Bressingham, immediately south of a southern spur of the draft Order Limits and east of Shelfanger Road
  - A Bronze Age rapier dating to around 1200 to 900 BC (**1219**) recovered from farmland within the draft Order Limits, 1.2 km south of Bressingham on the Waveney Valley floor
- 3.2.100 A middle/late Bronze Age spearhead in a multi-period finds assemblage (**1224**) was recovered from farmland 760 m east of Bressingham and 150 m north of the draft Order Limits. This asset along with the finds assemblage could indicate at a settlement site. Due to this the asset has evidential value.

## Iron Age

- 3.2.101 The Iron Age is represented in Section A by HER records representing early, middle, and late Iron Age activity. Most of the records represent metal detector and fieldwalking finds but also included are cropmarks indicative of Iron Age activity and excavated archaeological features.
- 3.2.102 Assets that are potentially of late Iron Age to Romano-British date have been included in this Iron Age section and not repeated in the following Roman section.

## Dunston and Mangreen Hall Farm

- 3.2.103 Aerial photography has identified a large area of dispersed **low value** cropmarks (**1261**) 250 m east of the draft Order Limits and within Dunston Park, the grounds of the grade II listed Dunston Hall (**1373206**). The cropmarks indicated fragmentary enclosures, ditches, and field boundaries of possible prehistoric to Roman date. Some of these features (**1260**) are broadly parallel with the Roman Pye road to the east and a Roman date has been suggested, however, excavations in this area ahead of the construction of the Dunston Hall golf course revealed **low value** ditches of Iron Age, Roman and early Saxon date (**1136**). This asset has evidential value and can add to the local historic environment knowledge of this part of Norfolk.
- 3.2.104 Further trenching related to the construction of Dunston Hall golf course immediately north of (**1169**) and 220 m south-east of the draft Order Limits identified multi-period **low value** archaeological features (**1147**) that included evidence of Iron Age timber buildings and pottery sherds of evidential value. Some of the (**1171**) features correspond to cropmarks identified by the HER separately as (**1262** - MNF60304). Due to this the asset has evidential value.
- 3.2.105 Excavations again related to the development of the golf course 350 m north-north-east of (**1169**) and 160 m east of the draft Order Limits identified **low value**, with evidential value, Iron Age pits, postholes, and pottery of evidential value amongst multi-period archaeological remains largely of Roman date (**1144**).
- 3.2.106 A third phase of trial trenching related to the golf course was undertaken 90 m north-north-east of (**1169**) and 130 m east of the draft Order Limits. The trenching revealed

**low value** undated postholes, pits and quarries and a few features of evidential value dated to the Iron Age by pottery sherds (**1146**).

3.2.107 A large **medium value** multi-period cropmark complex (**1325**) is located in a V-shaped parcel of land at the northern extent of the Order Limits between the A140 to the west and the railway to the east with Dunston c. 220 m to the south and the scheduled Roman town of Venta Icenorum (**1021463**) immediately to the east. The complex includes an extremely faint small penannular ring ditch (**1320**), 5 m in diameter, within an area of geological cropmarks. If this ring ditch is archaeological then it may represent the remains of a small Iron Age temporary and/or agricultural structure. The cropmark of a second extremely faint penannular ring ditch (**1319**), 11 m in diameter, is located c. 35 m north-west of (**1320**). If this asset is of archaeological origin, then it likely represents the remains of an Iron Age roundhouse, or perhaps a Bronze Age round barrow. The roundhouses are potentially associated with the cropmarks of fragmentary boundary ditches (**1324**) forming incomplete enclosures to either side of a boundary ditch or trackway. It seems likely that these all relate to agricultural features. The ring ditches and boundary ditches are of **low value** based on their evidential value.

3.2.108 The intensive archaeological fieldwork that has been focused on Mangreen Hall Farm quarry, which is situated on higher ground with Dunston and the Tas Valley to the east, has identified evidence of **low value** Iron Age of evidential value activity during the following phases of fieldwork:

- Geophysical survey, fieldwalking and subsequent trial trenching and strip, map, and sample excavation on land 300 m north-east of Mangreen Hall Farm and immediately north of the draft Order Limits identified unstratified Iron Age pottery and pits and postholes of probable Iron Age date in amongst a multi-period archaeological landscape (**1182**) (Stone, 2011). This fieldwork included elements of cropmarks (**1257**) known in the area for which an Iron Age to Romano-British date has been suggested
- Geophysical survey, fieldwalking, metal detecting and subsequent trial trenching immediately east of the farm and partially within the draft Order Limits identified multi-period archaeological features and finds assemblage (MNF42103) that included pits dated by pottery to the late Bronze Age to Iron Age and possibly associated postholes (McNicol and McNicol-Norbury, 2012)
- Geophysical survey, fieldwalking, metal detecting and subsequent trial trenching on land 700 m south of Mangreen Hall Farm and partially within the draft Order Limits identified archaeological features (MNF63783) including a ditch of late Bronze Age to Iron Age date that was interpreted as an element of a field system (McNicol and McNicol-Norbury, 2012)

### Swainsthorpe and Mulbarton

3.2.109 The archaeological evaluation of land 330 m south of Brick Kiln Lane, 700 m south-east of Mulbarton and partially within the draft Order Limits identified **medium value** multi-period archaeological assets (**1270**), which included two sides of a large enclosure. The enclosure is of likely middle Bronze Age date (see above) but Late Bronze Age to Iron Age pottery of evidential value in its upper fills indicates the asset may have continued in use at least until the early Iron Age.

3.2.110 Two cropmark complexes are recorded in the local area for which an Iron Age to Romano-British date has been suggested based on morphology. These **low value** assets with evidential value comprise:

- Cropmarks of fragmentary ditches (**1247**) on the western outskirts of Swainsthorpe, 130 m south of Church Road and 90 m west of the draft Order Limits.
- Cropmarks of possible fragmentary enclosures, a ring ditch, field boundaries and ditches (**1256**) are visible on aerial photographs 250 m north of Swainsthorpe and 120 m east of the draft Order Limits. It has been suggested the ring ditch might represent an Iron Age/Romano-British roundhouse. But there is some doubt over the archaeological origin of some of these cropmarks and, therefore, some uncertainty remains over the value of this site

## Flordon and Fundenhall

### *Designated Heritage Assets*

- 3.2.111 The **high value** scheduled monument 'Camp in Village' (**1003984**) with evidential and historical value is located on the north-western outskirts of Tasburgh 1.5 km south-east of Flordon and 2.3 km south-east of the draft Order Limits. The camp is defined by an earthen bank and in places the rampart survives to a height of 3 m (NAT, n.d.) It is suggested that the camp, based on morphological grounds, is of Iron Age date and constitutes the remains of a defended settlement or hillfort, and its location on a promontory of land at c. 37 m aOD with the Tas Valley to the north and west at c. 18 m aOD and a tributary valley to the south at c. 19 m aOD adds some credence to this supposition. Excavations within the monument have, however, been extremely limited and focused on the south of the camp where the development of Tasburgh in the Late Saxon period onwards has encroached. No conclusively Iron Age archaeological remains have been identified during the limited fieldwork, but over 40 sherds of Iron Age pottery were recovered from later features (Davies *at al.* 1991).
- 3.2.112 The setting of the Camp is informed by its location on the promontory of higher land at the confluence of the Tas Valley and a tributary. This location would have provided a strategic and physical advantage should it have become necessary to defend the site during periods of inter-tribal aggression and despite some intervening development and tree cover, there are still open views to the valley floors. The setting of the asset, therefore, makes a moderate contribution to its value but it does not extend to the draft Order Limits.

### *Non-Designated Heritage Assets*

- 3.2.113 The land within and around the draft Order Limits to the north and west of Flordon and east of Fundenhall has been subjected to numerous metal detector surveys. Evidence of Iron Age **low value** activity collected during these surveys comprises the following finds with evidential value:
- An Iron Age coin, an Iron Age brooch, an Iron Age button and loop fastener and an Iron Age rowel spur in a multi-period finds assemblage (**1130**) recovered from farmland 500 m south-east of Fundenhall, immediately south of Hapton Road partially within the draft Order Limits and situated on higher ground overlooking a tributary of the Tas Valley to the south-east
  - A Late Iron Age to Romano-British brooch in a multi-period finds assemblage (**1280**) recovered from farmland 600 m north-west of Flordon and partially within the draft Order Limits

- Iron Age pottery sherds in a multi-period finds assemblage (**1149**) recovered from farmland 720 m west-south-west of Flordon and 220 m south-east of the draft Order Limits
- An Iron Age copper alloy coin (**1127**), which was probably dipped in gold in an attempted contemporary forgery found on farmland 1.3 km north-east of Fundenhall and 250 m north-west of the draft Order Limits
- A possible Iron Age gold torc fragment that may also be an Iron Age/Romano-British bracelet fragment in a multi-period finds assemblage (**1251**) recovered from farmland 1.8 km south-west of Flordon and 160 m east of the draft Order Limits

### **Forngett St Mary and Tacolneston**

3.2.114 Metal detector and fieldwalking surveys within this area have produced several multi-period finds assemblages that have enhanced the archaeological record. Many of these finds' assemblages include **low value** Iron Age artefacts with evidential value and they are described here:

- A silver Iron Age Iceni coin in a multi-period finds assemblage (**1137**) recovered from farmland 8600 m east of Tacolneston and within the draft Order Limits
- A Late Iron Age to Romano-British copper alloy brooch in a multi-period finds assemblage (**1161**) recovered from farmland 250 m north-west of Forngett St Mary and partially within the draft Order Limits
- A Late Iron Age to Romano-British copper alloy brooch in a multi-period finds assemblage (**1155**) recovered from farmland 700 m north of Forngett St Mary, immediately north-west of High Road and partially within the draft Order Limits
- An Iron Age enamelled copper alloy fragment, possibly part of a harness plaque in a multi-period finds assemblage (**1168**) recovered from farmland 1.3 km north-east of Tacolneston and partially within the draft Order Limits
- Iron Age pottery recovered from the site of a deserted medieval/post medieval settlement (**1089**) recorded on a 1565 survey as Rattongate and Haliards. The site is located 10 m north of the draft Order Limits south of Long Stratton Road and 400 m south-south-east of Tacolneston
- A 1st century AD coin hoard that comprised three hundred and twenty-eight silver Iron Age and forty-one Roman coins in a multi-period finds assemblage (**1139**) recovered from farmland immediately south of Forngett St Mary and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 150 m to the east
- Part of an Iron Age or Romano-British linch pin in a multi-period finds assemblage (**1170**) recovered from farmland 700 m east of Tacolneston and 60 m west of the draft Order Limits
- Iron Age pottery in a multi-period finds assemblage (**1242**) recovered from farmland 320 m north of Forngett St Mary and 180 m east of the draft Order Limits
- Sherds of Iron Age pottery in a multi-period finds assemblage (**1116**) recovered from farmland 1.1 km south-west of Forngett St Mary and 360 m east of the draft Order Limits
- A middle Iron Age brooch, a late Iron Age/Roman Colchester-type brooch, late Iron Age pottery and a possibly Iron Age unidentified copper alloy object in a

multi-period finds assemblage (**1187**) recovered from farmland 440 m north-east of Tacolneston and 460 m west of the draft Order Limits. These finds, along with artefacts from the Roman, Saxon (possibly indicating at a cemetery site), medieval and post medieval periods indicate that this could be a site of a multi-phase settlement site

- Two silver Iron Age coin, an Iron Age/Romano-British glass bead and four Late Iron Age/Roman brooches in a multi-period finds assemblage (**1145**) recovered from farmland 330 m east Tacolneston and 570 m west of the draft Order Limits. The survey area occupies slightly higher ground overlooking a shallow tributary of the Tas Valley to the north

### Bunwell Hill and the Tas Valley

3.2.115 Metal detector and fieldwalking surveys undertaken across the rural landscape to the east through to the south of Bunwell Hill and within the Tas Valley have resulted in several multi-period finds assemblages providing a detailed archaeological record for the area. Iron Age **low value** artefacts recovered during this survey work comprise the following assets with evidential value:

- Iron Age pottery in a multi-period assemblage (**1111**) recovered from farmland 1.8 km south-east of the village of Bunwell within the draft Order Limits
- Iron Age pottery in a multi-period assemblage (**1087**) recovered from farmland partially within the draft Order Limits and 2 km south-east of the village of Bunwell
- Iron Age pottery in a multi-period assemblage (**1098**) recovered from farmland 2.9 km south of the village of Bunwell in the Tas Valley and 50 m west of the draft Order Limits
- Iron Age pottery and a late Iron Age to early Romano-British one-piece Colchester brooch in a multi-period finds assemblage (**1058**) found on farmland partially within the draft Order Limits on the valley floor and 3.1 km south-south-east of the village of Bunwell
- Possible Iron Age pottery in a multi-period assemblage (**1075**) recovered from farmland 2.4 km south-south-east of the village of Bunwell and 220 m north-west of the draft Order Limits
- An Iron Age Iceni gold quarter stater coin, and a late Iron Age decorative boss with surviving traces of red enamel and a bronze pin which probably went through boss holding it to top of a sword pommel in a multi-period finds assemblage (**1066**) recovered from farmland 2 km south-south-east of the village of Bunwell and 240 m north-west of the draft Order Limits in a field immediately south-east of the junction of Bunwell Hill and The Turnpike
- Iron Age pottery, late Iron Age to Romano-British pottery and two late Iron Age to Romano-British brooches in a multi-period finds assemblage (**1129**) recovered from farmland 720 m south of the village of Bunwell and 260 m west of the draft Order Limits
- Iron Age pottery in a multi-period assemblage (**1104**) recovered from farmland 3.2 km south-east of the village of Bunwell and 420 m south-east of the draft Order Limits

### Shelfanger and Winfarthing

3.2.116 A large, **medium value** multi-period finds assemblage (**1190**) was collected during fieldwalking and metal detecting surveys on land 110 m west of the draft Order Limits

and 620 m north-east Shelfanger. The survey area is close to the head of a shallow tributary valley of the Tas with the floor of the valley just to the west. The finds assemblage with evidential value included late Iron Age pottery, a late Iron Age/Roman puddingstone quern fragment, a late Iron Age/Romano-British copper alloy brooch a Late Iron Age copper alloy coin, and a late Iron Age/Romano-British copper alloy nail cleaner. It is possible that this concentration of finds indicates the site of a Transitional period farmstead of small settlement.

- 3.2.117 Metal detector surveys on land 400 m north-east of Shelfanger and just clipping the western edge of the draft Order Limits resulted in a **low value** multi-period finds assemblage (**1246**) that included Iron Age pottery and late Iron Age/Romano-British pottery of evidential value. This parcel of land is located immediately south of the field that produced the finds assemblage (**1190**) and is situated on the eastern flank of the tributary valley of the Tas with the valley floor to the west.

### **Bressingham and the Waveney Valley**

- 3.2.118 Metal detecting on farmland 400 m east of Bressingham and partially within the draft Order Limits recovered a **low value** multi-period finds assemblage (**1293**) that includes a late Iron Age/Romano-British copper alloy vessel mount with evidential value.
- 3.2.119 Metal detecting on farmland 760 m east of Bressingham and 150 m north of the draft Order Limits recovered a **low value** multi-period finds assemblage (**1224**) that included a late Iron Age/Romano-British copper alloy cosmetic pestle with evidential value.

### **General Prehistoric**

- 3.2.120 There are numerous HER records for undiagnostic and undated Prehistoric activity across the whole of Section A. These assets comprise cropmarks and artefact findspots and scatters. Finds of Palaeolithic material is extremely rare and so it is likely that the finds and scatters are derived from the ensuing archaeological periods, with the majority being deposited in the Neolithic through to the later Bronze Age when more and more of the landscape was settled by human populations and taken into agricultural and pastoral production.

### **Dunston and Mangreen Hall Farm**

#### *Designated Heritage Assets*

- 3.2.121 The **high value** scheduled monument 'Sites discovered by air photography at Markshall' (**1002887**) with evidential value is an eight-part asset located between 1.3 km and 2.6 km north-east of the northern extent of the draft Order Limits and north and west of Markshall. The assets comprise cropmarks of ring ditches and enclosures and some are still apparent on 20th century satellite imagery. The assets have not been archaeologically investigated but based on their morphology they likely represent Bronze Age barrows and Iron Age/Romano-British enclosures. the assets are in three groups in an increasingly narrowing strip of land between the Tas Valley to the east and the Yare to the north and north-west.
- 3.2.122 The first group of assets comprises a c. 44 m diameter double ring ditch with a central pit and a D-shaped enclosure located at the confluence of the two river valleys. The ring ditch, almost certainly a large, imposing Bronze Age barrow when constructed, is located at the confluence of the valleys on land at c. 7 m aOD with the Tas Valley at c. 3 m aOD to the east and the Yare Valley at c. 5 m aOD. The river valleys during the Bronze Age would likely have served as routes for river traffic

through the landscape and may also have delineated tribal territories. The imposition of the barrow at the valley confluence may have represented territorial claims over the landscape and its resources, emphasised by ancestral claims embodied by the intombed dead. The positioning of the likely Iron Age D-shaped enclosure may also have been concerned with territorial claims and its location adjacent next to the barrow would have supported validation through ancestral claims, spurious or not.

- 3.2.123 The second group of assets comprises three ring ditches aligned approximately north/south on the western flank of the Tas Valley, although only the two northern ring ditches are visible on 20th century satellite imagery. The features are likely to be Bronze Age round barrows with the northern asset is c. 42 m in diameter whilst the southern asset measures c. 29 m. The barrows are located on a shelf of land at c. 8 m aOD with the valley floor and the Tas to the east at c. 3 m aOD and higher ground up to c. 32 m aOD to the west. The siting of these funerary monuments, as with the barrow to the north, would likely have been understood as a claim of tenure over the landscape and its resources and highlight the Tas as a potential tribal boundary.
- 3.2.124 The third group of assets is located on higher ground at c. 36 m 1.2 km south-west of the barrows by the Tas. These assets, presumably ring ditches, are no longer apparent on 20th century satellite imagery. They may have represented further funerary activity or perhaps settlement activity.
- 3.2.125 The setting of the assets has been greatly impacted by the introduction of subsequent development, mineral extraction, industrial farming and the rail and road networks. However, although eroded by subsequent activity, the setting of the assets is informed by their relationships with each other and particularly by their interaction with the physical landscape defined by the river valleys and their confluence. The asset's setting, therefore, makes a positive contribution to their value but the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.126 Mangreen Hall Farm is located just outside the draft Order Limits immediately to the north and its land has been the focus of several archaeological investigations ahead of mineral extraction. The farm is situated on higher ground with lower, rolling land to the south and west and the Tas Valley to the east. The fieldwork (**1182**), resulted in the recovery of a **low value** mixed-period finds assemblage that included a scatter of unstratified prehistoric worked and burnt flint. The undiagnostic flint is likely related to activity of Mesolithic, Neolithic, and Bronze Age date, which is also represented in the find's assemblage.
- 3.2.127 Fieldwalking, metal detecting and subsequent trial trenching immediately south of Mangreen Farm and partially within the draft Order Limits identified **low value** multi-period archaeological features and finds assemblage (**1185**) that included significant scatters of prehistoric flint tools and flakes of evidential value. The scatters included diagnostic late Bronze Age artefacts and archaeological features of a similar date were identified during the trial trenching and it is likely the undated material is related to this activity.
- 3.2.128 Fieldwalking, metal detecting and subsequent trial trenching immediately east of Mangreen Farm and partially within the draft Order Limits identified **low value** multi-period archaeological features and finds assemblage (**1184**) including significant scatters of prehistoric flint tools and flakes of evidential value. The scatters included diagnostic late Bronze Age artefacts and archaeological features of a similar date were identified during the trial trenching and it is likely the undated material is related to this activity.

- 3.2.129 Evaluation trial trenching undertaken immediately to the south of the scheduled monument Venta Icenorum (**1021463**), identified **low value** Iron Age and Romano-British archaeological remains (**1144**) of evidential value. The finds assemblage included residual Prehistoric lithics, which may be associated with artefacts of Mesolithic and/or Neolithic date also included in the find's assemblage. The evaluation area is located on the western flank of Dunston, 190 m east of the draft Order Limits and within the Tas Valley to the west of the river.
- 3.2.130 Prehistoric **low value** worked flint of evidential value was recovered as part of a multi-period finds assemblage (**1196**) during fieldwalking on farmland 740 m south-south-west of Dunston Hall and 340 m east of the draft Order Limits.

### Swainsthorpe and Mulbarton

- 3.2.131 Prehistoric **low value** worked flints of evidential value were recovered as part of a multi-period finds assemblage (**1229**) during fieldwalking on farmland south of South of Church Road and partially within the draft Order Limits. The finds assemblage included a flint core of Neolithic date, and it is possible the undiagnostic flint is of a similar date.
- 3.2.132 Prehistoric **low value** worked flints of evidential value were recovered as part of a multi-period finds assemblage (**1230**) during fieldwalking on farmland on the western flank of Swainsthorpe, immediately south of Church Road and partially within the draft Order Limits. The finds assemblage also included a flint scraper of Neolithic date, and it is possible the undiagnostic flint is of a similar date.
- 3.2.133 Prehistoric **low value** worked flints of evidential value were recovered as part of a multi-period finds assemblage (**1233**) during fieldwalking on farmland 850 m south-west of Swainsthorpe, immediately north of Brick Kiln Lane and partially within the draft Order Limits.
- 3.2.134 Prehistoric **low value** worked flints of evidential value were recovered as part of a multi-period finds assemblage (**1234**) during fieldwalking on farmland 1.1 km south-south-west of Swainsthorpe, immediately south of Brick Kiln Lane and partially within the draft Order Limits.
- 3.2.135 Prehistoric **low value** worked flints of evidential value were recovered as part of a multi-period finds assemblage (**1235**) during fieldwalking on farmland 1.6 km south-south-west of Swainsthorpe, immediately south-west of Mulbarton lane and just clipping the eastern flank of the draft Order Limits. The finds assemblage also included two flint cores of Neolithic date, and it is possible the undiagnostic flint is of a similar date.
- 3.2.136 A late **low value** prehistoric piercer/awl of evidential value was recovered as part of a multi-period finds assemblage (**1238**) during fieldwalking on farmland 610 m east of Mulbarton and partially within the draft Order Limits.
- 3.2.137 Late prehistoric **low value** flint flakes and a flint knife of evidential value recovered as part of a multi-period finds assemblage (**1277**) during fieldwalking on farmland 1.3 km south-south-west of Swainsthorpe and clipping the eastern flank of the draft Order Limits.
- 3.2.138 Metal detecting and fieldwalking surveys ahead of the development of a site to the north of Church Road, c. 600 m west of Swainsthorpe and clipping the eastern flank of the draft Order Limits resulted in a multi-period finds assemblage (**1195**). The finds assemblage included **low value** prehistoric flintwork of evidential value and this

might be associated with Mesolithic/early Neolithic represented by a diagnostic flint core. This site is situated in a shallow, dry tributary valley of the Tas.

### Flordon and Fundenhall

- 3.2.139 Flint implements (**1035**), initially considered to be Palaeolithic in date, were recovered in 1908 from a gravel pit located approximately 1.1 km west-northwest of Flordon and partially within the draft Order Limits. Subsequent analysis of the **low value** assemblage suggests most are of geological origin with some of a general later prehistoric date of evidential value indicating background levels of prehistoric activity in this area.

### Forngett St Mary and Tacolneston

- 3.2.140 Prehistoric **low value** flints (**1092**) of evidential value were recovered during fieldwalking on farmland 1.1 km south-south-east of Tacolneston and within the draft Order Limits.
- 3.2.141 Prehistoric **low value** flints of evidential value were recovered as part of a multi-period finds assemblage (**1091**) from farmland 990 m south of Tacolneston and partially within the draft Order Limits.
- 3.2.142 A prehistoric **low value** flint flake of evidential value was recovered as part of a multi-period finds assemblage (**1139**) during metal detecting on farmland immediately south of Forngett St Mary and partially within the draft Order Limits. The finds assemblage includes several copper alloy Bronze Age artefacts, and it is possible the flake is related to this activity.
- 3.2.143 Two prehistoric **low value** flint flakes (**1113**) of evidential value were recovered during fieldwalking farmland 1.1 km south-east of Tacolneston and 120 m south of the draft Order Limits.
- 3.2.144 Prehistoric **low value** flints of evidential value were recovered as part of a multi-period finds assemblage (**1107**) during fieldwalking of farmland 990 m south-south-west of Forngett St Mary and 170 m east of the draft Order Limits.
- 3.2.145 A late prehistoric **low value** retouched flint flake or scraper of evidential value recovered as part of a multi-period finds assemblage (**1242**) during metal detecting on farmland 320 m north of Forngett St Mary and 180 m east of the draft Order Limits.
- 3.2.146 A prehistoric flint scraper and six flakes of evidential value were recovered as part of a multi-period finds assemblage (**1203**) during fieldwalking of farmland 420 m north-west of Forngett Saint Peter and 200 m east of the draft Order Limits.
- 3.2.147 Prehistoric **low value** flints of evidential value were recovered as part of a multi-period finds assemblage (**1112**) during fieldwalking on farmland 1.4 km south-east of Tacolneston and 240 m south-east of the draft Order Limits.
- 3.2.148 A prehistoric **low value** flint flake of evidential value was recovered as part of a multi-period finds assemblage (**1194**) during metal detecting on farmland 650 m north-east of Tacolneston and 270 m west of the draft Order Limits.
- 3.2.149 A prehistoric **low value** scraper and a flake (**1115**) of evidential value were recovered during fieldwalking farmland 980 m south-west of Forngett St Mary and 150 m north-east of the draft Order Limits.

- 3.2.150 A prehistoric **low value** scraper and a flake of evidential value were recovered as part of a multi-period finds assemblage (**1116**) during fieldwalking of farmland 1.1 km south-west of Forncett St Mary and 400 m east of the draft Order Limits.

### **Bunwell Hill and the Tas Valley**

- 3.2.151 A scatter of **low value** burnt flint (**1120**) of evidential value was identified during fieldwalking farmland 2.3 km south-east of the village of Bunwell and within the draft Order Limits. The NHER suggests the asset is evidence of a burnt mound. Burnt mounds comprise heat shattered stones and charcoal, and when excavated, are often found to be associated with a water source, hearth, and trough. Radiocarbon dating of these assets indicates they originate in the later Neolithic and were still being constructed into the Iron Age. The purpose of these features is not understood but it has been suggested they may be related to bathing, sauna, cooking, salt production, dyeing, leather production and brewing beer.
- 3.2.152 Several undated **low value** lithics including flakes, blades, scrapers and two hammerstones of evidential value were recovered as part of a in a multi-period finds assemblage (**1087**) during metal detecting on farmland partially within the draft Order Limits, 160 m east of the Grade II listed Banyard's Hall (**1373609**) and 2 km south-east of the village of Bunwell.
- 3.2.153 Prehistoric **low value** worked and burnt flint of evidential value was recovered as part of a multi-period assemblage (**1111**) during fieldwalking and metal detecting on farmland 1.8 km south-east of the village of Bunwell within the draft Order Limits.
- 3.2.154 A **low value** archaeological feature (**1114**) of evidential value was identified in the bank of a stream 2.7 km south-east of the village of Bunwell and 20 m north of an Order Limit access road. The feature contained charcoal and pot boilers and although it was not further investigated, a prehistoric date has been attributed.
- 3.2.155 Fieldwalking and metal detecting on farmland 1.9 km south-east of the village of Bunwell and 50 m north-west of the draft Order Limits resulted in a multi-period finds assemblage (**1063**) that included three prehistoric **low value** flint scrapers of evidential value.
- 3.2.156 A scatter of prehistoric **low value** flint of evidential value was recovered as part of a multi-period assemblage (**1098**) during metal detecting on farmland 2.9 km south of the village of Bunwell in the Tas Valley and 50 m west of the draft Order Limits.
- 3.2.157 A scatter of prehistoric **low value** lithics (**1097**) of evidential value covering a 100 m by 30 m area was identified on farmland 2.4 km south-south-east of the village of Bunwell on the southern flank of the Tas Valley and 90 m south-west of the draft Order Limits.
- 3.2.158 A concentration of **low value** burnt flint (**1084**) of evidential value was identified in a field 2.5 km south-south-east of the village of Bunwell and 110 m east of the draft Order Limits. The NHER suggests this might be evidence of a burnt mound.
- 3.2.159 Prehistoric **low value** lithics and pot-boilers (**1101**) of evidential value were recovered during fieldwalking farmland 2.1 km south-east of the village of Bunwell and 210 m north-west of the draft Order Limits.
- 3.2.160 Prehistoric **low value** flints of evidential value were recovered as part of a multi-period finds assemblage (**1102**) during fieldwalking farmland 1.9 km south-east of the village of Bunwell and 210 m north-west of the draft Order Limits.

- 3.2.161 Numerous undated **low value** lithics of evidential value were recovered as part of a multi-period finds assemblage (**1066**) during fieldwalking and metal detecting on farmland immediately south-east of the junction of Bunwell Hill and The Turnpike, 2 km south-south-east of the village of Bunwell and 240 m north-west of the draft Order Limits. The finds assemblage included diagnostic lithics dated to the Mesolithic, Neolithic and late Neolithic/early Bronze Age periods and it is likely the undated material provides further evidence of activity at these times.
- 3.2.162 Prehistoric **low value** flint scrapers of evidential value were recovered as part of a multi-period finds assemblage (**1129**) during fieldwalking and metal detecting on farmland 720 m south of the village of Bunwell and 260 m west of the draft Order Limits. The finds assemblage also included early Bronze Age artefacts and it is possible the undated lithics are related to this activity.
- 3.2.163 Prehistoric **low value** flints of evidential value were recovered as part of a multi-period finds assemblage (**1104**) during fieldwalking and metal detecting on farmland 3.2 km south-east of the village of Bunwell and 420 m south-east of the draft Order Limits. Early Bronze Age lithics were also recovered as part of the finds assemblage and it is possible the undated material is related to this activity.

### Shelfanger and Winfarthing

- 3.2.164 A concentration of **low value** pot-boilers (**1020**) of evidential value was identified in a field 1 km north-east of Winfarthing and within the draft Order Limits. The NHER suggests this might be evidence of a burnt mound.
- 3.2.165 A concentration of **low value** pot-boilers (**1124**) of evidential value was identified during fieldwalking farmland 950 m north-east of Shelfanger and 50 m west of the draft Order Limits. The NHER suggests this might be evidence of a burnt mound.
- 3.2.166 A Prehistoric **low value** flint flake (**1078**) of evidential value was found whilst fieldwalking farmland 1.1 km east of Shelfanger and 160 m east of the draft Order Limits.

### Bressingham and the Waveney Valley

- 3.2.167 A prehistoric **low value** flint scraper of evidential value was recovered as part of a multi-period finds assemblage (**1117**) recovered during gardening and metal detecting in the grounds of the Grade II listed Gringle Cottage (**1154386**). The cottage is in Roydon, 690 m east of Bressingham and 250 m south-east of the draft Order Limits.
- 3.2.168 Fieldwalking and metal detector surveys on land on the northern bank of the river Waveney c. 600 m south-west of the outskirts of Diss and partially within the Order Limits has resulted in a **low value** multi-period finds assemblage (**1335**) of evidential value. As well as the Upper Palaeolithic and Mesolithic material noted above, the assemblage also includes over 100 undiagnostic worked flints.

## Roman Period

- 3.2.169 Evidence of Romano-British activity in Section A is represented the scheduled remains of a town, excavated archaeological remains and finds from metal detector and fieldwalking surveys some concentrations of which may represent settlement and funerary activity.

## Dunston and Mangreen Hall Farm

### *Designated Heritage Assets*

- 3.2.170 The **high value** scheduled monument 'Venta Icenorum: Roman town and associated prehistoric, Anglo-Saxon, and medieval remains' (**1021463**) is of evidential and historical value and is located between Dunston to the South and Caistor St Edmunds in the north and 150 m east of the northern extent of the draft Order Limits. The asset is situated on the eastern flank of the Tas Valley, and from high ground to the east at c. 35 m aOD adjacent to Wash Lane, the asset slopes gently down to the Tas Valley floor at c. 5 m aOD 1 km to the west. To the west of the Tas the site is situated on Dunston Field, which climbs to c. 26 m aOD at the western limit of the asset.
- 3.2.171 In approximately AD 70 Venta Icenorum was laid out with streets and insulae on a grid pattern, probably on the site of an Iron Age and Romano-British settlement of the Icenii tribe. The settlement was a Civitas Capital which functioned as an economic, cultural, and administrative centre for its regions. The site comprises a palimpsest of multi-period settlement, from the complex road network and important public buildings such as the amphitheatre, forum, basilica, and bath complex associated with the Roman town, to the crop mark evidence of the Late Iron Age settlement and an Anglo-Saxon cemetery. As the site was not comprehensively resettled in the post-Roman period, the site is likely to contain extensive archaeological deposits in a good state of survival that have the potential to increase understanding of the pre-Roman settlement, the foundation and development of the civitas capital and the decline of urban Roman life in the province.
- 3.2.172 The HER has reported several non-designate heritage assets located within the bounds of the scheduled monument. As they are located within and form part of the monument they are discussed here. The assets include:
- A multi-period finds assemblage with evidential value (**1022**), including Iron Age coins, a late Iron Age bow brooch, and a late Iron Age/Roman Nauheim Derivative brooch, numerous Roman coins, several brooches, building material, finger rings, spoons, furniture fittings, dress components, harness fittings, a steelyard weight, tweezers, a knife, and a pendant amongst other Romano-British finds of evidential value were found during a metal detector survey
  - A series of undated cropmarks (**1243**, **1323**) of evidential value comprising fragmentary ditches and possible trackways were identified by the National Mapping Programme. The asset falls within an area that has been subject to several metal detector surveys (**1022**, **1327**) resulting in a large assemblage of Romano-British and Saxon artefacts, suggesting a possible date range for the cropmarks
  - Evaluation trial trenching undertaken immediately to the south of the scheduled monument Venta Icenorum (**1021463**), identified Iron Age and Romano-British archaeological remains (**1144**) of evidential value that included a possible Roman trackway leading towards a known Roman road, a pit and postholes possibly forming palisades and/or building, a large scatter of Roman pottery and several Roman tiles and tesserae. The evaluation area is located on the western flank of Dunston, 190 m east of the draft Order Limits and within the Tas Valley to the west of the river
  - Evidence of late Saxon activity in the Dunston and Mangreen Hall Farm area is limited but includes an assemblage comprising of a late Saxon box, two brooches, a book fitting, an earring, a figurine, a pendant, a strap fitting, a late

Saxon/medieval brooch, and three late Saxon to post medieval lead spindle whorls in a multi-period finds assemblage (**1022**) of evidential value. The assets were recovered during metal detector and fieldwalking surveys undertaken within the bounds of the scheduled monument Venta Icenorum (**1021463**)

- 3.2.173 The setting of the asset has been impacted by the introduction of subsequent development, mineral extraction, industrial farming and the rail and road networks. However, although eroded by subsequent activity, the setting of the asset is informed by its location at the confluence of a network of Roman roads and its relationship with the Tas river, which provided the settlement with fresh water and may also have provided a means of transport. The setting of the asset, therefore, makes a positive contribution to its value and the setting extends to the draft Order Limits.
- 3.2.174 The **high value** scheduled monument 'Roman sites outside town walls' (**1003954**) is of evidential and historical value and comprises three individual sites to the south-west, south and east of Caister St Edmund, c. 1.4 km to 2.3 km north-east of the northern extent of the draft Order Limits. These sites comprise the flint foundation of a Roman building excavated in 1846; a Roman building, huts and section of road excavated in 1938; and cropmark and excavated evidence of Roman buildings, including a Romano-Celtic temple, and a wall nearly 400ft (122 m) long interpreted as the western boundary of a temple precinct.
- 3.2.175 As with Venta Icenorum, the setting of these assets has been impacted by the introduction of subsequent development, mineral extraction, industrial farming and the rail and road networks. However, it is still possible to appreciate these assets as within the Roman landscape and as elements on the periphery of the Roman town. The settings of these assets do, therefore, make a positive contribution to their value, but do not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.176 A large **medium value** multi-period cropmark complex (**1325**) is located in a V-shaped parcel of land at the northern extent of the Order Limits between the A140 to the west and the railway to the east with Dunston c. 220 m to the south and the scheduled Roman town of Venta Icenorum (**1021463**) immediately to the east. The complex includes the cropmarks of a large double ditched trapezoidal enclosure (**1316**), potentially representing the remains of a **medium value** Roman temple complex or similar high-status asset of evidential and historical value. It is possible that the double ditches represent the former lines of a wide portico or covered walkway around the outside of the enclosure, which could have acted as a 'temenos' surrounding a Romano-British temple. The enclosure is trapezoidal in shape and measures approximately 80 m by 80 m. On the northern side of the enclosure, the inner and outer ditches are 7 m apart, whereas on the remaining three sides the ditches are 12 m apart, although this would seem exceptionally wide for a portico or covered walkway. The central area of the enclosure shows a distinctly darker area, which could indicate that the inner surface was slightly sunken, however a geological origin for this cropmark cannot be ruled out. Few convincing internal features have been identified, and in particular nothing clearly resembling a temple. The trapezoidal enclosure (**1316**) may be associated with the cropmark of a polygonal ring ditch or enclosure (**1315**) that may represent the remains of a Romano-British temple. The enclosure, which measures 16 to 17.5 m across, looks convincingly octagonal on some aerial photographs and a possible internal, slightly polygonal ring ditch may be visible in 1992, measuring 7.5 m across, with a break to the west suggesting the presence of an entrance. It is possible, given the possible polygonal shape of this enclosure, that it relates to a Romano-British temple, with the inner ring ditch

representing the remains of central shrine surrounded by an octagonal ambulatory. The trapezoidal enclosure (**1316**) and possible temple (**1315**) are located within a wider complex of enclosures (**1317**), which possibly represents a temple precinct or public space. These Roman-British assets are of **medium value** based on their evidential and historical values.

- 3.2.177 Field walking and metal detector surveys within the bounds of the cropmark complex (**1325**) have produced a **low value** multi-period finds assemblage (**1326**) of evidential value that includes coins, brooches, building materials and a copper alloy lozenge shaped seal box, all of Roman date.
- 3.2.178 Geophysical survey and subsequent trial trenching immediately south of Mangreen Farm and partially within the draft Order Limits identified sparse **low value** archaeological remains (**1333**) of Roman date and of evidential value. The remains comprise ditches and pits likely representing agricultural practice, although a small quantity of unstratified Romano-British ceramic building material was recovered. This asset is located within the bounds of the larger HER monument (**1185**).
- 3.2.179 Metal detector survey of land 850 m south of Mangreen Hall Farm and partially within the draft Order Limits resulted in a multi-period finds assemblage (**1218**) that included several **low value** Roman coins including two of silver, and a dolphin brooch. Subsequent archaeological trial trenching identified multi-period **low value** archaeological features and finds assemblage (**1271**) of evidential value that included evidence of a Romano-British enclosure, elements of a field system, pits, post-holes, and a hearth.
- 3.2.180 Excavation in advance of the construction of the Dunston Hall golf course on the western flank of Dunston, immediately east of Ipswich Road and 160 m south-east of the draft Order Limits, identified multi-period archaeological features (**1136**) that included a **low value** pit with a Roman pot and a pair of double ditches of evidential value, perhaps indicating a Romano-British trackway. Metal detecting on this site also recovered Roman and medieval coins and metalwork. This site is situated on land at overlooking the Tas Valley to the east.
- 3.2.181 Following phases of fieldwalking and archaeological evaluation of land 290 m north-east of Mangreen Hall Farm and immediately north of the draft Order Limits, an excavation focused on the location of a proposed reservoir within the site identified multi-period archaeological remains (**1182**) of evidential value including a small **medium value** circular enclosure ditch, within which were six Roman graves, containing the remains of seven individuals (Stone, 2011). This site occupied higher ground overlooking the Tas Valley to the east.
- Geophysical survey, fieldwalking, metal detecting and subsequent trial trenching on land 700 m south of Mangreen Hall Farm and partially within the draft Order Limits identified multi-period archaeological features and finds (**1271**) of evidential value dominated by 3rd to 4th century Romano-British remains although early Roman activity was also represented. These **low value** remains comprised linear features, pits and a possible roundhouse gully that were largely concentrated in two locations within the large survey area (McNicol and McNicoll-Norbury, 2012)
- 3.2.182 A small **low value** complex of cropmarks (**1237**) of evidential value comprising fragmentary ditches is located 710 m south-south-west of Mangreen Farm and partially within the draft Order Limits. Archaeological trial trenching (McNicol and McNicoll-Norbury, 2012) in this area predominantly identified Roman-British and medieval features (**1271**), and it is likely the cropmarks related to this activity.

- 3.2.183 Metal detector and fieldwalking surveys in the Dunston and Mangreen Farm area have identified **low value** Romano-British assets of evidential value comprising:
- A Roman coin (**1267**) recovered from farmland 660 m south-south-west of Mangreen Hall Farm and partially within the draft Order Limits
  - Two Roman coins in a multi-period finds assemblage (**1208**) recovered from farmland west of Mangreen Hall Farm and 180 m north-west of the draft Order Limits
  - Two Roman copper alloy coins in a multi-period finds assemblage (**1196**) recovered from farmland 740 m south-south-west of Dunston Hall and 340 m east of the draft Order Limits
  - Two Roman coins in a multi-period finds assemblage (**1163**) 190 m north-east of Mangreen Hall Farm and 110 m west of the draft Order Limits
  - A copper alloy Roman coin and a copper alloy Romano-British bell in a multi-period finds assemblage (**1110**) 80 m north-west of Mangreen Hall Farm and 260 m north-west of the draft Order Limits
- 3.2.184 Aerial photography has identified a large area of dispersed **low value** cropmarks (**1261**) of evidential value 250 m east of the draft Order Limits and within Dunston Park, the grounds of the Grade II listed Dunston Hall (**1373206**). The cropmarks indicated fragmentary enclosures, ditches, and field boundaries of possible prehistoric to Roman date, however, the cropmarks in the northern half of the park have been lost through the construction of the Dunston Hall golf course.
- 3.2.185 A **low value** complex of fragmentary cropmarks (**1250**) of evidential value, likely representing former field boundaries, have been identified on the western flank of the A140, 30 m west of Dunston Park and 110 m east of the draft Order Limits. Based on orientation, the anomalies represent two phases of activity and although undated, they may relate to the evidence of Bronze Age, Iron Age/Early Saxon Roman-British activity excavated within Dunston Park (**1136**) 30 m to the east. Metal detector surveys to the south (**1197**) and (**1196**) have also recovered Romano-British artefacts.
- 3.2.186 The **low value** cropmarks of fragmentary undated ditches, which are likely to represent former field boundaries and trackways of possible Iron Age to Roman date (**1257**) of evidential value have been identified on land 270 m north-east of Mangreen Hall Farm and partially within the draft Order Limits.

### Swainsthorpe and Mulbarton

- 3.2.187 Romano-British pottery sherds were recovered as part of a **low value** multi-period finds assemblage (**1229**) of evidential value during fieldwalking on farmland south of South of Church Road and partially within the draft Order Limits. Likewise, further fieldwalking and metal detecting immediately to the east, and partially within the draft Order Limits, recovered more **low value** multi-period finds (**1230**) of evidential value including a Roman coin and more Romano-British pottery. The Church Road sites are situated on higher ground with tributaries of the Tas Valley and the Tas Valley itself to the east.
- 3.2.188 Several more metal detecting and fieldwalking surveys have been undertaken in the Swainsthorpe / Mulbarton area identifying the following **low value** assets of evidential value:

- Roman coins including one of silver and a brooch in a multi-period finds assemblage (**1233**) recovered from farmland 850 m south-west of Swainsthorpe, immediately north of Brick Kiln Lane and partially within the draft Order Limits
- Romano-British pottery in a multi-period finds assemblage (**1234**) recovered from farmland 1.1 km south-south-west of Swainsthorpe, immediately south of Brick Kiln Lane and partially within the draft Order Limits
- Romano-British pottery sherds in a multi-period finds assemblage (**1278**) recovered from farmland 1.6 km south-south-west of Swainsthorpe, immediately south of Mulbarton Lane and partially within the draft Order Limits
- A Roman silver coin in a multi-period finds assemblage (**1195**) recovered from farmland on the western limits of Swainsthorpe, immediately north of Church Street and just clipping the draft Order Limits
- Romano-British pottery in a multi-period finds assemblage (**1235**) recovered from farmland 1.6 km south-south-west of Swainsthorpe, immediately south-west of Mulbarton lane and just clipping the eastern flank of the draft Order Limits
- Romano-British pottery sherds in a multi-period finds assemblage (**1275**) recovered from farmland 1.4 km south-south-west of Swainsthorpe, immediately north of Mulbarton Lane and 90 m east of the draft Order Limits
- Three copper alloy Roman dolphin brooches in a multi-period finds assemblage (**1197**) recovered from farmland on the northern flank of Swainsthorpe, 60 m north of Church Road and 360 m east of the draft Order Limits

3.2.189 The cropmarks of a **low value** enclosure (**1051**) of evidential value are recorded on the southern edge of Swainsthorpe 240 m south of Church Street and 390 m east of the draft Order Limits. Given the morphology of the enclosure and associated ditches a Roman, or Late Iron Age to Roman date is possible. Roman finds recovered to the east of these cropmarks could support this interpretation. The enclosure is likely overlaid by medieval/post medieval linear boundaries.

3.2.190 There are four **low value** undated cropmark complexes of evidential value in the Swainsthorpe to Mulbarton landscape for which, based on morphological grounds, a late Iron Age/Romano-British date has been suggested. These assets comprise:

- Cropmarks of rectilinear enclosures on land north of Glebe Farm (**1254**) 220 m north-west of Swainsthorpe and partially within the draft Order Limits
- Cropmarks of field boundaries and ditches of probable Roman date (**1255**) 520 m north-west of Swainsthorpe and partially within the draft Order Limits
- Cropmarks of possible fragmentary enclosures, a ring ditch, field boundaries and ditches of unknown date (**1256**) 250 m north of Swainsthorpe and 120 m east of the draft Order Limits
- Cropmarks of fragmentary ditches (**1247**) on the western outskirts of Swainsthorpe, 130 m south of Church Road and 90 m west of the draft Order Limits

## Flordon and Fundenhall

3.2.191 Several metal detector surveys on land 500 m south-east of Fundenhall, immediately south of Hapton Road and partially within the draft Order Limits recovered a large multi-period finds assemblage (**1130**) of evidential value, which contained Roman dress accessories, tweezers, hair pins, bracelet fragments, brooches including an

enamelled disc brooch, steelyard weights, a figurine, surgical instrument, finger rings (one silver), nail cleaner, nails or studs, harness fitting, a key, a lock, scabbard fittings, a spoon, metalworking debris, a Roman/early Saxon military buckle and hundreds of Roman coins including some of silver. Pottery and ceramic building material has also been recovered suggesting that there is a **medium value** Roman settlement on the central and south-eastern part of the site. The site is located partially within the draft Order Limits and situated on higher ground overlooking a tributary of the Tas Valley to the south-east.

3.2.192 Several more metal detecting and fieldwalking surveys have been undertaken in the Flordon/Fundenhall area identifying the **low value** assets of evidential value:

- Two Roman brooches including an arsenical bronze bow and fantail brooch with two enamelled panels, Roman coins and a harness mount in a multi-period finds assemblage (**1133**) recovered from farmland 740 m east-south-east of Fundenhall and within the draft Order Limits
- A Roman brooch (**1095**) recovered from farmland 1.3 km north of Flordon and partially within the draft Order Limits
- A copper alloy Roman Bracelet in a multi-period finds assemblage (**1225**) recovered from farmland 930 m north of Flordon and partially within the draft Order Limits
- A Roman brooch and finger ring in a multi-period find assemblage (**1217**) recovered from farmland 750 m north-west of Flordon and largely within the draft Order Limits
- A Roman brooch in a multi-period finds assemblage (**1286**) recovered from farmland 650 m north-west of Flordon, immediately east of Flordon Road and partially within the draft Order Limits
- A brooch and sword belt mount in a multi-period finds assemblage (**1266**) recovered from farmland 570 m north-west of Flordon and partially within the draft Order Limits
- An early Roman brooch (55 AD to 80 AD) in a multi-period finds assemblage (**1265**) recovered from farmland 900 m north-west of Flordon, immediately east of Flordon Road and partially within the draft Order Limits
- A Roman coin and a brooch in multi-period find assemblage (**1289**) recovered during metal detector surveys of land around the Grade II\* listed Flordon Hall. The survey area is located 200 m north-west of Flordon, immediately south-east of the draft Order Limits and occupies slightly higher ground above a tributary of the Tas to the east and south
- Romano-British pottery sherd and a copper alloy coin in a multi-period finds assemblage (**1162**) 200 m south of Fundenhall and 20 m west of the draft Order Limits
- A late Iron Age/Roman brooch, a Roman Hod Hill brooch and a furniture fitting in a multi-period finds assemblage (**1273**) recovered from farmland 1.7 km north-east of Fundenhall, immediately west of Wymondham Road and 100 m south-east of the draft Order Limits
- A copper alloy Roman coin in a multi-period finds assemblage (**1131**) recovered from farmland immediately north of Fundenhall Road, 980 m east-south-east of Fundenhall and 130 m east of the draft Order Limits

- Fifty-six copper alloy Roman coins and one of silver, Romano-British pottery, a brooch, finger ring and bracelet in a multi-period finds assemblage (**1132**) 500 m south-east of Fundenhall and 180 m west of the draft Order Limits
- A copper alloy Roman bow brooch in a multi-period finds assemblage (**1151**) 1 km south-east of Fundenhall and 200 m east of the draft Order Limits
- Romano-British pottery sherds, Roman coins, a brooch, and a copper alloy furniture fitting in a multi-period finds assemblage (**1193**) recovered from farmland on the eastern outskirts of Fundenhall and 210 m north-west of the draft Order Limits
- Romano-British pottery sherds, a bracelet with punched decoration, a brooch, coins, and a lead weight in a multi-period finds assemblage (**1149**) recovered from farmland 720 m west-south-west of Flordon and 220 m south-east of the draft Order Limits
- Three Roman coins in a multi-period finds assemblage (**1269**) recovered from farmland 240 m north of Flordon and 230 m south-east of the draft Order Limits
- Roman coins, a brooch and a cosmetic spoon in a multi-period finds assemblage (**1180**) recovered from farmland 1 km north-east of Fundenhall and 290 m north-west of the draft Order Limits

### Forngett St Mary and Tacolneston

3.2.193

Evidence for Romano-British activity in the Forngett St Mary and Tacolneston area is limited to metal detector and fieldwalking finds, however, these finds are numerous suggesting there is likely to be several activity foci in the landscape perhaps comprising farmsteads and small settlements. The metal detecting and fieldwalking finds are of evidential value and comprise:

- Romano-British pottery, Roman brooches, coins, a figurine of Jupiter, a gold finger ring, harness fitting, key handle, padlock, snap-loop, plumb bob, ring, seal box, decorative mount or fitting, vessel repair, knopped terminal of a bar, suspension bar, ingot fragments for coin manufacture, coin blank and possible coin flan in a multi-period finds assemblage (**1168**) recovered from farmland 1.3 km north-east of Tacolneston and partially within the draft Order Limits. The Roman finds recovered suggest that this may have been a **medium value** metal-working site, including the manufacture of coins
- Eight Roman **low value** coins in a multi-period finds assemblage (**1192**) recovered from farmland 1.1 km north-west of Forngett St Mary and partially within the draft Order Limits
- Romano-British **low value** pottery in a multi-period finds assemblage (**1189**) 970 m south-east of Tacolneston, immediately south of Long Stratton Road and partially within the draft Order Limits
- A Late Iron Age to Romano-British **low value** copper alloy brooch and a Roman copper alloy brooch in a multi-period finds assemblage (**1161**) recovered from farmland 250 m north-west of Forngett St Mary and partially within the draft Order Limits
- Romano-British **low value** pottery, Roman coins, dolphin brooches and a reversed fantail brooch in a multi-period finds assemblage (**1263**) recovered from farmland 640 m north-east of Tacolneston and partially within the draft Order Limits

- A Late Iron Age/Roman brooch, Romano-British pottery sherds, a Roman brooch, Roman coins including two of silver, and a coin blank (all **low value**) in a multi-period finds assemblage (**1155**) recovered from farmland 700 m north of Forncett St Mary, immediately north-west of High Road and partially within the draft Order Limits
- A **low value** copper alloy Roman coin in a multi-period finds assemblage (**1175**) recovered from farmland 1.1 km east of Tacolneston, immediately north of Cheney's Lane and partially within the draft Order Limits
- Twelve Roman coins, Roman brooches, a Roman hair pin (all **low value**) in a multi-period finds assemblage (**1137**) recovered from farmland 800 m east of Tacolneston and within the draft Order Limits
- Romano-British **low value** pottery recovered from the site of a deserted medieval/post medieval settlement (**1089**) recorded on a 1565 survey as Rattongate and Haliards. The site is located 10 m north of the draft Order Limits south of Long Stratton Road and 400 m south-south-east of Tacolneston
- An Iron Age/Roman linch pin, Romano-British pottery sherds, coins, and a copper alloy brooch (all **low value**) in a multi-period finds assemblage (**1170**) recovered from farmland 680 m east of Tacolneston, immediately north of Cheney's Lane and 50 m west of the draft Order Limits
- A first century AD **medium value** coin hoard that comprised three hundred and twenty-eight silver Iron Age and forty-one Roman coins, additional Roman coins including one of silver, a copper alloy brooch, a cosmetic palette, a lead seal, a lead steelyard weight, and Romano-British pottery in a multi-period finds assemblage (**1139**) recovered from farmland immediately south of Forncett St Mary and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 150 m to the east
- Romano-British **low value** pottery and a silver Roman coin in a multi-period finds assemblage (**1242**) recovered from farmland 320 m north of Forncett St Mary and 180 m east of the draft Order Limits
- A late Iron Age/Roman brooch, Roman brooches, a furniture fitting and a steelyard weight (all **low value**) in a multi-period finds assemblage (**1164**) recovered from farmland on the floor and northern flank of a tributary valley of the Tas 1.5 km north-east of Tacolneston and immediately west of the draft Order Limits
- A **low value** Roman coin in a multi-period finds assemblage (**1299**) recovered from farmland 760 m south-east of Tacolneston and 190 m north-west of the draft Order Limits
- Sherds of **low value** grey ware pottery were recovered as part of a multi-period finds assemblage (**1203**) during fieldwalking of farmland 420 m north-west of Forncett Saint Peter and 200 m east of the draft Order Limits
- A **low value** Roman brooch and copper alloy bead in a multi-period finds assemblage (**1283**) recovered from farmland on the western edge of Forncett St Mary, immediately south of Cheney's Lane and 240 m east of the draft Order Limits
- Three **low value** Roman brooches and a cosmetic pestle in a multi-period finds assemblage (**1282**) recovered from farmland 150 m west of Forncett St Mary, immediately east of Stickfer Lane and an access road of the draft Order Limits

- Five **low value** copper alloy Roman coins and a copper alloy brooch in a multi-period assemblage (**1128**) recovered from farmland 1.3 km south-south-west of Forncett St Mary and 270 m south-east of the draft Order Limits
- Two **low value** Roman coins and a brooch in a multi-period finds assemblage (**1194**) recovered from farmland 650 m north-east of Tacolneston and 270 m west of the draft Order Limits
- A **low value** silver Roman coin and a cosmetic pestle in a multi-period finds assemblage (**1226**) recovered from farmland immediately north of Forncett St Mary, 90 m north of Cheney's Lane and 320 m east of the draft Order Limits
- Roman **low value** copper alloy coins in a multi-period finds assemblage (**1074**) recovered from farmland 400 m east of Tacolneston and 340 m west of the draft Order Limits
- A **low value** Roman coin and a Roman penannular snake bracelet in a multi-period finds assemblage (**1253**) recovered from farmland 340 m north-east of Tacolneston, immediately east of Norwich Road and 450 m west of the draft Order Limits
- A multi-phased finds assemblage (**1145**) recovered from farmland 330 m east Tacolneston and 550 m west of the draft Order Limits. The survey site occupies slightly higher ground overlooking the head of a shallow tributary of the Tas Valley to the north. The finds comprise an Iron Age or Roman glass bead, Roman coins, a late Iron Age/Roman brooch; Roman bracelet fragments, brooches, a cosmetic mortar, patera handle, probable key handle, bead, finger ring and furniture stud, a lead weight, and a scatter of Romano-British pottery. This finds assemblage could indicate at a settlement site
- Roman coins and a brooch in a multi-period find assemblage (**1154**) recovered from farmland 200 m east of Tacolneston, immediately north of Cheney's Lane and 675 m west of the draft Order Limits. The finds from other time periods included middle/late Saxon artefacts (spindle whorls and strap end), a 15th century copper alloy strap end (in the shape of a tree), medieval coins, a brooch, a balance, a bell, furniture fittings, a prick spur, a purse frame a seal matrix, a strap fitting and a token; and a gold medieval/post medieval finger ring. A post medieval gold button, a silver button, coin and dress fastener, a copper alloy bell, buckle, button, a furniture fitting, jetton and strap fittings, and a lead weight and cloth seal were also recovered. All these artefacts suggests that there could be a muti-period settlement located here
- Romano-British pottery sherds, Roman coins including one of silver in a multi-period finds assemblage (**1165**) 300 m north-east of Tacolneston, immediately north of Cheney's Lane and 790 m west of the draft Order Limits. Other time periods are represented in the assemblage (Saxon, medieval and post medieval), suggesting activity from these periods. It is not until the medieval period that the Norfolk HER suggests that there may be a **medium value** settlement site here

3.2.194 Assets **1145**, **1154** and **1165** are located adjacent to each other just outside to 500 m study area immediately to the east of Tacolneston. They are included here as the concentration of finds raises the possibility that the Anglo-Saxon settlement of Tacolneston may have had Romano-British origins. Any settlement remains would likely be of **medium value**.

3.2.195 The HER includes a record based on documentary sources of historic value (**1006**) that state that, in 1465 '100 shillings' worth of Roman coins were found when

Nunmete Hill was excavated. Nunmete Hill may have been a barrow of possibly of Bronze Age or Roman origin, and the HER places the asset on the western edge of Forncett St Mary immediately north of Cheney's Lane and 320 m east of the draft Order Limits.

### Bunwell Hill and the Tas Valley

3.2.196 Evidence of Romano-British activity in the Bunwell Hill and Tas Valley area is restricted to fieldwalking, and metal detector finds of evidential value. These assets, recorded below, are of **low value** unless otherwise indicated.

- Romano-British grey ware pottery in a multi-period assemblage (**1111**) recovered from farmland 1.8 km south-east of the village of Bunwell within the draft Order Limits
- Romano-British pottery in a multi-period finds assemblage (**1087**) recovered from a field partially within the draft Order Limits, 160 m east of the Grade II listed Banyard's Hall (**1373609**) and 550 m east of Bunwell Hill
- A copper alloy Roman coin of Marcus Aurelius (**1121**) minted between AD 161-180 was found on farmland 2.3 km south-east of the village of Bunwell and within the draft Order Limits
- Romano-British pottery and Roman coins, a brooch and a bracelet in a multi-period finds assemblage (**1049**) recovered from farmland 3 km south-south-east of the village of Bunwell, on the valley floor south of the Tas and partially within the draft Order Limits
- Romano-British pottery and tile fragments and a copper alloy brooch in a multi-period finds assemblage (**1062**) recovered from farmland partially within the draft Order Limits on the Tas Valley floor and its southern flank, 3.3 km south-south-east of the village of Bunwell
- Two Roman coins and a furniture fitting in a multi-period finds assemblage (**1188**) recovered from farmland 2.2 km south-south-east of the village of Bunwell, immediately east of Brick Kiln Lane and 20 m west of the draft Order Limits
- A sherd of Roman grey ware pottery and two 4th century Roman coins in a multi-period finds assemblage (**1053**) recovered from farmland 2.1 km south-east of the village of Bunwell and 70 m north-west of the draft Order Limits
- A sherd of Roman pottery in a multi-period finds assemblage (**1097**) recovered from farmland 2.4 km south-south-east of the village of Bunwell on the southern flank of the Tas Valley and 90 m south-west of the draft Order Limits
- Roman pottery including samian, grey ware, course ware, Nene Valley wares, a silver Roman coin and several copper alloy coins, a copper alloy brooch, a finger ring, nail, and pin in a multi-period finds assemblage (**1058**) recovered from farmland partially within the draft Order Limits on the Tas Valley floor and 3.1 km south-south-east of the village of Bunwell
- A Roman coin in a multi-period finds assemblage (**1063**) recovered from farmland 1.9 km south-east of the village of Bunwell and 50 m north-west of an draft Order Limits access road
- A silvered copper alloy Roman disc brooch in a multi-period finds assemblage (**1054**) recovered from farmland 3.2 km south-south-east of the Village of Bunwell and on the floor of the Tas Valley 150 m east of the draft Order Limits

- A Roman sestertius coin (**1061**) recovered from farmland 3.2 km south-east of the village of Bunwell and 180 m north-west of the draft Order Limits on the Tas Valley floor
- Three Roman pottery sherds, Roman lead steelyard weight, and a copper alloy Roman coin in a multi-period finds assemblage (**1016**) recovered from farmland 3.6 km south of the village of Bunwell and on the southern flank of the Tas Valley 200 m east of the draft Order Limits
- Romano-British pottery rim sherds in a multi-period finds assemblage (**1099**) recovered from farmland 2.9 km south-south-east of the village of Bunwell on the Tas Valley floor 200 m west of the draft Order Limits
- A sherd of Romano-British pottery in a multi-period finds assemblage (**1102**) recovered from farmland 1.9 km south-east of the village of Bunwell and 210 m north-west of the draft Order Limits
- A copper alloy Roman coin, an unidentified copper alloy object and a scatter of Roman coarse ware in a multi-period finds assemblage (**1057**) that includes the Bronze Age Bunwell hoard recovered from farmland 2 km south-east of the village of Bunwell and 220 m north-west of the draft Order Limits
- Romano-British pottery sherds, brick fragments, coins, and several other metal objects, including a copper alloy spur in multi-period finds assemblage (**1075**) recovered from farmland 220 m west of the draft Order Limits and 1.3 km south-south-west of the village of Bunwell. The HER record for this site suggests it may be the location of a **medium value** Romano-British settlement
- Roman pottery including a sherd of samian and one Constantine Roman coin (AD 347-8) in a multi-period finds assemblage (**1052**) recovered from farmland 240 m south-east of the draft Order Limits and 2.6 km south-east of the village of Bunwell
- A large Romano-British finds assemblage comprising pottery sherds including mortaria, grey ware, samian, colour-coated ware and amphora, ceramic building material, a bronze curved cosmetic palette, the head and part of a bow of a Langton Down brooch, a Roman/early Saxon hemispherical bronze bell, numerous coins, a bronze claw-hammer, a possible metalsmiths tool, a Roman to medieval lava quern fragment, a bracelet, a steelyard weight, a copper alloy strap fitting, and copper alloy tweezers in a multi-period finds assemblage (**1066**) recovered from farmland 2 km south-south-east of the village of Bunwell and 240 m north-west of the draft Order Limits. The HER records this site as a possible **medium value** Romano-British settlement location
- Romano-British pottery sherds, two Late Iron Age/Roman copper alloy brooches, a copper alloy first century dolphin brooch, and a copper alloy Roman coin in a multi-period finds assemblage (**1129**) recovered from farmland 720 m south of the village of Bunwell and 260 m west of the draft Order Limits. This site has the potential to be the location of **medium value** settlement activity
- Roman pottery sherds ceramic building material, a shale bead; Roman coins; brooches, a Roman bracelet fragment, a box, a pin, furniture fittings, a pot mend, a razor, a steelyard weight, and tweezers in a multi-period finds assemblage (**1104**) recovered from farmland 3.2 km south-east of the village of Bunwell and 420 m south-east of the draft Order Limits. This site has the potential to be the location of **medium value** settlement activity

## Winfarthing and Shelfanger

3.2.197 Evidence of Romano-British activity in the Winfarthing and Shelfanger area is restricted to fieldwalking, and metal detector finds of evidential value. These assets, recorded below, are of **low value** unless otherwise indicated.

- A possible Roman copper alloy disc depicting a sunken face and a Roman miniature axe head or pick (**1088**) recovered from farmland 1.1 km east-northeast of Winfarthing and partially within the draft Order Limits
- Late Iron Age/Romano-British pottery, Romano-British/early Saxon pottery and four Roman coins including two of silver in a multi-period finds assemblage (**1246**) recovered from farmland 400 m north-east of Shelfanger and just clipping the western edge of the draft Order Limits
- A late 1st to early 3rd century Roman pottery scatter including coarse wares, buff ware, grey ware, samian, amphora, storage jar and ceramic building material including flue and pila tiles, and *opus signium* fragments (**1019**) recovered from farmland 1.1 km east-northeast of Winfarthing and 40 m east of the draft Order Limits and within asset (**1088**). This site is possibly that of a **medium value** Romano-British building/farmstead
- A Roman coin and a copper alloy object, possibly an eagle's talon (**1082**) recovered from farmland 1 km north-east of Winfarthing and 90 m east of the draft Order Limits
- A late Iron Age/Roman puddingstone quern fragment, numerous Roman coins, brooches, a bracelet, finger rings including one of silver, spoons, a silver stud, window glass fragments, building material including flue tile and Romano-British pottery in a large, multi-period finds assemblage (**1190**) recovered from farmland 110 m west of the draft Order Limits and 620 m north-east Shelfanger. The survey area is close to the head of a shallow tributary valley of the Tas with the floor of the valley just to the west and it is likely the extensive finds assemblage indicates the location of a **medium value** Romano-British building or farmstead
- A Roman coin in a multi-period finds assemblage (**1298**) recovered from farmland 120 m east of Winfarthing and on the western flank of the draft Order Limits
- A Roman horse-head escutcheon from a copper alloy bowl (**1125**) recovered from farmland 880 m north-east of Shelfanger and 120 m west of the draft Order Limits
- A Roman coin and a steelyard weight in a multi-period finds assemblage (**1034**) recovered from farmland at the southern end of Winfarthing, immediately north of Heywood Road and 240 m west of the draft Order Limits
- A brooch in a multi-period finds assemblage (**1206**) recovered from farmland 560 m south-south-east of Winfarthing, immediately south of Heywood Road and 250 m west of the draft Order Limits
- Roman coins and brooches in a multi-period find assemblage (**1292**) recovered from farmland on the eastern flank of Winfarthing and 300 m west of the draft Order Limits

## Bressingham and the Waveney Valley

3.2.198 Evidence of Romano-British activity in the Bressingham and the Waveney Valley area is restricted to a **low value** marble statue fragment and **low value** fieldwalking and metal detector finds of evidential value comprising:

- A few sherds of Romano-British pottery in a multi-period finds assemblage (**1335**) recovered from farmland on the northern bank of the river Waveney c. 600 m south-west of the outskirts of Diss and partially within the Order Limits
- A Roman harness fitting, including a skirted terret and terret ring in a multi-period finds assemblage (**1025**) recovered from farmland 570 m north-east of Bressingham and partially within the draft Order Limits
- A late Iron Age/Romano-British copper alloy vessel mount and two Roman coins in a multi-period finds assemblage (**1293**) recovered from farmland 400 m east of Bressingham and partially within the draft Order Limits
- A Roman unfinished zoomorphic folding knife handle featuring a rendition of a hound chasing a hare, and a bird (**1290**) recovered from farmland 540 m east of Bressingham and partially within the draft Order Limits
- A silver Roman coin (170 AD to 171 AD) in a multi-period finds assemblage (**1252**) recovered from farmland 250 m east of Bressingham and partially within the draft Order Limits
- Two Roman coins in a multi-period finds assemblage (**1294**) recovered from farmland 1.1 km east of Bressingham and partially within an access road of the draft Order Limits
- Eight Roman coins in a multi-period finds assemblage (**1301**) recovered from farmland 480 m north-east of Bressingham and adjacent to an access road of the draft Order Limits
- A Roman disc brooch and coin in a multi-period finds assemblage (**1204**) recovered from farmland 2.3 km east of Bressingham, immediately south of a southern spur of the draft Order Limits and east of Shelfanger Road
- A Roman enamelled disc brooch, with blue, red, and yellow enamel (**1100**) recovered from farmland 1.1 km south-south-east of Bressingham within the draft Order Limits and on the northern flank of the Waveney Valley
- Roman pottery sherds in multi-period finds assemblage (**1109**) recovered from farmland 1.3 km south-east of Bressingham on the northern flank of the Waveney Valley and 10 m north of the draft Order Limits
- Roman coins and brooches including an unusual, possibly imported plate brooch in a multi-period finds assemblage (**1179**) recovered from farmland 870 m south-east of Bressingham and partially within the draft Order Limits
- A Late Roman/early Saxon belt stiffener strap fitting in a multi-period finds assemblage (**1295**) recovered from farmland immediately north-west of Bressingham and 240 m north-west of the draft Order Limits

3.2.199 A life-sized **low value** carved marble head (**1086**) of the Roman Emperor Antoninus Pius (AD 138 to 150) was installed as a bollard to protect the verge from passing traffic 650 m south-east of Bressingham and 240 m east of the draft Order Limits adjacent to Baynard's Lane. It was sold at auction in 1990. The marble head is said to have been found at a findspot (**1123**) 75 m to the north-east of its roadside location.

## Early Medieval

- 3.2.200 The Early Medieval covers the period following the end of Roman occupation of the British Isles (410 AD) up to the Norman Conquest of 1066. The Norfolk HER splits the period into three subsections (early, middle, and late Saxon) and these divisions, where applicable, have been applied to the following section.

### General Saxon

- 3.2.201 The **high value** scheduled monument 'Anglo-Saxon cemetery SW of Markshall Farm' (**1003953**) is of evidential value and located on the north-western flank of the Tas Valley, 140 m north of Venta Icenorum (**1021463**) and 1.1 km north-north-east of the northern extent of the draft Order Limits. The site was investigated in the early 19th century and drawing of four urns were exhibited in 1815 and in 1882 it was reported to the Society of Antiquities that several urns and a Roman kiln had been excavated on the site. It is possible the cemetery is associated with Saxon settlement activity on the periphery of Venta Icenorum (**1021463**).
- 3.2.202 The setting of the asset is informed by its elevated position at c. 24 m aOD above the Tas Valley at c. 7 m aOD immediately to the south-east and its views across the Roman town of Venta Icenorum on the opposing valley flank. Research has shown that many Anglo-Saxon cemeteries reuse or are focused on earlier monuments (Lucy 2000; 124) and it is possible the graves were placed in such locations to assimilate ancestral ties and, therefore, claims to territory. The overlooking view of Venta Icenorum is, therefore, likely a key element of the cemetery's setting contributing to the value of the asset. The setting of cemetery does not extend to the draft Order Limits.
- 3.2.203 A large **medium value** multi-period cropmark complex (**1325**) is located within a V-shaped parcel of land at the northern extent of the Order Limits between the A140 to the west and the railway to the east, with Dunston c. 220 m to the south and the scheduled Roman town of Venta Icenorum (**1021463**) immediately to the east. The complex includes the **low value** cropmarks of two sub-rectangular pit-like features (**1321**) of evidential value. The pits are distinctly sub-rectangular in form, measure between 4 to 6 m across and likely represent Saxon sunken-floored buildings, known as 'grubenhauser'. Saxon period artefacts are included in a **low value** multi-period finds assemblage (**1326**) of evidential value recovered from the general area of these cropmarks, indicating Saxon occupation of the extramural Roman settlement west of Venta Icenorum (**1021463**).
- 3.2.204 **Low value** human remains (**1198**) of evidential value were identified in 1968, 1972 and 1983 in a gravel pit on the western edge of Flordon and c. 160 m south-south-east of the draft Order Limits. The Norfolk HER record suggests an early Saxon or medieval date for the remains but offers no reason for this assertion.

### Early Saxon (411 AD to 650 AD)

#### Dunston and Mangreen Hall Farm

- 3.2.205 A multi-period finds assemblage (**1022**), including two **low value** early Saxon brooches, a personal ornament and pottery sherds and an early/middle Saxon buckle of evidential value, was found during a metal detector survey within the bounds of the scheduled monument Venta Icenorum (**1021463**). The survey area is located immediately north of Dunston and 150 m east of the draft Order Limits.

- 3.2.206 Aerial photography has identified a large area of dispersed **low value** cropmarks (**1261**) of evidential value 250 m east of the draft Order Limits and within Dunston Park, the grounds of the Grade II listed Dunston Hall (**1373206**). The cropmarks indicated fragmentary enclosures, ditches, and field boundaries of possible prehistoric to Roman date. Some of these features (**1260**) are broadly parallel with the Roman Pye road to the east and a Roman date has been suggested, however, excavations in this area ahead of the construction of the Dunston Hall golf course revealed multi-period archaeological remains (**1136**) including a possible **low value** early Saxon ditch. The site is situated on the western flank of Dunston, immediately east of Ipswich Road and 160 m south-east of the draft Order Limits.

### Flordon and Fundenhall

- 3.2.207 Evidence of early Saxon activity in the Flordon and Fundenhall area comprises chance finds, fieldwalking finds and metal detector finds of evidential value. These assets, recorded below, are of **low value** unless otherwise indicated.
- A Roman/early Saxon military buckle, and early Saxon pottery sherds, numerous brooches, sleeve clasps, scabbard fragments, strap fittings and pins in a large multi-period finds assemblage (**1130**) recovered from farmland partially within the draft Order Limits and 500 m south-east of Fundenhall and immediately south of Hapton Road. The large finds assemblage suggests the presence of a **medium value** Romano-British settlement and a **medium value** early Saxon inhumation cemetery. The survey site is gently undulating and overlooks a tributary of the Tas Valley to the south-east
  - An early Saxon buckle in a multi-period finds assemblage (**1265**) recovered from farmland 900 m north-west of Flordon, immediately east of Flordon Road and partially within the draft Order Limits
  - A sword pommel of Holmegard-Kragehul type and a great square-headed brooch in a multi-period metal detector finds assemblage (**1280**) of evidential value found 600 m north-west of Flordon and partially within the draft Order Limits
  - An early Saxon florid cruciform brooch in a multi-period finds assemblage (**1151**) recovered from farmland 1 km south-east of Fundenhall and 200 m east of the draft Order Limits
  - An early Saxon brooch in a multi-period finds assemblage (**1193**) recovered from farmland on the eastern outskirts of Fundenhall and 210 m north-west of the draft Order Limits
  - An early Saxon Brooch and girdle hanger in a multi-period finds assemblage (**1251**) recovered from farmland 1.8 km south-west of Flordon and 160 m east of the draft Order Limits

### Forngett St Mary and Tacolneston

- 3.2.208 Evidence of early Saxon activity in the Forngett St Mary and Tacolneston area comprises chance finds and metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:
- Part of an early to middle Saxon chatelaine in a multi-period finds assemblage (**1158**) recovered from farmland 880 m east of Tacolneston and partially within the draft Order Limits. The survey site occupies slightly higher ground overlooking a shallow tributary of the Tas Valley to the north

- A middle to late Saxon brooch in a multi-period finds assemblage (**1167**) recovered from farmland on the western edge of Forncett St Mary immediately north of Cheney's Lane and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 980 m to the east
- Three fragments of an early Saxon brooch in a multi-period finds assemblage (**1168**) recovered from farmland 1.3 km north-east of Tacolneston and partially within the draft Order Limits
- A small early Saxon gold and garnet mount, probably from a scabbard, in a multi-period finds assemblage (**1164**) recovered from farmland on the floor and northern flank of a tributary valley of the Tas 1.5 km north-east of Tacolneston and immediately west of the draft Order Limits
- An early Saxon brooch in a multi-period finds assemblage (**1283**) recovered from farmland on the western edge of Forncett St Mary, immediately south of Cheney's Lane and 210 m south of the draft Order Limits
- An early Saxon brooch in a multi-period finds assemblage (**1194**) recovered from farmland 650 m north-east of Tacolneston and 270 m west of the draft Order Limits
- A badly weathered and eroded fragment of an early Saxon long brooch with broken hinge (**1073**) recovered from farmland 1.5 km south-east of Tacolneston and 300 m south-east of the draft Order Limits
- An early Saxon cruciform brooch foot in a multi-period finds assemblage (**1134**) recovered from farmland 840 m east of Tacolneston and 360 m west of the draft Order Limits
- Several early Saxon brooches, a hairpin and one arm of a pair of tweezers in a multi-period finds assemblage (**1187**) recovered from farmland 440 m north-east of Tacolneston and 460 m west of the draft Order Limits. This concentration of brooches has been suggested as evidence of an inhumation cemetery. These finds, along with artefacts from the late Iron Age, Roman, medieval and post medieval periods indicate that this could be a site of a multi-phase settlement site
- An early Saxon brooch and bucket binding fragment in a large multi-period finds assemblage (**1145**) recovered from farmland 330 m east Tacolneston and 570 m west of the draft Order Limits. The large finds assemblage is predominantly Romano-British in date and suggestive of **medium value** settlement activity. The Saxon element of the find's assemblage is smaller but may indicate continuity in settlement activity but at a reduced intensity. The survey area occupies slightly higher ground overlooking a shallow tributary of the Tas Valley to the north.

### Bunwell Hill and the Tas Valley

3.2.209 Evidence of early Saxon activity in the Bunwell Hill and the Tas Valley area comprises chance finds and metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:

- Early Saxon pottery sherds in a multi-period finds assemblage (**1062**) recovered from farmland partially within the draft Order Limits on the Tas Valley floor and its southern flank, 3.3 km south-south-east of the village of Bunwell
- Early Saxon Coptic copper alloy bowl footring fragment in a multi-period finds assemblage (**1087**) recovered from land partially within the draft Order Limits and 2 km south-east of the village of Bunwell

- An early Saxon girdle hanger in a multi-period finds assemblage (**1049**) found during metal detector surveys on land partially within draft Order Limits and 3 km south-south-east of the village of Bunwell
- Early Saxon pottery in a multi-period assemblage (**1098**) recovered from farmland 2.9 km south of the village of Bunwell in the Tas Valley and 50 m west of the draft Order Limits
- An early Saxon strap fitting in a multi-period finds assemblage (**1139**) recovered from farmland immediately south of Forncett St Mary and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 150 m to the east
- Early Saxon pottery sherds in a multi-period finds assemblage (**1118**) found during fieldwalking and metal detector surveys of land partially within the draft Order Limits on the valley floor and 3 km south-south-east of the village of Bunwell
- Early Saxon pottery sherds, an early Saxon brooch and an early/middle Saxon brooch in a multi-period finds assemblage (**1058**) recovered from farmland partially within the draft Order Limits on the Tas Valley floor and 3.1 km south-south-east of the village of Bunwell
- An early Saxon brooch in a multi-period finds assemblage (**1052**) recovered from farmland 2.6 km south-east of the village of Bunwell and 240 m south-east of the draft Order Limits
- An early Saxon strap-end and an early/middle Saxon hanging bowl mount in a multi-period assemblage (**1128**) recovered from farmland 1.3 km south-south-west of Forcett St Mary and 270 m south-east of the draft Order Limits
- An early Saxon glass bead, copper alloy tweezers and pottery sherds in a multi-period finds assemblage (**1075**) found during fieldwalking land 220 m west of the draft Order Limits and 1.3 km south-south-west of the village of Bunwell
- A Roman/early Saxon hemispherical bronze bell; an animal head foot of a cruciform brooch, a head plate and bow of small long brooch, a gold bracelet, a strap fitting and tweezers of early Saxon date; and an early/middle Saxon copper alloy mount in a multi-period finds assemblage (**1066**) recovered from farmland 2 km south-south-east of the village of Bunwell and 240 m north-west of the draft Order Limits in a field immediately south-east of the junction of Bunwell Hill and The Turnpike
- Two early Saxon brooches, one of silver, in a multi-period finds assemblage (**1129**) recovered from farmland 720 m south of the village of Bunwell and 260 m west of the draft Order Limits
- An early Saxon brooch in a multi-period finds assemblage (**1104**) recovered from farmland 3.2 km south-east of the village of Bunwell and 420 m south-east of the draft Order Limits
- A large assemblage of Romano-British finds was recovered from this site leading to the suggestion it has the potential to be the location of settlement activity. The paucity of early Saxon material, however, indicates the settlement was abandoned as the Roman period came to an end

## Winfarthing and Shelfanger

- 3.2.210 A metal detector survey of farmland 400 m north-east of Shelfanger and just clipping the western edge of the draft Order Limits resulted in the recovery of multi-period finds assemblage (**1246**) of evidential value including an early Saxon pendant made from a coin of Constantius I, gilded silver disc brooch fragments with chip-carved decoration, a gold disc pendant made from beaded wire with a central cross motif, a gold disc pendant, a gold and garnet pendent, and pottery sherds. The discovery of a bronze bowl on the same site led to the identification of a richly furnished **medium value** early/middle Saxon female burial (**1276**) located 360 m west of the draft Order Limits. The grave goods included: a necklace with a gold openwork pendant in the centre, flanked by two gold spacer beads, and then two gold coins of Merovingian King Sigebert III as pendants; a continental pottery bi-conical bowl with cordon and grooved decoration; a copper alloy bowl; an Iron knife; 13 copper alloy chatelaine rings with punched ring and dot decoration; and a copper alloy chatelaine ring with a fragment of a possible decorated girder hanger attached to it. The burial likely represents part of a larger **medium value** cemetery which remained in use after activity ceased in the former Roman site to the north (**1190**).
- 3.2.211 The remaining evidence of early Saxon activity in the Winfarthing and Shelfanger are metal detector finds of evidential value comprising:
- Several early Saxon brooches and sherds of early to middle Saxon pottery in a large, multi-period **medium value** finds assemblage (**1190**) recovered from farmland 110 m west of the draft Order Limits and 620 m north-east Shelfanger. The survey area is close to the head of a shallow tributary valley of the Tas with the floor of the valley just to the west and it is likely the extensive finds assemblage indicates the location of a Romano-British building or farmstead
  - A **low value** early Saxon brooch in a multi-period finds assemblage (**1284**) recovered from farmland 2.2 km north-north-east of Winfarthing and 150 m east of the draft Order Limits
  - A **low value** early Saxon brooch in a multi-period finds assemblage (**1206**) recovered from farmland 560 m south-south-east of Winfarthing, immediately south of Heywood Road and 250 m west of the draft Order Limits

## Bressingham and the Waveney Valley

- 3.2.212 Evidence of early Saxon activity in the Bressingham and the Waveney Valley area comprises metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:
- Two early Saxon brooches in a multi-period finds assemblage (**1228**) recovered from farmland 450 m south of Bressingham and partially within the draft Order Limits
  - An early Saxon brooch, possibly from an inhumation burial in a multi-period finds assemblage (**1179**) recovered from farmland 870 m south-east of Bressingham and partially within the draft Order Limits
  - An early Saxon small-long brooch in a multi-period finds assemblage (**1295**) recovered from farmland immediately north-west of Bressingham and 240 m north-west of the draft Order Limits
  - An early Saxon brooch a multi-period finds assemblage (**1041**) recovered from farmland close to the southern extent of Section 1, immediately north-west of

Bressingham and 250 m west of the draft Order Limits. The survey area is on higher land with the Waveney Valley 500 m to the south

## Middle Saxon (651 AD to 850 AD)

### Dunston and Mangreen Hall Farm

- 3.2.213 Evidence of middle Saxon activity in the Dunston and Mangreen Hall Farm area is restricted to a **low value** middle Saxon brooch, a silver coin, a pin, a strap fitting and pottery sherds in a multi-period finds assemblage (**1022**) of evidential value. The assets were recovered during metal detector and fieldwalking surveys undertaken within the bounds of the scheduled monument Venta Icenorum (**1021463**) located immediately north of Dunston and 150 m east of the draft Order Limits. This is a possible indication that occupation, or at least activity, continued at this site into later periods.

### Flordon and Fundenhall

- 3.2.214 Evidence of middle Saxon activity in the Flordon and Fundenhall area comprises metal detector and fieldwalking finds of evidential value, some of these finds are located within the draft Order Limits. These **low value** assets comprise:
- A middle/late Saxon silver brooch in a multi-period find assemblage (**1217**) recovered from farmland 750 m north-west of Flordon and largely within the draft Order Limits
  - Middle/late Saxon strap ends in a multi-period finds assemblage (**1280**) recovered from farmland 600 m north-west of Flordon and partially within the draft Order Limits
  - A middle Saxon coin in a multi-period assemblage (**1302**) recovered from farmland 600 m north-north-west of Flordon and just clipping the eastern edge of the draft Order Limits
  - A middle Saxon pin in a multi-period finds assemblage (**1151**) recovered from farmland 1 km south-east of Fundenhall and 200 m east of the draft Order Limits
  - A middle Saxon brooch in a multi-period finds assemblage (**1251**) recovered from farmland 1.8 km south-west of Flordon and 160 m east of the draft Order Limits

### Forngett St Mary and Tacolneston

- 3.2.215 Evidence of middle Saxon activity in the Forngett St Mary and Tacolneston area comprises metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:
- A middle Saxon pin head in a multi-period finds assemblage (**1137**) recovered from farmland 800 m east of Tacolneston and within the draft Order Limits
  - A middle Saxon silver coin in a multi-period finds assemblage (**1155**) recovered from farmland 700 m north of Forngett St Mary, immediately north-west of High Road and partially within the draft Order Limits
  - A middle Saxon strap fitting in a multi-period finds assemblage (**1161**) recovered from farmland 250 m north-west of Forngett St Mary and partially within the draft Order Limits
  - A middle/late Saxon disc brooch in a multi-period finds assemblage (**1103**) found on land partially within the draft Order Limits immediately south of the deserted

medieval/post medieval settlement (**1089**) and 750 m south-south-east of Tacolneston

- A late Saxon stirrup and a strap fitting in a multi-period finds assemblage (**1168**) recovered from farmland 1.3 km north-east of Tacolneston and partially within the draft Order Limits
- A middle Saxon silver coin in a multi-period finds assemblage (**1164**) recovered from farmland on the floor and northern flank of a tributary valley of the Tas, 1.5 km north-east of Tacolneston and immediately west of the draft Order Limits
- A middle/late Saxon brooch in a multi-period finds assemblage (**1283**) recovered from farmland on the western edge of Forngett St Mary, immediately south of Cheney's Lane and 210 m south of the draft Order Limits
- Middle Saxon Ipswich ware pottery sherds in a multi-period finds assemblage (**1074**) recovered from farmland 400 m east of Tacolneston and 340 m west of the draft Order Limits
- A middle Saxon pin, coin, and tweezers and two middle/late Saxon brooches in a multi-period finds assemblage (**1187**) recovered from farmland 440 m north-east of Tacolneston and 460 m west of the draft Order Limits. These finds, along with artefacts from the late Iron Age, Roman, early Saxon (these items suggest there could be burial on site), medieval and post medieval periods indicate that this could be a site of a multi-phase settlement site
- Middle Saxon tweezers and a middle/late Saxon strap end in a large multi-period finds assemblage (**1145**) recovered from farmland 330 m east Tacolneston and 570 m west of the draft Order Limits. The large finds assemblage is predominantly Romano-British in date and suggestive of **medium value** settlement activity. The Saxon element of the find's assemblage is smaller but may indicate continuity in settlement activity but at a reduced intensity. The survey area occupies slightly higher ground overlooking a shallow tributary of the Tas Valley to the north
- A middle/late Saxon strap end in a multi-period finds assemblage (**1154**) recovered from farmland 200 m east of Tacolneston, immediately north of Cheney's Lane and 700 m west of the draft Order Limits. The finds from other time periods included some roman coins and brooches, a 15th century copper alloy strap end (in the shape of a tree), medieval coins, a brooch, a balance, a bell, furniture fittings, a prick spur, a purse frame a seal matrix, a strap fitting and a token; and a gold medieval/post medieval finger ring. A post medieval gold button, a silver button, coin and dress fastener, a copper alloy bell, buckle, button, a furniture fitting, jetton and strap fittings, and a lead weight and cloth seal were also recovered. All these artefacts suggests that there could be a muti-period settlement located here
- Middle Saxon pottery sherds, in a multi-period finds assemblage (**1165**) 300 m north-east of Tacolneston, immediately north of Cheney's Lane and 790 m west of the draft Order Limits. Other time periods are represented in the assemblage (Roman, medieval and post medieval), suggesting activity from these periods. It is not until the medieval period that the Norfolk HER suggests that there may be a **medium value** settlement site here

## Bunwell Hill and the Tas Valley

3.2.216 Evidence of Middle Saxon activity in the Bunwell Hill and the Tas Valley area comprises chance finds and metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:

- Middle Saxon pottery sherds in a multi-period finds assemblage (**1062**) recovered from farmland partially within the draft Order Limits on the Tas Valley floor and its southern flank, 3.3 km south-south-east of the village of Bunwell
- A middle Saxon strap fitting in a multi-period finds assemblage (**1139**) recovered from farmland immediately south of Fornsett St Mary and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 150 m to the east
- Middle Saxon pottery sherds, a coin, a brooch, a dress hook, pins, a strap fitting, a stylus, and a middle/late Saxon brooch in a multi-period finds assemblage (**1118**) found during fieldwalking and metal detector surveys of land partially within the draft Order Limits on the valley floor and 3 km south-south-east of the village of Bunwell
- A middle Saxon brooch, a silver coin, a dress hook, a hooked tag, a pin, and pottery sherds and a middle/late Saxon brooch, a finger ring, a strap end, and stylus in a multi-period finds assemblage (**1058**) recovered from farmland partially within the draft Order Limits on the valley floor and 3.1 km south-south-east of the village of Bunwell
- A sherd of middle Saxon Ipswich ware pottery in a multi-period finds assemblage (**1063**) recovered from farmland 1.9 km south-east of the village of Bunwell and 50 m north-west of an draft Order Limits access road.
- A middle Saxon copper alloy faceted headed pin decorated with ring and dot. It has a mid-stem bulge with incised transverse lines for grip in a multi-period finds assemblage (**1061**) recovered from farmland 3.2 km south-east of the village of Bunwell and 180 m north-west of the draft Order Limits on the Tas Valley floor
- Middle Saxon pottery sherds in a multi-period finds assemblage (**1052**) recovered from farmland 2.6 km south-east of the village of Bunwell and 240 m south-east of the draft Order Limits
- An early/middle Saxon copper alloy mount in a multi-period finds assemblage (**1066**) recovered from farmland 2 km south-south-east of the village of Bunwell and 240 m north-west of the draft Order Limits in a field immediately south-east of the junction of Bunwell Hill and The Turnpike

## Winfarthing and Shelfanger

3.2.217 Evidence of middle Saxon activity in the Winfarthing and Shelfanger area comprises metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:

- A middle/late Saxon silver spoon in a multi-period finds assemblage (**1246**) recovered from farmland 400 m north-east of Shelfanger and just clipping the western edge of the draft Order Limits
- A middle Saxon pin in a large multi-period finds assemblage (**1190**) recovered from farmland 110 m west of the draft Order Limits and 620 m north-east Shelfanger. The survey area is close to the head of a shallow tributary valley of the Tas with the floor of the valley just to the west and it is likely the extensive

finds assemblage indicates the location of a **low** or **medium value** Romano-British building or farmstead

- A middle Saxon pin in a multi-period finds assemblage (**1292**) recovered from farmland on the eastern flank of Winfarthing and 300 m west of the draft Order Limits

### **Bressingham and the Waveney Valley**

- 3.2.218 Metal detecting on farmland 1.1 km east of Bressingham and partially within an access road of the draft Order Limits recovered a multi-period finds assemblage (**1294**) that included a **low value** middle Saxon silver penny of Ecgberht of Wessex.

### **Late Saxon (851 AD to 1065 AD)**

#### **Dunston and Mangreen Hall Farm**

- 3.2.219 A late Saxon pendent and a stirrup strap mount, both low value, were included in a multi-period finds assemblage (**1218**) of evidential value derived from the metal detector survey of farmland 900 m south of Mangreen Farm and partially within the draft Order Limits. No contemporary archaeological features were identified during the subsequent trial trenching (**1271**).

#### **Flordon and Fundenhall**

- 3.2.220 Evidence of late Saxon activity in the Flordon and Fundenhall area comprises chance finds and metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:
- A late Saxon silver and copper alloy strap-end and a late Saxon/medieval stirrup-strap mount in a multi-period find assemblage (**1217**) recovered from farmland 750 m north-west of Flordon and largely within the draft Order Limits
  - A late Saxon stirrup, a harness setting and spindle whorls in a multi-period finds assemblage (**1265**) recovered from farmland 900 m north-west of Flordon, immediately east of Flordon Road and partially within the draft Order Limits
  - A late Saxon/medieval lead weight in a multi period finds assemblage (**1279**) recovered from farmland 800 m north-north-west of Flordon and partially within the draft Order Limits
  - A late Saxon/medieval bridle cheek piece, stirrup terminal and buckle and a Late Saxon to post medieval spindle whorl in a multi-period finds assemblage (**1225**) recovered from farmland 930 m north of Flordon and partially within the draft Order Limits
  - A late Saxon coin, a late Saxon/medieval stirrup-strap mount and a late Saxon to post medieval spindle whorl in a multi-period finds assemblage (**1289**) recovered from land around an unnamed farm 440 m north of The Street, Flordon and immediately east of the draft Order Limits
  - A late Saxon finger ring in a multi-period finds assemblage (**1162**) 200 m south of Fundenhall and 20 m west of the draft Order Limits
  - An unidentified late Saxon copper alloy object in a multi-period finds assemblage (**1273**) recovered from farmland 1.7 km north-east of Fundenhall, immediately west of Wymondham Road and 100 m south-east of the draft Order Limits

- Late Saxon pottery sherds in a multi-period finds assemblage (**1193**) recovered from farmland on the eastern outskirts of Fundenhall and 210 m north-west of the draft Order Limits
- A late Saxon bridle fitting in a multi-period finds assemblage (**1269**) recovered from farmland 240 m north of Flordon and 230 m south-east of the draft Order Limits
- Two sherds of late Saxon Thetford ware pottery (**1046**) recovered from a garden 1.8 km north-north-east of Flordon and 480 m south-east of the draft Order Limits

### Swainsthorpe and Mulbarton

3.2.221 Metal detecting and fieldwalking recovered **low value** late Saxon finds in the Swainsthorpe and Mulbarton area comprising the following assets of evidential value:

- A late Saxon brooch in a multi-period finds assemblage (**1233**) recovered from farmland 850 m south-west of Swainsthorpe, immediately north of Brick Kiln Lane and partially within the draft Order Limits
- A middle/late Saxon pin (**1357**) found close to the 11th century, Grade II\* listed Church of St Peter in Swainsthorpe and 460 m east of the draft Order Limits

### Forngett St Mary and Tacolneston

3.2.222 Evidence of late Saxon activity in the Forngett St Mary and Tacolneston area comprises chance finds and metal detector and fieldwalking finds of evidential value. These assets, recorded below are of **low value** unless otherwise stated.

- Late Saxon pottery sherds in a multi-period finds assemblage (**1103**) found on land partially within the draft Order Limits immediately south of the deserted medieval/post medieval settlement (**1089**) and 750 m south-south-east of Tacolneston
- A late Saxon/medieval stirrup-strap mount in a multi-period finds assemblage (**1192**) recovered from farmland 1.1 km north-west of Forngett St Mary and partially within the draft Order Limits
- A late Saxon pin head in a multi-period finds assemblage (**1137**) recovered from farmland 800 m east of Tacolneston and within the draft Order Limits
- Late Saxon pottery sherds in a multi-period finds assemblage (**1189**) 970 m south-east of Tacolneston, immediately south of Long Stratton Road and partially within the draft Order Limits
- A late Saxon strap end in a multi-period finds assemblage (**1155**) recovered from farmland 700 m north of Forngett St Mary, immediately north-west of High Road and partially within the draft Order Limits
- A late Saxon strap fitting and a late Saxon to medieval harness fitting and a mount in a multi-period finds assemblage (**1161**) recovered from farmland 250 m north-west of Forngett St Mary and partially within the draft Order Limits
- A late Saxon/medieval spindle whorl in a multi-period finds assemblage (**1164**) recovered from farmland on the floor and northern flank of a tributary valley of the Tas 1.5 km north-east of Tacolneston and immediately west of the draft Order Limits
- A late Saxon/medieval stirrup-strap mounts and a harness cheek piece in a multi-period finds assemblage (**1282**) recovered from farmland 150 m west of Forngett

St Mary, immediately east of Stickfer Lane and an access road of the draft Order Limits

- Late Saxon pottery sherds in a multi-period finds assemblage (**1226**) recovered from farmland immediately north of Forncett St Mary, 90 m north of Cheney's Lane and 320 m east of the draft Order Limits
- Late Saxon Thetford ware pottery sherds in a multi-period finds assemblage (**1074**) recovered from farmland 400 m east of Tacolneston and 340 m west of the draft Order Limits
- Late Saxon pottery sherds and a brooch in a multi-period finds assemblage (**1187**) recovered from farmland 440 m north-east of Tacolneston and 460 m west of the draft Order Limits. These finds, along with artefacts from the late, Iron Age, Roman, early Saxon (possibly relating to a cemetery), medieval and post medieval periods indicate that this could be a site of a multi-phase settlement site
- Late Saxon/medieval pottery sherds, a finger ring, a harness fitting, a coin, and spindle whorls in a large multi-period finds assemblage (**1145**) recovered from farmland 330 m east Tacolneston and 570 m west of the draft Order Limits. The large finds assemblage is predominantly Romano-British in date and suggestive of **medium value** settlement activity. The Saxon element of the find's assemblage is smaller but may indicate continuity in settlement activity but at a reduced intensity. The survey area occupies slightly higher ground overlooking a shallow tributary of the Tas Valley to the north
- Late Saxon pottery sherds, a buckle and a stirrup in a multi-period finds assemblage (**1165**) 300 m north-east of Tacolneston, immediately north of Cheney's Lane and 790 m west of the draft Order Limits. Other time periods are represented in the assemblage (Roman, medieval and post medieval), suggesting activity from these periods. It is not until the medieval period that the Norfolk HER suggests that there may be a **medium value** settlement site here

### Bunwell Hill and the Tas Valley

3.2.223

Evidence of late Saxon activity in the Bunwell Hill and the Tas Valley area comprises chance finds and metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:

- Late Saxon pottery sherds in a multi-period finds assemblage (**1062**) recovered from farmland partially within the draft Order Limits on the Tas Valley floor and its southern flank, 3.3 km south-south-east of the village of Bunwell
- Late Saxon pottery sherds in multi-period finds assemblage (**1049**) recovered from farmland partially within draft Order Limits and 3 km south-south-east of the village of Bunwell
- A late Saxon pierced copper alloy object in a multi-period finds assemblage (**1156**) recovered from farmland 2.4 km south-east of the village of Bunwell and partially within the draft Order Limits
- A late Saxon zoomorphic copper alloy pendant (**1106**) recovered from farmland 2.2 km south-east of the village of Bunwell and immediately adjacent to a service road of the draft Order Limits
- A Late Saxon stirrup in a multi-period finds assemblage (**1139**) recovered from farmland immediately south of Forncett St Mary and partially within the draft

Order Limits. The survey site is situated on higher ground with the Tas Valley floor 150 m to the east

- Late Saxon pottery sherds, a hooked bronze tag, a bead, a bridle bit, a brooch, a dress component, a dress hook, a finger ring, a pin, a furniture fitting, a stirrup, a strap fitting and a stylus in a multi-period finds assemblage (**1118**) recovered from farmland partially within the draft Order Limits on the Tas Valley floor and 3 km south-south-east of the village of Bunwell
- A rim sherd of late Saxon Thetford ware pottery in a multi-period finds assemblage (**1102**) recovered from farmland 1.9 km south-east of the village of Bunwell and 210 m north-west of the draft Order Limits
- Late Saxon pottery sherds in a multi-period finds assemblage (**1052**) recovered from farmland 2.6 km south-east of the village of Bunwell and 240 m south-east of the draft Order Limits
- A late Saxon bridle bit, coins, a dress hook, a silver ear ring, a silver finger ring, a furniture fitting, a harness fitting, a hooked tag, a pin, a stirrup, a stylus, weights, a copper alloy finger ring, pottery sherds and late Saxon/medieval pottery sherds in a multi-period finds assemblage (**1058**) recovered from farmland partially within the draft Order Limits on the valley floor and 3.1 km south-south-east of the village of Bunwell
- An unidentified Late Saxon copper alloy object in a multi-period finds assemblage (**1066**) recovered from farmland 2 km south-south-east of the village of Bunwell and 240 m north-west of the draft Order Limits in a field immediately south-east of the junction of Bunwell Hill and The Turnpike

### Winfarthing and Shelfanger

3.2.224 Evidence of Late Saxon activity in the Winfarthing and Shelfanger area comprises metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:

- A late Saxon/medieval bracelet or mount in a multi-period finds assemblage (**1291**) recovered from farmland 700 m north-east of Shelfanger, immediately south of Heywood Road and partially within the draft Order Limits
- A late Saxon Thetford ware pottery sherd and silver ingot fragment in a multi-period finds assemblage (**1298**) recovered from farmland 120 m east of Winfarthing and on the western flank of the draft Order Limits
- A late Saxon stirrup and a late Saxon/medieval buckle in a multi-period finds assemblage (**1206**) recovered from farmland 560 m south-south-east of Winfarthing, immediately south of Heywood Road and 250 m west of the draft Order Limits
- Late Saxon/medieval pottery sherds and a brooch in a multi-period finds assemblage (**1292**) recovered from farmland on the eastern flank of Winfarthing and 300 m west of the draft Order Limits

### Bressingham and the Waveney Valley

3.2.225 Evidence of late Saxon activity in the Bressingham and the Waveney Valley area comprises a chance find and metal detector and fieldwalking finds of evidential value. These **low value** assets comprise:

- A late Saxon harness piece in a multi-period finds assemblage (**1335**) recovered from farmland on the northern bank of the river Waveney c. 600 m south-west of the outskirts of Diss and partially within the Order Limits
- A late Saxon bridle fitting and a harness fitting in a multi-period finds assemblage (**1228**) recovered from farmland 450 m south of Bressingham and partially within the draft Order Limits
- A late Saxon/medieval Anglo-Scandinavian harness fitting in the form of a horse or lion in a multi-period finds assemblage (**1294**) recovered from farmland 1.1 km east of Bressingham and partially within an access road of the draft Order Limits
- An early Saxon cruciform and square-headed brooch fragments in a multi-period finds assemblage (**1301**) recovered from farmland 480 m north-east of Bressingham and adjacent to an access road of the draft Order Limits
- A late Saxon stirrup strap mount (**1274**) recovered from farmland 350 m south of Bressingham and 150 m west of the draft Order Limits

## Medieval

- 3.2.226 The medieval period within Section 1 is predominantly represented by findspot and artefacts recovered during fieldwalking and metal detector surveys. There are as well, however, several churches and moated sites dating to the medieval period as well as settlement centres that have medieval origins.

### Dunston and Mangreen Hall Farm

#### *Designated Heritage Assets*

- 3.2.227 The following designated assets are in the parish of Keswick and Intwood.
- 3.2.228 The **medium value** Grade II listed assets 'Keswick Old Hall' (**1169887**) and 'Garden Walls at Keswick Old Hall' (**1050547**) are located off the northern flank of Low Road in Keswick c. 1.95 km north-west of the draft Order Limits. The assets have evidential and historical value, whilst the hall also has aesthetic value. The hall dates to around 1600, has 18th century additions and comprises a red brick, gault brick and colourwashed brick structure with plain tiled and blue glazed pantiled roofs. The garden wall dates to around 1600 and the 18th century and comprises a 2.3 m high red brick structure with added buttresses.
- 3.2.229 The setting of the assets is shared and informed by their interrelationship, by their relationships with non-designated outbuildings recorded on the first edition OS map of 1886 and by the large grounds, which include lawns, mature trees and ornamental ponds. The setting is further informed by the assets' relationships with the former icehouse on the opposite flank of Low Road and the Keswickhall Farm complex immediately to the south-east. The hall has remained a residential property, whilst the large farming complex appear to have been broken up into commercial and residential properties. The large gardens of the hall largely screen the former farming complex affording the hall some privacy, and so the setting of the assets makes a considerable contribution to their values. Due to the setting being restricted to the roadside settlement location and the immediate agricultural landscape, it does not extend to the draft Order Limits.
- 3.2.230 The **medium value** Grade II listed 'Keswick Hall' (**1306331**) is located off the southern flank of Keswick Hall Road just to the south of Keswick and c. 1.5 km north-north-west of the draft Order Limits. The assets have evidential, historical and

aesthetic value. The hall was built in 1817 by William Wilkins for Richard Hudson Gurney and additions were made around 1839. The house comprises a gault brick structure with stone and rendered dressings and slated roofs.

- 3.2.231 The setting of the asset is informed by its relationships with its gardens and modest parklands and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1886. The hall now serves as a business park and the gardens recorded on the OS mapping have been eroded by the addition of further business units and residential properties. The hall does, however, retain an open view to the south across its former parkland and the landscape beyond. The setting of the hall, therefore, makes a moderate contribution to its value, but due to topography, infrastructure and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.232 The following designated assets are in the parish of Caistor St. Edmund and Bixley.
- 3.2.233 The **medium value** Grade II listed Church of All Saints (**1050544**) and the 'Remains of Church of All Saints Immediately East of Church of All Saints' (**1050545**) are located 1.9 km north-north-west of the northern extent of the draft Order Limits and 330 m east of the eastern outskirts of the village of Keswick. The assets have evidential and historical value. The parish church (**1050544**) has a round west tower of 12th century date with some 14th century alterations. The small nave and chancel were added in 1893 by Herbert Green. The earlier church (**1050545**) was pulled down 1597 when the parish was united with Intwood, but the tower and west nave wall survived and were incorporated into the church of 1893. The ruins of the north, east and south walls of the medieval chancel (**1050545**) still survive immediately to the east of the extant church.
- 3.2.234 The setting of the asset is informed by its location on slightly raised land, its attendant graveyard, and a mature copse to the north and east. There is open farmland to the south and west with partially wooded boundaries and views across the rooftops of Keswick to the west. The wooded church grounds obscure views to the southern limits of Norwich and create a sense of enclosure, whilst the views to the west and south link the assets to the rural landscape it historically served. The setting of the assets, therefore, makes a considerable contribution to their value, but due to topography and intervening infrastructure and vegetation, the setting does not extend to the draft Order Limits.
- 3.2.235 There is a dispersed group of seven listed buildings in the Markshall/Caistor St Edmunds area comprising two Grade II\* assets and five Grade II assets. Six of these assets are post medieval in date and discussed below, however, the 'Church of St Edmund' (**1373145**) has medieval origins. The **high value** Grade II\* listed church is located 350 m south of Caistor St Edmunds, on the western flank of Stoke Road and 1.1 km north-east of the northern extent of the draft Order Limits. The church has evidential, historical, and aesthetic value. The church is surrounded by the **high value** scheduled monument 'Venta Icenorum: Roman town and associated prehistoric, Anglo-Saxon, and medieval remains' (**1021463**) and is situated within the south-east corner of the walled town but is not included in the schedule. The church has early 14th century origins, but the structure has been maintained and added to in the centuries since.
- 3.2.236 The setting of the church is informed by its associated tree-lined churchyard, by its location within, and relationship with, the walled town of Venta Icenorum (**1021463**) and by its slightly elevated aspect overlooking the shallow, agricultural TAS Valley to the west. The immediate setting of the asset within its churchyard creates a sense of enclosure and calm with the Roman town walls and mature tree growth to the east

adding further constraint. There are, however, views to the Tas Valley to the south-west through to the north-west broken by mature trees along the churchyard boundary. The setting of the asset, therefore, makes a considerable contribution to its value, but due to topography, vegetation and development, the setting does not extend to the draft Order Limits.

- 3.2.237 The **high value** Grade II\* listed Church of All Saints (**1373136**) is located on the northern flank of Intwood Road, 1.1 km north-north-west of Swardeston, 2.4 km north-west of the draft Order Limits and on the north-east edge of the Grade II\* listed Intwood Hall Park and Garden (**1000320**). The asset has evidential, historical, and aesthetic value. The church has 12th century origins but has 13th, 14th and 15th century additions and alterations including a 15th century octagonal upper stage to the round 12th century tower. The church was restored in 1852-3. The church is built of flint with some erratics and iron conglomerate, minimal dressings, and stone window surrounds. The roof has plain tiles to south and pantiles to north.
- 3.2.238 The setting of the Church of All Saints is informed by its location within its graveyard the boundaries of which is defined by a low flint wall, mature hedgerows, and yew trees. There is limited domestic development to the north and south of the church, but this is only occasionally glimpsed through the graveyard boundaries. The setting of the asset creates a sense of enclosure and peacefulness that makes a moderate contribution to the value of the asset. Due to intervening development and vegetation, however, the setting of the church does not extend to the draft Order Limits.
- 3.2.239 The **high value** Grade II\* listed Church of St Remigus (**1050433**) is located 150 m west of Stoke Lane, c. 770 m south-east of Dunston and 860 m east of the draft Order Limits. The parish church was built in the 13th century with alteration made in the 15th century and further alterations and restorations undertaken in 1898. It is built of flint nodules with ashlar dressings and some brick. The asset has evidential, historical, and aesthetic value.
- 3.2.240 The setting of the Church of St Remigus is informed by its attendant graveyard with mature tree growth and a mature copse to the north and north-east. there is a broken view of a football pitch to the west and a golf course to the south-east. The setting of the asset creates a sense of enclosure and tranquillity that makes a moderate contribution to the value of the asset. Due to intervening development and vegetation, however, the setting of the church does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.241 Geophysical survey, fieldwalking, metal detecting and subsequent trial trenching on land 700 m south of Mangreen Hall Farm and partially within the draft Order Limits identified archaeological features (**1271**) including ditches representing a **low value** medieval field system, (McNicol and McNicoll-Norbury, 2012) of evidential value.
- 3.2.242 Medieval to post medieval **medium value** earthworks of enclosures and boundaries (**1241**) are apparent of aerial photographs taken in 1947 and 1956 immediately to the north of the draft Order Limits. The earthworks surround the post medieval Grade II\* listed Mangreen Hall (**1366150**), which is considered to occupy a former manorial moated medieval site. The earthworks are of evidential value may represent the remains of the former medieval hamlet of Mangreen, or perhaps outbuildings and paddocks associated with the medieval moated manor.
- 3.2.243 Geophysical survey, fieldwalking and subsequent trial trenching and strip, map, and sample excavation on land 300 m north-east of Mangreen Hall Farm and immediately

north of the draft Order Limits identified multi-period archaeological remains and finds assemblage (**1182**) (Stone, 2011) that included an unstratified **low value** medieval copper alloy buckle and pottery sherds of evidential value.

- 3.2.244 A large **medium value** multi-period cropmark complex (**1325**) is located in a V-shaped parcel of land at the northern extent of the Order Limits between the A140 to the west and the railway to the east with Dunston c. 220 m to the south and the scheduled Roman town of Venta Icenorum (**1021463**) immediately to the east. The complex includes the cropmarks of boundary ditches and banks (**1322**) of medieval to post medieval date. These boundaries are characteristically curvilinear in shape and do not show any clear relationship with the surrounding landscape, other than following the line of the parish boundary between Caistor St Edmund and Stoke Holy Cross. It seems likely that these curvilinear boundaries are broadly medieval in date, with some continuing in use into the post medieval period.
- 3.2.245 Evaluation trial trenching undertaken immediately to the south of the scheduled monument Venta Icenorum (**1021463**), identified Iron Age and Romano-British archaeological remains (**1144**) these remains are discussed above. An unstratified **low value** medieval copper alloy token of evidential value was the only medieval evidence found during the fieldwork. The evaluation area is located on the western flank of Dunston, 190 m east of the draft Order Limits and within the Tas Valley to the west of the river.
- 3.2.246 Metal detector survey and archaeological excavations, partially within cropmarks area (**1261**), in advance of the construction of Dunton Hall golf course recovered a multi-period finds assemblage and identified archaeological remains (**1136**). Evidence of medieval activity was restricted to unstratified **low value** copper alloy finds comprising a finger ring, a seal, a thimble, and pottery sherds of evidential value. The site is situated on the western flank of Dunston, immediately east of Ipswich Road and 160 m south-east of the draft Order Limits.
- 3.2.247 The probable site of the deserted medieval village (DMV) of Gowthorpe (**1232**) is located 670 m south-west of Mangreen Farm, on the eastern flank of Gowthorpe Lane and partially within an access road of the draft Order Limits. The potentially **medium value** cropmarks of enclosures, fields and boundaries are visible on the aerial photographs, and these may represent the remains of the settlement. The cropmarks are of evidential value and lie to the west and south-west of the Grade II\* listed Gowthorpe Manor House (**1050515**), which is largely post medieval in date (see post medieval section below), but it does incorporate an early 16th century, late medieval timber framed range to the west with a mid-16th century stair turret to the rear. It is possible that this structure was built on the site of an earlier manor and incorporated or reused elements of its predecessor.
- 3.2.248 The DMV cropmark complex (**1232**) includes two distinct features comprising the possible **medium value** sites of St James' Chapel (**1181**) and the Humbleyard Hundred moot (**1122**). The site of St James' Chapel (**1181**) is located 840 m south-south-west of Mangreen Farm and partially within the draft Order Limits and has evidential value. The chapel was endowed in 1286, was still in use in 1509, and it is thought the chapel served the Gowthorpe DMV. The site comprises a relatively broad ditched, rectangular enclosure visible on aerial photographs, and it has been suggested that the chapel was located within this enclosure. However, it has also been suggested the cropmark relates to post medieval brick production. The site of the Humbleyard Hundred moot (**1122**) is located 830 m south-south-west of Mangreen Farm and partially within the draft Order Limits and has evidential value. Historic maps record this location as 'Site of Humble Yard', which is assumed to refer

to the moot site. The cropmarks of possible banks and ditches potentially relating to the moot may be visible on aerial photographs. The Swainsthorpe and Swardeston Tithe maps indicate the former presence of a ditched enclosure at this location and the parish boundaries follow the edge of the enclosure, indicating that it represented a relatively early and potentially significant feature in the landscape.

- 3.2.249 Cropmark complex (**1232**) also contains a small group of shallow **low value** earthworks (**1221**) of evidential value at its southern limits where it overlaps with asset (**1209**), which represents an area of post medieval brick production and clay extraction. Without intrusive investigation, it is not possible to attribute asset (**1221**) to either period.
- 3.2.250 Also included within cropmark complex (**1232**) is a concentration of undated anomalies interpreted as a possible sub-rectangular enclosure and associated ditches and boundaries (**1212**) of evidential value. It is possible these undated features also relate to the Gowthorpe DMV (**1232**) and if so, could potentially be of **medium value**.
- 3.2.251 A now ploughed out **low value** ring ditch (**1142**) is also located within the bounds of the former brickworks (**1209**). The feature is of evidential value, is 40 m in diameter, with a ditch varying between 1.5 m and 2.5 m in width and has opposing causeways to the north-west and south-east. The asset was in the past considered to be the remains of a Bronze Age round barrow, but the Norfolk HER now records a late medieval to post medieval date.
- 3.2.252 Another cropmark complex (**1231**) is located to the west of Gowthorpe Lane, 1 km south-west of Mangreen Farm, 245 m south-west of the draft Order Limits and 100 m south and south-west of Gowthorpe Manor House (**1050515**). The complex potentially represents further **medium value** settlement activity associated with the deserted medieval village of Gowthorpe (**1232**). Cropmark complex (**1231**) partially incorporates the cropmark of a trackway (**1211**) also possibly associated with the deserted village. These assets have evidential value.
- 3.2.253 Geophysical survey, fieldwalking, metal detecting and subsequent trial trenching on land 700 m south of Mangreen Hall Farm, partially within the draft Order Limits and directly to the east of the deserted village cropmark complex (**1231**) identified **low value** archaeological features (**1271**) including ditches of evidential value representing a medieval field system. The evaluation report speculates that the field system may be associated with the periphery of the deserted medieval village of Gowthorpe (McNicol and McNicoll-Norbury, 2012).
- 3.2.254 Metal detector survey of land 900 m south of Mangreen Hall Farm and partially within the draft Order Limits resulted in a multi-period finds assemblage (**1218**) that included Two **low value** silver medieval coins, two copper alloy jettons and a fragment of a copper alloy vessel of evidential value. Subsequent archaeological trial trenching identified multi-period archaeological features and finds assemblage (**1271**) that included **low value** medieval ditches and a possible field system of evidential value.
- 3.2.255 Medieval **low value** ridge and furrow earthworks (**1071**) have been identified on 20th century aerial photography in the north of Dunston Park, 230 m east of the draft Order Limits. The earthworks were ploughed out in the second half of the 20th century, but furrows of evidential value were identified cutting underlying natural deposits during archaeological trial trenching in 1996 (Bates 1996).
- 3.2.256 Another area of possible **low value** medieval ridge and furrow cultivation (**1259**) of evidential value is in a field immediately south of Hickling Lane, 750 m south-south-

west of Dunston Hall (**1373206**) and 390 m east of the draft Order Limits. It should be noted, however, the interpretation of the cropmarks is tentative.

3.2.257 Further evidence of medieval activity in the Dunston and Mangreen Hall Farm area is represented by findspots and artefacts recovered during fieldwalking and metal detector surveys. These **low value** assets are of evidential value and comprise:

- A medieval copper alloy brooch, buckles, strap fittings, a seal, a harness fitting, dress components, a tumbrel (coin balance), a lead steelyard weight and pottery sherds in a multi-period finds assemblage (**1022**), recovered from land within the bounds of the scheduled monument Venta Icenorum (**1021463**). located immediately north of Dunston and 150 m east of the draft Order Limits
- A medieval copper alloy buckle and harness pendant, a lead spindle whorl, and a silver coin; and two medieval/post medieval lead weights in a multi-period finds assemblage (**1208**) recovered from farmland west of Mangreen Hall Farm and 180 m north-west of the draft Order Limits
- A 14th to 15th century buckle in a multi-period finds assemblage (**1163**) 190 m north-east of Mangreen Hall Farm and 360 m north of the draft Order Limits
- Medieval pottery sherds and medieval/post medieval pottery and brick in a multi-period finds assemblage (**1196**) recovered from farmland 740 m south-south-west of Dunston Hall and 340 m east of the draft Order Limits
- A medieval brooch, buckle, coin, key, knife, spur, strap fitting and a stone mortar in a multi-period finds assemblage (**1110**) recovered from farmland 80 m north-west of Mangreen Hall Farm and 260 m north-west of the draft Order Limits

## Swainsthorpe and Mulbarton

### *Designated Heritage Assets*

3.2.258 The Grade I listed **high value** 'Church Of St Nicholas' (**1050695**) is located on the southern flank of School Road, 370 m north-west of the settlement of Bracon Ash and c. 1.7 km north-west of the draft Order Limits. The church has evidential, historical, and aesthetic value. The asset is built of rendered flint with ashlar dressings and has a plain tiled roof. The asset has medieval origins and there are elements of the structure dated to the 13th, 14th, and 15th centuries. There are the remains of an important early Renaissance terra-cotta canopied tomb of c.1525 in chancel and the church also contains the Berney family ashlar-built mausoleum of c. 1750.

3.2.259 The setting of the church is informed by its mature tree-lined graveyard, by its relationship with the Rectory to the north-west and a copse to the north. Through the trees to the south and east there are broken views of the farmland beyond and the settlement of Bracon Ash further to the south-east. The setting of the church creates a sense of seclusion and tranquillity and, therefore, makes a moderate contribution to the value of the asset. Due to intervening mature tree growth, development, and topography, however, the setting of the church does not extend to the draft Order Limits.

3.2.260 The Grade I listed **high value** 'Church Of All Saints' (**1050688**) is located north-east of the junction of Church Lane and King John's Thorn, 1.2 km west-northwest of Bracon Ash and 2.5 km north-west of the draft Order Limits. The church has evidential, historical, and aesthetic value, has medieval origins, and the west tower may be 11th century and pre-Conquest in date. Fourteenth and 15th century elements are apparent as well considerable evidence of Victorian restoration. The

church contains the fine coloured alabaster tomb of Myles Branthwaite, a successful Norwich lawyer who died 1612, and his wife Mary in the north side of chancel.

- 3.2.261 The setting of the church is informed by its mature tree lined graveyard and by its relationship with the rectory 30 m to the north, which is apparent on the first edition OS map published in 1882. The church's setting instils a sense of seclusion and create feeling of tranquillity and, therefore, makes a considerable contribution to its value. Due to intervening mature tree growth, development, and topography, however, the setting of the church does not extend to the draft Order Limits.
- 3.2.262 The Grade II\* listed **high value** 'Church Of St Mary' (**1306618**) is located north of Rectory Road in East Carleton and 3 km west-northwest of the draft Order Limits. The asset has evidential, historical, and aesthetic value. The church has medieval origins and 13th, 14th, and 16th century elements are apparent as well as Victorian restoration work dating to 1881. The church is built of uncoursed broken flint and erratics, with stone dressings and a plain tile roof.
- 3.2.263 The setting of the church is informed by its attendant graveyard, by a large copse to the east and its relationship with the settlement of East Carleton it has served since its construction. The setting of the church makes a considerable contribution to its value, but due to intervening mature tree growth, development, and topography, however, the setting does not extend to the draft Order Limits.
- 3.2.264 The Grade II\* listed **high value** 'Church Of St Mary Magdalen (**1172267**) is in the Mulbarton conservation area, on the north-eastern flank of The Common and c. 1.2 km west-northwest of the draft Order Limits. The asset has evidential, historical, and aesthetic value. The church has largely 14th century origins and is built of flint with stone, some brick dressing and has a lead and slate roof. the church underwent Victorian restoration work in the latter half of the 19th century and a north aisle, a north arcade and a vestry were added.
- 3.2.265 The setting of the church is informed by its attendant tree-lined graveyard and by its relationship with the settlement of Mulbarton arranged around the large triangular Common. A small copse is located immediately to the east of the asset. The tree lined graveyard creates a sense of peace and exclusion, however, residential properties to the north and south are visible linking the church to the settlement it serves. The setting of the church, therefore, make a moderate contribution to the value of the asset. Due to mature tree growth to the east and south-east of the asset and in the intervening landscape there no views of the Project and so the setting of the church does not extend to the draft Order Limits.
- 3.2.266 The Grade II\* listed **high value** 'Church Of St Peter' (**1169726**) is in the heart of Swainsthorpe, just to the west of the junction of Church Road and Church Close and 550 m east of the draft Order Limits. The asset has evidential, historical, and aesthetic value. The church has a 12th century west tower with the rest of the structure dating to the 14th century except for the south porch that was rebuilt in 1885. The church is built of flint with ashlar dressings and a plain tile roof.
- 3.2.267 The setting of the church is informed by its attendant tree lined graveyard and by its location at the heart of Swainsthorpe. The tree lined graveyard instils a sense of seclusion and calm, but views of the roof tops of domestic dwellings draw the asset back into the community it serves. The setting of the church, therefore, makes a moderate contribution to the value of the asset. There is an existing powerline 500 m to the west of the church that runs parallel to the current Project that will be 50 m further to the west. Occasional glimpses of the pylon tops may be apparent from

Church Road but at ground level in the church grounds they cannot be seen. Therefore, the setting of the church does not extend to the draft Order Limits.

- 3.2.268 The Grade II\* listed **high value** 'Church Of The Holy Cross' (**1050437**) is located at the southern limit of the settlement of Stoke Holy Cross, on the eastern flank of Norwich Road and c. 2.3 km east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church is mainly 13th century with 14th century alterations and extensive Victorian restorations carried out in 1879. The asset is built of flint with ashlar dressing and the nave and chancel have been rendered, the roof is of plain tile.
- 3.2.269 The setting of the church is informed by its large attendant tree lined graveyard, by its relationship with the former vicarage and by its location on a raised parcel of land overlooking the Tas Valley to the west. Despite the post medieval and early modern development of Stoke Holy Cross to the north, the asset is still somewhat isolated at the southern limit of the settlement and the enclosing tree lined graveyard instils feelings of privacy and peace. Therefore, the setting of the asset makes a moderate contribution to its value. There are, however, long range views of the draft Order Limits on the western bank of the Tas Valley from the western edge of the graveyard but this view is of the neighbouring parish of Swainsthorpe and is only glimpsed at ground level for the church itself. The setting of the asset, therefore, does not extend to the draft Order Limits.
- 3.2.270 The Grade II\* listed **high value** 'Dairy Farm Barn' (**1050707**) and the Grade II listed **medium value** 'Dairy Farmhouse Cottage (East), Dairy Farmhouse Cottage (West)' (**1152253**) are located within a farming complex 340 m south-east of the A140 Ipswich Road, 600 m north-west of the Shotesham Hall complex on the western flank of the Tas Valley. The assets have evidential and historical value. The cottages are post medieval in date and are discussed below. The barn has late medieval origins and was constructed around 1500 AD but has later additions and alterations. It comprises a five bay timber framed structure, partly weather-boarded, partly rendered with a thatched roof.
- 3.2.271 The setting of the barn is informed by its relationship with the cottages and with the other buildings of the farming complex, most of which are recorded on the first edition OS map of 1882. The setting is further informed by the surrounding agricultural land with which the asset has a historic and functional relationship. The farm complex is linked to the Shotesham Hall estate to the east by a private road, however, mature tree growth along the banks of the Tas screen any views in this direction. The setting of the barn makes a considerable contribution to its value. The view to the west and the draft Order Limits is interrupted by mature tree growth on the eastern flank of the A140, therefore, the setting of the asset does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.272 The site of the **medium value** deserted medieval village of Kenningham (**1010**) has evidential value and is located 500 m east of Mulbarton and partially within the draft Order Limits. The village was deserted over the course of the medieval and early post medieval periods. The parish was united with Mulbarton in 1452, when there were only a few houses left in the village. The earthworks of probable medieval house platforms and other features are visible on the ground and on aerial photographs. Fragments of a medieval stone mortar have been found on the site.
- 3.2.273 The geophysical survey of a field 1 km east of Mulbarton and partially within the draft Order Limits identified a complex of anomalies (**1227**) of evidential value, some of which likely represent an area of potentially **medium value** medieval occupation,

potentially associated with the adjacent deserted settlement of Kenningham (**1010**) immediately to the north and west. The anomalies comprise two parallel pairs of adjacent ditches with the area in between subdivided into a series of individual plots or enclosures by a series of perpendicular linear anomalies. There are also numerous pit-type discrete anomalies within the enclosed areas. Fieldwalking in the same area identified two **low value** medieval pottery sherds of evidential value in a multi-period finds assemblage (**1278**), whilst fieldwalking immediately to the south also identified **low value** medieval pottery of evidential value in a multi-period finds assemblage (**1235**).

- 3.2.274 A **low value** complex of cropmarks (**1264**) of evidential value has been identified 540 m south-west of Swainsthorpe and partially within the draft Order Limits. The cropmarks are located partially within another complex (**1223**) that have been interpreted as post medieval field boundaries that predate 19th century Tithe and OS mapping. A probable post medieval date for the cropmarks (**1264**) is supported by contemporary artefacts recovered during fieldwalking surveys (**1239**) and (**1238**) in the same area.
- 3.2.275 The site of the former medieval church of Kenningham (**1067**) is located 450 m east of Mulbarton, 200 m west of the draft Order Limits and immediately to the west of the DMV (**1010**). The church was united with the church in Mulbarton in 1452 and demolished before the Reformation. Slight earthworks of evidential value remain on the site that may represent **medium value** remains.
- 3.2.276 The archaeological evaluation of land immediately north of Swainsthorpe and 360 m east of the draft Order Limits identified multi-period archaeological remains and finds assemblage (**1193**). The finds assemblage included a few sherds of residual **low value** medieval pottery and roof tile of evidential value.
- 3.2.277 A complex of cropmarks representing potentially **medium value** boundary ditches, enclosures, and ponds of probable medieval to post medieval date (**1244**) is located immediately south of Swainsthorpe and 400 m east of the draft Order Limits. The features are of evidential value and likely represent the development of, and activities associated with the village of Swainsthorpe. A second complex of potentially **medium value** cropmarks representing boundaries and pits (**1245**) is located at the western limit of Swainsthorpe and 70 m east of the draft Order Limits. These features are also considered to related to the development and occupation of the settlement of Swainsthorpe from the medieval through to the post medieval periods.
- 3.2.278 Further evidence of medieval activity in the Swainsthorpe and Mulbarton area is represented **by low** value findspots, and artefacts of evidential value recovered during fieldwalking and metal detector surveys. These assets comprise:
- Medieval/post medieval pottery sherds in a multi-period finds assemblage (**1238**) recovered from farmland 610 m east of Mulbarton and partially within the draft Order Limits
  - Medieval pottery sherds in a multi-period finds assemblage (**1271**) recovered from farmland 980 m east of Mulbarton, immediately south of Church Road and partially within the draft Order Limits
  - A medieval copper alloy buckle, pottery sherds and a silver coin; and medieval/post medieval pottery sherds, a copper alloy vessel fragment and three buttons in a multi-period finds assemblage (**1230**) recovered from farmland on the western flank of Swainsthorpe, immediately south of Church Road and partially within the draft Order Limits

- A medieval silver finger ring and coin, a copper alloy seal matrix, strap loop, a jetton and pottery sherds; and a medieval/post medieval copper alloy vessel leg and a scabbard fitting, a silver hooked dress tag and pottery sherds in a multi-period finds assemblage (**1233**) recovered from farmland 850 m south-west of Swainsthorpe, immediately north of Brick Kiln Lane and partially within the draft Order Limits
- Medieval and medieval/post medieval pottery sherds in a multi-period finds assemblage (**1234**) recovered from farmland 1.1 km south-south-west of Swainsthorpe, immediately south of Brick Kiln Lane and partially within the draft Order Limits
- A medieval/post medieval brick in a multi-period finds assemblage (**1195**) recovered from farmland on the western limits of Swainsthorpe, immediately north of Church Street and just clipping the draft Order Limits
- A sherd of medieval pottery and a sherd of medieval/post medieval pottery in a multi-period finds assemblage (**1277**) recovered from farmland 1.3 km south-south-west of Swainsthorpe and clipping the eastern flank of the draft Order Limits
- A sherd of medieval pottery in a multi-period finds assemblage (**1275**) recovered from farmland 1.4 km south-south-west of Swainsthorpe, immediately north of Mulbarton Lane and 90 m east of the draft Order Limits
- A silver medieval coin in a multi-period finds assemblage (**1197**) recovered from farmland on the northern flank of Swainsthorpe, 60 m north of Church Road and 360 m east of the draft Order Limits

## Flordon and Fundenhall

### *Designated Heritage Assets*

- 3.2.279 The **high value** scheduled monument Newton Flotman Bridge (**1002885**) crosses the Tas on the south-eastern outskirts of Newton Flotman, 2.4 km north-east of Flordon and 1.7 km south-east of the draft Order Limits. The asset has evidential and historical value. The bridge dates to the 15th century but has later additions. The original four bays of the bridge were constructed of ashlar but in 1835 the bridge was widened, and the south-eastern bay was rebuilt in brick. The bridge to lengthened by one bay to north-west in the 20th century. The three surviving Medieval bays consist of shallow two-centred arches of two chamfered orders. The vaults are reinforced by closely set chamfered transverse ribs.
- 3.2.280 The setting of the bridge is informed by its location crossing the Tas on the outskirts of the town, and although the asset carries only foot traffic today, its function is retained. The setting of the bridge, therefore, makes a considerable contribution to its value but does not extend to the draft Order Limits.
- 3.2.281 The **high value** Grade II\* listed 'Church Of St Mary The Virgin' (**1050704**) is located on the western flank of the A140 Ipswich Road, on the northern edge of Newton Flotman and 1.3 km south-east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church was built in the 15th century and includes evidence of 16th and 17th century additions and alterations. It is constructed of flint with ashlar and some brick dressing. The roofs are lead.
- 3.2.282 The setting of the church is informed by its attendant graveyard and by its location at the northern limit of the settlement. The graveyard is defined by mature tree lined hedgerows to the east, west and south, however, to the north the graveyard is open

to Church Road and there are views of farmland beyond broken by a mature hedgerow on the northern flank of the road. Up until the latter half of the 20th century, the church had stood in isolation approximately 400 m north of the core of Newton Flotman, however, today the church is flanked by residential development to the west, south and east. The setting of the church, therefore, makes a minor contribution to its value, and due to topography and a copse and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.283 The **high value** Grade I listed 'Church Of All Saints' (**1050651**) is located on the northern flank of Church Road in Wreningham, 1.7 km north-west of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church was built in the 13th century with additions and alterations made in the 14th and 15th centuries. It was restored in 1853 following the collapse of the tower the year before.
- 3.2.284 The setting of the church is informed by its association with the settlement it serves and by its attendant graveyard. The graveyard is defined by a low hedge and there are mature trees in the north. Its once isolated location has been eroded by post medieval development, particularly to the east and the establishment of Church Farm. The setting of the asset, therefore, makes a minor contribution to its value, and due to development, copses and mature tree lined hedgerows, the setting does not extend to the draft Order Limits.
- 3.2.285 The **high value** Grade II\* listed 'Church of St Michael' (**1172235**) is located 100 m north of The Street, Flordon, and 1 km south-east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The nave of the church was built in the 11th or 12th centuries and 14th and 15th additions and alterations are apparent. Some windows were replaced in the Victorian period and the roof was replaced and covered by pantiles.
- 3.2.286 The setting of the asset is informed by its location in the settlement it serves and its attendant graveyard. The graveyard boundary is discontinuous, sometimes defined by a low hedgerow or garden fences whilst there are mature trees to the south. Formally located at the eastern extent of Flordon, residential development of the settlement in the latter half of the 20th century has all but enclosed the asset. The setting of the asset, therefore, makes a minor contribution to its value, and due to the development of Flordon and mature tree cover, the setting does not extend to the draft Order Limits.
- 3.2.287 The **high value** Grade II\* listed 'St Mary's Chapel' (**1373555**) is located on the western flank of Blacksmiths Lane 430 m east of Fundenhall and 550 m north-west of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. Converted into a house probably in the 18th century, the building constitutes the 15th century remains of Ashwell Church, although the plan of the nave and chancel suggests 12th century origins. There are no medieval external features, however, the 15th century arch braced roof of the nave survives. It is constructed of plastered flint and brick and has a pantile roof.
- 3.2.288 The setting of the asset is defined by its location at the eastern edge of the dispersed settlement of Fundenhall and its relationship with the chantryhouse immediately to the north-west. The setting is also informed by the surrounding agricultural landscape with which the asset has a historical relationship. Due to its change of function and the encroachment of later development the setting of the asset makes a minor contribution to its value. The view to the east, although broken by fruit trees in the asset's garden, has the potential to include long views (c. 1 km) of the Project, but this is beyond the extent of the asset's setting.

- 3.2.289 The **high value** Grade I listed 'Church Of St Mary' (**1302231**) is located close to the western edge of Tasburgh on the southern flank of Church Hill, within the southern boundary of the likely Iron Age scheduled monument 'Camp in Village' (**1003984**), and c. 2.85 km south-east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The round tower of the church likely has 11th century Anglo-Saxon origins whilst the rest of the fabric of the church is the result of 14th, 15th, 16th and 19th century alterations and additions.
- 3.2.290 The setting of the asset is informed by its location within the settlement it serves, and its relationships the camp and with its associated graveyard and the rectory to the west. The graveyard is defined by mature tree lined boundaries largely screening the asset for 20th century residential development to the east and south-east, although roof tops visible from the graveyard. The setting of the asset, therefore, makes a moderate contribution to the value of the asset, but due to topology, development, mature copses, and tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.291 The **high value** Grade I listed 'Church Of St Margaret' (**1179227**) is located on the southern flank of Holly Lane, on the northern edge of Hapton and 700 m south-east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church is mainly 14th century although the west tower was built in 1848. The church is built of flint with some stone dressing and a slate roof.
- 3.2.292 The setting of the church is informed by its relationships with the Grade II listed 19th century vicarage (**1373412**), with the settlement it serves and by its association with the attendant graveyard. The graveyard is defined by low mature tree lined hedgerows, which allows for broken views of post medieval residential development to the east. The setting of the asset instils feelings of peace and tranquillity and, therefore, it makes a considerable contribution to the asset's value. The mature trees that line Holly Lane to the north of the asset largely screen views from the asset to the draft Order Limits to the north-west and focus the asset's setting on the settlement to the south. The setting of the assets does not, therefore, extend to the draft Order Limits.
- 3.2.293 The **high value** Grade I listed 'Church Of All Saints' (**1170251**) is located on the northern flank of The Street, towards the eastern end of Ashwellthorpe and 1.9 m north-west of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The earliest element of the church's fabric is the late 13th century west tower and there is evidence of 14th, 15th and 18th century additions and alterations. The asset is built of partially rendered flint rubble and stone dressing with a slate roof.
- 3.2.294 The setting of the church is informed by its location within the settlement it serves and with its relationships with the parsonage to the west and its associated graveyard. The graveyard is defined by heavily wooded boundaries to the west, north and east that restrict views into and out of the graveyard. The view to the south, however, is more open and there is an attractive view of the church from The Street across a well maintained lawned area with a few mature trees. The setting of the asset instils feelings of peace and tranquillity and, therefore, it makes a considerable contribution to the asset's value. Due to the development of Ashwellthorpe and further development and mature tree lined hedgerows in the intervening landscape, however, the setting of the asset does not extend to the draft Order Limits.
- 3.2.295 The **high value** Grade I listed 'Church Of St Nicholas' (**1306126**) is located on the southern flank of Church Lane in the dispersed settlement of Fundenhall, 950 m south-east of Ashwellthorpe and 1.1 km west of the draft Order Limits. The asset is of

evidential, historical, and aesthetic value. The church was built in the 12th century and then maintained until it was heavily restored in 1869. It is built of flint rubble with stone dressing and has a machine tile roof.

- 3.2.296 The setting of the church is informed by its location within the parish, by its associated graveyard and by the surrounding agricultural landscape with which it has a historical relationship. The graveyard boundaries are defined by mature tree lines, a hedgerow along Church Lane and timber fencing, a mature copse around a body of water lies to the west. The timber fencing and sparse trees in the east of the graveyard allow for broken views to and from the asset across a large arable field. The setting of the church instils feelings of peace and tranquillity and, therefore, makes a considerable contribution to its value. Due to the mature grounds of the church and the development and mature tree lined hedgerows of the intervening landscape, the setting of the asset does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.297 Five medieval strip fields (**1029**) are apparent on an aerial photograph taken in 1946 that can also be seen on the Tithe Map of the area and the first edition Ordnance Survey map of 1887. This **low value** asset has evidential value and is located 1.2 km east of Fundenhall and partially within the draft Order Limits. Some of the boundaries are still apparent of recent satellite imagery.

- 3.2.298 Further evidence of medieval activity in the Flordon and Fundenhall area is represented by **low value** findspots, and artefacts recovered during fieldwalking and metal detector surveys. These assets of evidential value comprise:
- Medieval coins including one of silver and a 14th century copper alloy seal showing a rabbit sitting on a hound in a multi-period finds assemblage (**1133**) recovered from farmland 740 m east-south-east of Fundenhall and within the draft Order Limits
  - A medieval copper alloy casket key, a strap-end, and a silver pendent cross; and a medieval/post medieval copper alloy buckle and button in a multi-period find assemblage (**1217**) recovered from farmland 750 m north-west of Flordon and largely within the draft Order Limits
  - A silver medieval cruciform pendent inscribed AGLA (**1166**) recovered from farmland 700 m south-east of Fundenhall and within the draft Order Limits. The meaning of the inscription is unclear, but it has been suggested it is an abbreviation of the Yiddish phrase 'Atā gībōr lə'ōlām 'Ādōnāy translated as 'Thou, O Lord, art mighty forever.'
  - Medieval coins (some of silver), padlocks, buckles, harness fittings and mounts, thimbles, seal matrices, a book fitting, a candle holder, and a lead sea matrix; a medieval/post medieval ring, dress accessories, weight, and a spindle whorl in a multi-period finds assemblage (**1130**) recovered from farmland 500 m south-east of Fundenhall, immediately south of Hapton Road partially within the draft Order Limits and situated on higher ground overlooking a tributary of the Tas Valley to the south-east
  - Four silver medieval coins (**1138**) recovered from farmland 200 m east of Fundenhall and partially within the draft Order Limits
  - A medieval silver brooch, a copper alloy buckle, and a lead weight; and a medieval/post medieval copper alloy spur rowel, a skillet or posnet fragment and lead weights in a multi-period finds assemblage (**1286**) recovered from farmland

650 m north-west of Flordon, immediately east of Flordon Road and partially within the draft Order Limits

- A medieval copper alloy harness mount in a multi-period finds assemblage (**1268**) recovered from farmland 610 m north-north-west of Flordon and partially within the draft Order Limits
- A medieval copper alloy harness mount and harness pendant, three buckles and two strap ends; and a medieval/post medieval spoon, thimble, copper alloy vessel fragment, crotal bell, badge and a hooked dress fastener in a multi-period finds assemblage (**1280**) found 600 m north-west of Flordon and partially within the draft Order Limits
- Three medieval copper alloy buckles and a strap end; and a medieval/post medieval copper alloy thimble, two crotals and a lead weight in a multi period finds assemblage (**1279**) recovered from farmland 800 m north-north-west of Flordon and partially within the draft Order Limits
- A medieval copper alloy buckle, a harness pendant, a strap-end, a harness mount, a purse bar, and a lead weight; and a medieval/post medieval copper alloy hooked book clasp in a multi-period finds assemblage (**1225**) recovered from farmland 930 m north of Flordon and partially within the draft Order Limits
- A medieval lead pot mend and a fragment of undatable copper alloy casting waste (**1300**) recovered from farmland 960 m north-north-west of Flordon and partially within the draft Order Limits
- A medieval copper alloy annular framed brooch, three buckles, a key a strap fitting and a silver coin in a multi-period finds assemblage (**1265**) recovered from farmland 900 m north-west of Flordon, immediately east of Flordon Road and partially within the draft Order Limits
- Two medieval copper alloy buckles and a harness pendant; and a medieval/post medieval copper alloy harness mount and rowel spur and a lead weight in a multi-period assemblage (**1302**) recovered from farmland 600 m north-north-west of Flordon and just clipping the eastern edge of the draft Order Limits
- Seven medieval copper alloy buckles, strap-ends, scabbard chape fragments, dagger pommel fragments, a rotary key, a harness hook, a casket key, a seal matrix, weight, a clapper bell, a book fitting, a silver annular brooch and a lead weight and seal matrix; and a medieval/post medieval copper alloy cloth seal and buckle in a multi-period finds assemblage (**1289**) recovered from land around an unnamed farm 440 m north of The Street, Flordon and immediately east of the draft Order Limits
- Medieval coins including one of silver, a buckle, a finger ring, a harness pendent and a brooch in a multi-period finds assemblage (**1162**) 200 m south of Fundenhall and 20 m west of the draft Order Limits
- A medieval copper alloy buckle and a medieval/post medieval lead mount in a multi-period finds assemblage (**1285**) recovered from farmland 850 m north of Flordon and 30 m east of the draft Order Limits
- A medieval copper alloy finger ring, a strap loop, a thimble, two buckles and strap mounts possibly from a box or casket; and a medieval/post medieval copper alloy button and dress hook in a multi-period finds assemblage (**1273**) recovered from farmland 1.7 km north-east of Fundenhall, immediately west of Wymondham Road and 100 m south-east of the draft Order Limits

- Medieval buckles, a belt mount, hinge plate, horse harness pendant, horse harness bar mount, part of a purse frame decorated with inlaid niello and silver coins in a multi-period finds assemblage (**1131**) recovered from farmland immediately north of Fundenhall Road, 980 m east-south-east of Fundenhall and 130 m east of the draft Order Limits
- Two medieval silver coins (**1202**) recovered from farmland 600 m east of Fundenhall and 140 m west of the draft Order Limits
- A medieval buckle and two tokens in a multi-period find assemblage (**1132**) 500 m south-east of Fundenhall and 180 m west of the draft Order Limits
- A 13th century seal matrix, the Seal of Finn, baron of the King of Norway, a 14th century silver cross shaped pendant and a bet fitting in a multi-period finds assemblage (**1151**) 1 km south-east of Fundenhall and 200 m east of the draft Order Limits
- A copper alloy harness pendant, a leash, z strap end, a strap fitting, a scabbard fitting, pottery sherds and a silver coin; and fragments of a medieval/post medieval cauldron and vessel in a multi-period finds assemblage (**1193**) recovered from farmland on the eastern outskirts of Fundenhall and 210 m north-west of the draft Order Limits
- A medieval silver coin in a multi-period finds assemblage (**1143**) recovered from farmland immediately east of Fundenhall and 220 m north-west of the draft Order Limits
- A medieval horse harness pendant belonging to the family of a Crusader, a seal matrix, coins, a buckle, strap fittings and pottery sherds in a multi-period finds assemblage (**1149**) recovered from farmland 720 m west-south-west of Flordon and 220 m south-east of the draft Order Limits
- A medieval copper alloy dagger scabbard chape, a dagger guard, a horse harness pendant and mount, a buckle, a button, a strap end, and a silver coin; and a medieval/post-medieval copper alloy finger ring and buckle in a multi-period finds assemblage (**1269**) recovered from farmland 240 m north of Flordon and 230 m south-east of the draft Order Limits
- A medieval gilded disc-on-tongue brooch, the terminal of a small spur and a medieval/post medieval eight-pointed spur rowel (**1177**) recovered from farmland immediately south of Fundenhall and 240 m west of the draft Order Limits
- A medieval copper alloy buckle and bar mount in a multi-period finds assemblage (**1288**) recovered from farmland 300 m west of Flordon and 280 m south-east of the draft Order Limits
- A medieval buckle and strap fitting in a multi-period finds assemblage (**1180**) recovered from farmland 1 km north-east of Fundenhall and 290 m north-west of the draft Order Limits
- A medieval buckle and strap fitting of copper alloy and gold, a copper alloy furniture fitting, strap fitting, harness pendant and jetton, a lead seal matrix and two silver coins; a medieval/post medieval copper alloy jetton, a buckle, a leash, a swivel, and pottery sherds in a multi-period finds assemblage (**1251**) recovered from farmland 1.8 km south-west of Flordon and 160 m east of the draft Order Limits

## Forngett St Mary and Tacolneston

### *Designated Heritage Assets*

- 3.2.299 The **high value** Grade I listed 'Church Of All Saints' (**1178820**) is located at the northern extent of Tacolneston at the junction of the B1113 Norwich Road and Hurn Lane and within the Tacolneston conservation area. The asset is of evidential, historical, and aesthetic value. The draft Order Limits lie 830 m to the east-south-east. The fabric of the church is mainly 14th and 15th centuries and there are 15th, 16th and 17th fixtures and fittings. The church is constructed of flint rubble with stone dressings, some brick and it has a pantile roof.
- 3.2.300 The setting of the church is informed by its location within the settlement and its relationship with the Grade II listed 18th century rectory (**1050045**) to the north and the Grade II\* listed 16th to 18th century Old Hall complex to the south (**1373381** and associated Grade II outbuildings). The setting is also informed by the attendant graveyard, which includes the Grade II listed Tacolneston World War I war memorial (**1470006**). The tidy graveyard is defined by mature tree lined hedgerows to the west and north, however, the graveyard is largely open to the road to the south and east. The setting of the church instils a sense of peacefulness whilst the open boundaries visually strengthen its links to the settlement it serves. The church's setting, therefore, makes a considerable contribution to its value, and due to a clear view to the east, the setting of the church extends to the draft Order Limits.
- 3.2.301 The **medium value** Grade II listed '60 and 60a, Norwich Road' (**1373378**) is located on the eastern flank of the Norwich Road, south of the Tacolneston conservation area and 1.2 km west of the draft Order Limits. The asset has evidential and historical value. The asset is a 14th to 15th century hall house with later additions now split into two dwellings. The asset comprises a plastered timber frame structure with a thatched roof and a large brick chimney stack at junction.
- 3.2.302 The setting of the asset is informed by its location within the settlement of Tacolneston and its relationship with a group of five 17th century Grade II listed buildings to the north. The setting is further informed by the agricultural landscape with which the asset has a historical relationship. There has been limited post medieval development encroaching from the south, west and north, but this is generally sympathetic, and so the setting of the asset makes a moderate contribution to its value. The asset has a garden area which is defined to the east by a low hedge allowing for open views towards the Project, but due to the restricted settlement setting of the asset, the setting does not extend to the draft Order Limits.
- 3.2.303 The **high value** Grade II\* listed 'Yew Tree Farmhouse' (**1152706**) is located on the eastern flank of Low Road, at the northern edge of Forngett St Mary and 950 m east of the draft Order Limits. The asset has evidential and historical value. The farmhouse is a Wealden house constructed in the 15th century and comprises a plastered timber frame structure with a steep pantile roof.
- 3.2.304 The setting of the asset is informed by its location within a former farming complex and by its relationship with two Grade II listed 17th/18th barns (**1304630** and **1373220**) to the north. The setting is also informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The asset is situated within mature grounds that instil feelings of privacy and peacefulness and although the farm is no longer working the complex is still legible as former farm buildings. The setting of the farmhouse, therefore, makes a considerable contribution to its value, however, due to mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.305 The **high value** Grade I listed 'Church Of St Mary' (**1304627**) is located 90 m east of Low Road in Forngett St Mary, at the northern end of the Forngett conservation area and 1.1 km east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. It is situated on the western flank of the Tas Valley. The church has 13th century origins but was extensively restored in 1869. It is built of flint rubble with stone dressings and has a plain tile roof.
- 3.2.306 The setting of the church is informed by its location in the linear settlement, its attendant graveyard, and its relationship with the two-post medieval domestic residences to the west, both of which are recorded on the first edition OS map of 1884. The graveyard is defined by mature tree lined hedgerows to the south and west allowing for glimpsed, broken views outwards whilst there are open to the north and east over a low hedge. The setting of the asset, therefore, makes a considerable contribution to its value, however, due to screening topography, mature tree lined boundaries, copses and development, the setting does not extend to the draft Order Limits.
- 3.2.307 The **high value** Grade I listed 'Church Of St Peter' (**1152619**) is located 100 m east of Aslacton Road in Forngett St Peter, at the southern end of the Forngett conservation area and 1.2 km east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church is situated on the western flank of the Tas Valley. The western round tower, other than the Victorian parapet, dates to the 11th century whilst the remainder of the structure largely dates to the 14th and 15th centuries, although it was heavily restored in 1857. The church is built of flint rubble with stone dressings and has a slate roof.
- 3.2.308 The setting of the asset is informed by its location within the settlement, by its large attendant graveyard and by its relationship with the early 18th century rectory and outbuildings to the north-east and the church school built in 1848 to the west. The graveyard is defined by low hedges, timber fencing and iron fencing, and contains several mature trees making for broken views in and out. The setting of the church instils feeling of peacefulness and tranquillity and makes a considerable contribution to the asset's value. Due to screening topography, mature tree lined boundaries and development, however, the setting does not extend to the draft Order Limits.
- 3.2.309 The **high value** Grade I listed 'Church Of All Saints' (**1372999**) is located on the north-eastern flank of Church Road in Wacton and 3 km east-south-east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The western round tower, other than the later brick built recessed top, dates to the 12th century, whilst the remainder of the structure largely dates to the 14th century. It is built of flint and erratic rubble with stone dressings with a slate roof.
- 3.2.310 The setting of the church is informed by its location within the settlement and by its relationship with the former rectory to the north, the former schoolhouse to the west and the Wacton House complex to the south-east; assets that appear on the first edition OS map of 1884. The graveyard boundary is delineated to the north, east and south by a mature tree lined hedgerow, whilst the boundary to the west comprises a low timber fence allowing impressive views of the church from Church Road. The setting of the church instils a sense of peacefulness whilst the open boundary visually strengthens its links to the settlement it serves. The church's setting, therefore, makes a considerable contribution to its value, but due to topography, mature tree lined boundaries, copses, and later development the setting does not extend to the draft Order Limits.

### *Non-Designated Heritage Assets*

- 3.2.311 The **medium value** sites of the deserted medieval/post medieval settlements of Rattongate and Haliards and a multi-period finds assemblage (**1089**) are located 400 m south-south-east of Tacolneston and 10 m north of the draft Order Limits. These settlements are of evidential value, are recorded on a survey plan of 1565, and both are illustrated with streets and houses. Fieldwalking and metal detecting surveys conducted on the site has resulted in a multi-period finds assemblage that includes medieval pottery sherds, a gilt buckle and a strap fitting of evidential value.
- 3.2.312 The Norfolk HER holds a record of a first-hand report made in 1979 of **low value** medieval ridge and furrow cultivation (**1008**) of evidential value in a field 500 m north-north-west of Forncett St Mary and 180 m east of the draft Order Limits that survived until about 1905.
- 3.2.313 The **low value** cropmarks of rectangular enclosures (**1043**) are apparent within Forncett St May, south of Cheney's Lane and 210 m south-south-east of the draft Order Limits. It has been suggested that the cropmarks of evidential value likely represent 15th century structures mentioned in 'old records', although this source is not recorded in the HER.
- 3.2.314 There are surviving **low value** earthworks (**1140**) of evidential value in a field on the northern edge of Forncett St Mary, immediately north of Cheney's Lane and 470 m south-east of the draft Order Limits. The earthworks likely represent **low value** medieval and post medieval clay pits and a hollow way that possibly marks the northern boundary of 'Julion's Green', a green recorded in 1565. Ditched enclosures are likely post medieval in date following the enclosure of the green.
- 3.2.315 Further evidence of medieval activity in the Forncett St Mary and Tacolneston area is represented by **low value** findspots, and artefacts recovered during fieldwalking and metal detector surveys. These assets are of evidential value and comprise:
- A lead medieval Papal bulla of Benedict XII (1334 - 1342), a copper alloy vessel and thimble, and pottery sherds in a multi-period finds assemblage (**1103**) found on land partially within the draft Order Limits immediately south of the deserted medieval/post medieval settlement (**1089**) and 750 m south-south-east of Tacolneston
  - A medieval silver finger ring with empty setting (**1176**) recovered from farmland 1.1 km north-east of Tacolneston and partially within the draft Order Limits
  - A medieval copper alloy buckle, a silver coin and pottery sherds; and a medieval/post medieval jetton in a multi-period finds assemblage (**1263**) recovered from farmland 640 m north-east of Tacolneston and partially within the draft Order Limits
  - Medieval pottery sherds in a multi-period finds assemblage (**1091**) recovered from farmland 990 m south of Tacolneston and partially within the draft Order Limits
  - A medieval copper alloy brooch and six silver coins in a multi-period finds assemblage (**1192**) recovered from farmland 1.1 km north-west of Forncett St Mary and partially within the draft Order Limits
  - A medieval ampulla and a 12th or 13th century heraldic pendant in a multi-period find assemblage (**1137**) recovered from farmland 800 m east of Tacolneston and within the draft Order Limits

- A medieval copper alloy strap fitting in a multi-period finds assemblage (**1119**) recovered from farmland 1 km north-east of Tacolneston and partially within the draft Order Limits
- Medieval coins including two of silver, a silver pilgrim badge, a rivet, a seal matrix, a strap fitting and medieval/post medieval buckle and cauldron fragment in a multi-period finds assemblage (**1175**) recovered from farmland 1.1 km east of Tacolneston, immediately north of Cheney's Lane and partially within the draft Order Limits
- A copper alloy medieval buckle, pottery sherds and a silver coin in a multi-period finds assemblage (**1189**) 970 m south-east of Tacolneston, immediately south of Long Stratton Road and partially within the draft Order Limits
- A medieval strap fitting and a silver coin in a multi-period finds assemblage (**1158**) recovered from farmland 880 m east of Tacolneston and partially within the draft Order Limits. The survey site occupies slightly higher ground overlooking a shallow tributary of the Tas Valley to the north
- A medieval dagger, a lead pot mend, a sword or dagger pommel, a cauldron or pipkin fragment, a ring, strap fittings, buckles, coins including one of silver, a jetton and thimble; a medieval/post medieval copper alloy vessel fragment in a multi-period finds assemblage (**1168**) recovered from farmland 1.3 km north-east of Tacolneston and partially within the draft Order Limits
- Medieval rotary keys, a seal matrix, a thimble, harness mounts, a harness pendant, a writing lead, strap ends and fittings, a book fitting and a silver coin and brooch; medieval/post medieval buckles, buttons, a thimble, and a central swivel loop from a purse frame in a multi-period finds assemblage (**1161**) recovered from farmland 250 m north-west of Fornsett St Mary and partially within the draft Order Limits
- A medieval swivel from a leash, buckles, strap fittings, a dress fastener, coins including one of silver, a harness pendant, pottery sherds; and medieval/post medieval dress accessories copper alloy purse bar, rivet and cauldron fragment in a multi-period finds assemblage (**1155**) recovered from farmland 700 m north of Fornsett St Mary, immediately north-west of High Road and partially within the draft Order Limits
- Medieval pottery sherds in a multi-period finds assemblage (**1093**) recovered from farmland 700 m south-south-east of Tacolneston, immediately south of the deserted medieval/post medieval settlement (**1089**) and partially within the draft Order Limits
- Medieval pottery sherds in a multi-period finds assemblage (**1108**) found on land just clipping the north-western edge of the draft Order Limits immediately east of deserted medieval/post medieval settlement (**1089**) and 800 m south-east of Tacolneston
- A medieval copper alloy brooch, seven buckles, a strap fitting from a box or casket, a hooked tag a strap end and pottery sherds; and a medieval/post medieval copper alloy scabbard chape, buckle, spur rowel and pottery sherds in a multi-period finds assemblage (**1282**) recovered from farmland 150 m west of Fornsett St Mary, immediately east of Stickfer Lane and an access road of the draft Order Limits

- A medieval copper alloy chafing dish fragment and part of a mirror case, buckles, a harness mount, strap ends and fittings; a medieval/post medieval lead weight, coin weight, badge, scabbard chape, buckles, a thimble and chaffing dish handle fragment in a multi-period finds assemblage (**1164**) recovered from farmland on the floor and northern flank of a tributary valley of the Tas 1.5 km north-east of Tacolneston and immediately west of the draft Order Limits
- A copper alloy buckle and furniture fitting and a silver coin in a multi-period finds assemblage (**1170**) recovered from farmland 700 m east of Tacolneston and 60 west of the draft Order Limits
- Medieval coins and two padlocks in a multi-period find assemblage (**1139**) recovered from farmland immediately south of Forncett St Mary and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 150 m to the east
- Medieval pottery sherds in a multi-period finds assemblage (**1107**) recovered from farmland 990 m south-south-west of Forncett St Mary and 170 m east of the draft Order Limits
- A medieval silver finger ring with hexagonal bezel, a copper alloy furniture mount and pottery sherds in a multi-period finds assemblage (**1242**) recovered from farmland 320 m north of Forncett St Mary and 180 m east of the draft Order Limits
- A medieval copper alloy buckle and strap fitting and a silver coin in a multi-period finds assemblage (**1299**) recovered from farmland 760 m south-east of Tacolneston and 190 m north-west of the draft Order Limits
- Sherds of medieval pottery were recovered as part of a multi-period finds assemblage (**1203**) during fieldwalking of farmland 420 m north-west of Forncett Saint Peter and 200 m east of the draft Order Limits
- Three medieval copper alloy buckles, three strap fittings, two strap ends and a medieval/post medieval lead weight in a multi-period finds assemblage (**1283**) recovered from farmland on the western edge of Forncett St Mary, immediately south of Cheney's Lane and 240 m east of the draft Order Limits
- Medieval pottery sherds in a multi-period find assemblage (**1112**) recovered from farmland 1.4 km south-east of Tacolneston and 240 m south-east of the draft Order Limits
- A medieval casket mount, a possible purse swivel loop, a padlock, a dagger, or sword chape, buckles, a fragment of a pewter annular brooch, three silver coins; a medieval/post medieval chest stud and dress accessories in a multi-period assemblage (**1128**) recovered from farmland 1.3 km south-south-west of Forcett St Mary and 270 m south-east of the draft Order Limits
- A copper alloy medieval brooch, buckles, a purse frame fragment, a seal matrix, a strap end, a fragment of a vessel and five silver coins; and a medieval/post medieval copper alloy jetton and a fragment of a pewter vessel in a multi-period finds assemblage (**1194**) recovered from farmland 650 m north-east of Tacolneston and 250 m west of the draft Order Limits
- A medieval copper alloy buckle, two jettons, a seal matrix a pottery; and a medieval/post medieval chafing dish and vessel fragment in a multi-period finds assemblage (**1226**) recovered from farmland immediately north of Forncett St Mary, 90 m north of Cheney's Lane and 320 m east of the draft Order Limits

- A possible medieval pilgrim badge and a mount possibly showing Christ in a multi-period finds assemblage (**1134**) recovered from farmland 840 m east of Tacolneston and 360 m west of the draft Order Limits
- A silver medieval coin and pottery sherds in a multi-period finds assemblage (**1074**) recovered from farmland 400 m east of Tacolneston and 340 m west of the draft Order Limits
- Medieval pottery sherds in a multi-period finds assemblage (**1116**) recovered from farmland 1.1 km south-west of Fornsett St Mary and 400 m east of the draft Order Limits
- Five medieval silver coins in a multi-period finds assemblage (**1173**) recovered from farmland immediately east of Tacolneston and 400 m north-west of the draft Order Limits
- A medieval copper alloy buckle and jetton, six silver coins; and a medieval/post medieval copper alloy thimble and two jettons in a multi-period finds assemblage (**1253**) recovered from farmland 340 m north-east of Tacolneston, immediately east of Norwich Road and 450 m west of the draft Order Limits
- A medieval bell, part of a swivel for a leash, two seal matrixes and copper alloy vessel fragment, a strap fitting, a harness pendant and fittings and a silver coin; and a medieval/post medieval ring, book clasps and a lead spindle whorl or weight in a multi-period finds assemblage (**1187**) recovered from farmland 440 m north-east of Tacolneston and 460 m west of the draft Order Limits. These finds, along with artefacts from the late Iron Age, Roman, Saxon (possibly relating to a cemetery) and post medieval periods indicate that this could be a site of a multi-phase settlement site
- Medieval keys, harness mounts, brooches including a silver annular brooch, finger rings, a lead ampulla, a thimble, a toy, a holder for a lamp or censer, a harness pendant, a seal matrix and scale-tang knife or dagger end-cap; a medieval/post medieval dress accessories, leash swivels, harness mounts, a sword scabbard chape, candlestick fragment, purse bar fragment and a crotal bell in a multi-period finds assemblage (**1145**) recovered from farmland 150 m east of Tacolneston and 600 m west of the draft Order Limits
- Medieval copper alloy harness pendants, a strap fitting, a buckle, a lead seal matrix, a silver coin, pottery sherds; and a medieval/post medieval furniture fitting in a multi-period finds assemblage (**1165**) 300 m north-east of Tacolneston, immediately north of Cheney's Lane and 790 m west of the draft Order Limits. Other time periods are represented in the assemblage (Roman, Saxon and post medieval), suggesting activity from these periods. It is not until the medieval period that the Norfolk HER suggests that there may be a **medium value** settlement site here

## Bunwell Hill and the Tas Valley

### *Designated Heritage Assets*

- 3.2.316 The **high value** Grade I listed 'Church of St Michael' (**1373605**) is located on the northern flank of Old Turnpike, Bunwell and 1.2 km north-west of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church is largely of 15<sup>th</sup> century date and constructed of flint cobbles with stone dressing and some rendering.

- 3.2.317 The setting of the church is informed by its location within the settlement and its attendant graveyard. The graveyard is defined by hedgerows and contains mature trees in the east and south. A small mature copse lies immediately to the south of the church grounds, whilst Bunwell Primary School is immediately to the west. The main school building, though unlabelled, appears to be represented on the first edition OS map of 1884. The setting of the church makes a considerable contribution to its value, however, due to tree cover in the graveyard and the copse to the south and further copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.318 The **high value** Grade I listed 'Church of St Michael' (**1050319**) is located along a public footpath 140 m north of Carr Lane, Great Moulton, and 2.6 km south-east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The tower base, nave and chancel are of Norman date, but the west tower was rebuilt in 1887 and topped with a brick embattled parapet. The church is constructed of flint cobbles with stone dressings and has tiled and lead clad roofs.
- 3.2.319 The setting of the church is informed by its location within the settlement and by its attendant graveyard. The setting is further informed by the church's relationship with the Grade II\* listed 'Old Rectory' 50 m to the south (see post medieval section below). The church yard is defined by mature hedgerows which includes trees to the south and is heavily wooded to the west and north. The first edition map of 1884 records the church and the rectory, with the latter having extensive grounds and outbuildings. Subsequent mapping and 20th satellite imagery indicate that two of the outbuildings now serve as dwellings and that two further detached residential properties have been built with the former grounds of the rectory broken up into garden plots for each of these. The setting of the church makes a moderate contribution to its value but due to the mature tree cover in the graveyard and the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.320 The **high value** Grade I listed 'Church of St Michael' (**1170344**) is located at the junction of Church Road and Steeple Lane, Aslacton and 2.1 km south-east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church has a circular 11th century tower, with a later embattled parapet, and the core of the nave and chancel is also of 11th century date. There has been additions and alterations over the subsequent centuries. The church is built of flint rubble with stone dressings and has led clad and tiled roofs.
- 3.2.321 The setting of the church is informed by its roadside location within the settlement and by its attendant graveyard. The graveyard is defined by a low hedgerow allowing for a clear view of the asset from Church Road to the south, however, the boundaries to the west, north and east are also wooded allowing for glimpsed views in and out. The first edition OS map of 1884 records the church some 150 m north-north-east of the core of Aslacton along The Street, which was focused on and around the Manor House and Street Farm. The church's once isolated location has, however, been eroded during the 20th century as residential development has encroached along The Street, Church Road, Steeple Lane, and Pottergate Street. The setting of the church makes a moderate contribution to its value but due to the mature tree cover in the graveyard and the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.322 The **high value** Grade I listed 'Church of All Saints' (**1305560**) is located at the junction of Church Road and Chapel Road, Carleton Rode, and 1.9 km north-west of

the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church dates to the 13th century and there is evidence of 14th, 15th and 16th century additions and alterations. It is built of partially rendered flint rubble with stone dressings and has led clad, tiled, and slate roofs.

- 3.2.323 The setting of the asset is informed by its roadside location within the dispersed settlement, by its attendant graveyard and by its relationships with Grade II listed assets 'Church Farmhouse' to the west, the 'Old Rectory' to the north, 'Rectory Cottages' to the south-east (see post medieval section below) and the non-designated 19th century schoolhouse and next-door cottage on the southern flank of Church Road. The graveyard is defined by a low flint and brick wall to the south, by an iron railing fence to the west and north and by an iron railing fence and mature trees lining the driveway up the rectory to the east. There has been some small-scale 20th century residential development along Church Road to the south-east and Chapel Road to the west, but this is generally in keeping with the local vernacular and often screened from the church. The setting of the church, therefore, makes a considerable contribution to its value, but due to the mature tree lined driveway of the rectory and the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.324 The **high value** Grade I listed 'Church of All Saints' (**1049992**) is located on the southern flank of Church Road, Tibenham, within the Tibenham conservation area, and 930 m west-northwest of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church has 11th century Norman roots and there is evidence of 13th, 14th, 15th and 17th century additions and alterations. It is built of flint rubble with stone dressings and has led clad and slate roofs.
- 3.2.325 The setting of the church is informed by its roadside location within Tibenham, by its attendant graveyard and by its relationship with the Grade II listed church cottages to the north, Church Farmhouse and associated buildings to the west and Limes Farmhouse to the east (see post medieval section below). The northern boundary of the graveyard is defined by a brick wall fronting on to the church cottage gardens and an evergreen hedge on the northern flank of the cottage gardens. The boundaries to the west, south and east comprise iron railing fences lined with mature trees. The expansion of Tibenham in the 20th and 21st centuries has been limited, and other than some small-scale infill residential development and additions to the Church Farm and Limes Farm complexes, the settlement retains many of the buildings recorded on the first edition OS map of 1884. The setting of the church, therefore, makes a considerable contribution to its value, and due to the open view across farmland to the north-west, the setting extends to the draft Order Limits.
- 3.2.326 The **medium value** Grade II listed asset 'Gower's Farmhouse' (**1373601**) is located on the southern flank of Low Road at the base of the Tas Valley and 820 m south-east of the draft Order Limits. The asset has evidential and historical value. The farmhouse is a 15th to 16th century hall house that was floored in the 17th century. It comprises a plastered timber frame structure with partial pargetting and a thatched roof.
- 3.2.327 The setting of the asset is informed by its roadside location at the base of the Tas Valley and its relationship with the Grade II listed 17th century 'Barn Immediately North-West of Gower's Farmhouse'. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The setting of the asset makes a considerable contribution to its value, but due to the topography of the Tas Valley and tree growth along Low Road and the riverbanks, the setting does not extend to the draft Order Limits.

## ***Non-Designated Heritage Assets***

- 3.2.328 When trees in Bunwell Wood were cleared in the 1950s, reports suggest that a medieval moat was found and filled in (**1003**). The **low value** site is located 1.7 km south-east of the village of Bunwell and 140 m north-west of an access road of the draft Order Limits and of evidential value.
- 3.2.329 The earthworks of a large, rectangular **medium value** medieval moat (**1056**) are preserved within the grounds of the Grade II listed post medieval Baryard's Hall (**1373609**). Surviving sections of the feature survive up to 4 m in width and 3 m in depth. The site is of evidential value and located 2 km south-east of the village of Bunwell and 160 m north-west of the draft Order Limits. Fieldwalking within the grounds of the hall recovered a small assemblage of medieval and post medieval pottery (**1000**) of evidential value.
- 3.2.330 Further evidence of medieval activity of evidential value in the Bunwell Hill and the Tas Valley area is represented by findspots, and artefacts recovered during fieldwalking and metal detector surveys. These assets are of **low value** unless stated otherwise and comprise:
- Two medieval silver coins, a key and a copper alloy seal matrix in a multi-period finds assemblage (**1070**) recovered from farmland south of Prince of Wales Road, 2.2 km south-east of the village of Bunwell and within the draft Order Limits
  - A medieval harness pendant with gilding, a buckle, part of a candlestick, a key, purse frame, a copper alloy vessel fragment, pottery sherds and dress accessories including a strap end with niello cross-hatched inlay in a multi-period finds assemblage (**1062**) recovered from farmland on the Tas Valley floor and its southern flank, 3.3 km south-south-east of the village of Bunwell and partially within the draft Order Limits
  - A late 13th or 14th century copper alloy medieval buckle in a multi-period finds assemblage (**1065**) recovered from farmland 2.8 km south-south-east of the village of Bunwell and within the draft Order Limits
  - A medieval lead conical weight in a multi-period assemblage (**1111**) recovered from farmland 1.8 km south-east of the village of Bunwell within the draft Order Limits
  - A medieval belt hook, buckle plate, a strap fitting, two copper alloy vessel fragments and a purse bar in a multi-period finds assemblage (**1087**) recovered from farmland 160 m east of the Grade II listed Banyard's Hall (**1373609**), 550 m east of Bunwell Hill and partially within the draft Order Limits
  - Medieval coins including two of silver, buckles, a thimble, horse harness pendant, box padlock, an enamelled copper alloy plate, a personal ornament and pottery sherds; and medieval to post medieval dress accessories, a bell, a ring, buckles, a coin weight, copper alloy vessel fragments and lead spindle whorls or weights in multi-period finds assemblage (**1049**) recovered from farmland 3 km south-south-east of the village of Bunwell and partially within draft Order Limits
  - A medieval gilded copper alloy leaf-shaped fragment of a pendant and two pottery sherds in a multi-period finds assemblage (**1156**) recovered from farmland 2.4 km south-east of the village of Bunwell and partially within the draft Order Limits
  - A medieval/post medieval lead weight (**1213**) recovered from farmland 2 km south-south-east of the village of Bunwell and on the western flank of an draft Order Limits access road

- Medieval pottery sherds, a copper alloy buckle, a vessel fragment, a silver coin, and a lead seal matrix in a multi-period finds assemblage (**1188**) recovered from farmland 2.2 km south-south-east of the village of Bunwell, immediately east of Brick Kiln Lane and 20 m west of the draft Order Limits
- Medieval pottery sherds in a multi-period finds assemblage (**1053**) recovered from farmland 2.1 km south-east of the village of Bunwell and 70 m north-west of the draft Order Limits
- A medieval sheet bronze vessel handle escutcheon, buckles, a brooch, a button, a furniture fitting, a harness mount, a harness pendant, a jetton, a spur, a lace tag, a strap fitting, a silver coin, two possible conical lead weights and pottery sherds in a multi-period finds assemblage (**1118**) recovered from farmland on the Tas Valley floor, 3 km south-south-east of the village of Bunwell and partially within the draft Order Limits
- A medieval ferrule, two jettons, pottery sherds, a silver coin, harness pendant, furniture fitting and copper alloy vessel fragment; and medieval/post medieval bell, rowel spur and weights in a multi-period finds assemblage (**1058**) recovered from farmland on the Tas Valley floor, 3.1 km south-south-east of the village of Bunwell and partially within the draft Order Limits
- A scatter of medieval pottery sherds, bone fragments and lava millstone pieces (**1094**) recovered from farmland 2.7 km south-south-east of the village of Bunwell and 180 m west of the draft Order Limits. The asset is located on the southern flank of the Tas Valley, close to the valley floor, and likely represents the location of a medieval building. Two other scatters of medieval finds, (**1090**) and (**1096**), are in the same field a little closer (120 m) to the draft Order Limits, and these assets are also considered to represent the locations of former potentially **medium value** medieval buildings
- Medieval pottery sherds and a copper alloy strap end in a multi-period finds assemblage (**1191**) recovered from farmland 2.9 km south-south-east of the village of Bunwell, on the southern flank of the Tas Valley, close to the valley floor and 140 m west of the draft Order Limits. These assets were recovered just to the south of possible buildings (**1094**), (**1090**) and (**1096**)
- A silver coin of Eric of Pomerania (a part of Poland) minted between 1412 and 1438, a strap fitting and pottery sherds in a multi-period finds assemblage (**1063**) recovered from farmland 1.9 km south-east of the village of Bunwell and 50 m north-west of an draft Order Limits access road
- Medieval pottery sherds (**1044**) recovered from farmland 3 km south of the village of Bunwell, on the southern flank of the Tas Valley and 170 m west of the draft Order Limits
- A medieval strap end, a silver coin, pottery sherds and a medieval/post medieval knife endcap in a multi-period finds assemblage (**1016**) recovered from farmland 3.6 km south of the village of Bunwell and on the southern flank of the Tas Valley 200 m east of the draft Order Limits
- Medieval unglazed pottery sherds in a multi-period finds assemblage (**1099**) recovered from farmland 2.9 km south-south-east of the village of Bunwell on the Tas Valley floor 200 m west of the draft Order Limits
- A medieval copper alloy vessel fragment, a copper alloy buckle with moulded frame and two late Medieval or early post medieval pottery sherds in a multi-

period finds assemblage (**1102** recovered from farmland 1.9 km south-east of the village of Bunwell and 210 m north-west of the draft Order Limits

- Medieval pottery sherds of 13th/15th century including one Grimston ware sherd (**1018**) recovered from a ploughed field 3.8 km south of the village of Bunwell and 220 m west of the draft Order Limits
- Medieval pottery sherds, two buckles, a brooch, and a stirrup in a multi-period assemblage (**1075**) recovered from farmland 2.4 km south-south-east of the village of Bunwell and 220 m west of the draft Order Limits
- A silver longcross cut halfpenny of Henry II (**1060**) recovered from farmland 3 km south of the village of Bunwell, on the southern flank of the Tas Valley and 240 m west of the draft Order Limits
- Medieval pottery sherds in a multi-period finds assemblage (**1052**) recovered from farmland 240 m south-east of the draft Order Limits and 2.6 km south-east of the village of Bunwell
- Medieval pottery sherds, a harness pendant, a copper alloy ring, a spindle whorl, a brooch, a buckle, a purse frame, two silver coins and a thimble; and a medieval/post medieval copper alloy vessel fragment in a multi-period finds assemblage (**1066**) recovered from farmland 2 km south-south-east of the village of Bunwell and 240 m north-west of the draft Order Limits in a field immediately south-east of the junction of Bunwell Hill and The Turnpike
- A medieval key and purse frame, buckles, a silver coin, a lava quern fragment; a medieval/post medieval copper alloy vessel fragments, a weight and dress accessories in a multi-period finds assemblage (**1129**) recovered from farmland 720 m south of the village of Bunwell and 260 m west of the draft Order Limits
- Copper alloy medieval dress accessories, part of a candlestick, a strap fitting, a vessel fragment, a harness fitting; a lead ampulla and weight; a silver brooch and coin; pottery sherds, and a medieval/post medieval lead spindle whorl in a multi-period finds assemblage (**1104**) recovered from farmland 3.2 km south-east of the village of Bunwell and 420 m south-east of the draft Order Limits

## Winfarthing and Shelfanger

### *Designated Heritage Assets*

- 3.2.331 The **high value** Grade I listed 'Church of St Mary' (**1180035**) is located immediately east of the junction of The Street and Church Lane, at the head of a shallow valley within the Winfarthing conservation area, 460 m north-west of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church is largely of 14th century date but with evidence of later maintenance and alterations. It is built of flint rubble with stone dressings and has a lead clad and slate roof.
- 3.2.332 The setting of the church is informed by its location within the settlement, by its attendant graveyard and by its relationship with the Grade II listed Old Rectory and Church Place on the norther flank of Church Lane. The setting is further informed by the agricultural landscape to the south and east with which the asset has a historical relationship. The graveyard contains scattered trees and is largely defined by a mature tree lined hedgerow, although there is an open view to the east towards the draft Order Limits. The setting of the church makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.

- 3.2.333 The **high value** Grade I listed 'Church of St Mary' (**1152891**) is in the parish of Gissing, east of Lower Street within the Gissing conservation area and 2.9 km east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The round west tower and the nave of the church probably date to the late 11th century and are likely Norman. A chancel and north and south chapels were added in the 13th century whilst the north porch and nave roof are 15th century. The church is constructed of flint rubble with stone dressings and a tile roof.
- 3.2.334 The setting of the church is informed by its location within the settlement, by its attendant graveyard, by its relationships with the Grade II listed WWI/WWII war memorial in the graveyard, the 17th century Grade II listed Crown Public House and early 19th century Crown Cottage to the north, the 18th century Grade II listed 52, 53 and 54 Lower Street to the north-west and the non-designated 19th century school to the north-east. Minor residential development in the mid to later 20th encroached on the asset from the west and south but this is largely screen from the asset by mature tree lined hedgerows. The setting of the asset, therefore, makes a considerable contribution to its value, but due to development and mature hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.335 The **high value** Grade II\* listed 'Church of St Mary' (**1305672**) is in the parish of Burston and Shimpling, north-west of the junction of Diss Road and Crown Cottages in Burston conservation area and 1.9 km east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church largely dates to the 15th century with replacement windows in the nave. The western tower collapsed in 1753 and the west wall of the nave is now supported by a large red brick buttress. The church is built of flint cobbles with stone dressings and slate and tile roofs.
- 3.2.336 The setting of the asset is informed by its location within the settlement, its attendant graveyard and by its relationship with the Grade II listed asset the 17th century Crown Public House to the north-east, the 17th/18th century Red House to the north and the early 20th century Strike School to the south-west. Twentieth century residential development has encroached on the church from all sides and the low boundary hedge with scattered trees of the graveyard allows for views to and from the asset. The setting of the church, therefore, makes a moderated contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.337 The **high value** Grade I listed Church of All Saints (**1373360**) is in the parish of Shelfanger, south-east of the junction of Church Road and Church Walk, Shelfanger and 960 m west of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The church has a 14th century tower, chancel and nave, a 15th century timber frame porch with flint infill and a 19th century chancel roof. The church is built of flint with stone dressings and slate roofs.
- 3.2.338 The setting of the church is informed by its location within the settlement, its attendant graveyard and by its relationship with the Grade II listed 19th century Church Farmhouse and its associated non-designated outbuildings immediately to the west. The 20th century residential development of Shelfanger has encroached upon the church from the north and is visible from the church grounds. The setting of the asset, therefore, makes a moderate contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.

### *Non-designated Heritage Assets*

- 3.2.339 The site of Winfarthing Great Park (**1064**), a former deer park of evidential value owned by the Earl of Arundel and recorded as being 'full of deer' in 1604, is located 180 m east of Winfarthing and covering a large area of land that includes a 1.8 km long section of the draft Order Limits. The limits of the **low value** park are suggested by field boundaries recorded on first edition Ordnance Survey mapping.
- 3.2.340 Cropmarks of a medieval **low value** strip field system (**1072**) of evidential value are in farmland 1.8 km north-north-east of Winfarthing, immediately north of Long Row and partially within the draft Order Limits.
- 3.2.341 A **medium value** medieval moat and post medieval farmhouse (**1305**) of evidential value is recorded on the first edition OS map of 1884 1.4 km north-east of Winfarthing and partially within the draft Order Limits. The moat has been partially backfilled and associated earthworks noted on an aerial photograph of 1977 have been ploughed out.
- 3.2.342 A **medium value** moat (**1024**) of evidential value is recorded on a Tithe map of 1832 and the 1953 6in Ordnance Survey map 700 m east of Shelfanger and partially within the draft Order Limits. The moat has now been partially infilled. The site fieldwalked in 1991 and this work recovered a variety of medieval pottery sherds from glazed and unglazed wares. The exact date of the moat has not been determined but is probably either medieval or early post medieval in date.
- 3.2.343 A **low value** medieval moat, or possible pond (**1012**) of evidential value, is recorded on 19th century OS mapping on the eastern flank of a dairy farm immediately east of Heywood Road, 1.3 km south-west of Shelfanger and 30 m south-east of the draft Order Limits. The HER records that the farmhouse may be of 16th century date and that medieval pottery has been recovered from the site.
- 3.2.344 A possible **low value** medieval moat of evidential value, visible as an earthwork on aerial photographs (**1026**), is located at Willow Farm immediately west of Heywood Road, 1.5 km north-east of Shelfanger and 210 m east of the draft Order Limits.
- 3.2.345 The earthworks of **medium value** ridge and furrow and a moat with outworks (**1032**) of evidential value is recorded on 20th century aerial photographs immediately north of Long Row, 2.5 km north-north-east of Winfarthing and 180 m east of the draft Order Limits. The HER suggests these features may be of medieval date and the moated enclosure may represent a medieval manorial site. The Enclosure Award Map of 1820 shows a moat, possibly associated with the manor of West Hall. Ploughing in 1984 destroyed the ridge and furrow. The Grade II listed post medieval Tibenham Farmhouse (**1179474**) is located 90 m west of (**1032**) and the farmyard complex (**1314**) includes the remains of another moat of evidential value likely of medieval date.
- 3.2.346 The **medium value** earthwork remains of a medieval moat and pond (**1027**) of evidential value survive on Oakmeadow Farm immediately east of Heywood Road, 1.4 km east-northeast of Shelfanger and 100 m south-west of the draft Order Limits.
- 3.2.347 The **medium value** earthwork remains of a medieval moated site with associated post medieval farm buildings (**1028**) of evidential value are located immediately east of Heywood Road, 1.5 km south-east of Shelfanger and 280 m north-east of the draft Order Limits.
- 3.2.348 The **low value** soil mark of a square enclosure (**1004**) of evidential value can be seen on aerial photographs within a field 310 m east of Forncett Road, 3.1 km east-

south-east of the village of Bunwell and 310 m south-east of the draft Order Limits. The asset likely represents the remains of a medieval moat.

3.2.349 Cartographic and documentary evidence of evidential value indicates the presence of a **low value** park (**1153**) located 500 m north of Winfarthing and 440 m south-west of the draft Order Limits. The illustrated asset is thought to have contained Winfarthing Manor.

3.2.350 Further evidence of medieval activity in the Winfarthing and Shelfanger area is represented by **low value** findspots, and artefacts of evidential value recovered during fieldwalking and metal detector surveys. These assets comprise:

- A medieval/post medieval copper alloy button in a multi-period finds assemblage (**1291**) recovered from farmland 700 m north-east of Shelfanger, immediately south of Heywood Road and partially within the draft Order Limits
- A medieval buckle and a silver coin in a multi-period finds assemblage (**1246**) and a twisted late medieval/transitional period pottery handle (**1085**) recovered from farmland 400 m north-east of Shelfanger and just clipping the western edge of the draft Order Limits
- A medieval/post medieval copper alloy buckle in a multi-period finds assemblage (**1298**) recovered from farmland 120 m east of Winfarthing and on the western flank of the draft Order Limits
- A medieval copper alloy buckle and a silver coin, and a medieval/post medieval copper alloy dress hook and stud (**1141**) recovered from farmland 1.1 km north-east of Shelfanger and on the eastern flank of the draft Order Limits
- A copper alloy medieval cauldron fragment, a brooch pin and a buckle in a large, multi-period finds assemblage (**1190**) recovered from farmland 110 m west of the draft Order Limits and 620 m north-east Shelfanger
- Four unglazed medieval body sherds of 13th to 14th century date (**1077**) recovered from farmland 1 km east of Shelfanger and 110 m east of the draft Order Limits
- A sherd of medieval glazed Grimston ware and a sherd medieval/post medieval transitional ware (**1207**) recovered from farmland 1.2 km north of Winfarthing and 120 m south of the draft Order Limits
- Three sherds of late medieval or early post medieval pottery (**1080**) recovered from farmland 950 m east of Winfarthing and 130 m north-east of the draft Order Limits
- A medieval silver coin (**1023**) recovered from farmland 760 m south of Shelfanger and 150 m west of the draft Order Limits
- A medieval copper alloy buckle, two silver coins, and medieval/post medieval copper alloy coin weight, crotal bell and vessel fragment and a lead cloth seal in a multi-period finds assemblage (**1284**) recovered from farmland 2.2 km north-north-east of Winfarthing and 150 m east of the draft Order Limits
- A sherd of medieval pottery comprising a jug rim and handle stub (**1076**) recovered from farmland 940 m east of Shelfanger and 150 m east of the draft Order Limits
- A medieval silver coin (**1038**) recovered from farmland 1.4 km north-east of Shelfanger and 170 m north-north-east of a draft Order Limits access road

- A sherd of medieval pottery comprising a fragment of the neck and handle of a Grimston green glazed jug (**1079**) recovered from farmland 1.2 km east-northeast of Shelfanger and 210 m east of the draft Order Limits
- Three body sherds of unglazed pottery and one Grimston green glazed base sherd of 13th to 14th century date (**1081**) recovered from farmland 1 km south-east of Winfarthing and 230 m east of the draft Order Limits
- A medieval silver coin in a multi-period finds assemblage (**1034**) recovered from farmland at the southern limit of Winfarthing, immediately north of Heywood Road and 240 m west of the draft Order Limits
- A 12th to 13th century medieval lead circular seal matrix and a copper alloy cauldron foot (**1126**) recovered from farmland 1.2 km east-north-east and 240 m east of the draft Order Limits
- A medieval silver coin in a multi-period finds assemblage (**1206**) recovered from farmland 560 m south-south-east of Winfarthing, immediately south of Heywood Road and 250 m west of the draft Order Limits
- Two medieval copper alloy buckles, a silver coin, and a fragment of a lead architectural mount; and a medieval/post medieval copper alloy thimble, knife guard, buckle and dress hook in a multi-period finds assemblage (**1292**) recovered from farmland on the eastern flank of Winfarthing and 300 m west of the draft Order Limits
- A dense scatter of 13th and 14th century medieval pottery with a little dating to the 15th and 16th centuries (**1050**) recovered from farmland 1.2 km south-east of Winfarthing and 300 m north-east of a draft Order Limits access road

## Bressingham and the Waveney Valley

### *Designated Heritage Assets*

- 3.2.351 The **high value** Grade I listed 'Church of St Andrew' (**1049662**) is in Firsfield in the parish of Bressingham, east of The Street and 3 km north-west of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The core of the church dates to c. 1300, but most of the surviving structure dates to the 15th century. The church is built of flint rubble with stone dressings and has lead clad and tile roofs.
- 3.2.352 The setting of the asset is informed by its location within the settlement, its attendant graveyard and by its relationship with the Grade II listed 17th century Rectory to the north-west and Hall Cottages to the south-east and the Grade II listed 20th century war memorial in the graveyard to the north. The graveyard and grounds of the adjacent Hall Cottages contain scatter trees and are largely defined by mature tree lined hedgerows affording the asset privacy and seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the tree cover in the graveyard and development, further tree cover and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.353 The **high value** Grade I listed 'Church of St John The Baptist' (**1373587**) is in the parish of Bressingham, south of the A1066, east of Church Lane and 1.4 km west of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The fabric of the church is mainly late 13th century in date, but the church was refashioned in the early 16th century including the addition of a hammerbeam roof. The church is built of partially rendered flint rubble with stone dressings and lead clad and slate roofs.

- 3.2.354 The setting of the church is informed by its location within the settlement, its attendant graveyard and by its relationships with the Grade II listed 17th century assets Ye Olde Cheques, Parish Cottages, and Old Hall Farmhouse to the north-west, Church Farmhouse to the south-west and the Grade II listed 19th century Bressingham Lodge and associated stables and cart sheds to the east. Mature tree cover in the graveyard particularly to the south and east limits views out of the grounds affording the asset some seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the tree cover in the graveyard and development, further tree cover and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.355 The **high value** Grade I listed 'Church of St Remigius' (**1050237**) is in the parish of Roydon, on the south-west edge of Roydon, south of High Road and 260 m north of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The asset has a 12th century Norman nave, and round tower, a 13th/14th century chancel and a 13th century south aisle rebuilt in 1864. The south porch was added 1840 and further alterations were made in the Victorian period.
- 3.2.356 The setting of the church is informed by its association with its own graveyard and its location on the northern edge of the Waveney Valley with views over the valley to the south. Cartographic evidence indicates that the asset, for much of its history, was set within a rural landscape with Roydon Hall (**1373311**) to the north-west, dispersed farmsteads and a complex of moated sites and a manor house to the east-northeast. The moated and manor house sites have now been lost to the development of the modern town of Roydon in the latter half of the 20th century and the outskirts of the town now encroaches on the church to the north and east. The setting of the asset, therefore, makes a moderate contribution to its value, but due to open views to the south and south-west from the asset, the setting extends to the draft Order Limits.
- 3.2.357 The **medium value** Grade II listed medieval 'Roydon Hall' (**1373311**) is in the parish of Roydon, north of High Road, on the western outskirts of Roydon and 250 m east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The core of the asset is a three-storey red brick mansion built in the 13th century, which has been altered and added to in the centuries since, particularly in the 18th century.
- 3.2.358 The setting of the asset is informed by its location within its wooded and landscaped grounds. The grounds include paths and water bodies and are likely of post medieval origins. Its environs also include two east/west aligned post medieval building ranges apparent on the first edition OS map of 1884 and an 18th century coach house. The wooded grounds and attendant structures afford the asset enclosure and privacy, and so the setting of the asset makes a considerable contribution to its value. The mature grounds largely screen the asset from the draft Order Limits and so the setting of the asset does not extend to the draft Order Limits.
- 3.2.359 The **high value** Grade I listed 'Church of St Mary' (**1049757**) is in the Diss conservation area, immediately north-east of the junction of Market Place and Church Street and 2.1 km east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The parish church largely dates to the 14th and 15th centuries with evidence of maintenance in the subsequent centuries. It is built of flint rubble with stone dressings and a slate roof.
- 3.2.360 The setting of the asset is informed by its dominant, central location in the historic core of Diss, by its attendant graveyard and by its relationship with numerous historic listed buildings largely arranged on the fossilised medieval street plan of Market Place, Market Hill, Church Street, Mount Street and St Nicholas Street. Later development is largely sympathetic to the local vernacular comprising two of three

storey buildings of red brick or more commonly plastered and colour washed construction. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its urban location screening the asset from the Project, the setting does not extend to the draft Order Limits.

- 3.2.361 The **high value** Grade I listed 'Church of St Andrew, Frenze' (**1050244**) is in parish of Scole, 800 m along an un-named single-track lane from Dark Lane in the south, approximately 600 m east of the eastern outskirts of Diss and 2.8 km south-east of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The asset dates to the early 14th century and has a 16th century brick built south porch. It is built of flint rubble with stone dressings and a tile roof.
- 3.2.362 The setting of the church is informed by its rural location, its attendant graveyard, and its relationship with the Grade II listed 17th century Frenze Hall immediately to the west. The graveyard is defined to the north, east and south is defined by a high evergreen hedge whilst the western side is open to the hall. The southern boundary screens the view to a largely derelict farming complex beyond. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the mature tree lined grounds of the hall, the setting does not extend to the draft Order Limits.
- 3.2.363 The **medium value** Grade II listed 'By The Potash' (**1154367**) is located on the southern flank of Potash Fen, 270 m south-west of the A1066 and 460 m north-east of the draft Order Limits. The asset is of evidential and historical value, dates to the 13th century and comprises a plastered timber frame cottage with a steep pantile roof.
- 3.2.364 The setting of the asset is informed by its roadside village location and by its relationship with the residential dwelling and farm buildings immediately to the west, some of which are recorded on the first edition OS map of 1884. The setting is further informed by agricultural land to the south and west with which the asset has a historical relationship. The modest grounds of the asset contain numerous trees and are defined by mature tree lined hedgerows, which screen the asset from 20th century residential development to the north, affording the asset some privacy. The setting of the asset makes a considerable contribution to its value, but due to screening by its mature grounds, the dwelling and farm buildings to the west and mature tree lined boundaries and hedgerows in the intervening landscape, it does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.365 Roydon Hall, located north of High Road, on the western outskirts of Roydon and 250 m east of the draft Order Limits, is also associated with the remains of a **medium value** moat (**1015**) of evidential value. The north and east arms of the moat survive, although they are gradually filling in. The north arm is partly used as a swimming pool. This moat is not connected to the present Roydon Hall, Grade II listed (1373311) but to a previous, non-extant Hall.
- 3.2.366 The **medium value** moated site of a former medieval house (**1013**) of evidential value is located in the Waveney Valley, to the north of the river, 1.1 km south-south-east of Bressingham and partially within the draft Order Limits. Excavations on the site in 1942 recovered medieval pottery fragments and a piece of a Roman pottery beaker. Oral evidence alleges that an ancient boat was found in the 19th century and that the timbers destroyed, and decorative bronze work sold. The northern part of the moats remains in good condition, but the southern portion was infilled in the 1960s.

- 3.2.367 A complex of two **medium value** medieval moats (**1014**) of evidential value is recorded on the first edition OS map of 1884 immediately north-west of the junction of Bressingham Road and Darrow Lane, 3.5 km east of Bressingham and 60 m east of the draft Order Limits. The site has been developed over the 20th century and now just the north and east arms of the southern moat remain, whilst only the western arm of the northern moat remains.
- 3.2.368 Further evidence of medieval activity of evidential value in the Bressingham and the Waveney Valley area is represented by findspots, and artefacts recovered during fieldwalking and metal detector surveys. These assets **low value** comprise:
- A late Saxon/medieval copper alloy harness fitting and a medieval coin in a multi-period finds assemblage (**1294**) recovered from farmland 1.1 km east of Bressingham and partially within an access road of the draft Order Limits
  - A medieval buckle and a medieval/post medieval buckle and lead weight in a multi-period finds assemblage (**1159**) 2.1 km east of Bressingham and partially within an access road of the draft Order Limits
  - A dispersed hoard of 14 medieval silver coins, two early post medieval silver coins and a copper alloy coin weight in a multi-period finds assemblage (**1252**) recovered from farmland 250 m east of Bressingham and partially within the draft Order Limits
  - A medieval copper alloy strap end and a silver coin in a multi-period finds assemblage (**1293**) recovered from farmland 400 m east of Bressingham and partially within the draft Order Limits
  - Three medieval silver coins in a multi-period finds assemblage (**1025**) recovered from farmland 570 m north-east of Bressingham and partially within the draft Order Limits
  - A medieval key in a multi-period finds assemblage (**1335**) recovered from farmland on the northern bank of the river Waveney c. 600 m south-west of the outskirts of Diss and partially within the Order Limits
  - A copper alloy medieval buckle and pottery sherds in a multi-period finds assemblage (**1109**) recovered from farmland 1.3 km south-east of Bressingham on the northern flank of the Waveney Valley and 10 m north of the draft Order Limits
  - A medieval buckle, a strap fitting, a lead ampulla, a silver coin and a medieval/post medieval copper alloy vessel fragment and purse frame in a multi-period finds assemblage (**1179**) recovered from farmland 870 m south-east of Bressingham and partially within the draft Order Limits
  - Fragments of a medieval copper alloy vessel, of the base of candlestick and of a bell (**1105**) recovered from farmland 1.2 km south-south-east of Bressingham and within the draft Order Limits
  - Three medieval silver coins in a multi-period finds assemblage (**1301**) recovered from farmland 480 m north-east of Bressingham and adjacent to an access road of the draft Order Limits
  - A medieval enamelled buckle plate, possibly a product of Limoges, France, two buckles and a silver coin in as multi-period finds assemblage (**1204**) recovered from farmland 2.3 km east of Bressingham, immediately south of a southern spur of the draft Order Limits and east of Shelfanger Road

- Four medieval silver coins in a multi-period finds assemblage (**1224**) recovered from farmland 760 m east of Bressingham and 150 m north of the draft Order Limits
- Three medieval silver coins in a multi-period finds assemblage (**1205**) recovered from farmland 2.5 km east of Bressingham and 170 m east of the draft Order Limits
- Two medieval silver coins (**1157**) recovered from farmland 500 m south-east of Bressingham, immediately north of Baynard's Lane and 210 m south-east of the draft Order Limits
- Seven medieval pottery sherds including a base fragment of a saggy based jar in a multi-period finds assemblage (**1036**) recovered from within Bressingham, 50 m west of Common Road and 250 m west of the draft Order Limits
- Sherds of medieval/post medieval pottery sherds in multi-period finds assemblage (**111**) recovered during gardening and metal detecting in the grounds of the Grade II listed Gringle Cottage (**NHL1154386**). The cottage is in Roydon, 690 m east of Bressingham and 250 m south-east of the draft Order Limits
- Medieval pottery fragments and a medieval seal in a multi-period finds assemblage (**1041**) recovered from farmland close to the southern extent of Section A, immediately north-west of Bressingham and 250 m west of the draft Order Limits. The survey area is on higher land with the Waveney Valley 500 m to the south
- A medieval/post medieval copper alloy spoon (**1135**) found in a garden area of Darrow Farm 1.4 km north-east of Bressingham and 260 m west of the draft Order Limits

## Post Medieval

- 3.2.369 The post medieval period within Section 1 of the Project is characterised by the introduction of large-scale infrastructure, principally for transport, communication, and drainage, alongside the continued agricultural development and management of the landscape. The post medieval assets comprise registered parks and gardens, listed buildings, conservation areas, non-designated buildings, excavated archaeological features and finds derived from metal detector and walkover surveys.

### Dunston and Mangreen Hall Farm

#### *Designated Heritage Assets*

- 3.2.370 The **high value** Grade II\* listed 'Intwood Hall' Registered Park and Garden (**1000320**) is located adjacent to the medieval Grade II\* listed Church of All Saint (**1373136**) and 2.2 km north-west of the draft Order Limits. These assets are of evidential, historical, and aesthetic value. The parkland contains the non-designated Intwood Hall and its Grade II listed associated assets 'Garden Walls, Gazebo and Urn to North and North-West of Intwood Hall' (**1373137**), 'Gazebo Circa 60 Metres East of Intwood Hall' (**1306353**) and 'Lodge to Intwood Hall Circa 100 Metres North of Church of All Saints' (**1050543**). These assets are of evidential and historical value. Gardens surround Intwood Hall and comprise five walled garden compartments built of red brick with partly crenelated tops, constructed over four centuries from the mid-16th century onwards. The garden includes the listed assets (**1373137**) and (**1306353**) noted above. A walled kitchen garden lies to the west of the Hall defined by high red-brick walls to the north and east, a high flint wall to the

west, and a low flint wall to the south. Glasshouses of 19th century date survive on the north wall, together with one early 20th century glasshouse. A 20th century Orangery also lies to the west of the hall. This is bordered on the south side by a low brick wall which runs west to connect to walled kitchen garden enclosures. The south facing façade of the hall leads onto a small terrace with steps down to a lawn bordered to the south by a ha-ha overlooking the park. Intwood Park is small, laid mainly to pasture and scattered with trees of mixed ages and species.

- 3.2.371 The setting of the registered park and garden is informed by the interrelationships of the assets described above and views between the built assets and from the park back to the buildings and gardens. The setting of the registered park and garden makes a considerable contribution to its value. There are limited views to the south across the Tas Valley interrupted by mature trees and hedgerows and it is possible the tops of pylons might be visible on the horizon. Tree plantation along the south-eastern edge of the parkland, however, illustrate that the view is not considered key and so the setting of the asset does not extend to the draft Order Limits.
- 3.2.372 The following listed buildings are in the parish Caistor St. Edmund and Bixley:
- 3.2.373 There is a dispersed group of six post medieval listed buildings in the Markshall/ Caistor St Edmunds area comprising one Grade II\* asset and five Grade II assets. The northernmost asset is the Grade II listed **medium value** 'Markshall Farmhouse at TG233 042' (**1050560**), 330 m north of Caistor St Edmunds and 1.7 km north-east of the northern extent of the draft Order Limits. The asset is of evidential and historical value. The farmhouse was built in c. 1730 for a member of the Pettus family, in colour washed brick, pantiles and black glazed pantiles. The structure has two storeys and a hipped roof. There is a wooded garden to the west of the asset and further farm buildings to the east and north-east, which are apparent on the OS first edition of 1885. There are two large, 21st century sheds immediately north of the farmhouse garden.
- 3.2.374 The setting of the asset is informed by its location in the Tas Valley with the river 60 m to the south; the attendant farmyard and garden area and the surrounding rural landscape with which it has a historic and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to topography and intervening development and vegetation, the setting does not extend to the draft Order Limits.
- 3.2.375 The **medium value** Grade II listed 'Old Rectory' (**1050561**) is located at the northern edge of Caistor St Edmunds on the south-eastern flank of Stoke Road 1.8 km north-east of the northern extent of the draft Order Limits. The asset is of evidential and historical value. The house is a former parsonage and was built in the late 19th century with additions in the early 19th century. It is built in red brick with hipped roofs of black unglazed pantiles and slate. A single storey porch with a hipped roof of black glazed pantiles was added in the early 20th century.
- 3.2.376 The setting of the asset is informed by its location within its own grounds and gardens and with attendant structures in the complex apparent on the first edition OS map of 1885. The asset's grounds has wooded boundaries as well as mature trees within creating a sense of enclosure and seclusion. The setting of the asset makes a considerable contribution to its value, but due to intervening development and vegetation, the setting does not extend to the draft Order Limits.
- 3.2.377 The **medium value** Grade II listed 'Queen Anne Cottage' (**1050559**) is located 190 m south of the 'Old Rectory' (**1050561**), on the northern flank of Caistor Lane and 1.7 km north-east of the northern extent of the draft Order Limits. The asset is of

evidential and historical value. The house was built in 1729 for a member of the Cogman family. It is built of red brick with a roof of renewed plain tiles.

- 3.2.378 The setting of the asset is informed by its location within Caistor St Edmunds and its relationship with the other domestic dwellings within the settlement. Mature tree growth within the asset's grounds and the settlement at large creates a sense of enclosure and tranquillity. The setting of the asset, therefore, makes a considerable contribution to its value, but due to intervening development and vegetation, the setting does not extend to the draft Order Limits.
- 3.2.379 The **medium value** Grade II listed 'Caistor Hall' (**1050562**) is located 150 m west-south-west of 'Queen Anne Cottage' (**1050559**) at the heart of the settlement and 1.5 km north-east of the northern extent of the draft Order Limits. The asset is of evidential and historical value. The house was built between 1795 and 1797 by the Dashwood family following the acquisition of the land by the family through marriage in 1793. The house replaced an earlier manor previously owned by the Godslave and Pettus families following the Dissolution. The two-storey gault brick-built structure has a black glazed pantile roof and now serves as a hotel and country club.
- 3.2.380 The setting of the asset is informed by its location at the heart Caistor St Edmunds and its relationship with the other built elements of the settlement. The asset is set within its own considerable grounds, and although the modern car park to the north of the hall is a detraction, they are still well maintained and create a sense of exclusivity and status. The grounds contain numerous mature trees that, despite the grandeur of the hall, create a sense of enclosure and privacy. The hall is located 270 m north-east of Venta Icenorum (**1021463**) and its grounds contain elements the scheduled monument 'Roman sites outside town walls' (**1003954**) that, based on cartographic evidence, likely served as curios to be admired within the grounds. The setting of the asset, therefore, makes a considerable contribution to its value, but due to intervening development and vegetation it does not extend to the draft Order Limits.
- 3.2.381 The **high value** Grade II\* listed 'Old Hall' (**1050563**) is located 240 m west of 'Caistor Hall' (**1050562**) on the western periphery of the settlement and 1.4 km north-east of the northern extent of the draft Order Limits. The asset is of evidential, historical, and aesthetic value. The hall was built in 1612 for Thomas Pettus of uncoursed broken flint with brick dressings with a black glazed pantile roof. There is evidence of maintenance and minor additions in the centuries since, but many 17th century fixtures and fittings remain. The Hall is situated within a farming complex largely apparent on the first edition OS map of 1885, which includes a **medium value** Grade II listed Barn (**1241166**) of evidential and historical value. Once a dovecote, the Barn (**1241166**) was built in the 17th and early 19th centuries. The north-western half of building is in 17th century English Bond brickwork, but the south-eastern wall of the square plan dovecote was demolished when the structure was extended in the early 19th century. The south-eastern extension is brick-built, and the roof is a 19th century butt-purlin roof with pantiles.
- 3.2.382 The setting of the hall and barn is informed by their location within the extended farming complex and by the intervisibility with each other and the other elements of the farm. Their setting also includes the Tas Valley to the west through to the north and the agricultural landscape with which they have historic and functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, but due to topography and intervening development and vegetation, the setting does not extend to the draft Order Limits.
- 3.2.383 The following listed buildings are in the parish of Swardeston:

- 3.2.384 The **medium value** Grade II listed 'Wattle Cottage at TG 2130 0308 c. 230 m West-North-West of Mangreen Hall' (**1050519**) is located at the intersection of Mangreen and Mangreen Lane, c. 500 m north-west of the draft Order Limits. The asset is of evidential and historical value. Wattle Cottage was built in the early 16th century and has 18th and 19th century additions. The asset has a timber frame and brick structure that has been rendered and colour washed. It has a pantile roof.
- 3.2.385 The setting of Wattle Cottage is informed by its roadside location and by its intervisibility with two late 19th to early 20th century residential properties to the north c. 60 m to the north on the western flank of Mangreen. The grounds of the cottage contain mature trees and both Mangreen and Mangreen Lane are tree lined creating a sense of enclosure and seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the mature tree growth, topography, and further tree growth around the Mangreen Hall/Farm complex (see below) c. 200 m to the south-east, the setting does not extend to the draft Order Limits.
- 3.2.386 The **high value** Grade II\* listed 'Mangreen Hall' (**1366150**) and the **medium value** Grade II listed 'Mangreen Lodge c.50 m East of Mangreen Hall' (**1050518**) are located north of Mangreen with the **medium value** 'Barn at Hall Farm with Attached Cattle Shelters' (**1170403**) to the south of the thoroughfare, centred c. 270 m north of an draft Order Limits access road c. 230 m north of the National Grid Norwich Main Substation.
- 3.2.387 Mangreen Hall (**1366150**) has a façade-built c. 1700 in Flemish Bond bricks with coloured headers and a plain tile roof. The asset is of evidential and historical value. The asset has 18th century features and additions were made c. 1910. Mangreen Hall now functions as a country retreat and wedding venue (Mangreen Country House) and is maintained by the Mangreen Trust. Mangreen Lodge (**1050518**) is located c. 45 m east-south-east of the Hall and originally functioned as the Hall stables. The asset is of evidential and historical value. The lodge was built c. 1700 of Flemish Bond bricks and has a pantile roof. The Lodge now serves as two domestic dwellings. The assets are located within the Hall's ground, which also contain numerous mature trees.
- 3.2.388 The settings of Mangreen Hall and Mangreen Lodge are informed by their location within the Hall's grounds, their intervisibility and their relationships with further, likely late 19th to early 20th century, outbuildings within the grounds. The mature trees within the hall grounds create a sense of seclusion and tranquillity and block all views to the south and the northern limits of the draft Order Limits. This setting, therefore, makes a considerable contribution to the values of the assets, but due to mature tree cover in the Hall grounds, a mature copse associated with Mangreen Hall Farm and intervening tree lined field boundaries, it does not extend to the draft Order Limits.
- 3.2.389 The listed asset (**1170403**) to the south of Mangreen comprises a large north/south aligned barn with four continuous attached covered cattle shelters to the east. The asset is of evidential and historical value. The brick-built barn was constructed c. 1800 with the brick-built cattle shelters added in the mid-19th century. The barn and shelters all have pantile roofs and the shelters have now been converted into domestic dwellings. The asset is located within the Hall Farm complex with the farmhouse, which is apparent on the first edition OS map of 1882, to the east and 20th century barns and outbuilding to the west. A mature copse is located 50 m to the south-east of the asset.
- 3.2.390 The setting of the barn and cattle shelters is informed by their relationship and by their place within the wider farming complex, and although the function of the asset has changed it is still legible as an element of a larger farming complex. The setting

of the asset, therefore, makes a moderate contribution to its value, but due to 20th century farmyard development and the mature copse to the south-east, the setting does not extend to the draft Order Limits.

- 3.2.391 The **high value** Grade II\* listed 'Gowthorpe Manor House' (**1050515**) and the associated **high value** Grade II\* listed 'Barn c.40 m West of Gowthorpe Manor House' (**1366141**), **medium value** Grade II listed 'Cowshed c.10 m North-West of Barn at Gowthorpe Manor House' (**1050517**), and **medium value** Grade II listed 'Garden Walls and Gate Piers Immediately South-West of Gowthorpe Manor House' (**1170357**) are located within a farming complex on the north-eastern flank of Gowthorpe Lane, 550 m east of Swardeston and 590 m west of the draft Order Limits. These assets are of evidential and historical value.
- 3.2.392 Gowthorpe Manor House (**1050515**) includes a timber framed structure likely raised in the Late Medieval period around 1520 for the Styward family. Porches were added around 1574 and the structure was encased in brick. A T-shaped east range was added around 1630 and further alterations were made in the 17th and 18th centuries. An extensive service range was added in 1908 and the whole structure has a pantile roof. The barn to the west of the manor house (**1366141**) dates to the 17th century and is constructed of brick in Flemish bond with a pantile roof. The cowshed (**1050517**) was built in the 18th century of flint nodules and some brick with a pantile roof. The garden walls and gate piers (**1170357**) date between the 16th and 18th centuries and are constructed of flint nodules and brick. The formal gardens within the manor grounds recorded on the first edition OS of 1882 are now lawned areas, but their boundaries survive. Four large barns have been added to the complex in the later 20th and 21st centuries. This group of assets likely occupy the site of the medieval Manor of Gowthorpe, and the surrounding farmland contains traces of the shrunken medieval settlement that was focussed on the Manor (see below).
- 3.2.393 The shared setting of the assets is informed by the relationships between the designated and non-designated elements of the complex and their coherence as a former working group. The surrounding agricultural landscape, with which the complex has a historic and functional relationship, also informs the setting. A small copse in the south of the Manor House grounds and mature tree lined boundaries allow glimpsed views of the agricultural land beyond, but largely create a sense of exclusion and tranquillity. The setting of the assets, therefore, makes a considerable contribution to their values. Views towards the draft Order Limits to the east and south-east from the Gowthorpe complex are interrupted by mature tree growth in the manor grounds and by a large copse (The Grove) to the east, which also occupies an area of higher ground. The setting of the assets does not, therefore, extend to the draft Order Limits.
- 3.2.394 The following designated assets are in the parish of Stoke Holy Cross:
- 3.2.395 The Grade II listed **medium value** 'Rummer Inn' (**1169688**) is located on the eastern flank of Norwich Road, at the northern limits of Stoke Holy Cross and c. 1.3 km east of the draft Order Limits. The asset is of evidential and historical value. The Inn, now a residential property, was built in c. 1700 of brick and has a pantile roof. The asset is now whitewashed, and 19th and 20th century additions and alterations are apparent.
- 3.2.396 The setting of Rummer Inn is informed by its roadside location and although its function has changed, this setting makes a minor contribution to its value. The setting of the asset does not, however, extend to the draft Order Limits due to mature tree cover, topography, and intervening development.

- 3.2.397 The Grade II listed **medium value** 'Dunston Hall' (**1373206**) is located within its own parkland c. 800 m west-northwest of Stoke Holy Cross and c. 620 m east of the draft Order Limits. The asset is of evidential and historical value. J. C. Buckler began the construction of the high Victorian Elizabethan style country house in 1859 and Edward Boardman took over the build in 1859. The main elevation is three stories high with numerous ornate chimney stacks with terracotta flues. The house is brick-built, has a tile roof, and now serves as Dunston Hall Hotel, Spa and Golf Course.
- 3.2.398 The setting of the house is informed by its location within its own grounds; however, these have been eroded by the addition of the hotel car park and the construction of the golf course. There are, however, surviving mature copses particularly to the east of the house through to the north. The approach to the front of the house creates a sense of grandeur and wealth, whilst the mature tree growth encloses the asset and restricts views to within the grounds. The setting of the asset, therefore, makes a moderate contribution to its value but due to topography and vegetation, the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.399 A multi-period finds assemblage (**1022**), including a **low value** post medieval element comprising a symmetrical buckle frame, a stud chape of a shoe buckle, an 18th century ovoid buckle, an 18th to 19th century pastry jigger, harness mounts, buckle frames, a finger ring, a spoon and cutlery of evidential value, was found during a metal detector survey within the bounds of the scheduled monument Venta Icenorum: Roman Town and Associated Prehistoric, Anglo-Saxon and Medieval Remains (**1021463**). The survey area is located 150 m east of the draft Order Limits and within the Tas Valley to the west of the river.
- 3.2.400 Geophysical survey, fieldwalking and subsequent trial trenching and strip, map and sample excavation on land 300 m north-east of Mangreen Hall Farm and immediately north of the draft Order Limits identified multi-period archaeological remains and finds assemblage (**1182**) (Stone, 2011) that included a **low value** post medieval element comprising ditches and finds comprising copper alloys buckles, crotal bells, furniture fitting, harness mount, jetton and token, and scatters of pottery sherds and roof tile of evidential value.
- 3.2.401 Fieldwalking, metal detecting and subsequent trial trenching immediately east of Mangreen Farm and partially within the draft Order Limits identified multi-period archaeological features and finds assemblage (**1184**) including a **low value** post medieval element comprising an agricultural feature and finds comprising a gunflint, pottery sherds and roof tile of evidential value.
- 3.2.402 Fieldwalking, metal detecting and subsequent trial trenching immediately south of Mangreen Farm and partially within the draft Order Limits identified multi-period archaeological features and finds assemblage (**1185**) that included residual **low value** post medieval pottery sherds and roof tile of evidential value.
- 3.2.403 Metal detector survey of land 960 m south of Mangreen Hall Farm and partially within the draft Order Limits resulted in a multi-period finds assemblage (**1218**) that included a **low value** post medieval element comprising copper alloy coins, jetton, tokens, sword belt fitting, finger ring, buckle, crotal bells, strap fitting and harness mounts; a silver coin, and lead a token, cloth seal, weight and vessel fragment. Subsequent archaeological trial trenching identified multi-period archaeological features and finds assemblage (**1271**) that included post medieval **low value** linear features of evidential value.

- 3.2.404 Metal detector survey and archaeological excavations, partially within cropmarks area (**1261**), in advance of the construction of Dunton Hall golf course recovered a multi-period finds assemblage and identified archaeological remains (**1136**) of evidential value. Evidence of post medieval **low value** activity was restricted to a section of exposed turnpike road and finds comprising an iron horseshoe and knife, a bone knife handle, and a silver coin of evidential value. The site is situated on the western flank of Dunston, immediately east of Ipswich Road and 160 m south-east of the draft Order Limits.
- 3.2.405 Archaeological trial trenching (**1071**) identified a **low value** post medieval ditch within an area of ploughed out ridge and furrow earthworks (Bates 1996) of evidential value identified on 20th century aerial photography. The site is located immediately north of Dunston Park and 230 m east of the draft Order Limits.
- 3.2.406 Evidence derived from historic maps, documentary records and aerial photographs suggests an area of post medieval **low value** brick manufacture and clay extraction (**1209**) of evidential value to the north-east and south-west of Gowthorpe Lane, 1 km south-west of Mangreen Farm and on the north-western flank of an draft Order Limits access road.
- 3.2.407 The cropmarks of post medieval field boundaries (**1214**) of evidential value are visible on aerial photographs of land 430 m west of Dunston Hall (**1373206**), on the western flank of the A140 and 80 m east of the draft Order Limits. The **low value** cropmarks represent at least two phases of field boundaries, both probably broadly post medieval in date as no boundaries are recorded on the Tithe map of 1849.
- 3.2.408 The site of a former **low value** milestone (**1249**) of evidential value is located on the western flank of the A140, 600 m north-west of Dunston Hall (**1373206**) and 140 m east of the draft Order Limits. The milestone was originally beside the former Norwich to Scole Turnpike and marked Norwich 4 miles and Ipswich 39 miles. The asset was lost around 1998.
- 3.2.409 The cropmarks of a **low value** field boundary (**1186**) of evidential value date is located to the north-west of the DMV of Gowthorpe (**1232**) and Gowthorpe Manor (**1050515**) and c. 140 m west of the draft Order Limits. The Norfolk HER suggests a post medieval date for the feature although the proximity of Gowthorpe suggests a medieval date is also possible.
- 3.2.410 Further evidence of medieval activity in the Dunston and Mangreen Hall Farm area is represented by findspots, and artefacts recovered during fieldwalking and metal detector surveys. These **low value** assets are of evidential value and comprise:
- Two post medieval copper alloy coins, buckle, spur and strap end, a silver coin, a gold mourning ring, and a lead powder measure, token and weight in a multi-period finds assemblage (**1208**) recovered from farmland west of Mangreen Hall Farm and 180 m north-west of the draft Order Limits
  - A post medieval, copper alloy coin, bell, knife, and spoon in a multi-period finds assemblage (**1110**) recovered from farmland 80 m north-west of Mangreen Hall Farm and 260 m north-west of the draft Order Limits
  - A post medieval copper alloy coin and jetton, a silver coin and dress fastener and pottery sherds in a multi-period finds assemblage (**1196**) recovered from farmland 740 m south-south-west of Dunston Hall and 340 m east of the draft Order Limits. Geophysical survey and subsequent archaeological trial trenching of this field identified undated and post medieval /modern agricultural features (**1215**)

## Swainsthorpe and Mulbarton

### *Designated Heritage Assets*

- 3.2.411 The following listed buildings are in the parish of Mulbarton, outside the Mulbarton conservation area.
- 3.2.412 The Grade II listed **medium value** 'The Old Forge' (**1050701**) is located on the eastern flank of Main Road 340 m south of Swardeston, 580 m north-east of Mulbarton and 1.7 km west of the draft Order Limits. The asset is of evidential and historical value. The building is a former smithy built around 1830 and likely part of the Bracon Hall Estate. It is built of red brick with some stone dressings and has a black pantile roof. The asset is part of a larger complex of buildings at the western end of a narrow strip of overgrown land with a disused corn mill at the eastern end. The National Heritage List states that the asset is now empty.
- 3.2.413 The setting of the asset is informed by its location within the complex of building associated within the former mill. However, the asset and mill are no longer in use and the other buildings appear to have undergone a change in function and now appear to be domestic in nature. Their coherence as a working group has, therefore, been eroded and so the setting of the asset makes a negligible contribution to the value of the asset. Due to the overgrown nature of the asset's grounds and mature tree lined hedgerows in the intervening landscape, the setting of the asset does not extend to the draft Order Limits.
- 3.2.414 The Grade II listed **medium value** assets 'The Lodge' (**1373059**) 'Lodge Farmhouse Barn' (**1305159**) are located on the northern flank of Rectory Lane, 500 m east-northeast of Mulbarton and 600 m west of the draft Order Limits. The assets are of evidential and historical value. The Lodge was built as a house in the late 18th century of rendered masonry with scored in imitation of ashlar and a slate roof. The barn is an 18th century former threshing barn built of brick partly colour washed with a pantile roof. Both assets are part of the larger complex of Lodge Farm buildings recorded on the first edition OS map of 1882, however, subsequent OS mapping and satellite imagery record numerous losses, additions and alterations to the complex.
- 3.2.415 The setting of the lodge and barn is shared and informed by their relationship with each other and with the other elements of the former farm complex. The setting is further informed by the surrounding agricultural landscape with which the assets have a functional and historical relationship. Both assets have lawned areas with mature tree lined boundaries and a mature copse lies to the west creating a sense of privacy. The setting of the assets, therefore, makes on moderate contribution to their value, however, due to intervening mature tree growth providing screening, the setting does not extend to the draft Order Limits.
- 3.2.416 The Grade II listed **medium value** 'Kenningham Hall' (**1373056**) is located on the northern flank of Brickkiln Lane, 800 m east of Mulbarton and 110 m from the draft Order Limits, however, a permanent access route for the Project passes 10 m to the east of the asset. The asset is of evidential and historical value. The hall is a farmhouse built in the 17th century with additions and alterations made in the subsequent centuries. The farmhouse comprises a timber frame structure faced with colour-washed brick with a pantile roof.
- 3.2.417 The setting of the hall is informed by its relationship with the farm outbuildings, which except for large modern barn to the north added in the late 20th and 21st centuries, are recorded on the first edition OS map of 1882. The setting is further informed by the surrounding agricultural landscape with which the asset has a functional and historical relationship. The setting of the hall makes a considerable contribution to its

value, and due to open views to the south and east from the farm complex, the setting of the asset extends to the draft Order Limits.

- 3.2.418 The following listed buildings are located within the parish of Mulbarton and within the Mulbarton conservation area.
- 3.2.419 The Grade II listed **medium value** 'Paddock Farmhouse' (**1050702**) and 'Paddock Farm Barn Approx 50 Metres To North Of Farmhouse' (**1373058**) are in a farming complex at the northern limit of Mulbarton, within the conservation area and 2.1 km west of the draft Order Limits. These assets are of evidential and historical value. The farmhouse was likely built in the later 17th century of red brick with a pantile roof. The barn was built in the late 18th century of red brick with a pantile roof and now houses grain silos.
- 3.2.420 The assets share a setting which is informed by their relationship with each other and the other buildings within the Paddock Farm complex. The farming complex is coherent as a working group and the surrounding agricultural land with which the farm has a functional and historical relationship further inform their setting. The setting of the assets makes a considerable contribution to their values. The tops of the extant pylons that run parallel to the draft Order Limits are visible from the B1113 immediately east of Paddock Farm, however, the setting of the assets is restricted to the farming complex and surrounding farmland and so it does not extend to the draft Order Limits.
- 3.2.421 The Grade II listed **medium value** 'The Old Hall' (**1050700**) is a former farmhouse that was built in the early 17th century with later alterations. It comprises a rendered timber frame structure with south and north-east gable ends in colour-washed brick with a plain tiled roof. The asset is of evidential and historical value and is situated in mature wooded grounds with the earthworks of a moat.
- 3.2.422 The setting of the hall is informed by its location on the eastern flank of the Common in Mulbarton and its mature grounds. The wooded grounds create feelings of exclusion and peacefulness, and this setting makes a considerable contribution to the value of the asset. Due to the mature tree growth, however, and mature tree lined hedgerows in the intervening landscape, the setting of the asset does not extend to the draft Order Limits.
- 3.2.423 The following listed buildings are located within the parish of Swainthorpe:
- 3.2.424 The Grade II listed **medium value** 'Glebe Farmhouse' (**1050442**) is located on the northern flank of Church Road, on the western edge of Swainthorpe and 130 m east of the draft Order Limits. The asset is of evidential and historical value. The farmhouse was built in the early 17th century and comprises a timber framed structure with plastered and whitewashed wattle and daub infill with a plain tile roof. The asset is situated in mature wooded grounds.
- 3.2.425 The setting of the farmhouse is informed by its location in Swainthorpe, its wooded grounds and the agricultural land beyond with which it has a functional and historical relationship. The farmhouse now serves as a domestic dwelling and outbuildings apparent on 19th century OS mapping have gone reducing its coherence as a farmhouse. The setting of the asset, therefore, makes a minor contribution to its value. The Project lies just 130 m to the west and so the setting of the asset extends to the draft Order Limits.
- 3.2.426 The Grade II listed **medium value** 'Primrose Cottage' (**1050446**) is located on the southern flank of Briar Lane, at the southern edge of Swainthorpe and 760 m west-northwest of the draft Order Limits. The asset is of evidential and historical value.

The house was built in the mid-17th century and extended in the 18th, 19th, and 20th centuries. It is brick built and has barge-boarded gable ends and a steeply pitches pantile roof.

- 3.2.427 Since its construction, the asset has become increasingly enclosed on all sides by 19th and 20th century development. Some of the development comprises 19th century domestic dwelling, which is generally sympathetic, however, there are also large 20th century farm sheds and a garage which are less so. Views to the surrounding agricultural landscape with which it has a historic relationship have been lost or greatly decreased. The setting of Primrose Cottage, therefore, makes a minor contribution to its value. The enclosed nature of the asset and intervening tree growth would largely screen the asset from the Project, and so the setting of Primrose Cottage does not extend to the draft Order Limits.
- 3.2.428 The Grade II listed **medium value** assets 'Swainthorpe Hall' (**1373211**) 'Barn 30 Metres South-West Of Swainsthorpe Hall' (**1169732**) are located at the eastern end of an unnamed local road c. 780 m east of the A140 Ipswich Road and c. 1.7 km east of the draft Order Limits. These assets are of evidential and historical value. The Hall is an early 17th century farmhouse much rebuilt in the 18th and 19th centuries. It is brick-built in English bond and has a mixed pantile roof. The barn is an early 18th century three stead threshing barn. It comprises a timber framed structure with wattle and daub and later brick infill and a pantile roof. The assets are part of the larger Hall Farm complex on the western flank of the Tas Valley much of which is apparent on the first edition OS map in 1882 with additions recorded on early 20th century maps.
- 3.2.429 The setting of the hall and barn is shared and informed by their relationship with each other and with the other elements of the working farm complex. The setting is further informed by the surrounding agricultural landscape with which the assets have a functional and historical relationship. The farm grounds have lawned areas, mature trees and tree lined boundaries whilst the tree lined banks of the Tas lie to the east and south, where the river splits creating a small copse. This setting of the assets instils feelings of seclusion and privacy but also brings an understanding of rural farming practice, therefore, making a considerable contribution to the assets' value. Due to mature tree lined field boundaries, further small copses, topography and development in the intervening landscape, the setting of the asset does not extend to the draft Order Limits.
- 3.2.430 The Grade II listed **medium value** assets 'The Rookery' (**1050443**) and 'Barn 25 Metres North-West Of The Rookery' (**1306368**) are located on the western flank of the A140 Ipswich Road, 630 m south of Swainsthorpe and 1.1 km east of the draft Order Limits. These assets are of evidential and historical value. The Rookery was built in the mid-16th century and comprises a timber framed structure with paltered and whitewashed brick and wattle and daub infill with a pantile roof. The barn was dates to the 18th century and comprises a timber framed structure on a brick plinth with wattle and daub infill and a pantile roof.
- 3.2.431 The setting of the Rookery and barn is shared and informed by their relationship with each other and with the other elements of the former farm complex. The setting is further informed by the surrounding agricultural landscape with which the assets have a functional and historical relationship. The assets are part of a former farming complex that, except for the loss of a large barn-like south of the Rookery, appears almost as does on the first edition OS map of 1882. The elements of the complex have lawned areas, mature tree-lined boundaries and are situated in a dry tributary valley of the Tas. This setting creates feelings of enclosure and privacy and, therefore, it makes a considerable contribution to the value of the assets. Due to

topography and mature tree lines in the intervening landscape, however, the setting does not extend to the draft Order Limits.

- 3.2.432 The following listed building is located within the parish of Stoke Holy Cross.
- 3.2.433 The Grade II listed **medium value** 'The Old House' (**1373208**) is located on the western flank of Norwich Road at the southern limit of Stoke Holy Cross and c. 2 km east of the draft Order Limits. The asset is of evidential and historical value. The house was built in the 18th century and is a timber framed structure with whitewashed brick infill and a thatched roof.
- 3.2.434 The setting of the house is informed by its relationship with a barn and outbuildings apparent on the first edition OS map of 1882 and by its tree lined grounds and garden area. The mature trees and a small, mature copse to the west create feeling of enclosure and privacy and so its setting, therefore makes a considerable contribution to its value. Due to the copse to the west and further vegetation, development and topography in the intervening landscape, the setting of the asset does not extend to the draft Order Limits.
- 3.2.435 The following listed buildings are in the parish of Bracon Ash:
- 3.2.436 The Grade II listed **medium value** assets 'Bracon Hall' (**1373093**) and 'Outbuildings To Bracon Hall' (**1050696**) are located within the hall grounds 280 m north of School Road, 8600 m west of Mulbarton and 1.8 km north-west of the draft Order Limits. These assets are of evidential and historical value. The hall was built in 1833 (although the estate home page states 1820) for the Berney family. It is built in brick with some ashlar and has a black pantile roof. The outbuildings, now dwellings, were built in 1833 of brick with some stone dressings and a black pantile roof.
- 3.2.437 The setting of the hall and outbuildings is shared and is informed by their relationship and by their shared relationship with the estate grounds. The setting is further informed by the surrounding agricultural landscape with which the assets have a functional and historical relationship. The setting of the asset makes a considerable contribution to its value. The estate grounds include mature tree lined boundaries and copses and further tree lined boundaries, copses, and development of Mulbarton and Bracon Ash screen the draft Order Limits from the assets. The setting of the assets does not, therefore, extend to the draft Order Limits.
- 3.2.438 The Grade II listed **medium value** asset 'Bracon Lodge' (**1305225**) and 'Crinkle-Crinkle Wall In Garden Of Bracon Lodge' (**1050697**) are located on the southern edge of Mulbarton 700 m north of the draft Order Limits. These assets are of evidential and historical value. The lodge is a former farmhouse built in the 18th century. It is constructed of brick with a gault brick façade and a pantile roof. The crinkle-crinkle wall, also known as a sinusoidal, serpentine, ribbon, or wavy wall, it located in the lodge garden c. 70 m south of the building.
- 3.2.439 The setting of the lodge and the garden wall is shared and is informed by their relationship and by their shared relationship with the grounds of the lodge and other associated buildings. The setting is further informed by the surrounding agricultural landscape with which the assets have a functional and historical relationship. The lodge grounds include formal gardens, large lawned areas and mature tree cover, particularly to the north and south. The expansion of Mulbarton in the 20th and 21st centuries has encroached on the assets from the north and east, however, the mature grounds do instil feelings of privacy and peace. The setting of the assets, therefore, makes a moderate contribution to their value. Due to mature tree growth in the south of the lodge grounds and mature tree lined hedgerows, copses and

development in the intervening landscape, the setting of the assets does not extend to the draft Order Limits.

- 3.2.440 The Grade II listed **medium value** 'Home Farm House' (**1440926**) is in the south of Bracon Ash, 200 m east of the B1113, 230 m north of the Mergate Hall complex (see below) and c. 1.1 km north-west of the draft Order Limits. The asset is of evidential and historical value. The farmhouse was built in the early-mid 17th century and comprises a timber framed structure with rendered colour-washed walls and a black glazed pantile roof. The asset was refurbished as a private dwelling in the 1990s.
- 3.2.441 The setting of the farmhouse is informed by its former farmyard location and its relationship with associated outbuildings, some of which appear on the first edition OS map of 1882. The setting is further informed by the surrounding agricultural landscape with which the asset has a functional and historical relationship. The setting of the asset has been eroded by the loss of agricultural land to the north and east due to domestic development along Hawkes Lane. The mature tree lined hedgerows of the asset's grounds, however, restrict outward views and create a sense of privacy and seclusion. The setting of the farmhouse, therefore, makes a moderate contribution to its value. Due to the mature tree growth of the Bracon Ash Common and Country Wildlife Site to the south and south-east of the asset, its setting does not extend to the draft Order Limits.
- 3.2.442 The Grade II listed **medium value** 'Mergate Farmhouse' (**1050690**) is located on the eastern flank of Hawkes Lane close to the southern edge of Bracon Ash and 820 m north-west of the draft Order Limits. The asset is of evidential and historical value. The farmhouse was built in the 17th century and has 18th and 19th century alterations and additions. The building has a timber frame, rendered walls and pantile and thatched roofs.
- 3.2.443 The setting of the asset is informed by its associated grounds and by its neighbouring vernacular buildings to the north and south, most of which are recorded on the first edition OS map of 1882. The setting is further informed by the surrounding agricultural landscape with which the asset has a functional and historical relationship. The asset's grounds have mature tree lined boundaries creating a sense of enclosure and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds and mature tree lined hedgerows, copses, and development in the intervening landscape, it does not extend to the draft Order Limits.
- 3.2.444 The Grade II\* listed **high value** asset 'Mergate Hall' (**1050692**) and the **medium value** Grade II listed assets 'Mergate Hall Cottages' (**1373092**) and 'The Dower House, Mergate Hall' (**1050693**) are a group of assets located on the southern flank of Mergate Lane, at the southern extent of Bracon Ash and c. 950 m north-west of the draft Order Limits. These assets are of evidential and historical value. The hall (**1050692**) was built in the 17th century with 18th and 19th century additions and alterations. It is built of colour washed bricks and has plain tiled and pan tiled roofs. The pair of cottages (**1373092**) were once likely a single farmhouse built around 1700 with later alterations and additions. They are constructed of rendered brick and clay lump with a pantile roof. The Dower House (**1050693**) is a 17th century barn with a dwelling above. Originally timber framed, the barn rebuilt in brick in 1789. The walls are now colour washed, and the barn has a pantile roof.
- 3.2.445 The setting of the assets is shared and is informed by the relationship between the designated assets and by their relationships with neighbouring vernacular farm buildings several of which are recorded on the first edition OS map of 1882. The setting is further informed by the surrounding agricultural landscape with which the

assets have functional and historical relationships. The map regression and satellite imagery indicate that the farming complex has undergone only gradual small-scale change since 1882, however, what appears to be a yard and storage area can be seen to the east of the assets. The grounds of the assets are mature and comprise garden areas, lawns, and numerous trees, particularly on the boundaries. This creates a sense of enclosure and privacy and, therefore, the setting makes a moderated contribution to the value of the assets. Due to mature tree growth within the assets' grounds and mature tree lined hedgerows and copses in the intervening landscape, this setting does not extend to the draft Order Limits.

- 3.2.446 The Grade II\* listed **high value** assets 'Church Farm House' (**1379811**), 'Barn And Attached Outbuildings At Church Farm' (**1379809**) and 'Cart Shed At Church Farm' (**1379810**) are located on the western flank of Rectory Lane 1.4 km west-south-west and 2.6 km north-west of the draft Order Limits. These assets are of evidential and historical value. The farmhouse (**1379811**) was built in the late 17th century and has a mid-18th century east wing and 19th century alterations. The asset comprises a rendered timber frame with a brick built east wing and a plain tile roof. The barn and stables (**1379809**) were built in the 17th century and underwent extension and remodelling in the 18th and 19th centuries. The core of the building is timber framed with wattle and daub infill whilst the 19th century additions are in clay lump with Flemish bond brickwork. The roof is of pantile. The 18th century cart shed (**1379810**) is timber framed with wattle and daub infill and a pantile roof. the Church House Farm assets are an important and little altered group of 18th and 19th century farm buildings in the vernacular tradition.
- 3.2.447 The setting of the assets is shared and is informed by the relationship between the designated assets and their relationship with other elements of the legible farming complex. The setting is further informed by the surrounding agricultural land with which the assets have a historic and functional relationship. The assets are situated in well-established grounds containing mature trees and defined by mature tree lined hedgerows, which creates a sense of privacy and enclosure. This setting makes a considerable contribution to the value of the assets; however, due to the mature grounds and copses, tree lined boundaries and the development of Bracon Ash in the intervening landscape, it does not therefore, extend to the draft Order Limits.
- 3.2.448 The following listed buildings are located within the parish of Newton Flotman.
- 3.2.449 The Grade II\* listed **high value** 'Dairy Farm Barn' (**1050707**) and the Grade II listed **medium value** 'Dairy Farmhouse Cottage (East), Dairy Farmhouse Cottage (West)' (**1152253**) are located within a farming complex 340 m south-east of the A140 Ipswich Road, 600 m north-west of the Shotesham Hall complex on the western flank of the Tas Valley. These assets are of evidential and historical value. The barn (**1050707**) is medieval in date and is discussed above. The cottages (**1152253**) were once a single farmhouse built in the 17th century then heightened and extended in the 18th century. The core of the structure is timber frame, which is rendered and partly re-faced in brick. The extensions are brick built whilst the roof is of pantile.
- 3.2.450 The setting of the cottages is informed by their relationship with the barn and with the other buildings of the farming complex, most of which are recorded on the first edition OS map of 1882. The setting is further informed by the surrounding agricultural land with which the asset has a historic and functional relationship. The farm complex is linked to the Shotesham Hall estate to the east by a private road, however, mature tree growth along the banks of the Tas screen any views in this direction. The view to the west and the draft Order Limits is interrupted by mature tree growth on the

eastern flank of the A140. The setting of the assets, therefore, makes a considerable contribution to their value but does not extend to the draft Order Limits.

- 3.2.451 The following listed buildings are located within the Parish of Shotesham and within the Shotesham conservation area.
- 3.2.452 The Grade II listed **medium value** 'The Mill House' (**1304779**) is in the western half of the two-part Shotesham conservation area (**CA53**) at its northern limit. The asset is of evidential and historical value. The conservation area maps the extent of the formal parkland associated with Shotesham Hall. The mill is situated on the eastern bank of the Tas, and a leat runs to the south and east. The asset is the former miller's house built in the early 19th century of brick with a pantile roof.
- 3.2.453 The setting of the house is informed by the building's relationship with other structures of the mill complex, although the mill building itself has gone, and its location on the riverbank. The house is situated on the shallow valley floor with mature tree growth all around and the river and leat in attendance creating a sense of peace and tranquillity. The setting of the asset, therefore, makes a considerable contribution to its value but does not extend to the draft Order Limits.
- 3.2.454 The Grade I listed **high value** 'The Hall' (**1304783**) and the Grade II **medium value** listed assets 'Garden Cottage With Garden Wall' (**1304747**) 'The Stables And Outhouses To The Hall' (**1373090**) are located at the heart of Shotesham conservation area, which maps the extent of the formal parkland associated with the hall complex. These assets are of evidential and historical value. The hall (**1304783**) is a large country mansion built in 1784 by Sir John Soane in gault brick with stone dressings and slate roof. The asset comprises a square main block with a lower service block to the north. The stables, cart shed, and outhouse (**1373090**) are located immediately north-north-west of the hall and were also built in 1784 by Sir John Soane. The asset is built of gault brick and has a pantile roof. The cottage and garden wall (**1304747**) are located 150 m north-east of the hall and stables. The asset is the former gardener's cottage with a contemporary walled garden built around 1970 and probably associated with Sir John Soane. It is red brick built and has a pantile roof.
- 3.2.455 The setting of the assets is shared and is informed by the relationship between the designated assets and with the parkland. The assets are largely surrounded by a mature copse with just the hall having an open view to the south-south-east and the parkland beyond. The park contains further copses, and the boundaries are thickly wooded creating a sense of privacy and open seclusion. The setting of the assets, therefore, makes a considerable contribution to their values, but due to the intervening topography and mature tree cover it does not extend to the draft Order Limits.
- 3.2.456 The **medium value** Grade II listed 'Lodge To Shotesham Park' (**1304883**) is located on the eastern flank of the A140 Ipswich Road at the south-western limits of the Shotesham parklands and c. 2.3 km south-east of the draft Order Limits. The asset is of evidential and historical value. It is located within the parish of Newton Flotman but is reported here due to its relationship with Shotesham Hall. In keeping with the hall, it dates to the late 18th century and is constructed of gault brick with a slate roof and is probably associated with Sir John Soane.
- 3.2.457 The setting of the lodge is informed by its roadside location at the south-western entrance to the Shotesham parklands and the hall beyond. The single storey asset is associated with an ornate wrought iron fence and gate with the view to the road broken by garden vegetation. Although the A140 now carries modern traffic resulting

in noise and pollution, the asset is still very much legible as an element of the Shotesham estate complex and so its setting makes a considerable contribution to its value. The view to the west and north-west towards the draft Order Limits is interrupted by mature tree growth on the western flank of the A140, and by topography, mature tree lined hedgerows, development, and copses in the intervening landscape. The setting of the asset, therefore, does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.458 The geophysical survey of a field 1 km east of Mulbarton and partially within the draft Order Limits, identified a complex of anomalies (**1227**) of evidential value some of which likely represent an area of **medium value** medieval occupation, potentially associated with the adjacent deserted settlement of Kenningham (**1010**) immediately to the north and west. The survey also identified an extensive network of straight linear anomalies of evidential value that are likely to represent former **low value** boundaries of post medieval date.
- 3.2.459 The geophysical survey of a field 850 m east of Mulbarton and partially within the draft Order Limits identified a complex of anomalies (**1287**). The survey area lies immediately north of Brickkiln Lane and several of the anomalies have been interpreted as the possible remains of **low value** kilns and backfilled extraction pits. Linear anomalies are considered to represent the remains of **low value** post medieval field boundaries.
- 3.2.460 The geophysical survey of land 410 m south-south-west of Swainsthorpe and clipping the eastern flank of the draft Order Limits identified two **low value** linear anomalies (**1303**) of evidential value, which likely represent the remains of post medieval field boundaries.
- 3.2.461 A complex of cropmarks (**1222**) likely related to **low value** post medieval drainage features of evidential value is located 200 m north-west of Swainsthorpe and partially within the Order Limit.
- 3.2.462 A complex of cropmarks (**1223**) is located 680 m south-west of Swainsthorpe and clipping the eastern flank of the draft Order Limits. The anomalies are interpreted as **low value** post medieval field boundaries of evidential value that predate 19th century Tithe and OS mapping.
- 3.2.463 The geophysical survey of a field 950 m east-south-east of Mulbarton and 35 m east of the draft Order Limits identified **low value** scattered linear and discrete anomalies (**1297**). Most of the anomalies are undated, but two linear features likely represent post medieval field boundaries of evidential value.
- 3.2.464 The geophysical survey of a field immediately south of Brickkiln Lane, 900 m east of Mulbarton and clipping the eastern flank of the draft Order Limits identified **low value** scattered linear and discrete anomalies (**1055**) of evidential value. Two of the discrete anomalies may represent brick kilns, whilst a former post medieval field boundary is recorded.
- 3.2.465 The former Henstead Union Workhouse and Vale Hospital (**1312**) is located 240 m west of Swainsthorpe, north of Church Road and partially within the draft Order Limits. Henstead Union Workhouse was built in 1836 to house a maximum of 250 inmates. The building was constructed on a double cruciform and bricks manufactured in the Swainsthorpe brickyard were used. In 1948 it became part of the NHS as Vale Hospital, providing care for the elderly mentally ill. The hospital was

closed in 1984 and the buildings converted for residential use. The site has the potential to contain **low value** archaeological remains of evidential value.

- 3.2.466 The geophysical survey of a field on the south-eastern outskirts of Mulbarton and c. 60 m north-west of the draft Order Limits identified low value anomalies comprising field boundaries and a possible kiln (**1033**) of evidential value. One of the field boundaries had previously been identified as a cropmark (**1150**). A subsequent archaeological excavation identified the heavily truncated remains of a handmade brick clamp kiln likely dating to the 17th or 18th centuries (Muldowney 2013). The identified anomalies and archaeological features are of **low value**.
- 3.2.467 A **medium value** 17th century timber-framed barn (**1306**) is located at Church Farm on the western edge of Swainsthorpe and 230 m east of the draft Order Limits. The barn is of evidential and historical value and has 17th century timber frames with arched braces supporting tie beams. There is a 19th century clay lump extension.
- 3.2.468 A geophysical survey of land immediately north of Brick Kiln Lane, 850 m south-south-west of Swainsthorpe and 390 m east of the draft Order Limits identified **low value** anomalies (**1011**) comprising undated features and a probable post medieval field boundary of evidential value.
- 3.2.469 Further evidence of post medieval activity of evidential value in the Swainsthorpe and Mulbarton area is represented by findspots, and artefacts recovered during fieldwalking and metal detector surveys. The assets are **low value** unless otherwise stated, and comprise:
- Post medieval pottery sherds and clay pipe fragments in a multi-period finds assemblage (**1229**) recovered from farmland 980 m east of Mulbarton, immediately south of Church Road and partially within the draft Order Limits
  - A post medieval copper alloy clapper bell, two crotal bells, coin and buckle, a glass vessel fragment, pottery sherds, clay pipe fragments and ceramic building material in a multi-period finds assemblage (**1230**) recovered from farmland on the western flank of Swainsthorpe, immediately south of Church Road and partially within the draft Order Limits
  - Post medieval pottery sherds and clay pipe fragments in a multi-period finds assemblage (**1234**) recovered from farmland 1.1 km south-south-west of Swainsthorpe, immediately south of Brick Kiln Lane and partially within the draft Order Limits
  - Post medieval pottery sherds and clay pipe fragments in a multi-period finds assemblage (**1238**) recovered from farmland 610 m east of Mulbarton and partially within the draft Order Limits
  - Post medieval pottery sherds and clay pipe fragments (**1239**) recovered from farmland 860 m east of Mulbarton and partially within the draft Order Limits
  - A post medieval copper alloy buckle, dress hook, clapper bell, coin and token, a silver coin, and pottery sherds in a multi-period finds assemblage (**1233**) recovered from farmland 850 m south-west of Swainsthorpe, immediately north of Brick Kiln Lane and partially within the draft Order Limits
  - Post medieval ceramic building material, pottery sherds, clay pipe fragments and glass vessel fragments in a multi-period finds assemblage (**1278**) recovered from farmland 1.6 km south-south-west of Swainsthorpe, immediately south of Mulbarton Lane and partially within the draft Order Limits

- Post medieval pottery sherds and clay pipe fragment in a multi-period finds assemblage (**1235**) recovered from farmland 1.6 km south-south-west of Swainsthorpe, immediately south-west of Mulbarton Lane and just clipping the eastern flank of the draft Order Limits
- Post medieval ceramic building material, pottery sherds, clay pipe fragments and glass vessel fragments in a multi-period finds assemblage (**1277**) recovered from farmland 1.3 km south-south-west of Swainsthorpe and clipping the eastern flank of the draft Order Limits
- A post medieval copper alloy harness mount, clay pipe fragments and pottery sherds including Glazed Red Earthenware and Staffordshire combed slipware in a multi-period finds assemblage (**1195**) recovered from farmland on the western limits of Swainsthorpe, immediately north of Church Street and just clipping the western flank of the draft Order Limits
- Fragments of post medieval ceramic building material, pottery sherds and a glass vessel fragment in a multi-period finds assemblage (**1275**) recovered from farmland 1.4 km south-south-west of Swainsthorpe, immediately north of Mulbarton Lane and 90 m east of the draft Order Limits

## Flordon and Fundenhall

### *Designated Heritage Assets*

- 3.2.470 The following listed buildings are in the parish of Newton Flotman.
- 3.2.471 The **medium value** Grade II listed 'The Old Rectory' (**1152237**) is located on the northern flank of Church Road at the northern extent of Newton Flotman and 950 m south-east of the draft Order Limits. The asset is of evidential and historical value. The former rectory, now a private dwelling, was built in 1883-1885 of gault brick. It comprises a square main block with a service wing.
- 3.2.472 The setting of the asset is informed by its situation within its own grounds and its relationship with properties to the west, some of which are recorded on the first edition OS map of 1882. The grounds of the asset have matured tree lined boundaries, which create a sense of privacy and seclusion. The setting of the asset, therefore, makes a moderate contribution to its value, however, due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.473 The **medium value** Grade II listed 'Monks Farmhouse' (**1050705**) is located on the north-western flank of the Greenways, 800 m north-west of Newton Flotman and 460 m south-east of the draft Order Limits. The asset is of evidential and historical value. The former farmhouse was built in the 17th century and has 19th and 20th century alterations and additions. The core of the structure is of timber frame construction with the 19th century wing built in colour-washed brick. The roofs are of pantile and plain tiles.
- 3.2.474 The setting of the farmhouse is informed by its relationship with the other buildings of the former farming complex, several of which are recorded on the first edition OS map of 1882. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The asset has a lawned garden to the east and south defined by hedgerows and trees, and associated outbuildings to the west. Beyond the garden and outbuildings are grassed paddocks defined by mature tree lined hedgerows. Due to the mature tree cover of

the asset's grounds and paddocks, the setting of the asset does not extend to the draft Order Limits.

- 3.2.475 The **medium value** Grade II listed Hall Farmhouse (**1373060**) is located just beyond the north-eastern limit of Rainthorpe Hall Parkland (**1000292**) 1.8 km south-east of the draft Order Limits. The asset is of evidential and historical value. The building has 17th century origins and has a rendered timber frame with some brick re-facing. The building has been maintained and added to up until the 20th century.
- 3.2.476 Based on cartographic and satellite imagery evidence, the setting of the asset has become increasingly wooded, and much of the enclosed farmland, particularly to the north-east of the asset towards Newton Flotman and immediately to the north has been lost. It is, however, possible to understand the Farmhouse and attendant outbuildings as a farming complex through its rural location, its layout, and the interplay between the complex elements. The setting of the asset, therefore, makes a moderate contribution to its value, but due to intervening tree cover, the setting does not extend to the draft Order Limits.
- 3.2.477 The following designated asset is located within the parish of Saxlingham Nethergate.
- 3.2.478 The **medium value** Grade II listed 'Hill Farmhouse' (**1304801**) is located on the southern flank of Westend in Saxlingham Thorpe and 1.95 km south-east of the draft Order Limits. The asset is of aesthetic, evidential and historical value. the former farmhouse dates to the 17th century and later and comprises a partly brick encased, plastered timber frame structure with a thatched roof. There is a small 19th century extension to the north.
- 3.2.479 The setting of the asset is informed by its roadside location within the dispersed settlement of Saxlingham Thorpe and by its large private garden, which is defined by high tree lined mature hedgerows. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance, and it being restricted to its roadside location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.2.480 The following designated assets are located within the parish of Flordon.
- 3.2.481 The **high value** Grade II\* 'Flordon Hall' (**1050698**) and the **medium value** Grade II assets 'Piggery 60 Yards South of Flordon Hall' (**1172231**) and 'Barn to Flordon Hall' (**1373055**) are located in a former farmyard 600 m north-east of Flordon Road, 600 m north-north-west of Flordon and 200 m south-east of the draft Order Limits. These assets are of evidential and historical value. The former farm complex is accessed by a private road off Flordon Road. The Hall (**1050698**) bears arms on the porch of Robert Kemp and Dorothy née Harris and so was likely constructed between 1595 and 1612. The structure is underbuilt rendered timber frame with a brick porch and brick gables to the wings and plain and pantile roofs. There has been limited 19th and 20th century alterations and additions. The barn (**1373055**) was built in the 17th century and comprises a weather boarded timber frame structure with a corrugated asbestos roof. The piggery (**1172231**) was possibly built as a dower house to Flordon Hall around 1600. It is brick built and has a corrugated asbestos roof.
- 3.2.482 The setting of the assets is shared and is informed by the relationship between the designated assets and their relationship with the other later elements of the farmyard. This setting is further informed by the surrounding agricultural landscape with which the assets have a functional and historical relationship. The hall is situated to the north of the other farm buildings within mature, tree lined grounds with lawned areas

and a kitchen garden. The setting of the assets instils a sense of seclusion and privacy and promotes an understanding of the farming industry. This setting, therefore, makes a moderate contribution to the value of the assets, and due to proximity and inadequate screen, it extends to the draft Order Limits.

- 3.2.483 The **high value** Grade I listed 'Rainthorpe Hall Including Garden Wall With Gate And Gate Piers' (**1050699**) is set within its **medium value** Grade II listed park and garden 'Rainthorpe Hall' (**1000292**) 1.3 km east of Flordon and 1.9 km south-east of the draft Order Limits. These assets are of evidential, historical, and aesthetic value. The hall and park are situated in the Tas Valley with the river forming the south-eastern limit of the parkland. White's Directory of 1883 states that the construction of Rainthorpe Hall (**1000292**) began in 1503 in the Medieval period, although the source of this reference is unknown. Records indicate the hall was purchased in 1579 by Thomas Baxter, a local barrister and member of Lincoln's Inn, who between 1579 and 1611 considerably enlarged and altered the house, adding two new wings. From the early 17th century to the middle of the 19th century Rainthorpe passed through many owners, until 1853 when the estate was purchased by the Hon Frederick Walpole MP. Walpole was an antiques collector and made many changes to the interior of the hall by the introduction of his collection and probably laid out the park. Following his death in 1878 Rainthorpe was purchased by Sir Charles Hervey who made further considerable alterations and additions to the Hall and built the stable block and gardener's cottage.
- 3.2.484 The setting of the Rainthorpe Hall complex is entirely informed by the relationships between the individual elements and the surrounding parkland. The Hall and attendant buildings and structures are associated with a kitchen garden and formal garden and lawned areas, but these areas give way to mature woodland. The encompassing mature woodland provides the Hall complex with a sense of isolation and tranquil seclusion. The woodland encroaches on the Hall complex to the north-west and south-east, however, tree lined avenues within the parkland provide more long-range views to the south-west and north-east. The setting of Rainthorpe Hall, therefore, makes a positive contribution to its value. Due to the mature wood land, particularly to the north-east, the asset's setting does not, however, extend to the draft Order Limits.
- 3.2.485 The setting of the parkland 'Rainthorpe Hall' (**1000292**) is defined by internal views, its relationship with the Rainthorpe Hall complex and the Tas which forms the south-eastern boundary of the parkland. In the direction of the draft Order Limits to the north-west, the park boundary is defined by the West and East Belts comprising 30-50 m wide strips of mature woodland that exclude external views and emphasise the insular nature of the park. There has been very limited 19th and 20th century residential development south and south-east of the park along Saxlingham Lane and the Taswood Lake fishery with its associated woodlands to the west of the park and the Hethersett and Tas Cricket Club to the north-west have been developed from the latter half of the 20th century. There has also been more considerable infill development of Newton Flotman and linear development along Flordon Road in the 20th and 21st centuries, which has encroached to within 600 m of the park's eastern boundary. The land between Flordon Road to the north-west and the Tas to the south-east is now a heavily wooded area, replacing the open farmland recorded on 20th century OS mapping. The woodland area to the east of the park and the lakes and woodland to the west are in keeping with a nature of the park and, therefore, create a sense of the park extending beyond its actual boundary. These landscape features, therefore, provided the park with a buffer zone greatly restricting the effect of external structural development on the setting of the park and allow the setting of

the park to make a positive contribution to its value. The insular nature of the parkland ensures its setting does not extend to the draft Order Limits.

- 3.2.486 The following listed buildings are located within the parish of Wreningham.
- 3.2.487 The **medium value** Grade II listed 'Bird-in-Hand P.H.' (**1304733**) is located on the eastern edge of Wreningham at the junction of Church Road and the B1113 Norwich Road. The asset is of evidential and historical value. The draft Order Limits lies 1.5 km to the south-east. The public house was built in the early 19th century of brick with a pantile roof.
- 3.2.488 The setting of the asset is informed by its roadside location serving travellers on the Norwich Road. The view to the south-east is interrupted by topography and mature tree lined hedgerows and so the setting of the asset does not extend to the draft Order Limits.
- 3.2.489 The **medium value** Grade II listed 'Glastonbury Cottage' (**1304706**) is located on the northern flank of High Road in Toprow, 890 m north-east of Fundenhall and 760 m north-west of the draft Order Limits. The asset is of evidential and historical value. The single dwelling was once two cottages, the first built in 1694 with the eastern half added in the 18th century. The asset is a rendered timber framed structure with a thatched roof.
- 3.2.490 The setting of the asset is informed by its location within the settlement and its view out over open farmland to the south. The setting has been slightly eroded by 20th century development and so makes a moderate contribution to the asset's value. There are broken long range views to the south, but due to the restricted nature of the setting, it does not extend to the draft Order Limits.
- 3.2.491 The following listed buildings are located within the parish of Ashwellthorpe and Fundenhall.
- 3.2.492 The **medium value** Grade II listed 'The Grange' (**1373562**) is located 230 m south of High Road in the southern limits of Toprow and 680 m north-west of the draft Order Limits. The asset is of evidential and historical value. The house was built in the 18th century with a rear wing added in the late 18th to early 19th centuries. The house is brick built and has a pantile roof.
- 3.2.493 The setting of the grange is informed by its location within its mature grounds and by glimpsed view of former farm buildings to the south, several of which are recorded on the first edition OS map of 1882. The setting instils feelings of privacy and seclusion and makes a considerable contribution to the value of the asset. The grounds of the asset and those of the former farm building to the south are heavily wooded and screen views south and south-westwards, the setting of the asset does not, therefore, extend to the draft Order Limits.
- 3.2.494 The **medium value** Grade II listed 'Walk Farmhouse' (**1049668**) is located on the Walk Farm complex 400 m south-east of Fundenhall and 490 m north-west of the draft Order Limits. The asset is of evidential and historical value. The house is probable 17th century in date and comprises a plastered Timber frame structure with a steep black glazed pantile roof.
- 3.2.495 The setting of the farmhouse is informed by its location within its grounds and its relationship with later elements of the farming complex. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. the setting of the asset, therefore, makes a

considerable contribution to its vale, but due to its restricted nature, and mature tree cover in the asset's grounds, the setting does not extend to the draft Order Limits.

- 3.2.496 The **medium value** Grade II listed 'The Smithy' (**1049673**) is located immediately north of the junction of Wymondham Road and the B1113 Norwich Road, at the northern end of Fundenhall and 810 m north-west of the draft Order Limits. The asset is of evidential and historical value. The smithy, recorded on the first edition OS map of 1882, was built in the mid-19th century, and comprises roughcast clay lump on a brick plinth and a pantile roof. The asset is now two semi-detached cottages.
- 3.2.497 The setting of the asset is informed by its roadside location, however, due to its change in function, loss of contemporary structures and encroaching 20th century development, the setting does not contribute to its value. The asset is now located within the grounds of Anvil House, which are lined with mature trees. This tree cover, and development, mature tree lined hedgerows and a copse in the intervening landscape screen the asset from the Project and so the setting of the asset does not extend to the draft Order Limits.
- 3.2.498 The **medium value** Grade II listed 'King's Head Public House' (**1306389**) is in Fundenhall, on the western flank of the B1113 Norwich Road and 750 m north-west of the draft Order Limits. The asset is of evidential and historical value. The asset was built in the 18th century with additions made in the 19th century. The walls are stuccoed, and it has a pantile roof.
- 3.2.499 The setting of the asset is informed by its roadside location serving travellers on the Norwich Road and by open views of agricultural land to the south-east. The public house has retained its function and 20th century development is screened from the asset by mature trees. The setting of the asset, therefore, makes a considerable contribution to the value of the asset, and due to its restricted roadside nature, the setting of the asset does not extend the draft Order Limits.
- 3.2.500 The **medium value** Grade II listed 'Ashwellthorpe Hall' (**1049674**) is located off a private road north of The Street, Ashwellthorpe and 1.7 km north-west of the draft Order Limits. The asset is of evidential and historical value. The hall is a brick-built house dating to around 1600, which was extended to the south in 1831 and north in 1845 in red brick in the Tudor style. It has a steep, slated roof. The asset and associated outbuildings are situated on a moated site, now partially dry.
- 3.2.501 The setting of the asset is informed by its relationship with the other buildings of the hall complex, The Lodge (**1373559** – see below) to the south-south-east and with the likely medieval moat. The grounds of the hall now extend beyond the moat and include vehicle access, boundaries defined by mature tree lined hedgerows, lawned areas and numerous mature trees. A second moat and associated pond lay at the south of the grounds. There has been some 20th century domestic development to the south and east of the asset, but the mature grounds ensure a sense of seclusion and privacy is maintained. The setting of the asset, therefore, makes a considerable contribution to its value, however, due to the mature grounds and development, mature tree lined hedgerows and a copse in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.502 The **medium value** Grade II listed 'The Lodge' (**1373559**) is located 130 m north of The Street in Ashwellthorpe, 180 m south-south-east of Ashwellthorpe Hall and 1.55 km north-west of the draft Order Limits. The asset is of evidential and historical value. The asset is a 17th century plastered timber frame cottage with modern brick extensions and a thatched roof.

- 3.2.503 The setting of the asset is informed by its location on the eastern edge of Ashwellthorpe and its relationship with the pond and associated moat immediately to the west and Ashwellthorpe Hall to the north-north-west. The asset has a large lawned garden with mature trees and mature tree lined hedgerow boundaries. A break in the boundary hedge allows views to the south-east out across open farmland. There has been some 20th century domestic development to the north and east of the asset, but the mature garden boundaries of the asset and the other dwellings ensure a sense of seclusion and privacy is maintained. The setting of the asset, therefore, makes a considerable contribution to its value, however, due to the mature grounds and development, mature tree lined hedgerows and a copse in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.504 The **medium value** Grade II listed 'Rectory Farmhouse' (**1049677**) is located on the north-western flank of Whipps Lane/Church Lane at the south-western extent of the dispersed settlement of Fundenhall and 1.4 km west of the draft Order Limits. The asset is of evidential and historical value. The farmhouse is a 17th century rendered timber frame structure with a thatched roof.
- 3.2.505 The setting of the asset is informed by its association with the other buildings within the former Rectory Farm complex, many of which are recorded on the first edition map of 1884. The setting is also informed by the surrounding agricultural landscape with which the farmhouse and farming complex have a historic and functional relationship. The Grange (**1373563** – see below) is located 90 m to the south-east, but intervening tree cover and mature hedgerows screens any intervisibility between the assets. Rectory Farm appears to be no longer working and the outbuildings have been converted into dwellings/holiday homes. The loss of functionally obscures, to a degree, the legibility of the farming complex and so the setting of the assets makes a moderate contribution to its value. Due to the mature hedges and trees along Whipps Lane/Church Lane and development, copses and mature tree lined hedgerows in the intervening landscape, however, the setting of the asset does not extend to the draft Order Limits.
- 3.2.506 The **medium value** Grade II listed 'The Grange' (**1373563**) is located on the south-eastern flank of Whipps Lane/Church Lane at the south-western extent of the dispersed settlement of Fundenhall and 1.3 km west of the draft Order Limits. The asset is of evidential and historical value. The grange likely dates to the 17th century and comprises a roughcast, partly brick-faced timber frame structure with a steep pantile roof.
- 3.2.507 The setting of the grange is informed by its location within the Grange Farm complex and by its relationship with the other farm building, many of which are recorded on the first edition OS map of 1884. The setting is also informed by the surrounding agricultural landscape with which the asset and farm have a historical and functional relationship. The 1907 OS map suggests the grange was associated with a modest area of parkland to the east and whilst the boundaries have been maintained, the land appears to be now used for grazing. The grange still maintains an open view of this land. The setting of the asset, therefore, makes a considerable contribution to its value. Due to mature tree lined hedgerows and development in the intervening landscape, the setting of the asset does not, however, extend to the draft Order Limits.
- 3.2.508 The **medium value** Grade II listed assets 'Rattees' (**1170238**) 'Elm Farmhouse' (**1373558**) are located immediately north-east of the junction of the B113 The Turnpike and Fundenhall Road, 830 m west of the draft Order Limits. The asset is of evidential and historical value. Rattees is an early 19th century built of red brick with

a low-pitched hipped roof. Elm Farmhouse is immediately north of Rattees and comprises a 17th century rendered timber frame house with a steep pantile roof.

- 3.2.509 The setting of the assets is shared and informed by their roadside location, by the relationship between the two and with a former n-shaped barn, now a dwelling, immediately to the south-east. The grounds of the assets and associated building include vehicle access, lawned areas and mature tree lined hedgerow boundaries creating a sense of privacy. The setting of the assets, therefore, makes a moderate contribution to their values, but does not extend to the draft Order Limits.
- 3.2.510 The following listed buildings are located within the parish of Tharston and Hapton:
- 3.2.511 The **medium value** Grade II listed White Horse Cottage (**1050023**) is located immediately south-west of the junction of Marsh Lane and Norwich Road, 350 m north of Hapton and 320 m south-east of the draft Order Limits. The asset is of evidential and historical value. The asset dates to the 17th century and comprises a plastered timber frame cottage with an 18th century brick extension to the north and a steep pantile roof.
- 3.2.512 The setting of the former public house is informed by its roadside location on which would have arrived its passing trade. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The asset was developed as a residential dwelling in the latter half of the 20th century and its grounds now serve as a garden. The setting of the asset makes a moderate contribution to its value, but due to mature tree growth flanking March Lane and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.513 The **medium value** Grade II listed 'Hapton Hall' (**1302044**) is located within a larger farming complex, now the Redwings Horse Sanctuary, 700 m south-south-west of Flordon and 1.35 km south-east of the draft Order Limits. The asset is of evidential and historical value. The hall is an early 19th century house built of buff coloured brick with a low-pitched hipped slate roof.
- 3.2.514 The setting of the asset is informed by its relationship with the other buildings of the farming complex many of which are recorded on the first edition OS map of 1884. The setting is also informed by the surrounding farming landscape with which the hall and associated buildings have historical and functional relationships. Despite the change in function, the legibility of the complex has not been impacted and so the setting makes a considerable contribution to the value of the asset. Due to topography, mature tree lined hedgerows, development, and small copses, however, the setting does not extend to the draft Order Limits.
- 3.2.515 The **medium value** Grade II listed 'The Vicarage' (**1373412**), of evidential and historical value, is located south of Holly Lane on the northern edge the settlement of Hapton and 700 m south of the draft Order Limits. The **high value** Grade I listed Church of St Margaret (**1179227** – see medieval section) lies 15 m to the north-east. the vicarage is an early 19th century house built of red brick with a low-pitched roof with new tiles.
- 3.2.516 The setting of the vicarage is informed by its relationships with the church and with the settlement it serves. The asset has a lawned garden with mature tree lined hedgerow boundaries, which largely obscure outward views although the church is visible. This setting instils feelings of seclusion and peace and, therefore, it makes a considerable contribution to the assets value. Due to the asset's mature boundaries, and topology, a copse and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.

- 3.2.517 The **medium value** Grade II listed assets 'Hapton House' (**1373375**), 'Hapton Chapel' (**1302015**) and 'Barn Immediately South Of Hapton Chapel' (**1050028**) are located on the raised northern flank of The Street at the western edge of Hapton and 700 m south-east of the draft Order Limits. These assets are of evidential and historical value. The house (**1373375**) was built in the 16th century and comprises a timber frame structure plastered to rear with an 18th century red brick front. The roof is tiled. The small Presbyterian chapel (**1302015**), 16 m to the east, was built in 1741 and comprises a rendered timber frame structure with a steep pantile roof. The asset has been converted into a dwelling. The barn (**1050028**), 12 m to the south of the chapel, is a 17th century timber framed structure weatherboarded on a brick plinth with steep pantile roof.
- 3.2.518 The setting of the assets is shared and informed by their interrelationships and by their location on the edge of Hapton, although the isolated location recorded on the first edition OS map of 1884 has been eroded by 20th century development to the east. Based on the cartographic evidence, the three assets were part of a building complex contained within wider grounds, however, presumably as the chapel and barn were converted into domestic dwellings, the grounds have been divided providing each asset with an individual garden area. The setting of the assets, therefore, makes a minor contribution to their values. Due to mature tree lined hedgerows on both flanks of Holly Lane and a copse and further mature tree lined hedgerows in the intervening landscape, the setting of the assets does not extend to the draft Order Limits.
- 3.2.519 The **medium value** Grade II listed 'Hillside Farmhouse' (**1050021**) is located on the northern flank of Fundenhall Road, 75 m east of Hapton Hall and 63 m south-east of the draft Order Limits. The asset is of evidential and historical value. The 17th century house comprises a plastered timber frame structure with a later tiled roof situated within a wider farming complex.
- 3.2.520 The setting of the farmhouse is informed by its location on the edge of the settlement and its relationship with the other buildings of the coherent farming complex, many of which are recorded on the first edition OS map of 1884. The setting further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, however, due to topography and a copse and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.521 The **medium value** Grade II listed 'Marsh View School Cottage' (**1050029**) is located on the northern flank of The Street at the heart of Hapton. The draft Order Limits lie 820 m to the north-west. The asset is of evidential and historical value. The asset is a 17th to 18th century house now divided into two. The structure comprises a plastered timber frame with a steep pantile roof.
- 3.2.522 The setting of the asset is informed by its village location and by its relationship with the adjacent school, which has resulted in its name. There has been some infill development in the 20th century, but this is largely sympathetic. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its enclosed location, the setting does not extend to the draft Order Limits.
- 3.2.523 The **medium value** Grade II listed 'Tharston Mill' (**1050024**) is located over the Tas, on the western flank of The Street 320 m south-south-east of Hapton and 1.5 km south-east of the draft Order Limits. The asset is of evidential and historical value. The 18th century mill, now a house, comprises a weatherboarded timber frame structure with a pantile roof.

- 3.2.524 The setting of the asset is informed by its situation over the Tas, which provided power for the mill, and its relationship with the small cluster of buildings around it, some of which are recorded on the first edition OS map of 1882. Despite its change of function, the legibility of the asset is largely intact, and so its setting makes a considerable contribution to its value. Due to the topography of its valley location and attendant mature tree cover, the setting of the asset does not extend to the draft Order Limits.
- 3.2.525 The **medium value** Grade II listed 'Chamusca' (**1373373**) is located on the southern flank of the Tas Valley and The Street, 690 m south-east of Hapton and 1.8 km south-east of the draft Order Limits. The asset is of evidential and historical value. The asset is a 17th to 18th century rendered timber frame structure, fronted in red brick in the 19th century with a steep pantile roof.
- 3.2.526 The setting of the asset is informed by its farmyard location, although the associated buildings recorded on 19th and 20th century have been lost or replaced. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The asset's setting, therefore, makes a moderate contribution to its value, however, due to the topography of its valley location and attendant mature tree cover, the setting of the asset does not extend to the draft Order Limits.
- 3.2.527 The **medium value** Grade II listed 'Watering Farmhouse' (**1302052**) is in the Tas Valley on the northern flank of Long Lane, 1.1 km south of Hapton and 1.45 km south-east of the draft Order Limits. The asset is of evidential and historical value. The asset is a 17th century farmhouse comprising a rendered timber frame structure with brick faced gables and a steep pantile roof.
- 3.2.528 The setting of the asset is informed by its farmyard location and its relationship with the farm outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and other farm buildings have a historical and functional relationship. The introduction of the extant Great Eastern Railway to the east and the defunct Wymondham and Forncett Branch to the west has, however, changed the setting of the asset and so it makes a moderate contribution to the asset's value. The setting of the asset does not extend to the draft Order Limits due to the topography of its valley location and mature trees lining the route of the defunct branch line immediately to the west.
- 3.2.529 The following listed building is located within the parish of Forcett:
- 3.2.530 The **medium value** Grade II listed 'Bayes Farmhouse' (**1050367**) is located on the western flank of Bayes Lane, 250 m south of Hapton and 8600 m south-east of the draft Order Limits. The asset is of evidential and historical value. The asset is a 17th century plastered and brick faced timber frame cottage with a steep pantile roof situated within a wider farming complex.
- 3.2.531 The setting of the asset is informed by its location on the southern flank of a shallow east/west aligned tributary valley of the Tas Valley to the east. The setting is further informed by its relationship with the other buildings of the farm complex, most of which are recorded on the first edition OS map of 1884. The asset and associated farm buildings have a functional and historical relationship with the surrounding agricultural landscape further informing the asset's setting. Other than the loss of some field boundaries and the line of a now defunct railway, the asset's setting has seen very little change and so it makes a considerable contribution to its value. Due

to topography and mature tree lined hedgerows, however, the setting of the asset does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.532 It was noted that during its demolition, a barn had timber frames with solid arched brackets and straight braces, which appeared to be 16th to 17th century in date. South Norfolk District Council, however, believes the barn was a later structure reusing older timbers. The site of the **low value** former barn (**1047**) of evidential value is located 760 m east of Fundenhall, immediately south of Hapton Road and partially within the draft Order Limits.
- 3.2.533 The **low value** Elm Tree Farm (**1313**) is located 940 m south-east of Fundenhall on the northern flank of Hapton Road and 20 m east of the draft Order Limits. The farmhouse is of evidential value and is a 16th century timber framed building with a large stone or brick rendered fireplace.
- 3.2.534 Further evidence of post medieval activity of evidential value in the Flordon and Fundenhall area is represented by **low value** findspots, and artefacts recovered during fieldwalking and metal detector surveys. These assets comprise:
- A post medieval , copper alloy bell, book fitting, box, buckles, buttons, a cauldron fragment, a chain coins, coin weight, furniture fitting, dress component, harness fitting, a jetton, a key, a knife, a padlock, a seal, a purse, spurs, strap fittings, a stud, tokens, a thimble and vessel fragments; a silver spoon, pin and coins; a gold finger ring; lead cloth seal, button and weights and pottery sherds in a multi-period finds assemblage (**1130**) recovered from farmland 500 m south-east of Fundenhall, immediately south of Hapton Road, partially within the draft Order Limits and situated on higher ground overlooking a tributary of the Tas Valley to the south-east
  - A post medieval, copper alloy apothecary weight, finger ring, jetton, coin, strap fitting, sword belt and token and a silver coin in a multi-period finds assemblage (**1133**) recovered from farmland 740 m east-south-east of Fundenhall and within the draft Order Limits
  - Two post medieval copper alloy harness mounts, two lead cloth seals and a Russian bale seal in a multi-period finds assemblage (**1280**) found 600 m north-west of Flordon and partially within the draft Order Limits
  - Four post medieval copper alloy harness mounts in a multi-period finds assemblage (**1286**) recovered from farmland 650 m north-west of Flordon, immediately east of Flordon Road and partially within the draft Order Limits
  - A post medieval copper alloy harness mount in a multi-period find assemblage (**1217**) recovered from farmland 750 m north-west of Flordon and largely within the draft Order Limits
  - A post medieval copper alloy buckle, button, coin and strap fitting, a lead weight, and a silver coin in a multi-period finds assemblage (**1265**) recovered from farmland 900 m north-west of Flordon, immediately east of Flordon Road and partially within the draft Order Limits
  - A post medieval copper alloy button and harness mount in a multi-period finds assemblage (**1266**) recovered from farmland 570 m north-west of Flordon and partially within the draft Order Limits

- A post medieval James I silver sixpence in a multi-period finds assemblage (**1268**) recovered from farmland 610 m north-north-west of Flordon and partially within the draft Order Limits
- Post medieval copper alloy harness mounts and crotal bell, and a lead weight in a multi period finds assemblage (**1279**) recovered from farmland 800 m north-north-west of Flordon and partially within the draft Order Limits
- Three post medieval copper alloy buckles, two harness mounts and a lead alloy buckle in a multi-period assemblage (**1302**) recovered from farmland 600 m north-north-west of Flordon and just clipping the eastern edge of the draft Order Limits
- A post medieval buckle, rotary key, harness mount, a sword belt fitting and a lead/iron steelyard weight in a multi-period finds assemblage (**1289**) recovered from land around an unnamed farm 440 m north of The Street, Flordon and immediately east of the draft Order Limits
- Two post medieval copper alloy crotal bells, a buckle and a lead cloth seal in a multi-period finds assemblage (**1285**) recovered from farmland 850 m north of Flordon and 30 m east of the draft Order Limits
- A medieval copper alloy finger ring, a strap loop, a thimble, two buckles and strap mounts possibly from a box or casket; and a medieval/post medieval copper alloy button and dress hook in a multi-period finds assemblage (**1273**) recovered from farmland 1.7 km north-east of Fundenhall, immediately west of Wymondham Road and 100 m south-east of the draft Order Limits
- Two post medieval copper alloy buckles, harness mount, a fragment of a spur, and a lead cloth seal in a multi-period finds assemblage (**1131**) recovered from farmland immediately north of Fundenhall Road, 980 m east-south-east of Fundenhall and 130 m east of the draft Order Limits
- A post medieval, copper alloy coin and jetton, a silver coin and a lead cloth seal and token in a multi-period finds assemblage (**1132**) recovered from farmland 500 m south-east of Fundenhall and 180 m west of the draft Order Limits
- A post medieval copper alloy strap fitting in a multi-period finds assemblage (**1193**) recovered from farmland on the eastern outskirts of Fundenhall and 210 m north-west of the draft Order Limits
- A post medieval silver coin and copper alloy token and weight in a multi-period finds assemblage (**1143**) recovered from farmland immediately east of Fundenhall and 220 m north-west of the draft Order Limits
- A post medieval, copper alloy thimble, buckle, button, harness fitting, finger ring, strap fittings and a vessel fragment, and a silver thimble in a multi-period finds assemblage (**1149**) recovered from farmland 720 m west-south-west of Flordon and 220 m south-east of the draft Order Limits
- A post medieval copper alloy candlestick socket, crotal bell and a sword belt mount, a lead cloth seal, and a silver coin in a multi-period finds assemblage (**1269**) recovered from farmland 240 m north of Flordon and 230 m south-east of the draft Order Limits
- A post medieval copper alloy harness mount, jetton, token, and a hooked sword belt fitting in a multi-period finds assemblage (**1288**) recovered from farmland 300 m west of Flordon and 280 m south-east of the draft Order Limits

- A post medieval copper alloy buckle, button, dress hook, strap fitting and token and a silver coin in a multi-period finds assemblage (**1180**) recovered from farmland 1 km north-east of Fundenhall and 290 m north-west of the draft Order Limits
- Post medieval copper alloy harness mounts, crotal bells, thimbles, furniture fitting and a button, two silver coins, and a lead trade weight, cloth seal and a four-part seal in a multi-period finds assemblage (**1251**) recovered from farmland 1.8 km south-west of Flordon and 160 m east of the draft Order Limits

## **Forncett St Mary and Tacolneston**

### *Designated Heritage Assets*

- 3.2.535 The following listed building is located within the parish of Ashwellthorpe and Fundenhall.
- 3.2.536 The **medium value** Grade II listed Lyndale (**1049671**) is located on the northern flank of The Street, at the eastern end of the settlement of Fundenhall Street and 1.8 km west-northwest of the draft Order Limits. The asset is of evidential and historical value. The asset comprises a 17th century plastered timber frame house with a steep pantile roof. The asset appears to have now been split in to two dwellings with extensions built to the rear.
- 3.2.537 The setting of the house is informed by its isolated location on the eastern edge of the settlement, by its grounds defined by mature tree lined boundaries and by the surrounding agricultural landscape with which it has a historical relationship. The setting of the asset instils feelings of privacy and seclusion and, therefore, makes a moderate contribution to its value. Due to topography and mature tree lined boundaries, small copses and more recent development, the setting does not, however, extend to the draft Order Limits.
- 3.2.538 The following listed buildings are located within the parish of Forncett.
- 3.2.539 The **medium value** Grade II listed 'The Chequers Public House' (**1373252**) is located south of the junction of High Road and Chequers Hill, 980 m north-north-east of Forncett St Mary and 890 m east-south-east of the draft Order Limits. The asset is of evidential and historical value. The 19th century building is constructed of plastered clay lump and has a hipped thatched roof. There are lean-to extensions to the north-east and south-east. The asset is now a private dwelling.
- 3.2.540 The setting of the former public house is informed by its roadside location and the thoroughfares that carried its patrons. This setting does not extend to the draft Order Limits.
- 3.2.541 The **medium value** Grade II listed assets 'Maryvale' (**1152708**) and 'The Old Post Office And Labunrum Cottage' (**1050378**) are located either side of Low Road in the Tas Valley, 560 m north-north-east of Forncett St Mary and 1.1 km east-south-east of the draft Order Limits. These assets are of evidential and historical value. Maryvale is an early 18th roughcast timber frame cottage with brick-faced end walls and a steep pantile roof. The Old Post Office and Labunrum Cottage are late 18th to early 19th century plastered timber frame cottages with a pantile roof.
- 3.2.542 The setting of the assets is shared and informed by their roadside location in the Tas Valley. The topography of the valley ensures this setting does not extend to the draft Order Limits.

- 3.2.543 The linear settlements of Forncett St Mary and Forncett St Peter lie to the east of the draft Order Limits and contain the following listed buildings:
- 3.2.544 The **medium value** Grade II listed assets 'Barn North-East of Yew Tree Farmhouse' (**1304630**) and 'Barn Immediately North-West of Yew Tree Farmhouse' (**1373220**) are associated with the medieval 15th century Grade II\* Yew Tree Farmhouse (**1152706**). These assets are of evidential and historical value and are located on the eastern flank of Low Road, at the northern edge of Forncett St Mary on the western flank of the Tas Valley and 950 m east of the draft Order Limits. The barn (**1304630**) to the north-east dates to the late 17th to early 18th centuries and comprises a weatherboarded timber frame structure with a steep pantile roof. The asset has a projecting wing to the north of clay lump construction, also with a pantile roof. The north-western barn (**1373220**) is of a similar date and comprises a plastered timber frame structure with a steep pantile roof and a lean-to on the north side.
- 3.2.545 The setting of the assets is shared with Yew Tree Farmhouse and is informed by their location within a former farming complex and by their relationships with each other and the late medieval farmhouse. The setting is further informed by their relationships with the non-designated buildings of the former farming complex, and by the surrounding agricultural landscape with which the assets have historical and functional relationships. The assets are situated within mature grounds that instil feelings of privacy and peacefulness and although the farm is no longer working, the complex is still legible as former farm buildings. The setting of the barns, therefore, make a considerable contribution to their values, however, due to the mature grounds of the assets and the topography and mature tree lined hedgerows and copses of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.546 The **medium value** Grade II listed 'Riverside Farmhouse' (**1050377**) is located on the eastern flank of Low Road, on the western flank of the Tas Valley and 990 m east of the draft Order Limits. The asset is of evidential and historical value. The asset dates to the 17th century and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.547 The setting of the asset is informed by its roadside location within the dispersed settlement. The setting is further informed by its garden and lawns defined by mature tree lined hedgerows. The setting of the asset, therefore, make a considerable contribution to its value, however, due to the mature grounds of the asset and the topography and mature tree lined hedgerows and copses of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.548 The **medium value** Grade II listed 'Kingsmuir and Adjacent Cottage' (**1050376**) is located on the eastern flank of Low Road, 40 m south of Riverside Farmhouse on the western flank of the Tas Valley and 980 m east of the draft Order Limits. The asset is of evidential and historical value and comprise a row of early 19th century cottages constructed of flint with a brick first floor and brick dressings. Kingsmuir, the southern cottage, was faced with red brick in the late 19th century and the cottages share a pantile roof.
- 3.2.549 The setting of the asset is informed by its roadside location within the dispersed settlement. The setting is further informed by its garden, lawn and pond to the rear defined by mature tree lined hedgerows and by its open aspect on to Low Road. The setting of the asset, therefore, make a considerable contribution to its value, however, due to the mature grounds of the asset and the topography and mature tree lined hedgerows and copses of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.550 The **medium value** Grade II listed 'Hannays' (**1152704**) backs straight on to Low Road, 40 m south of Kingsmuir on the western flank of the Tas Valley and 960 m east of the draft Order Limits. The asset is of evidential and historical value and dates to the 17th century and comprises a plastered timber frame house with a pantile roof. It is adjoined to the south by a non-designated east/west aligned range.
- 3.2.551 The setting of the asset is informed by its roadside location within the dispersed settlement and by its relationship with its non-designated southern wing. The setting is further informed by its relationship with the likely 19th century non-designated buildings of the Forngett Industrial Steam Museum immediately to the north and the likely 19th century outbuildings of Old Hall Farm to the south. The setting of the asset, therefore, make a considerable contribution to its value, however, due to the topography and mature tree lined hedgerows and copses of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.552 The **high value** Grade II\* listed 'Old Hall Farmhouse' (**1373219**) backs straight on to Low Road, 50 m south of Hannays on the western flank of the Tas Valley and 970 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the late 16th century and comprises a plastered timber frame house with an early 17th painted brick wing to the south-west and a steep glazed black pantile roof. Also included in the listing is a plastered timber frame outbuilding with a pantile roof of probable 17th or 18th century date.
- 3.2.553 The setting of the asset is informed by its roadside location within the settlement and by its relationship with the non-designated elements of Old Hall Farm to the north. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The ground of the asset includes a lawned area and a copse and is defined along Low Road by a high, thick hedge. The setting of the asset, therefore, make a considerable contribution to its value, however, due to the topography and mature tree lined hedgerows and copses of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.554 The **medium value** Grade II listed 'Four Seasons' (**1373215**) is located on the northern flank of Cheney's Lane and 520 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a roughcast timber frame house with a thatched roof.
- 3.2.555 The setting of the asset is informed by its roadside location within the settlement and by its relationship with the non-designated Hill Farm to the west and the non-designated buildings on the southern flank of Cheney's Lane, which include the 19th century Forngett St Mary Methodist Chapel, all of which are recorded on the first edition OS map of 1884. The setting is further informed by the asset's relationship with associated non-designated outbuildings recorded on the first edition OS map, that indicate the complex has likely farming origins. The extensive grounds of the asset include decorative and kitchen gardens and are defined to the west, north and east by mature tree cover forming a large copse, which instils feeling of privacy and enclosure. The setting of the asset, therefore, makes a considerable contribution to its value, however, due to the mature grounds and mature tree lined hedgerows, copses and development in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.556 The **medium value** Grade II listed 'Springside' (**1373218**) is located off a private road 170 m west of Low Road and 850 m east of the draft Order Limits. The asset is of evidential and historical and comprises a 17th century roughcast timber frame cottage with a steep pantile roof.

- 3.2.557 The setting of the asset is informed by its location within the dispersed settlement and its relationships with the contemporary Grade II listed cottage to the south (see below) and the non-designated former school, now village hall, to the east, both of which are recorded on the first edition OS map of 1884. The asset is situated in a moderately large parcel of land with tree cover to the north and south and a large copse to the east. The setting of the asset, therefore, makes a moderate contribution to its value, however, the heavy tree cover screens the Project from the asset and so the setting does not extend to the draft Order Limits.
- 3.2.558 The **medium value** Grade II listed 'Cottage Approximately 75 Yards South of Springside' (**1304664**) is located as described by its designating and 850 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a thatched roof.
- 3.2.559 The setting of the asset is informed by its location within the dispersed settlement and by its relationship with the contemporary Grade II listed Springside to the north. The setting is further informed by its small grounds defined by mature tree lined hedgerows. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its mature grounds and further mature tree lined hedgerows and a copse in the intervening, the setting does not extend to the draft Order Limits.
- 3.2.560 The following listed buildings are in the Forncett conservation area (**CA23**):
- 3.2.561 The **medium value** Grade II listed 'The Croft' (**1152589**) is located at the north-western extent of the Forncett conservation area, on the southern flank of Cheney's Lane and 750 m east-south-east of the draft Order Limits. The asset is of evidential and historical value and comprises a 16th century plastered timber frame house with a thatched roof.
- 3.2.562 The setting of the asset is informed by its secluded location within the settlement and by its relationship with two nearby likely 19th century buildings (The Barns at the Croft) recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The barns are now residential properties and apparently now separate from the Croft. The asset's grounds are mature, defined by tree lined hedgerows and contain several mature trees. The setting of the asset affords it seclusion and privacy and, therefore, makes a considerable contribution to its value. Due to the mature grounds and copses, development and further mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.563 The **medium value** Grade II listed 'Rattles' (**1050375**) is located east of Low Road, on the western flank of the Tas Valley and 970 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame cottage with a thatched roof. There is later one storey plastered wings at either end of the cottage with pantile roofs.
- 3.2.564 The setting of the asset is informed by its roadside location within the settlement and by its relationship with the two buildings to the north-east that are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The asset's grounds include a lawned area to the south and a kitchen garden to the east and are defined by tree lined hedgerows. There is 20th century residential development to the south, and so the setting of the asset makes a moderate contribution it its value. Due to the topography of the Tas Valley and copses and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.

- 3.2.565 The **medium value** Grade II listed assets 'Street Farmhouse' (**1050380**) and 'Barn North-West of Street Farmhouse' (**1152772**) are located east of Low Road, on the western flank of the Tas Valley, 90 m south of Rattles and 1 km east of the draft Order Limits. These assets are of evidential and historical value. The farmhouse probably dates to the 17th century and comprises a rendered timber frame structure with a steep black glazed pantile roof. The barn likely dates to the 18th to 19th centuries and comprises a clay lump structure with a pantile roof. The barn is now a residential dwelling.
- 3.2.566 The setting of the assets is shared and informed by their roadside location, by their interrelationship, by their relationship with later buildings of the farm complex and by the surrounding agricultural landscape with which the assets have historical and functional relationships. The assets and later building are coherent as a farming complex and so the setting makes a considerable contribution to their values. Due to the topography of the Tas Valley and copses and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.
- 3.2.567 The **medium value** Grade II listed 'Sunny Acres' (**1050379**) is located west of Low Road, on the western flank of the Tas Valley and 990 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a pantile roof.
- 3.2.568 The setting of the asset is informed by its roadside location within the settlement and by its relationship with a building just to the north, recorded on the first edition OS map of 1884. The setting is also informed by mature tree growth on all sides of the asset. The setting of the asset affords it seclusion and privacy and, therefore, makes a considerable contribution to its value. Due to the to the mature copses to the west, however, the setting does not extend to the draft Order Limits.
- 3.2.569 The **medium value** Grade II listed 'Corner Farmhouse' (**1373221**) is located west of Low Road, on the western flank of the Tas Valley and 1.1 km east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a roughcast timber farm structure with a steep black glazed pantile roof.
- 3.2.570 The setting of the asset is informed by its roadside location in the settlement and by its relationship with other surviving non-designated buildings of the farming complex recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the assets have a historical and functional relationship. Several of the farm buildings recorded on the 1884 map are now lost and the function of the remaining buildings has changed. The grounds of the asset included several trees, and the boundaries largely consist of mature tree lined hedgerows. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the topography of the Tas Valley and copses and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.
- 3.2.571 The **medium value** Grade II listed assets 'The Homestead' (**1373242**) and 'Barn And Stables North-East of The Homestead' (**1050345**) are located west of Low Road, on the western flank of the Tas Valley and 1.1 km east of the draft Order Limits. These assets are of evidential and historical value. The Homestead dates to the 17th century and comprises a plastered timber frame house with a low pitched black glazed pantile roof. The barn is also of 17th century date and comprises a weatherboarded timber frame structure with a later low-pitched pantile roof.
- 3.2.572 The setting of the assets is shared and informed by their roadside location in the settlement, by their interrelationship and their relationships with other surviving non-

designated buildings of the farming complex recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the assets have a historical and functional relationship. Much of the farming complex survives and is coherent as such despite the barn now serving as a domestic dwelling and minor 20th century residential development to the south. The grounds of the assets are defined by mature tree lined hedgerows and contain lawned areas and scattered trees. The setting of the assets, therefore, makes a moderate contribution to their value, but due to the topography of the Tas Valley and copses and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.

- 3.2.573 The **medium value** Grade II listed 'House Adjoining North-West of The Stores' (**1050344**) is located west of Low Road, on the western flank of the Tas Valley and 1.1 km east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a steep tiled roof.
- 3.2.574 The setting of the house is informed by its roadside location within the settlement and its relationship with the adjoining east/west aligned wing and former stores to the south. the large garden area to the west of the asset is defined by mature tree lined hedgerows and contains scatter mature trees. The setting of the asset has been encroached upon by 20th century residential development to the north and south and so makes a moderate contribution to its value. Due to the topography of the Tas Valley and copses and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.
- 3.2.575 The **medium value** Grade II listed 'Stone Cottage' (**1050343**) is located west of Low Road, on the western flank of the Tas Valley and 1.1 km east of the draft Order Limits. The asset is of evidential and historical value, dates to the early 19th century and is constructed of flint cobbles with buff coloured brick dressings and a black glazed pantile roof.
- 3.2.576 The setting of the asset is informed by its roadside location within the settlement and by its open view of arable land to the east. To the west and rear of the asset is a tree lined lawned area and beyond that a paddock defined by mature tree lined hedgerows. The setting of the asset has been encroached upon by 20th century residential development to the north and south and so makes a moderate contribution to its value. Due to the tree lined garden and paddock to the rear of the asset and the topography of the Tas Valley and copses and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.
- 3.2.577 The **medium value** Grade II listed assets 'Church Farmhouse' (**1050341**) and 'Barn Immediately South-West Of Church Farmhouse' (**1050342**) are located west of Low Road, on the western flank of the Tas Valley and 1.2 km east of the draft Order Limits. These assets are of evidential and historical value. The farmhouse comprises a 17th century plastered timber frame house with a steep tiled roof. The barn is of similar date and construction with a steep asbestos sheet clad roof.
- 3.2.578 The setting of the assets is shared and informed by their roadside location within the settlement, by their interrelationship and by their relationships with other non-designated buildings of the farming complex, several of which are recorded on the first edition OS map of 1884. The setting is further informed by the agricultural landscape to the west and east with which the assets have historical and functional relationships. The lawned garden to the rear of the asset has scattered trees and is defined to the west by a mature hedgerow. Although several of the buildings are now

residential properties, their coherence as a former farming complex is little diminished, and so the setting of the assets makes a considerable contribution to their values. Due to the asset's mature garden, the topography of the Tas Valley and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.

- 3.2.579 The **medium value** Grade II listed 'Clavers Cottage' (**1050340**) is located 20 m south of the Church Farm complex, west of Low Road, on the western flank of the Tas Valley and 1.2 km east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a thatched roof.
- 3.2.580 The setting of the asset is informed by its roadside location in the settlement and its relationship with the Church Farm complex to the north. The asset has a lawned garden to the rear with scattered trees, which is defined to the west by a mature hedgerow. The setting of the asset makes a considerable contribution to its value, but due to the asset's mature garden, the topography of the Tas Valley and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.581 The following listed buildings are located within the settlement of Forngett St Peter but outside the Forngett conservation area:
- 3.2.582 The **medium value** Grade II listed 'Somerset Farmhouse' (**1152775**) is located south of Station Road on the eastern flank of the Tas Valley and 1.5 km east of the draft Order Limits. The asset is of evidential and historical value and comprises is a 18th to 19th century painted brick house with a possible earlier core and a pantile roof.
- 3.2.583 The setting of the asset is informed by its large grounds that include lawned areas, scattered trees, and a kitchen garden and defined by a high mature hedgerow. The asset is attached to the adjacent farmyard by a driveway to the south and much of the farming complex recorded on the first edition OS map of 1884 is extant, although modern, steel frame hanger style barns have been added. The setting of the asset makes a moderate contribution to its value, but due to its mature grounds and the topography, tree lined boundaries, copses and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.584 The **medium value** Grade II listed 'Hilltop Cottage' (**1152802**) is located on the western flank of Wacton Road, east of the Tas Valley and 2 km east of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century timber frame house, encased in red brick in the 19th century with a steep pantile roof.
- 3.2.585 The setting of the asset is informed by its copse-screened location east of the road, by largely open views of arable land to the north, west and south and by 21st century out buildings and stables. Satellite imagery indicates that the small northern wing to the rear (west) of the structure has been demolished and that a larger central wing was added in 2021 (Google Earth accessed 25/07/2023). The setting of the asset makes a moderate contribution to its value, but due to the topography, tree lined boundaries, copses and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.586 The **medium value** Grade II listed 'Alborough' (**1050381**) is located south of Mill Road, on the western flank of the Tas Valley and 980 m east-south-east of the draft Order Limits. The asset is of evidential and historical value, dates to the early 19th century and comprises a plastered brick and clay lump structure with low pitched slate roof.

- 3.2.587 The setting of the asset is informed by its relationship with the non-designated outbuildings of its former farming complex location, although most of the outbuildings recorded on the first edition OS map of 1884 are now gone. The setting is further informed by the asset's large grounds to the west which comprises lawned areas and paddocks with scattered trees and mature tree lined hedgerow boundaries. The setting of the asset makes a moderate contribution to its value, but due to its mature grounds and the topography, tree lined boundaries, copses and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.588 The **medium value** Grade II listed 'Orchard Cottage' (**1050348**) is located on the eastern flank of the Tas Valley, 1.5 km east-south-east of the draft Order Limits and accessed via a private road off Wash Lane. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame cottage with brick-faced end walls and a thatched roof.
- 3.2.589 The setting of the asset is informed by its secluded location along with two other properties, the nearest of which lies 40 m to the south and is recorded on the first edition OS map of 1884. The setting is further informed by its kitchen garden and paddocks to the north-east of the asset. The setting of the asset makes a considerable contribution to its value, but due to the topography, tree lined boundaries, copses and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.590 The **medium value** Grade II listed 'Walnut Cottages' (**1373251**) is located east of Aslacton Road, on the western flank of the Tas Valley and 1.2 km south-east of the draft Order Limits. The asset is of evidential and historical value and comprises a range of plastered clay lump constructed mid-18th century cottages, now a single dwelling, with a pantile roof.
- 3.2.591 The setting of the asset is informed by its roadside location within the settlement and by its grounds with scattered trees and mature tree lined hedgerow boundaries. The setting is further informed by an open view of arable land to the west; however, 20th century residential development has encroached on the asset from the north and south. The setting of the asset, therefore, makes a minor contribution to its value, but due to the topography, tree lined boundaries, copses and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.592 The **medium value** Grade II listed 'Sandpit Farmhouse' (**1152773**) is accessed off private road west of Overwood Lane and 990 m south-east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a rendered timber frame structure with a steep pantile roof.
- 3.2.593 The setting of the asset is informed by its relationship with the non-designated outbuildings of its former farming complex location, although most of the outbuildings recorded on the first edition OS map of 1884 are now gone. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The ground of the asset includes lawned areas and scattered trees and are defined by mature tree lined hedgerow boundaries. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its mature grounds and the topography, tree lined boundaries, copses and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.594 The settlement of Forncett End is located immediately south of Tacolneston and contains the following 13 Grade II listed buildings.

- 3.2.595 The **medium value** Grade II listed 'The Horse Shoes' (**1152659**) is located on the southern flank of Long Stratton Road, Forncett End, 880 m west and 660 m north of the draft Order Limits. The former inn, now a dwelling, is of evidential and historical value. and comprises an 18th century cottage with adjoining barn and stables. The buildings are of plastered timber frame construction with pantile roofs.
- 3.2.596 The setting of the asset is informed by its location within the settlement and by its mature, large garden. The large garden is defined by timber panel fencing with a 2.5 m high, thick evergreen hedge behind, which screens the asset from 20th century development to the north-west, north-east, and south-east. The setting of the asset, therefore, instils a feeling of privacy and makes a moderate contribution to its value. Due to the garden hedge, and 20th century development, tree cover and mature hedgerows to the east, and copses and mature tree hedgerows to the south, the setting of the asset does not extend to the draft Order Limits.
- 3.2.597 The **medium value** Grade II listed 'Chestnut View' (**1373216**) is located on the southern flank of Long Stratton Road, Forncett End, 810 m west and 560 m north of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame cottage with a thatched roof.
- 3.2.598 The setting of the asset is informed by its location within the settlement, its mature garden and its relationship with the Grade II listed Chestnut Tree Farmhouse and associated former farm buildings on the northern flank of Long Stratton Road. The narrow garden extends 180 m south of the asset, contains numerous modern trees and is defined by mature tree lined hedgerows. The asset is flanked to the west by a 20th century dwelling. The garden setting of the asset instils a sense of privacy and rural tranquillity and, therefore, it makes a moderate contribution to the asset's value. Due to the mature garden, and 20th century development, tree cover and mature hedgerows to the east, and copses and mature tree hedgerows to the south, the setting of the asset does not extend to the draft Order Limits.
- 3.2.599 The **medium value** Grade II listed 'Chestnut Tree Farmhouse' (**1152667**) is located on the northern flank of Long Stratton Road, Forncett End, 780 m west and 590 m north of the draft Order Limits. The asset is a large, late 16th to early 17th century house is of evidential and historical value and comprises a plastered timber frame structure with brick faced north and south ends and a thatched roof.
- 3.2.600 The setting of the farmhouse is informed by its location within the settlement, its large, mature grounds and by its relationships with it former associated farm building and with the Grade II listed Chestnut View on the southern flank of Long Stratton Road. The setting is further informed by the agricultural land to the north and south with which the asset has a historical and functional relationship. The associated farm buildings have been converted into domestic dwellings, but they and the farmhouse retain readable coherence as a former farming complex. The large, mature grounds of the farmhouse contain numerous mature trees and are defined by high, thick tree lined hedgerows, which instils feeling of seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds, the setting does not extend to the draft Order Limits.
- 3.2.601 The **medium value** Grade II listed "Limetree Farm Cottages" (**1050372**) is on the eastern edge of Forncett End, on the southern flank of Long Stratton Road and 500 m west and 430 m north of the draft Order Limits. The asset is a 17th century house of evidential and historical value comprising a plastered timber frame structure with a pantile roof.

- 3.2.602 The setting of the asset is informed by its relationship with the Limetree Farm complex 90 m to the east-north-east and the agricultural landscape to the south with which it has a historical relationship. Twentieth century residential development along the northern flank of Long Stratton Road has, however, encroached on the asset and severed its links the agricultural land to the north. The asset has an associated garden containing a few mature trees and defined by high, thick evergreen hedges. The setting of the asset, therefore, makes a moderate contribution to its value and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.2.603 The **medium value** Grade II listed assets 'Limetree Farmhouse' (**1152683**), 'Barn East of Limetree Farmhouse' (**1050373**), 'Stables Immediately South-East of Limetree Farmhouse' (**1152690**) and 'Cart Shed and Hay Loft South-East of Limetree Farmhouse' (**1373217**) are located on the northern flank of Long Stratton Road at the eastern limit of Fornsett End and 430 m west of the draft Order Limits. These assets are of evidential and historical value. The farmhouse (**1152683**) is a 17th century house comprising a timber frame structure that was encased in red brick in the 19th century with a black glazed pantile roof. The barn (**1050373**) and stables date to the early 19th century and comprises a plastered clay lump structures with black glazed pantile roofs. The cart shed (**1373217**) is of similar date and construction but has a weatherboarded gable.
- 3.2.604 The setting of the assets is shared and informed by the interrelationship between them, their relationship with the Grade II listed Limetree Farm Cottages to the west-south-west and the surrounding agricultural landscape with which the assets have a historical and functional relationship. Twentieth century residential development has encroached on the assets from the west but their coherence as a farming complex has not been diminished. The complex is located within grounds with lawned areas and paddocks and defined by tree lined high, thick mature hedgerows. The setting of the assets instils a feeling of privacy, but it also retains a sense of agricultural industry that makes a considerable contribution to their values. Due to the proximity of the Project, however, the setting of the asset extends to the draft Order Limits.
- 3.2.605 The **medium value** Grade II listed asset 'Corner Farmhouse' (**1050374**) and 'Barn Adjoining Corner Farmhouse on South-West' (**1152699**) are located on the eastern flank of Long Stratton Road on the eastern edge of Fornsett End and 350 m west and north of the draft Order Limits. These assets are of evidential and historical value. The farmhouse was built in the 17th century and comprises a plastered timber frame structure with a steep black glazed pantile roof. The barn dates to the 17th century and comprises a weatherboarded timber frame structure fronted with 19th century painted brick on the west and a pantile roof.
- 3.2.606 The setting of the assets is shared and informed the asset's interrelationship, their relationships with non-designated elements of the farming complex, and the surrounding agricultural landscape with which they have historical and functional relationships. Much of the farming complex recorded on early 20th century mapping has, however, been demolished and several large, modern hanger-like barns now lie to the south of the assets. The setting of the assets, therefore, makes a minor contribution to their value, and due to proximity and very limited screening, the setting extends to the draft Order Limits.
- 3.2.607 The **medium value** Grade II listed 'Maltings Farmhouse' (**1152848**) is located on the southern flank of West Road at the western end of Fornsett End and 600 m north of the draft Order Limits. The asset comprises a likely 17th century plastered timber frame house evidential and historical value front faced with 19th century red brick with a steep black glazed pantile roof.

- 3.2.608 The setting of the asset is informed by its location within the settlement and by its relationship with non-designated farm buildings recorded on 19th and early 20th century OS mapping. The asset has lawned areas to the north, east and south with paddocks further to the south. The grounds to the south have mature tree lined hedgerow boundaries to the east and west, whilst the southern boundary is a low hedgerow, providing a view of the agricultural land beyond with which the asset has a historical and functional relationship. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its settlement focus, the setting does not extend to the draft Order Limits.
- 3.2.609 The **medium value** Grade II listed 'Hill Farmhouse' (**1373245**) is located on the southern flank of West Road at the western end of Forngett End, 120 m west of the Maltings Farmhouse and 580 m north of the draft Order Limits. The asset is of evidential and historical value and has probable late 17th to early 18th century origins but was largely rebuilt in brick in the 19th century. The eastern wing comprises a plastered timber frame structure, which is now mostly brick faced. The asset has a pantile roof.
- 3.2.610 The setting of the asset is informed by its location within the settlement and by its relationship with the north/south aligned building to the south-east that is shown on the first edition OS map of 1884. The same map, and later editions, record what appears to be a large farming complex to the north-east of the asset, however, this appears to have been entirely replaced by 20th century residential development. The asset has a lawned area to the rear with a scatter of mature tree and a paddock and meadow further the to the south. The setting of the asset, therefore, makes a minor contribution to the value of the asset, but due to its settlement focus, the setting does not extend to the draft Order Limits.
- 3.2.611 The **medium value** Grade II listed 'Granville Farmhouse' (**1373243**) is located on the eastern flank of Tabernacle Lane at the southern edge of Forngett End and 420 m north of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a thatched roof.
- 3.2.612 The setting of the asset is informed by its location on the southern edge of the settlement and its relationships with the scattered properties to the north and south along the throughfare. The asset has a garden area to the front (west) and more garden and a large lawned area to the rear (east). The grounds are delineated by mature tree lined hedgerows to the west, north and east whilst the southern boundary comprises a high, thick evergreen hedge. A mature tree stands against the south-facing gable of the asset. The setting of the asset instils a sense of rural tranquillity and therefore, makes a considerable contribution to its value. Due to the mature boundaries of the asset and its settlement focus, its setting does not extend to the draft Order Limits.
- 3.2.613 The following designated buildings are located within the parish of Tacolneston:
- 3.2.614 The **high value** Grade II\* listed 'Tacolneston Hall' (**1050036**) is located within its own gardens and parklands, immediately north-west of Tacolneston and 2 km west-northwest of the draft Order Limits. The hall is of evidential and historical value and was built in the early 18th century around a 16th century core. Restoration and extension took place in the 19th century. It is built of red brick with blue brick dressings and has a hipped tile roof.
- 3.2.615 The setting of the asset is informed by its association with its formal garden and parkland and by its relationship with other structures in the estate complex. The boundary of the parkland is defined by mature copses that largely screen views in

and out of the grounds and to the hall. The setting of the asset creates a sense of privacy and high status and, therefore, makes a considerable contribution to the asset's value. This setting, however, does not extend to the draft Order Limits due to the parkland's mature boundaries and further mature hedgerows, copses, and later development in the intervening landscape.

- 3.2.616 The **medium value** Grade II listed assets 'The Retreat' (**1050037**) and 'Lakes Farmhouse' (**1373377**) are located within a dispersed group of residential and farming buildings immediately south of Tacolneston Hall's parkland, south of Hall Road and 1.9 km west-northwest of the draft Order Limits. These assets are of evidential and historical value. The Retreat is a 17th century rendered timber frame cottage with a pantile roof. The farmhouse is a 17th century rendered timber frame cottage, fronted in red brick in the 20th century with a steep pantile roof.
- 3.2.617 The setting of the asset is shared and informed by their location within the small residential and farming community, many elements of which are recorded on the first edition OS map of 1884. Each of the elements of the community are located within their own grounds defined by mature tree lined hedgerows that restricts intervisibility and largely screens view in and out. The setting of the assets, therefore, instils feelings of privacy and tranquillity and makes a considerable contribution to their values. The mature grounds of the assets, however, and mature tree lined hedgerows and the post medieval and modern development of Tacolneston in the intervening landscape, ensures that the setting does not extend to the draft Order Limits.
- 3.2.618 The **medium value** Grade II listed '59, Norwich Road' (**1050038**) is located on the western flank of Norwich Road, outside the southern limit of the Tacolneston conservation area and 1.4 km west of the draft Order Limits. The asset is a 17th century cottage of evidential and historical value comprising a plastered timber frame structure on a brick plinth with a pantile roof. The adjoining south wing is not a separate house and has largely been rebuilt.
- 3.2.619 The setting of the asset is informed by its moderately secluded location within the settlement; however, this has been eroded by 20th century residential development to the south and 21st century development to the north. The setting of the asset, therefore, makes a minor contribution to its value. Mature tree growth along the Norwich Road and in the grounds of Grade II listed Old Farmhouse (**1050041**— see below) on the opposing flank of the throughfare screen views to the Project in the east, and so the setting of the asset does not extend to the draft Order Limits.
- 3.2.620 The **medium value** Grade II listed 'Old Farmhouse' (**1050041**) is located on the eastern flank of Norwich Road, outside the southern limit of the Tacolneston conservation area and 1.3 km west of the draft Order Limits. The asset is a late 16th to early 17th century house of evidential and historical value comprising a plastered timber frame structure on a brick plinth with a steep tiled roof.
- 3.2.621 The setting of the asset is informed by its secluded location within the settlement of Tacolneston and by its associated grounds. The ground of the asset contains several mature trees and is defined by mature tree lined hedgerows that obscure views in and out. The asset's setting instils feelings of privacy and seclusion and makes a considerable contribution to the asset's value. Due to the mature grounds, however, the setting does not extend to the draft Order Limits.
- 3.2.622 The **medium value** Grade II listed assets 'Manor House' (**1302285**), 'Barn North-East Of Manor House' (**1178721**), 'Outbuilding Immediately East of Manor House' (**1373379**), 'Marshlands' (**1050040**), and 'The Dower House' (**1050039**) are located

approximately 120 m east of the Norwich Road, 1.2 km west of the draft Order Limits, south of the southern extent of the Tacolneston conservation area and accessed via a private road. These assets are of evidential and historical value. The Manor House (**1302285**) is of late 16th to 17th century date and comprises a plastered timber frame structure with brick end walls and a steep tiled roof. The 17th century barn (**1178721**) is a part plastered, part corrugated iron clad timber frame structure with weatherboarding above and a pantile roof. The outbuilding (**1373379**) dates to the late 17th to early 18th century is a plastered timber frame structure with a pantile roof. The Marshlands (**1050040**) is a rendered timber frame structure of probable 17th century date with a steep pantile roof. The dower house is a 17th century house comprising a plastered timber frame structure with a steep pantile roof.

- 3.2.623 The setting of the assets is shared and is informed by their location within the settlement of Tacolneston, their cohesion as a group of 17th century assets, their relationship with the Grade II listed '60 and 60A, Norwich Road to the south and views of agricultural land to the east with which the assets have a historical relationship. The assets have their own garden areas defined by mature hedgerows, but that still allow for intervisibility within the group. This setting instils a feeling of communal seclusion and, despite 20th century residential development to the south and west, it makes a moderate contribution to the value of the assets. The Project lies c 1.2 km to the east, but due to the settlement-focussed nature of the setting, the intact link to the immediate agricultural landscape, and the mature garden boundaries of the assets, the setting does not extend to the draft Order Limits.
- 3.2.624 The **medium value** Grade II listed 'Oak Cottage' (**1050075**) is located on the southern flank of Cheney's Lane, south of the southern extent of the Tacolneston conservation area and 1.2 km west-northwest of the draft Order Limits. The cottage is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a thatched roof.
- 3.2.625 The setting of the asset is informed by its location within the settlement of Tacolneston and by the agricultural land to the east with which it has a historical relationship. The 20th century development of Tacolneston has encroached on the asset from the south, west and north, but its mature tree lined hedgerow garden boundaries and a small copse in the south help to maintain a sense of privacy. The setting of the asset, therefore, makes a minor contribution to its value. The eastern garden boundary comprises a tree lined timber fence allowing for broken views to the east and the Project, however, but due to the settlement-focussed nature of the asset's setting it does not extend to the draft Order Limits.
- 3.2.626 The **medium value** Grade II listed 'St Mary's Cottage' (**1178686**) is located on the northern flank of Cheney's Lane, 500 m east of Tacolneston and 680 m west of the draft Order Limits. The asset is an early 18th century house of evidential and historical value comprising a plastered timber frame with a brick-faced south end and a thatched and pantile roof.
- 3.2.627 The setting of the cottage is informed by its location within its own enclosed grounds, by its relationship with non-designated buildings within its grounds and with the Grade II listed Mary's Farmhouse and associated barn (see below) 100 m to the east on the southern flank of Cheney's Lane. The setting is also informed by the surrounding agricultural land with which the asset has a historical relationship. The setting of the asset makes a considerable contribution to its value and due to its proximity, the setting extends to the draft Order Limits.
- 3.2.628 The **medium value** Grade II listed assets 'Mary's Farmhouse' (**1050076**) and 'Barn Immediately North-West Of Mary's Farmhouse' (**1302309**) are located on the

southern flank of Cheney's Lane, 600 m east of Tacolneston and 580 m west of the draft Order Limits. These assets are of evidential and historical value. The farmhouse, dated to 1628 on the chimney stack, comprises a roughcast timber frame structure with a thatched and pantile roof. The plastered and tarred timber frame barn dates to the 17th century and has a thatched roof.

- 3.2.629 The setting of the assets is shared and is informed by their location in their grounds, by their interrelationship and by their relationship with St Mary's Cottage 100 m to the west. The asset's grounds comprise lawned areas with numerous dispersed trees to the east, paddocks to the south and are defined by low hedgerow boundaries with occasional trees. Their location beyond the bounds of the settlement affords the assets a sense seclusion and privacy whilst the coherence of the farming complex remains intact. The setting, therefore, makes a considerable contribution to the value of the assets, and, due to the limited screening and the proximity of the Project, the setting extends to the draft Order Limits.
- 3.2.630 The **medium value** Grade II listed 'Whitehouse Farmhouse Including Adjacent Outbuilding to South-West' (**1050074**) is located 90 m north of Bentley Road, Tacolneston and 1.2 km west-northwest of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century timber frame house encased in red brick in the 19th century with a steep black glazed pantile roof. The listing includes an adjoining outbuilding to the south-west, probably a cottage, of early 18th century and constructed of red brick with a pantile roof.
- 3.2.631 The setting of the asset is informed by its former farmyard location on the south-eastern edge of Tacolneston and by its relationship with the non-designated Whitehouse farm buildings many of which are recorded on the first edition OS map of 1884. The setting is further informed by the building of the neighbouring Carpenter's Farm to the north and the agricultural landscape to the east with which the asset has a historical and functional relationship. The elements of Whitehouse Farm have now been developed as residential dwellings and Tacolneston to the west and Forncett End to the south have expanded encroaching of the farm buildings. The setting of the asset, therefore, makes a minor contribution to its value, however, due to screening by the non-designated farm buildings and mature tree cover and tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.632 The following listed buildings are located within the parish of Tacolneston and within Tacolneston Conservation Area:
- 3.2.633 The **medium value** Grade II listed 'The Rectory' (**1050045**) is located immediately to the north of the Grade I listed Church of All Saints (**1178820**— see medieval section), in the north of the Tacolneston conservation area and 1 km west of the draft Order Limits. The asset is an 18th century house of evidential and historical value built of painted brick with a steep slated roof.
- 3.2.634 The setting of the asset is informed by its close historical relationship with the Church of All Saints. The large garden of the rectory is defined by mature tree lined hedgerows and there is a small copse to the east largely screen the Norwich Road from the asset. The setting of asset instils feelings of privacy and seclusion and makes a considerable contribution to the to the value of the asset. Unlike the church (see medieval section above), however, there is no clear view to the east and the Project due to the cops and mature garden boundaries, and so the setting of the asset does not extend to the draft Order Limits.

- 3.2.635 The **high value** Grade II\* listed 'Old Hall' (**1373381**) and the medium value Grade II listed assets 'Garden Boundary Wall North Of Old Hall' (**1302247**), 'Old Hall Farmhouse' (**1050044**) and 'Barn Immediately East Of Old Hall Farmhouse' (**1373382**) are located on the southern flank of Norwich Road, south of the medieval Church of All Saints (**1178820**) in the north of the Tacolneston Conservation Area and 920 m west-north-west of the draft Order Limits. These assets are of evidential and historical value. The east range of the hall is its oldest element and comprises a late 16th to early 17th century timber frame house. The house was remodelled and enlarged in the early 18th century when the parallel, red brick built west range was added. The hall has a pantile roof. The hall's grounds are defined to the north along Norwich Road by the listed garden wall. The 18th century eight-foot wall is built of red brick with blue brick headers with ramped coping. The gate piers are brick built with ball finials. The early 18th century farmhouse is red brick built with blue brick headers and has a steep tiled roof. The early 18th century barn is also constructed of red brick with blue brick headers. The gable ends and south side are rendered, and it has a pantile roof.
- 3.2.636 The setting of the assets is largely shared and informed by the historical relationships between the designated elements of the hall and farming complex and with the non-designated former coach house and stables recorded on the first edition OS map of 1884. The hall has mature gardens to the east and west with high walled and hedged boundaries that restrict ground level views. A 20th century residential property has encroached on the complex to the east, but the single storey building is sympathetic and in keep with the vernacular and does not detract from the coherence of the hall and former farming complex. The setting of the assets instils a feeling of privacy, and in the case of the hall, high status. The setting, therefore, makes a considerable contribution to the value of the assets, however, due to mature tree lined boundaries within the complex, the adjacent development and further mature boundaries in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.637 The **high value** Grade II\* listed 'The Manor Farmhouse' (**1050043**) and the **medium value** Grade II listed 'Barn Immediately South-West of The Manor Farmhouse' (**1302277**) are located on the south-east flank of Norwich Road south of the mid-point of the linear Tacolneston conservation area, and 1.3 km west-northwest of the draft Order Limits. They are of evidential and historical value. The farmhouse is a very fine house comprising a plastered timber frame structure with a brick plinth and red brick gable ends with a thatched roof. A plastered wing with a steep pantile roof was added in the 17th century. The timber frame barn dates to the late 17th to early 18th centuries and is plastered with a thatched roof. It has left and right projecting cart shed wing with low pantile roofs.
- 3.2.638 The setting of the assets is shared, and both assets appear to be elements of a farming complex recorded on the first edition OS map of 1884 much of which is extant. The setting of the assets is informed by their farmyard location, by their interrelationship and their relationships with the non-designated assets of the complex. The setting is further informed by the surrounding agricultural landscape with which the assets have a historical and functional relationship, and by the group of largely 17th century Grade II listed building immediately to the south accessed off The Green (see below). The setting of the assets instils a feeling of rural seclusion but also retains a sense of agricultural industry that makes a considerable contribution to their values. Views to the Project in the east are interrupted by the non-designated elements of the farming complex and by a large 21st century hanger barn. There are also mature copses and mature tree lined boundaries in the

intervening landscape to the east that further screen the assets, and so the setting does not extend to the draft Order Limits.

- 3.2.639 The **medium value** Grade II listed assets 'Warren Cottage And 2 Adjoining Cottages' (**1050033**), 'Elm View' (**1050034**) 'Christmas Cottage' (**1050035**) and 'Cottage Immediately North of Christmas Cottage' (**1373376**) are located just to the south of Manor Farmhouse and barn in the Tacolneston conservation area and accessed off The Green. These assets lie 1.4 km west-northwest of the draft Order Limits. They are of evidential and historical value. Warren Cottage and the adjoining cottages were built in the early 17th century and comprise plastered timber frame structures. Warren Cottage is thatched whilst the adjoining cottages have pantile roofs. Elm View is a 17th century plastered timber frame cottage on a brick plinth with a thatched roof. Christmas cottage is a 17th century house comprising a timber frame structure with a thatched roof and porch. The cottage north of Christmas Cottage dates to the early 19th century and comprises a plastered clay lump structure with a pantile roof.
- 3.2.640 The setting of the assets is shared and is informed by their interrelationships, their relationships with the Manor Farmhouse complex to the north and their relationships with the non-designated assets of The Green complex. The setting is further informed by the surrounding agricultural landscape with which the assets have a historical relationship. The assets have their own garden areas defined by mature tree lined hedgerows that partially screen views in and out of The Green complex. The setting of the assets, therefore, creates a communal feeling tempered by the tranquillity of the rural landscape, all of which makes a considerable contribution to the assets' value. Views to the Project in the east are interrupted by the non-designated elements of The Green complex, by its mature tree lined boundaries and by copses and further mature tree line hedgerows in the intervening landscape. The setting of the assets does not, therefore, extend to the draft Order Limits.
- 3.2.641 The **medium value** Grade II listed 'The Pelican Inn' (**1302268**) is located on the south-eastern flank of the B1113 Norwich Road towards the southern end of the Tacolneston conservation area and 1.4 km west-northwest of the draft Order Limits. The inn is a 19th century house of evidential and historical value, which comprises a stuccoed structure with a low-pitched pantile roof.
- 3.2.642 The setting of the asset is informed by its roadside location within Tacolneston and by its relationship with other elements of the settlement. The setting of the asset, therefore, makes a considerable contribution to its value. The eastern boundary of the inn's grounds is defined by a mature tree lined hedgerow, and there are further such boundaries and mature copses in the intervening landscape between the asset and the Project. The setting of the asset, does not, therefore, extend to the draft Order Limits.
- 3.2.643 The **medium value** Grade II listed assets 'Hill Cottage' (**1050042**) and 'Saffron Cottage' (**1302267**) are located on the south-eastern flank of the B1113 Norwich Road towards the southern end of the Tacolneston conservation area and 1.5 km west-northwest of the draft Order Limits. Hill Cottage is a 17th century plastered timber frame house of evidential and historical value with a thatched roof. Saffron Cottage is similarly constructed and dates to the late 17th century.
- 3.2.644 The setting of the assets is shared and is informed their interrelationship, their location within the settlement of Tacolneston and the agricultural landscape to the east with which they have a historical relationship. The assets have gardens with mature tree lined hedgerow boundaries, which allow for broken views of a 19th century terrace to the north and school to the south. The setting of the assets,

therefore, makes a moderate contribution to the value of the assets. The cottages have garden areas and the shared eastern boundary in the direction of the draft Order Limits is screened by a mature hedgerow and thick tree cover. There is further screening mature tree lined hedgerows and copses to the east and so the setting of the assets does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.645 The sites of the **medium value** deserted medieval/post medieval settlements of Rattongate and Haliards and a multi-period finds assemblage (**1089**) is located 400 m south-south-east of Tacolneston and 10 m north of the draft Order Limits. These settlements are of evidential value and are recorded on a survey plan of 1565 on which both are illustrated with streets and houses. Fieldwalking and metal detecting surveys conducted on the site has resulted in a multi-period finds assemblage that includes post medieval pottery sherds, and a copper alloy buckle of evidential value.
- 3.2.646 The fieldwalking of land immediately south of the deserted medieval/post medieval settlement (**1089**), 700 m south-south-east of Tacolneston and partially within the draft Order Limits resulted in a multi-period finds assemblage (**1093**) that included a **low value** post medieval element comprising a copper alloy thimble and buckle and pottery sherds of evidential value.
- 3.2.647 A multi-period finds assemblage (**1103**) recovered during further fieldwalking immediately south of the deserted medieval/post medieval settlement (**1089**), east of (**1093**), 750 m south-south-east of Tacolneston and partially within the draft Order Limits included **low value** post medieval asset comprising copper alloy button, knife strap fitting, thimble, token and vessel fragment and pottery sherds of evidential value.
- 3.2.648 Two **low value** post medieval cottages (**1307**) are located 1.3 km south-east of Tacolneston and 140 m north-north-east of an draft Order Limits access road. The cottages are of evidential and historical value, were built as a single property in the 18th century and the upper floor includes reused late medieval or 16th century timbers.
- 3.2.649 A **low value** post medieval farmhouse (**1309**) is located on the western edge of Forngett St Mary and 190 m south-south-east of an access road of the draft Order Limits. Elements of the carpentry suggest the structure may have an early 17th century core. The asset has evidential and historical value.
- 3.2.650 Further evidence of post medieval activity in the Forngett St Mary and Tacolneston area is represented by **low value** findspots, and artefacts recovered during fieldwalking and metal detector surveys. These assets are of evidential value and comprise:
- A post medieval copper alloy button, a hooked tag, a jetton, a rivet and a token, and a lead cloth seal in a multi-period finds assemblage (**1175**) recovered from farmland 1.1 km east of Tacolneston, immediately north of Cheney's Lane and partially within the draft Order Limits
  - A post medieval copper alloy buckle, German jetton and a token, a silver coin and pottery sherds in a multi-period finds assemblage (**1189**) recovered from farmland 970 m south-east of Tacolneston, immediately south of Long Stratton Road and partially within the draft Order Limits
  - A post medieval copper alloy harness mount, hooked tag, hooked sword belt fitting, buttons, coin, jetton, token, rotary key and crotal bell, a silver coin and a

lead button in a multi-period finds assemblage (**1263**) recovered from farmland 640 m north-east of Tacolneston and partially within the draft Order Limits

- A post medieval copper alloy cauldron fragment, jettons, coins, dress fitting, tokens, buckles, sword belt fitting, harness mount and furniture fitting; two silver coins, and a lead weight and two cloth seals in a multi-period finds assemblage (**1155**) recovered from farmland 700 m north of Forncett St Mary, immediately north-west of High Road and partially within the draft Order Limits
- Post medieval copper alloy harness mounts, buckles, key, pipe tamper, rowel spur, and token, a silver coins and a lead cloth seal, powder measure and weight in a multi-period finds assemblage (**1161**) recovered from farmland 250 m north-west of Forncett St Mary and partially within the draft Order Limits
- A post medieval copper alloy buckle and three silver coins in a multi-period finds assemblage (**1192**) recovered from farmland 1.1 km north-west of Forncett St Mary and partially within the draft Order Limits
- A post medieval copper alloy token and a silver coin in a multi-period finds assemblage (**1167**) recovered from farmland on the western edge of Forncett St Mary immediately north of Cheney's Lane and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 980 m to the east
- Two post medieval copper alloy buckles, button, coin, coin weight, hooked tag, two jetton, strap fitting, sword belt hanger fragment and thimble, a silver coin and a lead weight in a multi-period finds assemblage (**1168**) recovered from farmland 1.3 km north-east of Tacolneston and partially within the draft Order Limits
- A post medieval, copper alloy seal and token and a silver coin in a multi-period finds assemblage (**1137**) recovered from farmland 800 m east of Tacolneston and within the draft Order Limits
- Post medieval silver coin in a multi-period finds assemblage (**1158**) recovered from farmland 880 m east of Tacolneston and partially within the draft Order Limits. The survey site occupies slightly higher ground overlooking a shallow tributary of the Tas Valley to the north
- A post medieval, copper alloy buckle, button, harness fitting and strap fitting and a silver coin in a multi-period finds assemblage (**1119**) recovered from farmland 1 km north-east of Tacolneston and partially within the draft Order Limits
- Several post medieval copper alloy harness mounts, buckles, a seal matrix, thimble, saddle pommel cap fragment, crotal bell, hinge and rotary key, a silver cuff link and a lead thimble in a multi-period finds assemblage (**1164**) recovered from farmland on the floor and northern flank of a tributary valley of the Tas 1.5 km north-east of Tacolneston and immediately west of the draft Order Limits
- A post medieval copper alloy buckle, jetton, knife, strap fitting and tap, a silver coin, and a lead cloth seal and weight in a multi-period finds assemblage (**1170**) recovered from farmland 700 m east of Tacolneston and 60 m west of the draft Order Limits
- A post medieval, copper alloy coin, coin weight and token and a silver coin in a multi-period finds assemblage (**1139**) recovered from farmland immediately south of Forncett St Mary and partially within the draft Order Limits. The survey site is situated on higher ground with the Tas Valley floor 150 m to the east

- A post medieval musket ball and clay pipe fragments in a multi-period finds assemblage (**1107**) recovered from farmland 990 m south-south-west of Forncett St Mary and 170 m east of the draft Order Limits
- A post medieval copper alloy buckle in a multi-period finds assemblage (**1242**) recovered from farmland 320 m north of Forncett St Mary and 180 m east of the draft Order Limits
- A post medieval copper alloy buckle in a multi-period finds assemblage (**1299**) recovered from farmland 760 m south-east of Tacolneston and 190 m north-west of the draft Order Limits
- Three post medieval copper alloy buckles, a harness mount and a toy cannon, and a lead weight in a multi-period finds assemblage (**1283**) recovered from farmland on the western edge of Forncett St Mary, immediately south of Cheney's Lane and 240 m east of the draft Order Limits
- A post medieval copper alloy furniture fitting, coin and jetton, a silver coin, and a lead cloth seal (**1174**) recovered from farmland 360 m east of Tacolneston and 260 m west of the draft Order Limits
- A post medieval copper alloy candle snuffer, stud, and token and four silver coins in a multi-period assemblage (**1128**) recovered from farmland 1.3 km south-south-west of Forncett St Mary and 270 m south-east of the draft Order Limits
- A post medieval copper alloy buckle, button, crotal bell, harness mount, saddle pommel fragment, thimble, coin weight and vessel fragment; three silver coins and a pewter button in a multi-period finds assemblage (**1194**) recovered from farmland 650 m north-east of Tacolneston and 270 m west of the draft Order Limits. Asset (**1194**) overlaps asset (**1253**) to the west and assets (**1119**) and (**1263**) to the east
- A post medieval copper alloy buckle, crotal bell, harness mount and a strap fitting, three silver coins and a lead cloth seal in a multi-period finds assemblage (**1226**) recovered from farmland immediately north of Forncett St Mary, 90 m north of Cheney's Lane and 320 m east of the draft Order Limits
- A post medieval, copper alloy personal ornament and plaque in a multi-period finds assemblage (**1134**) recovered from farmland 840 m east of Tacolneston and 360 m west of the draft Order Limits
- Two post medieval silver coins in a multi-period finds assemblage (**1173**) recovered from farmland immediately east of Tacolneston and 400 m north-west of the draft Order Limits
- Post medieval copper alloy buckles, crotal bell, jettons, hooked sword belt mount and fitting, strap end, harness mount, padlock, vessel fragment, toy, and a spur fragment; three silver coins, button, and brooch; a lead weight, and pottery sherds in a multi-period finds assemblage (**1187**) recovered from farmland 440 m north-east of Tacolneston and 440 m west of the draft Order Limits. These finds, along with artefacts from the late Iron Age, Roman, Saxon (possibly relating to a cemetery) and medieval indicate that this could be a site of a multi-phase settlement site
- A post medieval copper alloy button, hooked tag, harness mounts, jetton, a drawer handle back plate from a piece of furniture, a knife whittle tang with a handle in the form of a male musician playing the bagpipes and a rumbler bell; five silver coins, two buttons, cuff link, and an 18th to 19th century compass face

in a multi-period finds assemblage (**1253**) recovered from farmland 340 m north-east of Tacolneston, immediately east of Norwich Road and 450 m west of the draft Order Limits. Asset (**1253**) partially overlaps with asset (**1194**) to the east

- A post medieval, copper alloy strap fittings, barrel padlock, bell, book fitting, buckles, harness fittings, jettons, thimbles, token, a toy, a vessel fragment, key, weight and coin, a lead button, toy, weight and cloth seals, silver coins and a seal matrix, and pottery sherds in a multi-period finds assemblage (**1145**) recovered from farmland 150 m east of Tacolneston and 600 m west of the draft Order Limits
- Post medieval copper alloy button, coin, jetton, strap fitting and stud, a silver coin and pottery sherds in a multi-period finds assemblage (**1165**) 300 m north-east of Tacolneston, immediately north of Cheney's Lane and 790 m west of the draft Order Limits. Other earlier (roman, Saxon, and medieval) artefacts recovered from the same field indicate that this could be activity here from multiple time periods. However, the Norfolk HER record suggests this may be the site of a **medium value** medieval settlement

## Bunwell Hill and the Tas Valley

### *Designated Heritage Assets*

3.2.651 The following listed buildings are in the Parish of Bunwell:

3.2.652 The **medium value** Grade II listed 'Ebenezer Cottage' (**1171167**) is located off a private road on the south-eastern flank of The Turnpike in the dispersed settlement of Bunwell and 520 m north-west of the draft Order Limits. The cottage is of evidential and historical value, dates to the 17th to 18th centuries and comprises a plastered timber frame structure with a thatched roof. There is an attached plastered outbuilding to the north, topped by a pantile roof.

3.2.653 The setting of the asset is informed by its location within the dispersed settlement and by its relationship with the neighbouring non-designed buildings to the north recorded on the first edition map of 1884. The cottage's lawned garden to the south and east is defined by a mature tree lined hedgerow that screens the asset from the agricultural land beyond creating a sense of enclosure. The setting of the asset, therefore, makes a moderate contribution to its value, and due to its proximity to the Project, the setting extends to the draft Order Limits.

3.2.654 The **medium value** Grade II listed 'Green Farmhouse' (**1171114**) is located on the north-eastern flank of Bunwell Street, Little Green and 1.5 km north-west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century rendered timber frame house with a steep pantile roof.

3.2.655 The setting of the asset is informed by its roadside location in the Little Green settlement and by its relationship with the non-designated outbuildings of Green Farm located immediately to the south-east and recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and outbuildings have a historical and functional relationship. The outbuildings have now been converted into residential properties; however, they still retain much of their character and so them and the farmhouse are still moderately coherent as a former farming complex. The lawned grounds of the asset are defined by mature tree lined hedgerows and south-eastern boundary and the adjacent former outbuildings screen the asset from 20th century residential development beyond. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the asset's garden boundaries and the topology,

development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.656 The **medium value** Grade II listed 'Church Farmhouse' (**1049612**) is located on the eastern flank of Church Lane in the dispersed settlement of Bunwell and 1.1 km north-west of the draft Order Limits. The farmhouse is of evidential and historical value and comprises a plastered timber frame structure with a thatched roof. The south end was brick faced in the 18th century and a brick chimney stack was added.
- 3.2.657 The setting of the farmhouse is informed by its roadside location, and by its relationship with the farm outbuildings immediately to the south. The outbuildings are now residential properties, but they and the asset retain coherence as a former farming complex. The setting is also informed by a view of the Grade I listed Church of St Michael to the south-west and by the surrounding agricultural landscape with which the asset and outbuildings have a historical and functional relationship. The lawned grounds of the asset are defined by a roadside flint and stone wall to the west and by a tree lined hedgerow to the north, east and south. The setting of the asset makes a moderate contribution to its value, but due to the asset's mature garden boundaries and the topology, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.658 The **medium value** Grade II listed 'Old Queen's Head' (**1049614**) is located at the junction of Old Turnpike and B1113 The Turnpike in the dispersed settlement of Bunwell and 1 km north-west of the draft Order Limits. The 18th century former inn is of evidential and historical value and constructed of painted brick with a steep pantile roof.
- 3.2.659 The setting of the asset is informed by its roadside location, which once had supplied the asset with its cliental. Outbuildings of the asset recorded on the first edition OS map of 1884 have largely been demolished and so the setting of the asset makes a minor contribution to the asset's value. The setting of the asset is restricted to its roadside location within the settlement and so it does not extend to the draft Order Limits.
- 3.2.660 The **medium value** Grade II listed 'Banyard's Hall' (**1373609**) is located off a private road 390 m north of Low Common Road, Bunwell Hill and 220 m north-west of the draft Order Limits. The asset is of evidential and historical value and comprises a probable 17th century timber frame house re-fronted during the 19th in buff brick with a steep black glazed pantile roof.
- 3.2.661 The setting of the asset is informed by its isolated location and its relationships with the remains of a medieval moat (**1056**) to the west, north and east and with a farming complex to the east the majority of which is recorded on the first edition OS map of 1884. The setting is also informed by the surrounding agricultural landscape with which the hall and farm buildings have a historical and functional relationship. The lawned grounds of the hall are defined to the west, north and east by the moat and associated tree cover, whilst to the south they are defined by a mature tree lined hedgerow. The boundaries largely restrict views in and out of the grounds creating a sense of privacy and enclosure. The setting of the asset makes a considerable contribution to its value and, due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.2.662 The **medium value** Grade II listed 'Wood Farmhouse' (**1049644**) is located south-west of the junction Bunwell Hill and Brick Kiln Lane and 350 m north-west of the

draft Order Limits. The asset is of evidential and historical value and comprises a probably early 18th century plastered timber frame cottage with a steep pantile roof.

- 3.2.663 The setting of the asset is informed by its roadside location within the settlement and its relationship with the surviving non-designated elements of the farming complex recorded on the first edition OS map of 1884. The setting of the asset and outbuildings is further informed the surrounding agricultural landscape with which the farm buildings have a historical and functional relationship. The grounds of the farmhouse are defined by a low evergreen hedge affording an open view of agricultural land to the south-east. The setting of the asset has been encroached to the south, west and north by 20th century residential development and so makes a moderate contribution to its value. Due to the open view to the south-east and the proximity of the Project, the setting extends to the draft Order Limits.
- 3.2.664 The **medium value** Grade II listed 'Lion Cottage' (**1171123**) is located on the northern flank of the Tas Valley, north of Low Common Road, Low Common, Bunwell and 960 m south-east of the draft Order Limits. The asset is of evidential and historical value and comprises an early 19th century red brick house with a black glazed pantile roof.
- 3.2.665 The setting of the asset is informed by its roadside location within the settlement and by its relationship with other residential properties on the northern flank of Low Common Road, some of which are recorded on the first edition OS map of 1884. The lawned garden is defined to the north in the direction of the draft Order Limits is defined by a mature tree lined hedgerow. The setting of the asset makes a moderate contribution to its value, but due to the topography of the Tas Valley and the tree lined boundaries and copses of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.666 The **medium value** Grade II listed assets 'Park Farmhouse' (**1373607**) and 'Ochre Barns' (**1391985**) are located on the northern flank of the Tas Valley, north of Low Common Road, Low Common, Bunwell and 870 m south-east of the draft Order Limits. The farmhouse was built in 1812 and is constructed of red brick and has a steep slated roof. The barns are of evidential and historical value, date to the early 18th and early 19th centuries and were converted into residential dwellings in the early 21st century.
- 3.2.667 The setting of the assets is shared and is informed by their roadside location within the settlement, their interrelationship, and their relationships with the surviving non-designated elements of the former Park Farm complex recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the assets have historical and functional relationships. The grounds of the assets to the north and in the direction of the Project have been split relative to the now private dwellings and are defined by mature tree lined hedgerows. The setting of the asset makes a moderate contribution to its value, but due to the topography of the Tas Valley and the tree lined boundaries and copses of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.668 The **medium value** Grade II listed 'Cowgate Farmhouse' (**1171119**) is located on the northern flank of the Tas Valley, north of Low Common Road, Low Common, Bunwell and 810 m south-east of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century timber frame house encased in the mid-19th century with red brick and stone dressing, with a low-pitched pantile roof.
- 3.2.669 The setting of the asset is informed by its roadside location within the settlement and its relationship with the non-designated former Farrier's Arms Public House

immediately to the east and recorded on the first edition OS map of 1884. The asset's lawned garden and paddock further north and defined by mature tree lined hedgerows restricting views in and out affording the asset some privacy. The setting of the asset makes a considerable contribution to its value, but due to the mature boundaries of the asset's grounds, the topography of the Tas Valley and the tree lined boundaries and copses of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.670 The **medium value** 'Quakers Farmhouse' (**1373606**) is located at the junction of Hall, Road and Low Common, 1.4 km south-east of Bunwell and 210 m south-east of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame, two storey house with attics and a thatched roof. there is a later plastered, two storey wing to the south with a pantile roof.
- 3.2.671 The setting of the farmhouse is informed by its roadside location within a former farming complex and by its relationship with its former non-designated outbuildings, now mostly residential dwellings, which are recorded on the first edition OS map of 1884. The setting is further informed by the immediate agricultural landscape with which the asset and its outbuildings have a historic and former functional relationship. Although the function of most of the outbuildings has changed, and the former farmyard has been broken up into garden areas for the separate dwellings, the asset and outbuildings retain some coherence as a former farming complex, and so the setting of the asset makes a moderate contribution to value. Due to an open view towards the Project to the north-west, the setting of the asset extends to the draft Order Limits.
- 3.2.672 The **medium value** 'Persehall Manor' (**1049610**) is located 250 m south-south-east of Quakers Farmhouse (**1373606**), 80 m west of Hall Road, 1.6 km south-east of Bunwell and 440 m south-east of the draft Order Limits. The asset is of evidential and historical value and comprises a 16th to 17th century timber frame house encased in red brick during the 18th century. The house is of two storeys, and it has a steep tiled roof with gabled ends.
- 3.2.673 The setting of the asset is informed by its location within a working farm complex and by its relationship with its non-designated outbuilding, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the immediate agricultural landscape, with which the asset and its outbuildings have a historical and functional relationship. The remains of a medieval moat lie just to the north of the house contributing to the setting of the asset and the time depth of the site. The setting of the asset, therefore, makes a considerable contribution to its value, but due to distance and partial screening by the farmyard's boundaries and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.674 The **medium value** Grade II listed 'Quaker Farm Cottage' (**1049611**) is located is located on the upper northern flank of the Tas Valley, north of Low Common Road, Low Common, Bunwell and 670 m south-east of the draft Order Limits. The asset is a probable early 18th cottage range of evidential and historical value, now a single dwelling, comprising a plastered timber frame structure with a steep pantile roof.
- 3.2.675 The setting of the asset is informed by its roadside location at the western limit of Low Common and by its relationship with Ruby House Farm 40 m to the north-east, much of which is recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value. The view to the north is screened by rising ground and a

mature, roadside hedgerow, whilst the view to the north-west and west is partially screened by associated outbuildings and a mature tree lined garden boundary. Due to the screening and its restricted roadside settlement location, the setting of the asset does not extend to the draft Order Limits.

- 3.2.676 The **medium value** Grade II listed 'Valley Farmhouse' (**1049604**) is located on the southern flank off Bridge Road at the base of the Tas Valley and 970 m south-east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a rendered timber frame structure. The roof was heightened in the 19th century and is of pantile.
- 3.2.677 The setting of the asset is informed by its roadside location in the base of the Tas Valley and by its relationship with the surviving non-designated elements of the Vally Farm complex that are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural with which the asset has a historical and functional relationship. the setting of the asset makes a considerable contribution to its value, but due to the topography of the Tas Valley and mature tree growth lining the river and Bridge Road, the setting does not extend to the draft Order Limits.
- 3.2.678 The **medium value** Grade II listed 'Barn Immediately North-West of Gower's Farmhouse' (**1049603**) is located on the southern flank of Low Road at the base of the Tas Valley and 820 m south-east of the draft Order Limits. The barn is of probable 17th century date, is of evidential and historical value and comprises a plastered and weatherboarded timber frame structure with corrugated iron roof.
- 3.2.679 The setting of the asset is informed by its roadside location at the base of the Tas Valley and its relationship with the Grade II listed medieval 'Gower's Farmhouse' immediately to the south-west. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The setting of the asset makes a considerable contribution to its value, but due to the topography of the Tas Valley and tree growth along Low Road and the riverbanks, the setting does not extend to the draft Order Limits.
- 3.2.680 The following listed buildings are located within the parish of Aslacton:
- 3.2.681 The **medium value** Grade II listed 'The Laurels' (**1373565**) is located on the western flank of Pottergate Street at the base of the Tas Valley and 1.4 km south-east of the draft Order Limits. The red brick cottage is of evidential and historical value, dates to 1821 and has a low pitched black glazed pantile roof.
- 3.2.682 The setting of the asset is informed by its roadside location in the Tas Valley and by its relationship with the cottages immediately to the north and south, both of which are also dated to 1821. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. There has been some 20th century residential infill development to the north and along Muir Street to the north-east, and so the setting of the asset makes a moderate contribution to its value. Due to the topography of the Tas Valley, tree growth along the riverbanks and mature tree lined hedgerows, however, the setting does not extend to the draft Order Limits.
- 3.2.683 The **medium value** Grade II listed 'Bridge Farmhouse' (**1170362**) is located north of Bunwell Road, at the base of the Tas Valley and 1.3 km south-south-east of the draft Order Limits. The asset is a mid-19th century brick cottage is of evidential and historical value with a pantile roof. To the rear is a 17th century plastered timber frame wing, also with a pantile roof.

- 3.2.684 The setting is informed by its roadside location at the base of the Tas Valley and its relationship with the non-designated elements of the Bridge Farm complex recorded on the first edition OS map of 1884. The setting is also informed by the surrounding agricultural landscape with which the asset and associated non-designated outbuildings have a historical and functional relationships. The asset has lawned areas to the south and west with large paddocks to the north with mature tree lined hedgerow boundaries. Immediately to the east of the Bridge Farm complex is a range large hanger style modern asbestos clad barns that encroach on the setting of the asset. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the topography of the Tas Valley and the mature tree lined paddock boundaries to the north, the setting does not extend to the draft Order Limits.
- 3.2.685 The **medium value** Grade II listed 'Eagle Farmhouse' (**1373564**) is located on the eastern edge of Low Common and accessed along the minor public right of way Eagle Farm Path 100 m north of Low Common Road. The farmhouse dates to c. 1850 and comprises a red brick structure is of evidential and historical value with a low pitched black glazed pantile roof. It has a 17th century timber framed brick faced cross-wing at its eastern end.
- 3.2.686 The setting of the asset is informed by its location at the eastern edge of the settlement and its relationship with the non-designated East and West Barn immediately to the west and recorded on the first edition map OS of map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated non-designated barns have historical and functional relationships. The asset is situated in mature grounds with scattered trees and defined by tree lined hedgerows. The associated outbuildings have been converted into residential properties, but they and the asset retain their coherence as a former working farm complex. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds and the topography of the Tas Valley and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.687 The **medium value** Grade II listed 'Pearl Farmhouse' (**1049678**) is located on the western flank of The Street, Aslacton, at the head of a shallow tributary of the Tas Valley and 2 km south-east of an draft Order Limits access road. The farmhouse dates to the 17th century, is of evidential and historical value and comprises a plastered timber frame structure with a steep modern tile roof.
- 3.2.688 The setting of the asset is informed by its roadside location within the settlement and by its relationship with non-designated buildings of the former farming complex recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and outbuildings have a historical and functional relationship. The associated outbuildings have been converted into residential properties, but they and the asset retain their coherence as a former working farm complex. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.689 The following listed buildings are located within the parish of Great Moulton:
- 3.2.690 The **high value** Grade II\* listed 'Old Rectory' (**1050320**) is associated with the Norman Grade II\* Church of St Michael (see medieval section above) and is located 80 m north of Carr Lane, Great Moulton, and 2.6 km south-east of the draft Order Limits. The former rectory was built in the Italianate Style in 1831 by architect W. J.

Donthorn for the incumbent Reverend J. S. Wigget. The large house is brick built, has slate roofs and is of evidential and historical value.

- 3.2.691 The setting of the rectory is informed by its location within the settlement and by its relationship with the Grade II\* listed 'Church of St Michael' 50 m to the north. The first edition map of 1884 records the church and the rectory, with the latter having extensive grounds and outbuildings. Subsequent mapping and 20th century satellite imagery indicate that two of the outbuildings now serve as dwellings and that two further detached residential properties have been built, with the former grounds of the rectory broken up into garden plots for each of these. The setting of the rectory makes a moderate contribution to its value but due to mature tree cover in the graveyard and the rectory's former grounds, and the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.692 The following listed buildings are in the parish of Carleton Rode:
- 3.2.693 The **medium value** Grade II listed 'Baptist Chapel' (**1373596**) is located on the eastern flank of Chapel Road, 700 m south of Bunwell and 1.9 km north-west of the draft Order Limits. The chapel dates to the late 18th century, has evidential and historical value and comprises a partly plastered colour washed brick structure with a black glazed pantile roof.
- 3.2.694 The setting of the asset is informed by its isolated roadside location, by its tree lined graveyard and by its relationship with the surrounding agricultural landscape with which the asset has a historical relationship. The setting of the asset makes a considerable contribution to its value, but due to its mature tree lined graveyard and further mature tree lined hedgerows as well as copses and development in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.695 The **medium value** Grade II listed 'The Manor' (**1049595**) is located on the western flank of Flaxlands Road in the east of the dispersed settlement of Carleton Rode and 2 km north-west of the draft Order Limits. Formally Church Farmhouse, the asset dates to the 17th century, has evidential and historical value and comprises a plastered timber frame structure with a steep tiled roof.
- 3.2.696 The setting of the asset is informed by its roadside location in the dispersed settlement, by its relationship with the associated non-designated outbuildings of the former farming complex and by its relationship with the surrounding agricultural landscape with which the asset and outbuildings have a historical and functional relationship. There is 20th century residential development on the eastern flank of Flaxlands Road, and the farm buildings have been converted into dwellings, however, the asset and associated buildings are still coherent as a former farming complex. The setting of the asset, therefore, makes a moderate contribution to its value, but due to development in the intervening landscape, it does not extend to the draft Order Limits.
- 3.2.697 The **medium value** Grade II listed 'Church Farmhouse' (**1049590**) is located on the northern flank of Flaxlands Road in the south of the dispersed settlement of Carleton Rode and 1.9 km north-west of the draft Order Limits. The farmhouse is of evidential and historical value, probably dates to the 17th century and comprises a roughcast timber frame structure with a black glazed pantile roof. The asset has a later brick wing to the west.
- 3.2.698 The setting of the asset is informed by its roadside location in the dispersed settlement, by its relationship with the associated non-designated outbuildings of the former farming complex and by its relationship with the surrounding agricultural

landscape with which the asset and outbuildings have a historical and functional relationship. There is 20th century residential development on Flaxlands Road and Chapel Road to the north and some of the farm buildings have been converted into dwellings, however, the asset and associated buildings are still coherent as a former farming complex. The setting of the asset, therefore, makes a moderate contribution to its value, but due to development in the intervening landscape, it does not extend to the draft Order Limits.

- 3.2.699 The **medium value** Grade II listed 'The Old Rectory' (**1305571**) is associated with the medieval Grade I listed Church Of All Saints (see medieval section above) and is located 130 m north Church Road and 1.8 km north-west of the draft Order Limits. The rectory is of evidential and historical value, dates to the 18th century and is built of red brick with a steep slated roof. To the rear (north) is a 16th to 17th century plastered timber frame wing with a black glazed pantile roof, whilst to the east is a large 19th century brick wing.
- 3.2.700 The setting of the former rectory is informed by its relationship with the church 60 m to the south-west, its location within the settlement and its large mature grounds. The grounds contain scattered trees and are defined by mature hedgerows intermittently lined by trees. The setting affords the asset some privacy and makes a considerable contribution to its value. Due to its mature grounds, however, and the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.701 The **medium value** Grade II listed 'Churchyard Wall to South And West of Church' (**1373597**) defines the southern boundary of the graveyard of the medieval Grade I listed Church of All Saints along Church Road. The asset is of evidential and historical value, largely dates to the 18th century and is constructed of red brick and flint cobbles. The south-west corner was rebuilt in the 19th century in red brick.
- 3.2.702 The setting of the asset is informed by its roadside location and its relationship with the church and its graveyard. The setting makes a considerable contribution to the assets value, but due to its enclosed settlement location, the setting does not extend to the draft Order Limits.
- 3.2.703 The **medium value** Grade II listed 'Rectory Cottages' (**1049591**) is located on the north-east flank Church Road, on the eastern edge of Carleton Rode and 1.6 km north-west of the draft Order Limits. The comprises a 17th century range of plastered timber frame cottages of evidential and historical value with a steep pantile roof. The range is adjoined to the south by a 19th century buff brick cross wing with a pantile roof.
- 3.2.704 The setting of the asset is informed by its roadside location on the edge of the settlement and by its relationship with the non-designated building just to the north and recorded on first edition OS map of 1884. The setting is further informed by the asset's relationship with the surrounding agricultural landscape with which it has a historical relationship. Twentieth century residential development along Church Road to the west has, however, restricted the view from the asset and so the setting makes a moderate contribution to the asset's value. Due to the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, however, the setting does not extend to the draft Order Limits.
- 3.2.705 The **medium value** Grade II listed 'Emma's Lodge' (**1171514**) is located on the western flank of Church Road, 880 m south-south-east of Carleton Rode and 1.1 km north-west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century roughcast timber frame house with a thatched roof.

- 3.2.706 The setting of the asset is informed by its isolated roadside location and by its relationship with the associated non-designated outbuildings immediately to the north and recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The ground of the asset includes lawned areas and a mature copse and is defined by mature hedgerows. The setting of the asset makes a considerable contribution to its value, but due to its mature grounds and the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.707 The **medium value** Grade II listed 'Elms Farmhouse' (**1049599**) is located on the eastern flank of Rode Lane, in the south of the Carleton Rode dispersed settlement and 2 km west-northwest of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 17th century and comprises a rendered timber frame structure with a pantile roof and a later lean-to at the rear.
- 3.2.708 The setting of the asset is informed by its largely isolated roadside location and by its relationship with its associated non-designated outbuildings recorded on the first edition OS map of 1884 and on later editions. The setting is further informed by the surrounding agricultural landscape with which the asset and associated buildings have a historical and functional relationship. The current function of the outbuildings is unknown but them and the asset form a coherent farming complex. The ground of the asset contains lawned areas and scattered trees and are defined by partially tree lined mature hedgerows. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds and the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.709 The **medium value** Grade II listed 'Laurels Farmhouse' (**1171603**) is located on the south-western flank of Rode Lane, in the south of the Carleton Rode dispersed settlement and 1.9 km north-west of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a thatched roof. There are later one storey wings to the north and west.
- 3.2.710 The setting of the asset is informed by its roadside location and by its relationship with its associated non-designated outbuildings recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated buildings have a historical and functional relationship. The current function of the outbuildings is unknown but them and the asset form a coherent farming complex. The ground of the asset contains lawned areas and scattered trees and are defined by partially tree lined mature hedgerows. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds and the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.711 The **medium value** Grade II listed assets 'Yewtree Farmhouse' (**1049598**), 'Poplar Farmhouse' (**1049597**) and 'Barn Immediately South of Poplar Farmhouse' (**1305522**) are in a loose complex on the south-western flank of Rode Lane, in the south of the Carleton Rode dispersed settlement and 1.8 km west-northwest of the draft Order Limits. These assets are of evidential and historical value. Yewtree Farmhouse dates to the 17th century and comprises a plastered timber frame structure with a steep pantile roof. It has a later rendered wing to the west with a steep pantile roof. Poplar Farmhouse comprises a 17th century plastered timber

frame structure with a steep pantile roof. The barn is also of 17th century date and comprises a plastered timber frame three bay structure with a steep pantile roof.

- 3.2.712 The setting of the assets is shared and informed by their roadside location, their interrelationship and their relationships with associated non-designated outbuildings recorded on the first edition OS map of 1884. The setting is further informed by the surrounding landscape with which the assets and associated buildings have historical and functional relationships. The assets have lawned areas and paddocks to the west but the former open view to agricultural land to the east has been obscured by 20th century residential development. The setting of the assets, therefore, makes a moderate contribution to their values, but due to the 20th century development to the east, the setting does not extend to the draft Order Limits.
- 3.2.713 The **medium value** Grade II listed 'The Ashes' (**1373594**) is located on the north-eastern flank of Ash Lane, 740 m west-south-west of Hargate and 1.6 km west-northwest of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th/18th centuries and comprises a timber frame house encased in buff coloured brick in the 19th century. There is a 17th century timber frame wing to the rear, also encased on buff brick.
- 3.2.714 The setting of the asset is informed by its roadside location and by its relationship with its associated non-designated outbuildings recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have historical and functional relationships. The Ashes is still a working farm and several large, hanger style barns have been added to the complex over the latter half of the 20th century. The setting of the asset makes a moderate contribution to its value, but due to the 20th century additions restricting views to the south and east, the setting does not extend to the draft Order Limits.
- 3.2.715 The **medium value** Grade II listed 'Whitehouse Farmhouse' (**1305585**) is located on the southern flank of Ash Lane, 660 m south-west of Hargate and 1.3 km west-northwest of the draft Order Limits. The asset comprises a 17th century plastered timber frame cottage of evidential and historical value with a steep pantile roof. Based on satellite imagery, farm building to the south of the asset mentioned on the Natural Heritage List entry were demolished sometime between 2006 and 2016 and replaced by a residential property.
- 3.2.716 The setting of the asset is informed by its roadside location and by its interrelationship with the Grade II listed 'South View and Adjoining Dwelling Occupied by Mr Newman' 50 m to the north-east and on the northern flank of Ash Lane. The setting is further informed by the surrounding agricultural landscape with which the asset has historical and functional relationships. Based on cartographic and satellite imagery, the asset and South View to the north were, until the later 20th and 21st centuries, isolated. Both, however, now have associated outbuildings and residential development along Ash Lane has encroached including a residential property immediately south of Whitehouse Farmhouse. The setting of the asset, therefore, makes a moderate contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.717 The **medium value** Grade II listed 'South View and Adjoining Dwelling Occupied by Mr Newman' (**1049587**) is located on the northern flank of Ash Lane, 590 m south-west of Hargate and 1.3 km west-northwest of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a rendered timber frame house with a steep pantile roof.

- 3.2.718 The setting of the asset is informed by its roadside location and by its interrelationship with the Grade II listed 'Whitehouse Farmhouse' 50 m to the south-west and on the northern flank of Ash Lane. The setting is further informed by the surrounding agricultural landscape with which the asset has historical and functional relationships. Largely isolated until the later 20th century, the asset now has associated outbuildings and residential development along Ash Lane has encroached from the east and south. The setting of the asset, therefore, makes a moderate contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.719 The **medium value** Grade II listed 'Ash Farmhouse' (**1171460**) is located on the southern flank of Ash Lane, 420 m south-west of Hargate and 1.1 km west-northwest of the draft Order Limits. The asset is of evidential and historical value, dates to the early 17th century and comprises a timber frame house encased in painted brick with s steep pantile roof.
- 3.2.720 The setting of the asset is informed by its roadside location and its relationship with its associated non-designated outbuildings most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and its associated outbuildings have historical and functional relationships. The function of some of the outbuildings has changed but they and the asset are still coherent as a former farming complex. The setting of the asset, therefore, makes a considerable contribution to its value, but due to mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.721 The **medium value** 'Fen Farmhouse' Grade II listed 'Fen Farmhouse' (**1373595**) is located on the southern flank of Ash Lane 530 m south of Hargate and 970 m north-west of the draft Order Limits. The asset is of evidential and historical value, dates to the Early 17th century plastered timber frame house with a thatched roof.
- 3.2.722 The setting of the asset is informed by its roadside location and its relationship with its associated non-designated outbuildings most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and its associated outbuildings have historical and functional relationships. The asset and associated buildings are coherent as a working farm complex and further outbuildings comprising large hanger style barns were added in the later 20th century. The setting of the asset, therefore, makes a considerable contribution, but due to mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.723 The **medium value** Grade II listed 'White Lodge' (**1171517**) is located on the eastern flank of Fen Road, 210 m south-south-east of Hargate and 880 m west-northwest of the draft Order Limits. The asset is of evidential and historical value, was built in the 17th century and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.724 The setting of the asset is informed its roadside location and its relationship with its associated non-designated outbuildings most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and its associated outbuildings have historical and functional relationships. The asset and associated buildings are coherent as a working farm complex and further outbuildings comprising large hanger style barns were added in the later 20th century as well as a small residential cottage immediately to the south. The setting of the asset makes a moderate

contribution to its value, but due to the later development of the farm and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.725 The **medium value** Grade II listed 'Kilmurray' (**1049592**) is located on the north-eastern flank of Fen Road, 520 m south-south-east of Hargate and 630 m west-northwest. The asset is of evidential and historical value, is of probable 17th or 18th century date and comprises a rendered timber frame cottage with a steep pantile roof.
- 3.2.726 The setting of the asset is informed by its roadside location and by its lawned grounds defined by mature tree lined hedgerows, which screen views of later 20th century residential properties to the north and west. The view to the Project in the east is broken by the asset's property boundary and by mature tree lined hedgerows and copses in the intervening landscape. The setting of the asset, therefore, makes a considerable contribution to its value but does not extend to the draft Order Limits.
- 3.2.727 The **medium value** Grade II listed assets 'Turnpike Cottage' (**1373620**) and 'Cottages Occupied by Mrs Blackburn and Mrs Greenwood Immediately East of Turnpike Cottage' (**1049561**) are located 130 m north of The Turnpike, 2.3 km west-south-west of Hargate and 2 km west-northwest of the draft Order Limits. These assets are of evidential and historical value. Turnpike Cottage dates to the 17th to 18th centuries and comprises a plastered timber frame cottage with a thatched roof. The other cottages, now Turnpike House, date to the 17th century and comprise a plastered timber frame and clay lump structure with a thatched roof.
- 3.2.728 The setting of the assets is shared and informed by their interrelationship and their relationships with associated outbuildings that have been constructed in the later 20th century. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical relationship. A farming complex recorded on the first edition OS map of 1884 lies immediately to the west further inform the setting, but an intervening mature tree lined hedgerow allow for only broken views. Residential properties have been built to the south and south-east in the 20th century. The setting of the assets makes a moderate contribution to their value, but due to development, mature tree lined boundaries and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.729 The following listed buildings are in the northern half of the parish of Tibenham:
- 3.2.730 The **medium value** Grade II listed 'Shrubbery Farmhouse' (**1050031**) is located 380 m south-south-east of The Turnpike, 1.3 km south-west of Hargate and 1.7 km west-northwest of the draft Order Limits. The farmhouse is of evidential and historical value, was built c. 1700 and comprises a red brick house with a steep black glazed pantile roof. There is a late 19th century red brick wing to the rear.
- 3.2.731 The setting of the asset is informed by its relationship with farm outbuildings most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the topography, development and mature tree lined boundaries of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.732 The **medium value** Grade II listed 'Manor House' (**1179387**) is located on the western flank of Diss Road, 1.3 km west of Tibenham and 250 m west of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 17th or

18th centuries and comprises a plastered timber frame structure with a steep pantile roof.

- 3.2.733 The setting of asset is informed by its roadside location and by its relationship with associated farm outbuildings some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset and associated buildings are coherent as a farming complex and the setting makes a considerable contribution to the asset's value. The asset has a largely open view to the Project in the east and so the setting extends to the draft Order Limits.
- 3.2.734 The **medium value** Grade II listed 'Low Farmhouse' (**1373399**) is located on the eastern flank of Diss Road, 1.25 km west of Tibenham and 190 m west of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 17th or 18th centuries and comprises a timber frame structure faced in red brick with buff brick quins in the 19th century and with a steep black glazed pantile roof.
- 3.2.735 The setting of the asset is informed by its relationship with associated farm outbuildings some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. Twentieth century residential development has, however, encroached on the asset to the west and south, and several of the outbuildings have changed function. Despite this, and the 20th century expansion of the farmyard to the east, the asset and associated buildings retain some coherence as elements of a farming complex and so the setting of the assets makes a moderate contribution to its value. Due to the proximity of the Project, however, the setting extends to the draft Order Limits.
- 3.2.736 The **medium value** Grade II listed 'Old Hall' (**1373400**) is located 890 m north-west of Tibenham on the southern flank of the Tas Valley, 360 m east of Diss Road and 140 m east of the draft Order Limits. The asset is of evidential and historical value, probably dates to the early 18th century and comprises a plastered timber frame house with a steep black glazed pantile roof.
- 3.2.737 The setting of the asset is informed by its isolated location and by its relationship with its non-designated outbuildings most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The setting of the asset affords it privacy and peace, and so makes a considerable contribution to its value. The grounds of the asset are defined to the west and south by mature tree lined hedgerows and by the wooded banks of the Tas to the north, allowing for broken views towards the Project. The setting of the asset, therefore, extends to the draft Order Limits.
- 3.2.738 The **medium value** Grade II listed 'Fairfield Kenhurst' (**1301982**) is located on the western flank of Cargate Common, 710 m north of Tibenham and 570 m east of the draft Order Limits. The asset is of evidential and historical value and comprises a pair of 18th century plastered and roughcast timber frame structure with a low-pitched pantile roof.
- 3.2.739 The setting of the asset is informed by its isolated roadside location and by the surrounding agricultural landscape with which the asset has a historical relationship. The grounds of the asset are lawned to the rear with paddocks beyond defined by a mature tree lined hedgerow to the west. The setting makes a moderate contribution to the value of the asset but due to the topography, mature tree lined boundaries and

copses of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.740 The **medium value** Grade II listed 'Willow Farmhouse' (**1050030**) is located on the northern flank of Cargate Common Road, 800 m north of Tibenham and 650 m east of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the late 17th to early 18th centuries and comprises a plastered timber frame structure front faced in painted brick in the 19th century. The asset has a pantile roof.
- 3.2.741 The setting of the asset is informed by its isolated roadside location and by its relationship with associated non-designated farm outbuildings several of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated buildings have historical and functional relationships. Some of the outbuildings have been converted into dwellings, but they and the farmhouse retain coherence as a former farm complex. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature tree lined hedgerow boundaries, and the topography, the tree lined banks of the Tas, and further mature tree lined boundaries of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.742 The **medium value** Grade II listed 'Low Farmhouse' (**1179345**) is located on the northern flank of Cargate Common Road, 820 m, and 740 m east of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 17th to 18th centuries and comprises a brick faced timber frame structure with a steep black glazed roof.
- 3.2.743 The setting of the asset is informed by its roadside location and by its relationship with its associated non-designated outbuildings north and south of the road, several of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated buildings have historical and functional relationships. Some of the outbuildings have been converted into dwellings, but they and the farmhouse retain coherence as a former farm complex. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature tree lined hedgerow boundaries, and the topography, the tree lined banks of the Tas, and further mature tree lined boundaries of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.744 The **medium value** Grade II listed assets 'Church Farmhouse' (**1179356**) and 'Barn Approximately 100 Yards North of Church Farmhouse' (**1049990**) are in the Church Farm complex immediately south-west of the junction of Mill Road and Church Lane, Tibenham and 830 m east of the draft Order Limits. These assets are of evidential and historical value. The farmhouse dates to the 16th to 17th centuries and comprises a plastered timber frame with a steep peg-tile and pantile roof. The barn is a 17th century timber frame, weatherboard clad structure with a steep pantile roof.
- 3.2.745 The setting of the assets is shared and informed by their farmyard location, by their interrelationship and their relationship with the non-designated outbuildings of the farming complex, most of which are recorded on the first edition OS map of 1884. The setting is also informed by the surrounding agricultural landscape with which the assets and associated outbuildings have a historical and functional relationship. The barn has now been converted into a private dwelling or perhaps farm offices, whilst several of the of the other elements recorded on the OS map appear to have changed function. Twentieth century development of the farm complex has introduced modern hanger style barns into the setting in the west and south of the farm complex. The setting of the assets, therefore, makes a moderate contribution to

their value. The view from the assets to the Project in the west is screened by mature tree lined hedgerows, whilst the view to the north is blocked by buildings of the farm complex. The setting of the assets, therefore, does not extend to the draft Order Limits.

- 3.2.746 The **medium value** Grade II listed assets 'Church Cottage Occupied By Mr Hawkes' (**1049993**) and '1 Church Cottage' (**1373396**) are located on the southern flank of Church Road, Tibenham, with the Grade I listed Church of All Saints immediately to the south and the draft Order Limits 940 m to the west. These assets are of evidential and historical value. Church Cottage dates to the 18th to 19th centuries and comprises a plastered clay lump structure with a pantile roof. Number 1 Church Cottage also dates to the 18th to 19th centuries and comprises a roughcast clay lump structure with a pantile roof.
- 3.2.747 The setting of the assets is shared and informed by their roadside location within the settlement, their interrelationship, and their relationship with the Church of All Saints. The setting is further informed by the immediate agricultural landscape with which the assets have a historical relationship. Due to the settlement focussed nature of the asset's setting, it does not extend to draft Order Limits.
- 3.2.748 The **medium value** Grade II listed 'Limes Farmhouse' (**1049996**) is located on the northern flank of Church Road, Tibenham and 990 m east-south-east of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the mid-19th century and comprises a red brick structure with a black glazed pantile roof.
- 3.2.749 The setting of the asset is informed by its roadside location within the settlement, by its relationship with the Grade I listed Church of All Saints and by its relationship with the non-designated outbuildings of the farming complex immediately to the south-east, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the assets and associated outbuildings have a historical and functional relationship. The setting of the asset has been encroached upon by a 20th century residential property to the west and by a large complex 20th century farm shed and barns to the north. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the intervening development and mature tree lined hedgerows the setting does not extend to the draft Order Limits.
- 3.2.750 The **medium value** Grade II listed asset 'The Laburnums' (**1373397**) and 'Barn Immediately South-West of The Laburnums' (**1049995**) are located immediately north-west of the junction of The Street and Hill Road, Tibenham, on the western flank of the Tib Valley and 1.2 km east of the draft Order Limits. These assets are of evidential and historical value. The Laburnums dates to the 17th century or earlier and comprises a rendered timber frame house with a steep pantile roof. The barn dates to the 17th to 18th centuries and comprises a plastered timber frame structure with a steep pantile roof.
- 3.2.751 The setting of the assets is shared and is informed by their roadside location within the settlement and by their interrelationship. The setting is further informed by the surrounding agricultural landscape within which the assets have a historical relationship. The grounds of the assets are defined by a high, evergreen, tree lined hedgerow affording the assets privacy and peace. The setting of the assets, therefore, makes a considerable contribution to their values, but due to the mature ground's boundaries and the topography of the Tib Valley, the setting does not extend to the draft Order Limits.

- 3.2.752 The **medium value** Grade II listed 'Tibenham Post Office' (**1049997**) is located on the western flank of the Tib Valley, east of The Street, Tibenham and 1.3 km east of the draft Order Limits. The now former Post Office is of evidential and historical value, dates to the 17th century and comprises a roughcast timber frame structure with a thatched roof.
- 3.2.753 The setting of the asset is informed by its roadside location in the settlement and its relationship with the former Primitive Methodist Chapel immediately to the north and recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The setting of the asset makes a considerable contribution to its value, but due to the topography of the Tib Valley, the setting does not extend to the draft Order Limits.
- 3.2.754 The **medium value** Grade II listed 'Coldstream Cottage' (**1301961**) is located east of The Street, Tibenham, on the western flank of the Tib Valley and 1.3 km east of the draft Order Limits. The asset is of evidential and historical value, is of probable 18th century date and comprises a plastered timber frame cottage with a pantile roof.
- 3.2.755 The setting of the asset is informed by its roadside location within the settlement and by the surrounding agricultural landscape with which the asset has a historical relationship. Once isolated, 20th century residential development has encroached on the asset from the north and so the setting of the asset makes a minor contribution to its value. Due to the topography of the Tib Valley and the mature tree lined boundary of a paddock on the western flank of The Street, however, the setting of the asset does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.756 The **low value** remains of a former brickworks (**1048**) are located 1.9 km south-east of the village of Bunwell, immediately east of Brick Kiln Lane and 50 m north-east of an draft Order Limits access road. The brickworks are recorded on the first edition OS map of 1884, but the site is now wooded with only a few walls and a well of evidential value surviving.
- 3.2.757 A **low value** 17th/18th century house (**1308**) is located 3.8 km south of the village of Bunwell, on the western flank of Diss Road and 270 m west of the draft Order Limits. The house is of evidential and historical value and has a timber-frame faced in late 19th century red brick with buff brick quoins. The steep gable ended roof has black glazed pantiles and there is a large brick chimneystack.
- 3.2.758 The site of a former windmill (**1039**) of evidential value is located 3.9 km south-south-east of the village of Bunwell and 330 m east of the draft Order Limits. The **negligible value** asset is recorded on the first edition OS map of 1885 and research recorded by the HER states that a post mill at this site was for sale in 1794 and that it was last used in 1883.
- 3.2.759 Further evidence of post medieval activity in the Bunwell Hill and the Tas Valley area is represented by **low value** findspots, and artefacts recovered during fieldwalking and metal detector surveys. These assets are of evidential value and comprise:
- A post medieval pewter bead and weight, a silver coin, a lead button, and a copper alloy button, a crotal bell, a knife, a thimble, a furniture fitting, pottery sherds and roof tile in a multi-period finds assemblage (**1062**) recovered from farmland partially within the draft Order Limits on the Tas Valley floor and its southern flank, 3.3 km south-south-east of the village of Bunwell

- A copper alloy Charles I Royal Farthing token (1634-6) and clay pipe fragments in a multi-period assemblage (**1111**) recovered from farmland 1.8 km south-east of the village of Bunwell within the draft Order Limits
- A post medieval copper alloy buckle, a spur, a thimble and token, a lead weight and token, and pottery sherds in a multi-period finds assemblage (**1087**) recovered from farmland 1.9 km south-east of the village of Bunwell, 160 m east of the Grade II listed Banyard's Hall (**1373609**) and partially within the draft Order Limits
- Post medieval crotal bells, buckles, buttons, coins, a jetton, a thimble, and lead cloth seal belonging to a dyer in multi-period finds assemblage (**1049**) recovered from farmland partially within draft Order Limits and 3 km south-south-east of the village of Bunwell
- A post medieval copper alloy buckle, finger ring, harness fitting, seal matrix, strap fitting and vessel fragment in a multi-period finds assemblage (**1188**) recovered from farmland 2.2 km south-south-east of the village of Bunwell, immediately east of Brick Kiln Lane and 20 m west of the draft Order Limits
- Post medieval pottery sherds, a copper alloy coin, token and button and a silver coin in a multi-period finds assemblage (**1063**) recovered from farmland 1.9 km south-east of the village of Bunwell and 50 m north-west of an draft Order Limits access road
- A George III sixpence (**1199**) and a copper halfpenny of William III (**1200**) recovered from farmland 2 km south-east of the village of Bunwell and 90 m north-west of the draft Order Limits
- A post medieval harness mount, a knife, a bell fragment, a punch, buckles, coins, buttons, tokens a thimble, pottery sherds and building materials in a multi-period finds assemblage (**1058**) recovered from farmland on the southern side of the Tas Valley, c. 1.3 km south of Bunwell Hill and partially within the draft Order Limits
- A post medieval, copper alloy rumbler bell, an apothecary weight, a book fitting, buckles, a button, a cauldron fragment, a coin, a coin weight, a crotal bell, a harness fitting, a jetton, a strap fitting, a stud, a thimble and two tokens: a silver pin and coin; and a lead button and cloth seal in a multi-period finds assemblage (**1118**) recovered from farmland on the Tas Valley floor, 3 km south-south-east of the village of Bunwell and partially within the draft Order Limits
- A very worn silver Elizabeth I fourpence (**1148**) recovered from farmland 3.9 km east-south-east of the village of Bunwell and 120 m south-east of an draft Order Limits access road
- A post medieval copper alloy rowel spur in a multi-period finds assemblage (**1191**) recovered from farmland 2.9 km south-south-east of the village of Bunwell, on the southern flank of the Tas Valley, close to the valley floor and 140 m west of the draft Order Limits
- A 16th century, post medieval copper alloy double-looped buckle in a multi-period finds assemblage (**1054**) recovered from farmland 3.2 km south-south-east of the Village of Bunwell and on the floor of the Tas Valley 150 m east of the draft Order Limits
- A small assemblage of medieval and post medieval pottery (**1000**) recovered from the grounds of the Grade II listed post medieval Banyard's Hall (**NHL1373609**)

located 2 km south-east of the village of Bunwell and 160 m north-west of the draft Order Limits

- The sites of three possible medieval buildings (**1094**, **1090**, **1096**) are in a field 2.7 km south-south-east of the village of Bunwell and 160 m west of the draft Order Limits. As well as the medieval finds that have identified the sites, fieldwalking also recovered a post medieval, copper alloy button from site (**1090**)
- A post medieval lead alloy button (**1281**) recovered from farmland 3 km south-south-east of the village of Bunwell and 170 m west of the draft Order Limits
- Post medieval pottery sherds in a multi-period finds assemblage (**1016**) recovered from farmland 3.6 km south of the village of Bunwell and on the southern flank of the Tas Valley 200 m east of the draft Order Limits
- A post medieval, copper alloy bell and token, and pottery sherds and clay pipe fragments in a multi-period finds assemblage (**1102**) recovered from farmland 1.9 km south-east of the village of Bunwell and 210 m north-west of the draft Order Limits
- Two post medieval bells, a brooch, a buckle, a coin, a stirrup, a musket ball, a spindle whorl, and pottery sherds in multi-period finds assemblage (**1075**) recovered from farmland 220 m west of the draft Order Limits and 1.3 km south-south-west of the village of Bunwell
- A post medieval crotal bells, a cloth seal, a musket ball, a thimble, a hammer, a spur fragment, a buckle, a button, a coin, a strap fitting, a sword, clay pipe fragments and pottery sherds in a multi-period finds assemblage (**1066**) recovered from farmland 2 km south-south-east of the village of Bunwell and 240 m north-west of the draft Order Limits in a field immediately south-east of the junction of Bunwell Hill and The Turnpike
- A headstone to William Long (**1272**) was found on Quaker Farm on the eastern flank of Low Common, 2.6 km south-east of the village of Bunwell and 240 m south-east of the draft Order Limits. William is known to be a Quaker from Aslacton, and it has been suggested there may have a small, private burial ground associated with the farm
- A post medieval, copper alloy crotal bell, buckle, button, coins, furniture fitting, purse bar, thimble, strap fitting, token, and part of a suspension mount from a sword belt; two silver coins, an iron knife, a glass linen smoother and pottery sherds in a multi-period finds assemblage (**1129**) recovered from farmland 720 m south of the village of Bunwell and 260 m west of the draft Order Limits
- A post medieval copper alloy buckle, bell, Jew's harp, spoon, spur, strap fitting and token; a lead cloth seal, furniture fitting, musket ball, seal, and weight; and a silver coin in a multi-period finds assemblage (**1104**) recovered from farmland 3.2 km south-east of the village of Bunwell and 420 m south-east of the draft Order Limits

## Winfarthing and Shelfanger

### *Designated Heritage Assets*

3.2.760 The following listed buildings are in the southern half of the parish of Tibenham.

3.2.761 The **medium value** Grade II listed 'Home Farmhouse' (**1050003**) is located on the northern flank of Low Road, 2.9 km north of Winfarthing and 1.1 km west of the draft Order Limits. The asset is of evidential and historical value, of probably of 17th

century date and comprises a timber frame house with plaster and red brick and a pantile roof.

- 3.2.762 The setting of the asset is informed by its roadside location and by its relationship with the non-designated modern buildings of the still working Home Farm complex. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its central location in the farmyard, the asset is screened from the Project and so the setting does not extend to the draft Order Limits.
- 3.2.763 The **medium value** Grade II listed 'Lilac Cottage' (**1050002**) is located on the southern flank of Low Road, 2.8 km north of Winfarthing and 1.5 km west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame cottage with a steep pantile roof. It has a probable early 19th century west wing constructed of plastered clay lump with a pantile roof.
- 3.2.764 The setting of the asset is informed by its isolated roadside location and its mature grounds containing scattered trees and defined by mature tree lined hedgerows. The setting affords the asset privacy and makes a considerable contribution to its value. Due to the mature grounds of the asset, however, the setting does not extend to the draft Order Limits.
- 3.2.765 The **medium value** Grade II listed 'Rosemary Cottage Well Cottage' (**1050032**) is located on the eastern flank of Cherry Tree Road, 2.6 km north of Winfarthing and 1.7 km west of the draft Order Limits. The asset is of evidential and historical value, comprises a pair of 18th century roughcast cottages with a steep black glazed pantile roof. Rosemary Cottage is adjoined to the north by a modern single storey wing.
- 3.2.766 The setting of the asset is informed by its roadside location and by its large garden area defined by a high, evergreen hedge. The setting is also informed by the surrounding agricultural landscape with which the asset has a historic relationship. Based on cartographic evidence, the asset stood in isolation until the latter half of the 20th century when a commercial premises was established on the opposite side of Cherry Tree Road, and a house and with associated commercial buildings were built to the south. The high hedge around the asset alleviates some of the visual impact of this modern development but there is likely to be intrusive noise, dust, and pollution. The setting of the asset, therefore, makes a minor contribution to its value, but due to the high hedge boundary of the asset, the setting does not extend to the draft Order Limits.
- 3.2.767 The **medium value** Grade II listed 'Yew Tree Farmhouse' (**1179528**) is located 190 m south of Low Road down a private drive, 2.6 km north of Winfarthing and 1.1 km west of the draft Order Limits. The core of the asset comprises a 16th century plastered timber frame house with a steep tiled roof. The asset is of evidential and historical value and adjoined to the north-west by a 17th century wing.
- 3.2.768 The setting of the asset is informed by its isolated location and by its relationship with the surviving non-designated buildings of the Yew Tree Farm complex, which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The asset has a lawned area to the east and there are several paddocks and fields to the south, west and north, with the perimeter defined by a mature tree lined hedgerow. The setting of the asset, therefore, makes a

considerable contribution to its value, but due to the mature boundaries of the asset's grounds, the setting does not extend to the draft Order Limits.

- 3.2.769 The **medium value** Grade II listed 'Orchard Farmhouse' (**1179347**) is located 80 m east of Cherry Tree Road, 2.3 km north of Winfarthing and 1.6 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a timber frame house built in the 17th century. The structure is plastered to the rear (east) and was faced with red brick in the early 20th century to the north, west and south. the asset has a later, low-pitched pantile roof.
- 3.2.770 The setting of the asset is informed by its location set back from the road and by its relationship with the surviving non-designated elements of the farming complex recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset has large grounds with scattered trees and lawned and paddock areas, which are defined by mature tree lined hedgerows. There has been some small-scale 20th century residential development to the north and south, but this is largely screened, and so the setting of the asset makes a considerable contribution to its value. Due to the asset's boundaries and further mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.
- 3.2.771 The **medium value** Grade II listed 'Longrow Farmhouse' (**1049999**) is located 230 m north of Long Row, 2.2 km north of Winfarthing and 670 m west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a roughcast timber frame house fronted with 19th century red brick. The roof is steep with modern interlocking tiles.
- 3.2.772 The setting of the asset is informed by its location set back from the road and by its relationship with the modern non-designated outbuildings of the working farm. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The asset is the only surviving element of the farming complex recorded on 19th and 20th century mapping, which has been replaced by large modern barns to the north and east. The brutalism of modern barns is distracting, but they and the asset retain coherence as a working farm complex. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the modern barns screening the asset, the setting does not extend to the draft Order Limits.
- 3.2.773 The **medium value** Grade II listed 'Tibenham Farmhouse' (**1179474**) is located 320 m north of Low Road, 2.6 km north-east of Winfarthing and 310 m east of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a black glazed pantile roof.
- 3.2.774 The setting of the asset is informed by its location set back from the road and by its relationship with a large outbuilding to the west, which is probably the only surviving element of the large farming complex recorded on 19th and 20th century OS mapping. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The asset has a walled garden to the rear with the wider grounds beyond containing scattered trees, lawned areas and a copse to the south defined by a mature, partially tree lined hedgerows. The setting of the asset, therefore, makes a moderate contribution to its value, and due to the proximity to the Project, the setting extends to the draft Order Limits.

- 3.2.775 The **medium value** Grade II listed 'Dyson's Farmhouse' (**1050000**) is located 200 m north of Low Road, 2.7 km north-east of Winfarthing and 690 m east of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a steep pantile roof.
- 3.2.776 The setting of the asset is informed by its location set back from the road and by its relationship with its associated non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset and outbuildings are situated in grounds with scattered trees, lawned areas and partially tree lined mature hedgerows. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature boundaries and the mature grounds of Tibenham Farmhouse in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.777 The **medium value** Grade II listed 'Pristow Green Farmhouse' (**1373404**) is located on the western flank of Pristow Green Lane, Pristow Green and 970 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a roughcast timber frame house with a steep pantile roof.
- 3.2.778 The setting of the asset is informed by its roadside location and by its relationship with the non-designated outbuildings of the working farm complex some of which are recorded on the first edition OS map of 1884. The setting is further informed by the immediate agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The farming complex lies immediately north of the asset, whilst there is a lawned area defined by a mature tree lined hedgerow to the south. The setting of the asset, therefore, makes a considerable contribution, but due to its restricted nature, the setting does not extend to the draft Order Limits.
- 3.2.779 The **medium value** Grade II listed 'Olde Walnut Tree Farm' (**1301874**) is located 60 m east of Pristow Green Lane, Pristow Green and 1.1 km east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a rendered timber frame house with a thatched roof.
- 3.2.780 The setting of the asset is informed its location set back from the road and by its relationship with the non-designated outbuildings of the former farm complex some of which may incorporate elements of the buildings recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset is set within large grounds which include stables and paddocks to the east and lawned areas to the west. The ground's boundaries are defined by mature tree lined hedgerows affording the asset privacy and seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the asset's mature boundaries and further mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.781 The **medium value** Grade II listed assets 'Walnut Tree Farmhouse' (**1050005**) and 'Courtyard Barn' (**1179603**) are located on the western flank of Pristow Green Lane, Pristow Green and 970 m east of the draft Order Limits. The farmhouse dates to the 17th century and comprises a plastered timber frame house with a thatched roof. The barn is of evidential and historical value, is of 17th to 18th century date and comprises a weatherboarded timber frame structure with a steep pantile roof, now converted into a residential dwelling. The east/west aligned barn is adjoined to the south by a red brick wing with a low-pitched pantile roof.

- 3.2.782 The setting of the assets is shared and informed by their roadside location within the settlement, their interrelationship, and their relationships with the non-designated buildings on the eastern flank of Pristow Green Lane recorded on the first edition OS map of 1884. The setting is further informed by the immediate agricultural landscape with which the assets have historical and functional relationships. The assets have lawned areas to the west with scattered trees and the farmhouse has paddocks beyond defined by mature hedgerows with dispersed trees. Although the barn is now a residential dwelling, it and the farmhouse retain coherence as a forming farming complex and so the setting of the assets makes a considerable contribution to their value. Due to the restricted nature of the setting, however, it does not extend to the draft Order Limits.
- 3.2.783 The **medium value** Grade II listed 'The Sycamores' (**1373405**) is located on the eastern flank of Pristow Green at the southern extent of the settlement and 1 km east of the draft Order Limits. The asset is of evidential and historical value and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.784 The setting of the asset is informed by its isolated roadside location in the settlement, by its relationship with the non-designated buildings of the former farming complex recorded on the OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset has matured grounds with scattered trees and defined by mature tree lined hedgerows, which afford the asset privacy and seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to tree cover along Pristow Green Lane and tree growth in the grounds of Walnut Tree Farmhouse to the west, the setting does not extend to the draft Order Limits.
- 3.2.785 The **medium value** Grade II listed 'Waterloo Farmhouse' (**1179483**) is located immediately north-east of the junction of Pristow Green Lane and Long Row and 700 m east-south-east of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century pebbledash rendered timber frame house built on a brick plinth. The western gable was brick clad in the 19th century and the steep thatched and corrugated iron roof described on the National Heritage List has been replaced by pantile.
- 3.2.786 The setting of the asset is informed by its roadside location and by its relationship with the associated non-designated former farm outbuildings, most of which have been converted into residential dwellings. Despite the change in function for several of the outbuildings, however, they and the asset retain coherence as a former farm complex. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset and associated outbuildings are situated in mature grounds that affords them privacy and seclusion and so the setting of the asset makes a considerable contribution to its value. Due to the mature copse in the grounds of Dyson's Farmhouse to the west and mature tree lined hedgerows in the intervening landscape, however, the setting of the asset does not extend to the draft Order Limits.
- 3.2.787 The **medium value** Grade II listed 'Bridgewater Farmhouse' (**1373401**) is located on the northern flank of Long Row, 2.9 km north-east of Winfarthing and 920 m east of the draft Order Limits. The asset is of evidential and historical value and comprises an 18th century painted brick house with a steep tiled roof.
- 3.2.788 The setting of the asset is informed by secluded location set back 30 m from Long Row and by its relationship with surviving non-designated outbuildings recorded on

the first edition OS map of 1884. The setting is further informed by the mature tree cover of its grounds and the small copses associated with the properties to the west and east. The asset and associated outbuilding retain coherence as a former working farm complex and so the setting of the asset makes a considerable contribution to its value. Due to the extensive tree cover in its grounds and that of the property to the west the setting does not, however, extend to the draft Order Limits.

- 3.2.789 The **medium value** Grade II listed 'The Grange Farmhouse' (**1179515**) is located on the northern flank of Long Row, 50 m east of Bridgewater Farmhouse and 1 km east of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century roughcast timber frame house with a later low-pitched pantile roof.
- 3.2.790 The setting of the asset is informed by its roadside location and by its relationship with the surviving non-designated outbuildings of the former farming complex recorded on the first edition OS map of 1884. The setting is further informed by the mature tree cover of its grounds which forms a copse largely to the north and east. The asset and associated outbuilding retain coherence as a former working farm complex and so the setting of the asset makes a considerable contribution to its value. Due to the extensive tree cover in its grounds and that of the properties to the west the setting does not, however, extend to the draft Order Limits.
- 3.2.791 The **medium value** Grade II listed assets 'Yew Tree Farmhouse' (**1050001**) and 'Barn Approximately 100 Yards East Of Yew Tree Farmhouse' (**1373402**) are located 90 m north of Long Row, 500 m east of Grange Farmhouse and 1.6 km east of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a steep pantile roof. The barn is of similar date, but with later alterations, and comprises a plastered timber frame structure with a pantile roof.
- 3.2.792 The setting of the assets is shared and informed by their interrelationship, by their relationship with associated non-designated outbuilding several of which are recorded on the first edition map of 1884. The setting is further informed by the large grounds of the farm that includes lawned areas, scattered trees, a pond and are defined by mature tree lined hedgerows. The assets and associated buildings have a historical and functional relationships with the surrounding agricultural landscape, which also informs the setting. The setting of the asset, therefore, makes a considerable contribution to the value of the assets, but due to their mature grounds and further mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.793 The **medium value** Grade II listed 'Long Row Farmhouse (at Waverdene Kennels)' (**1179523**) is located 70 m north of Long Row, 340 m east-northeast of Yew Tree Farm and 1.9 km east of the draft Order Limits. The asset is of evidential and historical value, is of probable 17th century and comprises a timber frame house faced with 19th century red brick with a steep pantile roof.
- 3.2.794 The setting of the asset is informed by secluded location set back from the road, by its relationship with associated non-designated outbuilding several of which are recorded on the first edition map of 1884, and by its mature grounds, which contain lawned areas, scattered trees and a pond and are defined by mature tree lined hedgerows. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds and development, copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.795 The **high value** Grade II\* listed 'Channonz Hall' (**1179541**) is located within heavily treed extensive grounds 450 m west of Plantation Road, at the southern end of Tibenham Airfield and 2.6 km east of the draft Order Limits. The original hall was constructed in the second half of the 16th century and extensively remodelled, expanded and modernised in 1721. Only the east kitchen wing of the 16th century building now survives with the rest of the hall demolished in 1784. The asset is of evidential and historical value and is built of red brick with a tile roof.
- 3.2.796 The setting of the asset is informed by its extensive, heavily wooded grounds and its relationship with the large medieval moat which largely surrounds it. The setting is further informed by its relationship with the extensive non-designated farm complex 50 m to the east, most of which is recorded on the first edition OS map of 1884. The extensive grounds of the asset afford it seclusion and privacy; therefore, the setting of the asset makes a considerable contribution to its value. Due to the heavily wooded grounds of the hall, however, the setting does not extend to the draft Order Limits.
- 3.2.797 The following listed buildings are in the parish of Winfarthing:
- 3.2.798 The **medium value** Grade II listed assets 'Elizabethan Cottage' (**1373022**) and 'Tudor Cottage' (**1050788**) are located side by side on the northern flank of the B1132 Heath Road, 2.1 km north-north-west and 1.7 km west of the draft Order Limits. These assets are of evidential and historical value. The Elizabethan Cottage dates to the 17th century and comprises a plastered timber frame structure with a pantile roof. The western gable is faced with painted early 18th century brick. The Tudor Cottage is of similar date and comprises a roughcast timber frame structure with a thatched roof.
- 3.2.799 The setting of the assets is shared and informed by their roadside location, their interrelationship and by their relationship with the 18th century Heath Farm 100 m to the south, although views towards this asset are screened. The setting is further informed by the surrounding agricultural landscape with which the assets have a historical relationship. The setting of the assets makes a considerable contribution to their values, but due to development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.800 The **medium value** Grade II listed 'Heath Farmhouse' (**1373023**) is located on the southern edge of the Heath Farm complex, 120 m south of the B1132 Heath Road and 1.7 km west of the draft Order Limits. The asset is an 18th century red brick house with a probably earlier core and a steep black glazed pantile roof. The asset is of evidential and historical value and is adjoined to the north by a plastered timber frame 17th century wing with a black glazed pantile roof. The asset is of evidential and historical value.
- 3.2.801 The setting of the asset is informed by its farmyard location and its relationship with the non-designated outbuilding of the farm complex, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.802 The **medium value** Grade II listed 'Green Oak Farmhouse' (**1180064**) is located on the western flank of Goose Green Lane, 1.5 km north of Winfarthing and 920 m west

of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a steep pantile roof.

- 3.2.803 The setting of the asset is informed by its isolated roadside location and by its relationship with the non-designated outbuildings of the farm complex, several of which are recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the mature trees lining Goose Green Lane and development and mature tree lined hedgerow in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.804 The **medium value** Grade II listed 'Woodthorpe Farmhouse' (**1301645**) is located on the eastern flank of Goose Green, 1.6 km north-north-east of Winfarthing and 420 m west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a black glazed pantile roof.
- 3.2.805 The setting of the asset is informed by its roadside location and its relationship with the non-designated outbuildings of the farm complex, several of which are recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The grounds of the asset contain lawned areas scattered trees and paddocks and are largely defined by a mature tree lined hedgerow affording the asset privacy and seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to mature tree lining Goose Green Lane and development and mature tree lined hedgerow in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.806 The **medium value** Grade II listed 'Rookery Farmhouse' (**1373002**) is located on the south-west flank of Goose Green Lane, 1.1 km north-north-east of Winfarthing and 580 m west of the draft Order Limits. The asset is of evidential and historical value and comprises two ranges. The south-west range dates to the late 17th to early 18th centuries and comprises a timber frame house encased in 19th century buff brick with red brick to the rear and a steep pantile roof. The north-east range dates to the late 16th century and comprises a timber frame house faced in buff brick with a pantile roof.
- 3.2.807 The setting of the asset is informed by its isolated roadside location and its relationship with the non-designated outbuildings of the farm complex, several of which are recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset's grounds contain a lawn area and scattered trees and are defined by mature tree lined hedgerows. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds and development and mature tree lined hedgerow in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.808 The **medium value** Grade II listed 'White House' (**1050786**) is located on the eastern flank of Hall Road, 1.3 km north-north-east of Winfarthing, 210 m south-east of Rookery Farmhouse and 320 m west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house, fronted in 19th century buff brick and with steep black glazed pantile roof.

- 3.2.809 The setting of the asset is informed by its isolated roadside location and its relationship with the non-designated outbuildings of the farm complex, some of which are recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The grounds of the asset are defined by a low hedge and contain lawns and scattered trees, affording the asset seclusion and peace. The setting of the asset, therefore, makes a considerable contribution to its value, and due to partial views to the east and the proximity of the Project, the setting extends to the draft Order Limits.
- 3.2.810 The **medium value** Grade II listed 'Thatch Cottage' (**1050787**) is located on the eastern flank of Hall Road, 150 m south of White House and 400 m west of the draft Order Limits. The asset is of evidential and historical value and comprises an 18th century red brick cottage with blue brick headers and a thatched roof.
- 3.2.811 The setting of the asset is informed by its secluded roadside location and by its small, mature hedgerow defined garden with several mature trees. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The small mature garden affords the asset some privacy. The setting of the asset makes a considerable contribution to its value, but due to its mature garden screening view to the east, the setting does not extend to the draft Order Limits.
- 3.2.812 The **medium value** Grade II listed 'Jasmine Cottage and Adjoining Cottage' (**1373027**) is located 60 m north of Short Green, 1.2 km west-northwest of Winfarthing and 2 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a steep pantile roof.
- 3.2.813 The setting of the asset is informed by its secluded location and by its mature grounds defined by a mature tree lined hedgerow. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. Cartographic evidence indicates that there has been some residential in-fill development to the south and west of the asset and the asset likely has broken views of the properties. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its mature grounds and development, copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.814 The **medium value** Grade II listed 'Short Green Farmhouse' (**1157380**) is located 80 m north of Short Green, 1 km west-northwest of Winfarthing and 1.9 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century much restored rendered timber frame house with a steep pantile roof.
- 3.2.815 The setting of the asset is informed by its location set back from Short Green and by its relationship with the non-designated outbuildings of the farm complex, some of which are recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The grounds of the asset are defined by a high hedge and contain lawns and scattered trees, affording the asset some seclusion and peace. Cartographic evidence indicates that there has been some residential in-fill development to the east of the asset and the asset likely has broken views of the properties. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its mature grounds and development, copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.816 The **medium value** Grade II listed 'Walnut Tree Farmhouse' (**1050794**) is located 90 m south of Short Green, 1 km west-northwest of Winfarthing and 2 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a steep corrugated iron roof.
- 3.2.817 The setting of the asset is informed by its farmyard location and by its relationship with the non-designated outbuildings of the farm complex, some of which are recorded on the first edition map of 1884. Several of the older outbuildings have been converted into residential dwellings and modern barns have been added to the farm in the 20th century. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship, and by its relationship with the large house directly to the south and recorded on the first edition OS map. The grounds of the asset are defined by a mature, high tree lined hedgerow affording the asset privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds and development, copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.818 The **medium value** Grade II listed 'Tudor Cottage' (**1050790**) is located on the western flank of High London Lane, 1 km west of Winfarthing and 1.9 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame cottage with a steep tiled roof.
- 3.2.819 The setting of the asset is informed by its isolated roadside location and by its historical relationship with the surrounding agricultural landscape. Its open view to the east has, however, been interrupted by the 21st century development of an ornamental lake with associated earthworks and planting in the field east of High London Lane and south of Back Lane Farm. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the earthworks and planting of the lake, and development, copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.820 The **medium value** Shrubhurst Cottage (**1373024**) is located on the western flank of High London Lane, 1 km west of Winfarthing and 1.9 km west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th to 18th centuries and comprises a plastered timber frame cottage with a steep pantile roof.
- 3.2.821 The setting of the asset is informed by its secluded roadside location and by its mature grounds defined by high tree lined hedgerows. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The setting of the asset affords the asset privacy and peacefulness and, therefore, makes a considerable contribution to its value. Due to the earthworks and planting associated with installation of the lake south of Back Lane Farm, and development, copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.822 The **medium value** Grade II listed 'Back Lane Farmhouse' (**1050789**) is located 100 m east of High London Lane, 9600 m west of Winfarthing and 1.8 m west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a thatched roof. The asset has been extended to the north and south in the 21st century.
- 3.2.823 The setting of the asset is informed by its farmyard location and by its relationship with the non-designated outbuildings of the farming complex, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings

have a historical and functional relationship. The large grounds of the asset are defined by a high, mature tree lined hedgerow and contain scattered trees, lawned areas, and in the field to the south, an ornamental lake. The grounds afford the asset privacy and, therefore, the setting of the asset makes a considerable contribution to its value. Due to the mature grounds of the asset and development, further mature boundaries, and copses in the intervening landscape, however, the setting does not extend to the draft Order Limits.

- 3.2.824 The **medium value** Grade II listed 'Furze Farmhouse' (**1157377**) is located 80 m south of Short Green, 60 m east of Back Lane Farmhouse, 8600 m west of Winfarthing and 1.8 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a steep black glazed pantile roof.
- 3.2.825 The setting of the asset is informed by its farmyard location and by its relationship with the non-designated outbuildings of the farm complex, some of which are recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The large grounds of the asset are defined by a low, mature hedgerow and contain scattered trees and lawned areas. The setting of the asset makes a considerable contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.826 The **medium value** Grade II listed 'Chapel House' (**1050793**) is located 40 m south of Short Green, 750 m west of Winfarthing and 1.7 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a restored 17th century plastered timber frame house with a thatched roof.
- 3.2.827 The setting of the asset is informed by its location set back from the road and by its relationship with the Grade II listed 17th century Conifers to the east and the non-designated property to the north-west, both of which are recorded on the first edition OS map of 1884. The setting is also informed by the surrounding agricultural landscape with which the asset has a historical relationship. The view to the agricultural land to the north, however, is interrupted by a late 20th century bungalow between the asset and Short Green. The setting of the asset, therefore, makes a moderate contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.828 The **medium value** Grade II listed 'Conifers' (**1301608**) is located on the southern flank of Short Green, 700 m west of Winfarthing and 1.65 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame long range with a pantile roof. Satellite images indicates the asset was remodelled in 2017 when four attic dormer windows were added to the northern elevation of the building and a wing was added to the rear. The walkover survey identified that the structure is now fronted with modern breeze blocks awaiting finishing.
- 3.2.829 The setting of the asset is informed by its roadside location and by its relationships with the 17th century Grade II listed Chapel House to the west and its associated outbuilding to the north-east, both of which are recorded on the first edition OS maps of 1884. The setting is also informed by the surrounding agricultural landscape with which the asset has a historical relationship. There are broken views to 20th century residential development to the east, through the mature tree lined hedgerow garden boundary of the asset. Due to the extensive reworking of the asset and the

encroaching development, the setting of the asset makes a minor contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.830 The **medium value** Grade II listed 'Over Bridge' (**1301606**) is located on the northern flank of Short Green, 550 m west of Winfarthing and 1.5 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a steep pantile roof.
- 3.2.831 The setting of the asset is informed by its roadside location and by its relationships with the associated non-designated building immediately to the north and the 17th century Grade II listed Old Stores on the southern flank of Short Green. There are large 20th century poultry sheds 100 m to the north of the asset and a 20th century residential property immediately to the east. The setting of the asset makes a moderate contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.832 The **medium value** Grade II listed 'The Old Stores' (**1373026**) is located on the southern flank of Short Green, 540 m west of Winfarthing and 990 m west of the draft Order Limits. The asset is of evidential and historical value, is of probable 17th century date and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.833 The setting of the asset is informed by its roadside location and by its relationships with its associated non-designated buildings to the south and east and with the 17th century Grade II listed Over Bridge on the northern flank of Short Green. The setting is further informed by the agricultural land to the south and east with which the asset has a historical relationship. There has been some 20th century infill residential development to the west, but it is sympathetic and in the local vernacular. The setting of the asset, therefore, makes a moderate contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.834 The **medium value** Grade II listed 'Wilderness Farmhouse' (**1050792**) is located 40 m north of Short Green, 420 m west of Winfarthing and 1.4 km west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.835 The setting of the asset is informed by its farmyard location and by its relationships with its associated non-designated buildings, some of which are recorded on the first edition OS map of 1884 but are generally of 20th century date. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The boundaries of the farmyard are defined by tree line hedgerows and fences, and it contains scattered trees, lawned areas to the south of the asset and outbuildings to the rear. The setting of the asset makes a considerable contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.836 The **medium value** Grade II listed 'Walnut Tree Farmhouse' (**1157406**) is located on the southern flank of Short Green, 300 m west of Winfarthing and 1.3 km west of the draft Order Limits. The asset is of evidential and historical value, dates to the late 16th century and comprises a rendered timber frame house with a tiled roof. The south-eastern gable is faced in red brick and the plastered wing to the rear has a modern pantile roof.

- 3.2.837 The setting of the asset is informed by its roadside location and by its relationship with the non-designated outbuildings of the former farm complex, some of which are recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. Several of the outbuildings appear to have been converted into residential dwellings, but they and the asset are still coherent as elements of a former farming complex. The setting of the asset, therefore, makes a considerable contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.838 The **medium value** Grade II listed 'Park Farmhouse' (**1050829**) is in a large farming complex 360 m north of Church Lane, Winfarthing and 490 m west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century timber frame house with a steep black glazed pantile roof. The asset was faced with red brick in the late 19th century. A large brick-built wing was added to the west was added in the late 19th century contemporary with the facing of the 17th century house.
- 3.2.839 The setting of the asset is informed by its farmyard location and by its relationship with the non-designated outbuildings of the former farm complex, many of which are recorded on the first edition map of 1884. The setting is further informed by the immediate agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The setting of the asset makes a considerable contribution to its value, and due to its proximity to the Project, the setting extends to the draft Order Limits.
- 3.2.840 The **medium value** Grade II listed 'Eton's Farmhouse' (**1373025**) is located on the eastern flank of Winfarthing Road, 8600 m south of Winfarthing and 750 m west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.841 The setting of the asset is informed by its farmyard location and by its relationship with the non-designated outbuildings of the working farm complex, some of which are recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The setting of the asset makes a considerable contribution to its value, however, due to it being restricted to the farming complex and immediate agricultural landscape, the setting does not extend to the draft Order Limits.
- 3.2.842 The following listed buildings and located within the Winfarthing conservation area.
- 3.2.843 The **medium value** Grade II listed 'Stocks Hill Farmhouse' (**1050797**) is located immediately north-east of the junction of Hall Road and The Street, Winfarthing and 840 m west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.844 The setting of the asset is informed by its location in the small farmyard and by its relationship with the non-designated outbuildings of the farm complex recorded on the first edition map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. Twentieth century residential development has encroached on the asset from the north and south, replacing agricultural land. The setting of the asset, therefore, makes a moderate contribution to its value, but due to

mature copses and tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.845 The **medium value** Grade II listed 'Holly Farmhouse' (**1050796**) is located on the western flank of The Street, Winfarthing and 890 m west of draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a steep black glazed pantile roof. The front elevation of the asset was faced with brick in the 18th century, now painted.
- 3.2.846 The setting of the asset is informed by its roadside location in the settlement and its relationship with its associated barn to the north-west, now converted into residential dwellings. The setting is further informed by the agricultural landscape to the west with which the asset and associated barn have a historical and functional relationship. Twentieth century residential development has encroached on the asset from the north, south, and on the eastern flank of The Street, replacing agricultural land. The setting of the asset, therefore, makes a moderate contribution to its value, but due to mature copses and tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.847 The **medium value** Grade II listed '1 and 2, The Street' (**1157400**) is located on the eastern flank of The Street, Winfarthing and 790 m west of the draft Order Limits. Number 1 is probably early 17th century in date and comprises a plastered timber frame house, partly faced in brick with a steep pantile roof. Number 2 adjoins to the east and is of probable late 17th century date. The asset comprises a painted brick house with a steep pantile roof and a small modern brick wing to the rear. The asset is of evidential and historical value.
- 3.2.848 The setting of the asset is informed by its roadside location within the settlement and its relationship with the Grade II listed The Fighting Cocks Public House on the opposite side of The Street. The setting of the asset has been encroached upon by 20th century residential development from the north and south, but this housing is sympathetic and in the local vernacular. The setting of the asset, therefore, makes a considerable contribution to its value, but due to development along Church Lane to the east and mature copses and tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.849 The **medium value** Grade II listed 'The Fighting Cocks Public House' (**1157389**) is located on the western flank of The Street, Winfarthing and 820 m west of the draft Order Limits. The pub is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a modern brick front and a steep pantile roof.
- 3.2.850 The setting of the asset is informed by its roadside location within the settlement and its relationship with the Grade II listed 1 and 2, The Street on the opposite side of The thoroughfare. The setting of the asset has been encroached upon by 20th century residential development from the north and south, but this housing is sympathetic and in the local vernacular. The setting of the asset, therefore, makes a considerable contribution to its value, but due to development on the eastern flank of The Street and along Church Lane to the east, and mature copses and tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.851 The **medium value** Grade II listed assets 'The Clerk's Cottage' (**1180044**), 'The Old Rectory' (**1373001**), 'Church Place' (**1050828**) and 'Church Hill Farmhouse' (**1180050**) are located on the northern flank of Church Lane, Winfarthing and 660 m west of the draft Order Limits. These assets are of evidential and historical value.

The Clerk's Cottage is a rendered timber frame 17th to 18th century cottage with a steep pantile roof and a modern, flat roofed wing to the south-west. The Old Rectory dates to the 17th century and comprises a plastered timber frame house with a thatched roof with a timber frame wing to the north with a lower thatched roof. Church Place comprises a terrace of three cottages the middle of which comprises a rendered timber frame structure dating to the 17th century. The two end cottages are of similar construction and of probable early 19th century date. The assets have a later pantile roof. Church Hill Farmhouse dates to the early to mid-19th century and comprises a red brick house with buff brick dressings and a low-pitched slated roof.

- 3.2.852 The setting of the assets is shared and informed by their location within the settlement, by their interrelationships and by their relationships with the non-designated outbuildings of Church Hill Farm, several of which are recorded on the first edition map of 1884. The setting is further informed by the assets relationships with the Grade I listed Church of St Mary to the south of Church Lane and their historical relationship with the agricultural landscape beyond the settlement's boundaries. The farm outbuildings have been converted into residential dwellings but they and the and the farmhouse and cottages retain their coherence as a former farming complex. The external garden boundary encircling the group of assets is largely defined by high, mature tree lined hedgerows affording the assets a shared privacy. The setting of the assets, therefore, makes a considerable contribution to their values, but due to the mature garden boundaries and further mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.853 The **medium value** Grade II listed 'Church Farmhouse' (**1373028**) is located on the western flank of The Street, Winfarthing and 760 m west of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a steep pantile roof.
- 3.2.854 The setting of the asset is informed by its roadside location within the settlement and by its relationship with the associated non-designated form outbuildings several of which are recorded on the first edition map of 1884. The setting is further informed by later 20th century outbuildings to the west and beyond them, the agricultural landscape with which the asset and associated buildings have a historical and functional relationship. There has been some later 20th century residential development along The Street to the north and south, but it is largely sympathetic and in the local vernacular. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the development of the settlement to the east and associated tree cover, the setting does not extend to the draft Order Limits.
- 3.2.855 The **medium value** Grade II listed 'School House' (**1050791**) is located on the western flank of The Street, Winfarthing 720 m west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.856 The setting of the asset is informed by its roadside location within the settlement and its relationship with the non-designated All Saints Primary School on the opposite flank of The Street. There has been later 20th century residential to the north and south and so the setting of the asset makes a moderate contribution to the assets value, but due to the school buildings to the east and mature trees beyond, the setting does not extend to the draft Order Limits.
- 3.2.857 The following listed buildings are in the parish of Shelfanger:

- 3.2.858 The **medium value** Grade II listed 'Manor Farmhouse' (**1050086**) is located a little to the north-west of the junction of Common Road and High London Lane on the north-western outskirts of Shelfanger, 1.25 km north-west of an draft Order Limits access road and 1.35 km west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century rendered timber frame, two storey house with a projection wing to the west and a steep pantile roof.
- 3.2.859 The setting of the asset is informed by its location within a former farming complex and by its relationship with its former outbuildings, now mostly residential dwellings, which are recorded on the first edition OS map of 1884. The setting is further informed by the immediate agricultural landscape with which the asset and former outbuildings have a historical and former functional relationship. The remains of a medieval moat also contribute to the setting and demonstrates the time depth of the site. The former farmyard has been divided by hedgerows to provide garden areas for the separate residences, but the buildings retain some coherence as a former farming complex. The setting of the asset, therefore, makes a moderate contribution to its value, but due to distance, its mature grounds and the development and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.860 The **medium value** Grade II listed assets 'Limetree Farmhouse' (**1156425**) and 'Barn Immediately East of Limetree Farmhouse' (**1050087**) are located on the southern flank of Common Road, 250 m west of Manor Farmhouse (**1050086**), 1.5 km north-west of the draft Order Limits. The assets are of evidential and historical value. The farmhouse dates to the 17th century but has a 16th century wing to the north-west forming an L-shaped plan. The asset is a rendered timber frame structure with the 17th century section fronted with 19th century yellow brick. The farmhouse has two storeys, an attic and a steeply pitched black glazed pantile roof. The barn, now a residential dwelling, dates to 17th or 18th centuries and comprises a plastered timber frame structure with a steep gable ended pantile roof.
- 3.2.861 The setting of the assets is shared and informed by their roadside location within a former working farm complex, their interrelationship and by their relationships with surviving non-designated outbuildings recorded on the first edition OS map of 1884. The setting is further informed by the immediate agricultural landscape, with which the assets and outbuildings have a historical and former functional relationship. A third property is located just to the west of the listed assets is also recorded on the OS map and its associated outbuildings also makes a positive contribution to the setting of the assets. The former farmyard has been divided up to provide garden areas for the separate dwellings and so some cohesion as a farming complex has been eroded. The setting of the assets, therefore, makes a moderate contribution to their values, but due to their mature tree lined hedgerow boundaries and the development and mature boundaries of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.862 The **medium value** Grade II listed 'Hill Cottages' (**1050088**) is located on the southern flank of Heywood Road on the eastern outskirts of 30 m south-west of the draft Order Limits. The asset has evidential and historical value and comprises a 17th century plastered timber frame, two storey cottage with a pantile roof.
- 3.2.863 The setting of the asset is informed by its roadside location within and by its relationship with later adjoining cottages to the north and the property to the 30 m to the east, all of which are recorded on the first edition OS map of 1884. The setting is further informed by the immediate agricultural landscape with which the asset has a historical relationship. The asset has small, mature gardens to the east and south

defined by hedgerows, fences and scattered tree affording the asset a small degree of privacy. There has, however, been some 20th century residential development along the southern and northern flanks of Heywood Road to the west of the asset, linking it and the associated buildings with Shelfanger. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the restricted roadside nature of its setting and screening by its boundaries and property to the east, the setting does not extend to the draft Order Limits.

- 3.2.864 The **medium value** Grade II listed assets 'Street Farmhouse' (**1302810**) and 'Barn Immediately North of Street Farmhouse' (**1050089**) are located on the north-eastern flank of Rectory Road within Shelfanger, 580 m west-northwest of the draft Order Limits. The assets are of evidential and historical value. The farmhouse dates to the late 16th century and comprises a plastered timber frame structure with gable ends and a pantile roof. The barn dates to the 17th century and comprises a plastered timber frame structure with a steep gable ended pantile roof.
- 3.2.865 The setting of the assets is shared and informed by their roadside location within the settlement, their interrelationship, and their relationship with the surviving outbuildings of a large farming complex recorded on 19th and 20th century OS mapping. The assets are located at a crossroads in the village, and the post medieval and early modern properties around the junction add to the character of the settlement and positively contribute to the setting of the assets. The setting is further informed. The setting is further informed by the agricultural land to the east, with which the assets have a historical and former functional relationship. Today, the assets serve as two residential dwellings and the farmyard has been divided to provide each property with gardens and drives. The setting of the assets, therefore, makes a moderate contribution to their value, but due to distance, some loss of integrity, and screening by copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.866 The **medium value** Grade II listed 'Cross Keys Garage' (**1156604**) is located immediately north of the four-way intersection of The Street, Winfarthing Road, Rectory Road and Church road in Shelfanger and 930 m west of the draft Order Limits. The asset has evidential and historical value and is recorded as a public house on 19th and early 20th century OS mapping. The asset comprises a 17th century plastered timber frame, two storey range with a gable-ended black glazed pantile roof. There is no indication the asset still serves as a garage, although there are two mid-20th century fuel pumps on the forecourt.
- 3.2.867 The setting of the asset is informed by its roadside, village location at the road junction. The setting is further informed by the assets relationships with the Grade II listed Street Farmhouse (**1302810**) and its associated barn (**1050089**) to the south-east and with the post medieval and early modern properties around the junction that add to the character of the settlement. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its restricted settlement nature, the setting does not extend to the draft Order Limits.
- 3.2.868 The **medium value** Grade II listed 'Yew Tree Cottage' (**1373362**) on the south-western flank of Rectory Road, 70 m south-east of the four-way intersection of The Street, Winfarthing Road, Rectory Road and Church road in Shelfanger and 9600 m west of the draft Order Limits. The setting of the asset is informed by its roadside, village location and by its relationships with the Grade II listed Street Farmhouse (**1302810**) and its associated barn (**1050089**) to the north and with the non-designated post medieval properties, which also flank Rectory Road. The assets garden boundaries are defined by high fences and evergreen hedgerows that,

despite, its village location, afford the asset a degree of privacy. The setting of the cottage, therefore, makes a considerable contribution to its value, but due to its restricted settlement nature, the setting does not extend to the draft Order Limits.

- 3.2.869 The **medium value** Grade II listed 'Shelfanger Hall' (**1373361**) at the western limit of Hall Lane, 570 m west of Shelfanger Road, 780 m south-west of Shelfanger, 670 m north-west of the draft Order Limits. The asset is of evidential and historical value and dates to the late 16th to early 17th centuries. It comprises a plastered timber frame, two storey house with a steep, gabled pantile roof. There is a likely 17th century wing to the south-east and a late 19th/early 20th century painted brick rear extension along entire length of building. Three sides of a moat survive to the west, south and east.
- 3.2.870 The setting of the asset is informed by its location within a working farm complex and by its relationship with its non-designated outbuildings, several of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical and ongoing functional relationship. The moat, likely of medieval date, informs on the considerable time depth of the site and makes a positive contribution to the setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to distance and the copses, development and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.871 The **medium value** Grade II listed 'Shelfanger Lodge' (**1302864**) is located at the junction of Lodge Lane and Shelfanger Road, 950 m south of Shelfanger, 360 m east-northeast of the draft Order Limits. The asset has evidential and historical value and comprises a stuccoed, two storey early 19th century house with a low-pitched, slated roof with lead rolls to the hips and ridge. The asset is adjoined to the rear (west) by a painted brick, two story wing (Lodge Farm Cottage) with a black glazed pantile roof, which appears to be a separate residence to the lodge.
- 3.2.872 The setting of the asset is informed by its roadside location and by its relationships with a small complex of buildings to the west and a residential property on the northern flank of Lodge Lane, most of which are recorded on the first edition OS map of 1884. The complex of buildings to the west appears to be former barns, now converted into residential properties. This suggests the lodge was once part of a working farm complex, although the coherence of such a complex is now largely lost. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its restricted roadside nature, and some screening by copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.873 The following listed buildings are in the parish of Heywood:
- 3.2.874 The **medium value** Grade II listed 'Heywood End' (**1373550**) is located off a private road 280 m west of Heywood End and 710 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a red brick faced timber frame structure.
- 3.2.875 The setting of the asset is informed by its isolated location within its own mature tree lined grounds and its relationship with a non-designated east/west wing recorded on the first edition OS map of 1884, and an outbuilding to the south-west first apparent on the 1928 OS map. The mature grounds afford the asset privacy and peacefulness, and so the setting of the asset makes a considerable contribution to its

value. Due to the mature grounds and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.

- 3.2.876 The **medium value** Grade II listed 'Heywood Manor' (**1049736**) is located at the end of a private road 750 m east of Goose Green and 200 m east of the draft Order Limits. The house is of evidential and historical value, dates to the early 17th century and is a pebble dashed structure. Partly encircling the manor, to the north and west, with earthwork remains to the south-west, south and south-east, is a moat (**1305**). This adds evidential and historical value to the listed building.
- 3.2.877 The setting of the asset is informed by its secluded farmyard location and by its relationship with the associated non-designated outbuildings, several of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset is located within a partially surviving medieval moat (**1305**), which also informs the setting. The setting of the asset, therefore, makes a considerable contribution to the asset's value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.2.878 The **medium value** Grade II listed 'Heywood Hall' (**1373551**) is located west of the junction of The Heywood and Boot Lane, 1.5 km east of Winfarthing and 780 m east of the draft Order Limits. The hall is of evidential and historical value, dates to the early 17th century and later and comprises a roughcast and brick structure with a black pantile roof.
- 3.2.879 The setting of the asset is informed by its roadside location and with its relationships with the associated farming complex to the south, much of which appears on the first edition OS map of 1884 and the partially surviving remains of a medieval moat to the north. The setting is further informed by the immediate agricultural landscape with which the asset and associated farm buildings have a historical and functional relationship. The grounds of the asset contain mature tree growth and are defined by mature hedgerows. The setting of the asset, therefore, makes a considerable contribution to its value, but due its restricted nature, and to screening by the asset's grounds and mature hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.880 The **medium value** Grade II listed 'Willow Bough Farmhouse' (**1386527**) is located at the end of a private road 210 m west of The Heywood, 1 km east of Winfarthing and 310 m east of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the early 17th century with the northern half rebuilt in the late 17th century and comprises a timber frame structure clad with rendered wattle and daub and some clay lump. The asset has a pantile roof.
- 3.2.881 The setting of the asset is informed by its farmyard location and by its relationship with the associated non-designated outbuilding, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated farm buildings have a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value. The ground of the farmhouse includes a mature copse that screens the asset from the Project to the west and north-west, however, there are likely to be broken views of pylons to the south-west. The setting of the asset, therefore, extends to the draft Order Limits.
- 3.2.882 The **medium value** Grade II listed 'Willows Farmhouse' (**1049737**) is located on the western flank of Heywood Road, 1 km south-east of Winfarthing and 330 m east of the draft Order Limits. The farmhouse is of evidential and historical value, dates to

the 17th to 18th centuries and comprises a clay lump and timber frame structure with a pantile roof.

- 3.2.883 The setting of the asset is informed by its farmyard location and by its relationship with the associated non-designated outbuilding, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated farm buildings have a historical and functional relationship. The asset is associated with the remains of a possible medieval moat (**1026**), and this too informs the asset's setting. A vehicle breaking yard and/or a garage workshop was established immediately to the south of the asset in the latter half of the 20th century as was a farming complex 90 m to the north-east. The setting of the asset, therefore, makes a moderate contribution to its value. The grounds of the asset contain numerous trees, particularly to the west in the direction of the Project. It is possible, however, that there would be glimpsed views of the Project, and so the setting extends to the draft Order Limits.
- 3.2.884 The **medium value** Grade II listed 'Hawthorn Cottage' (**1373552**) is located on the western flank of Heywood Road, 1.2 km south-east of Winfarthing and 380 m east of the draft Order Limits. The cottage is of evidential and historical value, dates to the 17th century and has a thatched roof. No details of the asset's construction are included on its National Heritage List, but it appears to be plastered and given the age of the asset, it is likely to be timber framed.
- 3.2.885 The setting of the asset is informed by its roadside location, its relationship with the Grade II listed 18th century Vine Farmhouse 70 m to the south and the surrounding agricultural landscape with which the asset has a historical relationship. Once secluded, small scale residential development has encroached on the asset from the north and east and so its setting makes a moderate contribution to its value. The grounds of the asset contain numerous trees, particularly to the west in the direction of the Project and there is a large mature copse further to the west. It is possible, however, that there would be glimpsed views of the Project to the north-west, and so the setting extends to the draft Order Limits.
- 3.2.886 The **medium value** Grade II listed 'Vine Farmhouse' (**1049738**) is located on the western flank of Heywood Road, 1.3 km south-east of Winfarthing and 390 m east of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 18th century and comprises a plastered timber frame structure, partially on a plinth, with a black glazed pantile roof.
- 3.2.887 The setting of the asset is informed by its roadside location and by its relationships with Grade II listed assets Hawthorn Cottage 70 m to the north and a formally associated barn immediately to the south. The setting is further informed by the surrounding agricultural landscape with which the asset and barn have a historical and functional relationship. Once parts of the same farming complex the farmhouse and barn are now separate private dwelling divided by a mature tree lined hedgerow. The setting of the asset, therefore, makes a moderate contribution to its value. There is mature tree growth to the rear (west) of the asset and beyond that, a large mature copse and further mature tree lined hedgerows. Due to the proximity of the Project, however, pylon tops are likely to be visible above the screening vegetation, and so the setting extends to the draft Order Limits.
- 3.2.888 The **medium value** Grade II listed 'Barn Immediately South of Vine Farmhouse' (**1343675**) is located on the western flank of Heywood Road, immediately south of Vine Farmhouse, 1.3 km south-east of Winfarthing and 390 m east of the draft Order Limits. The barn is of evidential and historical value, dates to the early 17th century but it was lengthened and a midstrey added in the 18th century. Further extensions

were added in the 19th and 20th centuries. The eight-bay 17th century barn comprises a timber frame structure with wattle and daub and weatherboarded walls, although the building now appears to be faced in red brick. The whole barn complex has pantile roofs.

- 3.2.889 The setting of the asset is informed by its roadside location and by its relationship with the Grade II listed Vine Farmhouse immediately to the north. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. Once parts of the same farming complex the barn and farmhouse are now separate private dwelling divided by a mature tree lined hedgerow. The setting of the asset, therefore, makes a moderate contribution to its value. There is mature tree growth to the rear (west) of the asset and beyond that, a large mature copse and further mature tree lined hedgerows. Due to the proximity of the Project, however, pylon tops are likely to be visible above the screening vegetation, and so the setting extends to the draft Order Limits.
- 3.2.890 The **medium value** Grade II listed 'Prospect Farmhouse' (**1049739**) is located on the eastern flank of Heywood Road, 1.5 km south-east of Shelfanger and 370 m south-east of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the early 17th century and comprises a plastered timber frame structure with a pantile roof.
- 3.2.891 The setting of the asset is informed by its farmyard location and by its relationship with associated non-designated outbuildings some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset and outbuildings are situated in heavily wooded grounds affording the asset privacy and peacefulness. The setting of the asset, therefore, makes a considerable contribution to its setting, but due to the mature grounds the setting does not extend to the draft Order Limits.
- 3.2.892 The **medium value** Grade II listed 'Chestnut Tree Farmhouse' (**1170015**), formally Low Farm, is located on the eastern flank of Heywood Road, 2 km south-east of Shelfanger and 710 m south-east of the draft Order Limits. The farmhouse has a tablet set into the central chimney engraved with the date and initials '1574 EAB'. The asset is of evidential and historical value and comprises a plastered timber frame structure with a mid-19th century brick faced frontal elevation and a black glazed pantile roof.
- 3.2.893 The setting of the asset is informed by its farmyard location and by its relationship with associated non-designated barns and outbuildings recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The remains of a medieval moat immediately to the south of the asset informs on the time depth of the setting indicated deeper historic roots. The farming complex contains 20th century steel frame hanger style barns to the north of the asset and its boundaries are defined by mature tree lined hedgerows. The barns and outbuilding are now converted to dwellings and commercial premises but they, the farmhouse and the 20th century buildings are coherent as a farming complex. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the development of the farm complex, its mature boundaries and copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.894 The following designated assets are in the parish of Burston and Shimpling:

- 3.2.895 The **medium value** Grade II listed 'High House Farmhouse' (**1049623**) is located on the western flank of Heywood End, 2.4 km north-east of Winfarthing and 980 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the late 16th century and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.896 The setting of the asset is informed by its roadside location and its relationship with the associated non-designated outbuilding recorded on the first edition OS map of 1884, although the extensive recorded farm complex is very much diminished today. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuilding have a historical and functional relationship. The large grounds of the asset contain gardens, lawned areas and scattered and clumped trees and are defined by mature tree lined hedgerows. The ground of the asset affords is seclusion and privacy, but due to the loss of its farmyard the context, the setting of the asset makes a moderate contribution to its value. Due to the mature grounds and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.897 The **medium value** Grade II listed '43, Long Lane' (**1049582**) is located west of Long Lane, 860 m west of Gissing and 1.63 km east of the draft Order Limits. The asset is of evidential and historical value, dates to the 18th century and comprises a plastered timber frame cottage on a flint plinth with a pantile roof.
- 3.2.898 The setting of the asset is informed by its roadside location, by its relationship with the non-designated residential property to the south and recorded on the first edition OS map of 1884 and by its historical relationship with the surrounding agricultural landscape. The grounds of the asset contain scattered trees and lawned areas and are defined by mature tree lined hedgerows affording the asset privacy and peacefulness. The setting of the asset, therefore, make a considerable contribution to its value, but due to its mature grounds and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.899 The **medium value** Grade II listed 'Grove Cottage' (**1373630**) is located on the north-eastern flank of Bridge Road, 750 m north of Burston and 1.8 km east of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a thatched roof.
- 3.2.900 The setting of the is informed by its roadside location and by its relationship with the surrounding agricultural landscape with which the asset has a historical relationship. The asset is recorded in isolation on the first edition OS map of 1884 and remained so until the latter half of the 20th century when a residential property and commercial buildings were established to the north-west, encroaching on the asset's setting. The setting of the asset, therefore, makes a moderate contribution to its value, but due to development, mature tree lined hedgerows and copses in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.901 The **medium value** Grade II listed 'Far End' (**1373593**) is located off a private road 110 m north-north-west of Common Lane in Burston and 1.4 km east of the draft Order Limits. The asset is of evidential and historical value and comprises a small 17th century rendered timber frame house with a steep roof.
- 3.2.902 The setting of the asset is informed by its isolated location on the western flank of the settlement and by its relationship with possibly related 20th century buildings to the south. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The grounds of the asset contain lawned areas and mature trees and are defined by mature tree lined hedgerows

affording the asset privacy. The setting of the asset, therefore, make a considerable contribution to its value, but due to its mature grounds and development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.903 The **medium value** Grade II listed 'Market Farmhouse' (**1373631**) is located on the eastern flank of Market Lane, at the southern limit of Burston and 1.6 km east of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century modern rendered timber frame house with a black glazed pantile roof.
- 3.2.904 The setting of the asset is informed by its roadside location and by its relationship with its associated outbuildings recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The outbuildings comprise barns, but these have now been converted into residential dwellings; however, the farmhouse and the outbuildings remain coherent as a former farming complex. Small scale residential development has encroached on the asset along Market Lane to the north and south and so the setting of the asset makes a moderate contribution to its value. Due to development and mature tree lined boundaries in the intervening landscape, however, the setting does not extend to the draft Order Limits.
- 3.2.905 The following designated assets are in the parish of Gissing:
- 3.2.906 The **medium value** Grade II listed 'Simonds Farmhouse' (**1050352**) is located on the eastern flank of Common Road, 160 m south of Long Row Farmhouse and 1.9 km east of the draft Order Limits. The asset is of evidential and historical value, dates to the mid to later 19th century and comprises a house built of red brick with yellow brick dressings. There is a 17th century timber frame wing to the rear (east), which is now entirely encased in 19th century red brick.
- 3.2.907 The setting of the asset is informed by its roadside location, by its relationship with associated non-designated outbuilding several of which are recorded on the first edition map of 1884, and by its mature grounds, which contain lawned areas, scattered trees and a pond and are defined by mature tree lined hedgerows. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to a mature tree lined hedgerow along Common Road and development, copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.908 The **medium value** Grade II listed 'Kite House' (**1152850**) is located immediately north-east of the junction of Bridge Road, Burston Road and Gissing Road 770 m north-north-east of Burston and 2 km east of the draft Order Limits. The asset is of evidential and historical value and comprises a probable 18th century plastered cottage with yellow brick dressing on a flint plinth with a thatched roof.
- 3.2.909 The setting of the asset is informed by its roadside location and its relationship with further buildings to the north, one of which is recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuilding have a historical relationship. Infill development between the asset and the contemporary outbuilding to the north is sympathetic and in the local vernacular, as is the mid-20th century residential property to the south-west. The grounds of the asset are defined by hedgerows and there is a mature copse immediately to the north-east that screens the asset from a large complex of modern late 20th and 21st century hanger barns 150 m in the same

direction. The setting of the asset makes a moderate contribution to its value, but due to development, and mature copses and tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.910 The former **low value** Diss Heywood School (**1311**) is located on the eastern flank of Heywood road 1.4 km north-east of Shelfanger and 80 m north of an draft Order Limits access road. The school is of evidential and historical value and was built in 1856 in a Gothic style from red brick with a blue decorative course in the walls and on top of the door. The slate roof is slotted with roll-top ridge tiles and a double-hole crested ridge. The school was closed by 1947 and has since been converted into a private dwelling.
- 3.2.911 The **medium value** earthwork remains of a medieval moated site of evidential value with associated **low value** post medieval farm buildings (**1028**) are located immediately east of Heywood Road, 1.5 km south-east of Shelfanger and 280 m north-east of the draft Order Limits. The farm buildings are of evidential and historical value and include a 19th century brick farmhouse, and an 18th century timber framed barn, a very late example of the timber framing tradition.
- 3.2.912 The **negligible value** site of a former windmill (**1045**) of evidential value is located 1.9 km north-east of Shelfanger and 350 m east of the draft Order Limits. The asset is recorded on Harling's 1821 OS drawing, and on Bryant's map of 1826 but not on subsequent OS mapping. The HER states that the mill fell out of use in 1878.
- 3.2.913 Further evidence of post medieval activity in the Winfarthing and Shelfanger area is represented by **low value** findspots, and artefacts recovered during fieldwalking and metal detector surveys. These assets are of evidential value and comprise:
- A post medieval copper alloy jetton and harness mount in a multi-period finds assemblage (**1291**) recovered from farmland 700 m north-east of Shelfanger, immediately south of Heywood Road and partially within the draft Order Limits
  - A post medieval copper alloy harness mount, spur fragment and two tokens in a large, multi-period finds assemblage (**1190**) recovered from farmland 110 m west of the draft Order Limits and 620 m north-east Shelfanger. The survey area is close to the head of a shallow tributary valley of the Tas with the floor of the valley just to the west and it is likely the extensive finds assemblage indicates the location of a Romano-British building or farmstead
  - A post medieval silver coin and a lead weight in a multi-period finds assemblage (**1284**) recovered from farmland 2.2 km north-north-east of Winfarthing and 150 m east of the draft Order Limits
  - A post medieval lead cloth seal in a multi-period finds assemblage (**1206**) recovered from farmland 560 m south-south-east of Winfarthing, immediately south of Heywood Road and 250 m west of the draft Order Limits
  - A post medieval silver coin in a multi-period finds assemblage (**1292**) recovered from farmland on the eastern flank of Winfarthing and 300 m west of the draft Order Limits
  - A post medieval copper alloy buckle and a silver coin (**1296**) were recovered from farmland within the former boundary Winfarthing Great Park (**1064**), 90 m north-east of Winfarthing and 340 m north-west of the draft Order Limits

## Bressingham and the Waveney Valley

### *Designated Heritage Assets*

- 3.2.914 The following listed buildings are in the parish of Bressingham:
- 3.2.915 The **medium value** Grade II listed 'Lodge Farmhouse' (**1049685**) is located on the eastern flank of Fersfield Road, 1.7 km north-west of Bressingham and 2 km north-west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame house with a steep pantile roof.
- 3.2.916 The setting of the asset is informed by its roadside location, by its relationship with the Grade II listed Algar House on the western flank of Fersfield Road and by its relationship with the barns and outbuildings of the Lodge Farm complex most of which are recorded on the first edition OS map of 1884 as Bunn's Farm. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The asset now serves as a holiday let and the outbuildings are now residential properties and commercial premises, but the buildings are still coherent as a former farming complex. The grounds of the complex contain numerous mature trees and are defined by mature tree lined hedgerows affording the asset privacy. The setting of the asset makes a considerable contribution to its value, but due to its mature grounds and development, mature copses and tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.917 The **medium value** Grade II listed 'White Gates' (**1373585**) is located 250 m west of Common Road accessed by a private road, 400 m north-north-west of Bressingham Common and 1 km north-north-west of the draft Order Limits. The asset is of evidential and historical value and comprises a 17th century plastered timber frame structure with a pantile roof.
- 3.2.918 The setting is informed by its off-road location and by its relationship with associated outbuilding and further properties to the south including Common Farm most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The asset has large grounds that include lawned areas, scattered mature trees and that are defined by mature tree lined hedgerows affording the asset peace and privacy. The setting of the asset makes a considerable contribution to its value, but due to its mature grounds and development, mature copses and tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.919 The **high value** Grade II\* listed 'Valley Farmhouse' (**1049665**) and the **medium value** Grade II listed 'Stables Immediately South-West Of Valley Farmhouse' (**1170651**) and 'Barn Approximately 60 Yards South-West Of Valley Farmhouse' (**1049666**) are located north-west and south-east of The Valley, 580 m west of Bressingham and 1.85 m west of the draft Order Limits. These assets are of evidential and historical value. The farmhouse comprises a 16th century and later plastered timber frame house on a brick plinth with a steep pantile roof. The stables probably date to the early 19th century and comprises a clay lump structure with a pantile roof. The barn dates to the 17th/18th centuries and comprises a six bay, timber frame structure with a steep corrugated iron clad roof.
- 3.2.920 The setting of the assets is shared and is informed by their roadside location and by the interrelationships of the designated assets and their relationships with the non-designated buildings of the farming complex, several of which are apparent on the first edition OS map of 1884. The setting is further informed by the surrounding

agricultural landscape with which the designated assets and associated non-designated buildings have a historical and functional relationship. The assets are situated within a working farm complex and so the setting of the assets makes a considerable contribution to their value. Due to the shallow valley location of the farming complex and the topography, development, copses, and mature tree lined hedgerows of the intervening landscape, however, the setting of the assets does not extend to the draft Order Limits.

- 3.2.921 The **medium value** Grade II listed 'Fenners Farmhouse' (**1170546**) is located north-west of the junction of The Valley and Fersfield Road 1.3 km west-northwest of Bressingham and 1.8 km west-northwest of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a steep pantile roof.
- 3.2.922 The setting of the asset is informed by its roadside location and by its relationship with the non-designated buildings of the former farming complex some of which are apparent on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated non-designated buildings have a historical and functional relationship. Some of the outbuildings have been converted in residential dwellings but the complex is still coherent as former farming complex and so the setting of the asset makes a considerable contribution to its value. Due to the topography, development, mature copses, and tree lined hedgerows of the intervening landscape, however, the setting of the assets does not extend to the draft Order Limits.
- 3.2.923 The **medium value** Grade II listed 'High House' (**1049654**) is located on the north-eastern flank of Fersfield Road, 1.1 km west-northwest of Bressingham and 1.5 km west-northwest of the draft Order Limits. The asset is of evidential and historical value and comprises an early 17th century plastered timber frame house with a steep thatched roof.
- 3.2.924 The setting of the asset is informed by its roadside location and by its relationship with residential properties to the north-west and south-east some of which are recorded on 19th and early 20th OS mapping. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The grounds of the asset and those of the neighbouring properties are large, mature, and heavily wooded affording the properties privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds and development and mature tree lined hedgerows in the intervening landscape, it does not extend to the draft Order Limits.
- 3.2.925 The **medium value** Grade II listed 'Poplar Farmhouse' (**1170541**) is located south-south-west of Fersfield Road, 980 m west of Bressingham and 1.4 km west of the draft Order Limits. The farmhouse is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a later low-pitched roof.
- 3.2.926 The setting of the asset is informed by its roadside location and by its relationship with associated outbuildings recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated non-designated buildings have a historical and functional relationship. The farming complex is screened from small-scale 20th century residential to the north and south-east by mature tree growth, and so the setting of the asset makes a considerable contribution to its value. Due to the mature tree growth to the east and development and mature tree lined hedgerows in the

intervening landscape, the setting of the asset does not extend to the draft Order Limits.

- 3.2.927 The **medium value** Grade II listed assets 'Thatchers' (**1306020**) and 'Barn Approximately 30 Yards North-West of Thatchers' (**1049657**) are located on the southern flank of High Road, Bressingham and 960 m west of the draft Order Limits. These assets are of evidential and historical value. Thatchers dates to the late 16th century and comprises a plastered timber frame house with a thatched roof. The barn is of probable 17th century and comprises a timber framed, weather boarded structure with a thatched roof, now converted into a residential dwelling.
- 3.2.928 The setting of the assets is shared and informed by their roadside village location, by their interrelationship and by their relationships with surviving elements of Potter's Farm to the north and the Moorings and other buildings to the east all recorded on 19th and early 20th century OS mapping. The setting is further informed by the surrounding agricultural landscape with which the former farming assets have a historical and functional relationship. The grounds of the assets contain lawned areas and scattered trees and are defined by mature tree lined hedgerows, however, small-scale 20th century has encroached from the west and north-west. The setting of the asset makes a moderate contribution to their value, but due to their mature grounds and development and mature tree lined hedgerows in the intervening landscape, it does not extend to the draft Order Limits.
- 3.2.929 The **medium value** Grade II listed 'Moorings' (**1306006**) is located on the southern flank of High Road, Bressingham, 35 m east of Thatchers and 960 m east of draft Order Limits. The asset is of evidential and historical value, probably dates to the early 17th century and comprises a plastered timber frame house with a thatched roof. The front elevation of the asset faced with brick in the 19th century.
- 3.2.930 The setting of the asset is informed by its roadside village location and its relationships with Thatchers and the associated barn to the west, the surviving elements of Potter's Farm to the north and Owl House and adjoining village shop the east, all of which are recorded on 19th and early 20th century OS mapping. Owl House and the adjoining shop and their grounds screen the asset from later 20th century development to the east, and so the setting of the asset makes a considerable contribution to its value. Due to development and mature line hedgerows in the intervening landscape, however, the setting of the asset does not extend to the draft Order Limits.
- 3.2.931 The **medium value** Grade II listed 'The Highlands' (**1049655**) is located north of High Road, Bressingham and 890 m west of the draft Order Limits. The Highlands is of evidential and historical value, is of probable 17th century date and comprises a plastered timber frame structure with a steep peg tile roof. The asset is recorded on the first edition OS map of 1884 as part of the Potter's Farm complex and was likely the farmhouse.
- 3.2.932 The setting of the asset is informed by its roadside village location and by its relationship with surviving elements of the farming complex, with Thatchers and associated barn to the south-east and with The Moorings and Owl House and adjoining shop to the south. The setting is further informed by the surrounding agricultural landscape with which the former farmhouse and surviving outbuildings have a historical and functional relationship. The asset and a single storey east/west aligned range to the north are recorded on the 1884 OS map and these are now enclosed within their own grounds with the former associated barn, now village hall, outside the grounds to the east. Due to the erosion of this association, and the encroachment of later 20th century residential development immediately to the west,

the setting of the asset makes a moderate contribution to the value of the asset, but due to development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.2.933 The **medium value** Grade II listed 'Village Hall' (**1049656**) is located on the north flank of High Road, Bressingham, 25 m east of The Highlands and 860 m west of the draft Order Limits. The asset is of evidential and historical value and is a converted probably 17th century barn comprising a plastered timber frame structure with a steep pantile roof.
- 3.2.934 The setting of the asset is informed by its roadside village location and my its relationships with The Highlands to the west, the Mooring and Owl House and adjoining shop to the south. The setting is further informed by the surrounding agricultural landscape with which the former barn and other surviving elements of Potter's Farm have a historical and functional relationship. The village hall is situated in its own grounds with a garden area to the west, a driveway to the east and a parking are to the north. Due to the erosion of the asset's relationship with The Highlands, and the encroachment of later 20th century residential development immediately to the asset, the setting of the asset makes a moderate contribution to the value of the asset, but due to development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.935 The **medium value** Grade II listed 'Badgers, High Road' (**1170547**) is located 30 m north of High Road, Bressingham, 40 m east of the village hall and 8600 m west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame structure with a thatched roof and brick faced end walls.
- 3.2.936 The setting of the asset is informed by its roadside village location and by its relationship with the Methodist chapel immediately to the south, which was constructed in 1800. Later 20th century residential in-fill development has encroached on the asset from the west, east and south, and so the setting of the asset makes a moderate contribution to its value, but due to development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.937 The **medium value** Grade II listed 'Grange Cottage' (**1373553**) is located on the southern flank of High Road, Bressingham, 50 m south-east of Badgers and 790 m west of the draft Order Limits. The asset is of evidential and historical value and comprises a probable 17th century plastered timber frame cottage with a steep pantile roof.
- 3.2.938 The setting of the asset is informed by its roadside village location and its relationships with the Methodist chapel to the north-west and the agricultural land to the south with which the asset has a historic relationship. Later 20th century residential in-fill development has encroached on the asset from the west, east and north, and so the setting of the asset makes a moderate contribution to its value, but due to development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.939 The **high value** Grade II\* listed 'Grange Farmhouse' (**1373591**) is located on the northern flank of High Road, Bressingham and 660 m west of the draft Order Limits. The asset is of evidential and historical value, dates to the 16th century and comprises a plastered timber frame house with steep roofs with plain tiles and black glazed pantiles.

- 3.2.940 The setting of the asset is informed by its roadside village location and its relationship with its former outbuildings immediately to the north recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and its former outbuildings have a historical and functional relationship. The outbuildings have been converted into a residential dwelling and a high hedge separates it from the asset eroding the historical visual link between them. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.941 The **medium value** Grade II listed 'Pine Tree Cottage' (**1170621**) is located on the eastern flank of School Road on the southern edge of Bressingham and 1.2 km west of the draft Order Limits. The asset is of evidential and historical value, is of probable 17th century date and comprises a timber frame structure encased in red brick in the mid/late 19th century and with a pantile roof.
- 3.2.942 The setting of the asset is informed by its roadside peripheral village location and by the surrounding agricultural landscape with which it has a historical relationship. There has been some 20th century in-fill residential along School Road and High Road to the north, but the asset is largely screened from this by the local topography and by mature trees and hedgerows. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.943 The **medium value** Grade II listed 'The Spinney' (**1049659**) is located on the western flank of School Road, Bressingham, 280 m south of Pine Tree Cottage and 1.3 km west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a steep pantile roof.
- 3.2.944 The setting of the asset is informed by its secluded roadside location south of the settlement and by the surrounding agricultural landscape with which the asset has a historical relationship. The asset and its associated non-designated outbuilding are the last surviving elements of a small hamlet recorded on the first edition OS map of 1884, the extent of which is now defined by mature tree and shrub growth, affording the asset privacy and seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the local topography and the development and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.945 The **medium value** Grade II listed 'Norbank Cottage' (**1305973**) is located on the western flank of School Road, 140 m north of the A1066 Low Road and 1.2 km west-northwest of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a rendered timber frame structure with a steep roof with modern pantiles.
- 3.2.946 The setting of the asset is informed by its roadside village location and by the agricultural land to the north with which the asset has a historical relationship. The first edition OS map of 1884 records the asset and its small outbuilding as a Post Office, and in a somewhat isolated location over 100 m east of buildings along Chequers Lane and over 180 m north-north-east of the church and rectory. During the latter half of the 20th century, however, there has been residential development along School Road to the south and east and beyond the properties to the east, a large nurseries and garden centre has been established. The asset is partially

screened from this development by trees and mature hedgerows and so its setting makes a moderate contribution to its value. Due to the immediate development to the east and further development and mature tree lined hedgerows in the intervening landscape, however, the setting of the asset does not extend to the draft Order Limits.

- 3.2.947 The **medium value** Grade II listed 'Rose Cottage' (**1373583**) is located at the northern extent of Chequers Lane, 130 m north of the A1066 Low Road and 1.3 km west-northwest of the draft Order Limits. The asset is of evidential and historical value, is of probable early 18th century date and comprises a plastered timber frame house with a thatched roof.
- 3.2.948 The setting of the asset is informed by its secluded village location and by its relationship with the large Grade II listed 19th century house immediately to the south (see below). The setting is further informed by the agricultural landscape to the north with which the asset has a historical relationship. The grounds of the asset and the house to the south contain mature trees and are defined by mature hedgerows, affording the asset a degree of seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the mature grounds and development and mature tree lined hedgerows in the intervening landscape, it does not extend to the draft Order Limits.
- 3.2.949 The **medium value** Grade II listed 'House immediately to north of Ye Olde Chequers at St James Plain' (**1049645**) is located on the eastern flank of Chequers Lane, immediately south of Rose Cottage and 1.3 km west-northwest of the draft Order Limits. The asset is of evidential and historical value and was built around 1840 in the Tudor Gothic style. It is of plastered clay lump construction with a steep pantile roof.
- 3.2.950 The setting of the asset is informed by its secluded village location and by its relationship with Rose Cottage immediately to the north. The grounds of the asset contained lawned areas and scattered trees and are defined by mature tree lined hedgerows, which screen the asset from small-scale 20th century residential development to the east. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the mature grounds and development and mature tree lined hedgerows in the intervening landscape, it does not extend to the draft Order Limits.
- 3.2.951 The **medium value** Grade II listed 'Old Hall Farmhouse' (**1049651**) is located on the northern flank of the A1066 Low Road, Bressingham and 1.4 km west-northwest of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a steep tiled roof.
- 3.2.952 The setting of the asset is informed by its roadside village location and by its relationship with the surviving outbuildings of the former farming complex immediately to the north-west. The setting is further informed by the agricultural land to the south and west with which the asset and former outbuildings have a historical and functional relationship. The outbuildings have been converted into residential dwellings and garden boundaries separate them from the asset eroding the historical visual link between them. There is later 20th century residential development immediately to the east. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.953 The **medium value** Grade II listed 'Ye Olde Chequers' (**1170509**) is located on the northern flank of the A1066 Low Road, Bressingham and 1.25 km to the west of the

draft Order Limits. The public house is of evidential and historical value, is of probable 17th/18th century date and comprises a plastered timber frame structure on a brick plinth with a thatched roof.

- 3.2.954 The setting of the asset is informed by its roadside village location and by its relationship with the Grade I listed Church of St John the Baptist 60 m to the south. The setting of the asset and the retention of its functionality as an inn makes a considerable contribution to its value, and due to the development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.955 The **medium value** Grade II listed 'Number 1 St James Plain The Parish Cottages of Ye Olde Chequers' (**1049687**) is located immediately north-west of the junction of Chequers Lane and the A1066 Low Road, Bressingham and 1.3 km west-northwest of the draft Order Limits. Formally two 17th century cottages of evidential and historical value, the asset comprises a plastered timber frame house with a steep pantile roof.
- 3.2.956 The setting of the asset is informed by its roadside village location but due its high evergreen hedgerow boundary, it has no intervisibility with the Church of St John the Baptist to the south and the largely contemporary Chequers Inn to the east. Later 20th century residential development has encroached on the asset from the west and south and so the setting of the makes a minor contribution to its value. Due to the high boundary hedge and the development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.957 The **medium value** Grade II listed 'The Cottage' (**1373584**) is located at the western limit of Church Lane, Bressingham, 160 m south of the A1066 Low Road and 1.5 km west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a timber frame house with modern rendering and a modern, steep tiled roof.
- 3.2.958 The setting of the asset is informed by its roadside village location and by its relationship with its non-designated outbuildings immediately to the east and with the listed Church Farmhouse (see below) and the farmhouse's non-designated outbuildings 60 m to the east; all recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and probable functional relationship. The asset has an open view of farmland to the north but otherwise views are restricted by contemporary structures, copses and mature tree lined hedgerows. The setting of the asset, therefore, makes a considerable contribution to its value and does not extend to the draft Order Limits.
- 3.2.959 The **medium value** Grade II listed 'Church Farmhouse' (**1049646**) is located on the southern flank of Church Lane, Bressingham, 60 m east of The Cottage and 1.45 km west of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century comprises a plastered timber frame house with a steep thatched roof.
- 3.2.960 The setting of the asset is informed by its roadside village location and by its relationship with its non-designated outbuildings immediately to the west and with the listed Cottage and the cottage's non-designated outbuildings 60 m to the west; all recorded on the first edition OS map of 1884. The farm outbuildings have been converted into a residential dwelling and an intervening property boundary erodes the visual and historic links between the asset and its former outbuildings. Immediately to the east lies a mid-20th century dwelling, but it is sympathetic and in the local

vernacular. The asset has an open view of farmland to the north but otherwise views are restricted by a modern structure, copses and mature tree lined hedgerows. The setting of the asset, therefore, makes a moderate contribution to its value and does not extend to the draft Order Limits.

- 3.2.961 The **medium value** Grade II listed 'Three Gates Farmhouse' (**1170521**) is located at the end of a private road 130 m south of Fen Street, 650 m west-south-west of Bressingham and 1.9 km west of the draft Order Limits. The asset is of evidential and historical value, is of probable 17th century date and comprises a plastered structure with a steep pantile roof.
- 3.2.962 The setting of the asset is informed by its farming complex location and by its relationship with its non-designated outbuildings several of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The asset has extensive grounds defined by mature tree lined hedgerows, which contain lawned areas, water bodies, and mature tree growth. The setting of the asset makes a considerable contribution to its value, but due to its mature grounds and development, copses and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.963 The **medium value** Grade II listed assets 'Bressingham Lodge' (**1049649**), 'Stables Immediately East of Bressingham Lodge' (**1373586**) and 'Stables and Cart Shed Immediately South-East of Bressingham Lodge' (**1049650**) are located 50 m south of Low Road, Bressingham, 80 m east of the Church of St John the Baptist and 1.2 km west of the draft Order Limits. These assets are of evidential and historical value. The lodge, formally the rectory, was built in 1842 in the Tudor style by architect S. S. Teulon. It is constructed of red brick with yellow brick dressings and a tiled roof. The stables to the east were also built the same year by Teulon of red brick in the Tudor style with a steep tiled roof. The stables and cart shed to the south-east has similar origins and are built of flint with red brick dressing and a tiled roof.
- 3.2.964 The setting of the asset is shared and is informed by their interrelationships and by their relationships with the Church of St John the Baptist to the west. The setting is further informed by the large grounds of the Lodge, which are defined by mature tree lined hedgerows and contain lawned areas, a formal garden, and mature trees. The setting of the assets makes a considerable contribution to their values and but to the mature grounds and development and mature tree lined hedgerows in the intervening landscape, it does not extend to the draft Order Limits.
- 3.2.965 The **medium value** Grade II listed 'Bressingham Hall' (**1049648**) is located 120 m south of Low Road, Bressingham and 980 m west of the draft Order Limits. The asset is of evidential and historical value, dates to the late 18th century and is constructed of yellow brick house with a hipped pantile roof.
- 3.2.966 The setting of the asset is informed by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the extensive grounds of the hall, which are defined by mature hedgerows and contain lawned areas, planting beds, formal gardens, a kitchen garden, and scattered trees. The house now serves as a wedding venue and holiday destination and the associated Bressingham steam museum is located immediately to the east. Further to the east is a large garden centre and nurseries complex. Despite the change of use and the proximity of the museum, the asset remains coherent as a country house and so its setting makes a moderate contribution to its value. Due to the adjacent museum and garden centre and further

development and mature tree lined hedgerows in the intervening landscape, however, the setting does not extend to the draft Order Limits.

- 3.2.967 The **medium value** Grade II listed 'Bluepump Farmhouse' (**1050238**) is located on the northern flank of the A1066 High Road in the east of Bressingham and 260 m west-northwest of the draft Order Limits. The asset is of evidential and historical value and comprises a mid-19th century roughcast house with a 17th century plastered timber frame wing to the rear. Both elements have pantile roofs.
- 3.2.968 The setting of the asset is informed by its roadside location and its relationship with an outbuilding to the rear recorded on the first edition OS map of 1884. The setting is further informed by the wider modern farming complex and the surrounding agricultural landscape with which the asset has a historical and ongoing functional relationship. Twentieth century development along the A1066 to the west and south has, however, eroded the link to the agricultural landscape, and so the setting of the asset makes a moderate contribution to its value and due to its proximity, the setting extends to the draft Order Limits.
- 3.2.969 The following listed buildings are in the parish of Roydon:
- 3.2.970 The **medium value** Grade II listed 'The Gables' (**1373310**) is located on the western flank of Darrow Lane, 630 m north-north-west of Roydon and 140 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a very steep tiled roof.
- 3.2.971 The setting of the asset is informed by its roadside farmyard location and by its relationship with its outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the agricultural landscape to the west, north and east with which the asset has a historical and functional relationship. The asset is also associated with the partial remains of a medieval moat (**1014**), which adds time depth to the asset's setting. The farming complex expanded to the eastern flank of Darrow Lane in 2016 when further outbuildings were added. The mature tree lined hedgerow boundaries of the farm complex screen the asset from 20th century residential development along Darrow Lane and Snow Street to the south and so the setting of the asset makes a considerable contribution to its value. Due to the proximity of the Project, however, pylons to the west and north would likely be visible above the tree cover and so the setting of the asset extends to the draft Order Limits.
- 3.2.972 The **medium value** Grade II listed 'Limetree Farmhouse' (**1373273**) is located 50 m north of Snow Street and 90 m east of the draft Order Limits. The asset is of evidential and historical value, of probable 17th century and comprises a plastered timber frame house with a thatched roof.
- 3.2.973 The setting of the asset is informed by its former farmyard location and by its relationship with its former non-designated outbuildings. The setting is further informed by the agricultural landscape to the west and north with which the asset and associated outbuildings have historical and functional relationships. The outbuildings to the west of the asset have been converted into a domestic dwelling and a modern fence line now separates it from the asset, eroding the historic visual link between them. Residential development along Darrow Lane to the east and Snow Street to the south and south-east have encroached on the asset but its effect on the asset's setting is limited by mature tree cover and hedgerows. The setting of the asset, therefore, makes a moderate contribution to its value. Due to the proximity of the Project, however, pylons to the west and north would likely be visible above the tree cover and so the setting of the asset extends to the draft Order Limits.

- 3.2.974 The **medium value** Grade II listed 'The Hermitage' (**1050271**) is located on the southern flank of Snow Street and 90 m east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and has 18th and 19th century additions to the north. The asset is of stuccoed timber frame construction with a black glazed pantile roof.
- 3.2.975 The setting of the asset is informed by its grounds which contain lawns, scattered trees and small greenhouses and outbuilding. The grounds of the asset are defined by mature tree lined hedgerows, which largely screen inward and outward views. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the proximity of the Project, it is possible pylons to the east would be visible above the tree cover, and so the setting extends to the draft Order Limits.
- 3.2.976 The **medium value** Grade II listed 'Thatch End The Haven' (**1154298**) is located on the eastern flank of Baynards Lane, 70 m south of Snow Street and 110 m south-east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th/18th centuries and comprises a plastered timber frame structure with a thatched roof.
- 3.2.977 The setting of the asset is informed by its roadside village location and by the open view of agricultural land to the west with which the asset has a historical relationship. Later 20th residential development has encroached on the asset to the north and south, eroding its once largely isolated situation, and so the setting of the asset makes a moderate contribution to its value. The open view from the asset to the Project to the west results in its setting extending to the draft Order Limits.
- 3.2.978 The **medium value** Grade II listed 'Firtree Farmhouse' (**1373274**) is located on the southern flank of Snow Street 50 m east of the Darrow Lane intersection and 230 m east-south-east of the draft Order Limits. The asset is of evidential and historical value, is probable early 18th century date with a possible earlier core. The house is plastered, has brick end walls with blue headers a steep pantile roof.
- 3.2.979 The setting of the asset is informed by its roadside village location and by its relationship with modern non-designated outbuildings to the rear. Later 20th century residential development has encroached on the asset from the west, north and east and so the setting of the asset makes a moderate contribution to its value. Due to the development of the settlement and associated mature tree lined hedgerow property boundaries, however, the asset is screened from the Project, and so the setting does not extend to the draft Order Limits.
- 3.2.980 The **medium value** Grade II listed '22 and 23, Snow Street' (**1154419**) is located on the southern flank of Snow Street, 90 m east of the Darrow lane intersection and 280 m east of the draft Order Limits. The asset is of evidential and historical value, of probable 18th century date and comprises a plastered clay lump structure with a thatched roof. The asset now appears to be a single dwelling.
- 3.2.981 The setting of the asset is informed by its roadside village location. Later 20th century residential development has encroached on the asset from the west, north and east and so the setting of the asset makes a moderate contribution to its value. Due to the development of the settlement and associated mature tree lined hedgerow property boundaries, however, the asset is screened from the Project, and so the setting does not extend to the draft Order Limits.
- 3.2.982 The **medium value** Grade II listed '20 and 21, Snow Street' (**1050241**) is located on the southern flank of Snow Street, 140 m east of the Darrow Lane and 250 m south-east of the draft Order Limits. The asset is of evidential and historical value, of probable 18th century and comprises a plastered structure with a thatched roof.

There are plastered 19th century extensions to the west and east with pantile roofs. The asset now appears to be a single dwelling.

- 3.2.983 The setting of the asset is informed by its roadside village location and by its relationship with the Grade II listed Snow Cottage 15 m to the south. Later 20th century residential development has encroached on the asset from the west, north and east and so the setting of the asset makes a moderate contribution to its value. Due to the development of the settlement and associated mature tree lined hedgerow property boundaries, however, the asset is screened from the Project, and so the setting does not extend to the draft Order Limits.
- 3.2.984 The **medium value** Grade II listed 'Snow Cottage' (**1050240**) is located 35 m south of Snow Street, 150 m east of the Darrow Lane intersection and 260 m south-east of the draft Order Limits. The asset is of evidential and historical value, of probable 17th century date and comprises a plastered timber frame structure with a thatched roof.
- 3.2.985 The setting of the asset is informed by its roadside village location and by its relationship with the Grade II listed 20 and 21, Snow Street 15 m to the north. Later 20th century residential development has encroached on the asset from the west and east and so the setting of the asset makes a moderate contribution to its value. Due to the development of the settlement and associated mature tree lined hedgerow property boundaries, however, the asset is screened from the Project, and so the setting does not extend to the draft Order Limits.
- 3.2.986 The **medium value** Grade II listed 'Gringle Cottage' (**1154386**) is located 30 m north of Snow Street, 210 m east-northeast of Darrow Lane intersection and 240 m south-east of the draft Order Limits. The asset is of evidential and historical value, of probable 17th century date and comprises a rendered timber frame structure with a thatched roof.
- 3.2.987 The setting of the asset is informed by its roadside village location and by its relationship with the Grade II listed Glebe Farmhouse 10 m to the south-east. The setting is further informed by its grounds, which are defined by mature tree lined hedgerows and include lawns, scattered trees, and a walled kitchen garden. The agricultural land to the north and east with which the asset has a historical relationship also informs the setting. There is limited 20th century residential development to the west, but this is sympathetic and in the local vernacular. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by its mature grounds and the development of the settlement and associated mature tree lined hedgerow property boundaries, the setting does not extend to the draft Order Limits.
- 3.2.988 The **medium value** Grade II listed 'Glebe Farmhouse' (**1050239**) is located on the western flank of Snow Street, 210 m east-northeast of Darrow Lane intersection and 250 m south-east of the draft Order Limits. The asset is of evidential and historical value, dates to the early 19th century and comprises a flint cottage with a red brick south-facing front elevation and a pantile roof.
- 3.2.989 The setting of the asset is informed by its roadside village location and by its relationship with the Grade II listed Gringle Cottage 10 m to the north-west. The setting is also informed by its grounds defined by mature tree lined hedgerows and the agricultural landscape beyond to the north and east with which the asset has a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by its mature grounds, the grounds of Gringle Cottage and the development of the settlement and associated

mature tree lined hedgerow property boundaries, the setting does not extend to the draft Order Limits.

- 3.2.990 The **medium value** Grade II listed 'The Friary and Adjoining Outbuilding to West' (**1154410**) is located on the south-western flank of Snow Street, 260 m east of the Darrow Lane intersection and 350 m south-east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered timber frame house with a thatched roof. The asset is adjoined to the west by a one storey range of plastered timber frame construction with thatched and pantile roofs.
- 3.2.991 The setting of the asset is informed by its roadside village location and by its grounds defined by mature tree lined hedgerows and containing lawns and a pond. The setting is further informed by the agricultural landscape to the south with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by its mature grounds, a copse to the north and the development of the settlement and associated mature tree lined hedgerow property boundaries, the setting does not extend to the draft Order Limits.
- 3.2.992 The **medium value** Grade II listed 'White House Farmhouse' (**1154379**), formally Blackboard Farm, is located on the northern flank of Snow Street, 490 m west-northwest of the Darrow Lane and 430 m south of the draft Order Limits. The asset is of evidential and historical value, is of probable 17th century date and comprises a rendered timber frame house with a very steep pantile roof. The asset is adjoined to the east by an 18th or 19th century wing with a pantile roof.
- 3.2.993 The setting of the asset is informed by its roadside village location and by its relationship with its formally associated non-designated outbuildings immediately to the east and recoded on the first edition OS map of 1884. The setting is further informed by modern farm buildings to the north constructed in the later 20th century and the agricultural landscape to the north, east and south with which the asset and former outbuildings have a historical and functional relationship. The former outbuildings appear to have been converted into a domestic dwelling, but they and the asset are still coherent as a farming complex. The large grounds of the asset are defined by mature hedgerows and contain lawns, ponds and numerous trees which largely screen the asset from small-scale 20th century residential development to the east and west. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by its mature grounds and the development of the settlement and associated mature tree lined hedgerow property boundaries, the setting does not extend to the draft Order Limits.
- 3.2.994 The **medium value** Grade II listed 'Bethany' (**1050234**) is located 80 m north of Swamp Lane, accessed via a private road, 200 m north of Roydon and 850 m north-east of the draft Order Limits at the nearest point. The asset is of evidential and historical value, dates to the late 17th century and comprises a roughcast timber frame house with a steep thatched roof.
- 3.2.995 The setting of the asset is informed by its secluded, rural location, by its small hedgerow defined grounds and views to the east and west of agricultural land with which the asset has a historical relationship. Small copses lie to the north and south. The setting affords the asset privacy and makes a considerable contribution to its value. Due to the development of Snow Street, Roydon and along Baynard's Lane as well as associated copses and mature tree lined hedgerows, however, the setting does not extend to the draft Order Limits.

- 3.2.996 The **medium value** Grade II listed 'The Old Post Office' (**1050272**) is located on the southern flank of Baynard's Lane at the north-western limit of Roydon and 490 m east-south-east of the draft Order Limits. The asset is of evidential and historical value, of probable 17th century date and comprises a plastered timber frame structure with a steep pantile roof. The asset is adjoined to the east by a mid-19th century roughcast clay lump wing with a pantile roof.
- 3.2.997 The setting of the asset is informed by its secluded roadside location and by views of agricultural land to the northeast with which the asset has a historical value. The setting is further informed by its lawned grounds defined by high mature hedgerows. A roadside copse flanks Baynard's Lane to the north-west and a second copse to the south and east screens the asset from the 20th century development of Roydon. The setting of the asset makes a considerable contribution to its value, but due to development, copses and mature tree lined hedgerows in the intervening landscape, it does not extend to the draft Order Limits.
- 3.2.998 The **medium value** Grade II listed 'Grove Farmhouse' (**1050236**) is located on the eastern flank of a private road 350 m south of the A1066 High Road, Roydon and 125 m north-east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and a roughcast timber frame house with a steep interlocking tile roof. There is a 17th century roughcast wing to the north with a steep pantile roof.
- 3.2.999 The setting of the asset is informed by its farmyard location and by its relationship with its associated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The setting of the asset makes a considerable contribution to its value and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.2.1000 The following designated asset are in the parish of Diss:
- 3.2.1001 The **medium value** Grade II listed 'Alger's Farmhouse' (**1049693**) is located on the eastern flank of Walcot Green, 550 m north-east of Diss and 1.7 km south-east of the draft Order Limits. The asset is of evidential and historical value, dates to the 17th century and comprises a plastered, colour-washed timber frame structure. The National Heritage List (NHL) entry states the asset is thatched, but all three of the dwellings in the complex have pantile roofs. Furthermore, the asset on which the NHL GIS point is located does not match the asset description. It is not clear, therefore, which of the dwelling is the listed asset; but the setting is, however, shared and so applicable.
- 3.2.1002 The setting of the asset is informed by its location within a small building complex comprising two other residential dwellings, a barn and a handful of smaller outbuildings several of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural and pastoral land with which the asset and associated buildings of the complex have a historical relationship. Each of the residential dwellings in the complex have garden areas defined by mixed boundaries, whilst the external boundary of the complex is defined by a mature tree lined hedgerows affording the complex privacy and seclusion. The setting of the asset makes a considerable contribution to its value, but due to the mature tree lined boundary and development and mature tree lined hedgerows in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.2.1003 The **medium value** Grade II listed 'Congregational Church' (**1049750**) is located on the eastern flank of Mere Street, Diss, 60 m north of A1066 Park Road and 1.6 km

east-northeast of the draft Order Limits. The church is of evidential and historical value and was built in 1837 of red brick with a slate roof.

- 3.2.1004 The setting of the asset is informed by its roadside town location and by its relationship with designated and none designated buildings along the throughfare. The setting of the asset makes a considerable contribution to its value but as there are no long-range views to the Project, the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.2.1005 The site of a possible post-medieval market or pipe making kiln is located on farmland on the northern bank of the river Waveney c. 600 m south-west of the outskirts of Diss and partially within the Order Limits. The identification of the site is based on a multi-period finds assemblage (**1335**) that includes over 500 clay pipe fragments including several complete bowls as well as post-medieval buckles, cloth seals, coins, a ring, spurs, musket balls and pottery.
- 3.2.1006 The site of a **low value** brick kiln (**1040**) of evidential value is recorded on a Faden's Map of Norfolk (publ. 1797) located 1 km north-east of Bressingham and 160 m north of an draft Order Limits access road. There is no evidence of the asset on 19th century OS mapping.
- 3.2.1007 Further evidence of medieval activity in the Bressingham and the Waveney Valley area is represented by **low value** findspots, and artefacts recovered during fieldwalking and metal detector surveys. These assets are of evidential value and comprise:
- Two post medieval copper alloy jettons and two tokens in a multi-period finds assemblage (**1301**) recovered from farmland 480 m north-east of Bressingham and adjacent to an access road of the draft Order Limits
  - A post medieval, copper alloy book clasp in a multi-period finds assemblage (**1293**) recovered from farmland 400 m east of Bressingham and partially within the draft Order Limits
  - Two post medieval silver coins and a copper alloy coin weight in a multi-period finds assemblage (**1252**) recovered from farmland 250 m east of Bressingham and partially within the draft Order Limits
  - A post medieval copper alloy book fitting, finger ring and dress fastener, a silver coin and a lead cloth seal in as multi-period finds assemblage (**1204**) recovered from farmland 2.3 km east of Bressingham, immediately south of a southern spur of the draft Order Limits and east of Shelfanger Road
  - Post medieval pottery sherds in a multi-period finds assemblage (**1109**) recovered from farmland 1.3 km south-east of Bressingham on the northern flank of the Waveney Valley and 10 m north of the draft Order Limits
  - A post medieval copper alloy buckle and two jettons, and a silver coin, dress stud and strap fitting in a multi-period finds assemblage (**1179**) recovered from farmland 870 m south-east of Bressingham and partially within the draft Order Limits
  - A post medieval silver coin and a copper alloy dress fastener in a multi-period finds assemblage (**1224**) recovered from farmland 760 m east of Bressingham and 150 m north of the draft Order Limits

- A post medieval copper alloy buckle and coin weight, and a silver tooth pick and coin in a multi-period finds assemblage (**1205**) recovered from farmland 2.5 km east of Bressingham and 170 m east of the draft Order Limits
- Two post medieval pottery sherds comprising one of Westerwald stoneware base and one of Ballarmine Stoneware, both of 17th century date, in a multi-period finds assemblage (**1036**) recovered from within Bressingham, 50 m west of Common Road and 250 m west of the draft Order Limits
- A post medieval, copper alloy spoon and token in multi-period finds assemblage (**1117**) recovered during gardening and metal detecting in the grounds of the Grade II listed Gringle Cottage (**1154386**). The cottage is in Roydon, 690 m east of Bressingham and 250 m south-east of the draft Order Limits
- Post medieval pottery sherds and architectural fragment in a multi-period finds assemblage (**1041**) recovered from farmland close to the southern extent of Section 1, immediately north-west of Bressingham and 250 m west of the draft Order Limits. The survey area is on higher land with the Waveney Valley 500 m to the south

## Modern

- 3.2.1008 The modern period within Section A is characterised by an increase in industrial infrastructure, the advent of military sites and the continual agricultural management of the landscape.

### Dunston and Mangreen Hall Farm

- 3.2.1009 The **low value** site of a probable WWII searchlight battery (**1240**) of evidential value is located 500 m west-northwest of Dunston Hall (**1373206**) and partially within the draft Order Limits. The site consisted of an ovoid emplacement, assumed to be for a searchlight, a pillbox and a small number of other military operational structures and huts identified by the National Mapping Programme on 1940s aerial photographs. The site is now partially beneath the National Grid Norwich Main Substation.

### Swainsthorpe and Mulbarton

- 3.2.1010 A fieldwalking survey of farmland on the western flank of Swainsthorpe, immediately south of Church Road and partially within the draft Order Limits resulted in a multi-period finds assemblage (**1230**) that included **low value** modern glass vessel fragments of evidential value.
- 3.2.1011 A fieldwalking survey of farmland 1.3 km south-south-west of Swainsthorpe and clipping the eastern flank of the draft Order Limits resulted in a multi-period finds assemblage (**1277**) that included **low value** modern glass, brick, and tile fragments of evidential value.
- 3.2.1012 A fieldwalking survey of farmland 1.6 km south-south-west of Swainsthorpe, immediately south of Mulbarton Lane and partially within the draft Order Limits resulted in a multi-period finds assemblage (**1278**) which included **low value** modern glass and ceramic building material fragments of evidential value.
- 3.2.1013 A fieldwalking survey of farmland 1.4 km south-south-west of Swainsthorpe, immediately north of Mulbarton Lane and 90 m east of the draft Order Limits resulted in a multi-period finds assemblage (**1275**) that included **low value** modern glass, brick, and tile fragments of evidential value.

## Forncect St Mary and Tacolneston

- 3.2.1014 The **medium value** Grade II listed 'Tacolneston War Memorial' (**1470006**) is in the graveyard of the Grade I listed medieval Church of All Saints (**1178820**) immediately north of the B1113 Norwich Road and 950 m north-west of the draft Order Limits. The memorial is of evidential and historical value and is in the form of a stone cross. It was erected about 1920 with further names added after WWII.
- 3.2.1015 The setting of the asset is informed by its roadside graveyard setting and by its relationship with the church. The restricted setting of the asset does not extend to the draft Order Limits.

## Bunwell Hill and the Tas Valley

- 3.2.1016 A **medium value** Cold War bunker (**1310**) is in the grounds of Quaker's Farmhouse (**1373606**) 2.7 km south-east of the village of Bunwell and 230 m south-east of an access road of the draft Order Limits. The bunker is of evidential and historical value and was installed around 1968. It was bought as a prefabricated kit, presumably from WWII USA air force surplus. The bunker is covered by an earthen mound, with a brick-lined entrance, heavy duty main door, air inlet pipe and air filter mechanism, an escape shaft with an iron ladder in a separate compartment with half-height heavy duty door, water butts, sink and chemical toilet.

## Winfarthing and Shelfanger

- 3.2.1017 The site of a **low value** WWI military airfield (**1037**) of evidential value is located 2.5 km north-north-east of Winfarthing and partially within the draft Order Limits. The HER states that a military airfield at this location was in use in 1916-18 and that it was used as a landing ground from which anti-Zeppelin patrols were launched. The site is located 1.3 km to the west of the former World War II airfield RAF/USAAF Tibenham, which lies outside the Project study area.
- 3.2.1018 The HER holds very little information on the asset and so the Air Historical Branch of the RAF was contacted for more information enable an assessment of the archaeological potential of the site to be made. The following information was provided:
- Tibenham was a second-class landing ground, located in Norfolk, 2 ¾ miles from Tivetshall railway station. It was 30 acres in area, 500 yards by 400 yards, with light loam soil, in open and flat surroundings. In late 1918 it was linked with No 75 Squadron which was based at Elmswell, around 10 miles south-south-west of Tibenham. Elmswell was a Flight Station, at which 223 personnel were stationed. It was 750 yards by 600 yards, albeit in an irregular shape. The facilities there included four aeroplane sheds, an officers' mess, reception station, and regimental institute. Further construction at Elmswell of two sheds, regimental buildings, and roads and aprons was only just beginning (5-15% complete) as of October 1918
  - Tibenham seems to have received little use, as the only records of landings there are:
    - Lt W. R. Gayner of No 51 Squadron Royal Flying Corps took off from Marham in an F.E.2b at 04:30 on 28 November 1916 to intercept a Zeppelin, but he suffered engine trouble and flew to Tibenham, where he crash-landed
    - On 19 October 1917, Lt H. C. Burdett took off from Mattishall in an F.E.2bs at 19:47 to locate Zeppelins. He landed at Tibenham at 21:40 because of poor weather conditions

- As a second-class landing ground, Tibenham (unlike Elmswell) was not somewhere that aircraft regularly operated from but rather was a large patch of flat open ground suitable for use if a pilot found that mechanical trouble, damage from enemy action, low fuel, etc., made a prompt landing necessary. There is no record of any buildings at Tibenham, either temporary or otherwise, and the facilities, if any, were likely very limited. For example, the record for Tibenham in October 1918 indicates that telephone communication was via 'Attleborough and New Buckenham (no number)'

3.2.1019 The site of a **low value** World War II pillbox and searchlight battery of evidential value is located 1.7 km south-east of Shelfanger and 280 m south-east of an draft Order Limits access road. The asset is apparent on RAF photography (1946), but 20th century satellite imagery suggests no above ground remains survive.

## Undated

### Dunston and Mangreen Hall Farm

3.2.1020 Undated **low value** cropmarks (**1172**) of evidential value have been recorded on an aerial photograph of 1946 immediately south-east of Mangreen Farm and immediately north of an draft Order Limits access road. Although undated, it is possible the assets are related to the medieval to post medieval earthworks of enclosures and boundaries (**1241**) that may represent the remains of the former medieval hamlet of Mangreen, or perhaps outbuildings and paddocks associated with a Medieval moated manor.

3.2.1021 Undated **low value** cropmarks (**1160**) of evidential value have been identified on an aerial photography taken in 1946 670 m south-south-east of Mangreen Farm and partially within the draft Order Limits. The cropmarks covered a relatively small area and now partially lie beneath the National Grid Norwich Main Substation.

3.2.1022 The placename 'Money Close' is recorded on an 18th century parish survey (**1178**) and the NHER locates the site 620 m north-west of Dunston Hall and partially within the draft Order Limits. The **negligible value** site is now wooded and is not recorded on 19th century OS mapping. This asset has limited historical value.

### Swainsthorpe and Mulbarton

3.2.1023 A small **low value** complex of cropmarks (**1258**) of evidential value is in a field south of Hickling Lane, 90 m south-west of Dunston Park and 490 m east of the draft Order Limits. Geophysical survey and subsequent archaeological trial trenching of this field identified undated and post medieval /modern agricultural features (**1215**) and it is possible the cropmarks relate to this activity.

3.2.1024 The cropmarks of undated **low value** ditches (**1248**) of evidential value have been identified 1.3 km east of Mulbarton and 250 m east of the draft Order Limits. The assets have been interpreted as the remains of field boundaries, however, a geophysical survey of the site (**1287**) did not identify corresponding anomalies.

### Bunwell Hill and the Tas Valley

3.2.1025 The cropmark of a possible ring ditch (**1171**) is recorded by the NHER in a field 2.1 km south-east of the village of Bunwell and 70 m west of an draft Order Limits access road. The asset of evidential value and was identified on aerial photography of 1973. It was suggested it may represent a ploughed-out **medium value** Bronze Age barrow. More recently, this interpretation has been questioned, and a transient origin, such as caused by farm machinery, has been suggested. The latter explanation

appears more likely as there is no evidence of the asset on maps, LiDAR data and 20th century satellite imagery. If an agricultural origin is confirmed, the asset would be of **negligible value**.

### Winfarthing and Shelfanger

- 3.2.1026 the **low value** earthworks of a ditch, bank, trackway, and possible rectangular enclosure (**1169**) of evidential value are in a field 450 m south-east of Winfarthing and 10 m west of an draft Order Limits access road. The field is located within the Winfarthing Great Park (**1064**), a former deer park owned by the Earl of Arundel. It is unlikely the features relate to the deer park as LiDAR data suggests the earthworks extend to the west beyond the deer park boundary and outside their currently mapped area.

## 3.3 Section B: Mid Suffolk District Council

### Location

- 3.3.1 Section B of the Project is located in the County of Suffolk and entirely within the District Borough Unitary of Mid Suffolk. Section B of the Project begins at the County border with Norfolk in the Waveney Valley approximately 2.4 km west of the market town of Diss. From its northern limit, Section B of the Project heads generally south, by-passing the settlements of Gislingham, Finningham, Mendlesham and Stowmarket before terminating at Bullen Lane Substation between Flowton and Burstall, c. 1.5 km west of the outskirts of Ipswich. Section B of the Project accounts for approximately 41 km of its overall length.

### Topography

- 3.3.2 From the base of Waveney Valley at 25 m aOD, the draft Order Limits climbs through a gently undulating landscape formed by tributaries of the Waveney Valley to the A143 east of Wortham at 52 m aOD. From here, the draft Order Limits passes through an undulating landscape between 42 m and 63 m aOD before arriving at the Dove Valley 1 km east of Finningham at 40 m aOD. To the south of the Dove Valley the undulating landscape continues at 48 m to 67 m aOD until the draft Order Limits reaches the Gipping river valley at 23 m aOD c. 2.3 km south-east of Stowmarket. From the Gipping Valley to the Bullen Lane Substation between Flowton and Burstall the landscape is again undulating between 47 m to 77 m aOD with a tributary of the Gipping at 23 m aOD.

### Geology

- 3.3.3 From north to south, the solid geology of Section B consists of: chalk of the Lewes Nodular, Seaford, Newhaven, Culver and Portsdown Formations between the Waveney Valley to 1.1 km north-west of Mellis; Sand of the Crag Group from 1.1 km north-west of Mellis to the Gipping Valley; chalk of the Newhaven Formation from the Gipping Valley to west of Somersham; sand of the Chillesford Church Sand Member from West of Somersham to north of Flowton; clay, silt and sand of the Thanet Formation and Lambeth Group between north of Flowton and north of Bullen Lane Substation, which itself is underlaid by clay, silt and sand of the Thames Group.
- 3.3.4 The superficial geology in Section B is dominated by glacial till of the Lowestoft Formation. The till has a high chalk and flint content and includes outwash sands, gravels, silts and clays. Deviations from this general deposit model are seen in the

river valleys and tributaries crossed by the draft Order Limits. The superficial geology of the Waveney Valley at the northern limit of Section B comprise peat, head clay, river terrace sand and gravel, Croxton Member sand and gravel, Ingham Formation sand and gravel and alluvial clay, silt, sand and gravel. South of the Waveney Valley, the draft Order Limits crosses narrow bands of head and alluvium deposits in now dry tributaries of the Waveney Valley. To the north and south of Gislingham the draft Order Limits bands of alluvium and sand and gravels of the Lowestoft Formation in tributaries of the Dove Valley. The draft Order Limits crosses deposits of glaciofluvial sand and gravel, alluvium, sand and gravel river terraces and sand and gravels of the Lowestoft Formation in the Gipping Valley and adjacent tributary south-east of Stowmarket. Finally, the draft Order Limits crosses a second tributary of the Gipping Valley west of Offton encountering bands of sand and gravels of the Lowestoft Formation, sand and gravel river terraces, alluvium, head and sand and gravel of the Kesgrave Catchment Subgroup.

## Historic Landscape Characterisation

- 3.3.5 Section B of the Project is located in two National Character Areas; National Character Area 83: South Norfolk and High Suffolk Claylands to the north and National Character Area 86: South Suffolk and North Essex Claylands. National Character Area 83 is characterised by a relatively high and predominantly flat clay plateau, incised by numerous small-scale wooded river valleys creating complex slopes (Natural England accessed 17/03/2023). National Character Area 86 is characterised by a high, boulder clay central plateau dissected by small-scale undulating river valley topography.
- 3.3.6 The Suffolk landscape through which the draft Order Limits passes is further divided into Landscape Character Types (LCT) as defined by Suffolk County Council (<https://suffolklandscape.org.uk/> - Accessed 24/03/2023). In the Waveney Valley, the draft Order Limits crosses LCT 31: Wooded Valley Meadowlands and Fens and LCT 19: Rolling Valley Farmlands and Furze before climbing up to and through LCT 3: Ancient Plateau Claylands. Just to the north of Gislingham, the draft Order Limits passes into LCT 10: Plateau Claylands and LCT 17: Rolling Valley Claylands. South of Medlesham Green, the draft Order Limits returns to LCT 3 before passing through LCT 26: Valley Meadowlands and LCT 17: Rolling Valley Claylands in the Gipping Valley, before returning to LCT 3, which is crossed east/west by bands of LCT 18: Rolling Valley Farmlands.
- 3.3.7 Landscape Character Type 31 in the Waveney valley is characterised by a flat valley bottom with a history of poor drainage, which resulted in it being used predominantly for pasture with un-drainable areas left as fens or marshes or utilised as wet woodland or alder carrs. Landscape Character Type 19 occupies the river terraces of the valley and historically was characterised by heath and exploited as commons for grazing. Much of this landscape has, however, been enclosed and improved since the 18th century. South of the valley the draft Order Limits passes through ancient plateau claylands LCT 3, then plateau claylands (LCT 10) before entering a second band of LCT 3 north of the Gipping Valley. The ancient claylands (LCT 3) are characterised by partial survival of some ancient enclosure overlying a gently rolling, arable landscape dissected by small river with scattered Ancient Woodland and mature hedgerows with mature trees. The plateau claylands (LCT 19) are topologically similar but modern farming has resulted in the loss of tree cover and hedgerow loss leading to large arable prairies. As the draft Order Limits descends into the Gipping Valley it passes through a band of LCT 19 before crossing alternating bands of Valley Meadowlands (LCT 26) and Rolling Valley Claylands

(LCT 17). The valley meadowlands are flat comprising of grassland divided by wet ditches with occasional reedbeds and carr woodland, whilst the rolling valley claylands occupy the steeper valley sides. Fields tend to be smaller and under pasture nearer the valley bottom before giving way to larger arable fields upslope. Hedgerows are generally substantial and long-established. The draft Order Limits then passes through alternating bands of LCT 3 and Rolling Valley Farmlands (LCT 18). The rolling valley farmlands are characterised by gentle valley sides with some complex and steep slopes, smaller fields than on the surrounding plateaus and small Ancient Woodlands and landscape parks.

- 3.3.8 The Historic Landscape Characterisation (HLC) data supplied by the Suffolk HER (Suffolk County Council Archaeological Service, 2012) indicates that the Section 2 of the Project from the Waveney Valley to Stowupland is dominated by a **negligible value** post-1950 agricultural landscape largely derived through boundary loss from irregular co-axial fields. Pre-18th-century enclosure is also well represented in the northern section by **low value** irregular co-axial fields. The draft Order Limits also passes through, or close to, parcels of heath or rough pasture and meadow.
- 3.3.9 To the south of Stowupland, the landscape is dominated by **low value** pre-18th-century enclosure comprising random fields without a dominant axis that may be of medieval date or earlier, and irregular co-axial fields where many of the boundaries share a common axis. The draft Order Limits also passes through, or close to, parcels of **low value** meadow, Ancient Woodland, a former medieval deer park and former common pasture.

## Conservation Areas

- 3.3.10 The Palgrave conservation area (**CA46**), designated in 1975, is located 1.25 km east of the draft Order Limits. It is situated within the village of Palgrave and includes the main road such as Lion Road, Millway Lane and Priory Road. This village is situated about one mile south of the Norfolk market town of Diss, in the far northern part of Mid Suffolk District. It is located on a spur of slightly higher ground between the southern bank of the river Waveney, which forms the county boundary, and a tributary joining the river from a south-westerly direction. The area is characterized by the 'High Suffolk' claylands, which were deposited in the Ice Ages over the underlying chalk, making it suitable for arable farming. Additionally, the village is intersected by the Ipswich to Norwich railway line, which passes to the south-east of the village, and the modern A143 road, which was formerly the Bury St Edmunds to Scole Turnpike Trust's road of 1762.
- 3.3.11 The conservation area holds historical value with a rich tapestry of archaeological remains. Indeed, the area is home to numerous archaeological sites, with over twenty sites of interest spanning various historical periods, including Neolithic flint axes, Iron Age pottery, Roman remains, and medieval sites such as the parish churchyard and the former St. John's Chapel. Positioned on 'High Suffolk' claylands, the village maintains a traditional aesthetic with a mix of building materials, from the iconic Suffolk red and white brick to the enduring thatched roofs and flintwork.
- 3.3.12 The heart of the conservation area is the village Green, framed by significant structures like the Grade I listed Church of St Peter (**1032776**) and the Grade II\* listed former gild-hall, Brackendale (**1032778**). This central space, with a north-south aligned road and wide grassed areas on either side, is enriched by mature trees and protected by Tree Preservation Orders, contributing thus to the unique character of Palgrave. The hierarchy of spaces offers a balanced blend of suburban and rural atmospheres. Palgrave's historical roots as an agricultural community are evident in

its field names and former industrial activities, particularly hemp cultivation. The village has successfully retained its cultural heritage, with 42 listed buildings, half of which are within the conservation area. The area's architectural diversity, from timber-framed structures to the more unique Grade I and II\* listed buildings, adds to its value.

- 3.3.13 While Palgrave has embraced some modernisation with infill houses displaying contemporary features, there is a careful consideration of preserving its character. Indeed, Palgrave has retained its quintessential character, and ongoing efforts to protect its unique identity are evident in periodic reviews of its appraisal.
- 3.3.14 Overall, this conservation area holds an evidential, historical and aesthetic value and is of **medium value**. Moreover, the setting of this conservation area makes a considerable contribution to its value, but due to overall distance, the topography and infrastructure of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.15 The Thrandeston conservation area (**CA43**) is positioned approximately 1.1 km east of the draft Order Limits and encompasses nearly the entire village of Thrandeston, incorporating the main roads, Mellis Road, and Little Green. It is situated in Mid Suffolk District, near the Norfolk market town of Diss. It is situated on higher ground away from the river Waveney and is known for its arable farming. The village is conveniently located near the Ipswich to Norwich railway line and can be accessed via the A143 and A140 roads.
- 3.3.16 The area has a rich history dating back to medieval times, as evidenced by the presence of several archaeological sites and medieval buildings. The Domesday survey of 1086 listed six holdings in Thrandeston, indicating its long-standing presence as a settlement. The historical and aesthetic value of the Thrandeston conservation area lies in its collection of older buildings, many of which are listed and contribute to the overall character of the area. There are 25 listed buildings in the parish, with fourteen located within the conservation area. These buildings are predominantly domestic in scale and are mostly timber-framed and plastered, with thatched or pantiled roofs. The grade I listed Church of St Margaret (**1032763**), with its flint rubble walls and slate and tiled roof, is a notable exception to this pattern. The church dates back to the 15th century and features a knapped flint west tower and a restored hammerbeam roof structure. Another significant building within the central area is the Grade II\* listed Manor House (**1182711**), which is timber-framed and plastered with Renaissance carved detailing to the beams. Overall, the historical value of the Thrandeston conservation area is derived from its well-preserved and diverse collection of older buildings that reflect the architectural heritage of the area.
- 3.3.17 The Thrandeston conservation area has evolved over time with relatively minimal modern intrusion. The area has maintained its rural character and vernacular architecture. There have been a few infill houses constructed around Little Green, but most of them respect the local style, using red brick or render with clay tile roofs. However, some of these houses have roofs with inappropriate pitches or use concrete tiles, which are not in line with the conservation area's guidelines. The village has overhead wiring for telephone and electricity supplies and there are visual intrusions related to farming practices, such as the decaying barns at Chestnut Farm (**1182638**) and the concrete and asbestos roofed sheds at Church Farm (**1032765**). Overall, the Thrandeston conservation area has preserved its historic character and rural setting.
- 3.3.18 Therefore, this conservation area has an evidential, historical and aesthetic value and is of **medium value**. Moreover, the setting of this conservation area makes a

considerable contribution to its value, but due to overall distance and the topography in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.3.19 The Mellis conservation area (**CA47**) is situated approximately 150 m south-east of the draft Order Limits and encompasses nearly the entire settlement of Mellis, along with the main road and all parallel roads and streets. This asset is located in Mid Suffolk District, about four miles south of Diss. The village sits on higher ground between two tributaries of the river Waveney. The Ipswich to Norwich railway line has passed through Mellis Common since 1849. The village of Mellis is also situated on the 'High Suffolk' claylands, which were deposited in the Ice Ages over the chalk that underlies most of Suffolk. This area is good for arable farming. Additionally, the village and conservation area lies about 2 km west of the main A140 Ipswich to Norwich trunk road, which was formerly part of the Ipswich to Scole Turnpike Trust's road of 1711, continuing from Scole on towards Norwich.
- 3.3.20 The conservation area offers views that contribute to its overall character and value. The open space of the Common, a central green area, serves as a central focal point, with the majority of settlement aligned towards it. The area also features substantial ponds, which are important both visually and for flood protection. The preservation and maintenance of these ponds are crucial. Additionally, the conservation area benefits from the presence of trees, including Horse Chestnuts, hedgerow trees, and Poplars, which enhance the visual appeal and contribute to the landscape's quality. Away from the core of the settlement around the intersection of the railway and Mellis Road, the throughfare passes into the agricultural landscape to the south-east where it is flanked by sparse properties to the south-east and has open views of the farmland to the north-west. Thus, emphasising the settlement's rural nature and its longstanding historical relationship with the agricultural landscape.
- 3.3.21 The historical and aesthetic value of the conservation area lies in its traditional building materials, as many unlisted buildings in Mellis are of traditional form and grouping, featuring local red brick and flintwork. The village also has examples of 'Suffolk White' brick and scattered flintwork. The conservation area contains 30 listed buildings. Two of them are Grade II\*, the Elm Tree Farmhouse (**1181795**) and the Church of St Mary the Virgin (**1181735**), predominantly dating back to the early 14th century, and which stands out with its knapped flint walls and slate and lead roof; the others are Grade II.
- 3.3.22 The conservation area in Mellis has evolved over time, with the more recent infilling around the eastern end of the Common likely starting when the railway cut through the village. The concentration of 19th century buildings around the level crossing, including the Steam Mill, industrial buildings, the Railway Tavern, and Sunnyside Terrace, all tell the story of the village's development. The area has seen the addition of modern houses and chalet-style bungalows, some of which do not complement the local vernacular. Additionally, the conversion of old mill buildings or barns has contributed to the overall picture of the conservation area's evolution.
- 3.3.23 The setting of the asset is informed by the dispersed nature of its building stock, which other than a small portion being more coalesced around the intersection of the railway and Mellis Road, is set well back from the throughfare beyond very broad, in places over 100 m, grassed verges. This means that even from the main road through the settlement a large proportion of its buildings appear almost removed and very rural in nature. Equally, the views of the agricultural landscape beyond the conservation area contribute to the open, dispersed quality of the settlement. The setting of the conservation area, therefore, makes a considerable contribution to its

value, but due to the proximity of the Project within the agricultural landscape c. 150 m not the north-west, the setting extends to the draft Order Limits. The conservation area is of **medium value** based on its designation and its evidential, historical and aesthetic values.

- 3.3.24 Finningham conservation area (**CA48**) is located c. 800 m west of the draft Order Limits. This conservation area is bordered by Gislingham Road, Church Green and Wickham Road. It also includes Church Lane and the Church Green area. It is situated near the centre of Mid Suffolk District, about seven miles north of Stowmarket and a similar distance south of Diss. It lies in a slight valley on the 'High Suffolk' claylands and is traversed by a tributary of the River Dove. The area is characterized by a backdrop of trees and provides a hidden oasis within the larger, more open Suffolk countryside. The village of Finningham is about three miles west of the main A140 road from Ipswich, which continues from Scole onwards to Norwich. Approximately 250 m east is the Great Eastern Main Line, which connects to various destinations in East Anglia, including Ipswich and Norwich.
- 3.3.25 The conservation area in Finningham has little in the way of views out of the area, but many short intimate views across the area within. The churchyard within the centre of the conservation area provides green spaces surrounded by houses and trees, while Church Green, west side of the conservation area, offers longer view, just like the most south-easterly corner. The central core of the conservation area is well served with footpaths, and there are footpath links out into the wider countryside.
- 3.3.26 The conservation area in Finningham holds historical and aesthetic value due to its collection of older buildings, predominantly domestic in scale, and mostly timber-framed and plastered with roofs of thatch or pantiles. While there are 27 listings covering the parish of Finningham, nineteen of which are within the conservation area. The area includes the Grade I listed Church of St Bartholomew (**1352056**), which is partly early 14th Century Decorated, and the Grade II\* listed Yew Tree House (**1033143**), dating from the mid-16th Century and the Grade II\* Church Farmhouse (**1033145**).
- 3.3.27 The conservation area has evolved over time, with the original designation dating back to 1973 by East Suffolk County Council. The area was inherited by Mid Suffolk District Council in 1974. The conservation area has undergone changes and developments, including the protection of trees through Tree Preservation Orders (TPOs) and the review of its designations. The evolution of the conservation area has seen changes in its infrastructure and buildings. However, modern infill buildings generally respect the local vernacular using render and red brick, although some of the houses use rather dull modern bricks, not to very good effect. Most of the infill has plain tile or pantile roofs, although some of the latter are concrete. Additionally, the end of the terrace of white brick cottages in Gislingham Road has unfortunately had a render finish applied and modern windows inserted, thus destroying the visual unity of the block. Moreover, as indicated in the inaugural edition of the OS map from 1885, recent residences emerged along Westhorpe Road, situated just beyond the periphery of the conservation area to the south-west. This alteration has had an effect on the close setting of the conservation area.
- 3.3.28 Overall, this conservation area has an evidential, historical and aesthetic value and is of **medium value**. Moreover, the setting of this conservation area makes a considerable contribution to its value but given the distance and the restricted scope of the conservation area to the Finningham settlement, its setting does not extend to the draft Order Limits.

- 3.3.29 Wickham Skeith conservation area (**CA49**) is located within the north-west part of the settlement, c. 650 m east of the draft Order Limits. It encompasses The Broadway, The Green, The Entry and the northern part of Rose Lane. This conservation area is situated near the centre of Mid Suffolk District, on 'High Suffolk' claylands. The conservation area is centred around The Green, which is roughly triangular in shape with a large pond on the southern side. The north-eastern side is bounded by a single minor road passing through the village. The settlement pattern in Wickham Skeith consists of houses clustered around the green and along the approach roads, mostly one plot deep. This means that, although rarely visible, the countryside is never far away. There are also tracks and paths linking the village to the outlying hamlets and farms, providing easy access on foot into the countryside.
- 3.3.30 The conservation area in Wickham Skeith limits outward views primarily due to the proximity of surrounding houses and trees. However, notable vistas extend towards the north, southwest, and northeast, providing longer perspectives that open up to the picturesque countryside and expansive fields. The settlement pattern in Wickham Skeith, characterised by houses clustered around the green and along approach roads, remains mostly one plot deep, ensuring that even though such views are infrequent, the rural landscape is always in close proximity.
- 3.3.31 This conservation area, designated in 1973 and inherited by Mid Suffolk District Council in 1974, is rich in both historical and archaeological value. The area boasts 18 listings covering the parish, including five Grade II listed buildings within the conservation area, predominantly timber-framed and plastered structures with thatch or pantile roofs. Archaeological importance is underscored by sites of interest listed in the Suffolk County Sites and Monuments Record, dating back to the Domesday survey of 1086 and encompassing Roman and medieval sites. Notably, these archaeological sites, along with the Church of St Andrew and Victorian Wickham Hall (**1352521**), are situated around the conservation area, contributing to the broader historical fabric of the region. The conservation area itself serves as an aesthetically pleasing oasis within the Suffolk countryside, featuring green spaces and trees.
- 3.3.32 The conservation area in Wickham Skeith has evolved over time with minimal modern intrusion. The area has resisted significant modern development, with few infill houses dotted around the Green, most of which respect the local vernacular using red brick or render with clay plain tile or pantile roofs. One historical intrusion onto the Green is the former Post Office and its driveway from the north, effectively cutting the area into two unequal halves. The area has also faced challenges such as a surfeit of overhead wiring, which is particularly intrusive along the northern edge of the green. Additionally, the motor car has had a detrimental effect, with dumped cars, informal parking areas, driveways, and fencing overrunning the green in places, leading to erosion of the grassed areas.
- 3.3.33 Overall, this conservation area has an evidential, historical and aesthetic value and is of **medium value**. Moreover, the setting of this conservation area makes a considerable contribution to its value but given the distance and the restricted scope of the conservation area to the Finningham settlement, its setting does not extend to the draft Order Limits.
- 3.3.34 Mendlesham conservation area (**CA44**) is located in the middle of the settlement of Mendlesham and is c. 1.4 km east of the draft Order Limits. It encompasses Old Market Street, Front Street, Chael Road and the western part of Mill Road. This conservation area is surrounded by a mix of urban and rural landscapes. The conservation area has a fairly urban built-up character with listed buildings facing each other across narrow streets. Despite the urban feel, the countryside is close.

There is easy access to the countryside through roads and parish footpaths, allowing access to the open countryside to the east, south-east, and west. Approximately 140 m south of the conservation area is the Mid Suffolk Light Railway which opened in 1908 and closed in 1952.

- 3.3.35 The views within the conservation area are quite limited due to the presence of buildings and trees but there are scenic views from the east, south-east and west of the conservation area towards the surrounding countryside. The conservation area of Mendlesham features predominantly domestic-scale, timber-framed, and plastered buildings with roofs made of plain tiles or pantiles. There are 45 listed buildings in the parish, 23 of which are within the conservation area. The Grade I listed Church of St Mary stands out with its flint rubble, stone-dressed walls, and leaded and plain tiled roof. Additionally, the Grade II\* listed Elms Farmhouse in Old Station Road is a timber-framed and plastered 'wealden' type house with a crown post roof, dating back to the late 15th century. However, there are some instances of poor non-traditional colour choices, poor quality modern fascia, and illuminated signs on unlisted buildings, which detract from the area's historic character. Additionally, there are concerns about the presence of overhead wiring, and it is suggested that underground utility supply lines would greatly improve the appearance of the village.
- 3.3.36 The location of the conservation area in Mendlesham originated as an agricultural community and developed into a local marketplace. The historic settlement pattern, with houses clustered around the central area, was mostly one plot deep. Over time, the central area has been infilled, and more recent developments now abut the original area, creating a more complex pattern. Despite the urban feel of the centre, the countryside is never far away, and the village has resisted modern intrusion.
- 3.3.37 Overall, this conservation area has an evidential, historical and aesthetic value and is of **medium value**. Moreover, the setting of this conservation area makes a considerable contribution to its value but given the distance, the vegetation in the intervening landscape and the restricted scope of the conservation area to the Mendlesham settlement, its setting does not extend to the draft Order Limits.
- 3.3.38 Badley Church Green conservation area (**CA45**) is located in the countryside of Suffolk, England, adjacent to the draft Order Limits on Badley Walk. It was originally designated by Mid Suffolk District Council in 1998. The conservation area is surrounded by large rolling farmland views in most directions, and the undulating countryside is used to screen views, particularly towards the south-west where urbanisation is growing. The area is characterised by a hierarchy of spaces, including the Church of St Mary (**1231082**), Hall (**1231083**), and associated farm buildings (**1278291**, **1231085**, **1231084**), which define a space by themselves. The former avenue, Badley Walk (**2534**), is now enclosed by reduced and sometimes scrubby trees, but it is still a reminder of the procession required to approach the hall which faced down this axis in the 16th and 17th centuries. The most impressive space is perhaps the former avenue, which rises in its central section to pass between two groups of trees known as Keyfield Groves. These two areas are now designated as County Wildlife Sites and sit on the northern edge of the Gipping Valley Special Landscape Area. The settlement seems to have been sited with the undulating countryside in mind, making the most of prominent areas of woodland to screen views.
- 3.3.39 The conservation area has historical value due to the presence of the five listed buildings such as the medieval eight-bay timber-framed barn adjoining Badley Hall (**1231085**) or the 16th century Hall itself (**1231083**), which is a Grade II\*. Historically, the area is mentioned in the Domesday survey of 1086 as 'Badeleia', and it has been

associated with notable figures such as Edmund Alcock and the Poley family. Aesthetically, the area features a variety of spaces, from small, enclosed yards in the farm group to the green adjoining the Church of St Mary, and the former avenue, Badley Walk, which still retains its historical value. Within a radius of 1 km from the conservation area are a large group of historical assets dating from Bronze Age to the medieval period.

- 3.3.40 The setting of the conservation area of Badley Church Green is rural and isolated, with no proper roads in the area. The seven paths that radiate from Church Green provide some idea of the settlement's former importance, with definitive footpaths remaining essentially field paths which extend beyond the bounds of the conservation area to the agricultural landscape beyond. The area is well-screened, with its 'secret' nature not being visible from any main road, but there are open views to the agricultural landscape to the south. However, the group of overhead power lines converging to a point north of Church Green continually contradicts the village's apparent isolation. The conservation area is surrounded by large rolling farmland views in most directions, and the undulating countryside is used to screen views, particularly towards the south-west where urbanisation is growing. The conservation area and its surroundings have likely undergone some evolution since its designation in 1998. Changes in land use, development, and environmental factors may have influenced the area's character and appearance over time.
- 3.3.41 Overall, the conservation area has evidential, historical and aesthetic value and is of **medium value**. The setting of the conservation area makes a considerable contribution to its value, but due to Project pipeline mitigation works extending up to its boundary and there being open views of Project overhead line mitigation works c. 100 m to the south, the setting extends to the draft Order Limits.
- 3.3.42 The Needham Market conservation area (**CA50**) is located in the northwest part of the town of Needham Market, in Suffolk. It is situated c. 950 m east of the draft Order Limits. This conservation area runs mostly through High Street and encompasses some parallel streets such as Hawks Mill Street, Bridge Street and the northern part of Coddenham Road. **CA50** is situated on a gently sloping hillside, with the High Street running along the ridge. The landscape around the conservation area is characterised by low-lying water meadows and pastures to the east, where the river Gipping flows. To the west, there are fields along the ridge that can be accessed by footpaths running parallel to the High Street.
- 3.3.43 The setting around the conservation area is predominantly rural, with farmland and open countryside visible from various points within the area. The nearby town centre is located to the south of the conservation area, while the A14 dual carriageway bypasses the town to the north. The railway tracks run to the east of the conservation area, with the Needham Market railway station located nearby. The topography and landscape of the surrounding area contribute to the rural character of the conservation area and help to create a sense of separation from the nearby urban areas.
- 3.3.44 Within this conservation area, there are a total of 101 listed buildings. Among them, the 13th-century Church of St. John the Baptist (**1254254**) stands as the sole Grade I structure, accompanied by five Grade II\* buildings, with the remainder designated as Grade II. This conservation area showcases a diverse architectural landscape, mirroring the town's historical evolution. With a notable emphasis on timber-framed structures, some dating back to the 15th and 16th centuries, the area highlights traditional framing techniques, adding historical and aesthetic significance. Alongside these, various brick and rendered buildings representing different historical periods

further enrich the architectural tapestry. The listed buildings, including the Church of St. John the Baptist and the Old Town Hall, enhance the area's architectural diversity.

- 3.3.45 The views within the conservation area are primarily focus on the buildings and streets. However, there are notable exceptions in the north-eastern section of the conservation area, where views extend beyond the immediate surroundings, offering glimpses of agricultural fields. This specific vantage point allows for longer views, in contrast to the more confined perspectives within the central area.
- 3.3.46 The Conservation Area Appraisal for Needham Market NW acknowledges that the conservation area has changed over time. The document notes that the town has grown along a through road, with the building line moving in and out, creating both pinch points and wider spaces in-between. The effect of bomb damage during the war is also noted, which resulted in the removal of part of the street just south of the old Town Hall. The presence of modern showrooms, a gym, and infill housing in the area just south of the old Town Hall replaced the space affected by the bomb damage.
- 3.3.47 Overall, the conservation area holds evidential, historical and aesthetic value and is of **medium value**. Moreover, the setting of this conservation area makes a considerable contribution to its value but given the distance, the vegetation in the intervening landscape and the restricted scope of the conservation area to the settlement of Needham Market, its setting does not extend to the draft Order Limits.

## Baseline Introduction

- 3.3.48 The following cultural heritage baseline for Section B of the Project is presented by chronological archaeological period and from north to south. Section B is further broken down into geographic parcels to allow the reader to orientate and to locate where on the appropriate figure a particular heritage asset is illustrated. These geographic parcels are largely defined by current settlements, and parish boundaries but also occasionally by landscape features such as high points and valleys and by anthropogenic features such as roads and railways. To avoid repetition, each parcel of Section B is introduced and described only in the first archaeological period where it is appropriate to be used.

## Prehistoric Period

### Palaeolithic

- 3.3.49 The Palaeolithic period is represented in Section B of the Project by assets recovered in the Wortham, Mellis and Gislingham and Needham Market and Ringshall geographical parcels.

#### Wortham, Mellis and Gislingham

##### *Non-Designated Heritage Assets*

- 3.3.50 Wortham is a small village situated on high ground at c. 60 m aOD above the Waveney Valley to the north, which lies at c. 25 m aOD. Shallow now dry tributary valleys of the Waveney fall southwards from the higher ground, which also occupied by the settlements of Magpie Green to the north-west and Palgrave to the north-east. Mellis is located 2.8 km south-east of Wortham and the settlements are linked by Mellis Road. The linear settlement of Mellis follows a narrow strip of higher ground at

c. 55 m aOD with a tributary valley of the Waveney at c.38 m aOD to the north-west and a tributary of the Dove at c. 42 m aOD to the south and south-east. The settlement of Gislingham is located close to the southern limit of this subsection on ground at c. 65 m aOD with a tributary of the Dove to the north at c. 50 m aOD. Cropmark analysis, archaeological fieldwork and metal detector surveys undertaken in the area, has produced a detailed archaeological record including evidence of Upper/Terminal Palaeolithic period activity as well as in subsequent periods.

- 3.3.51 The Upper/Terminal Palaeolithic to early Mesolithic period is represented by flintwork of evidential value including three long blades (**2001**) of the Ahrensburgian long blade industry (9700 - 9400 BC) found during fieldwalking land at Wortham Ling on the southern flank of the Waveney Valley and at the northern limit of Section B. The land parcel containing the assets is located approximately 330 m south-west of the draft Order Limits. The blades are part of a larger **medium value** assemblage of lithics (**2002**) of evidential value located 290 m south-west of the draft Order Limits, and which also includes early and late Mesolithic material. A long blade (**1216**) of similar age was found c. 350 m to the north-west in Section A, within the Waveney Valley, and these combined assets likely represent the activities of hunter-gatherer communities exploiting the river valley for its resources and as routes through the landscape.

## Needham Market and Ringshall

### *Non-Designated Heritage Assets*

- 3.3.52 Needham Market is situated within and on the south-western flank of the Gipping Valley, c. 2.4 km south-east of Stowmarket. The bottom of the valley lies at c. 21 m aOD whilst the Needham Market football ground on the south-western flank of Quinton Road marks the high point of the settlement at c. 45 m aOD. Ringshall is located c. 4.5 km south-west of Needham Market and situated on the eastern edge of a plateau of higher ground at c. 82 m aOD. The plateau is also occupied by Great Bricett and Nedging Tye to the south-west, Wattisham Airfield to the west and Battisform Tye to the north-west. Tributary valleys of the Gipping Valley lie at c. 66 m to the north of Ringshall and at c. 58 m to the south. Cropmark analysis, archaeological fieldwork and metal detector surveys undertaken in the area, has produced a detailed archaeological record including evidence of Palaeolithic period activity as well as in subsequent periods.
- 3.3.53 The Lower Palaeolithic period is potentially represented by three **low value** Darmsden type worked flints (**2000**) of evidential value recovered from the backfill of an old sand pit on the north-western flank of Hascot Hill and 190 m west of the draft Order Limits. The HER record states that the validity of these assets is currently being assessed, but no further details are included.
- 3.3.54 The Portable Antiquities Scheme holds a record for a patinated and stained long flake of possible Palaeolithic date, found as part of a larger **low value** assemblage of flintwork (**2007**) of evidential value and recovered from land north of Needham Road, outside the draft Order Limits.

## Mesolithic

- 3.3.55 The Mesolithic period is represented in Section B of the Project by lithic scatters and findspots recorded by the Suffolk HER and by the Portable Antiquities Scheme.

## Wortham, Mellis and Gislingham

### *Non-Designated Heritage Assets*

- 3.3.56 As noted above, Upper/Terminal Palaeolithic to early Mesolithic activity is represented in the Waveney Valley by **low value** Ahrensburgian industry long blades (2001) of evidential value approximately 370 m south-west of the draft Order Limits, 100 m north of Ling Road, and 1.3 km west of Diss. The larger **medium value** lithic assemblage of evidential value collected from this area (2002) also contained over 30 diagnostic late Mesolithic flints including backed, scalene and rod microliths.
- 3.3.57 Potential evidence of Mesolithic occupation comprising a possible hut site or ditch, worked deer antler and Mesolithic flintwork (2003) of evidential value was identified presumably ahead or during the construction of the A143 between Wortham and Stuston, within the draft Order Limits. *In situ* Mesolithic occupation remains would be of **medium to high value**.
- 3.3.58 There is a PAS record for a small **low value** narrow blade, which is roughly triangular in cross-section, of probable Mesolithic to Neolithic date (2004). The asset is of evidential value and was recovered from farmland south-east of Gislingham outside the draft Order Limits.

## Finningham, Mendlesham and Old Newton

### *Non-Designated Heritage Assets*

- 3.3.59 Finningham is located towards the upper reaches of a tributary valley of the Dove at c. 45 m aOD. The Dove tributary is fed by the higher ground to the north, west and south of Finningham from where it heads approximately east to discharge into the Dove 350 m west of Thorndon. Mendlesham is located on the north-western flank of the Dove Valley close to its upper reaches at c. 56 m aOD with the valley bottom at c. 46 m aOD. The Dove and its tributaries drain higher ground to the north, west and south of Mendlesham before heading approximately north-north-east and discharging into the Waveney approximately 5 km east of Diss. Old Newton is located on a strip of higher ground at c. 63 m aOD with north/south aligned tributaries of the Gipping to the east and west at c. 42 m aOD. Cropmark analysis, archaeological fieldwork and metal detector surveys undertaken in the area, has produced a detailed archaeological record including evidence of Mesolithic period activity as well as subsequent periods.
- 3.3.60 There are two PAS records for **low value** Mesolithic assets of evidential value found on land north of Wickham Road, outside the draft Order Limits. Asset (2005) is a fragment of Mesolithic to early Neolithic flintworking debitage, or possibly a late Mesolithic microlith, whilst asset (2006) comprises two fragments of Mesolithic to Neolithic flint working debris. One is a blade-shaped secondary flake and the other is a small, squat, tertiary flake.

## Needham Market and Ringshall

### *Non-Designated Heritage Assets*

- 3.3.61 The **low value** mixed 46-piece mixed period lithics assemblage (2007) noted above and recovered from land north of Needham Road, outside the draft Order Limits, contained a small number of flints of late Mesolithic to early Neolithic date of evidential value.
- 3.3.62 A **low value** scatter of over 120 lithics (2047) was recovered from farmland near Barking and within the draft Order Limits. The assemblage is multi-period and largely

of later Bronze Age date, however, it includes a Star Carr Type blade and pyramid core of Mesolithic to Neolithic date and of evidential value.

## Neolithic

- 3.3.63 The Neolithic period is represented in Section B by earthworks and cropmarks of possible ritual monuments and by several flint scatters and findspots recorded by the Portable Antiquities Scheme (PAS). Due to the general rarity of Neolithic funerary monuments, where there is evidence of such within the 500 m study area they have been reported here.

### Wortham, Mellis and Gislingham

#### *Non-Designated Heritage Assets*

- 3.3.64 The earthworks of a possible **medium value** Neolithic long barrow (**2011**) of evidential value are located in the north-west corner of Wortham Ling, 80 m north of Low Road, 2.5 km north of Wortham and 390 m south-west of the draft Order Limits. The monument is 49 m long, 14 m wide and attains a maximum height of 6 m. The asset has been disturbed by the presumably modern rifle butts of a former shooting range. The asset is situated in the Waveney Valley with the river immediately to the north and within a large, later Prehistoric (Neolithic to Iron Age) lithics scatter (**2012**) of evidential value, which demonstrates the time depth of human activity in the area.
- 3.3.65 An Iron Age (**2069**) and Saxon settlement site (**2195**) was identified in 1955 during the excavation of a pipeline. The site is of evidential value and is situated 40 m south of the A143, 320 m east of Worthing and 180 m west of an draft Order Limits access road. A **low value** residual plano-convex flint knife of evidential value and likely of Neolithic date was recovered from a later feature during excavation.
- 3.3.66 The following **low value** Neolithic assets of evidential value are recorded by the Portable Antiquities Scheme (PAS):
- A record for a body sherd of a Neolithic probable carinated pot (**2013**), the fabric is black/brown and has burnt flint inclusions. There are two crude stamps below the shoulder, possibly made with the tip of a bone. The asset was recovered from farmland near Wortham and adjacent to the draft Order Limits
  - A group of surface-collected worked flints (**2015**) including a late Neolithic Tortoise type ovoid core; five late Neolithic to early Bronze Age oval scrapers; a retouched flake; a large, retouched flake ending in a hinge fracture; and a blade with parallel flake scars on dorsal face. The lithics were recovered from farmland east of Wortham and adjacent to the draft Order Limits
- 3.3.67 A Neolithic settlement (**2601**) was located within the draft Order Limits approximately 590 m north-west of Mellis. The settlement was situated on a south facing slope and discovered during the excavation of a pipeline trench in 1955. The excavations revealed a 'hut site' 15 feet in diameter with a central sunken, circular hearth containing three large burnt stones and filled with black earth, pottery and flints. The pottery included rim sherds and the flint included cores, scrapers and flakes. To the southern end of the 'hut site' was a ditch or pit filled with dark soil. To the north was a possible 'furnace' which was lined with burnt clay and filled with black earth and worked clay. This is potentially a multi period site as other assets from the Bronze Age and Iron Age were encountered but the HER does not specify what these were. This asset is of medium value and has evidential value.

## Finningham, Mendlesham and Old Newton

### *Non-Designated Heritage Assets*

- 3.3.68 The cropmark of a causewayed ring ditch (**2008**) of evidential value is located 1.2 km south-east of Finningham, 210 m south of Wickham Lane and 25 m west of the draft Order Limits. The asset is 25 m in diameter and has causeways to the east and west. The asset has not been investigated archaeologically, but based on morphology, it has been suggested (Harding and Lee 1987) the cropmark may represent the remains of a medium value Neolithic henge monument.
- 3.3.69 The following **low value** Neolithic assets of evidential value are recorded by the Portable Antiquities Scheme (PAS):
- An assemblage of eight lithic implements (**2016**) including six flakes of late Neolithic to early Bronze Age date recovered from farmland north of Wickham Road, outside the draft Order Limits
  - A snapped flint long flake or blade with a triangular section and edge retouch (**2017**) of Neolithic date recovered from farmland north of Wickham Road, outside the draft Order Limits
  - A flint flake or blade with a sub-triangular section (**2018**) recovered from farmland north of Wickham Road, outside the draft Order Limits
  - A complete Neolithic retouched secondary flake (**2019**) recovered from farmland north of Wickham Road, outside the draft Order Limits
  - A complete roughly conical shaped multi-platform flint core of Neolithic to early Bronze Age date (**2020**) recovered from farmland north of Wickham Road, outside the draft Order Limits
  - An assemblage of 27 Neolithic to early Bronze Age lithics (**2021**) including four scrapers, an awl, one retouched blade and four retouched flakes recovered from farmland north of Wickham Road, outside the draft Order Limits
  - A small assemblage of eight pieces of flint debitage Neolithic to early Bronze Age date (**2022**) recovered from farmland north of Wickham Road, outside the draft Order Limits

## Middlewood Green and Stowmarket

### *Non-Designated Heritage Assets*

- 3.3.70 Middlewood Green is located on a plateau of high ground at c. 65 m aOD with Mendlesham Green to the north and Forward Green to the south. Tributary valleys of the Gipping valley lie to the north of the settlement at c. 41 m aOD and to the south at c. 40 m aOD. The market town of Stowmarket lies c. 5 km to the south-west and other than the city of Ipswich, it is the largest settlement in the Suffolk section of the Project. Stowmarket straddles the Gipping Valley and the Rat River tributary discharges into the Gipping from the west in the town. The confluence of the rivers lies at c. 28 m aOD with the settlement rising up on the valley sides to the south-west and north-east and attaining a maximum elevation of c. 61 m aOD on Union Street close to the Stowmarket High School. Cropmark analysis, archaeological fieldwork and metal detector surveys undertaken in the area, has produced a detailed archaeological record including evidence of Bronze Age activity as well as subsequent periods.

- 3.3.71 The Portable Antiquities Scheme holds a record for an incomplete and re-worked **low value** polished flint axe of Neolithic date (**2014**). The asset is of evidential value and was found on farmland south-east of Stowmarket and west of the draft Order Limits.

### **Needham Market and Ringshall**

#### *Non-Designated Heritage Assets*

- 3.3.72 An oval cropmark (**2010**) of evidential value located c. 260 m north-north-west of Needham Market, 240 m north-east of the B1113 Stowmarket Road and 260 m east of the draft Order Limits. The asset has not been investigated archaeologically, but based on morphology, the Suffolk HER entry suggests the cropmark may represent the remains of a **medium value** Neolithic long barrow. The asset is associated with several cropmark ring ditches that may represent a Bronze Age barrow cemetery, which was likely located due to the presence of the earlier monument.
- 3.3.73 A fragment of a **low value** polished Neolithic flint chisel and a small axe (**2117**) of evidential value were recovered from farmland partially within the draft Order Limits, 630 m north-north-west of the B1078 and 1.6 km east-south-east of Ringshall.

### **Great Bricett and Bramford**

#### *Non-Designated Heritage Assets*

- 3.3.74 Great Bricett is situated on the eastern edge of a plateau of high ground at c. 81 m aOD with Wattisham Airfield to the north-west and Nedging Tye to the south-west also on the high ground. The Channel Valley arises just north of Great Bricett at c. 70 m aOD from where it meanders in a south-eastern direction passing Offton, Somersham and Little Blackenham before discharging into the Gipping just to the north of Bramford. Bramford lies c. 8.3 km to the south-east of Great Bricett on the north-western edge of Ipswich and within and on the western flank of the Gipping Valley. The valley floor immediately to the east of the town lies at c. 6 m aOD whilst the western edge of the settlement, defined by the A1113 Loraine Way lies at c. 24 m aOD. Cropmark analysis, archaeological fieldwork and metal detector surveys undertaken in the area, has produced a detailed archaeological record including evidence of Bronze Age activity as well as subsequent periods.
- 3.3.75 A **low value** oval cropmark (**2009**) of evidential value is located 1.6 km west of Bramford, immediately north of Bullen Lane and the draft Order Limits. The asset has not been investigated archaeologically, but based on morphology, it has been suggested (Martin and Plouviez 1978) the cropmark may represent the remains Neolithic long barrow which would result in this asset being of at least **medium value**.

### **Bronze Age**

- 3.3.76 The Bronze Age is represented in Section B of the Project by cropmarks of potential funerary monuments, scatters and findspots of lithics, pottery and metalwork recorded by the Suffolk HER and by the Portable Antiquities Scheme. Due to the general rarity of Bronze Age funerary monuments, where there is evidence of such within the 500 m study area they have been reported here.

### **Wortham, Mellis and Gislingham**

#### *Non-Designated Heritage Assets*

- 3.3.77 The earthwork of a possible small, **medium value** Bronze Age barrow (**2037**) of evidential value is located 1.6 km south-east of Wortham and 180 m east of the draft

Order Limits. The asset is situated within the bounds of the medieval asset 'Moatyards' (**2260**), which is described in the medieval section below.

- 3.3.78 A **low value** Bronze Age barbed and tanged flint arrowhead (**2027**) of evidential value was recovered from farmland partially within the draft Order Limits, 70 m north-east of Mellis Road and 1 km south-east of Burgate.
- 3.3.79 A **low value** concentration of 17 PAS findspots (**2202**) of evidential and historical value was recovered from farmland within the draft Order Limits, near Mellis. The assemblage contains Bronze Age, early medieval and post medieval artefacts and an undated foreign silver coin.

## Finningham, Mendlesham and Old Newton

### *Non-Designated Heritage Assets*

- 3.3.80 A complex of cropmarks comprising a concentric ring ditch c. 30 m in diameter and an overlapping irregular enclosure (**2038**) is of evidential value and is located 130 m north of Mendlesham Road, c. 2 km north-west of Mendlesham and 180 m west of the draft Order Limits. The concentric ring ditch has been interpreted as the possible remains of a **medium value** Bronze Age barrow.
- 3.3.81 The cropmark of a smaller c. 20 m diameter ring ditch within an irregular enclosure (**2039**) is of evidential value and located immediately north-east of (**2038**). The asset has not been archaeologically investigated and remains uncharacterised but is included here as the possible remains of a **medium value** Bronze Age barrow based on its morphology and its proximity to asset (**2038**).
- 3.3.82 Three **low value** Bronze Age lithics of evidential value were recovered from farmland in the Dove Valley outside the draft Order Limits. The flints are part of a much larger finds assemblage (**2043**) that includes Iron Age, Roman and Saxon finds and likely represents Romano-British settlement evidence (**2151**) as discussed in the Roman section).
- 3.3.83 The following **low value** Bronze Age assets of evidential value are recorded by the Portable Antiquities Scheme (PAS) outside the draft Order Limits near Mellis and Wickham Road:
- A late middle Bronze Age complete unlooped palstave (**2042**)
  - Four Bronze Age worked flints and five sherds of late Bronze Age pottery (**2050**)
  - A round Bronze Age flint scraper, two flint flakes and three body sherds, one with extensive flint inclusions (**2051**)
  - A Bronze Age incomplete copper-alloy razor (**2052**)
  - A body sherd from a handmade pottery vessel of probable later Bronze Age to Iron Age date (**2053**)
  - A fragment from the tip of a copper alloy Bronze Age spearhead (**2054**)
  - A notched and retouched flint flake, a flint retouched flake, a flake assemblage with mainly relatively thin flakes, most of which are retouched and a group of five flakes and a scraper (**2055**)
  - A small assemblage of ten flint flakes mainly squat, manufactured with a hard hammer and of likely late Bronze Age date (**2056**)

- An incomplete copper-alloy Bronze Age axe and two low value probable Bronze Age body sherds of handmade ceramic with extensive white flint inclusions (**2058**)
- A fragment of a copper alloy Bronze Age socketed axe (**2061**)

## Middlewood Green and Stowmarket

### *Non-Designated Heritage Assets*

- 3.3.84 The cropmarks of two **medium value**, ploughed out Bronze Age barrows (**2028**) of evidential value are located on farmland 430 m north-east of the Gipping river, 1.7 km south-east of Stowmarket and 100 m north-west of the draft Order Limits. The eastern asset comprises a single ditch 33 m in diameter, whilst the western asset comprises concentric ring ditches, the outer 30 m in diameter and the inner 13 m.
- 3.3.85 The cropmark of a large, **medium value** ploughed out Bronze Age barrow (**2029**) of evidential value is located on farmland 290 m north-east of the Gipping river, 1.6 km south-east of Stowmarket and 120 m north-west of an draft Order Limits access road. The asset is 33 m in diameter and lies 100 m to the west of the two barrow cropmarks noted above (**2028**).
- 3.3.86 Cropmark (**2040**) is located 60 m east of the A14, 2.5 km south-east of Stowmarket and 480 m east of the draft Order Limits. The asset comprises the partial remains of a ring ditch approximately 14 m in diameter, which has been interpreted as the possible remains of a **medium value** Bronze Age barrow of evidential value.
- 3.3.87 An incomplete **low value** copper-alloy basal-looped spearhead of evidential value and of the Middle Bronze Age, dating to 1500 BC -1150 BC (**2044**) was found on farmland near Stowmarket outside the draft Order Limits.

## Needham Market and Ringshall

### *Non-Designated Heritage Assets*

- 3.3.88 The cropmark of a partial ring ditch (**2033**) of evidential value is located 60 m north-west of Fen Lane, 1.6 km north-north-east of Needham Market and 410 m south-east of the draft Order Limits. It is thought to be the remains of a **medium value** barrow and is 31 m in diameter and has two internal, off-centre pits.
- 3.3.89 A group of cropmarks comprising two circular assets (**2034**, **2035**) and an oval enclosure (**2036**) are of evidential value and are located 220 m south-west of the Gipping river, 270 m north of Needham Market and 340 m south-east of the draft Order Limits. The assets are thought to be the remains of **medium value** Bronze Age funerary monuments. The assets are located immediately to the south-east of the cropmark of a possible Neolithic long barrow (**2010**) and the cropmarks of three further potential Bronze Age barrows lie c. 230 m to the south-east (see below).
- 3.3.90 A group of three cropmarks, likely representing **medium value** Bronze Age barrows of evidential and historical value (**2030**, **2031**, **2032**), are located on the south-western bank of the Gipping river, 250 m north-north-east of Needham Market and 600 m south-east of the draft Order Limits. Although outside the 500 m study area, these assets are noted here due to their proximity to the barrows noted above and as they exemplify the importance of the river and valley to prehistoric communities.
- 3.3.91 A **low value** early Bronze Age barbed and tanged flint arrowhead (**2025**) of evidential value was recovered from farmland within the draft Order Limits, and approximately 1.5 km east-south-east of Ringshall.

- 3.3.92 A **low value** Bronze Age hoard of 81 copper alloy artefacts (**2045**) of evidential value was found on farmland near Needham Market within the draft Order Limits. The hoard includes socketed axe heads, winged axe heads, swords, sickles and a large amount of casting waste.
- 3.3.93 The following **low value** Bronze Age assets of evidential value are recorded by the Portable Antiquities Scheme (PAS) near Barking outside the draft Order Limits:
- The mixed 46-piece mixed period lithics assemblage (**2007**) noted above contained a small number of flints of late Bronze Age date
  - A scatter of over 120 lithics (**2047**). The assemblage is multi-period but largely of later Bronze Age date
  - An incomplete copper-alloy fragment, possibly from the tip of a Bronze Age sword or dagger blade (**2060**)

### Great Bricett and Bramford

#### *Non-Designated Heritage Assets*

- 3.3.94 A fragment of a **low value** heavily corroded Bronze Age bronze blade (**2023**) of evidential value was recovered from farmland immediately west of Flowton and 200 m south-west of the draft Order Limits.
- 3.3.95 Four **low value** corroded bronze fragments (**2024**), possibly Bronze Age tool fragments of evidential value, recovered from farmland immediately east of Ipswich Road, approximately 930 m north-west of Lower Somersham, and 160 m north-east of the draft Order Limits.
- 3.3.96 A fragment of a **low value** late Bronze Age socketed axe (**2046**) of evidential value was recovered during a metal detector rally on farmland west-south-west of Bramford and outside the draft Order Limits.

### Iron Age

- 3.3.97 The Iron Age is represented in Section B of the Project by scatters and findspots of pottery and metalwork recorded by the Suffolk HER and by the Portable Antiquities Scheme.

### Wortham, Mellis and Gislingham

#### *Non-Designated Heritage Assets*

- 3.3.98 A small **low value** scatter of flint and sand tempered Iron Age pottery including a sherd of Belgic ware (**2062**) of evidential value was recovered from farmland approximately 160 m north of the A143, 1.5 km east of Wortham and 70 m west of the draft Order Limits.
- 3.3.99 A potentially **medium value** Iron Age settlement site (**2068**) of evidential value was found in July 1955 during the excavation of pipe trench located partially within the draft Order Limits, 60 m north-east of Mellis Road and 70 m north-west of Mellis. The pipeline revealed a roundhouse 4.6 m in diameter with central sunken circular hearth containing black earth, grit tempered Iron Age pottery and flints. To the south of the roundhouse was a ditch or pit filled with dark soil and to the north was a possible furnace, lined with burnt clay and filled with black earth and worked clay.
- 3.3.100 A second **medium value** Iron Age settlement site (**2069**) of evidential value was identified the same year and likely during the excavation of the same pipeline. The

site is situated 40 m south of the A143, 320 m east of Worthing and 180 m west of an draft Order Limits access road. The remains comprised those of a roundhouse and ditches that contained black earth, burnt stones, and brownish black pottery sherds some with finger tipping ornamentation. A second structure of possible Saxon date was also identified.

3.3.101 Excavation for the pipeline also revealed an Iron Age pottery making floor or kiln (**2070**) of evidential value located 20 m west of Mellis Road, 1.7 km north-west of Mellis and 50 m north-west of the draft Order Limits. The **low value** remains comprised a black earth layer surrounded by a black earth filled ditch.

3.3.102 The following **low value** Iron Age assets of evidential value are recorded by the Portable Antiquities Scheme (PAS) near Worthing, mostly outside the draft Order Limits:

- A handmade body sherd from a likely Iron Age pottery vessel (**2076**) recovered from farmland within the draft Order Limits
- A cast copper-alloy object, possibly a mount of Iron Age date (**2077**)
- A fragment of a copper-alloy late Iron Age to early Roman Langton Down bow brooch (**2086**)
- A cast copper alloy terminal or head, probably from a later Iron Age to Roman button and loop fastener or strap fitting (**2087**)
- An incomplete cast copper-alloy Iron Age to Roman Rosette brooch (**2097**)
- An incomplete cast copper-alloy Colchester bow brooch of late Iron Age to Roman date (**2098**)
- An incomplete cast copper-alloy Colchester bow brooch of late Iron Age to Roman date (**2099**)

## Finningham, Mendlesham and Old Newton

### *Non-Designated Heritage Assets*

3.3.103 A **low value** copper alloy terret (harness) ring (**2063**) of evidential value was found by a metal detectorist on land approximately 1 km south-west of Needham Market, 120 m south-east of the draft Order Limits.

3.3.104 The following **low value** Iron Age assets of evidential value are recorded by the Portable Antiquities Scheme (PAS) near Wickham Road outside the draft Order Limits:

- An Iron Age coin (**2072**)
- A silver Iron Age coin (**2073**) and a copper alloy late Iron Age/Romano-British Colchester type brooch (**2074**)
- A copper alloy Iron Age coin (**2075**) of king Cunobeline (AD 9 - c. 40) of the Trinovantes
- A body sherd from a handmade ceramic vessel of likely Iron Age date (**2078**)
- A complete silver Iron Age half unit, dating to the period c. 40 BC to AD 20 (**2079**)
- A complete silver Iron Age East Anglian inscribed unit of Antedios, dating to c. AD 10 - 30 (**2080**)
- A fragment of a copper alloy Iron Age probable strap fitting (**2081**)

- A copper alloy Langton Down brooch fragment (**2088**)
- A copper alloy Colchester brooch (**2089**)
- A probable fragment of an Iron Age copper alloy closed ring or terret (**2090**)
- The worn incomplete wings and upper bow fragment of a copper-alloy Late Iron Age to early Roman Langton Down type bow brooch (**2091**)
- The worn incomplete wings and upper bow fragment of a copper-alloy Late Iron Age to early Roman Langton Down type bow brooch (**2092**)
- A copper-alloy Aucissa brooch of Late Iron Age to early Roman date (**2093**)
- An Iron Age pottery body sherd with flint temper (**2094**)
- A very worn and corroded fragment of a copper-alloy late Iron Age to early Romano-British bow brooch (**2095**)
- A body sherd from a Roman grey ware Belgic storage vessel (**2100**) with combed decoration on the exterior surface and of Late Iron Age to Roman
- An incomplete copper-alloy Late Iron Age to Roman Langton Down brooch recovered from farmland (**2101**)
- A worn and incomplete cast copper-alloy Rosette brooch of Iron Age to Roman date (**2102**)
- An incomplete copper alloy Iron Age to early medieval Type C penannular brooch (**2105**)
- An incomplete cast copper-alloy cosmetic mortar of Late Iron Age to Roman date (**2106**)
- An incomplete copper-alloy late Iron Age early Roman brooch of the Langton Down Type, dating to AD 25 - 60 (**2107**)
- A complete Iron Age to Roman copper-alloy penannular brooch dating to c. AD 1-100 (**2109**)

## **Middlewood Green and Stowmarket**

### *Non-Designated Heritage Assets*

- 3.3.105 A **low value** scatter of Iron Age pottery, including a small proportion of grog tempered wares and other probably Belgic forms (**2064**) of evidential value, was found approximately 245 m south-west of the draft Order Limits, 70 m south-east of Castle Road, and within the southern fringes of Offton.

## **Needham Market and Ringshall**

### *Non-Designated Heritage Assets*

- 3.3.106 Archaeological fieldwork ahead of the laying of an underground electricity cable between Stowmarket and Great Blakenham (Heard 2014) identified late Iron Age to Roman-British ditches of evidential value overlaid by a medieval rectilinear field system (**2067**). The **low value** archaeological remains were identified in the northernmost of two excavation areas located immediately west of Barrett's Lane, 630 m south-west of Needham Market and 90 m west of an draft Order Limits access road.

- 3.3.107 The following **low value** Iron Age assets of evidential value are recorded by the Portable Antiquities Scheme (PAS) near Needham Market and Ringshall:
- A fragment of a probable knobbed terret (**2071**), which is heavily burnt and distorted, was recovered from farmland within the draft Order Limits
  - An incomplete copper-alloy late Iron Age to early Roman Nauheim derivative brooch (**2085**) recovered from farmland within the draft Order Limits
  - An incomplete copper-alloy zoomorphic vessel mount of Late Iron Age to Roman date (**2103**) recovered from farmland within the draft Order Limits
  - An incomplete copper-alloy centre-looped cosmetic mortar of late Iron Age to Roman date (**2104**) outside the draft Order Limits

### **Great Bricett and Bramford**

#### *Non-Designated Heritage Assets*

- 3.3.108 A few sherds of **low value** Iron Age pottery (**2065**) of evidential value were recovered during an archaeological watching brief undertaken on land on the south side of Offton, 2.6 km south-east of Great Bricett and 110 m north of an Order Limit access road.
- 3.3.109 The following low value **Iron Age** assets of evidential value are recorded by the Portable Antiquities Scheme (PAS) near Great Bricett outside the draft Order Limits:
- A copper-alloy Iron Age unit or a core for a plated silver unit of the North Thames region dating to 60 BC- 20 BC (**2083**)
  - A complete copper-alloy late Iron Age to early Romano-British cosmetic mortar (**2096**)
  - An incomplete copper-alloy Iron Age to Roman brooch of the Colchester type, dating to AD 20 - 60 (**2108**)

### **General Prehistoric**

- 3.3.110 The Suffolk HER and the Portable Antiquities Scheme hold the following records for assets attributed a general prehistoric date.

### **Wortham, Mellis and Gislingham**

#### *Non-Designated Heritage Assets*

- 3.3.111 An evaluation and excavation within St Johns House Hospital grounds revealed a single Prehistoric pit, pottery and a single flint tool (**2600**). These were located approximately 60 m south-west of the draft Order Limits and approximately 1.3 km south-west of Palgrave village. The asset holds **low value** and have evidential value.
- 3.3.112 Sherds of prehistoric pottery (**2122**) of evidential value were recovered in 1955 from a pipeline trench out the eastern outskirts of Wortham, immediately south of the A143 and 440 m west of a proposed access road. The same pipeline identified a prehistoric 'hut site' with a hearth and flints (**2123**) immediately west of Mellis Road, 1.3 km south of Wortham and 280 m south of a proposed access road.

## Finningham, Mendlesham and Old Newton

### *Non-Designated Heritage Assets*

- 3.3.113 The following **low value** prehistoric assets of evidential value are recorded by the Portable Antiquities Scheme and were recovered as surface finds from farmland in a valley of a tributary of the Dove river. Where multiple point occupied the same location on the supplied PAS data, the assets have been combined under a single Project I.D. code.
- Three flint flakes and a squat flake (**2124**)
  - An unpatinated long flake struck from a brown flint (**2125**)
  - Three worked flint flakes (**2126**)
  - An unpatinated flint flake, a long flint flake and a squat flint flake (**2127**)
  - A squat flint flake (**2128**)
  - A flint long flake or blade (**2129**)
  - Six squat flint flakes, a primary flake and a flake (**2130**)
  - Two short flint flakes (**2131**)
  - Six fragments of flintworking debitage (**2132**)

## Needham Market and Ringshall

### *Non-Designated Heritage Assets*

- 3.3.114 A **low value** prehistoric lithics scatter (**2115**) of evidential value was recovered from farmland within the draft Order Limits, 600 m north-north-west of the B1078 and 1.35 km south-east of Ringshall.
- 3.3.115 A **low value** prehistoric flint scatter (**2116**) of evidential value was recovered from farmland largely within the draft Order Limits, 630 m north-north-west of the B1078, and 1.5 km east-south-east of Ringshall.

## Great Bricett and Bramford

### *Non-Designated Heritage Assets*

- 3.3.116 A **low value** thin scatter of multi-phase finds (**2118**) including a prehistoric flint flake of evidential value was recovered from farmland 160 m south of Bildeston Road, 1.8 km south-east of Great Bricett and within the draft Order Limits Gas Pipeline (medium pressure) route.
- 3.3.117 A single **low value** prehistoric flint flake of evidential value was recovered as part of a multi-period finds assemblage (**2119**) during the fieldwalking of a pipeline route. The linear survey area extends from within the draft Order Limits immediately east of Offton Road to Blood Hill 240 m south of the draft Order Limits and 3.8 km south-east of Great Bricett. A second **low value** prehistoric flint flake of evidential value was recovered as part of a multi-period assemblage (**2120**) from another section of the pipeline running from Blood Hill to within the draft Order Limits 100 m north-west of Flowton Road.
- 3.3.118 A black ash spread with burnt flint (**2718**) was identified on the north side of a stream on the flank of Offton Road, c. 1.9 km north-west of Flowton and partially within the draft Order Limits. Although no dating evidence was recovered, burnt flint is often an

indication of prehistoric activity and so the spread is reported here. The asset is of **low value** based on its evidential value.

## Roman Period

- 3.3.119 The Roman period is represented in Section B of the Project by archaeological remains comprising evidence of domestic activity and agricultural practice, and scatters and findspots of pottery and metalwork recorded by the Suffolk HER and by the Portable Antiquities Scheme.

### Worham, Mellis and Gislingham

#### *Non-Designated Heritage Assets*

- 3.3.120 A **high value** Romano-British and Anglo-Saxon artefact scatter (**2164**) are of evidential and historical value. The artefact scatter is located outside the draft Order Limits, near Worham. The metalwork artefact scatter is suggestive of a probable Romano-British and Anglo-Saxon period inhumation and cremation cemetery in this area. The HER notes Romano-British artefacts include copper-alloy brooches (including a 1st century, a 2nd-century headstud, and also enamelled types), coins of 1st to late 4th century; a button-and-loop fastener, and a finger ring. Early medieval (Anglo-Saxon) artefacts include a copper-alloy 5th century Germanic supporting-arm brooch and a large group of early Anglo-Saxon objects including brooches, wrist clasps, pins, girdle hangers, bucket mounts, beads and pyramidal mounts suggestive of an inhumation cemetery. Some artefacts appear to have been burnt which also suggests that cremations could also be present. A total of 193 PAS records are recorded within this land parcel, of which 83 date to the Romano-British period, including five dating to the late Iron Age to Romano-British period comprising of one bead, eight brooches, one button and loop fastener, 69 coins, one ring, one mount, one spoon and one strap fitting. The remaining PAS artefacts date to other periods and are quantified as follows:
- A total of 44 early medieval (Anglo-Saxon) artefacts including one bead, one box catch, 15 brooches, five bucket pieces, 10 buckles, two girdle hangers, four mounts (one of which is a gilded bronze crescentic mount (**2164**), two pins, three sleeve clasps and one strap fitting
  - A total of 39 medieval artefacts including one badge, one balance, two buckles, one clasp, 19 coins, one jetton, one lamp hanger, five mounts, four strap ends, three strap fittings and one stud
  - Seven medieval to post medieval artefacts have been identified including one strap fitting, one mount, one weight, one stud, one clasp, one ring and one bead
  - A total of 13 post medieval artefacts including one bell, eight coins, one ring, one hooked tag, one jetton and one knife
  - Four undated artefacts including an unidentified object and three beads
- 3.3.121 A **medium value** stretch of possible Roman road (**2144**) has been identified running between Stoke Ash to the north and Morley to the south and is of evidential and historical value. The road crosses the draft Order Limits in a north-west to south-east alignment approximately 680 m east of Mellis Road and 2.1 km south-west of Thrandeston. The road can be seen as an agger (a Romano-British period linear mound or embankment) on aerial photography, however, the course of the road has not been observed conclusively south of New Buckenham. Although not mentioned by Norfolk HER, the road also crosses the draft Order Limits in a north to south

alignment at two points within Section A within the Bressingham and the Waveney Valley sub-section. The first draft Order Limits crossing point within Section A is at Bressingham Road approximately 130 m west of Baynards Lane, and the second, to the south of this, is at Doit Lane approximately 200 m south of the A1066. The road was also excavated in 1955 (**2154**) and is discussed further below.

- 3.3.122 A **medium value** large spread of 168 metal detected finds which have been recorded by the PAS (**2162**) which are of evidential value. Of these 153 are dated to the Romano-British period. The artefacts have been identified near a Romano-British road (**2144**). Broadly the Romano-British period artefacts comprise of 139 coins, five brooches, two bracelets, one ring, two steelyard weights, one nail, one strap fitting and two pottery sherd locations. An Iron Age to Romano-British period brooch has also been recovered. The PAS artefacts dating to other time periods are listed as follows:
- A single Neolithic pottery sherd
  - An early medieval (Anglo-Saxon) brooch
  - Six medieval artefacts comprising of two coins, a weight, a strap fitting, a finger ring and a brooch
  - A post medieval belt or strap mount
  - Five further artefacts could not be dated and comprise of two unidentified objects, metal working debris, a pottery sherd and a strap fitting
- 3.3.123 Archaeological evaluation (trial trenching) of land for the A143 Scole-Stuston bypass identified **low value** assets comprising a Roman-British ditch, pottery, a coin and a brooch (**2138**) of evidential value approximately 1.1 km east of Wortham and partially within the bell-mouth of an draft Order Limits access road.
- 3.3.124 A **low value** concentration of seven PAS findspots (**2177**) of evidential value have been recorded outside the draft Order Limits on the same location as a Neolithic to Bronze Age lithic fragment (**2015**), north-west of Thrandeston. Two of these artefacts date to this period comprising of a coin and a tile fragment. Further artefacts dating to other periods are as follows:
- An early medieval (Anglo-Saxon) ring
  - Four medieval artefacts including two coins, a brooch and a jetton (token)
- 3.3.125 A **low value** PAS findspot (**2178**) of a Romano-British bow-brooch of evidential value has been recorded outside the draft Order Limits, east of Wortham.
- 3.3.126 A **low value** PAS findspot (**2175**) of seven artefacts of evidential value have been recorded outside the draft Order Limits, west of Thrandeston. Two of the artefacts are Romano-British in date comprising of a bracelet and a brooch. Three further artefacts comprising of an undated 'moniliform rod' with a row of five beads, as well as two medieval artefacts including a strap end and a hook have also been identified.
- 3.3.127 A **low value** group of 40 PAS artefacts (**2174**) of evidential value has been identified west of the draft Order Limits. Of the PAS artefacts, 23 date to the Romano-British period and comprise of 21 coins and two brooches. PAS artefacts from other time periods are outlined as follows:
- Four early medieval (Anglo-Saxon) artefacts comprising of two brooches, an unidentified copper-alloy object and a girdle hangar fragment

- Seven medieval artefacts comprising of four coins, one seal matrix, one buckle, and a lead pot mend, as well as two medieval to post medieval period artefacts comprising of a copper-alloy pottery rim fragment, and a lead cloth seal
- Three post medieval artefacts have also been recorded in the form of a uniface coin weight and two coins
- An undated collection of lead weights

- 3.3.128 A small concentration of seven **low value** PAS findspots (**2173**) of evidential value is located outside the draft Order Limits, south-west of Burgate. The Romano-British period artefacts comprise of three coins and a brooch. PAS artefacts from later periods are as follows:
- A medieval Venetian Soldino silver coin, probably of Doge Michele Steno (AD 1400 to 1413) and an incomplete copper-alloy buckle fragment
  - A post medieval copper alloy bridle boss
- 3.3.129 Archaeological evaluation and subsequent excavation on land at St John's House Hospital identified a series of **low value** Romano-British ditches, a possible palisade and a large rubbish pit (**2140**) of evidential and historical value, which contained a small finds assemblage comprising pottery, animal bone, a ring and a coin. The site is located immediately south of Lion Road c. 1.3 km east-north-east of Wortham, 50 m south-west of the draft Order Limits.
- 3.3.130 A small scatter of **low value** Romano-British tile and pottery (**2114**) comprised mainly of grey wares and a small amount of late Rom shell-tempered pottery of evidential value was found on land north of Lion Road, c. 100 m north-west of the archaeological remains noted above (**2140**), approximately 1.3 km north-east of Wortham and 120 m west of the draft Order Limits.
- 3.3.131 **Medium Value** Romano-British road-side activity (**2153, 2155, 2122**) of evidential and historical value and has been noted between approximately 350 m and 600 m west of the draft Order Limits access route, 600 m west of the draft Order Limits, 50 m west of Romano-British road (**2144, 2154**) and immediately south-east of Wortham. The evidence was identified by Basil Brown during pipelaying in 1955 to the west of Iron Age (**2069**) and Saxon (**2195**) activity identified during the same project to the east. The evidence comprised of a large multi period site on a field known as Croft Mead, between Honeypot Farm and Beans Lane. An east to west aligned Romano-British ditch runs the field to intersect with the north to south aligned Romano-British road (**2144** and **2154**). Smaller ditches were also found containing pottery sherds, including plain Samian ware, kiln roof debris and wasters, animal bones and oyster shell on a north to south alignment, with a complete deer skeleton also found at one of the ditch intersections. Medieval period evidence was also identified in the form of building debris and artefacts, particularly to the west of the site. (Heritage Suffolk and Smedley, 1956). Settlement activity has also been noted during evaluation trenching in 2016 (**2155**) comprising of ditches, pits and postholes dating to the Romano-British, medieval and post medieval periods and also comprised of a quantity of mid-1st to early 2nd century pottery in one of the ditches. Soot was visible on the exterior of the pottery suggesting possible nearby domestic activity. A number of medieval pits and ditches were also identified likely to relate to nearby building plots close to the medieval settlement core of Wortham (Heritage Suffolk).
- 3.3.132 A **low value** complete copper alloy nail (**2543**) is found within the draft Order Limits, c. 300 m east of Gislingham.

- 3.3.133 Within Gislingham, a **low value** Roman button and loop fastener (**2319**) was found. This asset has evidential and historical value.

### **Finningham, Mendlesham and Old Newton**

#### *Non-Designated Heritage Assets*

- 3.3.134 The **low value** site of a probable Romano-British building (**2151**) is of evidential and historical value.
- 3.3.135 In this region is an artefact scatter identified by the PAS in the form of Iron Age, Romano-British and early medieval (Anglo-Saxon) metalwork, one sherd of a Samian type bowl, as well as some Bronze Age worked flints (**2043**) as reported above. The PAS artefacts include two further findspots not included under **2043** as follows:
- A worn and incomplete copper-alloy Rosette brooch of Iron Age to Romano-British date (**2102**)
  - A copper-alloy fragment of an unidentified likely post medieval object in the form of a tapering sub-rectangular bar with a transverse break at the narrow end (**2152**)
- 3.3.136 A large multi-period concentration of 1552 PAS artefacts (**2166**) of collective **medium value** (individually these assets are of **low value**), and evidential and historical value have been identified within and outside the draft Order Limits, around Wickham Street. Of these artefacts 1204 are recorded as Romano-British and broadly comprise of 907 coins, 122 jewellery pieces (brooches/ pendants/ beads/ rings/ bracelets/ hair pins), and 175 showing further evidence of settlement and industrial activity (85 vessels, an architectural fragment, a bell, two boxes, a brick, two buckles, two cosmetic mortars, a figurine, four furniture fittings, a gaming piece, a harness fitting, two harness pendants, two knives, two keys, two locks, two pieces of metalworking debris, two mirrors, a small possibly votive axe, a mortarium, three mounts, two nail cleaners, 14 pins, a punch, a razor, a seal, four spoons, two steelyard arms, a steelyard hook, three steelyard weights, three strap ends, a strap fitting, two studs, a tegula, a tile, a toilet implement, three tweezers, two weights, four fragments of window glass, and 11 unidentified objects). A number of further artefacts of from other periods are outlined by the PAS as follows:
- Two records of Mesolithic to Neolithic, and one Mesolithic to Neolithic flint fragments and debitage
  - One record of a Neolithic flint long flake, six records to Neolithic to Bronze Age flint flakes and debitage, and 18 records of Neolithic to Iron Age flint flakes and tools
  - Seven Bronze Age records comprising of two flint flake assemblages, metal working debris, a socketed axe, an incomplete axe, a spearhead fragment and a razor. There are 10 further findspots of Bronze Age to Iron Age date comprising of seven records of flint flakes and tools, and three records of pottery sherd locations
  - Eight Iron Age records comprising of five coins, two of pottery sherds and a strap fitting. Eight further Iron Age to Romano-British artefacts comprising of six brooches, a harness fitting and a cosmetic mortar have also been identified
  - There are 62 early medieval (Anglo-Saxon and Viking Age) records comprising of a coin, 45 brooches, a buckle, a girdle hanger, a key, an ingot, a mount, four sleeve clasps, a spindle whorl, a strap fitting, and four pottery sherd locations

- There are 81 medieval records comprising of a box, a brooch, 12 buckles, 30 coins, a figurine fragment, two harness mounts, a jetton, a key, three mounts, a pendant, a pin, a purse hangar, four seal matrix', two strap ends, five strap fittings, two thimbles, three tokens, nine pottery sherd locations, and an unidentified object. There are 10 further medieval to post medieval artefacts recorded in the form of six pottery sherd locations, three buckles and a strap fitting
- There are 44 post medieval records comprising of a book fitting, three buckles, a button, two cloth seals, 16 coins, a coin weight, a dress hook, six jettons, a knife, a mount, a pin, a rivet, a spur, five strap fittings, a token and two unidentified objects
- A further 96 artefacts have been recorded where a date could not be confirmed and they broadly comprise of 43 pieces of metal working debris, 17 unidentified objects, three rings, four animal remain locations, six weights, six pottery sherd locations, three furniture fittings, two spindle whorls, two nails, a knife, a spoon, a brooch, a chain, a rivet, a possible sickle blade, a possible strap fitting mount, and a whetstone

3.3.137 A **low value** Romano-British pottery scatter (**2157**) of evidential value were identified during a fieldwalking survey at Long Cooks. The artefacts are recorded within a parcel of land that crosses within the draft Order Limits, 500 m north of Mendlesham Road, and 1.5 km west of Cotton. A similar Romano-British period artefact scatter has also been identified at Mary's Field (**2158**) approximately 160 m to the south of **2157**, approximately 100 m west and 115 m east of the draft Order Limits.

3.3.138 Two **low value** sherds of Romano-British pottery (**2156**) of evidential value were identified during a fieldwalking survey at Berrys Meadow. The artefacts are recorded approximately 90 m south-east of the draft Order Limits, 50 m south-west of Oak Farm Lane, and 1.1 km west of Mendlesham.

## Middlewood Green and Stowmarket

### *Non-Designated Heritage Assets*

3.3.139 A **low value** PAS findspot (**2180**) A copper-alloy coin of evidential value is located within the draft Order Limits, south-east of Creting St. Peter.

3.3.140 A **low value** scatter of Roman pottery with a small amount of tile (**2163**) of evidential value have been recovered during fieldwalking near Stowupland. The PAS records 27 findspots within the land parcel of which 18 date to this period and comprise of 12 coins, five brooches and a figurine of the god Mercury. Two further artefacts possibly dating to this period include an unidentified copper-alloy object and a lead-alloy loom weight. The following artefacts were found to date from later periods as follows:

- Two early medieval artefacts including a zoomorphic stirrup and a lead-alloy weight
- Three medieval artefacts including a copper-alloy bar mount, a copper-alloy fragment of a figurine likely depicting Jesus Christ, and a clipped silver coin
- Two post medieval artefacts including a complete two-disc lead cloth seal and a cast copper alloy mount

3.3.141 A number of **low value** Romano-British period Samian pottery sherds and horseshoes found at Park Farm (**2150**) are of evidential value. The artefacts are located approximately 80 m west of the draft Order Limits pipeline works, 770 m west

of the draft Order Limits, 440 m south-west of Creeping Road and 750 m east of Stowupland.

## Needham Market and Ringshall

### *Non-Designated Heritage Assets*

- 3.3.142 Iron Age, Romano-British and early medieval (Anglo-Saxon) period metalwork (**2071**, **2085**, **2165**) has been identified within a land parcel containing the draft Order Limits. A series of undated field boundaries mapped by the NMP to the east have the potential to be associated with this period. Individually these assets are of **low value**, however collectively these assets are of **medium value** and evidential value. The Iron Age material is discussed in the appropriate section above. The PAS record a total of 89 PAS records within this land parcel, a majority of which are Romano-British artefacts including 62 coins, four brooches, two rings and an oval lead weight. Later period artefacts include:
- Two early medieval artefacts in the form of an incomplete sceate and an early medieval to medieval copper-alloy hooked tag
  - A medieval silver farthing dating between AD 1227 and 1327
  - Four post medieval artefact have also been recovered in the form of a worn silver threepence of Elizabeth I (AD 1561 to 1582), a copper-alloy shoe or knee-buckle frame, a copper-alloy mount or belt stiffener, and a copper-alloy Charles I rose farthing (AD 1625 to 1649)
- 3.3.143 A **low value** concentration of four PAS findspots (**2185**) of evidential value are located outside the draft Order Limits, north-west of Needham Market. The finds comprise of a mount, brooch, coin and an unidentified object, possibly a lock.
- 3.3.144 A **low value** PAS findspot of a copper alloy coin (nummus) of Crispus dating to approximately AD 317 (**2168**) of evidential value has been recovered outside the draft Order Limits, south of Badley Hill (road) and north-east of findspot concentration (**2165**). Two **low value** coins (**2169**, **2172**) of evidential value are also recorded to the south-east of **2168**, as is a similarly valued copper lion mount (**2170**) to the south-west of **2168**, and a post medieval incomplete Elizabeth I silver sixpence coin (**2171**) to the south-west of (**2168**).
- 3.3.145 A **low value** Romano-British hoard (**2181**) of evidential and historical value have been identified south-east of the draft Order Limits at Badley Hill. The hoard consists of a bronze bowl or vessel with zoomorphic handles, ornamented with enamel, a shallow bronze bowl, with pair of rings on each side for attaching the handles; and a pot of coin, broadly of Antonius Pius (AD 138 to 161).
- 3.3.146 A Roman pottery vessel full of silver denarii of Antoninus Pius (AD 138-161) (**2111**) possibly associated with early Saxon bronze vessels found during the 19th century construction of the railway at Gate Ford. Two possible locations for the findspot are suggested by the Suffolk HER; the first 160 m north-east of the B1113 Stowmarket Road, 500 m north-west of Needham Market and adjacent to the draft Order Limits; the second 100 m north-east of the B1113 Stowmarket Road, 170 m north-west of Needham Market and 260 m south-east of the draft Order Limits. The hoard is of **low value** based on evidential value.
- 3.3.147 A **low value** puddingstone quern (**2112**) of evidential value was found in a field to the north of Moat Farm in the 1960s. The findspot is approximately located 60 m north of the B1078, 1.7 km south-east of Ringshall and 60 m north-east of an draft Order Limits.

- 3.3.148 A widespread and dense scatter of Roman artefacts (**2134**) of evidential value has been recovered from farmland within the draft Order Limits, north of the B1078, and south-west of the centre of Barking. The asset also includes an HER record of a scatter of Romano-British pottery (**2135**). The individual assets are of **low value**, however, the scale and density of the assemblage strongly suggests the presence of Romano-British settlement activity and the presence of below ground archaeological remains that could be of **medium value**. The finds assemblages (**2134** and **2135**) were recovered from land to the south of a section of a **medium value** Roman road (**2137**) of evidential and historical value that represents Margary 34a road from Coddenham to north-east of Long Melford (Margary 1967). The presence of the road strongly supports the suggestion that the asset represents settlement activity and trade facilitated by the road.
- 3.3.149 Between Needham Market and Ringshall are 694 PAS findspots, 598 date to the Romano-British period in the form of 19 brooches, 2 bracelets, a buckle, a button, a button and loop fastener, a chain, 514 coins, a fastening, a zoomorphic (turtle/tortoise) figurine, five finger rings, two furniture fittings, two keys, two locks, five metalworking debris locations, a lead miniature axe, a mount, two pins, a ring, a steelyard balance arm, a steelyard weight, two strap fittings, two tiles, 28 pottery sherd locations and two unidentified copper-alloy objects. PAS evidence also identified artefacts from other periods as follows:
- A Bronze Age incomplete copper-alloy sword or dagger blade fragment (**2060**)
  - Two Iron Age to Romano-British incomplete copper-alloy artefacts, one zoomorphic vessel mount, and one centre-looped cosmetic mortar
  - Four early medieval findspots including two strap fittings, a pottery sherd and a terminal collar from a cross-staff
  - A total of 27 medieval findspots including a brooch, five buckles, seven coins, a harness pendant, three mounts, a ring, a strap end, three strap fittings and five pottery sherd locations. Five further medieval to post medieval artefacts have also been identified including a lead weight, a thimble, a ring, a bell and a mount
  - A total of 21 post medieval artefacts including three buttons, seven coins, two mounts, a spur, a thimble, a tile, a token, three pottery sherd locations, and two weights
  - A modern period lead food seal has also been identified
  - A total of 36 further artefacts have been identified which could not be dated comprising of an architectural fragment, a copper-alloy blade, a coin, 20 metal working debris locations, two mounts, a pottery sherd location, a ring, an unidentified object, six weights, a whetstone, and a worked object
- 3.3.150 A collectively **medium value** Romano-British artefact scatter (**2159**) of evidential and historical value has been identified during a metal detector survey. This asset groups together 67 PAS finds identified during the survey within the draft Order Limits near Barking. Broadly the metalwork artefacts would be of **low value** when considered individually and comprised of coins, brooches, a bracelet, a strap fitting. Pottery was also recorded including Samian ware although the location of this does not seem to be recorded by the HER or PAS. Broadly, 47 of the artefacts date to the Romano-British period and comprise of two brooches, a bracelet, 44 coins and a strap fitting. Further artefacts for other periods comprise:
- A prehistoric concentration of 47 stone implements

- Three medieval period coins and a medieval to post medieval candlestick holder
  - Thirteen post medieval artefacts were also identified including seven coins, a pin, two pottery sherd locations, a purse, and two strap fittings
  - A further unidentified and undated copper-alloy object was also identified
- 3.3.151 A **low value** concentration of 12 PAS findspots (**2184**) of evidential value are located outside of the draft Order Limits south of Barking. Two of these artefacts date to this period and comprise of an incomplete brooch and a pottery sherd location. The following artefacts date to other periods as follows:
- Five medieval artefacts comprising three coins, a strap fitting and a buckle
  - Three post medieval artefacts including two buckles and a jetton
  - Two undated artefacts including a copper-alloy ring and metal working debris
- 3.3.152 A **low value** PAS findspot (**2183**) of a coin of evidential value is located north-west of the draft Order Limits pipeline works, east of Ringshall.
- 3.3.153 South of Barking, east of the draft Order Limits, is a concentration of PAS artefacts and two HER Record (**2541**). There are seven Roman PAS artefacts comprising pottery, coins and jewellery. Also, the following artefacts date to other periods as follows:
- Twenty-eight medieval artefacts comprising coin, vessel, buckle, purse, mount, ring, token and jetton
  - A HER record of a medieval vineyard, recorded in the Domesday survey of 1086
  - Forty-four post medieval artefacts
  - A fragment of copper alloy metalworking debris of uncertain date
- 3.3.154 They all have evidential value and are of **medium value**.
- 3.3.155 A further scatter of **low value** Romano-British metal finds and pottery (**2141**) of evidential value is recorded south-west of Barking and outside the draft Order Limits. The assemblage comprises 26 copper alloy coins, a complete copper alloy late Roman belt stiffener, a fragment of tile and over 100 pottery sherds. These may constitute further evidence of roadside settlement and/or trade.
- 3.3.156 A reputed assemblage of 200 Roman coins (**2136**) of evidential value was recovered from farmland c. 1 km south-west of the centre of Barking, just to the north of the Roman road (**2113**) noted above and 190 m east-north-east of the draft Order Limits. This siting of this **low value** asset appears to be unclear, but if valid, it provides more evidence of Roman-British roadside activity.
- 3.3.157 A **low value** scatter of metalworking debris including an armlet and a butterfly mount dress fastener (**2137**) of evidential value were recovered by a metal detectorist from farmland 740 m north-west of the centre of Barking, 340 m south-south-west of Hascott Hill and 180 m south-east of the draft Order Limits.
- 3.3.158 A **low value** scatter of Romano-British pottery (**2139**) comprising one sherd of Oxford ware and six sherds of greyware of evidential value was recovered from farmland south-west of the centre of Barking and partially within the draft Order Limits. It is possible that this small assemblage (**2139**) is the result of peripheral activity associated with a possible settlement site.

- 3.3.159 A **low value** bronze handle from a wax spatula (**2160**) of evidential value was found by metal detector near Forward Green.

## **Great Bricett and Bramford**

### *Non-Designated Heritage Assets*

- 3.3.160 A **low value** concentration of 30 PAS findspots (**2187**) of evidential and historical value are located within the draft Order Limits south of Bildeston Road, west of Offton. Of these artefacts 13 date to this period and comprise of six coins, five brooches, a pendant and a stud or mount. The remaining artefacts date to other time periods as follows:
- One early medieval strap end
  - A total of 13 artefacts including 10 coins, one buckle, one strap end and one seal matrix
  - Two post medieval artefacts including a coin weight and a token
- 3.3.161 A **low value** scatter of grey ware pottery sherds, four late third century BC coins, a fantailed brooch and fragment of a head stud brooch, a key, further coins and brooches and seal box lid (**2110**) of evidential value were found on disturbed soil along the route of the Bramford to Wattisham gas pipeline (the trench was not seen open). The site is located partially within the draft Order Limits, immediately south of Bildeston Road and 1.7 km south-east of Great Bricett.
- 3.3.162 A thin scatter of **low value** Romano-British pottery (**2142**) of evidential value was recovered from farmland during fieldwalking along the route of the Bramford to Wattisham pipeline c. 2.1 km south-east of Great Bricett and partially within the draft Order Limits.
- 3.3.163 Fieldwalking along the route of the Bramford to Wattisham pipeline identified a further **low value** pottery scatter with some tile fragments (**2143**) of evidential value c. 3 km south-east of Great Bricett and partially within the draft Order Limits pipeline works.
- 3.3.164 A **low value** metal detected Romano-British period metalwork scatter (**2149**) of evidential value has been identified south of the draft Order Limits, and south of Offton.
- 3.3.165 A **low value** PAS location of six artefacts (**2179**) dating to this period of evidential value have been recorded east of the draft Order Limits, west of Willisham Tye. The artefacts comprise of four coins, a strap stud or mount and a key.
- 3.3.166 A **low value** Romano-British artefact scatter (**2161**) of evidential value has been recorded as metal detector finds outside the draft Order Limits, near Offton.
- 3.3.167 A **low value** concentration of 47 PAS findspots (**2186**) of evidential value are located outside the draft Order Limits, south of Bildeston Road, and west of Offton. Of the artefacts 36 date to this period and comprise of 26 coins, five brooches, three bracelets, one nail and an unidentified object. Artefacts dating to other periods were also identified and are outlined as follows:
- One Iron Age coin and an Iron Age to Romano-British brooch
  - One early medieval (Anglo-Scandinavian) buckle frame
  - Six medieval artefacts including four coins, one harness fitting and pottery fragments

- Two post medieval finds comprising of a lead and iron drop weight and a lead toy cannon

3.3.168 A **medium value** area of Romano-British occupation is indicated south-east of Tollemach Hall (**2145**) south-west of the draft Order Limits, and south-east of Great Bricett. Settlement activity has been identified through cropmark observations on aerial imagery.

3.3.169 In this region are 27 PAS finds (**2146**). Of the PAS finds, 24 date to the Romano-British Period and comprise of 17 coins, one ring, one steelyard weight, one nail, one mirror one harness fitting and two pottery sherd locations. Three further medieval to post medieval artefacts have also been identified comprising of a lead pot mend, a cooper-alloy pot fragment and a strap fitting.

## Early Medieval

3.3.170 The early medieval period is represented in Section B of the Project by artefact scatters and findspots of pottery and metalwork recorded by the Suffolk HER and by the Portable Antiquities Scheme.

### Wortham, Mellis and Gislingham

#### *Non-Designated Heritage Assets*

3.3.171 A **low value** concentration of 17 PAS artefacts (**2176**) of evidential value have been identified west of the draft Order Limits and south-west of Palgrave. Five of these artefact date to this period comprising of four brooches and a coin. Further artefacts dating to later periods are as follows:

- Eight early medieval (Anglo-Saxon) artefacts including six brooches, a pendant and a sleeve clasp
- Three medieval artefacts including a strap fitting, a brooch and a finger ring
- One post medieval hooked tag

3.3.172 A **low value** PAS findspot of an early medieval (early Anglo-Saxon) incomplete copper-alloy cruciform brooch (**2205**) is located within the draft Order Limits, south of the A143, and east of Wortham. This asset is of evidential value.

3.3.173 A **low value** outline record of an early medieval (Anglo-Saxon) girdle hangar (**2198**) is located near Gislingham and is of evidential value.

3.3.174 Seven PAS artefacts (**2182**) are also located near Gislingham and are of evidential value. The PAS finds include three early medieval (Anglo-Saxon) artefacts including a coin, a buckle and a brooch as well as artefacts from other periods in the form of:

- A Romano-British brooch
- A medieval coin
- Two post medieval artefacts including a coin and a ring

3.3.175 A **low value** concentration of seven PAS finds (**2182**) of evidential value are located north-east of the draft Order Limits, east of Gislingham.

3.3.176 A **low value** early medieval silver coin (**2199**) has been recorded outside of the draft Order Limits, near Wortham. This artefact is of evidential value.

- 3.3.177 A **low value** small concentration of two early medieval PAS artefacts (**2203**) are recorded north-west of the draft Order Limits, and north-east of Long Green. The artefacts comprise of an incomplete copper-alloy early Anglo-Saxon long brooch and the foot of second a copper-alloy long early Anglo-Saxon brooch.
- 3.3.178 A **low value** early medieval (Early Anglo-Saxon) inhumation (**2191**) was identified during an excavation at St. John's House Hospital, later disturbed by a modern period pit approximately 80 m south-west of the draft Order Limits, 60 m south of Lion Road, and 1.5 km south-west of Palgrave. This asset is of evidential and historical value.
- 3.3.179 An early medieval axe-shaped mount (**2204**) of evidential and historical value has also been identified by the PAS south-west of the draft Order Limits, and south of Lion Road in the region of the inhumation. If further assets similar to these are uncovered within the surrounding area these assets could be considered of **medium value**.
- 3.3.180 A **low value** concentration of eight PAS artefacts (**2206**) of evidential value are located north-east and north-west of the draft Order Limits, south of the A143, and east of Wortham. Five assets at this location date to this period and comprise of a silver ingot, a sleeve clasp, a whetstone and two brooches. Three further artefacts dating to different periods are also recorded as follows:
- One Bronze Age fragment of metal working debris
  - An Iron Age fragment of pottery (**2076**)
  - A medieval period key
- 3.3.181 A **low value** scatter of seven PAS artefacts is recorded at this location of which five date to the early medieval period including two bronze stirrup terminals, a bridle fitting, a strap end and a brooch (**2196**) are noted near Mellis. This asset is of evidential value.
- 3.3.182 The archaeological monitoring of a pipeline in 1955 identified an Iron Age 'hut site' (**2069**) and another 'hut' of possible early medieval (Anglo-Saxon) date (**2195**). Ditches found on site were also found to contain 'black earth' deposits often found during this period as well as burnt stones, animal bones, worked flint and pottery sherds described as brownish black with some having fingertip ornamentation. It is likely these remains constitute the remains of **medium value** settlement activity of evidential and historical value.
- 3.3.183 A **low value** artefact scatter (**2193**) has been identified west of the draft Order Limits, south of Thornham Road and east of Gillingham and are of evidential and historical value. A group of 40 PAS artefacts (**2174**) of which four early medieval artefacts have been recovered and are discussed below are also located within the region of this location. The artefact scatter (**2193**) suggests this is an area of possible Anglo-Saxon domestic occupation identified by pits, postholes and pottery, as well as some evidence of medieval and post medieval activity.

## Finningham, Mendlesham and Old Newton

### *Non-Designated Heritage Assets*

- 3.3.184 A **low value** early medieval artefact scatter (**2281**) of evidential value is recorded at 'Bratts Field' approximately 10 m south of the draft Order Limits, immediately south of Mendlesham Road, and 1.3 km north-west of Mendlesham. A fieldwalking survey identified 12 early medieval pottery fragments.

## Needham Market and Ringshall

- 3.3.185 A **low value** artefact scatter (**2190**) dating to this period and of evidential value are recorded approximately 250 m east of the draft Order Limits, and 350 m north-west of Needham Market at their closest point. The artefacts were identified via metal detector and include fragments of a possible mid. to late Anglo-Saxon period double-hooked fastener and a 9th century strap end. Later period artefact has also been identified as follows:
- Four medieval artefacts comprising of a token, strap end, buckle and a seal
  - Eight post medieval artefacts comprising of two coins, two bells, a buckle, a strap fitting, a seal and a token
- 3.3.186 A **low value** PAS findspot dating to this period of an incomplete copper-alloy stirrup (**2200**) of evidential value is located north-west of the draft Order Limits, west of Barking.

## Great Bricett and Bramford

### *Non-Designated Heritage Assets*

- 3.3.187 A **low value** PAS findspot of an incomplete copper-alloy disc brooch (**2201**) of evidential value is located north of the draft Order Limits, north-east of Burstal Hill. The brooch dates to the early medieval (Anglo-Scandinavian) period.
- 3.3.188 A **low value** metal detected early medieval (early Anglo-Saxon) wrist clasp (**2197**) has been identified within a metal detected scatter near Little Somersham. This asset is of evidential value.
- 3.3.189 A **low value** early medieval (Anglo-Saxon) artefact scatter of bronze bowls (**2194**) has been identified during the construction of the railway in the 19th century at 'Gate Ford', within the draft Order Limits overhead line route, 160 m south-east of the draft Order Limits, 100 m north-east of Badley Hill, and 550 m north-west of Needham Market. This asset is of evidential value.
- 3.3.190 A **low value** concentration of artefacts (**2192**) has been identified approximately 160 m north-east of the draft Order Limits, 5 m north-east of Ipswich Road, and 730 m north-west of Little Somersham. Of the artefacts two sherds of earl-medieval pottery have been recovered, as well as undated burnt flint and post medieval pottery, brick and clay pipe. These artefacts are of evidential value.
- 3.3.191 A **low value** artefact scatter of early medieval (late Anglo-Saxon) artefacts including a bronze mount, three coins of Ethelred II, a cut halfpenny of Cnut and a later medieval period papal seal (**2188**) have been identified approximately 430 m east of the draft Order Limits substation compound and temporary attenuation pond, along Bullen Lane, and 1 km west of Bramford. These artefacts are of evidential value.

## Medieval

- 3.3.192 The Medieval period is represented in Section B of the Project by archaeological remains comprising evidence of domestic activity, agricultural practice and a moated site, and scatters and findspots of pottery and metalwork recorded by the Suffolk HER and by the Portable Antiquities Scheme.

## Wortham, Mellis and Gislingham

### *Designated Heritage Assets*

#### Wortham CP

- 3.3.193 The Grade I listed 'Church of St Mary the Virgin' (**1032741**) is located c. 1.6 km north of the centre of Wortham, immediately north of Wigwam Hill and c. 1.4 km west-south-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The asset has a 12th, possibly 11th century round tower, whilst the nave, aisles and chancel date to the mid to late 14th century. The clerestory was added in the early 15th century with alterations c. 1790 and restoration in 1856 and 1891-3. The church is constructed of flint rubble with some herringbone coursing in tower. The dressings are of ashlar and red brick, the aisles are cement rendered and it has glazed pantile roofs. The three-stage west tower, which is derelict, has a diameter of 29 feet, is 62 feet high and is said to be the largest Norman round tower in England.
- 3.3.194 The setting of the asset is informed by its surrounding graveyard, which is defined by high, tree lined hedgerows largely obscuring views in and out. The setting is further informed by the asset's relationship with the Grade II listed Wortham War Memorial (**1470613**), which is located at the southern edge of the graveyard. There are some broken views to the Hall Farm complex to the north, which includes two post medieval Grade II listed assets further informing setting, as does the surrounding agricultural landscape with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to distance, its mature graveyard and screening in the intervening landscape by development and mature tree lined hedgerows and copses, the setting does not extend to the draft Order Limits.
- 3.3.195 The Grade II listed 'Willow Corner Cottage' (**1032772**) is located on the western flank of Church Lane, at the northern limits of Wortham and c. 1.5 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, and historical values. The asset dates to the early 16th century and comprises a plastered timber frame, two storey house. A chimney stack and floor were inserted, and a parlour bay added in the early 17th century with further alterations occurring in the 20th century.
- 3.3.196 The setting of the asset is informed by its roadside village location and by its mature tree lined grounds. The setting is further informed by the asset's relationships with two post medieval Grade II listed buildings in the village to the south and by the surrounding agricultural landscape with which the asset has a historical relationship. twenty-first century residential development to the east has slightly eroded the asset's link to the agricultural land, but the buildings are sympathetic and are of the local architectural vernacular. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its restricted village nature, the setting does not extend to the draft Order Limits.

#### Palgrave CP

- 3.3.197 The Grade I listed 'Church of St Peter' (**1032776**) is located at the heart of the settlement of Palgrave, within the Palgrave conservation area (**CA46**) and c. 1.4 km east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church has 14th century origins, a 15th century nave and south porch, an early 18th century cancel and was restored in 1861. The church is constructed of flint rubble, largely knapped, some squared, with flushwork in the south porch. There are ashlar

dressings, and the chancel sits on a red brick plinth. The steeply pitched roof is topped with plain tiles.

- 3.3.198 The setting of the asset is informed by its location at the centre of the settlement of Palgrave, which itself was recorded in the Domesday Book. The setting is further informed by its situation of the fossilised medieval street plan and by its relationship with several medieval and post medieval listed buildings arranged around the core of the settlement. The setting is further informed by the church's graveyard, which includes mature trees and is defined by a low flint and red brick wall. There has been some limited 20th century residential in-fill development, but this is largely sympathetic to the local architectural vernacular. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its enclosed situation within the settlement, the setting does not extend to the draft Order Limits.
- 3.3.199 The Grade II listed 'Bridge Farm House' (**1182078**) is located on the southern edge of Diss, 910 m north-north-west of the centre of Palgrave and 730 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, and historical values. The asset comprises a 15th century timber frame house, which was partially rebuilt and altered in the 16th century and a chimney stack was inserted in the 17th century. The roughcast asset was reroofed with pantiles and partly encased in colourwashed bricks during the 19th century.
- 3.3.200 The setting of the asset is informed by its location within the wider former Bridge Farm complex and by its river valley location with the Waveney river c. 80 m to the north. The setting is further informed by the asset's relationship with the post medieval Grade II listed elements of the farming complex Bridge Farm Cottages (**1032785**) and Denmark Bridge House (**1352269**), which are reported in the appropriate section below. The surrounding agricultural landscape, with which the asset has a historical and former functional relationship, also informs the setting. The former farming complex has, however, been divided up in to separate residences with associated property boundaries. The setting of the asset, therefore, makes a moderate contribution to the value of the asset, but due to its setting being restricted to its former farmyard location and the immediate agricultural landscape, it does not extend to the draft Order Limits.

### Thrandeston CP

- 3.3.201 The Grade I listed parish 'Church of St Margaret' (**1032763**) is located on the eastern outskirts of Thrandeston, within the Thrandeston conservation area (**CA43**), on the north flank of the unnamed east/west aligned road that runs through the settlement and c. 1.6 km east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The church predominantly dates to the 15th century, although a 13th century chancel survives. The asset was restored c. 1870-80. The asset is built of knapped flint with ashlar dressings and all but the tower is rendered with cement.
- 3.3.202 The setting of the asset is informed by its location on the eastern edge of the settlement of Thrandeston, which itself is mentioned in the Domesday Book. The setting of the asset is further informed by its location on the fossilised medieval street plan of the settlement, although views to the built elements of the village to the west are obstructed by the mature hedged boundary and tree cover of the church's graveyard. There is a more open view to the south, which takes in elements of the Church Farm complex and agricultural land with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its enclosed location within the settlement, the setting does not extend to the draft Order Limits.

- 3.3.203 The Grade II listed 'Rectory Farm House' (**1352256**) is located 140 m west of an unnamed road, 170 m south-south-west of New Road, c. 820 m north-east of Thrandeston and c. 1.9 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the early-to-mid 16th century, it had a chimney stack inserted in the 17th century, was altered and extended in the 19th century and was further altered in the 20th century. the asset comprises a plastered timber frame structure with brick extensions and some brick casing.
- 3.3.204 The setting of the asset is informed by its secluded farmyard location and by its relationship with its non-designated outbuilding. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and functional relationship. The outbuildings, however, appear to be largely later 20th century in date and have replaced the farming complex recorded on the first edition OS map of 1885. The boundaries of the farming complex are defined by mature tree belts affording the asset seclusion and privacy. Due to the loss of the earlier farm buildings, the setting of the asset makes a moderate contribution to its value, but due to overall distance and screening by the farmyard boundaries and the topography, development, vegetation and infrastructure of the intervening landscape, the setting does not extend to the draft Order Limits.

### Burgate CP

- 3.3.205 The scheduled monument 'Burgate Hall moated site' (**1017331**) is located in Burgate, c. 1.5 km south of Worham, 300 m west of the Church of St Mary (**1032797**), 500 m north of the draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. The moat surrounds a sub-rectangular central platform which has maximum internal dimensions of 95 m north/south by 65 m east/west and is raised approximately 0.5 m above the prevailing ground level except at the southern end. The western, northern and eastern arms of the moat range between 9 m and 13 m in width and remain open containing water up to a depth of up to 1.75 m. The southern arm has been partly infilled allowing access to the interior.
- 3.3.206 The Grade II\* listed 'Hall Farm House' (**1352234**) stands just inside the inner edge of the southern arm of the scheduled moat. The asset is of **high value** based on its designation and its evidential and historical values. The farmhouse is likely to be part of a former larger house or, possibly, a court hall built around 1400, potentially for Sir W. Burgate. The larger building was probably part demolished and reordered in 1587 and then altered and extended in the 19th century. The house is plastered timber frame structure with red brick additions and a steeply pitched plain tiled roof. The house is excluded from the scheduling, although the ground beneath is included.
- 3.3.207 The setting of the scheduled monument and listed building is shared and informed by their long historical relationship, by their relationship with the scheduled monument 'Medieval ringwork in Burgate Wood' (**1016699**) 150 m to the east, by their relationships with the Grade II\* listed Church of St Mary (**1032797**) 300 m to the east and the Grade II listed, post medieval 'Barn About 70 m South East of Hall Farm House' (**1032798**). The setting is further informed by their relationships with the non-designated buildings of the working farm complex, several of which are recorded on the first edition OS map of 1885. Although there has been some small-scale residential development 320 m to the east along the western flank of sycamore view north of the church, the surrounding agricultural landscape also contributes to the assets' setting. The setting of the assets, therefore, makes a considerable

contribution to their values, but due to overall distance and partial screening by mature tree lined hedgerows, the setting does not extend to the draft Order Limits.

- 3.3.208 The scheduled monument 'Medieval ringwork in Burgate Wood' (**1016699**) is located within Burgate Wood, 150 m west of the Burgate Hall moated site scheduled monument (**1017331**), 380 m north of the draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. The ringwork survives as a sub-circular enclosure with maximum overall dimensions of approximately 76 m north-south by 70 m east-west, surrounded by a ditch and inner bank. The ditch, which ranges between 8 m and 15 m in width and occasionally contains water, has become partly infilled, but remains open to a depth of up to 2.2 m, measured from the external ground surface. The bank, constructed of earth quarried from the ditch, is up to 10 m wide at the base and still stands to a height of around 1 m, although originally it would have been higher and surmounted by a timber palisade. The ringwork is believed to be the site of a medieval manor house, probably dating from soon after the Norman Conquest, and fragments of pottery found on the site provide evidence of occupation during the 11th and 12th centuries. According to the Domesday survey of 1086, there was a substantial manor in Burgate before 1066, held by a free man named Wulfwin. After the Conquest the tenant was Adelhelm under the overlordship of Aubrey de Vere, and by the 13th century it was held by the de Burgate family, thought to be descendants of Adelhelm, in whose hands it remained until the early 15th century. The ringwork was probably abandoned when the moated manor house to the east of it was constructed.
- 3.3.209 The setting of the asset would have been informed by its relationships with the Grade II\* listed Church of St Mary (**1032797**) and the Burgate Hall moated site scheduled monument (**1017331**) and the Grade II\* listed Hall Farm House (**1352234**), which likely constitute its manorial successor. Its location within the wood, however, has completely its links to the historic landscape, and so the setting of the asset does not contribute to its value and does not extend to the draft Order Limits.
- 3.3.210 The scheduled monument 'Moated site at Stubbing's Entry' (**1016700**) is located c. 1.4 km south-west of the centre of Mellis, immediately south and west of Slough Road and c. 530 m west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. The monument comprises a moated site located at the western end of Stubbing's Green, against the parish boundary between Burgate and Botesdale to the north. It is identified as the home of the De Stebbing family who are documented in local records of the 13th century. An early 14th century document refers to 'land called Stubbynge' belonging to Bury St Edmund's Abbey. The moat, which contains water, ranges in width from about 5 m on the north side to 12.5 m on the south and remains open to an average depth of 1.8 m, surrounding all but the south-western part of a sub-rectangular central area with overall internal dimensions of approximately 117 m east/west by 85 m north/south. It is thought that the moat continues as a buried feature around the south-western part of the enclosure, where the line of the infilled southern half of the western arm is marked by a shallow, east facing scarp. The central area is divided into two enclosures by an internal extension of the moat approximately 11 m wide and originally continuous, which runs northward from the southern arm for a distance of about 50 m, with a shorter length of about 15 m, offset to the west, running southward from the northern arm. Between the two is an infilled section, marked by a depression about 0.5 m deep in the ground surface and shown as still largely open on a map made in 1840. Within the eastern and slightly smaller of the two enclosures is a sub-rectangular pond, connected by a short channel to the eastern arm of the moat and by the dry remains of a partly infilled ditch to the central dividing arm.

Excavations within the western enclosure in the 1930s and found evidence of medieval occupation in the form of building materials, including roof tile, fragments of medieval pottery, and a layer of oyster shells described as a 'pavement' about 0.45 m below the present surface. The present Grade II listed 17th century house, Stubbing's Entry (**1181712**), stands in the south-eastern corner of the moated site and is excluded from the scheduling, together with all associated and later additions, although the ground beneath all these features is included.

- 3.3.211 The setting of the asset is informed by its relationship with the later farmyard assets and outbuildings both within the monument and immediately to the south. The setting is further informed by the now wooded parcel of land immediately to the east and labelled 'Studding's Green' on the first edition OS map of 1885. The surrounding agricultural landscape, with which the asset has historical and functional relationship, also contributes to the coherence of the setting. The modern hanger style barns to the south of the asset are, however, intrusive and detract from the setting. The setting of the asset, therefore, makes a moderate contribution to value of the asset, but due to screening by the modern farmyard element and the tree cover of Studding's Green, the setting does not extend to the draft Order Limits.
- 3.3.212 The Grade II listed '61, Great Green' (**1032800**) is located c. 1.1 km south-west of the centre of Wortham, on the southern edge of Burgate Great Green south of Shepherds Lane, 860 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential and historical values. The plastered, part brick cased, timber frame house was built around 1520 and a chimney stack was added in the 17th century when a floor was also inserted, and the asset was reroofed. The thatched house was further extended and altered in the 19th and 20th centuries.
- 3.3.213 The setting of the asset is informed by its location within the dispersed settlement around the Burgate Great Green to the north. The setting is further informed by surrounding agricultural landscape with which the asset has a historical relationship. The asset has a large garden that includes mature trees and is defined by mature hedgerows, which restrict views of the green to the north and the farmland to the south. The peaceful rural setting makes a considerable contribution to the value of the asset, but due to its restricted village focus, the setting does not extend to the draft Order Limits.

### Botesdale CP

- 3.3.214 Grade I listed 'Church of St Mary' (**1241122**) is located on the western flank of the B1113 Finningham Road, c. 500 m south-south-east of Rickinghall and c. 2.8 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The now redundant church dates to the mid-to-late 14th century with mid-15th century work including the rebuilding of the nave and the addition of the south porch. The asset was thoroughly restored in 1868 by W.C. Fawcett. The church is built of flint rubble with ashlar and red brick dressings and slated and plain tiled roofs.
- 3.3.215 The setting of the asset is informed by its roadside location within its associated graveyard, which contains several trees and is defined by a mature tree lined flint and brick wall affording the asset seclusion and privacy. The setting is further informed by the surrounding landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and screening by its graveyard boundaries and the topography, mature vegetation and development of the intervening landscape, the setting does not extend to the draft Order Limits.

## Mellis CP

- 3.3.216 The Grade II\* listed 'Church of St Mary the Virgin' (**1181735**) is located on the eastern edge of Mellis, 80 m north of Mellis Road, 470 m south-east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church dates to the early 14th century, it was re-fenestrated in the 15th century and altered around 1735 when the west tower collapsed. The church was restored in 1859 and 1900. The asset is constructed of largely knapped flint nodules with ashlar dressings, some red brick repair and cement rendering. The nave roof is slated whilst the chancel roof is leaded.
- 3.3.217 The setting of the asset is informed by its location within the settlement of Mellis, which itself is recorded in the Domesday Book. The setting is further informed by the asset's relationships with other listed assets within the settlement and with non-designated buildings, which positively contribute to the character of Mellis. Due to the asset's mature tree lined graveyard, however, intervisibility between the church and other buildings within the settlement are broken and only very occasional. The setting of the asset is also informed by the surrounding agricultural landscape with which it as a historical relationship. The mature graveyard of the church instils a sense of privacy and peacefulness and so the setting of the asset makes a considerable contribution to its value. Due to proximity of the Project the setting of the asset extends to the draft Order Limits.
- 3.3.218 The Grade II listed 'The Old Forge' (**1032809**) is located within the settlement of Mellis, within the Mellis conservation area 50 m north of Mellis Road, c. 525 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The plastered timber frame thatched house was built in the early 16th century, with a chimney stack and second floor added in the 17th century when a parlour bay was added. Further alterations were made in the 19th and 20th centuries. The asset forms part of a historical farmstead known as Ashtree Farm. The Suffolk HER has recognised the farmstead as a non-designated heritage asset (**2458**). The farmstead dates to the 17th century with later 19th century alterations and additions. The farmstead has historical value.
- 3.3.219 The setting of the asset is informed by its village location and by its open view to the south across a large green space. The setting is further informed by the asset's relationships with other listed assets within the settlement and with non-designated buildings, which positively contribute to the character of Mellis. The rural village location of the asset is largely peaceful only occasionally interrupted by noise from the railway c. 200 m to the south-east. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its village roadside focus, the setting does not extend to the draft Order Limits.
- 3.3.220 The Grade II listed 'Rosetree Cottage (Including Part of Rose Cottage)' (**1032807**) is located on the western edge of Mellis, 100 m west of Mellis Road, 120 m north of the Grade II\* listed Church of St Mary the Virgin (**1181735**) and c. 420 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The plastered timber frame thatched house was built in the 15th century, with a chimney stack and second floor added in the 17th century when a parlour bay was added. The asset was further altered in the 19th century and was extended and reroofed in the 20th century.
- 3.3.221 The setting of the asset is informed by village location and by its relationships with other listed assets within the settlement and with non-designated buildings, which positively contribute to the character of Mellis. The asset has a garden with trees and

mature hedged boundaries, which partially obscure views of the green space in the middle of the settlement immediately to the east. The peaceful, rural village setting of the makes a considerable contribution to its value, but due to its village roadside focus, the setting does not extend to the draft Order Limits.

### Yaxley CP

- 3.3.222 The Grade I listed 'Church of St Mary' (**1033114**) is located in the southern half of Yaxley, immediately south of the junction of Old Ipswich Road and Church Lane and 2.9 km east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church dates to the 14th century but was largely rebuilt in the 15th century. The church was restored by E. L. Blackburne in 1868 when the chancel was rebuilt, and a south porch was added. The church is built of flint rubble with stone dressings and is partially cement rendered. The roof is largely tiled, but the south aisle roof is leaded.
- 3.3.223 The setting of the asset is informed by its location within the core of the settlement on the fossilised medieval street plan. The setting is further informed by the asset's relationships with other listed assets within the settlement and with non-designated buildings, which positively contribute to the character of Yaxley. The graveyard of the church contains a few mature trees and is largely defined by mature hedgerows with occasional trees, which allow for some intervisibility between the church and the built heritage around. The setting of the asset retains its links to the surrounding settlement and so it makes a considerable contribution to its value, but due to overall distance and the settlement focus of the setting, it does not extend to the draft Order Limits.
- 3.3.224 The Grade II\* listed 'Guildhall Cottage' (**1033115**) is located on the western flank of a slip road off the Old Ipswich Road central to the settlement of Yaxley, 200 m north of the Grade I listed Church of St Mary (**1033114**) and 2.9 km east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The former guildhall, now a house, dates to the early 16th century and was built for the Guild of St Thomas Martyr. The asset was extended and converted mid to late 16th century, probably for F. Sherman, and it was altered in the 18th and 20th centuries. The house is a plastered timber frame structure, partially encased in brick and with a black glazed pantile roof.
- 3.3.225 The setting of the asset is informed by its location within the core of the settlement on the fossilised medieval street plan. The setting is further informed by the asset's relationships with other listed assets within the settlement and with non-designated buildings, which positively contribute to the character of Yaxley. The asset has a large garden to the rear (west), which contains several trees and is defined by high mature, tree lined hedgerows and trees to the front (east) which screens the asset from the Old Ipswich Road. This private rural village setting makes a considerable contribution to the asset's value, but due to its restricted settlement focus, the setting does not extend to the draft Order Limits.
- 3.3.226 The Grade II\* listed 'Bull's Hall and Attached Outbuildings' (**1033119**) is located at the southern extent of the settlement of Yaxley, 150 m south-south-west of the junction of the Old Ipswich Road and the A140, 3 km south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. Formally a farmhouse, the asset was constructed between 1530 and 1580 and it was altered and sub-divided in the 19th and 20th centuries before being restored in the early 21st century. The rendered, timber frame two storey building has a steeply pitched pantile roof.

- 3.3.227 The setting of the asset is informed by the asset's relationship with a complex of former farm buildings c. 30 m to the south that largely appear on the first edition OS map of 1885 and now serve as a residential dwelling. The setting is further informed by the surrounding agricultural landscape with which the asset and the associated former farming complex have a historical and former functional relationship. The large garden of the asset contains several trees and is defined by mature tree lined hedgerows. Due to the loss of function of the outbuildings, 20th century residential development to the south, and the introduction of the A140 to the east, the setting of the asset makes a moderate contribution to the value of the asset. The setting of the asset does not extend to the draft Order Limits due to overall distance.

### Thornham Parva CP

- 3.3.228 The Grade I listed 'Church of St Mary' (**1285113**) is located centrally to the dispersed settlement of Thornham Parva c. 660 m west-north-west of the A140, 2.6 km south-east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church dates to the 12th century with the nave raised, the chancel rebuilt and the tower added in the 14th century. The asset was restored in 1883 and is built of flint rubble with ashlar dressings, some red brick repair and thatched roofs.
- 3.3.229 The setting of the asset is informed by its location within the dispersed settlement and by its relationships with listed buildings to the north and west and with non-designated buildings within Thornham Parva that contribute to the character of the settlement. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical landscape. The church is accessed via a 100 m long path from an unnamed road to the north and is situated within a graveyard, which contains several trees and is defined by mature tree lined hedgerows. This peaceful, secluded setting makes a considerable contribution to its value but due to overall distance and a limited viewshed, the setting does not extend to the draft Order Limits.

### Gislingham CP

- 3.3.230 The Grade I listed 'Church of St Mary' (**1033123**) is located in the north-eastern quarter of Gislingham on the southern flank of Thornham road, 300 m west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church has a 14th century chancel and a late 15th century nave and north porch. The tower collapsed in 1598 and has rebuilt in 1638-40 by the bricklayer E. Petto. The nave and cancel are built of flint rubble with red brick and ashlar dressings with the nave rendered. The tower is built of red brick in English bond with reused ashlar dressings, whilst the chancel roof is tiled, and the nave roof is green slated.
- 3.3.231 The archaeological monitoring of the excavation of a new toilet drain within the grounds of the church (**2237**) identified a medieval wall stub of the original tower and post medieval brick burial vaults.
- 3.3.232 The setting of the asset is informed by its location on the fossilised medieval street plan of Gislingham, which itself is recorded in the Domesday Book. The asset's setting is further informed by its relationships with listed buildings, including the 15th century Grade II\* Ivy House Farmhouse (**1180705**) 70 m to the north-north-east, and with non-designated buildings within Gislingham that contribute to the character of the settlement. The associated graveyard is large, contains several mature trees and is defined by hedgerows and a low wall of mixed materials. There has been some 20th and 21st century residential development, which has largely enclosed the asset

and the setting of the asset makes a moderate contribution to its value. There are likely to be broken views of pylons to the east and north-east from the asset, and so the setting extends to the draft Order Limits.

- 3.3.233 The Grade II\* 'Ivy House Farmhouse' (**1180705**) is located on the western flank of Mellis road close to the northern limit of Gislingham and 380 m west of the draft Order Limits. The former farmhouse is of **high value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 15th or early 16th centuries and it was extended, and a floor inserted in the early 17th century. Alterations were made in the 19th and 20th centuries. The plastered timber frame house has a steeply pitched machine tiled roof. The farmhouse forms part of a historical farmstead known as Ivy Tree Farm. The Suffolk HER has recognised the farmstead as a non-designated heritage asset (**2488**). The farmstead dates to the 15th century with later 19th century alterations and additions. The farmstead has historical value.
- 3.3.234 The setting of the farmhouse is informed by its relationships with listed buildings, including the 14th/15th century Grade I Church of St Mary (**1033123**) 70 m to the south-south-west, and with non-designated buildings within Gislingham that contribute to the character of the settlement. The setting is further informed by the surrounding of agricultural landscape with which the asset has a historical and former functional relationship, but 20th century residential development has largely diminished this link. The setting of the asset, therefore, makes a moderate contribution to its values, but despite the proximity of the Project, the setting does not extend to the draft Order Limits due to screening by intervening residential development and mature vegetation.
- 3.3.235 The Grade II listed 'Spring Farmhouse' (**1180592**) is located immediately south of Coldham Lane at the eastern extent of Gislingham and 30 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse date to the late 15th or early 16th centuries and was extended in the late 16th century. The house was raised in the 17th century when it was also extended, and floor was inserted. Further alterations made during the 18th and 19th centuries. The asset is plastered timber frame structure with a steeply pitched pantile roof. The farmhouse forms part of a historical farmstead known as Spring Farm. The Suffolk HER has recognised the farmstead as a non-designated heritage asset (**2487**). The farmstead dates to the 15th century with later 19th century alterations and additions. The farmstead has historical value.
- 3.3.236 The setting of the farmhouse is informed by its location within a working farm complex and by its relationship with its non-designated outbuildings most of which are recorded on the first edition OS map of 1885. The setting of the asset is also informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship, although the asset's heavily wooded grounds has diminished this link. The mature grounds of the asset creates privacy and seclusion and the setting of the asset, therefore, makes a considerable contribution to its value. Despite screening by the mature grounds the proximity of the Project means the setting of the asset extends to the draft Order Limits.
- 3.3.237 The Grade II listed 'The Little House' (**1033157**) is located on the northern flank of High Street towards the southern extent of Gislingham and 780 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the mid to late 15th century with a chimney stack added and a floor inserted in the late 16th century and further extended in the mid-17th century. Further alterations were made in the 18th

and 19th centuries. The asset comprises a plastered timber frame house with a thatched roof.

- 3.3.238 The setting of the asset is informed by its roadside village location and by its relationships with listed buildings and non-designated buildings within Gislingham that contribute to the character of the settlement. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical landscape. Small scale 20th century residential development has encroached on the asset to the west, north and east and so the setting of the asset makes a moderate contribution to its value, but due to the settlement focus of the setting it does not extend to the draft Order Limits.
- 3.3.239 The Grade II listed 'Holm Oak House' (**1285277**) is located 30 m west of High Street at the southern extent of Gislingham and 840 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset has 15th century origins with additions made in the mid-16th century and further extensions and alterations c. 1600 and then again in the 19th century. The asset comprises a plastered timber frame house with a thatched roof.
- 3.3.240 The setting of the asset is informed by its roadside village location and by its relationships with the post medieval Grade II listed assets 'Service Building Immediately South West of Holm Oak House' (**1033121**) and 'Two Barns And Attached Sheds at Rush Green Farm About 50 Metres West of Holm Oak House' (**1352107**). The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and former functional relationship. The grounds of the asset contain trees and are defined by high, mature tree lined hedgerows that screens the asset from the High Street to the east. The three listed assets are now separate residential properties and this change of function for the barns and the associated property boundaries means the setting of the asset makes a moderate contribution to its value. Due to the restricted settlement focus of the setting and screening by roadside vegetation, the setting does not extend to the draft Order Limits.
- 3.3.241 The Grade II listed 'Stanwell House and Rose Cottage' (**1033155**) is located at the intersection of High Street and Morleys Lane close to the southern extent of Gislingham and c. 675 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, now two residences, dates to the early-to-mid 16th century and it was extended and reroofed in the 17th century when a floor and chimney stack were also inserted. The asset was again altered and extended in the 20th century, when it was also partially Fletton brick encased. It comprises a plastered timber frame structure with a steeply pitched pantiled roof.
- 3.3.242 The setting of the asset is informed by its roadside village location and by its relationships with other listed and non-designated buildings in the vicinity, which are recorded on the first edition OS map of 1885, and contribute positively to the character of Gislingham. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. the setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its village location, the setting does not extend to the draft Order Limits.

### [Thornham Magna CP](#)

- 3.3.243 The Grade II\* listed 'Church of St Mary Magdalene' (**1033129**) is located on the western flank of Major Lane at the northern extent of Thornham Magna and 2 km east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church dates to the 14th century and it was raised and altered in the 15th century when it was also re-fenestrated and a south porch added. The asset was thoroughly restored in 1851 when a vestry was also added. The church is constructed of flint rubble with ashlar dressings and a slate roof. The asset is located within the southern extent of the former post medieval Thornham Park, which is associated with the non-designated post medieval Thornham Hall (**2407**) 410 m north-north-west of the asset.
- 3.3.244 The setting of the asset is informed by its rural settlement location and by its relationships with listed buildings and with non-designated buildings within Thornham Magna that contribute to the character of the settlement. The setting is further informed by the asset's relationship with the former Thornham Park with which the asset has a historical relationship. The church has an associated graveyard which is defined by a roadside bank to the east and mature tree lined hedgerows to the west, north and south. The setting of the asset, therefore, makes a considerable contribution to its value, but due to mature tree growth in Thornham Park and the intervening landscape beyond, the setting does not extend to the draft Order Limits.
- 3.3.245 The Grade II listed 'Laundry Cottage' (**1285166**) is located 140 m south of an unnamed road that defines the southern extent of the former Thornham Park (**2407**) and c. 1.5 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built around 1500 and it was extended, partly rebuilt and had a floor inserted around 1600. The house was raised in the late 17th century, extended or part rebuilt in the 19th century and was further altered in the 20th century. The house comprises a plastered timber frame house with a steeply pitches glazed pantile roof.
- 3.3.246 The setting of the asset is informed by its secluded location within a large garden area defined by mature tree lined hedgerows that prevent views in and out of the grounds. The setting makes a considerable contribution to its value, but due to its very secluded nature, the setting does not extend to the draft Order Limits.
- 3.3.247 The Grade II listed 'Corner House' (**1033127**) is located immediately to the south of the junction of Clay Street and Wickham Road at the southern limit of Thornham Magna and 1.9 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset dates to the late 15th or early 16th centuries and a chimney stack and a parlour were added in the late 16th century. A floor was inserted in the 17th century, and it was further altered and extended in the 19th century. The house comprises a plastered timber frame structure with a thatched roof. The small 19th century extension is brick built and had a pantile roof.
- 3.3.248 The setting of the asset is informed by its roadside location in the dispersed settlement. The setting is further informed by the asset's relationships with listed buildings and with non-designated buildings within Thornham Magna that contribute to the character of the settlement, although intervisibility is limited due to mature vegetation. The surrounding agricultural landscape, with which the asset has a historical relationship, also contributes positively to the setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the village focused nature of the setting and mature vegetation in the intervening landscape, it does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.3.249 A **medium value** medieval L-shaped moated area known as moatyards (**2260**) of evidential and historical value is recorded on a parcel of land including the draft Order Limits within its western and south-eastern edges. The northern terminal end of Dam Lane is located approximately 140 m south-east of the asset, with Great Green settlement located 1.2 km to the west of the asset. The moated area occupies a 180' (54.8 m) by 322' (98.1 m) area near a spring on a meadow known as Moatyards. An investigation by Basil Brown between 1934 and 1935 identified 13th century medieval pottery as well as a large part of a plate. There has been a suggestion that excavations by the landowner in the 1890s also identified burials. Linear ditches can be observed on 1937 aerial imagery as a large rectangular depression with extensions to the west and south. A small mound can also be observed to the north-east partially enclosed by a dry stream bed. An 88 m by 68 m homestead moat beside a stream can also be observed with the western arm cut into a slope and the eastern arm likely formerly connected to the stream.
- 3.3.250 A **medium value** possible moat (**2254**) of evidential and historical value is recorded on parcel of land known to be occupied by the post medieval 19th century Procters Barn (**2501**), which is reported in the post medieval section below. The possible moat is located within the fringes of the draft Order Limits, 100 m west of Burgate Road, and 1 km south-west of Mellis. The moat is no longer extant with the HER record indicating the moat is '*now gone*'. Any associated buildings and field boundaries appear to have been ploughed out, however cropmarks are visible on aerial imagery from 1973. Later post medieval coins have also been suggested in this location of Edward VI, Philip and Mary, Elizabeth I within the garden in front of the existing house.
- 3.3.251 A **medium value** medieval moat (**2253**) of evidential and historical value is recorded approximately 10 m north of the draft Order Limits, 230 m west of Mellis Road, and 270 m south-west of Mellis. The square moat was investigated by Basil Brown in 1938, when a probe was used to define site. It is suggested that this moated manor was likely the location of the 13th century site of Heigham Hall which once belonged to the de Belliecampo family.
- 3.3.252 A **medium value** land parcel recorded as medieval clamp kiln floors (**2255**) of evidential and historical value are located approximately 25 m north-east of the draft Order Limits, 145 m south of Mellis Road, and 920 m south of Mellis. Basil Brown identified this land parcel as the possible site of Swatshall or Swattisfield Hall, also noting an old bridge which was demolished by 1935 when a large earthwork, remains of a moat and part of an old bridge were observed. Black soil patches and kiln sites have been observed within the land parcel suggestive of kiln site locations with findspots including 12th and 13th century unglazed pottery sherds including Grimston ware. Early medieval sherds have also been noted nearby. The building also appears on aerial imagery as cropmarks.
- 3.3.253 The **low value** location of Mellis Village Green (**2222**) of evidential and historical value is noted by the HER to date to the medieval period. This asset is located approximately 150 m south-east of the draft Order Limits, contains Mellis Road and is within and associated with Mellis itself. This asset suggests the settlement of Mellis at least dates to this period, with a north-west to south-east aligned Roman road (**2144**) also running through the asset.
- 3.3.254 A **low value** metal detected findspot of a 'gold angel of Henry VI' (AD 1422 to 1461) (**2223**) of evidential value is located within the draft Order Limits, includes the A143 and is 1.3 km east of Wortham.

- 3.3.255 A **low value** medieval green recorded as Burgate Little Green (**2305**) of evidential and historical value is located approximately 140 m north-west of the draft Order Limits, and also contains Bugg's Road, Burgate Road and Little Green settlement. The green dates to the medieval to post medieval period and the HER notes that the green is visible on Hodskinson's map of 1783.
- 3.3.256 Within the Order Limits south-east of Gislingham were located three PAS artefacts; a buckle, a padlock and another buckle (**2307**). All that was recovered of the first buckle was the front half of a folded copper alloy plate. The rest of the buckle plate is missing due to an old break. It is square in shape. The padlock was incomplete and made out of copper alloy with a barb spring locking mechanism. The case of the padlock is circular in cross section. The second buckle was complete by very worn. It was square in shape. These assets are of **low value** and have evidential value.
- 3.3.257 The PAS records a crude lead pendant, a fragment of a copper alloy rotary key and a copper alloy bell (**2304**) being located outside the draft Order Limits north of Gislingham. The pendant was bottle shaped with a narrow neck and rim pierced for a suspension hole. The front of the pendant has a flat oval plate which was decorated or carved with abstract flowing curvilinear design. The key had a hollow shaft with a circular section with an elegant bit consisting of an upper cross bar and a pair of 'L' shaped projections. The bell was beehive shaped with pierced suspension knop. The outer surface of the bell was decorated with concentric grooves. The clapper was missing. These assets are all of **low value** and have evidential value.
- 3.3.258 A **medium value** small moated site (**2226**) has been identified at Spring Farm of evidential and historical value. This asset is located approximately 25 m west of the draft Order Limits, 115 m south of Thornham Road, and 100 m east of Gislingham. The HER indicates that the moat is shown as complete and rectangular on the tithe map of 1839, with an entrance via a causeway to the south but unoccupied. The 1904 OS map 1: 2500, 1904 marks that the east and west sides of the moat are filled with water. The current OS map edition marks the southern and eastern moat sides. The site is overgrown, with a spring in the north-eastern corner currently covered by a modern period structure.
- 3.3.259 A **low value** medieval non-designated assets associated with St. Johns (now on land associated with the post medieval period Park House **1032787**), of evidential and historical value is recorded approximately 250 m west of the draft Order Limits, immediately south of Lion Road and 1.5 km east of Wortham. The site of the Chapel of St. John (**2240**) is recorded by the HER as being mentioned in the Domesday Book of 1086, as well as the taxation of 1256 and a will in 1433. The lands belonging to chapel were granted in 1545 to Francis Boldero and Robert Parker with a chantry certificate of 1546 stating that St. Johns was a free chapel described as '*...no parish church, but a chapel now decayed, half a mile from the parish church*'. No clear evidence for the presence of the chapel site approximately 250 m west of the draft Order Limits has been identified, with a 2004 investigation suggesting the chapel was more likely to have been located within the grounds of The Priory and may be within the south-east of Park House walled garden. Further assets associated with St. Johns dating to other periods are also noted on land including the draft Order Limits along its eastern boundary as follows:
- Prehistoric features (**2600**) have been identified including pottery and lithics as discussed in the prehistoric section above
  - Romano-British features (**2140**) have been identified including pottery, animal remains, a ring and a coin as discussed in the Roman section above

- Early medieval (Anglo-Saxon) evidence (**2191**) has been recorded in the form of an inhumation disturbed by a modern period pit as discussed in the early medieval section above
- The post medieval St. Johns small landscape park (**2402**) associated with St. John's House Hospital, and a clay lined pit, cellar or tank, a brick culvert and a wall foundation (**2415**) found during archaeological investigations as discussed in the post medieval section below

- 3.3.260 A **medium value** moated site (**2227**) of evidential and historical value is noted on aerial imagery and may date to this period, approximately 110 m east of the draft Order Limits, immediately east of Burgate Road, and 1 km south of Little Green. The site comprises of a sub-square enclosure/ moat. Modern mapping indicates an east to west aligned field boundary running through the site.
- 3.3.261 The **medium value** medieval moat and house at Ivy House Farm (**2257**) of evidential and historical value is recorded approximately 160 m south-west of the draft Order Limits gas pipeline cathodic protection, 400 m west of the draft Order Limits, 90 m west of Mellis Road, and immediately north of Gislingham. The remains of a likely rectangular moat are marked by the HER to the west and northwest of Ivy House Farmhouse (**1180705**). Two carved stones including one from a window have been found within the moat, as well as evidence of chalk floors and spreads of gravel.
- 3.3.262 The **medium value** location of a portion of moat, formerly surrounding Swattesfield Hall (**2256**) of evidential and historical value is mostly located on the same land parcel occupied by the post medieval 19th century Swattesfield Hall Farmstead (**2502**) discussed in the post medieval section below. The moat and associated medieval evidence is located approximately 200 m north-east of the draft Order Limits, 210 m north of Major Lane, and 1.8 km south-west of Thornham Parva. Two sides of the likely square moat are recorded by the HER as extant and around the former Swattesfield Hall, seen on Hodskinsons map of 1783 as a range of buildings and named Swatsal Hall and also present on OS mapping until the 1920s. Further buildings are marked to the north and north-east of the moat outside moat on aerial imagery, although no buildings are present by 1950s OS mapping. Swatshall Hall manor is recorded as held by William de Gislingham in the 13th century, with the hall potentially rebuilt in the 18th century. The base of walls and a well are marked as extant in 2008. Further crop marks can also be observed to the north which may also date to this period.
- 3.3.263 A **medium value** medieval moat surrounding Mellis Hall (**2258**) of evidential and historical value is located approximately 300 m south-east of the draft Order Limits, 50 m north of Mellis Road and within Mellis Conservation Area (**CA47**). Three arms of the moat are no longer extant by 1984 mapping and have been ploughed out. Approximately 20 m west of this moat is the similarly **medium value** and evidential and historical value 80 m by 60 m rectangular moated Mellis Hall (**2259, 2291**) to Mellis Hall (**1181726**) shown on early mapping. The moat is recorded by the HER as '*immediately west of two moated sites shown on early maps and now only surviving as earthworks*'.
- 3.3.264 A **low value** medieval silver halfgroat of Edward III (AD 1327-1377) coin (**2318**) was found in Gislingham north-west of the draft Order Limits. It has historical value.
- 3.3.265 The PAS records a **low value** cut silver voided short cross halfpenny of John, Class 5b, c.1205-1210 AD (**2314**) being found east of Gislingham and outside the draft Order Limits. This asset has evidential and historical value.

- 3.3.266 The PAS records a **low value** strip of metal 72 mm long, 8 mm wide and 2.8 mm thick (**2311**) being found in the Worthing area outside the draft Order Limits. This asset has evidential and historical value.
- 3.3.267 A **low value** concentration of 17 PAS findspots (**2202**) of evidential value is located in an area including the draft Order Limits, near Mellis. One artefact dates to this period comprising of a complete cast copper-alloy stirrup terminal. The remaining artefacts date to other time periods as follows:
- A Bronze Age palstave (**2042**)
  - Nine medieval artefacts including four coins, two buckles, one clasp, one thimble and one lead ampulla
  - Five post medieval artefacts including four coins and a buckle
  - One undated foreign silver coin

## **Finningham, Mendlesham and Old Newton**

### *Designated Heritage Assets*

#### [Finningham CP](#)

- 3.3.268 The Grade I listed 'Church of St Bartholomew' (**1352056**) is located in the core of Finningham, within the Finningham conservation area (**CA48**), south of Church Lane and 930 m west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The church was built in the early 14th century and then in the 15th century it was re-fenestrated and the south porch was added. It was restored in 1886 when the chancel was rebuilt. The church is built of flint rubble with ashlar dressings, is partially cement rendered and the north porch is built of red brick. The nave has a slate roof whilst the porches and chancel have plain tile roof.
- 3.3.269 The setting of the asset is informed by its location at the core of the medieval settlement, which itself is recorded in the Domesday Book. The setting is further informed by the asset's relationships with listed buildings and with non-designated buildings within Finningham that contribute positively to the character of the settlement. Based on the evidence of the first edition OS map of 1885, there has been some 20th century residential infill development, but this has been sympathetic and in the local architectural vernacular. The church sits within a large graveyard which is defined by mature tree lined boundaries that partially restrict views in and out. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by the settlement and by mature treelined hedgerows and infrastructure in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.270 The Grade II\* listed Church Farmhouse (**1033145**) and the Grade II listed 'Barn about 15 Metres north-west of Church Farm House' (**1352078**) are located on the eastern flank of Gislingham Road on eastern edge of Finningham and within the Finningham conservation area (**CA48**), 160 m east of the Church of St Bartholomew (**1352056**) and 750 m west of the draft Order Limits. The barn is of post medieval date and reported in the appropriate section below. The farmhouse is of **high value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 15th century and a floor, a chimney stack and a parlour were added in the early 17th century. Further alterations were made in the 19th and 20th centuries. The asset comprises a plastered and partly exposed timber frame structure with a machine tiled roof.

- 3.3.271 The setting of the farmhouse is informed by its village edge location, by its relationship with its Grade II listed former barn (**1352078**) and by its relationships with further listed buildings and with non-designated buildings within Finningham that contribute positively to the character of the settlement. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The barn has been converted into a residential dwelling with associated property boundaries and there is now very little evidence of the former farmyard. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its restricted settlement focus and screening by its property boundary and by mature treelined hedgerows and infrastructure in the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.272 The Grade II listed 'The White Horse Public House' (**1285425**) is located immediately south-west of the junction of Westhorpe Road and Station Road close to the south-western edge of Finningham and 1.2 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The core of the house dates to the 15th century and a floor and chimney stack were inserted in the late 16th or early 17th centuries. The asset was extended in the late 17th century and then further extended and raised in the 18th century before alterations in the 19th century. the house comprises a plastered timber frame structure with some panelled pargetting and plain tine roof.
- 3.3.273 The setting of the asset is informed by its roadside village location on the fossilised medieval street plan and by its relationships with further listed buildings and with non-designated buildings within Finningham that contribute positively to the character of the settlement. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship, although this link has been partially broken by 20th century residential development north and south of Westhorpe Road. The setting of the asset, therefore, makes a considerable contribution to its value but due to the roadside settlement focus of the setting, it does not extend to the draft Order Limits.

#### Wickham Skeith CP

- 3.3.274 The Grade II\* listed 'Street Farmhouse' (**1352524**) and associated Grade II listed 'Barn 20 Metres east of Street Farmhouse' (**1182741**) are located in Wickham Street on the southern flank of Wickham Road and 625 m north-east of the draft Order Limits. The barn is post medieval in date and reported in the appropriate section below. The farmhouse is of **high value** based on its designation and its evidential, historical and aesthetic values. The core of the asset comprises a 15th century hall range with alteration and additions made in the 16th, 17th and 19th centuries. The farmhouse is a rendered timber frame structure with a pantile roof.
- 3.3.275 The setting of the asset is informed by its working farmyard location and by its interrelationship with the associated barn and by its relationships with further listed buildings and with non-designated buildings within Wickham Street that contribute positively to the character of the settlement. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and ongoing functional relationship. the setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by buildings and mature tree cover and hedgerows in the settlement, the setting does not extend to the draft Order Limits.
- 3.3.276 The Grade II listed 'Summerseat' (**1032202**) is located in Wickham Street on the northern flank of Wickham Road and 730 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house has a late 15th/early 16th century core with 17th and

18th century additions and alteration. The asset was renovated in the 20th century and comprises a rendered timber frame structure with a thatched roof.

- 3.3.277 The setting of the asset is informed by its roadside village location and by its relationships with further listed buildings and with non-designated buildings within Wickham Street that contribute positively to the character of the settlement. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. the setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by buildings and mature tree cover and hedgerows in the settlement, the setting does not extend to the draft Order Limits.
- 3.3.278 The Grade II listed 'The Old Swan' (**1284400**) is located in Wickham Street on the southern flank of Wickham Road and 780 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. Built as a house, then formally a pub which closed in 1966, the asset has a 15th century core with 17th and 18th century additions and alterations and a 19th century roof. The asset comprises a plastered timber frame structure with a shallow pitched pantile roof.
- 3.3.279 The setting of the asset is informed by its roadside village location and by its relationships with further listed buildings and with non-designated buildings within Wickham Street that contribute positively to the character of the settlement. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. the setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by buildings and mature tree cover and hedgerows in the settlement, the setting does not extend to the draft Order Limits.
- 3.3.280 The Grade II listed 'Great Oak Farmhouse' (**1182620**) is situated in a moderately isolated location 130 m north of Oak Farm Lane, c. 710 m south-west of the core of Wickham Skeith, and 550 m south-south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse forms part of a historical farmstead known as Great Oak Farm. The Suffolk HER has recognised the farmstead as a non-designated heritage asset (**2482**). The farmstead dates to the 19th century and has historical and evidential value.
- 3.3.281 The setting of the farmhouse is informed by its location within an isolated working farmyard and by its relationships with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and ongoing working relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance, and it being restricted to the farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.282 The Grade I listed 'Church of St Andrew' (**1352521**) is located 440 m east of the medieval core of Wickham Skeith, 1.1 km north-east of and 1.9 km east-north-east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The massive square tower of the church dates to the 14th century, whilst the nave, chancel and north porch date to the 15th century. There is evidence of ongoing maintenance since the 15th century and the asset was restored in 1857. The church is built of flint rubble with stone dressings whilst the nave has a slate roof and the chancel has a pantile roof. The

location of the church beyond the limits of the modern settlement suggests Wickham Skeith may be a shrunken medieval village.

- 3.3.283 The setting of the asset is informed by its relationship with the non-designated Wickham Hall and associated outbuildings c. 70 m to the south-west and by its otherwise secluded rural location. The attendant graveyard is defined by mature tree lined hedgerows, which contribute to the seclusion of the asset, and despite its large tower, due to development and mature vegetation in the village, it is not visible at street level. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the screening by its graveyard boundaries and by the topography, development and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

#### Thwaite CP

- 3.3.284 The Grade II\* listed 'Church Of St George' (**1032261**) is located within the dispersed settlement of Thwaite immediately south-east of the of Church Lane and Wickham Road and 2.7 km east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The asset largely dates to the 14th and 15th centuries and was restored in 1870 and 1904. The west end of the church was largely rebuilt in 1870 when a bell turret was added. The church is built of flint rubble with stone dressings, with a brick-built porch and a pantile roof with ridge tiles.
- 3.3.285 The setting of the asset is informed by its location within Thwaite and by its relationships with the surrounding non-designated buildings that that contribute positively to the character of the settlement. The attendant graveyard is defined by high, mature tree lined hedgerows that largely excludes views to and from the asset. The moderately secluded setting of the asset makes a considerable contribution to its value, but due to its mature graveyard boundary and screening by the topography, development and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

#### Westhorpe CP

- 3.3.286 The scheduled monument 'Westhorpe Hall moated site and associated fishponds' (**1016697**) is located at the eastern edge of Westhorpe on the northern flank of The Street and c. 2.5 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. The monument includes a moated site and adjacent fishponds bordering the north side of The Green at the eastern end of Westhorpe village. The moated site contains the remains of a great house built in the early 16th century by Charles Brandon, Duke of Suffolk and husband of Mary Tudor, the sister of Henry VIII and dowager Queen of France. There is also some documentary and archaeological evidence for an earlier manor house on the site. The moat is approximately 16 m wide, though slightly narrower on the east side, surrounds a rectangular central platform raised about 1 m above the level of the prevailing ground surface and measuring approximately 70 m east/west by 52 m north/south. The eastern half of the southern arm of the moat has been infilled, although the line of the inner edge is marked here by a gentle, south-facing scarp. The outer walls of the 16th century house rose directly above the inner edge of the moat, and the footings of these walls, constructed of coursed flint faced with brick, survive as a revetment of the central platform. Other surviving elements of the house have been identified during the dredging of the moat over the years and the bridge across the western arm of the moat, which is Listed Grade II and is included in the scheduling, still survives. The current Grade II listed 'Westhorpe Hall' (**1033105**) predominantly dates to the 18th century but has 16th and 17th century elements. The

hall and all associated structures and garden features are excluded from the scheduling, though not the ground beneath, and both it and the listed bridge are scoped out of the baseline.

- 3.3.287 The setting of the asset is informed by its location on the edge of the settlement, which is recorded in the Domesday Book, and as a replacement of an early medieval manor. The setting is further informed by its relationship with the post medieval hall within the bounds of the moat and the farm buildings immediately to the west, some of which are recorded on the first edition OS map of 1885. The surrounding agricultural landscape, with which the asset has a historical and former functional relationship, also makes a positive contribution to the setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the topography, development, infrastructure and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

### Bacton CP

- 3.3.288 The scheduled monument 'Russell's Hill moated site' (**1006000**) is located 750 m south-east of Cow Green, 320 m north of Hundred Lane, and 2.3 km west of draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. The scheduled monument record for this asset is generated from an 'old county number' and as such details of the asset are extremely limited. The only available information states the asset is: 'An enclosure c. 50yds sq. formed by a 15 ft wide ditch. 7-10 ft deep with a 4-6 ft counterscarp. Causeway on N side may be modern.' The moated site is likely to be the remains of the location of a high-status residence, possibly a manorial site, and one of several such feature visible on the first edition OS map of 1885 and, for the most part, still apparent today with the closest, Cotton Hall, 950 m to the north-east.
- 3.3.289 The setting of the asset is informed by its location within the fossilised medieval landscape represented by the surrounding moated sites, some settlement and the routeways linking them. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and likely former working relationship. The former medieval field systems have now been replaced by post medieval and modern, large open fields and there has been some small-scale post medieval and modern development in the landscape. The setting of the asset, therefore, makes a moderate contribution to its value, but due to overall distance and the focus of the setting being on the immediate landscape, it does not extend to the draft Order Limits.
- 3.3.290 The Grade I listed 'Church of St Mary' (**1032755**) is located in Bacton 2.8 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church mainly dates to the 14th and 15th centuries with 16th century additions and alterations, although the 14th century mid tower incorporates a doorway of possible 12th century date. The church is constructed of flint rubble with freestone dressings and has mainly slated roofs with the low-pitched aisle roofs leaded.
- 3.3.291 The setting of the asset is informed by its location at the north-eastern limits of the linear settlement of Bacton recorded on the first edition OS map of 1885. Since the publication of the map, however, the later 20th century development of Bacton has advanced eastwards along Pound Hill up to the railway and a short distance beyond. The setting is further informed by the asset's relationships with the surrounding listed and non-designated buildings that that contribute positively to the character of Bacton. There has been some 20th century infill development around the church and a modern primary school lies immediately to the south of the asset. These

developments are, however, largely sympathetic and in keeping with local architectural vernacular, whilst the less sympathetic residential estate to the east is screened from the asset by thick tree cover. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the development, infrastructure and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.3.292 The Grade II\* listed 'Fords Green' (**1032724**) is located in the small hamlet of Ford's Green on the western flank of Swiltub Lane c. 900 m south of Bacton and 2.3 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The asset comprises a house built in two stages; the first long range was built in the early 16th century with the eastern block added c. 1550. The house is a plastered timber frame structure with a plain tile roof. The asset and associated outbuildings are identified as Cherrytree Farm on the first edition OS map of 1885.
- 3.3.293 The setting of the asset is informed by its location within a possibly still working farm complex and by its relationships with the non-designated farm outbuildings most of which are recorded on the first edition OS map of 1885. The setting is further informed by the agricultural landscape with which the asset and its associated outbuildings have a historical and possibly an ongoing functional relationship. The large grounds of the asset contain numerous trees and are defined by mature tree lined hedgerows. The evergreen hedge and tree line which runs alongside Swiltub Lane is thick and high eliminating any view in to and out from the asset affording it privacy and seclusion. The setting of the asset, therefore, makes a considerable contribution, but due to overall distance and screening by the asset's boundaries, the setting does not extend to the draft Order Limits.

### Cotton CP

- 3.3.294 The Grade I listed 'Church of St Andrew' (**1352478**) is located within the historic core Cotton, which itself is recorded in the Domesday Book. The asset is situated immediately to the west of the junction of Church Road, Medlesham Road and Stonham Road and c. 1.4 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church largely dates to the 14th century comprising an aisled nave, chancel, west tower and south porch with a 15th century clerestory. The asset was restored in 1890 and again in 1903 and is constructed of flint rubble with stone dressings and the roofs are leaded and tiled.
- 3.3.295 The setting of the asset is informed by its location at the medieval core of Cotton, which itself is recorded in the Domesday Book, and by its relationships with the surrounding listed and non-designated buildings that contribute positively to the character of settlement. The attendant graveyard is defined by a low iron fence supplemented by mature trees and shrubs. There has been some 20th century infill residential development within the settlement core and more substantial development along Mill Lane extending the settlement over 700 m to the north. The development is, however, largely sympathetic in the local architectural vernacular and is well screened by the mature trees of the graveyard. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the development, infrastructure and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.296 The Grade II listed 'The Cottage' (**1180427**) is located within the historic core of Cotton and the northern flank of Mendlesham Road, 140 m east of the Church of St Andrew (**1352478**) and c. 1.3 km west of the draft Order Limits. The asset is of

**medium value** based on its designation and its evidential, historical and aesthetic values. The asset dates to the 15th or early 16th centuries with a 19th century addition. The earlier section is timber framed with some surviving plasterwork and rendered pargetting panelling date to c. 1985. The 19th century addition is plastered clay lump. The timber frame building has a thatched roof, whilst that of the addition is pantiled.

- 3.3.297 The setting of the asset is informed by its roadside village location and by its relationships with the surrounding listed and non-designated buildings that contribute positively to the character of Cotton. The setting of the asset has, however, been encroached upon by some 20th century infill development, and so its setting makes a moderate contribution to its value. Due to the settlement focus of the setting, however, it does not extend to the draft Order Limits.

### Mendlesham CP

- 3.3.298 The Grade I listed 'Church of St Mary' (**1032241**) is located at the western end of the medieval core of Mendlesham, as recorded on the first edition OS map of 1885, on the eastern flank of Church Road within the Mendlesham conservation area (**CA44**), and 1.7 km east-south-east of draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The nave and aisles have 13th century origins whilst the chancel dates to the 14th century. The four-stage square tower dates to the 15th century and the whole structure was restored in 1864-6. The nave and aisle roofs are leaded whilst the chancel has a plain tile roof.
- 3.3.299 The setting of the asset is informed by its location at the eastern extent of medieval Mendlesham, which itself is recorded in the Domesday Book. The setting is further informed by the asset's relationships with the surrounding listed and non-designated buildings that contribute positively to the character of Mendlesham. The remains of the Church Farm moat lie to the east of the asset contributing to the medieval origins of the church's setting. The agricultural landscape to the east, with which the asset has a historical relationship, also contributes positively to the setting. There has, however, been some residential development of Mendlesham expanding the settlement's boundaries particularly to the north, west and south. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and screening by the medieval, post medieval and modern development of Mendlesham, the setting does not extend to the draft Order Limits.
- 3.3.300 The Grade II listed 'Hunters Moon' (**1352481**) is located at the northern limit of Hobbies Lane at its intersection with an unnamed road c. 830 m north-west of the centre of Mendlesham, and 780 m east of the draft Order Limits. The asset, now identified as Moat Farm House, is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse has a core of perhaps late 15th century with 16th and 17th century in-line additions and comprises a plastered timber frame structure with a thatched roof.
- 3.3.301 The setting of the asset is informed by its relationship with its former non-designated outbuilding and by its relationships with the Grade II Poplar Farmhouse (**1032282**) and its non-designated outbuildings on the opposite side of the road 30 m to the east. the setting is further informed by the surrounding agricultural landscape with which the asset and its former outbuildings have a historical and former functional relationship. The associated outbuildings have, however, been converted into a residential dwelling and a property boundary now separates the asset from the new dwelling. Due to the loss of function and separation from its former outbuildings, the setting makes a moderate contribution to its value, but because of screening by the

former outbuildings and the topography of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.3.302 The Grade II listed 'Whittings Farmhouse' (**1180535**) is located in a secluded parcel of land at the end of a 470 m long track east of an unnamed road linking Mendlesham to the east with Mendlesham Green to the south. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The draft Order Limits lie c. 1.7 km to the west of this asset. The former farmhouse dates to the 15th century, has 16th and 17th alterations and additions and comprises a plastered timber frame structure with a mixed thatched and pantile roof.
- 3.3.303 The setting of the asset is informed by its isolated location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset and associated outbuildings have a historical and probable former functional relationship. The grounds of the asset contain several trees and are defined by mature tree lined hedgerows, which obscure views in to and out from the asset. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and screening by the asset's grounds, the setting does not extend to the draft Order Limits.

#### Gipping CP

- 3.3.304 The Grade I listed 'Chapel of St Nicholas' (**1352278**) is located in Gipping, 2.4 km north-west of the centre of Old Newton, and 620 m west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The asset is a free chapel, built as a private chapel around 1474-80 for Sir James Tyrell of Gipping Hall. Since 1743 it has been administered by trustees. The nave, chancel and north vestry were added soon after, with the west tower built in the late 16th century. The walls of the asset are of a chequerboard pattern comprising squared limestone rubble and knapped flint with freestone dressings. The tower appears to be cement rendered and the asset has plain tiled roofs.
- 3.3.305 The setting of the asset is informed by its location within its secluded grounds and by its relationship with the Grade II Chapel Farmhouse (**1285268**) and its associated outbuildings. The setting is further informed by the site of Gipping Hall, seat of the Tyrell family, immediately to the east, which was demolished in the 1850s. Part of the hall's moat survives immediately to the east of the chapel, and it is surrounded by mature trees, which obscure views from the asset to the east. Due to the loss of the hall, the setting of the asset makes a moderate contribution to its value, but due to the restricted nature of the asset's setting due to the loss of the estate it served, it does not extend to the draft Order Limits.
- 3.3.306 The Grade II listed 'Chapel Farmhouse' (**1285268**) is located in Gipping 30 m west of the Chapel of St Nicholas (**1352278**), 2.4 km north-west of the centre of Old Newton, and 690 m west of draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset was built in the early-to-mid 16th century with 17th century and later alterations and comprises a plastered timber frame structure with a plain tile roof and a jettied first floor on the front, east-facing elevation.
- 3.3.307 The setting of the asset is informed is informed by its location within a working farm complex and by its relationships with its Grade II listed dovecot (scoped out of this assessment) and its non-designated outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's

relationship with the Grade I Chapel of St Nicholas (**1352278**) and by the surrounding agricultural landscape with which the asset and its outbuildings have a historical and ongoing functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and screening by the chapel and its associated tree growth, the setting does not extend to the draft Order Limits.

- 3.3.308 The Grade II\* listed 'Gipping Lone' (**1180773**) is located in its secluded grounds 590 m north of Gipping, and 820 m north-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The asset was built in two stages; the north/south range dates to the late 15th century with the east/west range added around 1600. The house is a plastered timber frame structure with a concrete pantile roof. The asset is labelled Old Vicarage Coppings on the first edition OS map of 1884.
- 3.3.309 The setting of the asset is informed by its secluded location within its grounds and by its relationship with its non-designated outbuildings. The setting is further informed by the surrounding agricultural landscape with which the asset and its associated non-designated buildings have a historical relationship. The grounds of the asset are defined by mature tree lined hedgerows, which largely obscure views into and from the asset. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the screening of the asset's grounds, the setting does not extend to the draft Order Limits.
- 3.3.310 The Grade II listed 'Rookery Farmhouse' (**1352279**) and 'Barn, 40 Metres South West Of Rookery Farm' (**1180903**) are located in a former farming complex 1.6 km south-east of Gipping and 140 m south-west of the draft Order Limits. The barn is post medieval in date and reported in the appropriate section below. The farmhouse is of **medium value** based on its designation and its evidential, historical and aesthetic values. The Farmhouse was built around 1530 and alterations were made in the early 17th and early 19th centuries. the asset comprises a plastered timber frame structure the ground storey and south facing gable were clad in red brick in the 19th century. The once thatched roof is now concrete tiled.
- 3.3.311 The setting of the asset is informed by its location within the former farming complex and by its relationship with its surviving outbuildings recorded on the first edition OS map of 1884, some of which are now residential dwellings. The setting is further informed by the surrounding agricultural landscape with which the asset and its former outbuildings have a historic and former functional relationship. The large garden of the asset contains trees and shrubs and is defined by a brick wall and by mature, tree lined high hedgerows. Due to the loss of the working farm and the repurposing of some of the outbuildings, the setting of the asset makes a moderate contribution to its value. Despite the mature vegetation of the asset's garden, the mature trees lining the roads to the east and the constriction of the asset's setting due to loss of function, the proximity of the Project means the setting extends to the draft Order Limits.

#### Old Newton with Dagworth CP

- 3.3.312 The scheduled monument 'Rookyard Farm Moats' (**1451408**) is located on the western flank of the B1113 on the northern outskirts of Old Newton, and 2.7 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. The asset comprises the earthworks of a double moat surrounding the Grade II listed farmhouse of Rookyard Farm, which is scoped out of assessment. It comprises a small, medieval moat to the north and a larger, probably 16th century garden moat to the south. The northern of the two moated

platforms is rectangular in plan and the platform measures 55 m east/west by 40 m north/south. The platform is enclosed on the south and west sides by a water-filled moat, 7 m wide on the south side, and 11 m on the west, to a depth of at least 2 m. The moat platform is approximately 0.5 m higher than the land to the west. The southern moated platform is rectangular in plan, and measures 110 m north/south by 95 m east/west. The platform is enclosed on the west, south and east sides by a seasonally water-filled moat measuring up to 10 m in width and 2 m deep. The moat is steep sided, with a U-shaped profile. The foundations of the demolished barn are visible on the southern moat platform.

- 3.3.313 The setting of the asset is informed by its roadside location to the north of the medieval settlement of Old Newton, which itself is recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationship with the Grade II Rookyard Farmhouse and its non-designated outbuildings, which are also recorded on 19th century OS mapping. The surrounding agricultural landscape, with which the asset and associated listed and non-designated buildings have a historical and functional relationship, also positively contributes to the asset's value. Due to the encroaching modern expansion of Old Newton and the erosion of the medieval landscape, the setting of the asset makes a moderate contribution to its value, but due to overall distance and its now more local focus, the setting does not extend to the draft Order Limits.
- 3.3.314 The Grade I listed 'Church of St Mary' (**1181693**) is located towards the eastern extent of Old Newton on the eastern flank of a shallow river valley, and c. 2.1 km south-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The church comprises of a chancel, north vestry, nave, south porch and west tower, which date mainly to the 14th century with evidence of 16th, 17th and 18th century alterations and maintenance. The asset is built of flint rubble with freestone dressings, whilst the nave roof slated and the chancel roof is plain tiled.
- 3.3.315 The setting of the asset is informed by its location at the eastern extent of the medieval linear settlement of Old Newton, as recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationship with the listed and non-designated buildings in its vicinity which positively contribute to the character of Old Newton. The church's graveyard is open to the Church Road to the south but otherwise defined by a mature tree lined hedgerow. There has been some 20th century residential development along Chapel Road to the east, extending the bounds of settlement, but this is largely screened from the asset by its graveyard boundaries and further mature vegetation to the east. The setting of the asset, therefore, makes a considerable contribution but due to the topography of the river valley and the screening by the asset's boundaries, the setting does not extend to the draft Order Limits.
- 3.3.316 The Grade II\* listed 'Ward Green Farmhouse' (**1032689**) is located in the small hamlet of Ward Green, c. 1.4 km north and the centre of Old Newton, and c. 2.8 km west of draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The asset comprises an early 15th century east/west aligned three-cell open hall house with an early 17th century north/south aligned two-cell block to the east. Both blocks comprise plastered timber frame structures with pantile roofs.
- 3.3.317 The setting of the asset is informed by its location within a working farm complex and by its relationships with its outbuildings which include a Grade II listed barn as well as several non-designated structures, most of which are recorded on the first edition OS

map of 1885. The setting is further informed by the asset's relationships with the listed and non-designated buildings in its vicinity which positively contribute to the character of Ward Green. The farmyard's boundaries are, however, defined by high, tree lined evergreen hedges, which allow for only glimpsed view into or out from the asset. The surrounding agricultural landscape, with which the farmhouse and its outbuildings have a historical and ongoing functional relationship, also makes a positive contribution to the setting of the asset. The secluded setting of the asset, therefore, makes a considerable contribution to the value of the asset but due to its secluded nature and overall distance, the setting does not extend to the draft Order Limits.

- 3.3.318 The Grade II listed 'Ivy Cottage' (**1352296**) is located on the eastern flank of Brown Street in the small hamlet of Brown Street, c. 1.7 km north-east of the centre of Old Newton, and 1.8 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 15th century, was remodelled in the 17th century and later and comprises a roughcast timber frame structure with a pantile roof.
- 3.3.319 The setting of the asset is informed by its roadside settlement location and by its relationships with the listed and non-designated buildings in its vicinity which positively contribute to the character of Brown Street. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its insular settlement focus, the setting does not extend to the draft Order Limits.
- 3.3.320 The Grade II listed 'Mayhews Farmhouse' (**1032677**) is located in a former farmyard on the eastern flank of Brown Street close to the southern extent of the Brown Street linear hamlet, and 1.4 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the early 16th century with an extension added around 1550-70 and comprises a plastered timber frame structure with a thatched roof.
- 3.3.321 The setting of the asset is informed by its location within a former farmyard and by its relationship with the surviving non-designated outbuildings, which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the asset and its outbuildings have a historical and former functional relationship. Due to the loss of function and the majority of its former outbuildings the setting of the asset makes a moderate contribution to the asset's value, but due to its restricted settlement focus and overall distance, the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.3.322 A **low value** medieval artefact scatter (**2268**) of evidential value is recorded at 'Stack Pightle' within the draft Order Limits, with Mendlesham Road within the south of the land parcel, and 1.2 km south-east of Cotton. A fieldwalking survey identified 87 late 13th century pottery fragments and iron shears near a pond location.
- 3.3.323 A **low value** medieval artefact scatter (**2269**) of evidential value is recorded at 'Burnt House Field' within the draft Order Limits, 220 m east of Oak Farm Lane, and 1.2 km west of Mendlesham. A fieldwalking survey identified 36 medieval pottery fragments. Five post medieval 18th century pottery fragments have also been recovered.
- 3.3.324 A **low value** medieval artefact scatter (**2265**) of evidential value has been recorded at 'Garden Pightle', Wicks Farm within the draft Order Limits, immediately west of Potters Lane, and 1.6 km west of Mendlesham. A total of 41 13th and 14th century

pottery sherds were identified during a fieldwalking survey, with an unknown quantity of early medieval pottery sherds also identified.

- 3.3.325 A **low value** medieval artefact scatter (**2288**) of evidential value is recorded at 'Little Mendlesham Field' within the draft Order Limits, immediately west of Lambert's Lane, and 1.1 km north-west of Cay Hill. A fieldwalking survey identified 41 pottery fragments, six of which were datable to the 13th to 14th centuries.
- 3.3.326 A **low value** medieval artefact scatter (**2289**) of evidential value is recorded at 'Middle Catts' within the draft Order Limits, immediately west of and including Lambert's Lane within its eastern boundary, and 890 m north-west of Cay Hill. A fieldwalking survey identified 106 pottery fragments, five of which were datable to the 13th century, and 93 of which were 13th to 14th centuries. One early medieval pottery fragment was also identified.
- 3.3.327 A **medium value** concentration of three assets were noted at Wickham Abbey Farm, at the same site as Abbey Farmhouse (**1182599**), approximately 5 m from the draft Order Limits, and 800 m south-west of Wickham Street. A medieval silver coin of Edward III dating between 1369-1377 and minted in York (**2166**) has also been recorded by the PAS in the area of the moat island. The assets are of evidential and historical value and are as follows:
- Wickham Abbey Farm (**2208**) is marked as the site of Benedictine cell of four monks associated with Colchester Priory c.1135 to 1164 during the early reign of King Stephen. This cell was likely associated with the Church at St. Johns. The Wickham lands remained with St. Johns until the Reformation where the land was granted to Sir Richard Freston of Mendham in 1542. The Abbey had a grant of free warren in their demesne lands with the lands likely run as a grange of the Abbey. Sherds of medieval pottery have been found to the north of the farm buildings by Basil Brown, however no monastic remains have been identified
  - Wickham Abbey Farm Farmstead (**2209**), which comprises the Grade II listed Abbey Farmhouse (**1182599**) and the post medieval non-designated working agricultural buildings
  - A small moat island (**2207**) was excavated by Basil Brown c.1937 and identified a footbridge as well as a 3' (.90 m) floor of greenish clay. The island may represent the site of a moated dovecote, with the island also noted on the OS first edition mapping. The HER indicates the site has since been levelled and partly covered by agricultural buildings (piggeries). A scatter of medieval peg tile was also found on the site of the dovecote in 1976
- 3.3.328 A **medium value** medieval moat site and artefact scatter (**2263**) of evidential and historical value is recorded at Potter's Farm (**2519**) discussed in the post medieval section below. The moat and artefacts are recorded approximately 5 m west of the draft Order Limits, 300 m south of Mendlesham Road, and 1.8 km west of Mendlesham. The moat is recorded by the HER as square, with an artefact scatter found within the moat island during a fieldwalking survey. Irregular water features associated with the post medieval farm shown on the 1958 OS mapping are recorded as infilled c.1965.
- 3.3.329 A **low value** medieval artefact scatter (**2276**) of evidential value is recorded at 'Church Meadow' approximately 5 m east of the draft Order Limits gas pipeline cathodic protection, 30 m west of the draft Order Limits, immediately east of Potter's Lane, and 1.5 km west of Mendlesham. A fieldwalking survey identified 47 pottery fragments, four of which were datable to between the 13th and 14th centuries.

- 3.3.330 A **low value** medieval artefact scatter (**2277**) of evidential value is recorded at 'Carters' approximately 10 m west of the draft Order Limits, 15 m west of Potter's Lane, and 1.6 km west of Mendlesham. A fieldwalking survey identified 32 pottery fragments of which three were datable to between the 13th and 14th centuries. One lava quern fragment was also identified. A further **low value** medieval artefact scatter (**2278**) of evidential value is also recorded at 'Carters' approximately 40 m to the south. The fieldwalking survey at this location identified 33 pottery fragments, of which eight were datable to between the 14th and 15th centuries. One post medieval 17th century pottery fragment and one undated lava quern fragment was also identified.
- 3.3.331 A **low value** medieval artefact scatter (**2262**) of evidential value has been recorded at Old Farm (**2517**), with the post medieval farm discussed in the appropriate section below. The artefact scatter is recorded approximately 40 m east of the draft Order Limits, immediately west of Hoggars Road, and 1.3 km south-west of Mendlesham. A fieldwalking survey undertaken between 1969 and 1970 identified medieval pottery adjacent to the north-west of a medieval moated site at Old Farm.
- 3.3.332 A **low value** medieval artefact scatter (**2271**) of evidential value is recorded at 'Little Barn Meadow' approximately 80 m west of the draft Order Limits, immediately west of Eldens Lane, and 1.3 km north-west of Cay Hill. A fieldwalking survey identified 92 pottery fragments, 17 of which have been dated to the 13th to 14th century.
- 3.3.333 A **low value** medieval artefact scatter (**2273**) of evidential value is recorded at 'Bruses' approximately 130 m north-east of the draft Order Limits, immediately east of Hoggars Road, and 1.2 km south-west of Mendlesham. A fieldwalking survey identified four pottery fragments, one possibly dating to the 12th century and three to the 13th to 14th century. A further 20 post medieval pottery fragments comprising one 17th century fragment and 19th century fragments have also been identified.
- 3.3.334 A **medium value** medieval artefact scatter and possible moat (**2282**) of evidential and historical value is recorded at 'Pond Meadow' approximately 80 m west of the draft Order Limits, 230 m north of Mendlesham Road, and 1.5 km north-west of Mendlesham. The land parcel marks the location of a small flattened possible moat, identified by a cropmark. Aerial imagery suggests the moat may be oblique in plan. A fieldwalking survey of the location identified eighty six 13th to 14th century pottery fragments.
- 3.3.335 A **low value** medieval artefact scatter (**2275**) of evidential value is recorded at 'Further Barn Close' approximately 20 m west of the draft Order Limits, immediately south of Mendlesham Road, and 1 km south-east of Cotton. A fieldwalking survey identified 77 pottery fragments, four of which were datable between the 13th and 14th centuries.
- 3.3.336 The **medium value** medieval moat at Mellis Hall (**2291**) of evidential and historical value is approximately 170 m west of the draft Order Limits, 350 m south-east of Willow Lane, and 850 m south-east of Dandy Corner. The moat is recorded as complete and formerly surrounded Mellis Hall. The moat is recorded by the HER as '*immediately west of two moated sites shown on early maps and now only surviving as earthworks*'.
- 3.3.337 A **low value** medieval artefact scatter (**2283**) of evidential value is recorded at 'Cottage Meadow' approximately 200 m east of the draft Order Limits, immediately south of Mendlesham Road, and 1.1 km north-west of Mendlesham. A fieldwalking survey identified 32 predominantly 13th and 14th century pottery fragments. Three early medieval pottery sherds have also been identified.

- 3.3.338 A **low value** medieval artefact scatter (**2279**) of evidential value is recorded at 'First Birds' approximately 230 m east of the draft Order Limits, immediately west of Hoggars Lane, and 800 m north of Cay Hill. A fieldwalking survey identified 28 pottery fragments of which 24 were datable to between the 13th and 14th centuries, one to the 13th century and three to the 15th century.
- 3.3.339 A **low value** medieval artefact scatter (**2290**) of evidential value is recorded at 'First Paradise' approximately 200 m south, 230 m east, and 295 m west of the draft Order Limits, immediately east of Hoggars Road, and 1 km north of Cay Hill. A fieldwalking survey identified five pottery fragments.
- 3.3.340 A **low value** medieval artefact scatter (**2270**) of evidential value is recorded at 'First Birds' approximately 230 m east of the draft Order Limits, immediately west of Hoggars Road, and 760 m north of Cay Hill. A fieldwalking survey identified 228 pottery fragments of which nine have been dated to the 13th century, 27 dated to the 13th to 14th century, and two to the 14th century. Four lava quern fragments have also been recovered.
- 3.3.341 A **low value** medieval artefact scatter (**2284**) of evidential value is recorded at 'Little Carrs' approximately 240 m east of the draft Order Limits, 10 m north of Hoggars Road, and 1.2 km west of Mendlesham. A fieldwalking survey identified 60 pottery fragments, three of which were identified to be 13th to 14th century in date, and one dating to the 15th century. Three post medieval 17th century pottery sherds have also been identified, as well as five lava quern fragments. The HER also indicates this land parcel also contains two L-shape ponds of unknown date.
- 3.3.342 A **low value** medieval artefact scatter (**2280**) of evidential value is recorded at 'Berrys Meadow' approximately 230 m south-east of the draft Order Limits, 230 m south-west of Oak Farm Lane, and 1.2 km west of Mendlesham. A fieldwalking survey identified 37 13th and 14th century pottery fragments.
- 3.3.343 A **medium value** location of a medieval deer park site (**2238**) is marked by the HER as a point approximately 50 m west of the draft Order Limits, 100 m north-east of Willow Lane, and 500 m east of Dandy Corner. The deer park is first recorded in 1466 and is associated with the Grade II moated site of Hempnalls Hall (**1180451**) to the south-west. The extent of the deer park has not been noted by the HER, however it is possible that the deer park may have extended to within the draft Order Limits. This asset is of evidential and historical value.
- 3.3.344 A **medium value** medieval moat at Hempnalls Hall (**2252**) of evidential and historical value is recorded surrounding the 16th to 17th century Grade II Hempnalls Hall (**1180451**) approximately 160 m south-west of the draft Order Limits, immediately north of Willow Lane, and 280 m south-east of Dandy Corner. The land was originally situated within the settlement of Caldecota (*Kaldecotes, Caldecoten, Caldencotan*) mentioned in the Domesday Book of 1086. Garden works have identified a cragstone retaining wall underpinning a revetment on the south-western side of the moat island, with traces of mortared flint and brick revetment on the southern, western and eastern sides. A Grade II bridge (**1032280**) crosses the northern moat. Medieval phases of a dwelling have been found surrounding and under the existing hall including foundations of a wall extending southward from the south of the house in the garden. Two 14th century tiles and two terracotta architectural fragments possibly reclaimed from the scheduled Westhorpe Hall (**1016697**) have also been identified.
- 3.3.345 The **medium value** moated mound, likely that of a windmill mound (**2250**) of evidential and historical value is recorded approximately 70 m south-west of the draft Order Limits, 90 m south-east of Hill Farmhouse (**1032730**), and 890 m east of

Gipping. The HER indicates the mound was approximately 5' (1.5 m) high, surrounded by a 40' (12 m) diameter moat. Pottery has been identified dating between the 13th and 14th centuries from a buried turf line below the mound as well as the surface. The HER indicates that the mound may have been destroyed by ploughing, however OS mapping suggests that the mound may still be present, though this has not been confirmed.

- 3.3.346 A **medium value** possible moat and artefact scatter (**2267**) of evidential and historical value are recorded at 'Berry's Meadow' approximately 20 m south-west of the Grade II Lodge Cottage (**1352504**). The moat and artefacts are recorded approximately 70 m south-east of the draft Order Limits, 50 m south-west of Oak Farm Lane, and 1.2 km north-west of Mendlesham. Cropmarks at this land parcel suggests a square possible moat enclosure, with a fieldwalking survey identifying five 12th century pottery fragments and twelve 13th to 14th century pottery fragments. Post medieval pottery comprising of five 16th century pottery fragments, a number of 17th century fragments have also been identified, as well as Romano-British artefacts, an undated bronze sheet fragments and seven lava quern fragments from within the enclosure bounds.
- 3.3.347 A **medium value** moated site and artefact scatter (**2266**) of evidential and historical value has been recorded at 'Backhouse Field', Wicks Farm 75 m west of the draft Order Limits, 75 m west of Potters Lane, and 1.7 km west of Mendlesham. The HER records the land parcel comprises of a large square moat, the eastern arm of which is extant. A total of forty 13th to 14th century pottery fragments and a lava quern fragment have also been recovered during a field walking survey.
- 3.3.348 A **medium value** medieval moat site and artefact scatter (**2264**) of evidential and historical value are recorded at Eldens approximately 80 m south-west of the draft Order Limits, 10 m west of Eldens Lane, and 1.8 km south-west of Mendlesham. The square moat is recorded by the HER as being 'ploughed out' but potentially visible as a cropmark. Six 13th to 14th century unglazed pottery sherd have also been identified here during a fieldwalking survey.
- 3.3.349 A **low value** medieval artefact scatter (**2261**) of evidential value has been recorded approximately 200 m east of the draft Order Limits, 5 m west of Hoggars Road, and approximately 630 m north of Cay Hill. A fieldwalking survey undertaken between 1969 and 1970 identified 13th and 14th century and late medieval pottery. A single post medieval pottery sherd was also identified.
- 3.3.350 A **medium value** medieval square moat with outlying pond (**2251**) is recorded at Cotton Lodge of evidential and historical value, approximately 280 m west of the draft Order Limits, 500 m east of Stonham Road, and 1.9 km west of Mendlesham. The moat occupies the south-eastern portion of the post medieval Cotton Lodge Farmstead (**2443**), with the early post medieval Cotton Lodge (**1285476**) currently occupying the moat island.
- 3.3.351 A **medium value** medieval artefact scatter and possible moat (**2272**) of evidential and historical value is recorded at 'Barn Missips' approximately 410 m west of the draft Order Limits, 410 m west of Hoggars Road, and 1 km south-west of Mendlesham. The land parcel marks the location of a small moat, identified by a soilmark. A fieldwalking survey of the location identified quantity of 105 pottery fragments, 32 of which date to the 13th century, and 73 date to the 13th to 14th century. Two lava quern fragments have also been recovered.
- 3.3.352 The **low value** site location of the former medieval period Mendlesham Green (**2243**) of evidential and historical value is located approximately 450 m east of the draft

Order Limits, predominantly focussed along Cay Hill and Old Station Road and around the current settlement of Mendlesham Green.

- 3.3.353 The PAS reports a **low value** worn and damaged mid-14th century silver medieval halfpenny of Edward III's 'florin' (**2310**) being found in the Cay Hill area outside the draft Order Limits. The asset has evidential and historical value.

## Middlewood Green and Stowmarket

### *Designated Heritage Assets*

#### Stowupland CP

- 3.3.354 The Grade II\* listed 'Columbine Hall' (**1352322**) is located within a moat at the northern end of a private road north of Gipping Road on the northern outskirts of Stowupland, and 1.4 km west-north-west of draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The asset comprises a major fragment of a manor house, now a farmhouse, of late 14th century date with alterations made around 1600. The asset is constructed of flint rubble up to the first floor with quoins and 18th and 19th century red brick patching. The upper storey is of plastered timber frame construction, which is jettied to the north and west over the moat.
- 3.3.355 The setting of the asset is informed by its location inside the moat and by its relationships with its non-designated outbuilding within the moat and the farming complex immediately south of the moat, the majority of which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape with which the asset, its outbuilding and the associated farm complex have a historical and ongoing functional relationship. The moat island is now a garden and lawn area associated with the asset and beyond the moat is a surrounding belt of trees, which is particularly dense to the east. The setting of the asset is private and secluded and unaffected by the 20th and 21st urban expansion of Stowupland to the south. The setting, therefore, makes a considerable contribution to the value of the asset, but due to screening by the mature trees of the asset's grounds and overall distance, the setting does not extend to the draft Order Limits.
- 3.3.356 The Grade II listed 'Pasture Cottage' (**1182022**) is located on the western flank of Gipping Road c. 1.3 km north-east of the centre of Stowupland and c. 1.3 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the early 16th century with 17th, 18th and 19th century alterations and is a fragment of a larger house which has otherwise been demolished. The house comprises a plastered timber frame structure with a pantile roof.
- 3.3.357 The setting of the asset is informed by its roadside location within its large garden and by its relationship with its non-designated out buildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationship with the post medieval Gipping Farm complex immediately to the east, which includes the Grade II listed 17th century Gipping Farmhouse. The surrounding agricultural landscape, with which the asset and its outbuildings have a historical relationship, also positively contributes to the setting. The grounds of the asset, and the farmyard to the east, are defined by mature tree lined hedgerows very much limiting intervisibility between the assets and, along with the farmhouse and its outbuildings, entirely screen views eastwards from the cottage. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its restricted settlement focus and by its garden boundaries and the farm complex, the setting does not extend to the draft Order Limits.

- 3.3.358 The Grade II listed 'Orchard House' (**1032659**) is located on the eastern flank of Mill Street on the southern edge of Stowupland and 1.6 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built in the early-to-mid 16th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.359 The setting of the asset is informed by its roadside location within its own grounds and by its relationship with the non-designated property immediately to the south, which is recorded on the first edition OS map of 1885. Its once semi-rural setting has, however, been eroded by 20th century residential development along Mill Street to the north and south, by the imposition of large industrial units immediately to the north and by the construction of the A1120 55 m to the east, which has introduced noise and pollution into the setting. The setting of the asset, therefore, makes a minor contribution to the asset's value and due to its restricted roadside nature, the setting does not extend to the draft Order Limits.
- 3.3.360 The Grade II listed 'Old Farmhouse' (**1032658**) is located on the western flank of Mill Street c. 380 m south of the southern edge of Stowupland and 1.7 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset was built in the late 15th century and comprises a plastered timber frame three cell open hall farmhouse with a thatched roof.
- 3.3.361 The setting of the former farmhouse is informed by its roadside location within dispersed settlement along Mill Street and by its relationships with the listed and non-designated buildings that contribute positively to the character of the throughfare. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and former functional relationship. The garden of the asset is defined by mature tree lined hedgerows allow for glimpsed views into and out of the asset's grounds affording it some privacy. Due to the loss of the working farm, the setting of the farmhouse makes a moderate contribution to value, and because the restricted roadside settlement nature of the setting, it does not extend to the draft Order Limits.

### Earl Stonham CP

- 3.3.362 The Grade I listed 'Church of St Mary the Virgin' (**1033223**) is located on the northern flank of the A1120 in the hamlet of Earl Stonham, c. 1.4 km south-east of Forward Green and c. 1.9 km east of the draft Order Limits. The asset is situated on the western flank of a shallow tributary valley of the Gipping river c. 3.4 km to the south-west. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church comprises a nave, chancel, north and south transepts, south porch and west tower of largely 14th and 15th century date, although there is some evidence of 13th century fabric in the chancel. The church was restored in 1874 and constructed of flint rubble with freestone dressings. The nave roof is slated, the chancel roof is concrete plain tiled whilst the remaining roofs are leaded.

The setting of the asset is informed by its roadside location within its large graveyard and by its relationships with the listed and non-designated post medieval buildings of the Church Farm complex to the west and the Whitehouse Farm complex to the east, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship, although this link has been partially eroded by the imposition of a large intrusive industrial complex immediately to the north of the graveyard. The setting of the asset, therefore, makes a moderate contribution to its value, but due to

the topography, development and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.3.363 The Grade II listed 'Larters' (**1033185**) is located on the northern flank of Larters Lane near the northern extent of the linear settlement of Middlewood Green and 630 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The core of the asset dates to the 15th century but it was majorly remodelled in c. 1550-70. The asset comprises a plastered timber frame house with a slated 19th century roof.
- 3.3.364 The setting of the asset is informed by its semi-rural roadside location and by its relationship with its non-designated outbuilding immediately to the north-west, which is recorded on the first edition OS map of 1884. The setting is further informed by the asset's relationships with later small-scale 20th residential development along Larters Lane and by the surrounding agricultural landscape with which the asset and its outbuilding have a historical relationship. The later development is not intrusive and so the setting of the asset makes a considerable contribution to its value, but due to its restricted settlement focus, the setting does not extend to the draft Order Limits.
- 3.3.365 The Grade II listed 'Cherry Tree Farmhouse' (**1352036**) is located on the eastern flank of Blacksmiths Lane towards the southern extent of the linear settlement of Middlewood Green and 670 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse is of early-to-mid 16th century date with a late 16th century extension and comprises a plastered timber frame structure with a plain tile roof.
- 3.3.366 The setting of the asset is informed by its roadside semi-rural location and by its relationship with the non-designated buildings to the south, which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship, although this link as been partially eroded by the imposition of 20th century residential development along the western flank of Blacksmiths Lane. Due to the encroaching development, the setting of the asset makes a moderate contribution to its setting, but due to its restricted settlement focus, the setting does not extend to the draft Order Limits.
- 3.3.367 The Grade II listed 'Spalls Farmhouse' (**1033192**) is located near the western extent of the linear settlement of Forward Green, at the northern end of Mill End Lane and 220 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The core of the former farmhouse probably dates to the 15th century with an extension added in the late 16th or early 17th centuries. The asset comprises a plastered timber frame structure with a thatched roof. The farmhouse forms part of a historical farmstead known as Spalls Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2523**). The farmstead dates to the 15th century with later 19th century alterations and additions. The farmstead has historical value.
- 3.3.368 The setting of the farmhouse is informed by its isolated location within its overgrown grounds, which largely obscure views into and out from the asset. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and former functional relationship. Due to its loss of function and the dereliction of its outbuildings the setting of the asset makes a minor contribution to its value, however, due to the proximity of the Project, the setting extends to the draft Order Limits.

- 3.3.369 The Grade II listed 'The Rookery' (**1182556**) is located on the north-western flank of Fen Lane 560 m west of Earl Stonham and c. 1.3 km north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the early 16th century with alterations made around 1600 and comprises a plastered timber frame structure with a concrete tiled roof.
- 3.3.370 The setting of the asset is informed by its location within a working farm complex, however, the farm outbuildings recorded on the first edition OS map of 1884 has been replaced by modern hanger style barns. The setting is further informed by the wider agricultural landscape with which the asset has a historical and functional relationship. The modern farm outbuildings, whilst functional and appropriate in a farming complex, architecturally clash with the farmhouse and so the setting of the asset makes a moderate contribution to its value. Due to its focus on the farmyard and its immediate agricultural landscape, the setting of the asset does not extend to the draft Order Limits.
- 3.3.371 The Grade II listed 'Chapel Farmhouse' (**1033220**) is located on the south-eastern flank of Fen Lane c. 820 m south-west of Earl Stonham and c. 1.1 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The core of the former farmhouse date to the late 15th of early 16th centuries but was remodelled in the early 17th century when a cross wing was also added. The asset comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.372 The setting of the asset is informed by its roadside rural location and by its relationship with its non-designated outbuildings to the north-east and the non-designated residence to the south-west, most elements of which are recorded on the first edition OS map of 1884. The setting is further informed by the wider agricultural landscape with which the asset has a historical and former functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value but due to overall distance and the focus of the setting being restricted to the immediate rural landscape, it does not extend to the draft Order Limits.
- 3.3.373 The Grade II listed 'Fen House' (**1182656**) is located on the south-eastern flank of Fen Lane c. 650 m north-west of Creting St Mary and c. 680 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 15th to early 16th centuries with alterations and extensions made in the 20th century. the asset comprises a plastered timber frame three-cell open hall house with s thatched roof.
- 3.3.374 The setting of the asset is informed by its roadside location and by its relationship with the farming complex c. 140 m to the north-east, which includes the Grade II listed post medieval Fen Farmhouse. The setting is further informed by the early 20th residential dwelling on the opposite side of Fen Lane and by the wider agricultural landscape with which the asset has a historical and former functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value but due to overall distance and the focus of the setting being restricted to the immediate rural landscape, it does not extend to the draft Order Limits.

### Stonham Parva CP

- 3.3.375 The Grade I listed 'Church of St Mary' (**1352062**) is located at the western extent of Little Stonham west of Church Lane and c. 2.4 km east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic

and communal values. The medieval parish church comprising a nave, chancel, west tower, south chapel and south porch, was majorly remodelled in the early 16th century. The church is largely plastered stone rubble with freestone dressing whilst the tower is of flint rubble with freestone dressing.

- 3.3.376 The setting of the asset is informed by its village location and by its relationship with the scoped out Grade II listed post 17th century Little Stoneham Hall and its two Grade II listed 16th/17th century barns to the north. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. the graveyard of the church is open to the east allowing for an attractive view of the church whilst a mature tree lined hedgerow defines its boarder to the south, west and north partially obscuring views to and from the asset. the setting of the asset, therefore, makes a considerable contribution to its value, but due to the screening by its boundaries and by the topography, development and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.377 The Grade II\* listed 'Clock House' (**1284270**) is located on the western flank of Clockhouse Lane c. 1 km north of Little Stoneham and c. 2.4 km east of the draft Order Limits. is of **high value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse date to the mid-to-late 15th century with major alterations undertaken in c. 1600. The asset comprises an open hall house with the parlour remodelled and extended around 1600 to form a cross wing. The house is a plastered timber frame structure with plain tiled roofs.
- 3.3.378 The setting of the asset is informed by its former farmyard location and by its relationship with its non-designated outbuildings on either side of Clockhouse Lane, although those to the east have been converted into a separate residence. The setting is further informed by the surrounding agricultural landscape with which the asset and its outbuildings have a historical and former functional relationship. The asset has a large garden and lawned area, which contains scattered trees and is defined by a high, tree lined hedgerow likely in place to screen the asset from pylons in the landscape c. 300 m to the east. the setting of the asset, therefore, makes a moderate contribution to its value, but due to the screening by the asset's boundaries and by the topography, development and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

### [Creeting St Peter CP](#)

- 3.3.379 The Grade I listed 'Church of St Peter' (**1352072**) is located to the north of Mill Lane c. 630 m south-south-east of the centre of Creeting St Peter and 360 m west-north-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The asset largely dates to the 14th and 15th centuries but with evidence of later maintenance and alterations including largely 19th century roofs. The church is constructed of flint rubble with freestone dressings with the nave largely plastered and has plain tiled roofs.
- 3.3.380 The setting of the asset is informed by its largely secluded location within its grounds and by its relationship with the Grade II listed post medieval former rectory to the east and the former rectory's outbuildings. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The church serves the parish of Creeting St Peter, which comprises dispersed farmsteads, hamlets and villages. The largest population centre is the small village of Creeting St Peter to the north-north-west. There is, however, no intervisibility between the settlement and the church due to the imposition of the A14 and its now mature planting. The setting of the asset, therefore, makes a moderate contribution

to its value and due to the proximity of the Project within the parish, the setting extends to the draft Order Limits.

- 3.3.381 The Grade II listed 'Willow Green Farmhouse' (**1182367**) is located on the western flank of Pound Road within Creting St Peter, and c. 580 m south-west of the draft Order Limits. The former farmhouse is of probable 15th century date with 17th century alterations and comprises a roughcast timber frame structure with a thatched roof.
- 3.3.382 The setting of the asset is informed by its roadside village location and by its relationships with the scatter of non-designated, post medieval building which contribute to the character of Creting St Peter. The setting is also informed by the agricultural land to the west with which the asset has a historical and former functional relationship. There has been some small-scale 20th century expansion of the settlement and some infill development, not all of it architecturally sympathetic. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its restricted settlement focus, the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.3.383 The **medium value** medieval partial remains of a moated manor at Roydon Hall (**2241**) of evidential and historical value is located within the draft Order Limits, 560 m east of Creting Road, and 900 m south-west of Broad Green. The site is also recorded as the **medium value** late medieval to early post medieval location of the 16th century Roydon Hall farmstead complex and garden (**1033215**, **1284584**, **1352074**) of aesthetic, evidential and historical value.
- 3.3.384 A **medium value** medieval circular moat location also including 13th to 14th pottery and mortar findspot (**2249**) of evidential and historical value is recorded by the HER within the draft Order Limits approximately 40 m north of the River Gipping, and 500 m east of Badley Hill. The moat is recorded by the HER on the alluvial floodplain of the River Gipping and levelled by bulldozer in November 1959. The site currently appears within the landscape as an oval soil mark with an approximately 8 m wide ditch. A further scatter of red brick and tile fragments are also noted by the HER at this location in 1979. Aerial imagery of the moated site (**2249**) marks the moated enclosure as an earthwork in 1946 and as a cropmark on later photography. Aerial imagery also shows a smaller and narrower curvilinear ditch forming an attached enclosure to the north.
- 3.3.385 A **low value** findspot of a lava quern fragment (**2242**) of evidential value has been identified approximately 140 m east of the draft Order Limits, 360 m west of Mill Lane, and 1 km south of Broad Green.
- 3.3.386 A **low value** land parcel associated with the medieval Middlewood Green, Stonham Earl (**2246**) of evidential and historical value is located approximately 320 m east of the draft Order Limits, with Blacksmiths Lane situated within the eastern boundary of the land parcel, and the current settlement of Middlewood Green located within the south of the land parcel. The green is visible on Hodkinson's Map of 1783.
- 3.3.387 The findspot of a medieval seal matrix (**2287**) has been recorded as a PAS find. It was found outside the draft Order Limits near Broad Green village. The copper alloy artefact dates to the 14th century and is inscribed with 'LE CONTRE . SEAV . DE MELERE' meaning 'the counter deal of Melere'. The item is of **low value** and has evidential value.

#### **Needham Market and Ringshall**

## *Designated Heritage Assets*

### Creeting St Mary CP

- 3.3.388 The Grade II\* listed 'Church of St Mary' (**1033245**) is located at the south-western extent of the linear settlement of Creeting St Mary, c. 780 m east of an draft Order Limits access road and c. 1.07 km east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. There is evidence of 12th century origins but the fabric of the church largely dates to the 14th and 15th centuries with much remodelling in 1884-7. The church is constructed of flint rubble with freestone dressing and plain tiled roofs.
- 3.3.389 The setting of the asset is informed by its moderately isolated location just beyond the settlement and by its relationship with the non-designated building immediately to the north, which may be the rectory recorded on the first edition OS map of 1884. The setting further informed by its relationships with the scatter of non-designated, post medieval building at the south-western end of Creeting St Mary, which contribute to the character of the settlement. The surrounding agricultural landscape, with which the asset has a historical relationship, also positively contributes to its setting. The setting of the asset, therefore, makes a considerable contribution to its value, but as the Project is contained within other parishes to the west, the setting does not extend to the draft Order Limits.
- 3.3.390 The Grade II listed 'Gooserye Farmhouse' (**1033212**) is located at the southern limit of an unnamed road c. 270 m south-east of St Marys Road, c. 370 m north-east of the centre of Needham Market, 1.3 km north-east, and 1.7 km south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse is of late 15th or early 16th century date with mid-16th century alterations. The asset comprises a plastered timber frame structure with s concrete plain tiled roof.
- 3.3.391 The setting of the former farmhouse is informed by its location within the Gipping valley, its relationship with the post medieval Alder Carr Farm complex 60 m to the north, and by its relationship with the largely post medieval outskirts of Needham Market, which line the southern bank of the Gipping river to the south-west. The setting of the asset is further informed by the surrounding agricultural landscape with which the asset has a historical and former functional relationship. The erosion of the rural landscape by the post medieval and modern expansion of Needham Market and the introduction of railway and highway infrastructure means that the setting of the asset makes a minor contribution to its value, but due to the focus of the setting being restricted to the immediate river valley, it does not extend to the draft Order Limits.

### Badley CP

- 3.3.392 The scheduled monument 'Chantry (site of)' (**1006030**) is located towards the south-western end of the Badley conservation area (**CA45**) at the western end of Badley Lane, Badley, and c. 840 m south-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. A chantry is recorded in Badley at the Reformation, which was founded by Edmund Rafeman alias Alcocke of Bradley Hall to run for a period of 50 years after his death. Several flints, including at least two that were dressed as quoins, were found in 1968 during

excavation for electricity post and these were interpreted as evidence of the structure.

- 3.3.393 The Grade II\* listed 'Barn 100 Metres South East of Badley Hall' (**1231085**) is located within the bounds of the scheduled monument, whilst the Grade II\* listed 'Badley Hall' (**1231083**), the Grade II listed 'Bakehouse 15 Metres South Of Badley Hall' (**1278291**) and the Grade I listed redundant 'Church of St Mary' (**1231082**) are in proximity. The barn and redundant church are of **high value**, whilst the Grade II assets are of **medium value**, based on their designations and their evidential, historical and aesthetic values. The weatherboarded timber frame barn (**1231085**) dates to the 15th or early 16th centuries with a single-bay stable added to the west end in 17th century. The barn stands on a large plinth of flint rubble with dressings mainly of red brick. Badley Hall (**1231083**), now a farmhouse is the surviving service range of an early 16th century manor house, probably built for Sir Edmund Poley (d. 1548) with the remainder of the house demolished in c. 1759. The asset comprises a plastered timber frame structure with is plain tiled roof. The bakehouse (**1278291**), now known as The Cottage, was built as a bakehouse for Badley Hall in the early to mid-16th century. the asset comprises a pebble-dashed timber frame structure with a plain tiled roof and partly underbuilt in 19th century red brick. The church (**1231082**) comprises a nave, chancel, west tower and south porch largely of 15th century date but much of the fabric is now 15th century but with evidence of 16th and 17th century alterations and maintenance. The asset is largely constructed of flint rubble with freestone dressing, whilst the tower is of flint and brick rubble, with the belfry stage rebuilt in 16th century orange brick.
- 3.3.394 The setting of the and the church (**1231082**) is informed by its relationships with the scheduled monument, the listed and non-designated elements of the Badley Hall Farm complex and with the non-designated elements of the conservation area (**CA45**), particularly the tree lined avenue (Badley Walk), which links the complex to the B1113 Stowmarket Road to the north-east. The surrounding agricultural landscape, with which the asset has a historical relationship, also contributes positively to the setting. The setting of the asset, therefore, makes a considerable contribution to its value and, as the Project crosses the parish to the north-east of the asset, the setting extends to the draft Order Limits.
- 3.3.395 The setting of the scheduled monument (**1006030**), the hall (**1231083**), barn (**1231085**) and bakehouse (**1278291**) is shared and informed by the interrelationship between the designated assets and by their relationships with the non-designated buildings of the Badley Hall Farm complex, which are largely apparent on the first edition OS map of 1884. The setting of the Badley Hall Farm buildings and the chantry is also informed by their relationships with the non-designated elements of the conservation area (**CA45**) as noted above, and their relationships with the listed church (**1231082**) The surrounding agricultural landscape, with which the elements of the Badley Hall Farm complex have a historical and ongoing functional relationship, also contributes positively to the setting. The assets are contained within a wider area including numerous trees and defined in part by tree belts effectively screening the assets from the byways of the surrounding landscape. The setting of the assets, therefore, makes a considerable contribution to their values, but due the focus of the setting being on the former manorial site and farming complex and the immediate agricultural landscape, it does not extend to the draft Order Limits.
- 3.3.396 The Grade II listed 'The Dower House' (**1231088**), formally Doveshill Farmhouse, is located on the north-eastern flank of the B1113 Stowmarket Road at the north-western extent of Needham Market, 50 m north-east and 230 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its

evidential, historical and aesthetic values. The former farmhouse dates to the late medieval, but with complex 16th and 17th century alterations, and comprises a plastered timber frame structure with a cross wing and a plain tiled roof.

- 3.3.397 The setting of the asset is informed by its roadside location and by its relationship with its former outbuildings immediately to the south-east, which are now a separate residence. The setting is further informed by the surrounding agricultural landscape with which the asset and its outbuildings have a historical and former functional relationship. There has, however, been some 20th century infill development to the north and south of the asset and the railway, 80 m to the north-east, was imposed onto its setting during the 19th century. The setting of the asset, therefore, makes a moderate contribution to its value and due to the proximity of the Project, the setting extends to the draft Order Limits.

### Combs CP

- 3.3.398 The Grade I listed 'Church of St Mary' (**1033001**) is located off Church Approach, c. 870 m north-east of the centre of Combs, on the southern outskirts of Stowmarket, 2 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church is largely 14th and 15th century in date and comprises a nave, chancel, north and south aisles, west tower, and north and south porches. The asset is built of flint and septaria rubble with reused limestone blocks and leaded and plain tiled roof. The church was restored in 1867 by H. J. Green of Norwich.
- 3.3.399 The setting of the asset is informed by its largely isolated location within its graveyard and by its relationship with the non-designated Comps Hall 50 m to the south. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship, although this link has been partially eroded by the 20th and 21st century expansion of Stowmarket to the north. The expansion of Stowmarket has also subsumed the settlement of Combs Ford, further eroding the asset's links to its historic environment. The setting of the church, therefore, makes a moderate contribution to its value, but due to the Project being located within the neighbouring parishes, the setting does not extend to the draft Order Limits.
- 3.3.400 The Grade II listed assets 'Holyoak Farmhouse' (**1183126**), 'Barn About 50 Metres North West of Holyoak Farmhouse' (**1032956**), 'Granary/Cartlodge Aligned East West 30 Metres North of Holyoak Farmhouse' (**1183144**) and 'Stable Aligned North South 40 Metres North West of Holyoak Farmhouse' (**1033002**) are located at the southern extent of Church Road c. 670 m east of Combs, and c. 1.8 km north-west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The barn, granary and stable are of post medieval date and reported in the appropriate section below. The farmhouse dates to the early and mid-16th century and comprises a roughcast timber frame structure with a thatched roof.
- 3.3.401 The setting of the assets is shared and informed by their interrelationships and by their relationships with the non-designated outbuildings of the farming complex, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the assets and outbuildings have historical and ongoing functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance and the setting being restricted to the farmyard location and the immediate landscape, it does not extend to the draft Order Limits.

- 3.3.402 The Grade II\* listed 'Ponderosa Post Office Cottage' (**1284144**) is located on the north-western flank of Tannery Road in Combs, and c. 2.6 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The asset comprises two properties built as a single farmhouse. The north/south range comprises an open hall of late 14th century and the east/west parlour cross wing to the south in the late 16th century. The asset comprises a roughcast timber frame structure with a pantiled roof.
- 3.3.403 The setting of the asset is informed by its roadside village location and by its relationships with the scoped out listed and non-designated buildings that contribute positively to the character of Combs. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the settlement focus of the setting it does not extend to the draft Order Limits.

### Barking CP

- 3.3.404 The Grade I listed 'Church of St Mary' (**1231756**) is located of Parsons Lane 630 m north-east of Barking, and c. 380 m east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church dates largely to the 14th and 15th centuries and comprises a nave, chancel, west tower, north and south aisles, a sacristy north of the chancel, and a south porch. It was restored in the 1880s when the upper stage of the 14th century tower was rebuilt, with further restoration works undertaken in 1905.
- 3.3.405 The setting of the asset is informed by its detached location away from the settlement core and by its relationship with the post medieval Grade II listed former rectory to the north and the site of Barking Hall, which was demolished in 1826 and now occupied by Barking Hall Care Home, to the south. The care home likely incorporates elements of an outbuilding of the hall. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.406 The Grade II listed 'Timberleys' (**1231442**) is located on the south-eastern flank of the B1078 Barking Road in Barking, and c. 330 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset is a former farmhouse built in two stages in the 15th century and then around 1600. The house is a plastered timber frame structure with a plain tiled roof.
- 3.3.407 The setting of the asset is informed by its roadside location within the settlement and by its relationship with the Grade II listed Walnut Tree Cottage post medieval residence immediately to the south-west and which is recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and former functional relationship. There has been 20th century residential development on both flanks of Barking Road which has subsumed the asset into the village. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the roadside village focus of the setting, it does not extend to the draft Order Limits.
- 3.3.408 The Grade II listed 'The Old School House' (**1231465**) is located 40 m north-west of the north-western flank of Barking Road at the northern extent of Barking Tye, and 530 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse, which served as the village school in the 19th century, comprises a 15th

or early 16th century open hall house with 16th and 19th century alterations. The asset is a plastered timber frame structure with a plain tiled roof.

- 3.3.409 The setting of the asset is informed by its village location set back from the main road and by its relationships with the Grade II listed 17th century Rectory Farmhouse to the east and the non-listed elements of the Rectory Farm complex to the north, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and former functional relationship. Residential development along Barking Road in the 20th century has annexed the asset into the village and coupled with its loss of function means the setting of the asset makes moderate contribution to its value. Due to the focus of the setting being its village setting, however, it does not extend to the draft Order Limits.
- 3.3.410 The Grade II listed 'Lower Farmhouse' (**1231364**) is located within a working farm complex, 560 m north-west of Barking Tye, and 30 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 15th century with late 16th and late 19th alterations and comprises a pebble dashed timber frame three-cell open house with a concrete tiled roof. The farmhouse forms part of a historical farmstead known as Lower Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2439**). The farmstead has historical and evidential value.
- 3.3.411 The setting of the farmhouse is informed is its location within a working farmyard and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the asset's relationships with more farms to the west and residential dwellings to the south-east. the surrounding agricultural landscape, with which the asset has a historical and ongoing functional relationship also positively contributes to the asset's value. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.412 The Grade II listed 'Mulleys Farmhouse' (**1231757**) is located on the eastern flank of the B1078 Barking Road at the southern extent of Barking Tye, and c. 750 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse is dates to the 16th century or earlier and comprises a roughcast timber frame structure with a plain tiled roof.
- 3.3.413 The setting of the asset is informed by its roadside village location and by its relationship with its former outbuildings to the south, which is now a residential dwelling. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and former functional relationship. There has been some 20th century residential infill development to the north of the asset, but this is sympathetically in the local architectural vernacular and well screened by the asset's mature garden boundaries. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its village and immediate landscape focus, the setting does not extend to the draft Order Limits.

#### [Needham Market CP](#)

- 3.3.414 The Grade I listed 'Church of St John The Baptist' (**1254254**) is located on the north-eastern flank of High Street in Needham Market with King William Street immediately to the north-east. The draft Order Limits lie c. 1.2 km to the west. The asset is of **medium value** based on its designation and its evidential, historical, aesthetic and

communal values. The parish church was largely rebuilt between c. 1470 and 1500 but retains some earlier 13th and 14th century elements. The church comprises a nave, chancel, and south porch with a bell-turret constructed of flint and limestone rubble with freestone dressings and plain tiled and leaded roofs.

- 3.3.415 The setting of the asset is informed by its roadside settlement location within the medieval core of Needham Market and by its relationships with the numerous largely post medieval listed buildings which line the High Street, King William Street and Bridge Street. The 20th century development of the settlement has detached the High Street and its assets from the surrounding agricultural landscape, but this has not diminished the church's dominant presence in the settlement. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the urban expansion of Needham Market and the draft Order Limits passing through neighbouring parishes, the setting does not extend to the draft Order Limits.

### Battisford CP

- 3.3.416 The Grade I listed 'Church of St Mary' (**1033018**) and the Grade II listed 'Church Cottage and Parish Room' (**1352139**) are located within the graveyard of the church in the historic core of the dispersed settlement of Battisford, 1 km north-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church (**1033018**) comprises a nave, chancel, west bell turret, south porch, north chapel and north vestry and is largely of 14th century date, but with evidence of 12th century origins and 15th, 16th and 18th century alterations including the late 18th century brick and flint bell turret, which may be on the site of a medieval tower. The church is constructed of flint rubble with stone dressings and a plain tiled roof. The church cottage (**1352139**) is a rare example of a medieval priest's house and dates to the mid-14th century with evidence of remodelling in c. 1520 and again in the early 19th century. The asset comprises a plastered timber frame structure with a slated early 19th century roof.
- 3.3.417 The setting of the church is informed by its location on the fossilised medieval street plan at the core of the village and by its relationship with and priest's house immediately to the north. The setting is further informed by the asset's relationships with the early post medieval Grade II listed Church Cottages to the south, the mid-16th century Grade II listed Battisford Hall and the 17th century Grade II listed Rose Farmhouse to the west. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and as the Project crosses the parish to the south-east of the asset, the setting extends to the draft Order Limits.
- 3.3.418 The setting of Church Cottage is informed by its restricted graveyard location and by its intrinsic relationship with the church. The mature trees of the graveyard enclose the asset screening views into and out from the cottage creating a sense of privacy and seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its graveyard focus, the setting does not extend to the draft Order Limits.
- 3.3.419 The Grade II listed 'Vale Farmhouse' (**1033020**) is located off an unnamed road 320 m north of Hascot Hill (road), c. 670 m south-east of St Mary's Church in Battisford, and 270 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the early 16th century with an extension added around 1600. The asset comprises a plastered timber frame structure with a Roman pantile roof.

- 3.3.420 The setting of the asset is informed by its farmyard location and by its relationship with its Grade II listed late 17th century barn to the north-east. The setting is further informed by the asset's relationship with its non-designated outbuildings (**2494**), most of which are recorded on the first edition OS map of 1884. The surrounding agricultural landscape, with which the asset has a historical and functional relationship, also contributes positively to the setting. The former fields to the east and south-east, however, have clearly not been worked for several decades and now appear to be wooded rough grazing. The mature vegetation affords the asset seclusion and privacy and so the setting makes a considerable contribution to its value. Due to the mature vegetation reducing the focus of the setting, however, it does not extend to the draft Order Limits.
- 3.3.421 The Grade II listed 'Valley Cottage' (**1284392**) is located on the northern flank of Valley Road, c. 750 m south-east of the historic core of Battisford and 400 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the early 16th century and was extended in the late 16th century. It comprises a plastered timber frame structure with a pantile roof.
- 3.3.422 The setting of the asset is informed by its largely isolated rural location, although a 20th century residence now lies to the east. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its roadside and immediate landscape focus, the setting does not extend to the draft Order Limits.

### Ringshall CP

- 3.3.423 The scheduled monument 'Chapel Farm moated site' (**1006050**) is located adjacent to Chapel Farm, 140 m north of Lower Farm Road, Ringshall Stocks and 630 m west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. The asset comprises an irregular, broad moat, which once included remains of a chapel, apparently destroyed in a rebuilding of c.1910. The chapel was tended by a monk of Hoxne, who had a cell there, probably on the moated area, which has earthworks likely representing buildings. A quarter of a mile to the west, levelling revealed much medieval pottery, early and late, but no structural remains.
- 3.3.424 The setting of the asset is informed by its location within the medieval landscape defined by the cores of surrounding settlements, scattered moated sites and the routes and roadways linking them. This setting has, however, been greatly eroded by field boundary loss, the expansion of many of the settlements including Ringshall Stocks, and by the domineering modern buildings of Chapel Farm. The setting of the asset, therefore, makes a minor contribution to its value, and due to the focus of the setting being much reduced through the loss of the medieval landscape, it does not extend to the draft Order Limits.
- 3.3.425 The Grade I listed 'Church Of St Catherine' (**1283864**) is located 130 m east of Stowmarket Road, on the northern edge of Ringshall and 1.25 km north-east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church contains 11th and 12th century walling, there is evidence of 13th, 14th and 16th century additions and alterations and restorations were undertaken in the 19th century. The asset is built of flint rubble with freestone dressings, several 16th century red brick patches and a plain tiled roof.

- 3.3.426 The setting of the asset is informed by its isolated location separated from the buildings to the south, which includes the 16th century Grade II listed Ringshall Hall and Grade II\* listed associated barn, by a small mature copse. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by the copse, and Muckinger Wood in the intervening landscape, the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.3.427 A **low value** medieval artefact scatter (**2211**) of evidential value has been identified on a plot of land including the draft Order Limits pipeline works, 380 m north-west of the draft Order Limits, immediately north-east of Stowmarket Road (B1113), and within Badley. The evidence comprises of 13th to 14th century pottery including a sherd from shallow dish and 13 courseware body sherds.
- 3.3.428 A **low value** metal detected findspot of a short cross penny and bronze token (**2229**) of evidential value have been identified within the draft Order Limits, approximately 95 m south-west of Hascote Hill (road), and 900 m north-west of Barking.
- 3.3.429 The PAS reports a **low value** complete copper-alloy medieval buckle frame with integral cast plate (**2542**) being found in a field along B1078, and outside the draft Order Limits.
- 3.3.430 A **low value** concentration of medieval pottery fragments (**2220**) of evidential value have been identified approximately 15 m south-west of the draft Order Limits, 390 m north of the B1078, and 1.4 km south-east of Ringshall.
- 3.3.431 The **low value** location of Barking Tye green (**2232**) of evidential value dates to this period. This asset partially contains the draft Order Limits within its western edge, extends along the route of the B1078 Barking Road and meets the south-western edge of Barking. If further evidence dating to this period is found concerning this asset going forward it has the potential to be considered of medium value.
- 3.3.432 A **low value** concentration of medieval pottery fragments (**2219**) of evidential value have been identified approximately 55 m east of the draft Order Limits, 280 m west of Barking Road, and 950 m south-west of Barking.
- 3.3.433 A **low value** concentration of medieval pottery fragments (**2212**) of evidential value have been recorded during a fieldwalking exercise approximately 80 m north-east of the draft Order Limits, 760 m north-west of Needham Road, and 900 m north of Barking.
- 3.3.434 A **low value** concentration of medieval pottery fragments (**2216**) of evidential value have been identified approximately 95 m south-west of the draft Order Limits, 10 m south of Barking Road, and within Barking.
- 3.3.435 A number of **low value** eroded medieval furrows (**2233**) were identified during a watching brief associated with the construction of a 1.75 km water main to the south of Willisham in 2007. The furrows are noted by the HER to the south of the water main route, approximately 100 m north-east of the draft Order Limits at its closest point. The water main route was located broadly north/south along the western edge of Ipswich Road. The exact location of the furrows could not however be determined from the watching brief report (AS, 2008).
- 3.3.436 A **low value** concentration of medieval pottery fragments (**2213**) of evidential value have been identified approximately 100 m south-west of the draft Order Limits 'dismantle assets', 45 m north-east of Hascot Hill (road), and 530 m north of Barking.

- 3.3.437 A **low value** concentration of medieval pottery fragments (**2217**) of evidential value have been identified approximately 170 m south-west of the draft Order Limits 'dismantle assets', immediately south of Barking Road, and within Barking.
- 3.3.438 A **low value** concentration of medieval pottery fragments (**2214**) of evidential value have been identified approximately 130 m south-west of the draft Order Limits 'dismantle assets', 10 m north-east of Hascot Hill (road), and 350 m north of Barking.
- 3.3.439 A **medium value** medieval moated site is located at Moat Farm (**2248**) of evidential and historical value is located at the same location as the current Moat Farmhouse (**1231305**) and the post medieval 17th century farmstead (**2441**) discussed in the post medieval section below. The moat site is located approximately 160 m east of the draft Order Limits, immediately south of the B1078, and 580 m north-east of Ringshall Stocks. Parts of the small square moat are recorded by the HER.
- 3.3.440 A **low value** concentration of medieval and post medieval pottery fragments (**2239**) of evidential value have been identified approximately 170 m south-east of the draft Order Limits, 85 m south-east of Hill Lane, and 600 m north-west of Barking. The artefacts comprised of five medieval pottery fragments. Artefacts from other periods are also recorded as follows:
- Six post medieval pottery and roof tile fragments
  - An undated stone fragment
- 3.3.441 A **low value** concentration of medieval pottery fragments (**2215**) of evidential value have been identified approximately 230 m north-east of the draft Order Limits, 200 m west of Parsons Lane, and 170 m north of Barking Hall.
- 3.3.442 A **low value** concentration of medieval pottery fragments (**2218**) of evidential value have been identified approximately 230 m east of the draft Order Limits, 170 m west of Barking Road, and 850 m south-west of Barking.
- 3.3.443 A **low value** concentration of medieval pottery fragments (**2221**) of evidential value have been identified approximately 245 m south of the draft Order Limits, 30 m north of the B1078, and 1.2 km south-west of Barking.

## Great Bricett and Bramford

### *Designated Heritage Assets*

#### Great Bricett CP

- 3.3.444 The Scheduled Monument 'Great Bricett moated site' (**1006048**) is located on the western edge of Great Bricett and 1.7 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. The asset is an Augustinian priory founded in 1110, and comprises domestic buildings possibly situated on a circular moated area west of the 12th century Grade I listed Church of St Mary and St Lawrence. The moat is appended to the east by a pentagonal enclosure bounded by a dry ditch, and which probably contained outbuildings. The moated part of site is c.75 m in diameter, whilst the moat is c.13 m wide and 0.8 - 2.5 m deep. The enclosure to the east of the moat is ploughed and shows a scatter of building debris.

- 3.3.445 The setting of the asset is informed by its location on the edge of the settlement and by its relationships with the 12th century Grade I listed Church of St Mary and St Lawrence, which is adjoined by the scoped out 13th century Grade I listed Great Bricett Hall, to the east. The setting is further informed by the remnants of its contemporary medieval landscape comprising the cores of surrounding settlements, scattered moated sites and the routes and roadways linking them. This setting has, however, been greatly eroded by field boundary loss, development of many of the settlements and the construction of wartime infrastructure at RAF Wattisham c. 500 m to the north-west. The setting of the asset, therefore, makes a minor contribution to its value, and due to the focus of the setting being much reduced through the loss of the medieval landscape, it does not extend to the draft Order Limits.
- 3.3.446 The Grade I listed 'Church of St Mary and St Lawrence' (**1352160**) is located west of Pound Hill towards the northern limits of Great Bricett and c. 1.6 km west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church has a 12th century core but there is evidence for additions and alterations in the 13th, 14th and 15th centuries and well as 19th century restorations. Originally, the asset was the church of the priory of St. Leonard, founded in 1110 for Augustinian canons from St. Leonard de Noblat. The priory was dissolved in 1444 and granted by Henry VI to his college in Cambridge. The asset is constructed of flint rubble with freestone dressings and a pantiled roof.
- 3.3.447 The setting of the asset is informed by its location within the medieval core of Great Bricett and its fossilised street plan. The setting is further informed by its relationship with the contemporary 12th century scheduled Great Bricett moated site, and the adjoined scoped out 13th century Grade I listed Great Bricett Hall. The asset's relationship with the Grade II listed, but scoped out, 16th century St Peters Court and the non-designated post medieval buildings, which contribute to the character of Great Bricett, also positively contributes to the setting. The setting of the church, therefore, makes a considerable contribution to its value, but as the Project is located in an adjacent parish, the setting does not extend to the draft Order Limits.

#### Willisham CP

- 3.3.448 The Grade II listed 'Long Meadow' (**1251602**) is located on the western flank of Holly Road, c. 480 m north of the centre of Offton, and 120 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the early 16th century, has early 17th and mid-20th century alterations and comprises a plastered timber frame structure with a thatched roof.
- 3.3.449 The setting of the asset is informed by its isolated roadside location and by the surrounding agricultural landscape, with which it has a historical relationship. The asset is situated in moderately large grounds, which are defined by mature tree lined hedgerows, affording it privacy and seclusion. The setting of the asset, therefore, makes a considerable contribution to its value and due to the proximity of the Project, the setting extends to the draft Order Limits.

#### Offton CP

- 3.3.450 The scheduled monument 'Offton Castle' (**1006049**) is located on the southern flank of an unnamed road c. 380 m south of the centre of Offton, and c. 80 m north of the draft Order Limits. The asset is of **high value** based on its designation and its evidential and historical values. The asset is a quadrangular moated site, standing on high ground, but with the moat still wet. The enclosed area rises at least 3 m above

the surrounding ground level. The Victoria County History for Suffolk (1911) states the asset is 'an early beforesed moat adapted to later defence', and it is much more of a stronghold than the ordinary homestead moat. Fragments of early tile have been recovered from the site, but no masonry or more conclusive dating evidence has been identified.

- 3.3.451 The setting of the asset is informed by its relationship with Offton Castle Farm to the north, which includes the early 16th century Grade II listed 'Barn 50 Metres East Of Castle Farmhouse' (**1251594**). The asset's location within the medieval landscape as defined by the cores of surrounding settlements, scattered moated sites and the routes and roadways linking them also positively contribute to the setting. This element of the setting has, however, been greatly eroded by field boundary loss, the expansion of many of the settlements including Offton to the north. The setting of the asset, therefore, makes a moderate contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.452 The Grade II listed 'Barn 50 Metres East of Castle Farmhouse' (**1251594**) is located on the northern flank of an unnamed road c. 330 m south of the centre of Offton, and c. 210 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The barn dates to the early 16th century, has late 16th and early 19th century alterations, and comprises a weatherboarded timber frame structure with a tiled roof. The asset has been converted into a dwelling. The barn is part of the historical Castle Farm farmstead, which is recognised by the Suffolk HER as a non-designated heritage asset (**2418**). The farmstead has historical and evidential value.
- 3.3.453 The setting of the barn is informed by its location within a former farming complex and by its relationships with the non-designated post medieval farmhouse and further former outbuilding, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationship with the scheduled Offton Castle to the south and with the surrounding agricultural landscape, with which the asset has a historical and former functional relationship. Due to its loss of function and the conversion of associated outbuildings into dwellings, the setting of the asset makes moderate contribution to its value, and due to the proximity of the Project the setting extends to the draft Order Limits.
- 3.3.454 The Grade I listed 'Church of St Mary' (**1263030**) is located in the north-east of the medieval core of Offton, 90 m south-west of draft Order Limits cable undergrounding works and c. 770 m north-east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The asset comprises a nave, chancel, west tower and south porch and largely dates to the 14th and 15th centuries with later alterations and additions and 19th century restorations. The asset is built of plastered flint rubble with freestone dressings with a plain tiled roof.
- 3.3.455 The setting of the asset is informed by its location in the medieval core of Offton and by its relationships with the listed and non-designated buildings of Offton that contribute positively to the character of the settlement. These buildings include the Grade II listed 18th century Old Vicarage immediately to the south. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The graveyard of the church has no boundary features to the north and east affording clear views of the church from the road and, thereby, retaining it as a visual focus of the village. The setting of the church, therefore, makes a considerable contribution to its value, and due to the proximity of Project undergrounding works to the north, the setting extends to the draft Order Limits.

- 3.3.456 The Grade II listed 'Mount Pleasant Farmhouse' (**1251598**) is located at the western end of an unnamed road at the south-eastern edge of Offton, and c. 125 m south-west of draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse as an early 16th of possibly 15th century core and 17th and 18th century alterations and additions. The asset comprises a plastered timber frame structure with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Mount Pleasant Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2467**). The farmstead has historical and evidential value.
- 3.3.457 The setting of the farmhouse is informed by its location within a potentially still working farm complex and by its relationship with its non-designated post medieval outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the asset and its outbuildings have a historical and functional relationship. There has been some rather unsympathetic residential development in Offton, but this is screened from the asset by topography and mature tree cover within the asset's grounds. The setting of the farmhouse, therefore, makes a considerable contribution to its value, and due to the proximity of Project undergrounding works to the north-east, the setting extends to the draft Order Limits.
- 3.3.458 The Grade II listed 'Valley Farmhouse' (**1250948**) is located on the northern flank of Bildeston Road, c. 1.1 km west of the centre of Offton, and 30 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The cross wing of the farmhouse was built in the early 16th century, whilst the main range was rebuilt in around 1800. The asset comprises a plastered timber framed structure with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Valley Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2463**). The farmstead has historical and evidential value.
- 3.3.459 The setting of the as farmhouse set is informed by its roadside situation and by its location within a potentially still working farm complex. The setting is also informed by the asset's relationships with its non-designated post medieval outbuildings most of which are recorded on the first edition OS map of 1885. The surrounding agricultural landscape, with which the asset and its outbuildings have a historical and functional relationship, also makes a positive contribution to the setting of the asset. The setting of the farmhouse, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.460 The Grade II listed assets 'Poplar Farmhouse' (**1250949**) and 'Barn, 10 Metres West of Poplar Farmhouse' (**1251588**) are located on the southern flank of Bildeston Road, c. 1.4 km west on Offton, and 200 m west-south-west of the draft Order Limits. The assets are of **medium value** based on their designation and its evidential, historical and aesthetic values. The farmhouse was built in two stages, in the early 16th and then late 16th century. There have also been 19th and 20th century alterations and additions. The asset comprises a plastered timber frame structure with mid-20th century pargetting panels and a plain tiled roof. The barn dates to the early-to-mid 16th century and has 18th century alterations. The asset comprises a weather boarded timber frame structure with a corrugated iron roof. The assets forms part of a historical farmstead complex known as Poplar Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2461**). The farmstead has evidential and historical value.

- 3.3.461 The setting of the assets is shared and informed by their location within a former farming complex, their interrelationship and by their relationships with the non-designated outbuildings of the complex, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the assets' relationships with the Hillhouse Farm complex to the west, which includes the Grade II listed farmhouse and barn, and with the non-designated Shortings Farm Cottage to the north. The surrounding agricultural landscape, with which the assets have a historical and former functional relationship, also contributes positively to the setting of the assets. The setting of the assets, therefore, makes a considerable contribution to their values, but due to its focus on the former farmyard and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.462 The Grade II listed 'Barn 10 Metres West of Hill House Farmhouse' (**1251591**) is now a residence and located in the former Hillhouse Farm complex on the southern flank of Bildeston Road, c. 1.5 km west of the centre of Offton, and 280 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The barn dates to the early-to-mid 16th century with some evidence of 18th century maintenance and comprises a weatherboarded timber frame structure with a modern pantile roof.
- 3.3.463 The setting of the asset is informed by its roadside situation and by its relationship with the other elements of the farm complex, which have also been converted into residences, and with the Grade II listed early 17th century Hill Farmhouse reported in the post medieval section below. The setting is further informed by the asset's relationship with the buildings of the Poplar Farm complex to the east and the non-designated Shortings Farm Cottage to the north-east. The surrounding agricultural landscape, with which the assets have a historical and former functional relationship, also contributes positively to the setting of the assets. Due to the residential conversion of the farm outbuildings and the division of the farming complex into separate properties, the setting of the asset makes a moderate contribution to its value, and because the setting is now restricted to the former farmyard location and immediate surroundings, the setting does not extend to the draft Order Limits.
- 3.3.464 The Grade II listed 'Court Farmhouse' (**1251595**) is located at the end of a private access track, c. 1 km south-west of the centre of Offton and 90 m south of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 15th century with alterations made around 1600, then around 1700 and again in the 19th century. the asset comprises a plastered timber frame structure, partly encased in 19th century brick and with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Court Farm or Lost Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2464**). The farmstead has evidential and historical value.
- 3.3.465 The setting of the farmhouse is informed by its secluded location within the former Lost Farm complex and by its relationship with its surviving non-designated outbuildings, which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the asset and its outbuildings have a historical and functional relationship. The grounds of the asset are large, contain numerous trees and are defined by high, tree lined hedgerows affording the asset and outbuildings seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution, and due the proximity of the Project, the setting extends to the draft Order Limits.

### [Nettlestead CP](#)

- 3.3.466 The Grade I listed 'Church of St Mary' (**1263028**) is located on the southern flank of Hall Lane, c. 2.3 km east of the centre of Offton, and c. 1.4 km north-east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church is largely dates to around 1500 but there is evidence of a 12th century and later core. The asset is built of flint rubble with freestone dressings and a plain tiled roof. The asset is rendered other than the tower.
- 3.3.467 The setting of the asset is informed by its location in the hamlet of Nettlestead and by its relationships with its former rectory, with the Grade II listed 19th century Nettlestead Chace to the south-east and with the unnamed non-designated former farming complex to the south, all of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The small graveyard of the church is defined by mature trees and shrubs allow only glimpses into and out from the asset, thereby affording it seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the asset's graveyard boundaries, the topography, settlement and vegetation of the intervening landscape and the Project being located outside of the parish, the setting does not extend to the draft Order Limits.
- 3.3.468 The Grade II listed 'Rookery Farmhouse' (**1250945**) is located off at unnamed road, c. 1.5 km east of the centre of Offton, and c. 980 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset is a rare, but very depleted example of an aisled hall house and has a mid-14th century core with alterations and additions made in the 16th, 17th and 19th centuries. The farmhouse comprises a plastered timber frame structure with a plain tiled roof and a 17th century red brick axial chimney.
- 3.3.469 The setting of the asset is informed by its isolated farmyard location and by its relationship with its non-designated post medieval out buildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical and functional relationship. The grounds of the asset contain numerous trees and are defined by mature trees and shrubs, which contributes to its seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its mature grounds and the topography, development and infrastructure of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.470 The Grade II listed 'Westleygreen Farmhouse' (**1251467**) is located in its working farmyard, c. 390 m north-east of the Church of St Mary in Nettlestead, c. 2.6 km east of the centre of Offton, and c. 1.8 km north-north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the early 16th century with evidence of alterations and additions in the ongoing centuries. The asset comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.471 The setting of the asset is informed by its roadside location within the working farm complex and by its relationship with its outbuildings several of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical and functional relationship. The farming complex has open views of agricultural landscape to the north, east and south-south-east whilst Nettlestead Road and High

Hall Lane are belted by trees and hedgerows, which restrict the views to west and south. The setting of the asset makes a considerable contribution to its value, but due to the mature tree cover of the country lanes and the topography, development and infrastructure of the intervening landscape, the setting does not extend to the draft Order Limits.

### Somersham CP

- 3.3.472 The Grade I listed 'Church of St Mary' (**1251599**) is located 70 m east of Church Lane close to the eastern edge of Somersham, c. 780 m north-east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The nave has features that date to around 1300 and there are 14th, 15th and 16th century additions and alterations. The church is constructed of rendered flint rubble with limestone dressings, whilst the tower is of un-plastered flint, septaria and limestone rubble. The asset has plain tiled roofs.
- 3.3.473 The setting of the asset is informed by its location within the medieval core of Somersham, which itself is recorded in the Domesday Book of 1086. The setting is further informed by the asset's relationship with the 17th century Grade II listed Church Farmhouse to the south as well as views of the agricultural landscape in the same direction, with which the asset has a historical relationship. The link with the agricultural landscape has, however, been eroded by the 20th century residential development of Somersham. The setting of the asset, therefore, makes a moderate contribution to its value, and even though the Project crosses the parish, due to the topography, development and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

### Little Blakenham CP

- 3.3.474 The Grade I listed 'Church of St Mary' (**1251408**) and the Grade II listed 'The Old Rectory' (**1263027**) are located on the north-eastern flank of Valley Road in the small settlement of Little Blakenham and c. 1.9 km north-east of the draft Order Limits. The church is of **high value** and the rectory is of **medium value** based on their designations and their evidential, historical, aesthetic and communal values. The parish church has 13th century origins but is largely 14th and 15th century in date with evidence of 16th and 19th century alterations and maintenance. The church is constructed of plastered rubble with freestone dressings, whilst the tower has exposed rubble walls of flint with brick and limestone inclusions. The roofs are plain tiled with the exception of the leaded tower roof. The former rectory was built in three stages: in the 15th century, the mid-17th century and in the early 19th century and comprises a 15th century timber frame core with brickwork of the 17th and 19th centuries with slated roofs.
- 3.3.475 The setting of the assets is shared and informed by their location within Little Blakenham, which itself is recorded in the Domesday Book. The setting is further informed by the assets' interrelationship and their relationships with a non-designated barn to the south, which is recorded on the first edition OS map of 1885. The surrounding agricultural landscape, with which the assets has a historical relationship, also makes a positive contribution to the setting. The link with the agricultural landscape has, however, been eroded by the 20th century residential development of Little Blakenham. The setting of the assets, therefore, makes a moderate contribution to their values, and even though the Project crosses the parish, due to the topography, development and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

### Flowton CP

- 3.3.476 The Grade I listed 'Church of St Mary' (**1251233**) is located north and east of Flowton Road at the western end of Flowton c. 860 m south-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The asset is an unusually complete example of an early 14th century parish church, with a little alteration in the later 14th century and again around 1500. The church is mainly constructed of flint rubble with freestone dressings, massive buttressing and plain tiled roofs.
- 3.3.477 The setting of the asset is informed by its location within the medieval core of Flowton, which itself is recorded in the Domesday Book. The setting is further informed by the non-designated post medieval buildings of the settlement that contribute positively to the character of Flowton. The surrounding agricultural landscape, with which the asset has a historical relationship, also makes a positive contribution to the setting. The graveyard contains mature trees and is defined by mature tree lined hedgerows, which afford only glimpsed view into and out from the asset affording the asset a degree of privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the asset's graveyard vegetation, the topography, settlement and vegetation of the intervening landscape and the Project being located outside of the parish, the setting does not extend to the draft Order Limits.

### Bramford CP

- 3.3.478 The Grade I listed 'Church of St Mary the Virgin' (**1208235**) is located on the western bank of the Gipping river at the southern end of Bramford and c. 1.5 km north-east of draft Order Limits undergrounding cable mitigation works. The asset is of **high value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church has 13th century origins but is largely of 14th century date including the tower which was built around 1370 and extensively remodelled in the 15th century. The church is constructed of flint rubble with freestone dressings and has leaded roofs.
- 3.3.479 The setting of the asset is informed by its location at the southern end of the medieval core of Bramford and by its relationships with the scoped out medieval and post medieval listed and non-designated buildings lining Church Green and Mill Lane to the north. The setting is further informed by the river valley meadows to the east and south, with which the asset has a historical relationship. The link to the agricultural landscape has, however, been eroded by the post medieval and modern development of Bramford to the north and west, Ipswich to the east and the imposition of the railway and the A14 into the Gipping valley to the east and south. The setting of the asset, therefore, makes a moderate contribution to its value, and even though the Project crosses the parish, due to the topography, development and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.480 The Grade II listed 'Sycamore House' (**1250920**) is located on the south-western flank of Somersham Road, c. 1 km south-south-east of Little Blakenham, and c. 1.6 km north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 15th century with alterations and additions made in the 16th century and later. The asset comprises a plastered timber frame structure with areas of 18th or early 19th century pargetting and a pantile roof.
- 3.3.481 The setting of the asset is informed by its roadside location within a farmyard complex and by its relationship with the outbuildings, although the building recorded on the first edition OS map of 1885 have been largely replaced by modern structures.

The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and former functional relationship, although this link has been partially eroded by industrial development to the north-east. The setting of the asset, therefore, makes a minor contribution to its value, but due to the focus of the setting being restricted to the farmyard and immediate landscape, it does not extend to the draft Order Limits.

- 3.3.482 The Grade II listed 'Runcion House' (**1250911**) is located on the eastern flank of the B1113 Loraine Way, c. 800 m south-west of the centre of Bramford and 630 m north-east of draft Order Limits undergrounding cable works. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset comprises a 15th century range open hall that is now attached to an early 19th century wing. The 15th century wing is a timber frame structure plastered to the south and encased in 19th century brick to the north.
- 3.3.483 The setting of the asset is informed by its roadside location and by its relationship with the outbuildings of the farmyard immediately to the north, although the building recorded on the first edition OS map of 1885 have been largely replaced by modern structure. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and functional relationship. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the focus of the setting being on the farmyard and the immediate landscape, the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.3.484 A **low value** concentration of medieval metal-detected artefacts (**2224**) of evidential value are located partially within the draft Order Limits, immediately north of Bildeston Road, and within Offton. The artefacts comprise of a small group of objects including two long-cross pennies of Edward I and Henry III, a 13th to 14th century gilded harness pendant, two buckles, a late medieval to post medieval rowel spur fragment, and a post medieval gilded spherical knob.
- 3.3.485 A **low value** medieval artefact scatter of 13th to 14th century pottery, including sherds of coarse ware as well as a strap end, buckle and a coin (**2210**) of evidential value have been identified at the same location as a Romano-British period artefact scatter (**2110**) reported in the Roman section above. The site is located partially within the draft Order Limits, immediately south of Bildeston Road and 1.7 km south-east of Great Bricett.
- 3.3.486 A **low value** medieval pottery scatter of 22 sherds (**2235**) of evidential value has been noted within the draft Order Limits, approximately 60 m northwest of Flowton Road, and 590 m south-west of Somersham. The artefacts were identified during fieldwalking over a 50 m length on the Bramford to Wattisham gas pipeline works in 1989. Further **low value** medieval evidence of evidential value has also been identified along the same gas pipeline works as follows:
- Approximately 2.9 km to the north-west in the form of further pottery sherds (**2236**) also located within the draft Order Limits, and approximately 30 m south of Bildeston Road at its closest point
  - A medieval pottery scatter of 13 sherds (**2234**) approximately 40 m north-west of the draft Order Limits, and 65 m north of Bildeston Road
- 3.3.487 The **medium value** land parcel location of the medieval period Bullen Green (**2244**) of evidential and historical value is located within the draft Order Limits Zone for Permanent Assets (NGET), with Bullen Lane located within the land parcel along its

southern boundary, and is also approximately 1 km north-east of Burstallhill. The green associated with this settlement is observed on Hodkinson's map of 1783.

- 3.3.488 The **medium value** land parcel location of a possible medieval park (**2245**) of evidential and historical value is located immediately north-east of the draft Order Limits Zone for Construction, Operation and Maintenance (NGET), between Bullen Lane and Tye Lane to the north, and 500 m east of Bramford. The park is visible on Hodkinson's Map of 1783.
- 3.3.489 A **low value** rectangular bronze top of a stirrup mount with a gilded gryphon or wyvern animal design (**2189**) has been identified approximately 60 m south-west of the draft Order Limits, 160 m west of Elmsett Road and 130 m west of Lower Somersham. The artefact dates to the late 11th century and is of evidential value.
- 3.3.490 Partly within the draft Order Limits near Willisham village, was a collection of metal detecting finds (**2286**). Close by another artefact scatter (**2285**) was recovered from a metal detecting survey outside the draft Order Limits. The HER does not contain any information on what was recovered. The assets are, therefore, of **unknown value** and have evidential value.
- 3.3.491 A **low value** concentration of medieval artefacts (**2225**) of evidential value are located approximately 115 m north-east of the draft Order Limits, 270 m north-west of Offton Road, and 760 m south-east of Offton. The artefact scatter included a coin, strap end, annular brooch, a thimble and a pottery bunghole. Post medieval artefacts including a coin, ring, token, balance, weight, bell and an unidentified object were also identified.
- 3.3.492 Medieval features (**2230**) suggestive of medieval settlement evidence have been identified approximately 140 m east of the draft Order Limits, 10 m south of Tye Lane, and within the south-western fringes of Willisham Tye. Similarly, Willisham Tye green (**2231**) is visible on Hodkinson's map of 1783 immediately to the north of (**2230**) and is likely to also date to this period. Both assets are of **medium value** and evidential and historical value.
- 3.3.493 A **low value** concentration of medieval pottery (**2228**) of evidential value have been identified during a watching brief approximately 240 m south-west of the draft Order Limits, 80 m south-east of Castle Road, and within Offton.
- 3.3.494 The location of the medieval former Little Bricett Church (**2247**) of **medium value** and evidential and historical value is located approximately 240 m west of the draft Order Limits, 400 m north of Bildeston Road and 850 m south-east of Great Bricett. The location can be observed as the site of a church on Hodgkinson's Map of 1783. The HER notes that the church was annexed to Offton in 1503, with the location being ploughed between 1939-1945.
- 3.3.495 The PAS records a **low value** silver gilt mount (**2317**) being found within the draft Order Limits in the Flowdon area. This asset has evidential and historical value.
- 3.3.496 The PAS records a **low value** fragment of a silver medieval finger ring (**2315**) being found within the Offton Area outside the draft Order Limits. It has evidential and historical value.
- 3.3.497 The PAS records a **low value** silver medieval penny of Alexander III of Scotland, c.1280-1286 AD (**2312**) being found outside the Flowton area outside the draft Order Limits. This asset has evidential and historical value.

## Post Medieval

### Wortham, Mellis and Gislingham

#### *Designated Heritage Assets*

#### Wortham CP

- 3.3.498 The Grade II\* listed 'The Manor House' (**1032738**) is located on the southern flank of Low Road, c. 2.5 km north-north-west of Wortham and c. 1.2 km south-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The asset dates to the mid-17th century, but it likely has earlier origins. the house was raised and altered in the 18th century, extended in the 19th century and comprises a plastered, colourwashed timber frame structure with mixed thatched, plain tiled and pantiled roofs.
- 3.3.499 The setting of the asset is informed by its roadside location on the southern flank of the Waveney Valley and by its relationship with its outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and former functional relationship. the setting of the asset, therefore, makes a considerable contribution to its value, but due to the topography and mature woodland of the Waveney Valley, the setting does not extend to the draft Order Limits.
- 3.3.500 The Grade II listed 'Hill Barn' (**1284289**) is located on the southern flank of Low Road, c. 2.5 km north-north-west of Wortham and c. 1.3 km south-west of the draft Order Limits. The asset was once likely part of the Manor House complex, but the asset now serves as a residence and mature garden boundaries ensure there is no intervisibility. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset is a former manorial barn, dates to the mid-16th century and comprises a partly plastered, partly weatherboarded timber frame structure with a thatched roof.
- 3.3.501 The setting of the asset is informed by its roadside location on the southern flank of the Waveney Valley and by its relationship with the Manor House complex, although there is no intervisibility. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and former functional relationship. Dues to its loss of function and its detachment from the wider manorial complex, the setting of the asset makes a minor contribution to its value, and due to its now more restricted focus and the topography and mature woodland of the Waveney Valley, the setting does not extend to the draft Order Limits.
- 3.3.502 The Grade II listed assets 'Ling Farm House' (**1182947**) is located are 'Forecourt Walls and Gatepiers Immediately South of Ling Farm House' (**1352285**) are located on the northern flank of Low Road, c. 2.5 km north of Wortham and c. 850 m south-west of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. The former farmhouse (**1182947**) dates to the early 17th century, was altered in the early 19th century and comprises a plastered timber frame structure, refronted in white brick and a plain tiled roof. The 1 m high forecourt walls and gatepiers (**1352285**) define the eastern, western and northern boundaries of the farmhouse's front garden and are constructed id early 19th century red brick.
- 3.3.503 The setting of the assets is shared and informed by their roadside location, their interrelationship and their relationships with the non-designated farm outbuildings immediately to the west, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with

which the assets and the associated outbuildings have a historical and former functional relationship. Although the complex no longer functions as a farm, its elements including the listed assets are still coherent as a former working unit, and so the setting of the assets makes a considerable contribution to their values. Due to its now more restricted focus and the topography and mature woodland of the Waveney Valley, the setting does not extend to the draft Order Limits. Due to the focus of the setting, however, being the former farmyard and the immediate landscape, and the topography and mature woodland of the Waveney Valley, the setting does not extend to the draft Order Limits.

3.3.504 The Grade II listed assets 'Willow Lodge' (**1032773**) and 'The Hemplands' (**1032743**) are located in the scattered settlement of Wortham Ling, close to the junction of Rectory Road and The Ling (road), c. 2.3 km north-north-east of Wortham and c. 600 m south-west of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. Willow Lodge is a 16th or 17th century house, latterly three residences, that was altered and extended in the 19th and 20th centuries. The asset comprises a partly plastered, partly brick encased timber frame structure with steeply pitched pantiled roofs. The Hemplands is a 16th century house, latterly two or three residences, which was extended and had a floor and chimney stack inserted in the 17th century. Further alterations were carried out in the 19th and 20th centuries. The asset comprises a plastered timber frame structure with exposed studding and a thatched roof.

3.3.505 The setting of the assets is shared and informed by their roadside locations with a small hamlet, their interrelationship, and their relationships with the non-designated building in the vicinity which positively contribute to the character of the hamlet. The setting is further informed by the surrounding mixed agricultural and heathland landscape with which the assets have a historical relationship. The setting of the assets, therefore, makes a considerable contribution to their values, but due to its restricted focus on the hamlet and immediate landscape, and the topography and mature woodland of the Waveney Valley, the setting does not extend to the draft Order Limits.

3.3.506 The Grade II listed 'Beehive Cottage' (**1284409**) is located at the southern limit of a private track off The Ling (road) c. 260 m to the north, c. 100 m west of the small hamlet that includes Willow Lodge and the Hemplands, c. 2.3 km north-north-east of Wortham and c. 745 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 16th century then extended in the 17th century and altered in the 20th century. The asset comprises a partly plastered, partly weatherboarded timber frame structure with a thatched roof.

The setting of the asset is informed by its isolated location within its mature grounds and by its relationship with an outbuilding, which is recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape with which the asset and its outbuilding have a historical relationship. The grounds of the asset are defined by mature tree lined hedgerows, which afford the asset seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its restricted focus on the asset's grounds, the setting does not extend to the draft Order Limits.

3.3.507 The Grade II listed 'Pollard Tree Farm House' (**1182754**) is located c. 180 m south of an unnamed road c. 200 m south-east of the small hamlet that includes Willow Lodge and the Hemplands, c. 2 km north-north-east of Wortham and c. 670 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its

evidential, historical and aesthetic values. The former farmhouse dates to the 17th century, or possibly earlier, and was extended and refronted in brick during the late 19th century. It comprises a plastered, colourwashed largely brick encased timber frame structure with a thatched roof.

- 3.3.508 The setting of the asset is informed by its secluded location within its mature grounds and by its relationship with its outbuildings, some of which are recorded on the first edition OS map of 1886. The setting is further informed by the asset's relationship with the unnamed, non-designated former farm complex to the north, which is also recorded on the OS map; although the mature grounds boundaries of the asset and the former far complex very much limit intervisibility. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its restricted focus on the asset's grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.509 The Grade II listed 'Beech Tree Farm Cottage' (**1183135**) is located on the eastern flank of Rectory Road, c. 420 m south-south-west of the small hamlet that includes Willow Lodge and the Hemplands, c. 1.9 km north-north-east of Wortham and c. 950 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the mid-17th century, was extended and altered in the 19th century and comprises a plastered clay lump structure with brick additions and steeply pitched plain tiled and pantiled roofs.
- 3.3.510 The setting of the asset is informed by its roadside location within the former farming complex and by its relationship with its former non-designated outbuildings, most of which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuilding have a historical and former functional relationship. The large weatherboarded former stable range to the north of the asset has, however, been converted into seven residences with associated property boundaries and so the setting of the asset makes a minor contribution to its value. Due to the loss of function and division of the former working complex, the setting is restricted to the asset's grounds and immediate landscape, and so it does not extend to the draft Order Limits.
- 3.3.511 The Grade II listed 'Pond Cottage' (**1183120**) is located c. 85 m south of Beech Tree Farm Cottage, c. 1.6 km north of Wortham and c. 1 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the mid-to-late 17th century, was altered in the 19th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.512 The setting of the asset is informed by its largely secluded roadside location within the dispersed settlement of Wortham Ling and by the surrounding agricultural landscape with which the asset has a former historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but as the setting is restricted to the asset's grounds and immediate landscape, it does not extend to the draft Order Limits.
- 3.3.513 The Grade II listed assets 'Hall Farm Cottages' (**1032744**) and 'Barn About 50 Metres South of Hall Farm Cottages' (**1183148**) are located within the Wortham Hall Farm complex, c. 110 m north of the Grade I listed Church of St Mary the Virgin, c. 1.75 km north of Wortham and 1.5 km west of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. The cottages are a former farmhouse which is now three residences. It dates

to the early-to-mid 17th century, was altered and extended on the early 19th century and comprises a plastered timber frame structure with steeply pitched plain tiled roofs. The barn is of mid-to-late 19th century and comprises a clay lump structure on a brick base with a corrugated iron roof.

3.3.514 The setting of the assets is shared and informed by their working farm complex location, their interrelationships, their relationships with the church to the south, and their relationships with the non-designated buildings of the complex (MSF25430 - **2493**), some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the assets and outbuildings have a historical and ongoing functional relationship. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance and it being restricted to the working farmyard and surrounding landscape, the setting does not extend to the draft Order Limits.

3.3.515 The Grade II listed assets 'Wortham House' (**1284216**) 'Wellhead Gear to West of Wortham House' (**1032742**) are located north-west of the junction of Wigwam Hill and Rectory Road in the dispersed settlement of Wortham Ling, c. 1.4 km north of Wortham and c. 1.06 km west of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. Wortham House is a former rectory built in the 16th century and extended in the 17th century. The asset was further extended and altered in 1827-8 for the Reverend R. Cobbold. The asset comprises a plastered timber frame structure with white brick extensions and slated and pantiled roofs. The wellhead gear comprises a 19th century cast iron A-frame with a handle on a large wheel which turns a small cog engaging larger cog on an axle with a U-bend to a weighted pump shaft, which is included for group value.

The setting of the assets is shared and informed by their location within the house's large, mature grounds, by their interrelationship and by their relationships with the non-designated residences to the west and north, which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape with which the assets have a historical relationship. The grounds of the house contain several trees and are defined by mature tree lined hedgerows affording the assets seclusion and privacy. The setting, therefore, makes a considerable contribution to their values, but due its restricted focus on the grounds of the assets and the immediate landscape, the setting does not extend to the draft Order Limits.

3.3.516 The Grade II listed 'Thatched Cottage' (**1284204**) is located on the north-western flank of Union Street in a small hamlet of the dispersed settlement of Wortham Ling, c. 1.7 km north-east of Wortham and c. 520 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The cottage dates to the late 17th or early 18th centuries, was extended in the 19th century and altered in the 20th century. The asset comprises a plastered timber frame structure with a thatched roof.

3.3.517 The setting of the asset is informed by its roadside location within the small hamlet and by its relationships with the neighbouring non-designated, post medieval and modern buildings, which positively contribute to the character of the hamlet. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. There is a large industrial unit to the north-east, but this is low-lying and screened from the asset by mature tree cover in the hamlet. The setting of the asset, therefore, makes a considerable contribution to its value, but

due to its restricted focus on the small hamlet and the surrounding landscape, the setting does not extend to the draft Order Limits.

- 3.3.518 The Grade II listed 'Ellesmere House' (**1182751**) is located on the eastern flank of Church Road close the northern extent of Wortham, and c. 1.6 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The large house dates to the late 16th century with extensions and alterations made in the late 17th and mid-19th centuries. the asset comprises a plastered timber frame structure with some pargetting, extensions of red and white brick and plain and glazed pantiled roofs.
- 3.3.519 The setting of the asset is informed by its location set back from the road within its large grounds and by its relationships with its non-designated outbuildings and a farming complex to the north, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The outbuildings and farm have, however, been developed as residences and this has led to some small-scale division of the asset's grounds to provide garden spaces to the other properties, thereby eroding the historic link between the buildings. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its restricted focus being on the grounds of the asset and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.520 The Grade II listed assets 'The Willows' (**1032747**) and 'Two Cottages Approximately 60 Metres North of The Willows' (**1183181**) are located on the western flank of Church Lane, at the northern limits of Wortham, and c. 1 km west of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. The Willows dates to the 17th century, it was extended in the 19th century and altered in the 20th century. The asset comprises a partly plastered, partly weatherboarded timber frame structure with clay lump extension and thatched and pantiled roofs. The cottages date to the early 17th century with 19th century extensions and alterations. The asset comprises a plastered, partially brick encased timber frame structure with a clay lump extension and thatched and pantiled roofs.
- 3.3.521 The setting of the assets is shared and informed by their roadside village location and their relationships with the medieval and post medieval listed and non-designated buildings of the village, which contribute positively to the character of the settlement. The setting is further by the surrounding agricultural landscape with which the assets have a historical relationship. Some small scale 21st century residential development to the north-east has slightly eroded the assets' link to the agricultural land, but the buildings are sympathetic and are in the local architectural vernacular. The setting of the assets, therefore, makes a considerable contribution to their values, but due to its restricted village nature, the setting does not extend to the draft Order Limits.
- 3.3.522 The Grade II listed 'Lime Tree Farm House' (**1284359**) is located off Harts Lane 100 m north-east of Church Road in Wortham, and c. 800 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset dates to the early 17th century, was refronted and altered in the mid-to-late 19th century and extended in the 20th century. The asset comprises a plastered timber frame structure with a red brick casing with white brick dressings, tile hung gables and a glazed pantiled roof.
- 3.3.523 The setting of the asset is informed by its village location and by the surrounding agricultural landscape with which the asset has a historical and former functional

relationship. The farm outbuildings recorded on the first edition OS map of 1886 have, however, been demolished and there is 20th century residential development to the north, east and south of the asset. The setting of the asset, therefore, makes a minor contribution to its value, and due to its focus being restricted to its village location and the immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.524 The Grade II listed 'The Post Office and Shop House' (**1032775**) is located on the northern flank of Long Green, Wortham, 50 m north of the A143, and 590 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The shop with attached house dates to the early 19th century and comprises a plastered clay lump structure with a glazed pantiled roof.
- 3.3.525 The setting of the asset is informed by its roadside village location and by its relationships with listed and non-designated buildings in the vicinity, which contribute positively to the character of the settlement. The setting is further informed by the agricultural land to the north, with which the asset has a historical relationship. The introduction of the A143 Bury Road to the south has, however, introduced noise and movement into the setting of the asset, and so the setting makes a moderate contribution to its value. Due to the setting being focused on the roadside village location, it does not extend to the draft Order Limits.
- 3.3.526 The Grade II listed 'The Old Queens' (**1284339**) is set back 35 m north of the A143 Bury Road close to the eastern edge of Wortham, and 470 m west of the draft Order Limits. The former public house is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset dates to around 1600, was partly rebuilt in the later 17th century and was altered and extended in the 20th century. the now house comprises a plastered timber frame structure with a steeply pitched machine tiled roof.
- 3.3.527 The setting of the asset is informed by its roadside village location and by its relationships with listed and non-designated assets in the vicinity such as post medieval and modern ditches (**2510**), which contribute positively to the character of the settlement. The setting is further informed by the agricultural land to the north, with which the asset has a historical relationship. The introduction of the A143 Bury Road to the south has, however, introduced noise and movement into the setting of the asset, and so the setting makes a moderate contribution to its value. Due to the setting being focused on the roadside village location, it does not extend to the draft Order Limits.
- 3.3.528 The Grade II listed 'Hill Top Cottages' (**1352259**) is set back 60 m south of the A143 Bury Road close to the eastern edge of Wortham, and c. 560 m west-south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, now two residences, dates to the mid-16th century and was extended and altered in the 19th and 20th centuries. the asset comprises plastered timber frame structure with a steeply pitched pantiled roof.
- 3.3.529 The setting of the asset is informed by its roadside village location and by its relationships with listed and non-designated buildings in the vicinity, which contribute positively to the character of the settlement. The setting is further informed by the agricultural land to the south, with which the asset has a historical relationship. The introduction of the A143 Bury Road to the north has, however, introduced noise and movement into the setting of the asset, and it has been further eroded by residential development to the east and west. The setting of the asset, therefore, makes a minor

contribution to its value, but due to the setting being focused on the roadside village location, it does not extend to the draft Order Limits.

- 3.3.530 The Grade II listed 'The Rookery' (**1182737**) is located at the southern end of a private road 250 m south-south-east of the A143 Bury Road, and 80 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The large farmhouse dates to the 17th century and was remodelled and extended in 1815 for the Harrison family. The asset comprises a roughcast timber frame structure with a white brick façade and a steeply hipped plain tiled roof. The asset forms part of a historical farmstead known as The Rookery. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2486**). The farmstead dates to the 17th century with later 19th century alterations and additions. The farmstead has historical and evidential value.
- 3.3.531 The setting of the asset is informed by its location within a working farm complex and by its relationship with the surrounding agricultural landscape, with which the asset has a historical and ongoing functional relationship. The wider farming complex recorded on the first edition OS map of 1885 appears, however, to have been entirely replaced and expanded by 20th century hanger style barns and outbuildings. Due to the loss of contemporary buildings the setting of the asset makes a moderate contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.532 The Grade II listed assets 'Prospect Farm House' (**1352260**), 'Lockleys' (**1284403**) and 'Outbuilding About 40 Metres South of Lockleys' (**1032771**) are located in a small dispersed group of buildings/hamlet on the western flank of Chapel Lane, Wortham, c. 250 m south of the A143 Bury Road, c. 990 m north-west of an draft Order Limits access road and 1.45 km west of an draft Order Limits main compound. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The former farmhouse (**1352260**) dates to the 17th century and comprises a plastered timber structure with a thatched roof. Lockleys (**1284403**) is an early 17th century house, which was altered in the 20th century and comprises a plastered timber frame structure with a painted sham timber frame and a machine tiled and pantiled roof. The outbuilding (**1032771**) was probably a detached kitchen/brewhouse to Prospect Farm House, then a residence, and now storage for Lockleys. The asset dates to the 17th or early 18th centuries and comprises plastered timber frame structure with a painted sham timber frame and a thatched roof.
- 3.3.533 The setting of the assets is shared and informed by their location in their large mature, wooded grounds, their interrelationships and their relationships with non-designated outbuildings and other residences in the small hamlet. The thickly wooded nature of the hamlet, however, ensures that intervisibility between the assets and other built elements is extremely restricted, as are views out and into the small community. The setting of the assets, therefore, affords them seclusion and privacy and makes a considerable contribution to their values, but due to its restricted, enclosed nature, the setting does not extend to the draft Order Limits.
- 3.3.534 The Grade II listed assets '1, Brook Road' (**1182727**) and '2, Brook Road' (**1032770**) are located on opposing flanks of Mellis Road c. 135 m north-north-west of the junction of Mellis Road and Brook Lane, c. 620 m south of Wortham, and 700 m north of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. One Brook Road, on the south-western flank of Mellis Road, is of early 17th century date, was altered

around 1900 and comprises a plastered timber frame house, refronted in red brick and with a pantiled, formally thatched roof. Two Brook Road, on the north-eastern flank of Mellis Road, dates to the 17th century, was extended in the 19th century, altered in the 20th century and comprises a plastered timber frame house with a thatched roof.

- 3.3.535 The setting of the assets is shared and informed by their rural roadside locations, by their interrelationship and by their relationships with further buildings around the road junction, which include the Grade II listed Brookside Farm House c. 200 m to the east. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical relationship. the setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance and the setting being restricted to the roadside locations and immediate landscape, it does not extend to the draft Order Limits.
- 3.3.536 The Grade II listed 'Brookside Farm House' (**1183056**) is located on the northern flank of Brook Lane, c. 690 m south of Wortham, and 570 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 17th century, which was altered in the 19th and 20th centuries and comprises a plastered timber frame structure with a steeply pitched pantile roof.
- 3.3.537 The setting of the asset is informed by its roadside rural location and by its relationships with further buildings around the road junction, which include the Grade II listed 1 and 2 Brook Road c. 200 m to the west. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. the setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the setting being restricted to the roadside location and immediate landscape, it does not extend to the draft Order Limits.

### Palgrave CP

- 3.3.538 The Grade II listed 'Bridge Farm Cottages' (**1032785**) is located on the southern edge of Diss, c. 910 m north-north-west of the centre of Palgrave and c. 700 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, and historical values. The asset dates to the 16th century, was extended in the 17th century, altered in the 20th century and comprises a roughcast timber frame house with a steeply pitched pantiled roof.
- 3.3.539 The setting of the asset is informed by its location within the wider former Bridge Farm complex and by its river valley location with the Waveney river c. 80 m to the north. The setting is further informed by the asset's relationship with the medieval Grade II listed element of the farming complex Bridge Farm House (**1182078**) reported above, and the post medieval and Denmark Bridge House (**1352269**). The surrounding agricultural landscape, with which the asset has a historical and former functional relationship, also informs the setting. The former farming complex has, however, been divided up in to separate residences with associated property boundaries. The setting of the asset, therefore, makes a moderate contribution to the value of the asset, but due to its setting being restricted to its former farmyard location and the immediate agricultural landscape, it does not extend to the draft Order Limits.
- 3.3.540 The Grade II listed 'Denmark Bridge House' (**1352269**) is located on the southern edge of Diss, c. 910 m north-north-west of the centre of Palgrave and c. 760 m east of the draft Order Limits. The asset is of **medium value** based on its designation and

its evidential, and historical values. The house dates to the mid-to-late 17th century, was extended in the 18th century, reroofed in the 19th century, altered in the 20th century, and comprises a roughcast timber frame structure with black glazed and red pantiled roofs.

- 3.3.541 The setting of the asset is informed by its location within the wider former Bridge Farm complex and by its river valley location with the Waveney river c. 80 m to the north. The setting is further informed by the asset's relationship with the medieval Grade II listed element of the farming complex Bridge Farm House (**1182078**) reported above, and the post medieval and Bridge Farm Cottages' (**1032785**). The surrounding agricultural landscape, with which the asset has a historical and former functional relationship, also informs the setting. The former farming complex has, however, been divided up in to separate residences with associated property boundaries. The asset also has a large, industrial yard immediately to the north, which introduces noise, movement and pollution into the asset's setting. The setting of the asset, therefore, makes a moderate contribution to the value of the asset, but due to its setting being restricted to its former farmyard location and the immediate agricultural landscape, it does not extend to the draft Order Limits.
- 3.3.542 The Grade II listed 'Elm Vale Farm House' (**1032792**) is located on the eastern flank of Denmark Hill, c. 760 m north-north-west of the centre of Palgrave and c. 1 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the around 1700 and was altered in the 19th century and again around 1970. It is built of red brick in Flemish bond with flared headers with a steeply pitched pantiled roof.
- 3.3.543 The setting of the asset is informed by its former farm complex location and by its relationship with the non-designated farm outbuildings, most of which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have a historical and former functional relationship. The farming complex appears to have been developed as a number of residences, but with limited associated divisions, and so the complex retains some cohesion as a former farm. The western boundary of the farming complex along Denmark Hill is heavily wooded obscuring views into and out from the asset and outbuildings affording them seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance, and the focus of the setting being on the former farmyard and immediate landscape, it does not extend to the draft Order Limits.
- 3.3.544 The Grade II listed assets 'Wood Cottage' (**1182225**) and 'Peanut Cottage and Hill Cottage' (**1352270**) are located adjacent to each other on the western flank of Denmark Hill, c. 760 m north-north-west of the centre of Palgrave and c. 920 m east of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. Wood Cottage dates to the mid-16th century, had a floor and chimney stack inserted in the 17th century, was altered and extended in the 20th century and comprises a plastered timber frame structure with a steeply pitched pantile roof. Peanut and Hill Cottages dates to the 16th century and it was extended in the 17th century when a floor and chimney stack were inserted. It was further extended in the 18th century and altered in the 20th century. The asset comprises a plastered timber frame structure with extensions in clay lump and a steeply pitched pantiled roof.
- 3.3.545 The setting of the assets is shared and informed by their interrelationship and by their relationship with outbuildings to the south, some of which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding

agricultural landscape, with which the assets have a historical relationship. The eastern boundaries of the assets along Denmark Hill are heavily wooded obscuring views into and out from the assets and outbuildings affording them seclusion and privacy. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance, and the focus of the setting being on the assets and immediate landscape, it does not extend to the draft Order Limits.

- 3.3.546 The Grade II listed 'Longs Farm House' (**1182159**) is located on the northern flank of Millway Lane close to the western edge of Palgrave and c. 1 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the early 17th century, has evidence of 19th and 20th century maintenance and comprises a roughcast timber frame structure with thatched and pantiled roofs.
- 3.3.547 The setting of the asset is informed by its roadside location, by its interrelationship with the Grade II listed 17th century Ivy Cottage on the opposite flank of Millway Lane and by its relationship with its outbuildings to the north, which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and former functional relationship. The visual link with the agricultural landscape has, however, been eroded by residential development immediately to the north and east of the asset and its outbuilding. The setting of the asset, therefore, makes a moderate contribution to its value, but due to overall distance, and the focus of the setting being on the asset and immediate landscape, it does not extend to the draft Order Limits.
- 3.3.548 The Grade II listed 'Ivy Cottage' (**1032790**) is located on the southern flank of Millway Lane close to the western edge of Palgrave and c. 1.1 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 17th century, was extended and altered in the 20th century and comprises a roughcast timber frame structure with steeply pitched thatched and pantiled roofs.
- 3.3.549 The setting of the asset is informed by its roadside location, by its interrelationship with the Grade II listed 17th century Longs Farm House on the opposite flank of Millway Lane. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and former functional relationship. The visual link with the agricultural landscape has, however, been slightly eroded by residential development immediately to the south and east of the asset and its outbuilding. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance, and the focus of the setting being on the asset and immediate landscape, it does not extend to the draft Order Limits.
- 3.3.550 The Grade II listed assets 'Park House' (**1032787**), 'Former Stable Block at St Johns Farm About 15 m North of Park House' (**1032788**), 'Former Groom's House and Coach House About 30 m East of Park House' (**1182135**) and 'Crinkle Crankle Walls to North West of Park House' (**1284698**) are located on the southern flank of Lion Road, c. 1.9 km south-west of the centre of Palgrave, and c. 150 m south-west of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. Park House (**1032787**) was built as a country residence before it served as a school, and it is now part of a care home complex. It has 17th century origins but was greatly extended and altered in the early 19th century for the Harrison family. The 19th century main block is constructed of yellow brick with earlier roughcast timber frame elements to the rear, now largely encased in whitewashed brick. The 19th century block has a shallow hipped slate roof with steeper glazed pantiled roofs to the elements to the rear. The former

stable block (**1032788**) was built in the early 19th century for the Harrison family and is built of white brick to the front (south) with the rest of red brick. The asset has a slated roof. The former groom's house (**1182135**) was also built in the early 19th century for the Harrison family and is built of white brick to the front (west) with the rest of red brick. The asset has a slated roof. The crinkle crinkle walls (**1284698**) were also built in the early 19th century for the Harrison family and are of red brick in Flemish bond on a flint rubble base and are about 4 m in height. Three lengths of wall remain to the north, east and west of rectangular garden measuring 70 m by 50 m and to the west of the house.

The setting of the assets is shared and informed by their interrelationships as elements of a former country estate. The setting is further informed by their relationship with the small landscape park (now disparked) of St John's (**2402**) defined by Lion Road and Old Bury Road to the north, west and south and by a thick tree belt to the east. The subsequent repurposing of the assets as elements of a school and now a care home as resulted in alterations and the addition of further buildings including two large T-shaped residential blocks for the care home resident. The setting of the assets, therefore, makes a minor contribution to their values. Due to the proximity of the Project the setting of the house, stable and groom's house extends to the draft Order Limits, however, due to the setting of the wall being focused very much on its immediate location, its setting does not extend to the draft Order Limits.

- 3.3.551 The Grade II listed 'Valley Farm House' (**1032791**) is located on the northern flank of the A143 Old Bury Road, c. 1 km south-south-west of the centre of Palgrave and c. 800 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built in the 17th century, was extended in the late 18th or early 19th centuries and comprises a plastered, timber frame structure with a steeply pitched thatched roof. The extensions to the rear (north) are of clay lump with pantiled roofs.
- 3.3.552 The setting of the asset is informed by its former working farm complex location and by its relationship with its former outbuildings, most of which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and former functional relationship. The former outbuildings have been converted into residences and the farmyard has been divided by property boundaries, reducing to cohesion of the former farming complex. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its focus being restricted to the former farmyard and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.553 The Grade II listed 'Ivy House' (**1182167**) is located on the northern flank of Old Bury Road, c. 45 m north of the A143, c. 1.4 km south-west of the centre of Palgrave and 270 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the mid-to-late 17th century and comprises a plastered, timber frame structure with a thatched roof.
- 3.3.554 The setting of the asset is informed by its location within its large grounds which are scattered with numerous small, modern sheds and outbuildings and defined by mature tree lined hedgerows. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The large Grange Farm complex lies c. 150 m to the west and comprises a non-designated farmhouse and several large, modern hanger style barns and outbuildings. The setting of the asset, therefore, makes a moderate contribution to its value, but due to

its focus being restricted to the grounds of the asset and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.555 The Grade II listed 'Barn About 35 m West of Spring Farm House' (**1284658**) is located at the southern end of a private road c. 125 m south-south-east of the A143, c. 1.5 km south-west of the centre of Palgrave and c. 380 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The barn dates to the 17th century and has recently been converted into residences. The asset comprises a rendered timber frame structure with wattle and daub infill and a steeply pitched modern pantiled roof.
- 3.3.556 The setting of the asset is informed by its location within the former Spring Farm complex and by its relationship with the non-designated Spring Farmhouse and a second barn. The setting is further informed by the surrounding agricultural landscape, with which the asset and associated non-designated buildings have a historical and former functional relationship. The conversion of the barn has resulted in its separation from the farmhouse and the introduction of property boundaries and so the setting of the asset makes a minor contribution to its value. Due to the focus of the setting being restricted to the former farmyard location of the asset and the immediate landscape, it does not extend to the draft Order Limits.

### Redgrave CP

- 3.3.557 The Grade II\* listed 'Folly Lodge Known as Dove House' (**1261272**) is located at the western corner of a small copse, c. 470 m north-east of the B1113 Bury Road, c. 2.1 km south-east of the centre of Redgrave, and c. 2.6 km north-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The asset was likely built by Capability Brown for R. Holt in c. 1765-70 as a lodge to house the Redgrave Park Estate Carpenter. The asset is located on what was the south-eastern edge of Redgrave Park, which was associated with the now demolished country house of Redgrave Hall. The Octagonal structure is of grey brick with white brick and timber dressings and a leaded domical roof.
- 3.3.558 The setting of the asset is informed by its location on the south-eastern edge of the former Redgrave Park and it was designed to be an eyecatcher viewed from within the park. The parkland is, however, now disparked and the hall is demolished. The setting is further informed by the asset's relationships with the landscaped serpentine lake to the west, a building at the eastern extent of the lake labelled 'Kennel' on the First edition OS map of 1886, and surviving copses and tree belts of the parkland. Due to loss of the cohesion of the parkland and the hall, the setting of the asset makes a minor contribution to its value, but because of overall distance the setting does not extend to the draft Order Limits.

### Thrandeston CP

- 3.3.559 The Grade II listed 'Perry Farm House' (**1032760**) is located on the western flank of New Road, c. 1 km north-north-east of the centre of Thrandeston and c. 1.6 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse was built in two phases in the early then late 17th century and there have been 20th century additions. The asset comprises a plastered timber frame structure with a thatched roof.
- 3.3.560 The setting of the former farmhouse is informed by its location within its mature grounds and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the asset and outbuildings have a

historical and former functional relationship. Pond Farm to the south has expanded beyond the complex recorded on the OS map, but this has only minimally intruded on the setting of the asset. The setting of the farmhouse, therefore, makes a moderate contribution to its value, but due to overall distance and screening by the farmyard boundaries and the topography, development, vegetation and infrastructure of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.3.561 The Grade II listed 'Honey Pot Farm House' (**1032761**) is located 120 m west of New Road, c. 890 m north-north-east of the centre of Thrandeston and c. 1.6 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built in the 17th century, and it was partly rebuilt and extended in the early 19th century. It comprises a plastered timber frame structure, brick cased and with red brick additions and a pantile roof.
- 3.3.562 The setting of the asset is informed by its secluded location and by its relationship with its outbuildings, which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the asset and outbuildings have a historical and former functional relationship. Pond Farm to the north has expanded beyond the complex recorded on the OS map, but this has only minimally intruded on the setting of the asset. The setting of the farmhouse, therefore, makes a moderate contribution to its value, but due to overall distance and screening by the farmyard boundaries and the topography, development, vegetation and infrastructure of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.563 Grade II Listed 'Hawthorn Farm House' (**1182479**) is located 100 m north-north-east of New Road, c. 1.1 km north-east of the centre of Thrandeston and c. 1.95 km east-south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built around 1600, was extended and raised in the late 17th or early 18th centuries and was altered in the 19th and 20th centuries. The asset comprises a cement rendered timber frame structure with a clay lump extension and a steeply pitched pantiled roof.
- 3.3.564 The setting of the asset is informed by its secluded location within its mature grounds and by its relationship with its non-designated outbuildings, a farming complex to the north-east and two properties to the south-east, most of which were recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have a historical and former functional relationship. The setting of the farmhouse, therefore, makes a considerable contribution to its value, but due to overall distance and screening by the asset's boundaries and the topography, development, vegetation and infrastructure of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.565 The Grade II listed 'Marsh Farm House' (**1032768**) is located off an unnamed road c. 490 m north-west of the centre of Thrandeston and c. 960 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 17th century, or possibly earlier, and was altered and extended in the 19th and 20th centuries. The asset comprises a roughcast timber frame structure with a steeply pitched red and black glazed pantiled roofs.
- 3.3.566 The setting of the asset is informed by its working farm complex location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting further informed by the surrounding

agricultural landscape with which the asset and outbuildings have a historical and functional relationship. The introduction of the railway in the 19th century and c. 100 m to the south-east has, however, slightly eroded the asset's link to the rural landscape. The setting of the farmhouse, therefore, makes a moderate contribution to its value, but due to overall distance and screening by the asset's non-designated buildings and the topography, development and vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.3.567 The Grade II listed 'The Old Rectory' (**1352258**) is located towards the eastern edge of the Thrandeston conservation area (**CA43**), c. 55 m west of the Grade I listed medieval parish Church of St Margaret (**1032763**), on the northern flank of the unnamed east/west aligned road that runs through the settlement, and c.1.6 km north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset is a large house that has an early 18th century core, which was greatly extended and altered around 1840. An early range has a reset 15 century stone door surround, probably from a monastic site.
- 3.3.568 The setting of the asset is informed by its location on the eastern edge of the settlement of Thrandeston, which itself is mentioned in the Domesday Book. The setting of the asset is further informed by its location on the fossilised medieval street plan of the settlement, although views to the church to the east are obstructed by the mature hedged boundary and tree cover of the church's graveyard. There is a more open view to the west, which takes in two post medieval residential properties, which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural land, with which the asset has a historical relationship. The setting of the former rectory, therefore, makes a considerable contribution to its value, but due to its enclosed situation within the settlement, the setting does not extend to the draft Order Limits.

### Burgate CP

- 3.3.569 The Grade II listed 'Barn About 70 m South East of Hall Farm House' (**1032798**) is located c. 1.5 km south of Wortham, 300 m west of the Church of St Mary (**1032797**), and 520 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential and historical values. The barn dates to the 17th century, which was extended in the 19th century, and comprises a weatherboarded timber frame, five bay structure with a steeply pitched pantile roof.
- 3.3.570 The setting of the asset is shared with and informed by its relationship with the scheduled monument 'Burgate Hall moated site' (**1017331**) and the Grade II\* listed 'Hall Farm House' (**1352234**), which are surviving medieval elements of the working farm complex. The setting is further informed by its relationships with the non-designated buildings of the farm complex, several of which are recorded on the first edition OS map of 1885. The asset's setting is further informed by its relationship with the scheduled monument 'Medieval ringwork in Burgate Wood' (**1016699**) 180 m to the east, and by its relationship with the Grade II\* listed Church of St Mary (**1032797**) 300 m to the east. Although there has been some small-scale residential development 320 m to the east along the western flank of Sycamore View to the north of the church, the surrounding agricultural landscape also contributes to the assets' setting. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance and partial screening by mature tree lined hedgerows, the setting does not extend to the draft Order Limits.
- 3.3.571 The Grade II listed 'Oak Tree Farm House' (**1032801**) is located on the south-eastern flank of Oak Tree Farm (road), 100 m west of Shepherds Lane, Burgate Great

Green, and c. 1.2 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 17th century and was raised, part rebuilt and red brick encased in the 18th century. It was refronted in white brick and extended in the early 19th century. The asset has a timber frame core with some plasterwork to the rear and slated and pantiled roofs.

- 3.3.572 The setting of the asset is informed by its working farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the Burgate Great Green to the east and the otherwise surrounding agricultural landscape, with which the asset and its outbuildings have historical and functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the mature vegetation and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.573 The Grade II listed 'Ivy Cottage' (**1032802**) is located on the eastern flank of Shepherds Lane at the north-west edge of Burgate Great Green, c. 70 m east of the Oak Tree Farm complex, and c. 1.6 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 17th or early 18th centuries and it was extended in the 19th and 20th centuries. The asset comprises a plastered timber frame structure with a thatched roof.
- 3.3.574 The setting of the asset is informed by its location on the north-western edge of Burgate Great Green, by its relationships with the Oak Tree Farm complex to the west and with further residential properties on the edge of the Green to the south-south-west and including the Grade II listed post medieval Oak Tree Cottage. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the mature vegetation and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.575 The Grade II listed 'Oak Tree Cottage' (**1352236**) is located on the western flank of Shepherds Lane at the western edge of Burgate Great Green, c. 90 m south of the Oak Tree Farm complex, and c. 1 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 17th century, or possibly earlier, and comprises a plastered timber frame structure with some red brick and a thatched roof.
- 3.3.576 The setting of the asset is informed by its location on the western edge of Burgate Great Green, by its relationships with the Oak Tree Farm complex to the north and with further residential properties on the edge of the Green to the south and the Grade II listed post medieval Oak Tree Cottage to the north-north-east. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the mature vegetation and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.577 The Grade II listed 'The Willows and Lilac Cottage' (**1352235**) is located on the southern flank of Brook Lane on the south-eastern edge of Burgate Great Green, and c. 690 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates

to the early 18th century and it was extended in the 19th century. The asset comprises a plastered timber frame structure with a clay lump extension, a thatched roof and pantiled roof on the extension.

- 3.3.578 The setting of the asset is informed by its location on the south-eastern flank of Burgate Great Green, by its relationships with its outbuildings, some of which are recorded on the first edition OS map of 1885, and with residential dwellings to the east, which include the Grade II listed post medieval Green Farm House. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the mature vegetation and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.579 The Grade II listed 'Green Farm House' (**1032799**) is located on the eastern flank of Brook Lane on the eastern edge of Burgate Great Green, and c. 610 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the early 17th century, was altered in the 19th century and comprises a roughcast timber frame structure with a thatched roof.
- 3.3.580 The setting of the asset is informed by its location on the southern flank of Burgate Great Green, by its relationships with its outbuildings, some of which are recorded on the first edition OS map of 1885, and with residential dwellings to the west, which include the Grade II listed post medieval Willows and Lilac Cottages. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the mature vegetation and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.581 The Grade II listed 'Hill House' (**1352238**) is located on the eastern flank of Mellis Road, 640 m north-east of Burgate, and 15 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house is of probable 17th century and comprises a plastered timber frame structure with some early 19th century red brick casing when it was also partly reroofed. The asset was extended in the late 19th century and has a steeply pitched black glazed and machine pantiled roofs. The house forms part of a historical farmstead complex, Hill House, which the Suffolk HER has recorded as a non-designated heritage asset (**2420**). The farmstead, which dates from the 17th century, is of evidential and historical value.
- 3.3.582 The setting of the asset is informed by its former farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical and former functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value and due to the proximity of the Project, it extends to the draft Order Limits.
- 3.3.583 'The Old Rectory' (**1181701**) is located on the eastern flank of Mellis Road, c. 620 m east of Burgate, and 170 m south-south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former rectory was built in 1827 for the Reverend W. Pemberton and comprises a large red brick house with a slated roof.

- 3.3.584 The setting of the asset is informed by its secluded location within its mature grounds and by its relationship with its non-designated outbuildings, which are recorded on the first edition OS map of 1885. The setting is further informed by surrounding agricultural landscape, with which the asset and its outbuildings have a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the focus of the setting being restricted to the asset's grounds and immediate landscape, it does not extend to the draft Order Limits.
- 3.3.585 The Grade II listed 'Glebe Farm House' (**1032804**) is located at the end of a private driveway 130 m east of Mellis Road, c. 800 m east of Burgate, and 230 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, formally a rectory, dates to the late 16th or early 17th centuries, but was it was reduced in size, raised and altered around 1830 when it ceased to be a rectory. The asset comprises a plastered timber frame structure with a clay lump extension and a shallow pitched slated roof. The farmhouse forms part of a historical farmstead known as Glebe Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2442**). The asset has historical and evidential value.
- 3.3.586 The setting of the farmhouse is informed by its location within its large, mature grounds, which affords it seclusion and privacy. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and former functional relationship. Several further, likely contemporary, buildings to the west of the asset and recorded on the first edition OS map of 1885 have, however, been demolished and so the setting of the asset makes a moderate contribution to its value. The focus of the setting is restricted to the asset's grounds and the immediate landscape and so it does not extend to the draft Order Limits.
- 3.3.587 The Grade II listed 'Willow Cottage' (**1352237**) is located on the northern edge of Little Green, 100 m north-east of Bugg's Road, and 260 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 17th or early 18th centuries and it was altered and extended in the 20th century. The asset comprises a plastered timber frame structure with a thatched roof.
- 3.3.588 The setting of the asset is informed by its location within its mature grounds on the northern flank of Little Green. The setting is further informed by the asset's relationships with other characterful residences that flank the Green, and which include the Grade II listed Green Farm House and Green Farm Cottage to the south. The surrounding agricultural landscape, with which the asset has a historical relationship, also contributes positively to the setting. There has been some small-scale 20th century residential development to the west of the asset, but it is sympathetic being in the local architectural vernacular. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by the asset's grounds and the mature vegetation and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.589 The Grade II listed assets 'Green Farm House' (**1181676**) and 'Green Farm Cottage' (**1032803**) are located on the southern flank of Little Green, c. 50 km south-west of Bugg's Road, and c. 380 m north-west of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. The farmhouse dates to the mid 17th century, was altered in the 19th century and comprises a plastered timber frame structure with a steeply pitched black glazed pantiled roof. The cottage dates to the late 17th or early 18th centuries, was altered

in the 20th century and comprises a plastered timber frame structure with a thatched roof.

- 3.3.590 The setting of the assets is shared and informed by their locations on the south-western flank of the Green, by their interrelationship and their relationships with the non-designated outbuildings of the Green Farm complex. The setting is further informed by the assets' relationships with other characterful residences that flank the Green, and which include the Grade II listed Willow Cottage to the north. The surrounding agricultural landscape, with which the assets have a historical and functional relationship, also contributes positively to the setting. The setting of the assets, therefore, makes a considerable contribution to their values, but due to screening by the assets' grounds and the mature vegetation and development of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.591 The Grade II listed 'Gibsons Farm House' (**1181694**) is located off Furze Way on the southern edge of Little Green, and 170 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built in 1791 and comprises a red brick structure with a pantiled roof.
- 3.3.592 The setting of the asset is informed by its location within a working farm complex, by its relationship with its modern era outbuildings, and by its relationship with the surrounding agricultural landscape, with which the asset has a historical and ongoing functional relationship. The modern outbuildings have replaced the likely contemporary buildings recorded on the first edition OS map of 1885, and so the setting of the asset makes a moderate contribution to its value. Due to the proximity of the Project, however, the setting extends to the draft Order Limits.
- 3.3.593 The Grade II listed 'Stubbings Entry' (**1181712**) is located in the south-east corner of the scheduled monument Moated site at Stubbing's Entry (**1016700**) but is excluded from the scheduling. The asset is located c. 1.4 km south-west of the centre of Mellis, immediately south and west of Slough Road and c. 560 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the early-to-mid 17th century, was extended in the late 18th or early 19th centuries and was altered in the 20th century. The asset comprises a brick encased, plastered timber frame structure with a steeply pitched machine tiled roof.
- 3.3.594 The setting of the asset is informed by its relationship with the earlier scheduled medieval moat, within which it is located. The setting is further informed by the now wooded parcel of land immediately to the east and labelled 'Studding's Green' on the first edition OS map of 1885. The surrounding agricultural landscape, with which the asset has historical and functional relationship, also contributes to the coherence of the setting. The modern hanger style barns to the south of the asset are, however, intrusive and detract from the setting. The setting of the asset, therefore, makes a moderate contribution to value of the asset, but due to screening by the modern farmyard element and the tree cover of Studding's Green, the setting does not extend to the draft Order Limits.

### Botesdale CP

- 3.3.595 The Grade II listed 'Jacobites' (**1213214**) is located at the north-eastern end of a private driveway 180 m off Mill Road South, c. 1.4 km west-north-west of Little Green and 1.7 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was

built around 1600, was extended and altered in the 20th century and comprises a plastered timber frame structure with thatched and pantiled roofs.

- 3.3.596 The setting of the asset is informed by its secluded location within its grounds and by its relationship with a second residence immediately to the south and recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and neighbouring residence have a historical relationship. The grounds of the asset and neighbouring residence contain trees and are defined by mature tree lined hedgerows affording the buildings a shared privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its being focused and the asset's grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.597 Grade II listed 'Botesdale Lodge' (**1032642**) is located at the south-eastern end of a private driveway 270 m off Common Road, c. 1.5 km west of Little Green, and c. 1.37 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The large house was built in the mid-16th century in two phases and was extended around 1810. It comprises a plastered timber frame structure with white brick additions and a steeply pitched plain tiled roof.
- 3.3.598 The setting of the asset is informed by its location within its large, landscaped grounds and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical relationship. The large grounds of the asset contain formal gardens and tree cover and its boundaries are defined by mature tree lined hedgerows, largely obscuring views in to and out from the asset. The setting of the asset, therefore, makes a considerable contribution to its value, but due to its being focused and the asset's grounds and immediate landscape, the setting does not extend to the draft Order Limits.

### Mellis CP

- 3.3.599 The following 17 Grade II listed buildings are located within the Mellis conservation area (**CA47**), with a further two just outside.
- 3.3.600 The Grade II listed 'White House Farm House' (**1181766**) is located close to the northern edge of Mellis on the western flank of an unnamed road 70 m north of Mellis Road, and c. 620 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 16th century, was altered and extended in the 19th and early 20th centuries and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.601 The setting of the asset is informed by its roadside village location and by its relationships with its associated, scoped out Grade II listed, now converted, barn to the east and with non-designated buildings in its vicinity that contribute positively to the character of the Mellis conservation area. The setting is further informed by the surrounding agricultural landscape, with which the asset and its barn have a historical and former functional relationship. The asset has a large garden to the rear (west), which is defined by mature tree lined hedgerows, and which screens the asset from 20th century infill residential development further to the west. Due to the loss of the farming complex and the encroachment of 20th development, the setting of the asset makes a moderate contribution to its value; but because of screening by

the asset's boundaries and by the development and mature vegetation of the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.3.602 The Grade II listed 'Ash Tree Farm House' (**1284851**) is located close to the north-western edge of the Mellis conservation area, 50 m north of Mellis Road, c. 510 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the early 17th century, was altered and part reroofed in the 20th century and comprises a plastered timber frame structure with a steeply pitched machine tiled and pantiled roofs.
- 3.3.603 The setting of the asset is informed by its village location and by its open view to the south across a large open village green. The setting is further informed by the asset's relationships with other listed assets within the settlement and with non-designated buildings, which positively contribute to the character of Mellis conservation area. The asset appears now to be a residential dwelling detached from its farmyard setting, and so the setting of the asset makes moderate contribution to its value, but due to its village roadside focus, the setting does not extend to the draft Order Limits.
- 3.3.604 The Grade II listed asset 'Home Farm House' (**1284850**) and 'Barn About 20 m East of Home Farm House' (**1032808**) are located in a former farming complex on the western edge of the Mellis conservation area c. 55 m west of Mellis Road, and c. 410 m south-east of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. The farmhouse dates to around 1600, was extended and altered in the 19th century and comprises a plastered timber frame structure with a steeply pitched plain tiled roof. The barn also dates to around 1600 and now appears to have been converted into a workspace. It comprises a weatherboarded timber frame structure with a modern pantiled roof. The assets forms part of a historical farmstead known as Home Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2459**). The farmstead has evidential and historical value.
- 3.3.605 The setting of the assets is shared and informed by their former farmyard location, their interrelationship, and their relationships with surviving farm outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the assets' relationship with other listed assets and non-listed building in the settlement, which positively contribute to the character of the Mellis conservation area. The surrounding agricultural landscape, with which the assets have a historical and former functional relationship, also positively contribute to the setting, as does the village green to the east. Despite changes in function, the listed assets and non-designated outbuildings are coherent as a former farming complex and so the setting makes a considerable contribution to their values, but due to its focus being restricted to the village location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.606 The Grade II listed 'The Granary' (**1032814**) is located on the western flank of the railway, to the east of the village green, and c. 690 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset was built as a steam mill in the mid-19th century and now serves as a warehouse and flats. It is constructed of stock brick and has a slated roof.
- 3.3.607 The setting of the asset is informed by its location on the railway siding at the core of Mellis. The setting is also informed by the village green to the west, with which the asset has a historical relationship. The setting of the asset, therefore, makes a

considerable contribution to its value, but due to its focus being restricted to the railway siding location, the setting does not extend to the draft Order Limits.

- 3.3.608 The Grade II listed assets 'Hall Farm House' (**1181726**) and 'Barn About 30 m West of Hall Farm House' (**1032806**) are located in the Hall Farm complex on the north-western flank of the Mellis conservation area, the farmhouse just within, the barn just outside. The farmyard lies c. 90 m north-west of Mellis Road, and c. 320 m south-east of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. The farmhouse dates to the mid-to-late 16th century, was extended in the 17th century and altered and extended in the 19th century. The asset comprises a plastered timber frame structure with a steeply pitched pantile roof. The barn dates to the late 16th century, was extended in the 19th century and comprises a rendered/weatherboarded/corrugated sheet clad timber frame structure on a red brick base with a corrugated sheet roof. The farmhouse forms part of a historical farmstead known as Moat Hall Farm or Mellis Hall. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2456**). The farmstead has evidential and historical value.
- 3.3.609 The setting of the farmhouse assets is shared and informed by their working farm complex location, by their interrelationship and by their relationships with the non-designated farm buildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the medieval moat, within which the farmhouse is located, and which is indicative of the time depth of the site. The surrounding agricultural landscape, with which the assets have a historical and ongoing functional relationship, also positively contribute to the setting, as does the village green to the east. Much of the farming complex recorded on the OS has, however, been replaced by modern, hanger style barns, and so the setting of the assets makes a moderate contribution to their values, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.610 The Grade II listed 'Rectory Farm House' (**1352240**) is located on the western flank of Rectory Road at the south-eastern edge of Mellis conservation area, c. 70 m north-west of the railway, and c. 660 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse is of probable 16th century date with a floor and chimney stack inserted in the 17th century, extensions added in the 18th or 19th centuries and alteration made in the 20th century. The asset comprises a plastered timber frame structure with a steeply pitched pantiled roof.
- 3.3.611 The setting of the asset is informed by its location within a former farming complex and by its relationships with former outbuildings, now residences, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationships with other listed assets and non-designated buildings in its vicinity, which positively contribute to the character of the conservation area. The surrounding agricultural landscape, with which the asset has a historical and former functional relationship, also positively contributes to the setting, but the link to this land has been partial eroded by the imposition of the railway and the construction of modern barns to the south-east and south-west respectively. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its focus being on its former farmyard location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.612 The Grade II listed assets 'Cowpasture Farm House' (**1032813**) and 'Barn About 30 m South West of Cowpasture [sic] Farm House' (**1181777**) are located on the south-eastern flank of the Mellis conservation area c. 120 m south-south-east of Mellis

Road, and c. 600 m south-east of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. The farmhouse dates to the mid-17th century, was altered in the 19th century, and comprises a plastered timber frame structure with a steeply pitched pantiled roof. The barn, now a residence(s), dates to the 17th century but it was largely rebuilt in late 18th century or early 19th century reusing 16th century timbers. The asset comprises a weatherboarded timber frame structure with a modern tiled roof. The assets forms part of a historical farmstead known as Cowspasture Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2457**). The farmstead has evidential and historical value.

- 3.3.613 The setting of the assets is shared and informed by their location within a former farm complex, by their interrelationships and by their relationships with former outbuildings, most of which are recorded of the first edition OS map of 1885. The setting is further informed by the assets' relationships with other listed assets and non-designated buildings in their vicinity, which positively contribute to the character of the conservation area. The agricultural landscape to the south and south-east, with which the assets have a historical and former functional relationship, also positively contributes to the setting, as does the village green to the north-west. The link to the agricultural landscape has, however, been partially eroded by the imposition of the railway. Due to the loss of function and the introduction of infrastructure, the setting of the assets, makes a moderate contribution to their values, but because of its focus being on its former farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.614 The Grade II listed 'Walnut Tree Farm House' (**1032812**) is located on the south-eastern flank of Mellis conservation area, 120 m south-east of Mellis Road, and c. 550 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 16th century, was extended and a floor and chimney stack inserted in the 17th century and altered and extended in the 19th and 20th centuries. The asset comprises a plastered timber frame structure with some red brick casing and a steeply pitched pantiled roof. The asset is the former home of author and environmentalist Roger Deakin and is where his book *Notes from Walnut Tree Farm* was written.
- 3.3.615 The setting of the asset is informed by its secluded location within its grounds, which contain trees, are defined by mature tree belts and afford the asset almost privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but because of its focus being on the asset's immediate grounds, the setting does not extend to the draft Order Limits.
- 3.3.616 The Grade II listed 'Willow Farm House' (**1181772**) is located on the south-eastern flank of Mellis conservation area, 140 m south-east of Mellis Road, and c. 510 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the late 17th century, was altered in the 20th century and comprises a plastered timber frame structure with a steeply pitched machine tiled roof. The farmhouse forms part of a historical farmstead known as Willow Farm or Willow Lodge. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2455**). The farmstead has evidential and historical value.
- 3.3.617 The setting of the farmhouse is informed by its location within a former farm complex and by its relationship with its former outbuildings, now a residence(s). The setting is further informed by the asset's relationships with other listed assets and non-

designated buildings in its vicinity, which positively contribute to the character of the conservation area. The agricultural landscape to the south and south-east, with which the asset has a historical and former functional relationship, also positively contributes to the setting, as does the village green to the north-west. Despite the change of function for the outbuildings, they and the listed farmhouse retain some visual cohesion as former farming complex, and so the setting of the asset makes a considerable contribution to its value. Due to the focus of the setting being restricted to the asset's farmyard location, its grounds and immediate landscape, however, it does not extend to the draft Order Limits.

- 3.3.618 The Grade II listed '96, The Common' (**1032811**) is located towards the south-eastern flank of Mellis conservation area, 150 m south-east of Mellis Road, and c. 500 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 17th century, was extended in the 18th century, altered in the 20th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.619 The setting of the asset is informed by its secluded location within its grounds and by its historical relationships with the agricultural land to the south and the village green to the north. The setting is further informed by the asset's relationships with other listed assets and non-designated buildings in its vicinity, which positively contribute to the character of the conservation area. The setting of the asset, therefore, makes a considerable contribution to its value, but because of its focus being on the asset's immediate grounds, the setting does not extend to the draft Order Limits.
- 3.3.620 The Grade II listed assets 'Pountney Hall' (**1352239**) and 'Barn About 40 m North East of Pountney Hall' (**1032805**) are located at the south-western extent of Mellis conservation area c. 50 m north-west of Mellis Road, and c. 520 m south of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the late 16th or early 17th centuries, was altered and reduced in size around 1810, and comprises a plastered timber frame structure with clay lump additions and steeply pitched plain tiled roof. The barn is a former stable block and the king post is marked I. C. May 4, 1743. The asset is built of red brick and has a steeply pitched pantiled roof. The assets are located within a historical farmstead known as Pountney Hall. This dates to the 16th century with later 18th century additions and alterations. The Suffolk HER has recorded the farmstead complex as a non-designated heritage asset (**2424**). The farmstead has historical and evidential value.
- 3.3.621 The setting of the assets is shared and is informed by their location within a working farm complex, by their interrelationship and their relationships with the non-designated outbuildings of the farm, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical and ongoing functional relationship. The setting of the assets, therefore, makes a considerable contribution to their values and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.622 The Grade II listed 'West End Farm House' (**1181793**) is located at the south-western extent of the Mellis conservation area c. 55 m west of Mellis Road, and c. 550 m south of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse forms part of a historical farmstead known as West End Farm or West Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2454**). The farmstead has evidential and historical value.

- 3.3.623 The setting of the farmhouse is informed by its location within a working farm complex and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and ongoing functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value but because of its focus being on the asset's farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.624 The Grade II listed 'Potash Farm House' (**1284856**) is located on the south-eastern edge of the Mellis conservation area c. 350 m south-east of Mellis Road, and c. 690 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse is of probable 16th century origins, was added to in the 17th century, altered in the 19th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.625 The setting of the asset is informed by its location within a working farm complex and by its relationship with its non-designated outbuilding, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical and ongoing functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value but because of its focus being on the asset's farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.626 The Grade II listed 'Thatch' (**1352243**) is located 130 m outside the Mellis conservation area to the south-east, on the south-western flank of Rectory Road, and c. 880 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 17th century, was extended in the 18th or 19th centuries, was altered in the 20th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.627 The setting of the asset is informed by its roadside location within its mature grounds, which are defined by mature tree lined hedgerows. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The railway lies 125 m to the north-west, which has introduced occasional noise into the setting, whilst there is some 21st century residential development in sight to the north-east. The setting of the asset, therefore, makes a considerable contribution to its value but because of its focus being on the asset's roadside location, its grounds and immediate surrounding landscape, the setting does not extend to the draft Order Limits.

### Thornham Parva CP

- 3.3.628 The Grade II listed 'Ar-Den' (**1033139**) is located on the northern flank of Chapel Farm Lane c. 640 m north-west of Thornham Parva, and c. 1.9 km south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the early 18th century, was extended and altered in the 19th century and comprises a plastered timber frame structure with a thatched and pantiled roofs.
- 3.3.629 The setting of the asset is informed by its roadside location within its mature large garden and by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value but because of its focus being on the asset's roadside location, its garden and immediate surrounding landscape, the setting does not extend to the draft Order Limits.

- 3.3.630 The Grade II listed 'Chapel Farmhouse' (**1181247**) is located 30 m south-west of Chapel Farm Lane, c. 1 km north-west of Thornham Parva , and c. 1.7 km south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 17th century or possibly earlier, was extended in the 18th or 19th centuries and comprises a plastered timber frame structure with a steeply pitched pantiled roof.
- 3.3.631 The setting of the asset is informed by its former farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885, and which are now converted into a residence(s). The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings has a historical and former functional relationship. Despite the change of function for the outbuildings, they and the listed farmhouse retain some visual cohesion as former farming complex, and so the setting of the asset makes a considerable contribution to its value. Due to the focus of the setting being restricted to the asset's farmyard location, its grounds and immediate landscape, however, it does not extend to the draft Order Limits.

### Gislingham CP

- 3.3.632 The Grade II listed assets 'Clare Cottage' (**1033153**) and 'Coldham House' (**1180610**) are located side-by-side on the southern flank of Coldham Lane, Gislingham and c. 380 m west of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. Clare Cottage, to the east, dates to 1622 based on a date carved into the fireplace bressummer, was altered in the 20th century and comprises a weatherboarded timber frame structure with plastered panels and a thatched roof. Coldham House, to the west, dates to the 17th century and possibly earlier, was extended in the 18th or 19th centuries and comprises a plastered timber frame structure with a steeply pitched pantiled roof.
- 3.3.633 The setting of the assets is shared and informed by their roadside locations, their interrelationship, and their mature gardens to the rear. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical relationship. The link to the agricultural landscape has, however, been eroded by the 20th century residential development of Gislingham along Coldham Lane. The setting of the asset, therefore, makes a moderate contribution to their values, but due to its roadside village location, the setting does not extend to the draft Order Limits.
- 3.3.634 The Grade II listed 'The Farm and Adjoining Premises' (**1033156**) is located on the western flank of Hight Street towards the southern edge of Gislingham and 650 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the mid-to-late 16th century, was altered in the 19th and 20th centuries and comprises a plastered timber frame structure with a thatched roof.
- 3.3.635 The setting of the asset is informed by its roadside village location and by its relationships with other listed and non-designated buildings in its vicinity that positively contribute to the character of the settlement. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship, but this link has been largely eroded by 20th century residential along High Street and to the rear (west) of the asset. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its focus on the roadside village location, the setting does not extend to the draft Order Limits.

- 3.3.636 The Grade II listed 'Suryodaya with Attached Garden Wall' (**1033158**) is located at the northern end of a private road c. 110 m north-north-west of Finningham Road, Gislingham, and c. 830 m west-south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The large former rectory was built in 1791, was altered in c. 1975 and comprises a red brick structure with a shallow hipped glazed pantiled roof. The asset once served as a medical centre, but now appears to be a residence again.
- 3.3.637 The setting of the asset is informed by its secluded location within its large, mature grounds that are defined by high, mature tree lined hedgerows and which afford the asset privacy. The setting is further informed by its village edge location, but the asset's boundaries ensure views into and out from the asset are very limited. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the grounds and village edge, the setting does not extend to the draft Order Limits.
- 3.3.638 The Grade II listed assets 'Jasmine Cottage' (**1285378**) and 'Hidcote House' (**1180621**) are located on opposite sides of High Street in the south of Gislingham, and c. 670 m west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. Jasmine Cottage, to the west, dates to the mid-to-late 17th century, it was extended and altered in the 19th century and altered again in the 20th century. The asset comprises a plastered timber frame structure with thatched and black glazed pantiled roofs. Hidcote House, to the east, dates to the early 17th century, was altered and extended in the 19th and 20th centuries and comprises a plastered timber frame structure with a steeply pitched pantiled roof.
- 3.3.639 The setting of the assets is shared and informed their roadside village location, by their interrelationship and their relationships with other listed and non-designated building in the vicinity, which positively contribute to the character of Gislingham. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical relationship, although this link has been slightly eroded by 20th century infill residential development. The setting of the assets, therefore, makes a considerable contribution to their values, but due to its restricted village focus, the setting does not extend to the draft Order Limits.
- 3.3.640 The Grade II listed 'Service Building Immediately South West of Holm Oak House' (**1033121**) and 'Two Barns And Attached Sheds at Rush Green Farm About 50 Metres West of Holm Oak House' (**1352107**) are located c. 30 m west of High Street at the southern extent of Gislingham, and 860 m west-north-west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The service building is the former kitchen/dairy range to the medieval Holm Oak House (**1285277**), and it dates to the late 16th century with 19th century alterations. The asset comprises a plastered timber frame structure with a steeply pitched plain tile roof. The barns and sheds date to the late 17th or early 18th centuries and comprise weatherboarded timber frame structures on brick plinths. The northern barn is thatched whilst that to the south has a pantile roof.
- 3.3.641 The setting of the assets is informed by their roadside village locations and by their relationship with the medieval Grade II listed asset Holm Oak House (**1285277**). The setting is further informed by the surrounding agricultural landscape with which the assets have a historical and former functional relationship. The grounds of the assets contain trees and are defined by high, mature tree lined hedgerows that screen the assets from the High Street to the east. The three listed assets are now separate

residential properties and this change of function for the barns and the associated property boundaries means the setting of the assets makes a moderate contribution to their values. Due to the restricted settlement focus of the setting and screening by roadside vegetation, the setting does not extend to the draft Order Limits.

- 3.3.642 The Grade II listed 'Rush Green Cottage' (**1033122**) is located 60 m south of Back Street at the southern extent of Gislingham, and c. 915 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 16th or early 17th centuries, was extended in the later 17th and 20th centuries and comprises a plastered timber frame structure with a thatched roof.
- 3.3.643 The setting of the asset is informed by its moderately secluded location within its large, mature garden, and by its relationships with the listed buildings of the Holm Oak House complex to the north and non-designated buildings flanking Finningham Road to the east, which positively contribute to the character of Gislingham. The setting is further informed by the agricultural land to the south and west, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the asset's grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.644 The Grade II listed 'Orchard Cottage' (**1033126**) is located on the northern flank of Back Street, c. 1.2 km south-west of Gislingham and c. 1.54 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset dates to the mid-16th century, had a chimney stack inserted in the 17th century and was reduced in size and altered in the 19th and 20th centuries.
- 3.3.645 The setting of the asset is informed by its roadside location within its large, mature garden and by its relationship with non-designated buildings on the southern flank of Back Street, most of which are recorded on the first edition OS map of 1885, and which positively contribute to the character of the thoroughfare. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the asset's grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.646 The Grade II listed assets 'Ivy Lodge Farmhouse' (**1352109**) and 'Barn About 25 Metres South East of Ivy Lodge Farmhouse' (**1033125**) are located in a former farm complex on the southern flank of Back Street, c. 1 km south-west of the centre of Gislingham and c. 1.25 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the early-to-mid 17th century, was altered in the 20th century and comprises a plastered timber structure with a steeply pitched pantiled roof. The barn dates to the early-to-mid 17th century, was extended in the early 18th century and comprises a partially weatherboarded, partially rendered timber frame structure. The asset has recently been converted into a residence with a new roof.
- 3.3.647 The setting of the assets is shared and informed by their former farmyard location, by their interrelationship and by their relationships with several non-designated outbuildings, although these are largely of 20th century date. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical and former functional relationship. Despite the change of function, the assets retain some cohesion as elements of a former working farm complex, and so the setting of the assets makes a moderate contribution to their values, but as it is

restricted to the former farmyard and the immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.648 The Grade II listed 'Red House Farmhouse' (**1352086**) is located at the southern end of Morleys Lane at the southern extent of Gislingham and c. 560 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the mid-to-late 18th century and comprises a red brick structure with a hipped pantiled roof.
- 3.3.649 The setting of the asset is informed by its location within a working farm complex and by its relationship with its largely modern outbuildings, although some may retain elements of the buildings recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical and ongoing functional relationship. The railway bisects the landscape between the asset and draft Order Limits thereby restricting the asset's setting to the west of the infrastructure. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the working farmyard and the arable land west of the railway, the setting does not extend to the draft Order Limits.

#### Thornham Magna CP

- 3.3.650 The Grade II listed assets 'The Stables' (**1285123**) and 'Water Tower About 40 Metres West of The Stables' (**1033132**) are located within the Thornham Hall complex, c. 500 m north-north-west of Thornham Magna, 1.7 km east-north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former stable of the non-designated Thornham Hall is now five residences. It was built in 1837-8 by S. Smirke for the 4th Lord Henniker, was altered in the 20th century and comprises a rendered red brick structure with ashlar dressings and a slate roof.
- 3.3.651 The setting of the assets is shared and informed by their location within the Thornham Hall complex, by their interrelationship and their relationships with the non-designated elements of the complex. The setting is further informed by the assets' situation within, and relationship with, the non-designated Thornham Park (**2407**). The setting of the assets, therefore, makes a considerable contribution to their values, but due to it being restricted to the Thornham Hall complex and the immediate parkland, the setting does not extend to the draft Order Limits.
- 3.3.652 The Grade II listed 'Red House Farmhouse' (**1181071**) is located on the northern flank of Thornham Road at the south-west corner of Thornham Park (**2407**), c. 750 m north-west of Thornham Magna, and 1.3 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse was built as part of Home Farm to Thornham Estate in the mid-18th century. It was extended in the 19th century, altered in the 20th century and comprises a red brick structure with a hipped plain tiled roof.
- 3.3.653 The setting of the asset is informed by its location within a large working farm complex, by its relationships with the extensive complex of non-designated outbuildings, most of which are recorded on the first edition OS map of 1885, and by its relationship with the Thornham Estate Parkland to the north and east. The setting is further informed by the agricultural landscape to the west and south, with which the asset and its outbuildings have a historical and ongoing functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the farmyard and surrounding agricultural landscape and

extensive screening by mature trees and shrubs, the setting does not extend to the draft Order Limits.

- 3.3.654 The Grade II listed 'The Old Laundry' (**1352112**) is located 240 m south of Thornham Road, c. 720 m west-north-west of Thornham Magna, and c 1.2 km east-south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, formerly Spalding's Farm House, dates to the early 17th century or perhaps earlier, was altered and extended in the 19th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.655 The setting of the asset is informed by its secluded location within its large garden, which is defined by mature tree lined hedgerows affording the asset privacy. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical and former functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the asset's garden and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.656 The Grade II listed assets 'Gull Lane Cottage' (**1356675**) and '191 and 192, Gull Lane' (**1033128**) are located flanking Gull Lane 210 m and 110 m south of Thornham Road respectively. Thornham Magna lies c. 410 m to the south-east whilst the draft Order Limits is located c. 1.7 km to the west. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. The cottage dates to the late 16th or early 17th centuries, was altered in the mid-18th century and comprises a rendered timber frame structure with a steeply pitched thatched roof. The adjoined Gull Lane properties were built as a house in the 17th century, which was altered in the 19th and 20th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.657 The setting of the assets is shared and informed by their secluded roadside locations off Gull Lane, their gardens and a mature copse which extends west and southwards. The setting is further informed by the agricultural land to the east and beyond the copse, with which the assets have a historical relationship. the setting of the assets, therefore, makes a considerable contribution to their values, but as it is restricted to the gardens of the assets and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.658 The Grade II listed '183 And 184, Clay Street' (**1285200**) is located on the northern flank of Clay Street, c. 910 m south-south-west of Thornham Magna and 1.2 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, now two residences, dates to the early-to-mid 17th century, was altered in the 20th century and comprises s plastered timber frame structure with s thatched roof.
- 3.3.659 The setting of the asset is informed by its rural roadside location, its moderately large garden and its relationship with a quadrangle of now converted non-designated barns immediately to the west, which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the asset's roadside garden and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.660 The Grade II listed 'Starhouse Farmhouse' (**1352111**) is located at the western limit of Clay Street, c. 2 km south-west of Thornham Magna and c. 255 m east of the draft

Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse was built around 1600, was altered in the 19th and 20th centuries and comprises a plastered timber frame structure with a steeply pitched plain tiled roof. The farmhouse forms part of a historical farmstead known as Starhouse Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2481**). The farmstead has evidential and historical value.

- 3.3.661 The setting of the farmhouse is informed by its location within a working farm complex and by its relationship with its non-designated modern outbuildings, and the one or two surviving outbuildings recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical relationship and ongoing functional relationship. The setting of the asset makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.662 The Grade II listed 'Grove Farmhouse' (**1181174**) is located on the north-western flank of Wickham Road, c. 840 m south-south-west of Thornham Magna and 1.85 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset dates to the early 19th century, or possibly earlier, and comprises a plastered timber frame structure on a brick base with a black glazed pantiled roof.
- 3.3.663 The setting of the asset is informed by its location within the former Grove Farm complex and by its relationship with its now converted, non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical relationship and ongoing functional relationship. Due to the division of the farming complex into separate residences and the introduction of property boundaries, the setting of the asset makes a moderate contribution to its value, but due to it being restricted to the former farmyard and the immediate landscape, the setting does not extend to the draft Order Limits.

## **Worham, Mellis and Gislingham**

### *Non-Designated Heritage Assets*

- 3.3.664 St Johns, now Park House (**2402**), encompasses a small landscape park that was once part of a larger estate, situated across Palgrave and Worham. While it was depicted on historical maps such as the OS 1:10560 map and the OS 1st edition map of 1837, it is notably absent from J Hodkinson's Map of Suffolk in 1783. This asset, now disparted, holds evidential and historical value as a remnant of a past landscape design and land use. St Johns, now Park House, is considered to have **medium value**. Within its bounds are four listed buildings Grade II (**1284698**, **1032787**, **1182135** and **1032788**), three early medieval metal detector finds, one Roman metal detector finds and the post medieval St John's House Hospital, Lion Road (**2415**). The latter is located 70 m south-west of the draft Order Limits. It exhibits **medium value**, particularly in its historical significance, as it is recognised as part of a heritage group. Archaeological evaluations and excavations conducted at the site revealed post medieval features, including a wall foundation, a brick culvert, and a clay-lined tank or pit of uncertain function. These findings provide insight into the historical activities and structures associated with St John's House Hospital during the post medieval period, contributing to the overall understanding of the site's historical context within the heritage group. However, given its limited extent and the absence of detailed historical documentation, St Johns, now Park House, is considered to have **low value**.

- 3.3.665 The Haughley to Norwich railway line (**2498**), crossing the draft Order Limits, is assessed as having **low value**. Erected in December 1849 as an extension to the Ipswich and Bury Railway, this stretch of track served the now-closed Norwich Victoria station. Despite its historical role in expanding railway connectivity in the region, the line's limited survival of original features and its status as part of a larger rail network contribute to its overall lower heritage value. The line, now part of the Great Eastern Main Line Service, played a historical role in transportation but lacks the distinct characteristics or preserved elements that would elevate its value to a higher category.
- 3.3.666 The **low value** Gibson's Farm (**2307**) of evidential value is located approximately 150 m west of the draft Order Limits, 160 m south of Bugg's Road, and 1 km south-west of Burgate. The farmhouse dates to the 18th century, with the farmstead dating to the 19th century farmstead. The complex is recorded as a U-shaped plan courtyard formed by agricultural buildings. The farmhouse is set away from the yard with the farmhouse being the only extant building. The HER record suggests there is potential for earlier origins to buildings and farmsteads.
- 3.3.667 The **low value** outfarm of Bullocks Ley (**2308**) of evidential and historical value is located approximately 200 m north-east of the draft Order Limits, 50 m south-east of Burgate Road, and 880 m south of Great Green. The outfarm dates to the 19th century with a regular covered courtyard plan formed by agricultural buildings. The outfarm is recorded by the HER as extant and in an isolated position.
- 3.3.668 Located partly within the draft Order Limits, approximately 640 m south-west of Gislingham, is a non-extant outbarn (**2500**). The single, unnamed barn dated to the 19th century. It is not clear which of the surrounding farms this outbarn belong to. It appears in the first edition OS map 1885 of the area. It has evidential value and historical value. It is of **negligible value**.
- 3.3.669 Partly located within the draft Order Limits, approximately 1.15 km north-west of Gislingham, is the non-extant remains of Proctors Barn (**2501**). The barn dated to the 19th century and was non-extant by the first edition OS map 1885. It has evidential value and limited historical value. It is of **negligible value**.
- 3.3.670 To the north-east of the draft Order Limits, by approximately 255 m, is non-extant remains of Swattesfield Hall (**2502**). This historical farmstead dated to the 19th century and appears on the first edition OS map 1885. It has evidential value and limited historical value. It is of **low value**.
- 3.3.671 Within Gislingham, located approximately 225 m west of the draft Order Limits, is the non-extant Church Farm farmstead (**2503**). It appears in the first edition OS map 1885 of the area. It has evidential value and limited historical value. It is of **negligible value**.
- 3.3.672 The **medium value** Thornham Park and Hall (MSF14910 - **2407**) asset has evidential and historical value and is located approximately 245 m north-east of the draft Order Limits, and 750 m north-east of Gislingham. All, if not all the hall is now lost, but two listed Grade II elements of the estate complex survive: a stable (**1285123**) and a water tower (**1033132**). The hall was a 16th-century 'E' shaped house extensively modernised in the late 17th and 19th centuries. The accompanying park likely dates to the 17th or early 18th centuries. The estate was linked to Mellis Road by the 'Old Drive' prior to the introduction of the railway. The asset has historical and evidential value.
- 3.3.673 The PAS records a 16th to 17th century complete copper alloy sword belt fitting (**2546**) being found within the draft Order Limits in the Gislingham area. The asset is

roughly rectangular with a slight flare at the terminal end, featuring two rivet holes in the centre. The plate ends with a hook, still attached to a copper alloy loop, designed to fit onto a scabbard strap. It has evidential and historical value but is of **low value**.

- 3.3.674 Within Gislingham, c. 210 m south-west of the draft Order Limits is Ivy House Farm, on Mellis Road (**2417**). It holds a **medium value** due to its historical and aesthetic value. The site, which formerly housed a garage and dairy house, revealed two cut features and a potential floor makeup. Although no specific dating evidence was recovered, the probability of a post medieval date suggests historical significance. Moreover, Ivy House Farm contributes to the heritage group value, aligning with the listed building 'Ivy House Farmhouse' (**1180705**) and the non-designated asset Ivy House Farm (**2488**), further enriching the historical context of the collective heritage within the Mellis Road area.
- 3.3.675 Located c. 240 m north of the draft Order Limits is the site of Swattesfield Brickworks (**2491**) including kiln, drying sheds, and pit. This site has evidential and historical value, but it is now gone and is of **low value**.
- 3.3.676 Approximately 185 m north-west of the draft Order Limits is the foundation wall of an 18th-century building located at Land opposite Ivy Farm, Mellis Road, Gislingham (**2495**). It holds historical value as identified through evaluation and depicted on Hodkinson's map from 1783. The wall, discovered during an evaluation in 2015, is associated with a structure shown on the historical map. Although the brick sample suggests a post medieval, possibly 18th-century date, the site lacks specific dating evidence. The nearby ditch and post hole further add to the archaeological interest. Overall, the asset has **low value**.
- 3.3.677 The PAS records a post medieval silver sixpence of Charles I (AD 1625-1649) (**2538**) being found within Gislingham outside the draft Order Limits. It has historical and evidential value but is of **low value**.

## **Finningham, Mendlesham and Old Newton**

### *Designated Heritage Assets*

#### [Finningham CP](#)

- 3.3.678 The Grade II listed 'Barn about 15 Metres North West of Church Farm House' (**1352078**) and the Grade II\* listed Church Farmhouse (**1033145**) are located on the eastern flank of Gislingham Road on the eastern edge of Finningham and within the Finningham conservation area (**CA48**), 160 m east of the Church of St Bartholomew (**1352056**) and 780 m west of the draft Order Limits. The farmhouse is of medieval date and reported in the appropriate section above. The barn is of **medium value** based on its designation and its evidential, historical and aesthetic values. The barn dates to the 19th century and comprises a clay lump structure on a brick base with a pantile roof.
- 3.3.679 The setting of the barn is informed by its village edge location, by its relationship with the Grade II\* listed farmhouse (**1033145**) and by its relationships with further listed buildings and with non-designated buildings within Finningham that contribute positively to the character of the settlement. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and functional relationship. The barn has been converted into a residential dwelling with associated property boundaries and there is now very little evidence of the former farmyard. The setting of the asset, therefore, makes a moderate contribution to its value, but due to its restricted settlement focus and screening by its property

boundary and by mature treelined hedgerows and infrastructure in the intervening landscape, the setting does not extend to the draft Order Limits.

- 3.3.680 The Grade II listed 'Hill House' (**1180564**) is located on the northern flank of Westhorpe Road close to the western extent of Finningham and c. 1.5 km west-south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 17th century, was altered in the 20th century and comprises a plastered timber frame structure with a pantiled roof.
- 3.3.681 The setting of the asset is informed by its roadside, village edge location and by its relationship with non-designated buildings in the vicinity that positively contribute to the character of the settlement; particularly those to the east, which are recorded on the first edition OS map of 1885. The setting is further informed by the agricultural landscape to the north and south, with which the asset has a historical relationship. Twentieth century residential development of Finningham along Westhorpe Road has annexed the asset and the post medieval non-designated buildings to the east, and so the setting of the asset makes a moderate contribution to its value. Due to the setting being restricted to the garden plot of the asset and its immediate landscape, however, it does not extend to the draft Order Limits.
- 3.3.682 The Grade II listed 'Barn About 20 Metres West of Mill Farm House' (**1180529**) is located on the western flank of Station Road, c. 770 m south-south-west of Finningham and c. 1.4 km south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The barn dates to around 1600, was reroofed in the 18th century and comprises a weatherboarded timber frame structure on a brick base with a pantiled roof.
- 3.3.683 The setting of the asset is informed by its location within a large working farm complex and by its relationships with its numerous associated buildings west and east of Station Road, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its associated buildings have a historical relationship and ongoing functional relationship. The railway bisects the landscape between the asset and draft Order Limits thereby restricting the asset's setting to the west of the infrastructure. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the working farmyard and the arable land west of the railway, the setting does not extend to the draft Order Limits.
- 3.3.684 The Grade II listed 'Mill Cottage' (**1352081**) is located at the eastern end of the byway Mill Road, c. 870 m south-south-east of Finningham and c. 1.1 km south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the mid-to-late 18th century and comprises a clay lump structure encased in 19th century brick and with a thatched roof.
- 3.3.685 The setting of the asset is informed by its location within its large garden, by its relationship with its post medieval and early modern outbuildings, which are recorded on 19th and 20th century OS mapping. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have a historical relationship. The railway lies 110 m to the west, which introduces occasional noise into the setting, but overall, it makes a considerable contribution to its value. Due to the setting, however, being restricted to the asset's grounds and immediate landscape, it does not extend to the draft Order Limits.

## Wickham Skeith CP

- 3.3.686 The Grade II listed 'Willow House' (**1182748**) is located on the northern flank of Wickham Road, Wickham Street, and c. 600 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the 16th century with an 18th century addition to the north and comprises a plastered timber frame structure with a thatched roof.
- 3.3.687 The setting of the asset is informed by its roadside village location within its garden, by its relationship with its non-listed outbuildings and by its relationships with other non-listed buildings flanking Wickham Road that positively contribute to the character of Wickham Street. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical and former functional relationship. There has been some earlier 20th century residential infill development along Wickham Road, but this is largely sympathetic and in the local architectural vernacular. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to its village location, its grounds and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.688 The Grade II listed 'Barn 20 Metres East of Street Farmhouse' (**1182741**) and the Grade II\* listed 'Street Farmhouse' (**1352524**) are located in Wickham Street on the southern flank of Wickham Road, and c. 670 m north-east of the draft Order Limits. The farmhouse is medieval in date and reported in the appropriate section above. The barn is of **medium value** based on its designation and its evidential, historical and aesthetic values. The barn dates to the late 16th century and comprises a timber frame structure the lower portion of which is rendered and tarred with weatherboarding above. The roof is clad in corrugated iron.
- 3.3.689 The setting of the barn is informed by its working farmyard location and by its interrelationship with the associated farmhouse and by its relationships with further listed buildings and with non-designated buildings within Wickham Street that contribute positively to the character of the settlement. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical and ongoing functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by buildings and mature tree cover and hedgerows in the settlement, the setting does not extend to the draft Order Limits.
- 3.3.690 The Grade II listed 'Kisumu' (**1352523**) is located 30 m south of Wickham Road in Wickham Street, and c. 840 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the 16th century, was extended in the 17th century and comprises a rendered timber frame structure with a pantiled roof.
- 3.3.691 The setting of the asset is informed by its partially secluded location within its large garden, which is defined by mature tree lined hedgerows. The setting is further informed by its relationship with its outbuildings, one of which is recorded on the first edition OS map of 1885. The setting is further informed the surrounding agricultural landscape, with which the asset and its outbuilding have a historical and former functional relationship. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to the mature grounds of the assets and the immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.692 The Grade II listed 'Abbey Farmhouse' (**1182599**) is located in a large working farm complex c. 300 m south of an unnamed road linking Wickham Street and Cotton, c. 1.2 km west-south-west of Wickham Skeith, and c. 90 m north-north-east of the draft Order Limits. The asset dates to the 16th century or earlier, has a later 16th century extension, a 17th century wing to the north-west and comprises a roughcast rendered timber frame structure with a concrete pantiled roof. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values.
- 3.3.693 The setting of the asset is informed by its location within a large working farm complex and by its relationship with its numerous non-listed outbuildings, although those recorded on the first edition OS map of 1885 appear to have been replaced by modern hanger style structures. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have a historical and ongoing functional relationship. The setting of the asset, therefore, makes a moderate contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.694 The Grade II listed 'Walnut Farmhouse' (**1032199**) is located on the northern flank of Daisy Green Lane, c. 500 m south-west of the centre of Wickham Skeith, and c. 190 m east-north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 16th century, was extended in the 17th century and comprises a plastered timber frame structure with brick cased gables and a pantiled roof. The farmhouse forms part of a historical farmstead known as Walnut Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2484**). The farmstead has evidential and historical value.
- 3.3.695 The setting of the farmhouse is informed by its secluded location within its garden area and by its relationship with its outbuilding, which is likely the structure recorded on the first edition OS map of 1885. The setting is further informed the surrounding agricultural landscape, with which the asset and its outbuilding have a historical and former functional relationship; however, this link has been eroded by the development of the large Hollybank Farm complex to the west and the growth of a mature copse to the south. The setting of the asset, therefore, makes a moderate contribution to its value, but due to screening by mature tree cover and the Hollybank Farm complex, the setting does not extend to the draft Order Limits.
- 3.3.696 The Grade II listed 'Allfield Farmhouse' (**1182668**) is located on the southern flank of Daisy Green Lane, c. 420 m south-west of Wickham Skeith, and c. 280 m east-north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the mid-16th century, has an 18th century extension and was extended again in the 1970s. the asset comprises a rendered timber frame structure with pantiled roofs. The farmhouse forms part of a historical farmstead known as Allfield Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2483**). The farmstead has historical and evidential value.
- 3.3.697 The setting of the farmhouse is informed by its location within the former farmyard and by its relationship with its non-designated outbuildings, which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationship with the surviving non-designated elements of the Knoll Farm complex also recorded on the OS map, and located on the opposite, northern flank of the throughfare. The surrounding agricultural landscape, with which the asset and its outbuildings have a historical and a former functional relationship, also contributes

positively to the setting, although the farm to the north and the mature grounds of the asset have partially eroded this link. The setting of the asset, therefore, makes a moderate contribution to its value, but due to screening by mature tree cover and the Hollybank Farm complex to the west, the setting does not extend to the draft Order Limits.

- 3.3.698 The Grade II listed 'Elm Farmhouse' (**1032198**) is located on the northern flank of an unnamed road between Grange Road to the west and the A140 to the east, c. 1.2 km south-south-east of Wickham Skeith and c. 1.3 km east-north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the late 16th to early 17th centuries and comprises a plastered timber frame structure with a thatched roof. The front elevation is decorated with closely spaced diagonal battens forming a broad herringbone design.
- 3.3.699 The setting of the asset is informed by its roadside farmyard location and its relationships with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1885, and with the working farm complex on the southern flank of the throughfare. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have a historical and ongoing functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and it being restricted to the farmyard and surrounding landscape, the setting does not extend to the draft Order Limits.

### Cotton CP

- 3.3.700 The Grade II listed 'Park Farmhouse' (**1285497**) is located on the northern flank of Brook House Road in Dandy Corner, c. 1.2 km north-north-east of Cotton and c. 730 m west-south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset dates to the late 16th to early 17th centuries and comprises a plastered timber frame structure with a concrete pantiled roof. The asset is located within a historical farmstead known as Park Farm. This dates to the 16th century with later 19th century additions and alterations. The Suffolk HER has recorded the farmstead complex as a non-designated heritage asset (**2426**). The farmstead has historical and evidential value.
- 3.3.701 The setting of the asset is informed by its roadside former farmyard location and by its relationships with its non-designated, now converted outbuildings, several of which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationships with other listed and non-designated buildings in the vicinity, which are also recorded on the OS map, and that positively contribute to the character of the small settlement. The surrounding agricultural landscape, with which the asset and its outbuildings have a historical and former functional relationship, also contributes positively to the setting. The outbuildings now serve as dwellings and the farmyard has been divided accordingly to provide garden and parking for each, although the complex still retains some cohesion as a former working complex. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to the farmyard and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.702 The Grade II listed 'Cotton Hall' (**1180383**) is located within its large garden 20 m south of Brook House Road in Dandy Corner, c. 1.2 km north-north-east of Cotton and c. 680 m west-south-west of the draft Order Limits. The asset is of **medium**

**value** based on its designation and its evidential, historical and aesthetic values. The manor farmhouse dates to the mid-17th century, has a late 19th century façade of red brick and a 20th century pantiled roof.

- 3.3.703 The setting of the asset is informed by its location within its large garden and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationships with other listed and non-designated buildings in the vicinity, which are also recorded on the OS map, and that positively contribute to the character of the small settlement. The surrounding agricultural landscape, with which the asset and its outbuildings have a historical and former functional relationship, also contributes positively to the setting. The asset's grounds are defined by mature tree lined hedgerows, which allow for occasional view into and out from the asset, affording the asset a degree of privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the farmyard and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.704 The Grade II listed 'Poplar Farmhouse' (**1032277**) is located on the eastern flank of Brook House Road in Dandy Corner, c. 940 m north-east of Cotton and c. 710 m west-south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse date to the late 16th to 17th century, with 19th century alterations and comprises a rendered timber frame structure with a concrete pantiled roof. The farmhouse forms part of a historical farmstead known as Poplar Farm or Cotton Hills. The Suffolk HER has recognised the farmstead as a non-designated heritage asset (**2444**). The farmstead has evidential and historical value.
- 3.3.705 The setting of the farmhouse is informed by its roadside location within the former farmyard and by its relationships with its non-designated, now converted outbuildings, several of which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationships with other listed and non-designated buildings in the vicinity, which are also recorded on the OS map, and that positively contribute to the character of the small settlement. The surrounding agricultural landscape, with which the asset and its outbuildings have a historical and former functional relationship, also contributes positively to the setting. The outbuildings now serve as holiday lets and residences and the farmyard has been divided accordingly to provide garden and parking for each, although the complex still retains some cohesion as a former working complex. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to the farmyard and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.706 The Grade II listed 'Sunnyview' (**1180395**) is located on the western flank of Brook House Road in Dandy Corner, c. 920 m north-east of Cotton and c. 800 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the 17th century with evidence of 19th and 20th century maintenance and comprises a roughcast-rendered timber frame structure with a 21st century pantiled roof.
- 3.3.707 The setting of the asset is informed by its roadside location within the former farmyard and by its relationships with its non-designated, several of which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationships with other listed and non-designated buildings in the vicinity, which are also recorded on the OS map, and that positively contribute to the character of the small settlement. The surrounding agricultural landscape, with which

the asset and its outbuildings have a historical and former functional relationship, also contributes positively to the setting. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to the farmyard and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.708 The Grade II listed 'Hempnalls Hall' (**1180451**) is located 60 m off the north-western flank of Willow Lane, c. 1.2 km north-east of Cotton, and c. 190 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The manor house dates to the late 16th century, has a small 18th century rear wing, was restored in the 1980s and comprises a plastered timber frame structure with pantiled roof. The Hall forms part of a historical farmstead known as Hempnalls Hall. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2445**). The farmstead has historical and evidential value.
- 3.3.709 The setting of the Hall is informed by its secluded location within an earlier medieval moat (**2252**), by its relationship with its non-designated outbuildings, which are recorded on the first edition OS map of 1885, and by its relationship with the non-designated former farming complex beyond the bounds of the moat to the north-east, which is also recorded on the OS map. The setting is further informed by the surrounding agricultural landscape, with which the asset, its outbuildings and the associated farming complex have historical and former functional relationships. The moat, asset and all non-designated buildings are largely enclosed by a small copse, which affords the group seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.710 The Grade II listed 'Bridge Over Moat, 30 Metres North of Hempnalls Hall' (**1032280**) is located c. 22 m north-west of the hall (**1180451**) and crosses over the medieval moat (**2252**). The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset dates to the early 18th century and comprises a single segmental arch of red brick with brick copings.
- 3.3.711 The setting of the asset is informed by its relationships with the medieval moat and with the Grade II listed hall and its associated outbuilding. The enclosing copse enforces the restricted focus of the assets setting, and so the setting makes a considerable contribution to its value. Due, however, to its restricted focus, the setting does not extend to the draft Order Limits.
- 3.3.712 The Grade II listed 'Willow Farmhouse' (**1352480**) is located at the eastern end of the southern folk of Willow Lane, c. 800 m east-north-east of Cotton, and c. 625 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the late 16th century, has evidence of 19th and 20th century maintenance and comprises roughcast-rendered timber frame structure with a thatched roof.
- 3.3.713 The setting of the asset is informed by its working farm complex location and by its relationship with its non-designated outbuildings, several of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.714 The Grade II listed assets 'Rose Cottage Southolme' (**1032278**) and 'Wisteria Cottage' (**1352479**) are located on the northern flank of Mendlesham Road in Cotton

and c. 1.3 km west of the draft Order Limits. The assets are of **medium value** based on their designations and its evidential, historical and aesthetic values. The house (**1032278**), now two dwellings, dates to the early 17th century and comprises a plastered timber frame structure with a plain tiled roof. Wisteria Cottage (**1352479**) is of probable 16th century date, was remodelled in the 17th century and comprises a plastered timber frame structure, which was being renovated at the time of survey.

- 3.3.715 The setting of the assets is shared and informed by their roadside village locations and by their interrelationships with other listed buildings and their relationships with non-designated buildings in the vicinity, which positively contribute to the character of Cotton. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical relationship. There has, however, been some 20th century infill residential development, not all of which is architecturally sympathetic. Nevertheless, the setting of the assets makes a considerable contribution to their value, but due to it being restricted to the village environment and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.716 The Grade II listed 'Boundary Farmhouse' (**1032244**) is located on the norther flank of Mendlesham Road, c. 1.2 km south-east of Cotton, and c. 70 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the 16th or early 17th centuries and comprises a rendered, pebble-dashed timber frame structure with a glazed black pantiled roof. The farmhouse forms part of a historical farmstead known as Boundary Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2431**). The farmstead has historical and evidential value.
- 3.3.717 The setting of the farmhouse is informed by its location within the former farming complex and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the asset's relationship with the modern Boundary Farm complex which lies c. 90 m to the east. The surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships, also contributes positively to the setting. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.718 The Grade II listed 'Cotton Lodge' (**1285476**) is located at the end of an unnamed track 620 m east of Stonham Road, c. 1.6 km south-east of Cotton, and c. 340 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 16th century, was restored in the 1970s and comprises a plastered timber frame structure with red brick clad gable ends and a plain tiled roof. The property forms part of a historical farmstead known as Cotton Lodge. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2443**). The farmstead has historical and evidential value.
- 3.3.719 The setting of the lodge is informed by its location within a medieval moat (**2251**) and by its relationships with its non-designated outbuildings including the farm buildings beyond the moat to the north-west, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. The large grounds of the asset extend out beyond the moat in all directions, but particularly to the north where they include several paddocks, and to the east where ornamental and kitchen gardens are included. Other than the

area of the paddocks and the asset's lawns, the grounds are heavily wooded affording the asset seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the Project being located in the neighbouring parish, the intervening landscape in that parish being occupied by the buildings and infrastructure of Wick's and Cotton Farms, and screening afforded by the asset's heavily wooded grounds, the setting does not extend to the draft Order Limits.

### Mendlesham CP

- 3.3.720 The Grade II listed 'Lodge Cottage' (**1352504**) is located at the southern extent of Oak Farm Lane, 1.5 km west-north-west of the centre of Mendlesham, and c. 110 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 16th or early 17th centuries, has evidence of 20th century maintenance and comprises a rendered timber frame structure with a concrete pantiled roof.
- 3.3.721 The setting of the asset is informed by its isolated location within its garden, by its relationship with the non-designated elements of Mendlesham Lodge farm complex 200 m to the north-east, and by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the draft Order Limits, the setting extends to the draft Order Limits.
- 3.3.722 The Grade II listed 'Poplar Farmhouse' (**1032282**) is located on the northern flank of Chapel Road immediately north-east of its intersection of it and Hobbies Lane, c. 830 m north-west of the centre of Mendlesham, and c. 830 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the late 16th century, with evidence of later work to the rear, an early-to-mid 19th century white brick façade and comprises a plastered timber frame structure with a concrete plain tiled roof.
- 3.3.723 The setting of the asset is informed by its location within a working farm complex, by its relationship with its non-designated outbuildings and with other listed and non-designated buildings in the vicinity, which contribute positively to the character of the small unnamed hamlet. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the working farmyard and the immediate landscape, and screening by the mature trees of the hamlet and the buildings of the Hunters Moon complex to the west, the setting does not extend to the draft Order Limits.
- 3.3.724 The Grade II listed 'Friary Cottage Thatched Cottage' (**1032249**) is located on the southern flank of Mill Rad, c. 570 m west of the centre of Mendlesham and c. 1.25 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse, now two residences, dates to the 16th century (Friary Cottage), was extended in the early 17th century (Thatched Cottage) and comprises a rendered timber frame structure with a thatched roof.
- 3.3.725 The setting of the asset is informed by its isolated roadside location and by its relationship with the surrounding agricultural landscape, with which the asset has historical and former functional relationships. Due to the division of the asset in to two dwellings and the loss of farm buildings to the west as shown on the first edition OS map of 1885, the setting of the asset makes a moderate contribution to its value, but

as it is restricted to the asset's small grounds and the immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.726 The Grade II listed 'Mendlesham Hall' (**1180527**) is located 80 m south of an unnamed road, c. 1.5 km west of Mendlesham and c. 430 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The manor farmhouse dates to the 16th century, was renovated in the 1980s and comprises a rendered timber frame structure with a hipped plan tiled roof. The hall forms part of a historical farmstead known as Mendlesham Hall. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2430**). The farmstead has historical and evidential value. A **medium value** rectangular medieval moat (**2274**) of evidential and historical value is also noted surrounding the hall.
- 3.3.727 The setting of the asset is informed by its location within a medieval moat (**2274**) and by its relationship with its non-designated outbuilding in the farmyard immediately to the north of the moat. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.728 The Grade II listed assets 'Hawkins Farmhouse' (**1032281**) and 'The Barn, Cartlodge and Granary at Hawkin's Farm' (**1413421**) are located on the south-eastern flank of an unnamed road, c. 2.1 km south-west of Mendlesham, c. 920 m north-west of Mendlesham Green and c. 760 m east of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The farmhouse dates to the 16th century, with a service cell was added in 1729 and a rear wing added in the 18th century. The asset comprises a timber frame farmhouse that was encased in grey brick around 1900 and has a pantiled roof. The rear wing is partially rendered. The barn dates to 1822, and before it was converted into a residence, comprised a threshing barn with an adjoining contemporary cart lodge with granary above to the west. The asset comprises a weatherboarded softwood timber frame structure on a brick plinth and a modern pantiled roof.
- 3.3.729 The setting of the assets is shared and informed by their location within a former working farm complex, by their interrelationship and by their relationships with the non-designated outbuildings of the former farming complex, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the assets' relationships with the non-designated Kersey's Farm complex c. 180 m to the north-east, also apparent on the OS map, and with the surrounding agricultural landscape, with which the assets and their outbuildings have historical and former functional relationships. Due to the repurposing of the barn and the associated division of the former farmyard, the setting of the assets makes a moderate contribution to their values, but due to it being restricted to the former farmyard and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.730 The Grade II listed 'Green Farmhouse' (**1285352**) is located on the south-western flank of Green Road, on the south-western edge of Mendlesham Green and c. 560 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 16th century, was extended in the 17th century and comprises a plastered timber frame structure with a concrete pantiled roof. The farmhouse is located within a historical farmstead known as Green Farm. This dates to the 16th century with later

19th century additions and alterations. The Suffolk HER has recorded the farmstead complex as a non-designated heritage asset (**2425**). The farmstead has historical and evidential value.

- 3.3.731 The setting of the asset is informed by its working farm location on the north-western flank of the shallow Gipping Valley and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the farmyard and the surrounding landscape, the setting does not extend to the draft Order Limits.
- 3.3.732 The Grade II listed 'Fir Tree Farmhouse' (**1032248**) is located on the eastern flank of a Mendlesham Green unnamed road linking the settlement with Mendlesham to the north and c. 1.2 km north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 16th century, has a 17th century service cross wing to the east and comprises a rendered timber frame structure with a common brick encase northern façade dating to 1916 and a pantiled roof.
- 3.3.733 The setting of the asset is informed by its location within its former farmyard and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. The large grounds of the asset and its outbuildings are quite heavily wooded and defined by mature tree lined hedgerows affording the buildings within seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the former farmyard and the immediate landscape, the setting does not extend to the draft Order Limits.

### Gipping CP

- 3.3.734 The Grade II listed assets 'Grange Farmhouse' (**1032727**) and 'Barn And Attached Cartshed, 50 Metres North of Grange Farmhouse' (**1180790**) are located on the south-eastern flank of an unnamed road c. 850 m north-north-east of the centre of Gipping, and c. 420 m west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The farmhouse dates to the mid-16th century, was extended in the late 16th, remodelled in the early 19th century, and comprises a plastered timber frame structure, which was encased in red brick in the 19th century, and has a concrete pantiled roof. The barn dates to the mid-17th century, whilst the attached cartshed dates to the early 18th century. The asset comprises a timber frame structure with tarred plaster cladding and asbestos sheet roofs. The farmhouse forms part of a historical farmstead known as Grange Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2451**). The farmstead has historical and evidential value.
- 3.3.735 The setting of the farmhouse and barn is shared and informed by their location with the working farm complex, their interrelationship and their relationships with other non-designated outbuildings of the complex, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. The setting of the assets, therefore, makes a

considerable contribution to their values, and due to the proximity of the Project, the setting extends to the draft Order Limits.

- 3.3.736 The Grade II listed 'Park Villa' (**1285278**) is located on the western flank of a north/south aligned unnamed road in Gipping, and c. 720 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The cottage dates to the late 16th to early 17th centuries, has 19th to 20th century red brick chimneys and comprises a plastered timber frame structure with a pantiled roof.
- 3.3.737 The setting of the asset is informed by its semi-rural roadside location in the dispersed linear village and by its relationships with the Grade I medieval Chapel of St Nicholas and the Grade II listed Chapel Farmhouse to the north and the Grade II listed post medieval Gate Farmhouse to the south. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the roadside location, the asset's garden and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.738 The Grade II listed 'Gate Farmhouse' (**1032729**) is located north-east of the junction of two unnamed roads in Gipping, and c. 720 m west-north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to around 1600, was majorly remodelled in the 19th and early 20th centuries and comprises a plastered timber frame structure with a colourwashed brick hall range and a parlour encased in gault brick with red brick dressing in the 19th century. It has a tiled roof.
- 3.3.739 The setting of the asset is informed by its location within its large garden which contain numerous trees, a pond and lawns and is defined by hedgerows with occasional trees. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and former functional relationship. The farmhouse is now detached from the large working farm complex to the north and almost all of the farm outbuildings recorded on the first edition OS map of 1885 have gone. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to the asset's grounds and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.740 The Grade II listed 'Hill Farmhouse' (**1032730**) is located on the southern flank of an unnamed road between Gipping to the west and Mendlesham Green to the east and 120 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset dates to around 1600, was remodelled around 1900 and comprises a timber frame structure with north, east and west elevations encased in gault brick with red brick bands and dressings. The farmhouse forms part of a historical farmstead known as Hill Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2452**). The farmstead has historical and evidential value.
- 3.3.741 The setting of the farmhouse is informed by its working farm complex location and by the surrounding agricultural landscape with which the asset has a historical and ongoing functional relationship. the setting is further informed by the asset's relationship with its non-designated outbuildings, although these are of the modern era with no trace of the complex recorded on the first edition OS of 1885 remaining. The setting of the asset, therefore, makes a moderate contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.

- 3.3.742 The 'Barn, 40 Metres South West Of Rookery Farm' (**1180903**) and the Grade II listed 'Rookery Farmhouse' (**1352279**) are located in a former farming complex 1.6 km south-east of Gipping and 200 m south-west of the draft Order Limits. The farmhouse is medieval in date and reported in the appropriate section above. The barn was built in the late 16th or early 17th centuries and comprises a weatherboarded timber frame structure with a pantile roof. The barn forms part of a historical farmstead known as Rookery Farm. The Suffolk HER has recognised the farmstead as a non-designated heritage asset (**2453**). The farmstead has historical and evidential value.
- 3.3.743 The setting of the barn is informed by its location within the former farming complex and by its relationship with the medieval farmhouse and other non-designated outbuildings, which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset, farmhouse and non-designated outbuildings have a historic and former functional relationship. The large garden of the asset contains trees and shrubs and is defined by mature, tree lined hedgerows. Due to the loss of the working farm and the repurposing of some outbuildings, the setting of the asset makes a moderate contribution to its value. Despite the mature vegetation of the asset's garden, the garden of the farmhouse to the north-east, the mature trees lining the roads to the east and the constriction of the asset's setting due to loss of function, the proximity of the Project means the setting extends to the draft Order Limits.
- 3.3.744 The Grade II listed 'Wood Farmhouse' (**1180887**) is located on the north-western flank of Gipping Road, c. 1.6 km south-east of Gipping and c. 670 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the mid 16th century, with an early 17th century red brick chimney and comprises a plastered timber frame structure with a concrete tiled roof.
- 3.3.745 The setting of the asset is informed by its location within its moderately large grounds and by its relationship with its non-designated outbuildings (**2492**), most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the asset, farmhouse and non-designated outbuildings have a historic and former functional relationship. The grounds of the asset contain formal gardens, large lawns, water bodies and trees and are defined by high, mature tree lined hedgerows, which afford the asset seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the asset's grounds and the immediate landscape, the setting does not extend to the draft Order Limits.

#### Old Newton with Dagworth CP

- 3.3.746 The Grade II listed 'Yew Tree Farmhouse' (**1032678**) is located on the western flank of Brown Street, c. 1.3 km north-west of Gipping, and c. 1.9 km west-north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to late 16th or early 17th centuries and comprises plastered timber frame structure with a plain tiled roof.
- 3.3.747 The setting of the asset is informed is informed by its location within a working farm complex and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape with which the farmhouse and its outbuildings have a historical and ongoing functional relationship. There has been 20th century expansion of the farm complex to the north and there are residential properties on the eastern flank of Brown Street. The residential development is, however,

sympathetic, in the local architectural vernacular and does not detract from the asset's setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the working farm complex and the surrounding landscape, the setting does not extend to the draft Order Limits.

- 3.3.748 The Grade II listed 'Browns Place Farmhouse' (**1181658**) is located on the western flank of Brown Street, c. 1.2 km west-north-west of Gipping, and c. 1.9 km west-north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to around 1600 and comprises a plastered timber frame structure with a slated roof.
- 3.3.749 The setting of the asset is informed by its working farm complex by its interrelationship with the medieval Grade II listed Ivy Cottage on the opposing flank of Brown Street and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the farmhouse and its outbuildings have historical and ongoing functional relationships. There is small-scale residential development to the north, but it is unintrusive, sympathetic, in the local architectural vernacular and does not detract from the asset's setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the working farm complex and the surrounding landscape, the setting does not extend to the draft Order Limits.
- 3.3.750 The Grade II listed 'Brown Street Farmhouse' (**1181632**) is located on the southern flank of Brown Street, c. 980 m west of Gipping, and c. 1.7 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the mid-16th century, has a 19th century red brick chimney and comprises a plastered timber frame structure with areas of C18 cable-pattern pargetting and a thatched roof.
- 3.3.751 The setting of the asset is informed by its location within its grounds and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the farmhouse and its outbuildings have historical and former functional relationships. The grounds of the asset contains lawns, gardens, a kitchen garden and trees and are defined by high, mature tree lined hedgerows affording the asset seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its grounds and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.752 The Grade II listed 'Hope Cottage' (**1181610**) is located on the western flank of Brown Street, c. 710 m south-west of Gipping, and c. 1.4 km west-south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house is of probable 17th century date or earlier and comprises a plastered timber frame structure with a thatched roof and two thatched gabled casement dormers.
- 3.3.753 The setting of the asset is informed by its rural roadside location and by its relationships with non-designated buildings that positively contribute to the character of the thoroughfare. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the roadside location and the immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.754 The Grade II listed 'Rosemary Cottage' (**1032680**) is located on the eastern flank of Chapel Road, c. 1.3 km east-north-east of the centre of Old Newton, and c. 1.7 km south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the early 18th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.755 The setting of the asset is informed by its roadside location in a small unnamed hamlet and by its relationship with the non-designated buildings to the north, which include a former non-denominational chapel, and which contribute to the character of the hamlet. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the roadside location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.756 The Grade II\* listed 'Old Newton Hall' (**1181768**) and the Grade II listed 'Barn 50 Metres North West of Old Newton Hall' (**1032686**) are located c. 160 m east of Rendall Lane, c. 1.8 km south-east of Old Newton, and c. 2 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The hall, now a farmhouse and formally a manor house, dates to c. 1600 – 1630, has 17th century additions to the rear (east) and comprises a plastered timber frame structure with a 19th century gault brick western façade and a plain tiled roof. The barn dates to the early 17th century, has a late 17th century range to the west which reuses 15th century timbers, and comprises a weatherboarded timber frame structure with what appears to be a new aluminium sheet roof replacing the slates recorded on the NHL entry.
- 3.3.757 The setting of the assets is shared and informed is by their association with a medieval moat, by their interrelationship and by their relationships with the non-designated of the working farm complex, several of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the assets and their outbuildings have historical and ongoing functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, but due to it being restricted to the farming complex and the surrounding agricultural landscape, the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.3.758 The **low value** farmstead of Eastlands Farm (**2309**) of evidential and historical value is located approximately 260 m west of the draft Order Limits, 500 m east of Gislingham Road, and 800 m south-west of Finningham. Eastlands Farm dates to the 19th century and comprises of a farmstead and farmhouse. The farmstead includes a courtyard formed by agricultural buildings with the farmhouse set away from the yard. The farmhouse is extant, however other buildings have since been lost. The HER indicates there is the potential the buildings and farmsteads to predate the 19th century.
- 3.3.759 Located on the edge of the draft Order Limits, approximately 920 m north-west of Wickham Skieth are the non-extant remains of Lower Eastlands Barn (**2505**). The barn dated to the 19th century was extant by the first edition OS map 1885. The barn has evidential value and is of **negligible value**.
- 3.3.760 To the east of the draft Order Limits, by approximately 110 m and 1.2 km to the south-west of Wickham Skeith, is the non-extant Chase Farm (**2506**). The farm dated

to the 19th century and appears on the first edition OS map 1885. The farm has evidential value and is of **low value**.

- 3.3.761 The extant historical farmstead of Surwood Farm (**2507**) is located approximately 150 m to the east of the draft Order Limits and 850 m south-west of Wickham Skeith. It was constructed on the 19th century, but its present layout is largely altered compared to that depicted on the first edition OS map 1885. Most of the historical buildings, with the exception of the farmhouse, have been replaced with modern agricultural buildings. The farm has historical value and limited evidential value, overall, the farm is of **low value**.
- 3.3.762 The PAS records a copper alloy cast scabbard chape with a mostly missing backplate, top damage, and slight left-side deformation (**2544**) being found in the Cotton area outside the draft Order Limits. It features a central rib between rectangular and two circular holes, concluding with a flat-backed knob terminal. It has evidential and historical value but is of **low value**.
- 3.3.763 The **low value** Mid Suffolk Light Railway (**2499**) crosses the draft Order Limits c. 1.7 km west-south-west of Mendlesham and has evidential and historical **value**. Originally opened in 1908 and closed in 1952, the railway aimed to alleviate agricultural depression and improve coastal access in Mid Suffolk. Despite its historical significance in the early 20th century, the line faced challenges with construction and financial viability, leading to bankruptcy in 1907. Although it briefly reopened, it ultimately closed in 1952, and the track was lifted. The railway now operates as a volunteer-run heritage railway and preservation museum.
- 3.3.764 Old Farm (**2517**) is located c. 190 m east of the draft Order Limits, c. 1.3 km west of Mendlesham. It has evidential and historical value but is of **low value**. It is a 19th-century outfarm featuring a full regular courtyard plan with working agricultural buildings. The exact position of the farmhouse is uncertain, and it's unclear if one exists. The farm has experienced partial loss, with less than 50% of the traditional farm buildings remaining.
- 3.3.765 The **low value** Batt's Farm Farmstead (**2512**) is located partially within the draft Order Limits on the northern flank of Mendlesham Road c. 1.5 km north-west of Mendlesham. The asset has evidential and historical value. The 19th-century farmstead, located in Mendlesham, features a regular courtyard U-shaped plan with agricultural buildings. The farmhouse is situated away from the yard. Unfortunately, there has been significant loss, with over 50% of traditional farm buildings no longer present. The farmstead is positioned in an isolated location. The assessment is based on a desk-based study, and no site visits were conducted. While dating reflects the presence of the farmstead on historic maps, the potential for earlier origins exists.
- 3.3.766 Located partly within the draft Order Limits and approximately 1.7 km to the west of Mendlesham is the historical farmstead of Potters Farm (**2519**). The farmstead dates to the 19th century. The present-day configuration of the buildings and those that are seen on the first edition OS map 1884 shows that most of the historical buildings are now non-extant. The asset has historical and limited evidential values and is of **low value**.
- 3.3.767 To the west of the Order Limit, by approximately 20 m and to the west of Mendlesham by approximately 1.6 km, is the extant farmstead of Wicks Farm (**2518**). The farmstead dates to the 19th century and appears on the first edition OS map 1884. A comparison between this map and the present-day Google Earth Pro shows

that little has changes within the farm complex, but the farmhouse is now larger. The asset is of historical value and is of **low value**.

- 3.3.768 Located approximately 265 m to the east of the draft Order Limits and approximately 880 m west of Mendlesham is the historical farmstead of Mendlesham Lodge (**2516**). The farmstead dates to the 19th century and appears on the 1st edition OS map 1884. A comparison between this map and present-day Google Earth Pro reveals that the large courtyard barn complex and the farmhouse have been retained but the rest of the original historical building have been replaced with modern equivalents. The map also reveals the remains of a moat (**2516**). However, the Suffolk HER disputes this. They state that the moat is in fact either ponds or infilled clay pits with drainage ditches. These are contemporary with the creation of the farmstead. Both assets have historical and limited evidential value. Overall, they are of **low value**.
- 3.3.769 Palgrave Farm (**2513**), almost adjacent to the draft Order Limits, is located c. 550 m south of Cay Hill and is of **low value**. Palgrave Farm, is a 19th-century farmstead featuring an L-shaped courtyard plan with working agricultural buildings. The farmhouse is intentionally positioned away from the yard. Unfortunately, only the farmhouse has endured the passage of time. The farmstead is found in an isolated location. It has evidential and historical value.
- 3.3.770 Redhouse Farm (**2514**) is located along Lambert's Lane, c. 190 m east of the draft Order Limits, north of Cay Hill and is of **low value**. It is a 19th-century farmstead with an L-shaped, three-sided courtyard plan comprised of working agricultural buildings. The farmhouse is deliberately situated away from the yard. Regrettably, only the farmhouse stands today, situated in an isolated position. This asset holds evidential and historical value.

## Middlewood Green and Stowmarket

### *Designated Heritage Assets*

#### Stowupland CP

- 3.3.771 The Grade II listed 'Poplar Farmhouse' (**1182121**) is located on the eastern flank of an unnamed road 1 km north-west of Middlewood Green, and 60 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates around 1600 with evidence of 19th and 20th century maintenance and comprises a roughcast timber frame structure with a concrete tiled roof. The farmhouse forms part of a historical farmstead known as Poplar Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2477**). The farmstead has historical and evidential value.
- 3.3.772 The setting of the farmhouse is informed by its location within a working farm complex and by its relationship with its outbuildings, although these are of the modern era having replaced the complex recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.773 The Grade II listed 'Doles Farmhouse' (**1352325**) is located at the northern end of Debenham Lane, c. 480 m west of Middlewood Green, and c. 30 m north-east of the draft Order Limits. The asset is of medium value based on its designation and its

evidential, historical and aesthetic values. The former farmhouse dates to the early 17th century and comprises a plastered timber frame structure with a thatched roof.

- 3.3.774 The setting of the asset is informed by its isolated former farmyard location and by its relationship with its non-designated outbuildings, which may include elements of the small complex recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.775 The Grade II listed 'Star Orchard' (**1032663**) is located at the northern edge of Saxham Street, c. 900 m west-south-west of Middlewood Green and 180 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 17th century or earlier and comprises a plastered timber frame structure with a thatched roof.
- 3.3.776 The setting of the asset is informed by its isolated location within its roadside garden and by its relationship with the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.777 The Grade II listed 'Gipping Farmhouse' (**1032656**) is located on the eastern flank of Gipping Road, c. 2.1 km north-north-east of the centre of Stowupland and c. 1.2 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 1625, was remodelled in the mid-19th century and comprises a plastered timber frame structure with a mid-19th century red brick western façade and a plain tiled roof.
- 3.3.778 The setting of the asset is informed by its working farmyard location, by its interrelationship with the Grade II listed medieval Pasture Cottage on the opposite flank of Gipping Road and by its relationship with its complex of outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its farmyard location and the local landscape, the setting does not extend to the draft Order Limits.
- 3.3.779 The Grade II listed 'Upland Cottage' (**1182111**) is located on the western flank of an unnamed road in Saxham Street 260 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former house, now two dwellings, dates to the 17th century or earlier with evidence of 19th and 20th century maintenance and comprises a roughcast plaster timber frame structure with a thatched roof.
- 3.3.780 The setting of the asset is informed by its roadside location within its garden by its relationship with the non-designated buildings of the Stowupland Town Farm to the north and the buildings of the Firtree Farm to the east, which includes the Grade II listed Firtree Farmhouse. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the asset's grounds and the immediate landscape and screening

by the asset's property boundaries and the Firtree Farm complex to the east, the setting does not extend to the draft Order Limits.

- 3.3.781 The Grade II listed 'Firtree Farmhouse' (**1032662**) is located on the eastern flank of an unnamed road in Saxham Street c. 180 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the late 16th and early 17th centuries reusing 15th century elements and comprises a plastered timber frame structure with a concrete pantiled roof. The farmhouse forms part of a historical farmstead known as Firtree Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2478**). The farmstead has historical and evidential value.
- 3.3.782 The setting of the farmhouse asset is informed by its location within a working farm complex, by its relationship with its non-designated outbuilding, most of which are recorded on the first edition OS map of 1885 and by its relationship with the Grade II listed Upland cottage to the west. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.783 The Grade II listed 'Upland House' (**1182102**) is located on the eastern flank of an unnamed road in Saxham Street c. 260 m west of draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse largely dates to the 17th century with a possible earlier core and was majorly remodelled in the early 19th century. the asset comprises a T-shaped 17th century house to the rear (south-east) with an early 19th century gault brick range added to front (north-west). The roofs are slated. The house forms part of a historical farmstead known as Upland Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2479**). The farmstead has historical value.
- 3.3.784 The setting of the house is informed by its location with its roadside grounds and by its relationship with its non-designated outbuildings, although these are a very small proportion of the large farming complex recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. Due to the loss of the farming complex, the setting of the asset makes a moderate contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.785 The Grade II listed 'Water Run Farmhouse' (**1032660**) is located immediately to the north-west of the intersection of Rendall Road and Gipping Road, c. 350 m north-east of the northern extent of Stowupland, and c. 1 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse, now two cottages, dates to the early 17th century with a possible earlier core and comprises a plastered timber frame structure with a pantiled roof.
- 3.3.786 The setting of the asset is informed by its roadside garden location and by the surrounding agricultural landscape, with which the asset has a historical relationship. Due to the loss of the farming complex recorded on the first edition OS map of 1885, the setting of the asset makes a moderate contribution to its value, but because it is restricted to it roadside location and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.787 The Grade II listed 'Grange Farmhouse' (**1032661**) is located on the eastern flank of an unnamed road in Saxham Street c. 320 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the mid-16th century, with a 17th century chimney, evidence of 19th century maintenance and comprises a plastered timber frame structure with a pantiled roof. The farmhouse forms part of a historical farmstead known as Grange Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2480**). The farmstead has historical and evidential value.
- 3.3.788 The setting of the farmhouse is informed by its location within its working farm complex and by its relationship with its non-designated outbuildings, some of which is recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.789 The Grade II listed 'Grange Cottage' (**1284686**) is located on the eastern flank of an unnamed road in Saxham Street c. 380 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 16th to early 17th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.790 The setting of the asset is informed by its roadside garden location and by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting is further informed by the asset's relationship with the non-designated buildings flanking the road to south, which contribute positively to the character of the thoroughfare. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the asset's grounds and the immediate landscape, the setting of the asset does not extend to the draft Order Limits.
- 3.3.791 The Grade II listed 'Stowupland Hall' (**1182013**) is located on the north-western flank of the A1120 Church Road at the southern limit of Saxham Street, and c. 250 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The large square plan farmhouse dates to the early 19th century and comprises a gault brick structure with a slated roof and a service wing to the rear (north-west). The non-designated farmstead (**2310**) includes a regular multi-yard courtyard formed by agricultural buildings with the farmhouse set away from the yard. The farmstead has evidential and historical value.
- 3.3.792 The setting of the asset is informed by its location within a working farm complex and by its relationship with its non-designated out-buildings, some of which are recorded on the first edition OS map of 1885 but now augmented by 20th century additions to the complex. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.793 The Grade II listed assets '1-3 Barn Cottages and Foxglove Barn' (**1352324**), 'The Thatch and Two Flanking Cottages' (**1181992**) and 'Pendle Cottage and Appleton' (**1032655**) are located in a small unnamed hamlet on the northern flank of the A1120 Church Road, c. 240 m north-east of outskirts of Stowupland, and c. 530 m west-south-west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The first asset

(**1352324**) was built as a barn in the late 16th or early 17th centuries and now serves as four residences. The barn was extended to the west and converted to a terrace of cottages in the mid-19th century, and the block was renovated in the early 1970s. The asset comprises a plastered timber frame structure with a pantiled roof. The second asset (**1181992**) was built as a single house in the 16th century, but now serves as three residences. There are 17th, 18th and 19th century alterations and the asset comprises a plastered timber frame structure with a thatched roof. The third asset (**1032655**) was built as a single house in the mid-17th century and now serves as two residences. There are 19th and 20th century alterations, and the asset comprises a plastered timber frame structure with a thatched roof.

- 3.3.794 The setting of the assets is shared and informed by their roadside locations by their interrelationships and by their relationships with non-designated outbuildings and other residence that positively contribute to the character of the hamlet, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical relationship. The setting of the assets, therefore, makes a considerable contribution to their values, but due to it being restricted to the bounds of the hamlet and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.795 The Grade II listed 'Holy Trinity Church' (**1352323**) is located on the north-western flank of Church Road on the north-eastern outskirts of Stowupland, and c.1 km west-south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical, aesthetic and communal values. The parish church was built in 1843 by T. M. Nelson in the gothic style. It is constructed of gault brick with slender buttresses, a copper clad spire atop a square tower and a slated roof.
- 3.3.796 The setting of the asset is informed by its roadside settlement location and by its relationship with the non-designated former post office to the south-west and the vicarage and schoolhouse to the north-east. The vicarage, however, no longer serves as such and is a private dwelling, whilst the schoolhouse was extended unsympathetically, likely in the 1960s to 1980s. The setting is further informed by the asset's historical relationship with the agricultural landscape, although this has been eroded by the 20th and 21st century development of Stowupland. The asset is still, however, a focus for the community and a landmark within it. The setting of the church, therefore, makes a considerable contribution to its value, but due to overall distance, screening by village development and associated tree cover, and the development and mature vegetation of the intervening landscape, the setting of the asset does not extend to the draft Order Limits.
- 3.3.797 The Grade II listed 'The Croft' (**1032664**) is located on the south-eastern flank of Church Road in Stowupland opposite Thorney Green and c. 1.5 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 16th or early 17th centuries, has 19th century alterations and comprises a plastered timber frame structure with a concrete pantile roof.
- 3.3.798 The setting of the asset is informed by its roadside settlement location and by its relationships with non-designated post medieval and early modern buildings around the green, which positively contribute to the character of this section of the settlement. The mature grounds of the asset contain trees and are defined by high, evergreen tree lined hedgerows, which do however, allow for only glimpsed view into and out from the asset, affording it seclusion and privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance

and it being restricted to the asset's grounds and the bounds of the village beyond, the setting does not extend to the draft Order Limits.

- 3.3.799 The Grade II listed 'Elm Farmhouse' (**1352326**) is located on the southern flank of the B1115 on the southern edge of Stowmarket and c. 1.73 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the mid-16th century and has early 16th and early 19th century additions and alterations. The front (northern) section is constructed of 19th century plastered brick with gault brick gable chimneys and a slated roof. The southern range comprises a plastered timber frame structure built in two stages, mid-16th and early 17th centuries, and with a thatched roof.
- 3.3.800 The setting of the asset is informed by its roadside farmyard location, although the large farming complex recorded on the first edition OS map of 1886 is entirely lost, with the exception of the farmhouse. The arable land to the south and west, with which the asset has a historical and former functional relationship, further informs the setting, but the 20th century development of Stowupland to the north and east has eroded this link. The setting of the asset, therefore, makes a minor contribution to its value, but due to overall distance, and it being restricted to its roadside settlement location, the setting of the asset does not extend to the draft Order Limits.
- 3.3.801 The Grade II listed 'The Thatched Cottage' (**1284713**) is located on the eastern flank of Mill Street at the southern edge of Stowupland and c. 1.65 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 16th century, has early 19th and mid-20th century alterations and comprises a roughcast timber frame structure with a thatched roof and a 19th century clay lump extension.
- 3.3.802 The setting of the asset is informed by its mature garden, which are defined by high, evergreen tree lined hedgerows that afford the asset some seclusion and privacy. The setting is further informed by the asset's relationships with non-designated post medieval and early modern buildings that flank Mill Street and positively contribute to the character of the thoroughfare. The surrounding agricultural landscape, with which the asset has a historical relationship, also contributes to the setting. The setting of the asset, therefore, makes a considerable contribution, but as it is restricted to its settlement location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.803 The Grade II listed 'Mill Green Farmhouse' (**1032657**) is located on the western flank of Mill Street at the southern edge of Stowupland and c. 1.7 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 17th century, has evidence of 19th and 20th century maintenance and comprises a pebble-dashed timber frame structure with a pantiled roof.
- 3.3.804 The setting of the asset is informed by its location within its former farmyard and by its relationship with its former non-designated outbuilding, which is recorded on the first edition OS map of 1886. The setting is further informed by the asset's relationships with the non-designated post medieval and early modern buildings that flank Mill Street and that positively contribute to the character of the thoroughfare. The surrounding agricultural landscape, with which the asset and former outbuildings have historical and former functional relationships, also makes a positive contribution to the asset's setting. The former outbuilding has, however, been converted into residence(s) and the farmyard has been divided to provide parking and gardens for the properties, which has reduced the cohesion of the historic group. The setting of

the asset, therefore, makes a moderate contribution to its value, but due to overall distance and it being restricted to its roadside settlement location and the immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.805 The Grade II listed '17, Mill Street' (**1182033**) is located at the southern extend of Mill Street just before it terminates at the A14 and 1.75 km west-south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house is of 17th century or earlier date, has evidence of 19th and 20th century maintenance and comprises a plastered timber frame structure with a thatched roof.
- 3.3.806 The setting of the asset is informed by its large garden location and the southern tip of the linear settlement at the termination of Mill Street and by its relationships with the non-designated post medieval and early modern buildings that flank Mill Street and that positively contribute to the character of the thoroughfare. The surrounding agricultural landscape, with which the asset has a historical relationship, also makes a positive contribution to the asset's setting. The construction of the A14 c. 60 m to the south-west has, however, introduced noise, movement and pollution into the setting, but it also resulted in the termination of Mill Street and, therefore, the cessation of passing traffic. The large garden of the asset is, however, defined by high tree lined hedgerows, which afford the asset some privacy. The setting of the asset, therefore, makes a moderate contribution to its value, but due to overall distance and it being restricted to its roadside location and immediate landscape, the setting does not extend to the draft Order Limits.

### Earl Stonham CP

- 3.3.807 The Grade II listed 'Whitehouse Farmhouse' (**1352059**) is located at the northern end of Whitehouse Lane, on the northern extend of Middlewood Green and c. 500 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the mid-16th century, has 17th and 20th century alterations and comprises a plastered timber frame structure with a concrete tiled roof. The farmhouse forms part of a historical farmstead known as Whitehouse Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2471**). The farmstead has historical and evidential value.
- 3.3.808 The setting of the farmhouse is informed by its location with its working farmyard and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the Project being in the neighbouring parish, the setting being restricted to the farmyard and immediate landscape, and screening by outbuildings and mature vegetation, it does not extend to the draft Order Limits.
- 3.3.809 The Grade II listed assets 'Venns Farmhouse' (**1352058**) and 'Barn 20 Metres South West of Venns Farmhouse' (**1033187**) are located immediately south of an intersection of two unnamed roads at the north-eastern edge of Middlewood Green and c. 890 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse has a mid-16th century core, has 17th, 19th and 20th century alterations and comprises a plastered timber frame 16th century rear range, with a plastered

brick 17th century front wing and a slated roof. The barn dates to the 16th or early 17th centuries and comprises a weatherboarded timber frame structure with a modern pantiled roof.

- 3.3.810 The setting of the assets is shared and informed by their interrelationship and by their location within the former farmyard. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. A third property has been added to the complex since 2017 and the former farmyard has been split to provide parking and gardens for the residences. The setting of the assets, therefore, makes a minor contribution to their values, but as it is restricted to the former farmyard and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.811 The Grade II listed 'Driftway' (**1033188**) is located at the end of a private driveway 80 m east of a north/south aligned unnamed road in Middlewood Green and c. 600 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the early 17th century, has 18th century alterations, a 20th century addition and comprises a plastered timber frame structure with a thatched roof.
- 3.3.812 The setting of the asset is informed by its secluded location within its garden set back from the road. The setting is further informed by its relationships with the Grade II listed medieval Larters and the non-designated post medieval buildings that contribute to the character of Larters Lane to the south. The surrounding agricultural landscape, with which the asset has a historical relationship, also positively contributes to the setting. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is restricted to its garden and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.813 The Grade II listed 'Hines Farmhouse' (**1033186**) is located in a secluded parcel of land c. 800 m east of Middlewood Green and c. 1.33 km east-south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse was built in two stages in the mid-16th century and c. 1570, has evidence of 20th century maintenance and comprises a plastered timber frame structure with a pantiled roof and a red brick chimney.
- 3.3.814 The setting of the asset is informed by its isolated location in a tree lined parcel of land accessed via a farm track from Moat Farm to the north, and by its relationship with its non-designated outbuildings, which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. Due to its change of function and the loss of several outbuildings, the setting of the asset makes a moderate contribution to its value, but due to it being focused on its grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.815 The Grade II listed 'Jockeys Farmhouse' (**1182438**) is located on the eastern flank of Blacksmiths Lane c. 690 m north of Forward Green and c. 780 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse probably dates to c. 1576 and comprises a plastered timber frame structure with a plain tiled roof and a red brick chimney.
- 3.3.816 The setting of the asset is informed by its roadside former farmyard location and by its relationship with its surviving non-designated outbuildings, although most of the

farming complex recorded on the first edition OS map of 1884 has been demolished. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. Due to its change of function and the loss of several outbuildings, the setting of the asset makes a moderate contribution to its value, but due to it being focused on the roadside location and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.817 The Grade II listed 'Water Run Farmhouse' (**1352035**) is located on the eastern flank of Blacksmiths Lane c. 690 m north of Forward Green and c. 880 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to around c. 1600, incorporates elements of a late 15th to early 16th century house and comprises a plastered timber frame structure with a thatched roof.
- 3.3.818 The setting of the asset is informed by its roadside former farmyard location and by its relationship with the surrounding agricultural landscape, with which the asset has a historical relationship. Due to its change of function and the loss of the farm outbuildings recorded on the first edition OS map of 1884, the setting of the asset makes a moderate contribution to its value, but due to it being focused on the roadside location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.819 The Grade II listed 'Cricketers' (**1284428**) is located on the south-eastern flank of an unnamed road c. 430 m south-west of Forward Green, and c. 670 m east-south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, previously the Cricketers Public House, but now signposted Mollands Hall, dates to the 1630 and comprises a roughcast timber frame structure with plain tiled roofs.
- 3.3.820 The setting of the asset is informed by its location within its large grounds, and by its relationships with other buildings in the complex, although these have largely been added this century. The grounds contain gravel driveways, trees, lawned areas, several formal gardens of various styles, a kitchen garden and are defined by moderately high hedgerow affording the asset seclusion and privacy. The setting of the asset, therefore, makes considerable contribution its value, but due to it being focused on the asset's grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.821 The Grade II listed 'The Limes' (**1033218**) is located on the north-western flank of an unnamed road c. 830 m south-west of Forward Green, and c. 570 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse of around 1600, has a rear service wing of 1831 and comprises a plastered timber frame structure with a thatched roof.
- 3.3.822 The setting of the asset is informed by its location within a group of non-listed buildings several of which are recorded as being elements of the large Welham's Farm complex recorded on the first edition OS map of 1884. The setting is further informed by the asset's relationship with the Grade II listed Limes Cottage c. 80 m to the north-east and with the non-designated buildings to the south-west, which were also part of the Welham's Farm complex recorded on the OS map, and which are still signposted 'Welhams' from the road to the south-east. Due to division of the former farm complex and the residential development of several of the non-designated outbuildings, the setting of the asset makes a moderate contribution to its value, but

due to it being restricted to the asset's grounds and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.823 The Grade II listed 'Limes Cottage' (**1246208**) is located on the north-western flank of an unnamed road c. 750 m south-west of Forward Green, and c. 580 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 17th century and comprises a plastered colourwashed timber frame structure with a straw thatched roof.
- 3.3.824 The setting of the asset is informed by its location within its secluded, moderately large grounds, and which are defined by high occasionally tree lined hedgerows affording the asset privacy. The setting is further informed the group of buildings to the south-west that once formed the Welham's Farm complex and are mostly recorded on the first edition OS map of 1884. The buildings include the Grade II listed The Limes but have now been largely developed and broken up into separate residences. The surrounding agricultural landscape, with which the asset has a historical relationship, also contributes positively to the setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the asset's grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.825 The Grade II listed 'Yewtree Farmhouse' (**1182522**) is located on the western flank of an unnamed road c. 1 km south-west of Forward Green and c. 400 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the mid-16th century, has late 19th and mid-20th century alterations and comprises a plastered timber frame structure with a thatched roof. The farmhouse forms part of a historical farmstead known as Yewtree Farm or Cockerels Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2468**). The farmstead has historical and evidential value.
- 3.3.826 The setting of the farmhouse is informed its roadside former farmyard location and by the surrounding agricultural landscape with which the asset has historical and former functional relationships. There is a modern farmhouse and large barn immediately to the west, and these appear to have replaced the farm complex recorded on the first edition OS map of 1886 and labelled Cockerel's Farm. Due to its change of function and its separation from the farming complex, the setting of the asset makes a moderate contribution to its value but due to it being restricted to the asset's grounds and immediate landscape, and screening by modern buildings, the setting does not extend to the draft Order Limits.
- 3.3.827 The Grade II listed assets 'The Elms Farmhouse' (**1033217**) and 'Hicks Farmhouse' (**1182484**) are located at the south-western extent of an unnamed road c. 1.3 km south-west of Forward Green, and c. 260 m north-north-east of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The Elms former farmhouse dates to the early 17th century, has evidence of 20th century maintenance and comprises a plastered timber frame structure with a concrete pantiled roof. The farmhouse forms part of a historical farmstead known as Elm Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2470**). The farmstead has historical and evidential value.
- 3.3.828 The Hicks former farmhouse is of mainly late 17th century date but may have an earlier core. It comprises a plastered timber frame structure with a pantiled roof. The farmhouse forms part of a historical farmstead known as Hicks Farm. The Suffolk

HER has recognised the farmstead complex as a non-designated heritage asset (2469). The farmstead has historical and evidential value.

- 3.3.829 The setting of the Elms Farmhouse is informed by its former farmyard location and by its relationship with its former non-designated outbuildings, now dwellings, some of which are recorded on the first edition OS map of 1886. The setting is further informed by its relationship with the Grade II listed Hicks Farmhouse and its outbuildings, and by the surrounding agricultural landscape, with which the asset has historical and former functional relationships. Due to its change of function and the conversion of its outbuildings to dwellings, the setting of the asset makes a moderate contribution to its value but due to it being restricted to the asset's former farmyard and immediate landscape and screening by its tree lined grounds, the setting does not extend to the draft Order Limits.
- 3.3.830 The setting of Hicks Farmhouse is informed by its former farmyard location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1886. The setting is further informed by its relationship with the Grade II listed Elms Farmhouse and its outbuildings, and by the surrounding agricultural landscape, with which the asset has historical and former functional relationships. Although no longer part of a working farm complex, the asset and outbuildings retain coherence as a forming working complex and so the setting of the asset makes a considerable contribution to its value. As the setting is, however, restricted to the former farmyard and immediate landscape, it does not extend to the draft Order Limits.
- 3.3.831 The Grade II listed 'Mud Hall' (1033191) is located at the eastern end of Stearn's Lane c. 730 m south-south-west of Forward Green and c. 900 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built in two sections in the mid-16th and mid-17th centuries and comprises a roughcast timber frame structure with a concrete tiled roof.
- 3.3.832 The setting of the asset is informed by its isolated location in its large grounds, defined by mature tree lined hedgerows, and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical relationship. The setting of the house, therefore, makes a considerable contribution to its value, but due to it being restricted to its grounds and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.833 The Grade II listed 'Beechwood Farm' (1033222) is located on the western flank of the A1120, c. 740 m south-south-east of Forward Green and c. 1.4 km north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house is of probable late 16th or early 17th century date, has a mid-20th century extension and comprises a plastered timber frame structure with a thatched roof. The 20th century extension has a concrete tiled roof.
- 3.3.834 The setting of the asset is informed by its roadside location with its large grounds and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have a historical relationship. A large stable range and associated paddocks have been developed recently to the west of the asset, but this is in keeping with the rural landscape and so does not detract from the setting. The setting of the asset,

therefore, makes a considerable contribution to its value, but due to it being restricted to its grounds and the immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.835 The Grade II listed 'Church Farmhouse' (**1284442**) is located on the northern flank of the A1120 in the hamlet of Earl Stonham, c. 1.4 km south-east of Forward Green and c. 1.8 km east of the draft Order Limits. The Grade I listed medieval 'Church of St Mary the Virgin' (**1033223**) lies 25 m to the east. The former farmhouse is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset is of early 17th and early 18th century date, was altered in the mid-20th century and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.836 The setting of the asset is informed by its former farmyard location and by its relationship with the church and its non-designated outbuildings, which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships, although this link has been partially eroded by the imposition of a large intrusive industrial complex immediately to the north. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to its former farmyard and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.837 The Grade II listed 'Church Cottage' (**1284506**) is located on the western flank of Church Lane in the hamlet of Earl Stonham, c. 1.4 km south-east of Forward Green and c. 1.9 km east of the draft Order Limits. The Grade I listed medieval 'Church of St Mary the Virgin' (**1033223**) lies 40 m to the north-west. The cottage is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset is of probable 17th or early 18th century date and comprises a plastered timber frame structure with a thatched roof.
- 3.3.838 The setting of the asset is informed by its roadside settlement location, by its relationship with the church, and by its relationship with Whitehouse Farm complex on the eastern flank of Church Lane, which includes the Grade II listed farmhouse. The setting of the asset is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its roadside settlement location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.839 The Grade II listed 'Whitehouse Farmhouse' (**1033219**) is located in a farming complex on the eastern flank of Church Lane in the hamlet of Earl Stonham, c. 1.4 km south-east of Forward Green and c. 1.9 km east of the draft Order Limits. The Grade I listed medieval 'Church of St Mary the Virgin' (**1033223**) lies 90 m to the north-west. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to around 1600 and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.840 The setting of the asset is informed by its farmyard location within the small settlement and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the asset's relationships with the medieval church, the other Grade II listed post medieval buildings in the settlement, and the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationship. The setting of the asset, therefore, makes a considerable contribution to

its value, but due to it being restricted to its farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.841 The Grade II listed 'Guildhall Cottages' (**1182683**) is located on the northern flank of the A1120 in the hamlet of Earl Stonham, c. 1.5 km south-east of Forward Green and c. 1.85 km east of the draft Order Limits. The Grade I listed medieval 'Church of St Mary the Virgin' (**1033223**) lies 55 m to the north. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset is a pair of cottages built around 1700, with evidence of 18th, 19th and 20th century maintenance, and comprises a plastered timber frame structure with a concrete tiled roof.
- 3.3.842 The setting of the asset is informed by its roadside settlement location and by its relationship with the medieval church and with the other Grade II listed post medieval buildings in the settlement. The setting is further informed by the surrounding agricultural, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its roadside settlement location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.843 The Grade II listed 'St Ambrose Cottage' (**1284462**) is located on the north-western flank of Fen Lane, c. 1.3 km south-west of Earl Stonham and c. 750 m east-south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to around 1600 and comprises a plastered timber frame structure with a thatched roof.
- 3.3.844 The setting of the asset is informed by its isolated roadside location within its large tree lined grounds, which affords the asset privacy. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.845 The Grade II listed 'Upper Lonsdales Farmhouse' (**1033189**) is located at the south-western extent of a private drive 170 m south-west of Mill Lane, 1.2 km south of Broad Green and c. 340 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to around 1600, has an 18th century extension and comprises a plastered timber frame structure with a thatched roof. The farmhouse, and an associated barn, all form part of a historical farm known as Upper Langdales farm. The Suffolk HER has recorded the barn and farmstead as non-designate heritage assets (**2429**). Both the barn and the farmstead have historical and evidential values.
- 3.3.846 The setting of the asset is informed by its former farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape with which the asset and its outbuildings have historical and former functional relationships. The outbuildings appear to have been converted to holiday lets, but they and the asset retain their coherence as a former working farm complex. The setting of the asset, therefore, makes a considerable contribution to its value and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.847 The Grade II listed 'Fen Farmhouse' (**1033221**) is located on the south-eastern flank of Fen Lane c. 1.85 km south-west of Earl Stonham, and c. 650 m east-south-east of

the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse, now a dwelling, dates to the mid-16th century, has late 16th and early 17th century alterations and comprises a roughcast timber frame structure with a plain tiled roof.

- 3.3.848 The setting of the asset is informed by its roadside location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. The barns to the north (on which the NHL point of incorrectly located) have been converted into a residence and a new property boundary has been introduced to the former farmyard separating the asset from the barns and reducing the coherence of the former farming complex. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to its former farmyard location and the immediate landscape, the setting does not extend to the draft Order Limits.

### Stonham Parva CP

- 3.3.849 The Grade II listed 'Former Farmhouse 100 Metres North of Westwood Hall' (**1033195**) is located on the southern flank of an unnamed road, c. 2.4 km north-north-west of Little Stonham and c. 1.5 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset is part of a former farmhouse, which dates to the early 17th century, has evidence of 19th and 20th century maintenance and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.850 The setting of the asset is informed by its farmyard location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884, although the considerable complex represented on the maps had been largely demolished. The setting is further informed by the asset's relationship with the non-designated Westwood Hall 90 m to the south and the surrounding agricultural landscape with which the asset has historical and former functional relationships. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to its former farmyard location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.851 The Grade II listed 'College Farmhouse' (**1183059**) is located at the southern extent of a private drive c. 1.4 km north-north-west of Little Stonham and 1.85 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to c. 1550 to 1570 and comprises a plastered timber frame structure with a Roman pantile roof.
- 3.3.852 The setting of the asset is informed by its isolated location and by its relationship with a modern barn/stable block and paddock. The setting is further informed by the surrounding agricultural landscape, with which the asset and has historical and former functional relationships. The asset appears to be the only surviving element of a large farming complex recorded on the first edition OS map of 1884, and due to this loss of context, the setting of the asset makes a moderate contribution to its value. The setting of the asset is restricted to its former farmyard and immediate landscape, and so it does not extend to the draft Order Limits.

### Creeting St Peter CP

- 3.3.853 The Grade II\* listed assets 'Roydon Hall' (**1033215**) and 'Barn 30 Metres North West of Roydon Hall' (**1284584**) and the Grade II listed 'Garden Wall Enclosing Garden to South Side of Roydon Hall' (**1352074**) are located in a working farm complex at the

eastern extent of a unnamed road c. 670 m north-east of Creeting St Peters, adjacent to the draft Order Limits. The Grade II\* assets are of **high value** and the Grade II asset is of **medium value** based on their designations and their evidential, historical and aesthetic values. The hall (**1033215**) is a mid-to-late farmhouse with early 17th and mid-19th century alterations and comprises a plastered timber frame structure with a plain tiled roof. The large 10 bay barn (**1284584**) dates to the mid-16th century and comprises a weatherboarded timber frame structure with a plain tiled roof. The garden wall (**1352074**) incorporates a datestone, which states 1576. The wall is constructed in English bond and varies in height between 2.5 m and 1 m. The assets form part of a historical farmstead known as Roydon Hall. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2422**) which has historical and evidential value.

- 3.3.854 The setting of the assets is shared and informed by their location within a working farm complex, their interrelationships, and by their relationships with the non-designated buildings of the complex. The setting is further informed by the surrounding agricultural landscape, with which the assets and the non-designated outbuildings have historical and ongoing functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.855 The Grade II listed 'Glebe House' (**1182315**) is located to the north of Mill Lane c. 700 m south-south-east of the centre of Creeting St Peter and 290 m west-north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former rectory incorporates a datestone bearing 1826 and was built for the Reverend Edward Paske by John Whiting of Ipswich. It comprises a painted gault brick structure with a low-pitched hipped slated roof.
- 3.3.856 The setting of the asset is informed by its largely secluded location within its grounds, by its relationship with its non-designated outbuildings and its relationship with the Grade I listed medieval Church of St Peter to the west. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is restricted to the asset's grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.857 The Grade II listed assets 'The Clamp' (**1033213**) and 'Clamp Cottages' (**1182326**) are located south-west of Mill Lane, c. 1.2 km south-west of Creeting St Peter, c. and 1.3 km north-north-west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The Clamp is a farmhouse which dates to around 1840, has a mid-17th century rear range and comprises a gault brick structure with a hipped slated roof. The cottages are a former farmhouse which dates to the mid-to-late 17th century, has 19th and 20th century alterations and comprises a pebble-dashed timber frame structure with a concrete pantiled roof. The assets are located within, or close to, a historical farmstead known as Clump Farm. This dates to the 17th century with later 19th century additions and alterations. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2430**). The farmstead has historical and evidential value.
- 3.3.858 The setting of the assets is shared and informed by their location within a concentration of historic and modern buildings labelled Creeting Howe Farm and Clamp Farm on the first edition OS map of 1884. The setting is further by the assets' interrelationship, their relationships with the non-designated outbuildings of the

farming complexes and by the surrounding agricultural landscape, with which the assets have historical and possible ongoing functional relationships. Several of the outbuildings have, however, been converted to dwellings and the agricultural land to the south, west and east is being developed and so the setting of the assets makes a moderate contribution to their values. As the setting is, however, restricted to the farming complex location and the immediate landscape, it does not extend to the draft Order Limits.

- 3.3.859 The Grade II listed 'Hill Farmhouse' (**1182339**) is located at the northern extent of the private driveway 130 m north of Mill Lane, c. 1.2 km south-east of Creting St Peter and 110 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the mid or late 16th century, has an early 17th century parlour block and comprises a plastered timber frame structure with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Hill Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2449**). The farmstead has historical and evidential value.
- 3.3.860 The setting of the farmhouse is informed by its former farmyard location and by its relationship with its non-designated outbuildings, which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and former functional relationships. The introduction of the A14 c. 100 m to the north-east has introduced noise into the setting of the asset, but the cutting of the route and screening by mature vegetation has reduced the effect of its imposition. The asset and surviving outbuildings are, however, still coherent as a former farming complex and so the setting of the asset makes considerable contribution to its value, and due to the proximity of the Project the setting extends to the draft Order Limits.
- 3.3.861 The Grade II\* listed 'Creting Hall' (**1352073**) is located at the southern extent of a private driveway c. 650 m south-south-east of Mills Lane, c. 1.5 km south of Creting St Peter and 130 m north-west of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. The former manor house, now two dwellings one of which is a farmhouse, dates to the mid-16th century and has 17th century and 1828 alterations. The ground storey walls are of 16th century red brick with diaperwork in burnt headers, whilst the upper storey is of plastered timber frame construction with some early 19th century cable-pattern parquetry. The roofs are plain tiled. The Hall forms part of a historical farmstead known as Creting Hall. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2448**). Within the grounds of Creting Hall are two non-extant fishponds (**2448**). These fishponds appear on the 1st edition OS map along the eastern side of a north to south aligned field boundary. The farmstead and ponds have historical and evidential value.
- 3.3.862 The setting of the hall is informed by its location within a former manorial farming complex and by its relationships with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.863 The Grade II listed 'Grove Farmhouse' (**1033214**) is located 170 m south-west of Mill Lane, c. 1.8 km south-south-east of Creting St Peter, and c. 100 m south of the draft Order Limits. The asset is of **medium value** based on its designation and its

evidential, historical and aesthetic values. The former farmhouse is of late 16th or early 17th century, was extended and refaced in the mid-19th century, has 20th century alterations and comprises a rendered timber frame structure with a gault brick south-east façade. The farmhouse forms part of a historical farmstead known as Grove Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (MSF41038 - **2447**). The farmstead has historical and evidential value.

- 3.3.864 The setting of the farmhouse is informed by its former farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and former functional relationships, but this link has been partially eroded by the imposition of a concrete works immediately to the north in the 21st century. The setting of the asset, therefore, makes a minor contribution to its value, and due to the proximity of the Project it extends to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.3.865 The **low value** Ipswich to Bury St Edmunds railway line (**2497**) crosses the draft Order Limits c. 900 m north-west of Needham Market. The asset has evidential and historical value. Originally built as an extension to the Eastern Union Railway, the railway line was opened in November 1846 and formally merged with the Eastern Union Railway in July 1847.
- 3.3.866 The non-extant remains of an un-named farm (**2508**) are located approximately 80 m west of the draft Order Limits and 710 m to the north-east of Stowupland. The farm dates to the 19th century and appears on the first edition OS map 1886. It has historical and evidential value and is of **low value**.
- 3.3.867 Located approximately 220 m to the west of the draft Order Limits, and approximately 1.7 km to the north-east of Stowupland, is the extant Stowupland Town Farm (**2509**). The farm was constructed in the 19th century but according to the first edition OS map 1886 the present buildings on the farm have replaced many of the historical ones. The exceptions are the farmhouse and potentially one barn. The farm has historical and evidential value, it is of **low value**.
- 3.3.868 To the west of the draft Order Limits by approximately 70 m, and approximately 2.1 km north-east of Stowupland, is Oak Tree Farm (**2520**). The farm was constructed in the 19th century and has largely been altered according to present day Google Earth images compared to the first edition OS map 1886. The farm has historical and evidential value, it is of **low value**.
- 3.3.869 Bay's Farm (**2524**) is located approximately 165 m to the east of the draft Order Limits and approximately 1.5 km to east of Stowupland. The extant farm was constructed in the 19th century. It appears on the first edition OS map 1886 but has been greatly altered with the loss of original historical agricultural buildings which have been replaced with modern equivalents. The farm has historical and limited evidential value, it is of **low value**.
- 3.3.870 To the east of the draft Order Limits, by approximately 90 m and to the east of Stowupland by 1.4 km, is Mill Farm (**2525**). The farm was established in the 19th century and appears on the first edition OS map 1886. The farm today is much smaller and has lost most of its original historical buildings. The farm has historical and limited evidential value, it is of **low value**.

- 3.3.871 The PAS records a complete lead post medieval 'six-disc' alnage cloth seal (**2539**) and an incomplete lead post medieval to modern probably milled medallion (**2540**) being found in the Stowupland area and outside the draft Order Limits. They have both evidential and historical value but are of **low value**.
- 3.3.872 The PAS reports an incomplete 17th to 18th centuries AD copper alloy mount (**2545**) being found in the Creting St Peter and outside the draft Order Limits. The asset is asymmetrical with a lozenge-shaped upper half and elongated oval-shaped lower terminal. The flat-backed mount features a moulded domed front with a central circle forming a large saltire cross, creating a quatrefoil-shaped face. Traces of white and pink/red colouring are present. This asset with its evidential and historical value is of **low value**.
- 3.3.873 The **medium value** Ipswich and Stowmarket Navigation (**2311**) of evidential and historical value runs approximately north-west to south-east within the draft Order Limits following the River Ginning, approximately 215 m north-east of the B1113 and 300 m east of Badley Hill. The Ipswich and Stowmarket Navigation opened in 1793 following the Ipswich and Stowmarket Navigation Act of 1790 to make the river navigable between the two settlements (River Gipping Trust, 2024). The route runs for approximately 29.4 km between Stowmarket and Ipswich and included 15 locks, the locations of which are not recorded by the HER. The navigation was closed and abandoned in 1934.

## Needham Market and Ringshall

### *Designated Heritage Assets*

#### Creting St Mary CP

- 3.3.874 The Grade II listed 'Woolney Hall' (**1033208**) is located on the north-western flank of Low Lane, c. 860 m north of Creting St Mary and c. 1.1 km west of the draft Order Limits. The asset is of **medium** value based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to around 1600 and comprises a plastered timber frame structure with large panels of 20th century pargetting and a plain tiled roof.
- 3.3.875 The setting of the asset is informed by its farmyard location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and it being restricted to the farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.876 The Grade II listed 'Whissels Farmhouse' (**1352047**) is located on the north-western flank of All Saints Road, c. 1.3 km north-east of Creting St Mary and c. 2 km south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse is of probable 16th or early 17th century date and comprises a plastered timber frame structure with a thatched roof.
- 3.3.877 The setting of the asset is informed by its farmyard location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition

OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and ongoing functional relationships. This link has, however, been eroded by the 20th century expansion of the farmyard, by small-scale residential development along All Saints Road and by the imposition of pylons to the east of the asset. The setting of the asset, therefore, makes a moderate contribution to its value, but due to overall distance and it being restricted to the farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.878 The Grade II listed 'All Saints Hall' (**1033207**) is located c. 130 m west of Low Lane, c. 270 m north-west of Creting St Mary, and c. 690 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the mid-16th century, was altered in the early 17th century and comprises a plastered timber frame structure with some 18th century parquetry of both herringbone and cable pattern and a plain tiled roof.
- 3.3.879 The setting of the asset is informed by its location within its tree lined grounds and by its relationships with its non-designated outbuildings and the non-designated buildings of a former farming complex to the south, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and it being restricted to the farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.880 The Grade II listed 'The Watering' (**1033206**) is located on the south-western flank of Mill Lane, c. 840 m south-west of Creting St Mary, and c. 490 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 16th century, was majorly altered in the 19th and early 20th centuries and comprises a roughcast timber frame structure with a pantiled roof. The early 20th century extension to the south-east facing façade is of red brick. The property forms part of a historical farmstead known as The Watering or Winks Watering Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2446**). The farmstead has historical and evidential value.
- 3.3.881 The setting of the property is informed by its location within its large mature grounds which includes scattered mature trees, a pond, lawns and formal garden and are defined by mature tree lined hedgerows. The setting is further informed by the asset's former non-designated outbuildings to the south, which have been converted into dwellings and all appear to be now separate to the Watering Farm complex further to the south. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and former functional relationships. The setting of the asset, therefore, makes a moderate contribution to its value, but due to overall distance and it being restricted to the former farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.

### Badley CP

- 3.3.882 The Grade II listed 'Woodland Farmhouse' (**1278292**) is located c. 55 m south of the B1113 Stowmarket Road, c. 1.1 km north-east of the Badley Hall and church complex, and c. 560 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the 17th century, was majorly altered around 1840 and comprises a plastered timber frame structure with 18th or early 19th century herringbone parquetry in large panels and plain tiled and pantiled roofs.

- 3.3.883 The setting of the asset is informed by its former farmyard location and by its relationship with its surviving non-designated outbuildings, which are recorded on the first edition OS map of 1884. A large proportion of the farming complex recorded on the map has, however, been demolished to allow for road improvements and for the development of a large industrial estate immediately to the west. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships, but this link has been largely eroded by the road improvements and the industrial estate. The setting of the asset, therefore, makes a minor contribution to its value, but due to it being restricted to the former farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.884 The Grade II listed 'Badley Mill House' (**1231092**) is located on the southern bank of the Gipping river, c. 150 m north-east of the B1113 Stowmarket Road, c. 1.4 km north-east of the Badley Hall and church complex, and c. 200 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former mill house dates to the 17th century, has alterations of 18th century date and around 1980, and comprises a plastered timber frame structure on a plinth of tarred red brick with a plain tiled roof. The house forms part of a historical farmstead known as Badley Mill. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2433**). The farmstead has historical and evidential values.
- 3.3.885 The setting of the asset is informed by its location within a former milling complex on the bank of the river. The setting is further informed by the asset's relationship with its former outbuildings, most of which are recorded on the first edition OS map of 1884, but now serve as dwellings. The Great Western Railway Ipswich and Norwich Line immediately to the south-west has encroached on the setting introducing noise and movement, but the asset and associated buildings remain coherent as a former milling complex. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being focused on the mill complex and river, the setting does not extend to the draft Order Limits.
- 3.3.886 The Grade II listed 'Cherry Tree Farmhouse' (**1231090**) is located on the north-eastern flank of the B1113 Stowmarket Road, c. 1.3 km north-east of the Badley Hall and church complex, and c. 10 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse is of mid-to-late 16th century, has 17th century extensions and comprises a pebble-dashed timber frame structure with a concrete plain tiled roof. The farmhouse forms part of a historical farmstead known as Cherry Tree Farm or Badleywalk Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2432**). The farmstead has historical and evidential values.
- 3.3.887 The setting of the farmhouse is informed by its surrounding garden, but the Badley Walk Farm (later Cherry Tree Farm) complex recorded on the first edition OS map of 1884 appears to have been demolished. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and former functional relationships, but this link has been eroded by the imposition of the Great Western Railway Ipswich and Norwich Line immediately to the north-east, by the modernisation of the B1113 to the south-west and small-scale development to the east. The setting of the asset, therefore, makes a minor contribution to its value, but due to it being restricted to the former farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.888 The Grade II listed 'Barn, 20 Metres South East of Doveshill Farmhouse' (**1231089**) is located on the north-eastern flank of the B1113 Stowmarket Road at the north-western extent of Needham Market, and 45 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset was built around 1600 as an eight-bay stable range or granary. It was extended to the west by two bays in the 18th or early 19th centuries, at which time the original building was converted to a barn. The asset was converted into a commercial property in the early 21st century when a pantiled roof replaced the former corrugated iron covering. The barn forms part of a historical farmstead known as Doveshill farm. This a stable which dates to the 16th century, the farm also has 19th century assets. The Suffolk HER has recorded the farmstead complex as non-designated heritage asset (**2423**). The farmstead is of historical value.
- 3.3.889 The setting of the asset is informed by its roadside location and by its relationship with the Grade II listed medieval former farmhouse (The Dower House) immediately to the north-west, which is now a separate residence. The setting is further informed by the surrounding agricultural landscape with which the asset and former farmhouse have historical and former functional relationships. There has, however, been some 20th century infill development to the north and south of the asset and the railway, 80 m to the north-east, was imposed onto its setting during the 19th century. The setting of the asset, therefore, makes a moderate contribution to its value and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.890 The Grade II listed assets 'Badley Green Farmhouse' (**1231086**) and 'Cottage 60 Metres South-East of Badley Green Farmhouse' (**1231087**) are located south of Badley Lane, c. 470 m south-south-west of the of the Badley Hall and church complex, and c. 750 m north-west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The farmhouse dates to the 16th century, was majorly altered in the 17th and 19th centuries and comprises a pebble-dashed timber frame structure with mixed clay and concrete plain tiled roofs. The cottage is of probable 16th or 17th century date and comprises a plastered timber frame structure. The asset was extended after 2015 when a new pantile roof was added.
- 3.3.891 The setting of the assets is shared and informed by their interrelationship and by their relationships with the non-designated working farm outbuildings. The setting is further informed by the surrounding agricultural landscape with which the assets and non-designated farm outbuildings have historical and ongoing functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance and the setting being restricted to the farmyard location and the immediate landscape, it does not extend to the draft Order Limits.

### Combs CP

- 3.3.892 The Grade II listed assets 'Holyoak Farmhouse' (**1183126**), 'Barn About 50 Metres North West of Holyoak Farmhouse' (**1032956**), 'Granary/Cartlodge Aligned East West 30 Metres North of Holyoak Farmhouse' (**1183144**) and 'Stable Aligned North South 40 Metres North West of Holyoak Farmhouse' (**1033002**) are located at the southern extent of Church Road c. 670 m east of Combs, and c. 1.95 km north-west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The farmhouse is of medieval date and reported in the appropriate section above. The barn (**1032956**) dates to 1849 and comprises a weatherboarded timber frame structure on a tall red

plinth in a Flemish bond derivative with a Welsh slate roof. The granary/cartlodge (**1183144**) is of probable late 18th century date reusing many 17th century elements and comprises a weatherboarded timber frame structure with a slated roof. The stable (**1033002**) dates to the late 18th century and comprises a weatherboarded timber frame structure with a thatched roof. Based on satellite imagery, these assets have been converted into residential or commercial properties.

- 3.3.893 The setting of the assets is shared and informed by their interrelationships and by their relationships with the non-designated outbuildings of the farming complex, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the assets and outbuildings have historical and ongoing functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance and the setting being restricted to the farmyard location and the immediate landscape, it does not extend to the draft Order Limits.
- 3.3.894 The Grade II listed ‘Halfpenny Hall’ (**1242001**) is located at the junction of Badley Lane and Holyoak Lane, c. 850 m south-east of Combs, and c. 1.8 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 18th century and comprises a rendered timber frame structure on a brick plinth with a thatched roof.
- 3.3.895 The setting of the asset is informed its isolated roadside location within its garden which is defined by mature hedgerows and by its relationship with its outbuildings, one of which may be recorded on the first edition OS map of 1884. The setting is further informed by the asset’s relationships with the non-designated buildings of the former Pennyplot Farm complex to the south-east and the Grade II listed Elm Cottage and non-designated buildings of Little London to the south-west, several of which are recorded on the first edition OS map of 1884. The surrounding agricultural landscape, with which the asset has a historical relationship, also contributes positively to its setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the setting being restricted to the roadside location and the immediate landscape, it does not extend to the draft Order Limits.
- 3.3.896 The Grade II listed ‘Elm Cottage’ (**1033007**) is located in the hamlet of Little London on the eastern flank of Badley Lane, c. 980 m south-east of Combs, and c. 1.7 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 17th century and comprises a roughcast timer frame structure with a thatched roof.
- 3.3.897 The setting of the asset is informed by its roadside location within the hamlet and by its relationships with the post medieval and modern non-designated building of the settlement that positively contribute to its character. The setting is further informed by the asset’s relationship with the non-designated buildings of the former Pennyplot complex to the east and the Grade II listed Halfpenny Hall to the north-east. The surrounding agricultural landscape, with which the asset has a historical relationship, also contributes positively to its setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and the setting being restricted to the roadside location and the immediate landscape, it does not extend to the draft Order Limits.
- 3.3.898 Grade II listed assets ‘Bluehouse Farmhouse’ (**1033006**) and ‘Barn 20 Metres South of Bluehouse Farmhouse’ (**1284210**) are located on the western flank of Bradley Lane in the hamlet of Little London, c. 930 m south-east of Combs, and c. 1.75 km

west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The farmhouse was built no later than the early 17th century and may actually be a possible late medieval hall range. The asset comprises a timber frame structure with 18th or early 19th century weatherboarding and a plastered cross wing. The cross wing has some 18th to early 19th century herringbone pargetting in panels at the gable. The whole structure has thatched roofs. The five-bay barn date to around 1600 and comprises a weatherboarded timber frame structure with a corrugated iron roof.

- 3.3.899 The setting of the assets is shared and informed by their location within a working farm complex, their interrelationship and their relationships with the non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the assets have historical and ongoing functional relationships. There has been some considerable expansion of the farming complex to the east of Bradley Lane, but this has not detracted from the setting. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance, and the setting being restricted to the farmyard and surrounding landscape, it does not extend to the draft Order Limits.
- 3.3.900 Grade II listed 'House Occupied by Mr E Battle' (**1183177**) is located on the south-eastern flank of Bradley Lane at the north-east extent of Moats Tye, and c. 1.85 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 16th or early 17th centuries and comprises a plastered timber frame structure with a thatched roof.
- 3.3.901 The setting of the asset is informed by its roadside settlement location and by its relationships with non-designated buildings which also flank the throughfare and which contribute the character of the settlement. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. There has been some small-scale residential infill development, but this has not overly impacted the rural aspect of the setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and it being restricted village location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.902 The Grade II assets listed 'Manor Cottage' (**1389703**) and 'Rosemount' (**1033010**) are located on the flanks of an unnamed road on the south-eastern flank of Bradley Lane in the north-east of Moats Tye, and c. 1.95 km west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. Manor Cottage dates to the 18th century and comprises a rendered and whitewashed timber frame structure with a thatched roof. Rosemount is an early 17th century three-cell house and comprises a roughcast timber frame structure with a thatched roof.
- 3.3.903 The setting of the assets is shared and informed by their roadside settlement locations, by their interrelationship and by their relationships with non-designated buildings which also flank the throughfare and which contribute the character of the settlement. The setting is further informed by the surrounding agricultural landscape, with which the assets have historical relationships. There has been some small-scale 20th century infill residential development, but it is sympathetic and in the local architectural vernacular. The setting of the assets, therefore, makes a considerable contribution to their values, but due to it being focused on the settlement location and immediate landscape, the setting does not extend to the draft Order Limits.

## Barking CP

- 3.3.904 The Grade II listed 'Newton Cottages' (**1277414**) is located adjacent to Little Newton Wood on the north-western flank of an unnamed road, c. 1.7 km north of Barking, and c. 30 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The pair of cottages date to the mid-18th century and comprise a roughcast/rendered timber frame structure with thatched and pantiled roofs.
- 3.3.905 The setting of the asset is informed by its location within its mature grounds and by its relationships with its non-designated outbuildings, which based on cartographic evidence, are largely of mid-20th century date. The setting is further informed by the adjacent woodland and surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project the setting extends to the draft Order Limits.
- 3.3.906 The Grade II listed 'College Grove Farmhouse' (**1231093**) is located at the south-western extent of an unnamed road c. 1.1 km north of Barking, and c. 170 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse is of probable 17th century date and comprises a pebble-dashed timber frame structure with a Roman pantiled roof. The farmhouse is part of a historical farmstead, Plumtree Farm (also known as College Grove Farm). The Suffolk HER has recorded the farmstead complex as a non-designated heritage asset (**2419**). The farmstead has historical and evidential value.
- 3.3.907 The setting of the farmhouse is informed by its location within a former farmyard and by its relationship with its former non-designated outbuildings, which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its former outbuildings have historical and former functional relationships. The larger of the outbuildings, likely a barn appears, however, to have been converted into a residence and the remaining outbuildings appear to be associated with it. The former farmyard has been subdivided to provide grounds for each dwelling reducing the cohesion of the former farming complex and so the setting of the asset makes a moderate contribution to its value. Due to the proximity of the Project, however, the setting of the asset extends to the draft Order Limits.
- 3.3.908 The Grade II listed 'Bungeons Farmhouse' (**1231581**) is located at the north-eastern limit of a private driveway, c. 790 m north of Barking, and c. 70 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the mid-16th century, has 17th century alterations and comprises a plastered timber frame structure with 18th century pargetting and a thatched roof. The asset is located within a historical farmstead known as Bungeon's Farm. This dates to the 16th century with later 19th century additions and alterations. The Suffolk HER has recorded the farmstead complex as a non-designated heritage asset (**2428**). The farmstead has historical and evidential value.
- 3.3.909 The setting of the asset is informed by its working farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a

considerable contribution to its value, and due to the proximity of the Project the setting extends to the draft Order Limits.

- 3.3.910 The Grade II listed 'The Old Rectory' (**1277413**) is located to the north of the Grade I listed medieval Church of St Mary, c. 700 m north-east of Barking, and c. 400 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former rectory was built in 1819 by William Brown of Ipswich for the Reverend C. Davy. It comprises a gault brick with a limestone string beneath the first storey windows and a hipped slated roof.
- 3.3.911 The setting of the asset is informed by its large garden location and by its interrelationship with the church it once served just to the south. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The large garden of the asset is defined by tree lined hedgerows and fences and there are tree belts to the east and south and a small copse to the west, which afford the asset some privacy. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to the asset's gardens and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.912 The Grade II listed 'Home Farmhouse' (**1231443**) is located on the north-eastern flank of Hascot Hill in the north-west of Barking, and c. 120 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse was built in two stages in the mid-16th century and then around 1600 and comprises a roughcast timber frame structure with a cross wing to the north-west and a plain tiled roof. The farmhouse forms part of a historical farmstead known as Home Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2437**). The farmstead has historical and evidential value.
- 3.3.913 The setting of the farmhouse is informed by its former farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and former functional relationships. A residential dwelling has been built to the south-east of the asset within its setting, but it is sympathetic, in the local architectural vernacular and well screened from the asset. The asset and its outbuildings are coherent as a former farming complex and so setting of the asset makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends of the draft Order Limits.
- 3.3.914 The Grade II listed 'Fairfax House' (**1231522**) is located on the south-western flank of Hascot Hill in the north-east of Barking, and c. 90 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, formally Spalding Hall, was built around 1600 and comprises a pebble-dashed timber frame structure with a plain tiled roof. The Reverend John Fairfax, the Rector of Needham Market lived in the house until he was ejected in 1662 due to his nonconformist religious convictions.
- 3.3.915 The setting of the asset is informed by its associated gardens to the front and rear, its roadside settlement location and by the surrounding agricultural landscape, with which the asset has a historical relationship. Once secluded, unsympathetic 20th century residential development along Hascot Hill to the north-west and south-east has encroached upon the setting of the setting of the asset. The setting of the asset, therefore, makes a moderate contribution to its value, and due to the proximity of the Project, the setting extends of the draft Order Limits.

- 3.3.916 The Grade II listed 'Ashburnham Farmhouse' (**1278102**) is located on the south-eastern flank of the B1078 Barking Road, c. 420 m north-east of Barking, and c. 300 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 16th century, has 17th and 19th century alterations and comprises a plastered timber frame structure with a plain tiled roof. The asset is located within a historical farmstead known as Ashburnham Farm or Church Farm. This dates to the 16th or 17th century. The Suffolk HER has recorded the farmstead complex as a non-designated heritage asset (**2427**). The farmstead has historical and evidential value.
- 3.3.917 The setting of the asset is informed by its former farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and former functional relationships. The setting of the asset, therefore, makes a moderate contribution to its value, and due to the proximity of the Project, the setting extends of the draft Order Limits.
- 3.3.918 The Grade II listed 'Kennels Farmhouse' (**1231755**) is located c. 160 m south-east of the B1078 Barking Road, c. 1.5 km east-north-east of Barking, and c. 1.4 km east-north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to around 1700, has late 18th and mid-20th century alterations and a thatched roof.
- 3.3.919 The setting of the asset is informed by its former farmyard location and by its relationships with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and former functional relationships. Although no longer a working farm complex, the asset and outbuildings are still coherent as such and, therefore, the setting of the asset makes a considerable contribution to its value. Due to overall distance, however, and the focus of the setting being on the asset's grounds and immediate landscape, it does not extend to the draft Order Limits.
- 3.3.920 The Grade II listed 'Walnut Tree Cottage' (**1278138**) is located on the south-eastern flank of the B1078 Barking Road in Barking, and c. 360 m west-south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built in the late 16th or early 17th centuries as a bakehouse associated with the adjacent Grade II listed Timberleys medieval residence and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.921 The setting of the asset is informed by its roadside location within the settlement and by its relationship with the Grade II listed Timberleys medieval residence immediately to the north-east and which is recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has a historical relationship. There has been 20th century residential development on both flanks of Barking Road which has subsumed the asset into the village. The setting of the asset, therefore, makes a moderate contribution to its value, but due to the roadside village focus of the setting, it does not extend to the draft Order Limits.
- 3.3.922 The Grade II listed 'Rectory Farmhouse' (**1231488**) is located 30 m north-west of the B1078 Barking Road in Barking, and c. 510 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical

and aesthetic values. The former farmhouse dates to the mid or late 17th century and comprises a pebble-dashed timber frame structure with a concrete tiled roof. The farmhouse forms part of a historical farmstead known as Rectory Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (2438). The farmstead has historical and evidential value.

- 3.3.923 The setting of the farmhouse is informed by its village location set back from the main road and by its relationships with the Grade II listed 15th/16th century Old School House to the west and the non-listed elements of the Rectory Farm complex to the north, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape with which the asset has historical and former functional relationships. The former outbuildings have largely been converted into residential properties and the former farmyard has been divided up to provide garden areas for the properties. Residential development along Barking Road in the 20th century has annexed the asset into the village and coupled with its loss of function means the setting of the asset makes moderate contribution to its value. Due to the focus of the setting being its village location, however, it does not extend to the draft Order Limits.
- 3.3.924 The Grade II listed assets 'The Fox Inn' (1231437) and 'The Grange' (1231439) are located on the opposing flanks of the B1078 in Barking, and c. 720 m south-west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The inn dates to the 18th century, was altered in the early 19th century and again around 1970 and comprises a red brick structure with a hipped plain tiled roof. The inn was extended to the north and south around 1970. The Grange dates to the 17th century, was altered in the mid-19th and 20th centuries and comprises a timber frame structure, which was encased in mid-19th century brick, with a plain tiled roof.
- 3.3.925 The setting of the assets is shared and informed by their interrelationship and their roadside settlement locations. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical relationship. Once isolated, residential development along the B1078 in the first half of the 20th century has subsumed the assets into Barking, although the properties are sympathetic, of the local architectural vernacular and are not overly intrusive. The setting of the assets, therefore, makes a considerable contribution to their values, but due to it being restricted to the roadside settlement location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.926 The Grade II listed 'Top Farmhouse' (1231094) is located c. 430 m north of the B1078, c. 770 m west of Barking, and c. 20 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the early or mid-17th century and comprises a plastered timber frame structure with a thatched roof. The farmhouse forms part of a historical farmstead known as Barking Tye. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (2440). The farmstead has historical and evidential value.
- 3.3.927 The setting of the farmhouse is informed by its former farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. The formally associated barn complex appears to have been converted into a residential dwelling and the former farmyard has been divided to provide garden space for each property. The setting of the asset,

therefore, makes a moderate contribution to its value, but due to it being restricted to the former farmyard and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.928 The Grade II listed assets 'Overhall Farmhouse' (**1231412**) and 'Barn, 40 Metres North West of Overhall Farmhouse' (**1231095**) are located 230 m east of Barking Road in Barking, and c. 680 m east of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The farmhouse was built in two stages in the 16th and mid-17th centuries, has evidence of 19th and 20th century maintenance and comprises a plastered timber frame structure with a plain tiled roof. The barn is of late 16th or early 17th century date and comprises a weatherboarded, timber frame five-bay structure with a corrugated iron roof.
- 3.3.929 The setting of the asset is shared and informed by their working farm complex location, by their interrelationship and their relationship with the non-designated outbuildings of the farming complex. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and ongoing functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance and it being restricted to the farmyard location and surrounding landscape, the setting does not extend to the draft Order Limits.
- 3.3.930 The Grade II listed assets 'Moat Farmhouse' (**1231305**) and 'Former Stable Range 30 Metres West of Moat Farmhouse' (**1278293**) are located on the south-south-eastern flank of the B1078, and c. 15 m south of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the mid-17th century and comprises a plastered timber frame structure with a plain tiled roof. The former stable range is now a residential dwelling, dates to the early-to-mid 17th century and comprises a four-bay weatherboarded structure with a pantiled roof. The farmhouse forms part of a historical farmstead known as Moat Farm or Barking Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2441**). The farmstead has historical and evidential value.
- 3.3.931 The setting of the farmhouse is shared and informed by their former farmyard location, by their interrelationship and by their relationships with the non-designated building of the former farming complex. The setting is further informed by the surrounding agricultural landscape, with which the assets and outbuildings have historical and former functional relationships. Several of the non-designated outbuildings have also been converted into residences and the former farmyard has been divided between the properties. The setting of the assets, therefore, makes a moderate contribution to their values, and due to the proximity of the Project the setting extends to the draft Order Limits.
- 3.3.932 The Grade II listed 'Tye Farmhouse' (**1278294**) is located on the southern flank of the A1078 in Barking, and c. 410 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse has a probable 16th or early 17th century core, was remodelled in the early 19th century and comprises a pebble-dashed timber frame structure with a hipped plain tiled roof.
- 3.3.933 The setting of the asset is informed by its roadside location within its mature garden and by its relationships with its outbuilding and with the property and outbuildings to the west, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the assets

and outbuildings have historical and former functional relationships. there has been sympathetic residential, small-scale development to the east, but this is well screened by mature trees and shrubs in the asset's garden. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its roadside settlement location and the immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.934 The Grade II listed 'Browns Farmhouse' (**1231861**) is located on the eastern flank of Barking Road in Barking, and c. 590 m south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse is of probable 16th century date and comprises a plastered timber frame structure with a hipped Roman pantiled roof.
- 3.3.935 The setting of the asset is informed by its roadside settlement location and by the surrounding agricultural landscape, with which it has historical and former functional relationships. Infill development along Barking Road in the 20th century has, however, absorbed the asset into the linear settlement, diminishing its once isolated nature. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to its roadside location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.936 The Grade II listed 'Bonneywood Farmhouse' (**1231758**) is located c. 130 m east of Barking Road, c. 200 m north-east of Willisham Tye, and c. 540 m east-north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse is of probable 16th or 17th century date and comprises a pebble-dashed timber frame structure with a plain tiled roof.
- 3.3.937 The setting of the asset is informed by its farmyard location and by its relationship with its outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and functional relationships. The large outbuilding to the south-west has been converted into a second dwelling and the farmyard has been divided accordingly. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is focused on the farmyard location and the surrounding landscape, the setting does not extend to the draft Order Limits.

### Needham Market CP

- 3.3.938 The Grade II listed assets 'Hill House' (**1254384**) and 'Stable 20 Metres North East of Hill House' (**1253685**) are located within the former Dod's Farm complex immediately to the south-east of Hill House Lane at the northern extent of Needham Market, and c. 460 m south-east of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. Hill House, a former farmhouse, dates to the 17th century, was majorly remodelled in the late 19th century and comprises a timber frame core encased in 19th red brick with a plain tiled roof. The stable, now a dwelling, originally had a granary above and dates to the mid-17th century. The asset is constructed of red brick in English bond and has Dutch gables, which were largely rebuilt in the 19th century, and with plain and concrete tiled roofs. The Suffolk HER has recognised the farmstead as a non-designated heritage asset (**2511**). Older post medieval floor surfaces (**2303**) have also been identified during archaeological recording of the Granary, the earliest dating to the 16th century. The farmstead has historical and evidential value.
- 3.3.939 The setting of the assets is shared and informed by their former farmyard location, by their interrelationship, and by their relationships with surviving non-designated

outbuildings which were part of the Dod's Farm complex recorded on the first edition OS map of 1884. Today, the surviving buildings of the farm complex serve as separate dwellings and the farmyard has been divided amongst the properties losing its definition as a working complex. The 20th and 21st century expansion of Needham has encroached on the former farm on all sides allowing for only glimpsed views of the agricultural land to the north-west, with which the assets and non-designated outbuildings have historical and former functional relationships. The setting of the assets, therefore, makes a minor contribution to their values, but due to it being restricted to its roadside location, the setting does not extend to the draft Order Limits.

- 3.3.940 The Grade II listed assets 'Valley House' (**1277198**) and 'Hawks Mill (Including Bridge Beneath Road Attached To West Side)' (**1277199**) are located on opposing banks of a mill leat channelled off the Gipping river to the east, at the north-eastern edge to Needham Market. The draft Order Limits lie c. 960 m to the north-west. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. Valley House, on the western flank of the river, has a timber frame core dating to c. 1600 that was encased in red brick in the mid-18th century, when the asset was also extended. The roof is hipped and slated. The former water mill was built in 1884 and had wings added in 1892. The mill is constructed of red brick with gault brick bands and concrete plain tiled roofs.
- 3.3.941 The setting of the house is informed by its large garden location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by its river valley location and by its relationships with the listed mill and its non-designated formally associated outbuildings. The setting of the former mill is informed by its relationships with the leat it straddles, with its formerly associated outbuildings and with Valley House and its non-designated to the east. The valley setting of the house has been intruded upon by the 19th century construction of the railway which has introduced noise, movement and pollution into the setting, although the line was in place at the time of the building of the mill. The garden of Valley House does, however, have a high mature tree lined hedge boundary to the west, screening it from the railway and the outskirts on Needham Market beyond. The setting of the assets, therefore, makes a considerable contribution to their values, but due to it being restricted to its river valley location, the setting does not extend to the draft Order Limits.
- 3.3.942 The Grade II listed 'United Reformed Church' (**1253671**) is located on the eastern flank of High Street in Needham Market with the draft Order Limits pipeline protection works c. 1.4 km to the north-west. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset was built as a Congregational Chapel in 1837 in the Greek Revival Style with a gable front and comprises a gault brick structure with limestone dressings and a slated roof.
- 3.3.943 The setting of the asset is informed by its roadside settlement location and by its relationships with the numerous largely post medieval listed buildings which line the High Street. The 20th century development of the settlement has detached the High Street and its assets from the surrounding agricultural landscape, but this has not diminished the church's presence in the settlement. The setting of the asset, therefore, makes a considerable contribution to its value, but due to the urban expansion of Needham Market, the setting does not extend to the draft Order Limits.

### Battisford CP

- 3.3.944 The Grade II listed 'Battisford Hall' (**1352140**) is located c. 200 m north-north-east of Battisford and 1 km north-west of the draft Order Limits. The asset is of **medium**

**value** based on its designation and its evidential, historical and aesthetic values. The asset is a farmhouse, which was built in the mid-16th century as a manor house probably for Sir Thomas Gresham, founder of the Royal Exchange, or his father Sir Richard. The asset was majorly remodelled around 1900 when it was also extended to the west and north. The asset comprises a timber frame structure, which was encased in red brick around 1900, with a plain tiled roof.

- 3.3.945 The setting of the asset is informed by its farmyard location within a complex of outbuildings several of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is focused on the farmyard location and the surrounding landscape, the setting does not extend to the draft Order Limits.
- 3.3.946 The Grade II listed 'Church Cottages' (**1033019**) is located on the eastern flank of Church Road in Battsford and c. 960 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built around 1550, was extended around 1600 and comprises a plastered timber frame structure with a thatched roof.
- 3.3.947 The setting of the asset is informed by its roadside village location, by its relationships with the Grade I listed medieval Church of St Mary to the north and the non-designated residence to the south, which is recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is restricted to the roadside village location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.948 The Grade II listed 'Rose Farmhouse' (**1033017**) is located on the northern flank of Church Road in Battsford and c. 1.2 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse is of probable 17th century date and comprises a timber frame structure with a pebble-dashed upper storey, a 19th century red brick encased lower storey and a plain tiled roof.
- 3.3.949 The setting of the asset is informed by its isolated roadside location within the dispersed settlement and by its relationship with its outbuildings which are largely recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is restricted to the roadside village location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.950 The Grade II listed 'Kestrel Cottage Willow Cottage' (**1033016**) is located on the northern flank of Church Road at the western edge of Battsford and c. 1.5 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset comprises two cottages built as a single house around 1700 reusing medieval components. The asset was remodelled in the mid-19th century when the south (front) elevation of the plastered timber frame structure was encased in red brick.
- 3.3.951 The setting of the asset is informed by its isolated roadside location within the dispersed settlement and by its relationship with the non-designated residential building to the east, which is recorded on the first edition OS map of 1884. The

setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is restricted to the roadside village location and the immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.952 The Grade II listed 'St Johns Manor House' (**1352138**) is located within the bounds of a medieval moat on the northern flank of Church Road c. 860 m west of Battisford and c. 1.8 km north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse was built around 1570 reusing some medieval components on the moated site of the Preceptory of the Knights Hospitallers founded here in c.1154 and dissolved in 1540. The asset was extensively remodelled in the mid-19th century likely for Dame Anne, wife of Sir Thomas Gresham, Lord of the Battisford and St. John's Manors and the founder of the Royal Exchange. The house comprises a plastered timber frame structure which is largely encased in mid-19th century gault brick with a plain tiled roof.
- 3.3.953 The setting of the asset is informed by its working farmyard location and by its relationship with its outbuildings, although the complex of buildings shown on the first edition OS map of 1884 appear to have been replaced by modern structures in the latter half of the 20th century. The setting is further informed by the partially surviving medieval moat, which tells of the historical depth of the site, and by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is restricted to the farmyard location and the surrounding landscape, the setting does not extend to the draft Order Limits.
- 3.3.954 The Grade II listed 'Gibbons Farm Cottage' (**1033021**) is located on the north flank of an unnamed road c. 1.1 km east of Battisford and c. 10 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, formally two cottages, was built in the early 17th century and comprises a plastered timber frame structure with a thatched roof. The cottage forms part of a historical farmstead known as Gibbons Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2434**). The farmstead has historical and evidential value.
- 3.3.955 The setting of the cottage is informed by its secluded garden location and by its relationship with the non-designated Gibbons farm complex to the north-west. The setting is further informed by the surrounding agricultural landscape, with which the asset and Gibbons farming complex have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.956 The Grade II listed 'Barn 40 Metres North East of Vale Farmhouse' (**1182673**) is located off an unnamed road 330 m north of Hascot Hill (road), c. 670 m south-east of St Mary's Church in Battisford, and 230 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The barn dates to the late 17th century and comprises a weatherboarded timber frame structure with a pantiled roof.
- 3.3.957 The setting of the asset is informed by its farmyard location and by its relationship with its Grade II listed early 16th century Vale Farmhouse to the south-west. The setting is further informed by the asset's relationship with other non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The

surrounding agricultural landscape, with which the asset has a historical and functional relationship, also contributes positively to the setting. The former fields to the east and south-east, however, have clearly not been worked for several decades and now appear to be wooded rough grazing. The mature vegetation affords the asset seclusion and privacy and so the setting makes a considerable contribution to its value. Due to the mature vegetation reducing the focus of the setting, however, it does not extend to the draft Order Limits.

- 3.3.958 The Grade II listed 'Lower Manor Farmhouse' (**1284397**) is located north of Valley Road c. 950 m south-west of Battisford and c. 1.56 km west-north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 16th century, has 20th century alterations and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.959 The setting of the asset is informed by its former farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. The outbuildings appear, however, to have been converted into residences or holiday lets and the former farmyard has been sub-divided accordingly. The setting of the asset, therefore, makes a moderate contribution to its value, but as it is restricted to the former farmyard and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.960 The Grade II listed 'Tye Cottage' (**1033024**) is located south of Valley Road c. 1.1 km south-west of Battisford and c. 1.7 km west-north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the mid-16th century, has 20th century alterations and comprises a plastered timber frame structure with a concrete tiled roof.
- 3.3.961 The setting of the asset is informed by its open garden location and by its relationship with its 20th century outbuildings and the non-designated residence to the west, which appears to have replaced the earlier structure recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is restricted to the garden location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.962 The Grade II listed 'Spinks Farmhouse' (**1033023**) is located 120 m south of Valley Road c. 770 m south-south-west of Battisford and c. 890 m north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the mid-16th century, has late 16th and early 17th century extensions and comprises a roughcast timber frame structure with a concrete pantiled roof.
- 3.3.963 The setting of the asset is informed by its former farmyard location and by its relationship with its former barn to the south. The setting is further informed by the surrounding agricultural landscape, with which the asset and its former barn have historical and former functional relationships. The asset now serves as a residence and the barn has been converted to the same resulting in the division and conversion of the farmyard into gardens for the house. There is small-scale 20th century residential development to the north of the asset along the lane adjoining Valley Road to the north, which has slightly encroached on the setting of the asset. The

setting of the asset, therefore, makes a moderate contribution to its value, but as it is restricted to the former farmyard location and the immediate landscape, the setting does not extend to the draft Order Limits.

3.3.964 The Grade II listed 'Hascot Hill Farmhouse' (**1352142**) is located on the southern flank of Hascot Hill, c. 1.4 km south-east of Battisford and c. 100 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the mid-17th century, has an early 19th century extension and comprises a plastered timber frame structure with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Highfields Farm or Hascot Hill Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2435**). The farmstead has historical and evidential value.

3.3.965 The setting of the farmhouse is informed by its roadside garden location and by its relationship with its former outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its former outbuildings have historical and former functional relationships. The asset is now located within an enclosed garden defined by tree lined mature hedgerows affording the asset some privacy but detaching from its former farmyard setting. The former outbuildings now serve as residential and commercial properties and so, overall, the setting of the asset makes a moderate contribution to its value. Due to the proximity of the Project, however, the setting extends to the Order Limits.

### Darmsden CP

3.3.966 Grade II listed 'Church of St Andrew' (**1278100**) is located on the western outskirts of Darmsden, and c. 1.95 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The parish church was built in 1880 by Herbert Green of Norwich on the site of a medieval church. The church is in the Decorated Gothic style, comprises a nave chancel and south porch constructed of flint rubble with limestone dressings and a plain tiled roof.

3.3.967 The setting of the asset is informed by its graveyard location and by its relationship with the settlement of Darmsden to the east, which itself is recorded in the Domesday Book. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and as the Project lies in the neighbouring parish, the setting does not extend to the draft Order Limits.

3.3.968 Grade II Listed 'Bridges Cottages' (**1231696**) is located on the north-western flank of an unnamed road c. 340 m south-west of Darmsden, and c. 1.8 km east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset, now two houses, was built in the 16th century, was majorly altered in the 17th century and later and comprises a plastered timber frame structure with a Roman pantiled roof.

3.3.969 The setting of the asset is informed by its roadside garden location and by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and it being restricted to the garden location and immediate landscape, the setting does not extend to the draft Order Limits.

- 3.3.970 The Grade II listed 'Priestley Cottage' (**1278101**) is located at the north-north-western extent of an unnamed road c. 1.2 km south-west of Darmsden, and c. 1.1 km south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to around 1600, has 20th century extensions and comprises a plastered timber frame structure with a concrete tiled roof.
- 3.3.971 The setting of the former farmhouse is informed by its isolated garden location and by the surrounding agricultural landscape, with which the asset has historical and former functional relationships. Despite the loss of the outbuildings recorded on the first edition OS map of 1884, the setting of the asset makes a considerable contribution to its value, but due to overall distance and it being restricted to the garden location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.972 The Grade II listed assets 'Clay Hall' (**1231446**) and 'Daisy Farmhouse' (**1231704**) are located on the opposing flanks of an unnamed road c. 730 m south-west of Darmsden, and c. 1.7 km south-east of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The hall, a former farmhouse, dates to the mid-16th century and comprises a pebble-dashed timber frame structure with a pantiled roof. Daisy Farmhouse is a former farmhouse dated to the late 1600 century, with 19th and 20th century alterations and comprises a plastered timber frame structure with a slated roof.
- 3.3.973 The setting of the assets is shared and informed by their roadside garden locations and the surrounding agricultural landscape, with which the assets have historical and former functional relationships. The setting of the assets makes a considerable contribution to their values, but due to overall distance and it being restricted to the garden locations and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.974 The Grade II listed 'Tarston Hall' (**1231716**) is located immediately east of a medieval moat at the south-western extent of an unnamed road c. 1.6 km south-west of Darmsden and c. 1.2 km south-south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the early 17th century with a probable 16th century service range to the rear and comprises a plastered timber frame structure with extensive restored 18th century cable-pattern pargetting and a plain tiled roof.
- 3.3.975 The setting of the asset is informed by its relationship with its outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the medieval moat immediately to the west, which likely surrounded an earlier house of the manor of Tarston and is indicative of the time depth of the site. The surrounding agricultural landscape, with which the asset has historical and former functional relationships, also positively contribute to the setting. The setting of the asset makes a considerable contribution to its value, but due to overall distance and it being restricted the grounds of the asset and immediate landscape, the setting does not extend to the draft Order Limits.

### [Ringshall CP](#)

- 3.3.976 The Grade II listed 'Ringshall Hall' (**1032953**) and the Grade II\* listed 'Barn 80 Metres South West of Ringshall Hall' (**1352190**) are located south of the Grade I listed Church of St Catherine in Ringshall c. 1.1 km south-east of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential,

historical and aesthetic values. The hall, formally the manor house, has a mid-16th century core, was much remodelled around 1788 and comprises a plastered timber frame structure on a 16th century brick plinth and with a hipped plain tiled roof. The barn was likely a manorial court hall of later 16th century date prior to its 18th century conversion to a barn. The barn was converted into a residential property in 1993. The asset comprises a weatherboarded plastered timber frame structure on a brick plinth with a Roman pantiled roof.

- 3.3.977 The setting of the assets is shared and informed by their former farmyard complex location, by their interrelationship, their relationships with the church to the north, and by their relationships with the non-designated outbuildings of the former farming complex, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the assets and outbuildings have historical and former functional relationship. The setting of the assets makes a considerable contribution to their values, but due to overall distance and it being restricted to their grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.978 The Grade II listed ‘Ringshall Grange’ (**1198439**) is located within a medieval moat at the eastern extent of a private road c. 160 m east of Stowmarket Road, c. 520 m south of Ringshall and c. 1 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset, a former rectory now self-catering apartments, dates to the mid-17th century, has early and late 19th century extensions and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.979 The setting of the asset is informed by its location within its wooded grounds, which are defined by mature tree lined hedgerows, and by its location within a medieval moat which evidences the historical time depth of the site. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset makes a considerable contribution to its value, but due to overall distance and it being restricted to its grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.980 The Grade II listed ‘Hill House’ (**1032954**) is located on the western flank of Stowmarket Road c. 650 m south of Ringshall and 1.18 km west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to around 1770 and comprises a colourwashed red brick structure with a plain tiled roof.
- 3.3.981 The setting of the asset is informed by its roadside garden location and by its relationship with former outbuildings to the south, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and former functional relationships. Some of the outbuildings have, however, been converted to residences or offices and the former farmyard has been accordingly divided, all but removing the cohesion of the former working farm complex. The setting of the asset, therefore, makes a moderate contribution to its value, but due to overall distance and it being restricted to its garden and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.982 The Grade II listed ‘Howes Farm Cottage’ (**1198456**) is located on the north-eastern flank of Stowmarket Road c. 1 km south-south-east of Ringshall and c. 515 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the 16th century and comprises a plastered timber frame structure with a Roman pantiled roof.

- 3.3.983 The setting of the asset is informed by its former farmyard location and by its relationship with its outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and former functional relationships. The asset and its outbuilding, however, no longer function as a farming complex and some of the outbuildings appear to be related to a building supplies yard immediately to the east. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to its former farmyard location and the immediate landscape, and screening by the asset's boundaries and the building supplies yard, the setting does not extend to the draft Order Limits.
- 3.3.984 The Grade II listed 'Fairview' (**1032974**) is located on the south-eastern flank of the B1078 on the southern edge of Ringshall Stocks and c. 390 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the late 16th century, has late 18th and 19th century alterations and comprises a timber frame structure plastered to rear and encased in brick to the rear and gables with a pantiled roof.
- 3.3.985 The setting of the asset is informed by its roadside garden location and by the surrounding agricultural landscape, with which the asset has a historical relationship. the asset's garden is defined by mature, tree lined hedgerows, which afford the asset some privacy and screen it from small-scale residential development on the eastern flank of Offton Road to the east. The setting of the asset, therefore, makes a moderate contribution to its value, but due to it being restricted to its garden location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.986 The Grade II listed 'Ringshall House' (**1032952**) is located on the eastern flank of Offton Road c. 640 m south-south-east of Ringshall Stocks, and c. 220 m west-north-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse was built around 1620-1630, has majorly remodelled in the mid-19th century and comprises a timber frame structure encased in mid-19th century gault brick with a plain tiled roof. The house forms part of a farmstead known as Squirrells Farm. The farmstead also includes a non-extant granary. Both have been recognised by the Suffolk HER as non-designated heritage assets (**2421**) and both have historical and evidential value.
- 3.3.987 The setting of the asset is informed by its garden location, by its relationship with its outbuildings in the garden and its relationship with the working farm complex on the opposite flank of the thoroughfare, some elements of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset, outbuildings and farming complex have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.3.988 The post medieval linear lake or canal with an overflow pond at its north-east end (**2403**), is of **medium value** and historical and evidential value. It is located c. 385 m from the draft Order Limits. The lake's formation through the damming of a small north-east flowing stream, its unique design with a slight waist in the middle, and the presence of a small island contribute to its historical significance. While the footbridge and round structure on the island no longer exist, signs of its past use as a garden are evident with surviving flowers and shrubs. The lake, once accompanied by a boat-house, now serves as a habitat for wildfowl. Its ownership by the Alexander

family, Quakers and bankers in the 18th century, adds a layer of historical context. The resemblance to the early 18th-century lake/canal at Abbots Hall, Stowmarket, further enhances its historical value.

- 3.3.989 Along the edge of the draft Order Limits and approximately 240 m north of Needham Market, is Badley bridge House also known as Badleybridge Farm (**2533**). The historical farmstead was constructed in the 19th century and appears on the first edition OS map 1884. The agricultural buildings have either been converted to residential or commercial use or are no longer extant, especially the eastern buildings. The farmhouse is still extant. The farmstead no longer functions as a farm. The asset has historical and evidential value and is of **low value**.
- 3.3.990 Located approximately 40 m south-east of the draft Order Limits and approximately 1.1 km to the west of Neeham Market is the non-extant Newton Barn (**2531**). It was constructed in the 19th century and appears on the first edition OS map 1884. It has been replaced by a modern barn just to the north-west. The barn has historical and evidential value and is of **negligible value**.
- 3.3.991 Flint Hall farmstead (**2529**) is located approximately 225 m to the west of the draft Order Limits and approximately 1.7 km to the east of Creting St Mary. The farm was constructed in the 19th century and appears on the first edition OS map 1884. A comparison between Google Earth Pro and this map shows that several of the historical agricultural buildings are now non-extant except for the farmhouse and possibly a barn. The asset has historical and limited evidential value and is of **low value**.
- 3.3.992 The PAS records a **low value** silver coin, possibly a hammered sixpence, of Elizabeth I (**2171**) being found near the village of Badley outside the draft Order Limits. The asset has historical and evidential value.
- 3.3.993 Along Stowmarket Road, approximately 165 m south-east of the draft Order Limits is the **low value** Badley Bridge (**2410**), which has evidential and historical value.
- 3.3.994 A **low value** outfarm and old barn, Bacton (**2306**) of evidential value is located approximately 200 m north-west of the draft Order Limits, immediately south-west of Stowmarket Road, and 275 m north-west of Badley Hill. The 19th century outfarm, regular L-plan courtyard, multi-yard and agricultural buildings are recorded at this location, with the farmhouse set away from the yard. The buildings were still extant in 1945 and have since been demolished. The HER indicates there is potential for earlier origins to buildings and farmsteads however this has not been confirmed.
- 3.3.995 Along Stowmarket Road, approximately 40 m north-west of an draft Order Limits pipeline and 500 m north-west of the draft Order Limits is a site of a milestone (**2411**). It has historical value and is of **low value**.
- 3.3.996 The site of Barking Hall (**2413**), historically associated with Francis Theobald in 1680 and later serving as the seat of the Earls of Ashburnham from around 1756, was transformed into tenements for the poor by 1836. Although the hall was demolished in 1926, the 18th century stables, and a surviving walled garden provide tangible remnants of its existence. The hall, described as an 'Early C18 house of 7 bays with a tower and later C18 wings,' boasted a long veranda on the entrance front. The asset is of **medium value** due to its evident, historical, and aesthetic value. It is situated approximately 300 m east of the draft Order Limits. Additionally, the associated asset, the evidence of landscaping at Barking Hall (**2414**) located about 240 m east of the draft Order Limits, also holds evidential and historical value, with evidence of extensive 19th century landscaping in the area of the now-demolished Barking Hall. It is of **medium value** and both assets are part of a heritage group.

- 3.3.997 Within the draft Order Limits, north-east of Barking, is a collection of post medieval metal artifacts (**2495**) discovered through metal detecting in January 2001 and comprising bronze strap fittings, silver coins, a pin, a candlestick, and an unidentified medieval object. This asset has evidential and historical value and is of **low value**.
- 3.3.998 Ladies Walk (**2490**), situated 60 m east of the draft Order Limits and approximately 500 m north of Barking, comprises a **low value** substantial rectilinear north/south mound enclosed by a surrounding earthwork enclosure bank within the woodland named 'Ladies Walk.' Believed to be a post medieval prospect mound, it stands approximately 2 m high. The woodland is likely associated with the estate linked to Barking Hall, as indicated by its presence on the first edition OS map from the 1880s. The asset holds historical and evidential value.
- 3.3.999 The PAS reports a partially preserved post medieval silver button (**2408**) being found outside the draft Order Limits. The asset is sub-spherical with a flattened back and damaged integral suspension loop. The domed front face showcases a small central boss with incised diagonal strokes resembling a floral motif. It has evidential and historical value but is of **low value**.
- 3.3.1000 The PAS reports a **low value** worn silver six pence of William III, 1696 AD (**2515**) being found within draft Order Limits, west of Barking. The asset has historical and evidential value.
- 3.3.1001 Within the draft Order Limits are found in a field north of the B1078, metal detecting finds of mainly post medieval metal work (**2412**). They are of **low value** but have historical value.
- 3.3.1002 Located along the edge of the draft Order Limits, approximately 1.6 km to the south-east of Ringshall village, is Middle Farm (**2530**). The historical farmstead was constructed in the 19th century and can be seen on the first edition OS map 1884. A comparison between Google Earth and this map shows that all of the historical agricultural buildings have now non-extant, but the asset still functions as a farm. It has historical and limited evidential value and is of **low value**.

## Great Bricett and Bramford

### *Designated Heritage Assets*

#### Baylham CP

- 3.3.1003 The Grade II\* listed assets 'Baylham Hall' (**1293336**) and 'Stable Range, 30 Metres South East of Baylham Hall' (**1208099**) are located partially within a medieval moat off an unnamed road c. 1.1 km west-north-west of Baylham, and c. 2.1 km south-east of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The hall, a manor house, dates to the early 17th century, has later 17th and mid-19th century alterations and comprises a red brick structure with a plain tiled roof. The asset is a substantial fragment of a large country house.
- 3.3.1004 The setting of the assets is shared and informed by their location within a manorial complex, by their interrelationship and by their relationships with the non-designated buildings of the complex, several of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the assets and the outbuildings have historical and ongoing functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance and it being restricted to the manorial

complex and the surrounding landscape, the setting does not extend to the draft Order Limits.

### Great Bricett CP

- 3.3.1005 The Grade II listed 'Tudor Cottage' (**1352159**) is located on the northern flank of the B1078 c. 530 m east-north-east of Great Bricett and c. 945 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. the house dates to the 17th century and comprises a plastered timber frame structure with a thatched roof.
- 3.3.1006 The setting of the asset is informed by its roadside garden location and by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its garden location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.1007 The Grade II listed assets 'The Red Lion Inn' (**1352158**) is 'Red Lion Cottage' (**1032973**) are located on the eastern flank of the B1078 c. 460 m south of Great Bricett and c. 1.3 km west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The former inn is an early or mid-17th century house comprising s plastered timber frame structure with a slated roof. The cottage dates to around 1570 and comprises a plastered timber frame structure with a thatched roof.
- 3.3.1008 The setting of the assets is shared and informed by their secluded location within a wooded parcel of roadside land. The setting is further informed by the surrounding agricultural landscape, with which the assets have a historical relationship. The setting of the assets, therefore, makes a considerable contribution to their values, but due to it being restricted to their wooded grounds and immediate landscape, the setting does not extend to the draft Order Limits.

### Willisham CP

- 3.3.1009 The Grade II listed 'Tye Farmhouse' (**1251803**) is located on the western edge of Willisham Tye, and c. 25 m south of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the mid-16th century, has 20th century alterations, and comprises a plastered timber frame structure with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Tye Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2485**). The farmstead has historical and evidential value.
- 3.3.1010 The setting of the farmhouse is informed by its farmyard location and by its relationship with its non-designated outbuildings, several of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and ongoing functional relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project the setting extends to the draft Order Limits.
- 3.3.1011 The Grade II listed 'Church of St Mary' (**1251778**) is located at the southern extent of Willisham, and c. 750 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The parish church was built in 1878 by H. J. Green of Norwich, in the manner of the late 13th century. The asset comprises a nave, chancel and south porch constructed on flint and septaria rubble with freestone dressings and plain tiled roofs.

- 3.3.1012 The setting of the asset is informed by its graveyard location at the southern limit of the settlement and by its relationship with the early-to-mid 20th century farming complex to the north, which appears to have replaced the Willisham Hall complex recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The graveyard is defined by mature tree lined hedgerows and fencing. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by its graveyard boundary and by the tree belts, copses and mature tree lined hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.

#### Offton CP

- 3.3.1013 The Grade II listed 'Tollemache Hall' (**1262668**) is located within its grounds c. 800 m south-east of Great Bricett and 600 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, formally the Manor House of Great Bricett, dates to the mid-16th century, with early 17th, early 19th and 19th century alterations, and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.1014 The setting of the asset is informed by its location within its grounds and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and former functional relationships. The grounds of the asset are defined by tree belts and mature tree lined hedgerows. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by its ground's boundaries and by the topography, copses and tree lined mature hedgerows of the intervening landscape, the setting does not extend to the draft Order Limits.
- 3.3.1015 The Grade II listed 'Hill House Farmhouse' (**1251590**) is located in the former Hillhouse Farm complex on the southern flank of Bildeston Road, c. 1.5 km west of the centre of Offton, and c. 270 m west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to around 1600, has 19th century alterations and comprises a timber frame structure encased in 19th century gault brick with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Hillhouse Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2460**). The farmstead has historical and evidential value.
- 3.3.1016 The setting of the asset is informed by its roadside situation and by its relationship with the other elements of the farm complex, which have been converted into residences, and with the Grade II listed early-to-mid 16th century barn, which is also now a residence and reported in the medieval section above. The setting is further informed by the asset's relationship with the buildings of the Poplar Farm complex to the east and the non-designated Shortings Farm Cottage to the north-east. The surrounding agricultural landscape, with which the assets have a historical and former functional relationship, also contributes positively to the setting of the assets. Due to the residential conversion of the farm outbuildings and the division of the farming complex into separate properties, the setting of the asset makes a moderate contribution to its value, and because the setting is now restricted to the former farmyard location and immediate surroundings, the setting does not extend to the draft Order Limits.
- 3.3.1017 The Grade II listed 'Rose Cottage Farmhouse' (**1251587**) is located on the southern flank of Bildeston Road, c. 1 km east of Offton, and c. 45 m south-south-west of the

draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the late 16th century, has a 17th century hall range to the east with 18th century alterations, and comprises a plastered timber frame structure with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Cottage Farm or Rose Cottage Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2462**). The farmstead has historical and evidential value.

- 3.3.1018 The setting of the farmhouse is informed by its farmyard location and by its relationship with its non-designated outbuildings, some of which are recorded on mid-to-late 20th century OS mapping. The setting is further informed by the asset's relationship with the listed and non-designated medieval and post medieval buildings of the Poplar and Hillhouse farm complexes to the west and those of the Valley Farm complex to the east. The surrounding agricultural landscape, with which the asset has historical and ongoing functional relationships, also makes a positive contribution to the setting. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.

The Grade II listed 'The Old Vicarage' (**1262688**) is located in Offton c. 15 m south of the Grade I listed medieval Church of St Mary, and c. 115 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former vicarage dates to the early 18th century, has late 18th century alterations, and comprises a plastered timber frame structure with a plain tiled roof.

- 3.3.1019 The setting of the asset is informed by its location in the medieval core of Offton and by its relationships with the listed and non-designated buildings of Offton that contribute positively to the character of the settlement. These buildings include the Grade I listed medieval Church of St Mary immediately to the north. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of Project undergrounding works to the north, the setting extends to the draft Order Limits.

- 3.3.1020 The Grade II listed 'The Green' (**1251593**) is located on the north-western flank of Castle Road in Offton, and c. 215 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The cottage dates to the 18th century, has mid-19th century alterations and comprises a plastered timber frame structure with a thatched roof.

- 3.3.1021 The setting of the asset is informed by its location in the medieval core of Offton within its large garden, which is defined by high, tree lined hedgerows allowing for only glimpsed views of the asset from the surrounding streets and affording the asset some privacy. The setting is further informed by the asset's relationships with the listed and non-designated buildings of Offton that contribute positively to the character of the settlement. There has been some 20th century residential development of Offton, some of it quite unsympathetic, but it is mostly well screened from the cottage. The asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its settlement location, the setting does not extend to the draft Order Limits.

- 3.3.1022 The Grade II listed 'Prospect House' (**1262690**) is located on the south-western flank of Ipswich Road, c. 700 m south-east of Offton, and c. 90 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the mid-18th century,

has 19th century alterations and comprises a painted red brick structure with a plain tiled roof.

- 3.3.1023 The setting of the asset is informed by its roadside location and by its relationship with the neighbouring, non-designated post medieval buildings flanking Ipswich Road to the south-east, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship, although the former chalk pit and lime kiln recorded on OS mapping to the north-east has gone and been replaced by a small copse. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.1024 The Grade II listed 'Maltings House' (**1251596**) is located at the junction of Ipswich Road and Elmsett Road, c. 970 m south-east of Offton, and c. 150 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The asset, formally a farmhouse, is of probable 17th century date, was extended in the 19th century and comprises a plastered timber frame structure with a plain tiled roof. Located within the former farm complex is an extant 1830's timber framed outbuilding (**2429**). This building has group value with the house and has historical and evidential value.
- 3.3.1025 The setting of the asset is informed by its roadside location and by its relationship with the listed and non-designated buildings, which positively contribute to the character of the small hamlet arranged around the road junction and several of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.1026 The Grade II listed 'The Mutton' (**1251597**) is located on the north-eastern flank of Ipswich Road 70 m south-east of the road's junction with Elmsett Road, c. 1.1 km south-east of Offton, and c. 135 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former public house, The Shoulder of Mutton, dates to the early 18th century, has later 18th and 19th century alterations, and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.1027 The setting of the asset is informed by its roadside location and by its relationship with the listed and non-designated buildings, which positively contribute to the character of the small hamlet arranged around the road junction and several of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.1028 The Grade II listed 'Offton Place' (**1262691**) is located on the south-western flank of Ipswich Road c. 1.3 km south-east of Offton, and c. 160 m north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse was built around 1800 for the Kersey family and comprises a red brick structure with a plain tiled roof. The asset forms part of a historical farmstead known as Offton Place. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2466**). The farmstead has historical and evidential value.

- 3.3.1029 The setting of the asset is informed by its roadside location and by its relationship with the non-designated buildings, which positively contribute to the character of the small hamlet arranged in which it located. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and former functional relationships. Several of the neighbouring buildings are recorded on the first edition OS map of 1885, but there has been some later 20th residential development, although this is sympathetic and in keeping with the local architectural vernacular. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.

### Nettlestead CP

- 3.3.1030 The Grade II\* listed 'High Hall' (**1250944**) is located in the High Hall Farm complex, c. 920 m north-north-west of Nettlestead, and c. 1.7 km north-east of the draft Order Limits. The asset is of **high value** based on its designation and its evidential, historical and aesthetic values. A large proportion of the house was probably built around 1620-30 for William Foorth around a fragmentary 16th century core, has alteration made around 1930 by H. Munroe Cautley, and comprises a red brick structure in English bond with a plain tiled roof.
- 3.3.1031 The setting of the asset is informed by its location within its large formal garden and by its relationship with the non-designated buildings of the High Hall Farm complex, several of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and non-designated farm buildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and it being restricted to its farmyard location and the surrounding landscape, the setting does not extend to the draft Order Limits.
- 3.3.1032 The Grade II listed 'Nettlestead Chace' (**1251559**) is located at the south-east extent of Nettlestead and c. 1.3 km north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house, formally known as Nettlestead Hall, was virtually rebuilt around 1813-1819 for L. H. Moore, but retaining and remodelling a small fragment of the mansion of Thomas, 2nd Lord Wentworth (1523-1583) that had stood on the site. The 19th century structure comprises painted brick whilst the 16th century elements of plastered timber frame. The roofs are slated and of plain tile.
- 3.3.1033 The setting of the asset is informed by its location within its grounds, by its relationship with the Grade I medieval Church of St Mary to the north and with its non-designated outbuildings and buildings of Nettlestead which contribute positively to the character of the settlement. The setting is further informed by the surrounding agricultural landscape, with which the asset has a historical relationship. The grounds of the asset contain scattered trees, lawns, a pond and are defined largely by tree belts affording the asset privacy and seclusion. The setting of the asset, therefore, makes a considerable contribution to its value, but due to it being restricted to its grounds and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.1034 The Grade II\* listed 'Tudor Grange' (**1263029**) and the Grade II listed assets 'Dairy and Bakehouse Range Immediately South of Tudor Grange' (**1250947**) and 'Barn 20 Metres West of Tudor Grange' (**1251581**) are located on the northern flank of Ipswich Road at the north-western extent of Somersham, and c. 710 m north of the draft Order Limits. The Grade II\*asset is of **high value** and the Grade II assets are of **medium value** based on their designations and their evidential, historical and

aesthetic values. The Grange is a mid-16th century farmhouse with early 17th century alterations and comprises a partly brick partly plastered timber frame structure with plain tiled roofs. The dairy and bakehouse were built around 1600 and comprises a timber-frame structure infilled along the front (south) with probable late 19th to early 20th century herringbone bricknogging, and plastered wattle-and-daub infill panels to the rear (north). The barn and stable dates to the early 17th century and comprises a six-bay structure with a two-bay stable with a hayloft above to the south. The asset is a timber frame structure partly weatherboarded, partly wattle-and-daub infill with a corrugated iron roof.

- 3.3.1035 The setting of the assets is shared and informed by their working farm location, by their interrelationships and by their relationships with the non-designated outbuildings of the farming complex. The setting is further informed by the surrounding agricultural landscape, with which the assets and outbuildings have historical and ongoing functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, but due to it being restricted to the working farmyard and the surrounding landscape, the setting does not extend to the draft Order Limits.

### Somersham CP

- 3.3.1036 The Grade II listed 'Hill Farmhouse' (**1251696**) is located at the northern limit of unnamed road, c. 2 km west of Somersham, and c. 240 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to around 1600, was extended in the early 19th century and comprises a timber frame structure encased in 19th century red brick. The farmhouse forms part of a historical farmstead known as Hill Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2472**). The farmstead has historical and evidential value.
- 3.3.1037 The setting of the farmhouse is informed by its working farmyard location and by its relationship with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.1038 The Grade II listed 'Grove Farmhouse' (**1262693**) is located on the southern flank of Offton Road, c. 1.5 km west of Somersham, and c. 15 m south of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 16th century, was altered in the 19th century and comprises a plastered timber frame structure with a pantiled roof. The farmhouse forms part of a historical farmstead known as Grove Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2473**). The farmstead has historical and evidential value.
- 3.3.1039 The setting of the farmhouse is informed by its working farmyard location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.1040 The Grade II listed 'Church Farmhouse' (**1262694**) is located on the southern edge of Somersham, c. 120 m south of the Grade I medieval Church of St Mary and c. 660 m

north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the 17th century, has 18th and late 19th century alterations and comprises largely a plastered timber frame structure with a painted brick 19th century addition and pantiled roofs.

- 3.3.1041 The setting of the asset is informed by its working farmyard location by its relationships with the medieval church and with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1885. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is restricted to the working farm and the surrounding landscape, the setting does not extend to the draft Order Limits.
- 3.3.1042 The Grade II listed assets 'Gunn's Farmhouse' (**1262659**) and 'Barn 20 Metres South West Of Gunn's Farmhouse' (**1251600**) are located on the north-western flank of Offton Road, c. 2 km west-south-west of Somersham, and immediately north-west of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The farmhouse is of late 16th or early 17th century date and comprises a plastered timber frame structure with a plain tiled roof. The barn appears to have been demolished and replaced by a modern building in the later 20th century. The assets form part of a historical farmstead known as Gunn Farm or Caleygreen Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2476**). The farmstead has historical and evidential value.
- 3.3.1043 The setting of the farmhouse is informed by its working farmyard/livery location and by its relationship with its outbuildings, although these appear to be 20th century buildings. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and ongoing functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.1044 The Grade II listed 'Bleak Hall' (**1251669**) is located on the western flank of Blood Hill, c. 1.1 km south-west of Somersham, immediately west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house was built in three stages in the 16th century, around 1600 and in the 18th century. It comprises a plastered timber frame structure with a plain tiled roof. The Hall forms part of a historical farmstead known as Bleak Hall. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2474**). The farmstead has historical and evidential value.
- 3.3.1045 The setting of the Hall is informed by its isolated roadside location and by its relationship with its outbuildings, one of which (a barn) is recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.

#### Little Blakenham CP

- 3.3.1046 The Grade II listed 'Elm Farmhouse' (**1251403**) is located on the southern flank of Somersham Road, c. 780 m west of Little Blakenham and c. 1.45 km north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its

evidential, historical and aesthetic values. The farmhouse dates to the early 17th century and comprises a plastered timber frame structure with a plain tiled roof.

- 3.3.1047 The setting of the asset is informed by its roadside location in a working stables complex. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and functional relationships. The stable buildings associated with the asset appear to have replaced the farming complex recorded on 19th and 20th century OS mapping, although some 20th century barns survive to the east. The setting of the asset, therefore, makes a moderate contribution to its value, but due to overall distance and it being restricted to the farmyard and immediate landscape, the setting does not extend to the draft Order Limits. The setting of the asset, therefore, makes a moderate contribution to its value, but due to overall distance and it being restricted to the farmyard and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.1048 The Grade II listed 'Rose Cottage' (**1250943**) is located on the southern flank of Somersham Road, c. 980 m west-south-west of Little Blakenham and c. 1.15 km north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The house dates to the mid-to-late 16th century and comprises a plastered timber frame structure with a slated roof.
- 3.3.1049 The setting of the asset is informed by its isolated roadside location and by its relationship with a complex of outbuildings, which based on cartographic evidence, developed in the latter half of the 20th century. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have a historical relationship. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and it being restricted to its roadside location and immediate landscape, the setting does not extend to the draft Order Limits.

### Flowton CP

- 3.3.1050 The Grade II listed 'Lovetofts Farmhouse' (**1250929**) is located off the western flank of High Street in Flowton, and c. 460 m south-west of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to around 1600, has 19th and mid-20th century alterations and comprises a plastered timber frame structure with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Lovetofts Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2450**). The farmstead has historical and evidential value.
- 3.3.1051 The setting of the asset is informed by its gardens and grounds and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1886. The setting is further informed by the asset's relationship with the non-designated post medieval buildings flanking High Street to the south and including the Grove Farm complex, which is identified as Flowtongrove on the 1886 map. The surrounding agricultural landscape, with which the asset and its outbuildings have historical and functional relationships, also contributes positively to the setting. The setting of the asset, therefore, makes a considerable contribution to its value, but due to screening by the mature vegetation of the asset's grounds, the setting does not extend to the draft Order Limits.
- 3.3.1052 The Grade II listed 'Valley Farmhouse' (**1251241**) is located at the northern extent of a private road c. 80 m north of Flowton Road, c.590 m west-north-west of Flowton and c. 860 m south of the draft Order Limits. The asset is of **medium value** based on

its designation and its evidential, historical and aesthetic values. The farmhouse dates to the late 16th and 17th centuries, has an extension dating to around 1800 and comprises a plastered timber frame structure with a plain tiled roof.

- 3.3.1053 The setting of the asset is informed by its farmyard location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but due to overall distance and it being restricted to the farmyard location and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.1054 The Grade II listed assets 'Gates Farmhouse' (**1262861**) and 'Granary 5 Metres West of Gates Farmhouse' (**1250930**) are located on the north-western flank of Flowton Road c. 640 m south-west of Flowton and c. 1.5 km south-south-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the early 17th century, was extended in the 18th and mid-19th centuries and comprises a plastered timber frame structure with a plain tiled roof. The granary dates to the 19th century and comprises a weatherboarded timber frame structure on brick piers with a slated pyramid roof.
- 3.3.1055 The setting of the assets is shared and informed by their roadside garden location, by their interrelationship and their relationships the non-designated outbuildings of the farm, some of which are recorded on the first edition OS map of 1886. The setting is further informed by the surrounding agricultural landscape, with which the assets have historical and ongoing functional relationships. The setting of the assets, therefore, makes a considerable contribution to their values, but due to overall distance and it being restricted to the farm complex and immediate landscape, the setting does not extend to the draft Order Limits.

### Bramford CP

- 3.3.1056 The Grade II listed 'Tye Farmhouse' (**1263018**) is located on the south-eastern flank of Tye Lane, c. 2.5 km west-north-west of Bramford, and c. 590 m east-north-east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse dates to the late 17th century, but may have a 16th century core, and comprises a roughcast timber frame structure with a plain tiled roof.
- 3.3.1057 The setting of the asset is informed by its garden location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset has historical and former functional relationships. A barn to the south-west has been developed as a residential dwelling and associated property boundaries have separated it and another outbuilding from the farmhouse. The setting of the asset, therefore, makes a moderate contribution to its value, but as it is restricted to its garden location and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.1058 The Grade II listed assets 'Rutters Farmhouse' (**1251604**) and 'Outhouse Approximately 8 Metres West of Rutters Farmhouse' (**1262551**) are located immediately west of the junction of the B1113 and Somersham Road at the northern limit of Bramford and c. 1.7 km north-east of the draft Order Limits. The assets are of **medium value** based on their designations and their evidential, historical and aesthetic values. The former farmhouse dates to the early 17th century and

comprises a rendered timber frame structure with a plain tiled roof. The outhouse is a 19th century red brick bakehouse or washhouse with a pantile roof and is included for group value.

- 3.3.1059 The setting of the assets is shared and informed by their interrelationship and their relationships with a non-designated former barn immediately to the north, and which appears to be the only surviving element of the large farming complex recorded on the first edition OS map of 1884. The setting is further informed by the local agricultural landscape, with which the assets have historical and former functional relationships, although this link has been eroded by the expansion of Bramford to the south and east and by the development of a large horticultural supplies yard to the north. The setting of the asset, therefore, makes a minor contribution to its value, but due to overall distance and it being restricted to the assets' grounds and immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.1060 The Grade II listed 'Bullenhall Farmhouse' (**1033263**) is located at the northern limit of a private road c. 450 m north of Bullen Lane, c. 1.8 km west of Bamford and c. 100 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to around 1600 and comprises a roughcast timber frame structure with a plain tiled roof. The farmhouse forms part of a historical farmstead known as Bullenhall Farm. The Suffolk HER has recognised the farmstead complex as a non-designated heritage asset (**2436**). The farmstead has historical and evidential value.
- 3.3.1061 The setting of the farmhouse is informed by its relationships with its non-designated outbuilding several of which are recorded on the first edition OS map of 1884 and also include a cluster of later 20th century barns to the south. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and functional relationships. The grounds of the asset are defined by a tree belt and mature tree lined hedgerows, which affords the asset and its post medieval outbuildings privacy and seclusion, although existing pylons lie c. 100 m to the north-west. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.1062 'Fidgeons Farmhouse' (**1293253**) is located at the southern limit of an unnamed track c. 160 m south of Bullen Lane, c. 830 m west of Bamford, and c. 800 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse dates to the early or mid-17th century, has 19th and 20th century alterations and comprises a plastered timber frame structure with a plain tiled roof.
- 3.3.1063 The setting of the asset is informed by its farmyard location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and outbuildings have historical and functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, but as it is restricted to the farmyard and the immediate landscape, the setting does not extend to the draft Order Limits.
- 3.3.1064 The Grade II listed 'Thornbush Hall' (**1251603**) is located at the western extent of Thornbush Lane, c. 750 m south-west of Bramford, and c. 15 m north of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The farmhouse was built in the 17th century in several phases and a large addition was built in the late 19th century. The 17th century element of the asset comprises a timber frame structure with a south

facing front façade of 18th century red brick, which is elsewhere rendered. The 19th century wing is constructed of red brick, whilst the roofs are of plain and concrete tiles.

- 3.3.1065 The setting of the asset is informed by its farmyard location and by its relationship with its non-designated outbuildings, some of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and functional relationships. The setting of the asset, therefore, makes a considerable contribution to its value, and due to the proximity of the Project, the setting extends to the draft Order Limits.
- 3.3.1066 The Grade II listed 'The Grindle House' (**1372456**) is located at the western limit of The Grindle (road), c. 1.1 km south-south-west of Bramford, and c. 210 m east of the draft Order Limits. The asset is of **medium value** based on its designation and its evidential, historical and aesthetic values. The former farmhouse was built in the early mid-17th, possibly around an earlier core, it was altered around 1980 and comprises a roughcast timber frame structure with a plain tiled roof.
- 3.3.1067 The setting of the asset is informed by its former farmyard location and by its relationships with its non-designated outbuildings, most of which are recorded on the first edition OS map of 1884. The setting is further informed by the surrounding agricultural landscape, with which the asset and its outbuildings have historical and former functional relationships. The asset and its outbuildings are still coherent as a former farming complex, and so the setting of the asset makes a considerable contribution to its value, but as it is restricted to the former farmyard and the immediate landscape, the setting does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.3.1068 The PAS reports a **low value** incomplete cast copper-alloy hooked tag of post medieval date (**2416**) being found in the Willisham area outside the draft Order Limits. The asset has evidential and historical value.
- 3.3.1069 Located on the edge of the draft Order Limits, approximately 900 m to the north-west of the village of Willisham, is the site of a now demolished **low value** unnamed farm (**2504**). The farm is recorded on the first edition OS map of 1885 immediately to the east of Tye farm (**2485**) which is still extant. It is not clear if this and the non-extant farm were punctually related. The site of the former farm holds evidential value.
- 3.3.1070 Located just within the draft Order Limits, and approximately 170 m north of the village of Offton, is a non-extant farm known as Well Farm (**2526**). The farm was constructed in the 19th century and appeared on the first edition OS map. The asset has historical and evidential value, overall, it is of **low value**.
- 3.3.1071 The non-extant Gowing's Barn (**2465**) is located within the draft Order Limits and approximately 400 m to the south-west of Offton. The barn was constructed in the 19th century and appears on the first edition OS map 1885. It is depicted as 'L' shaped with a yard area. The asset has historical and evidential value, overall, it is of **negligible value**.
- 3.3.1072 To the west of the draft Order Limits, by approximately 170 m and to the west of Offton by approximately 1 km, is Shorten's Farm (**2527**). The farm was established in the 19th century and appears on the first edition OS map 1885. The farm complex is now non-extant and only the farmhouse survives. The asset has historical and evidential value, overall, it is of **low value**.

- 3.3.1073 Along Ipswich Road, approximately 750 m south-east of Offton and c. 160 m east of the draft Order Limits is the 19th century farmstead Rook Hill Farm (**2408**). It is a L-shaped layout, including a farmhouse and agricultural buildings. The complex is part of a hamlet and has detached elements. Adjacent to this asset by the north is a remaining lime kiln (**2406**), along with an adjacent chalk pit. It is located c. 120 m east of the draft Order Limits. Further east are archaeological discoveries at Rook Hill Farm, particularly in a place called 'Fields 3 & 3a' (**2405**) and 'Field 2' (**2401**). They unveil a background scatter of medieval and post medieval metalwork including a range of items such as Tudor buckles and button, 17th century trade token, crotal bell, toy gun; Tudor button; an unidentified (medieval/ post medieval) silver coin; a 18th century seal matrix and an Admiral Vernon sea. These discoveries provide valuable insights into the historical activities in the area. All these assets hold evidential and historical value and the farmstead has also aesthetic value. They are all of **medium value**.
- 3.3.1074 The PAS reports a silver post medieval thimble (**2537**) being found in the Offton area and outside the draft Order Limits. It has an evidential and historical value but is of **low value**.
- 3.3.1075 The remaining lime kiln at the Rook Hill Farm in Offton (**2406**), along with an adjacent chalk pit, hold historical value.
- 3.3.1076 Within the draft Order Limits is the **low value** post medieval bridge shown on Hodkinson's 1783 map (**2409**). It has evidential and historical value.
- 3.3.1077 Within the draft Order Limits, c. 740 m south-west of Somersham is a small earthenware pot (**2536**), about 75 mm high with a brown-black sandy fabric and granitic inclusions. Its use could be as an inkwell or paint pot, possibly early 20th-century 'art pottery' or a Spanish/Portuguese import of uncertain, likely post medieval date. It has historical and evidential value and is of **low value**.
- 3.3.1078 The non-extant remains of Mount Sorrowful Farm (**2521**) are located partly within the draft Order Limits, approximately 1.1 km to the south-west of Lower Somersham. The farm was constructed in the 19th century and can be seen on the first edition OS map 1885. The asset has historical and evidential value and is of **low value**.
- 3.3.1079 To the east of the draft Order Limits, by approximately 100 m and approximately 1.3 km to the west of Lower Somersham, is Caley Green Farm (**2522**). The farm was constructed in the 19th century. A comparison between the first edition OS map 1885 and the present Google Earth images shows that the farm has lost several historical buildings. The farm has historical and limited visitorial value, overall it is of **low value**.
- 3.3.1080 The **low value** post medieval artefact scatter of metalwork and coins (**2404**) hold historical value. It is located north-east of Flowton, and c. 200 m of the draft Order Limits.
- 3.3.1081 To the west of the draft Order Limits by approximately 230 m and approximately 340 m north-east of Flowton, is the historical farmstead known as Grove Farm or Flowtongrove (**2528**). The farm was constructed in the 19th century and can be seen on the first edition OS map 1886. Google Earth shows that the many if the agricultural buildings on the map are no longer extant. The exception is the farmhouse and possible one barn. The asset has historical and limited evidential value. Overall, it is of **low value**.
- 3.3.1082 The post medieval boundary ditches (**2496**) located within the draft Order Limits, at the end of Bullen Lane, approximately 2.5 km west of Bramford, have **low value**. Identified through archaeological evaluation, these ditches have a documented

history dating back to at least the 19th century. The asset holds historical and evidential value.

- 3.3.1083 The PAS reports a post medieval cast copper alloy dress fastener with a hexagonal shape and an intricate openwork geometric design at the centre (**2547**) being found in the Bramford area outside the draft Order Limits. It has evidential and historical value but is of **low value**.

Located along the edge of the draft Order Limits, and approximately 1.7 km to the west of Bramford, is Bullen Farm (**2532**). This historical farmstead dates to the 19th century and appears on the first edition OS map 1884. A comparison between this map and Google Earth shows that all of the historical buildings within the farm are now non-extant. The asset still has a farming function (storage), but it does not function as a working farmstead. The asset has historical and limited evidential value and is of **low value**.

## Modern

### Needham Market and Ringshall

#### *Non-Designated Heritage Assets*

- 3.3.1084 Located partly within the draft Order Limits, approximately 190 m north of Barking village, was a type 23 pillbox (**2301**). It is no longer extant. A group of four WWII assets are located between 250 m and 240 m to the south-east of the draft Order Limits and approximately 2 km south-east of Ringshall. The assets (**2300**) comprise: a search light emplacement, a hexagon shaped pill box, a type 22 pill box and a type 23 pill box). All are located within a grassed area known as The Tye. This collection of assets, along with pill box (**2301**), would have defended settlements or important areas within Barking during WWII. All these assets have some historical value and are of **low value**.

### Great Bricett and Bramford

#### *Non-Designated Heritage Assets*

- 3.3.1085 Located partly within the draft Order Limits and approximately 2 km south-west of Bramford village, was Sproughton/Burstall Patrol Auxiliary Unit Operational Base (**2302**). The base originally had two Nissan huts, these were perpendicular to one another and connected by a short passageway. The main hut has a drop down entrance shaft and an emergency exit. The huts are no longer extant. The base has historical value and potentially evidential value. Overall, it is of **low value**.

## Undated

### Wortham, Mellis and Gislingham

#### *Non-Designated Heritage Assets*

- 3.3.1086 Human skeletal remains (**2714**) were recovered during works associated with the A143 Scole-Stuston Bypass in 1993. The asset is of **low value** based on its evidential value. Although the remains are undated, Romano-British and early medieval (Anglo-Saxon) artefacts have been recovered in the vicinity and it is possible the remains date accordingly.
- 3.3.1087 The cropmark of an irregular enclosure with a concave northern side (**2719**) is located north of Mendlesham Road, c. 1.2 km east-south-east of Cotton and c. 80 m

west of the draft Order Limits. The undated enclosure traverses the cropmark of a ring ditch (**2038**) whilst enclosing another (**2039**). The ring ditches are likely the remains of Bronze Age round barrows and reported above, but without further investigation it is not possible to date the enclosure. The asset is of **low value** based on its evidential value.

- 3.3.1088 A **low value** undated PAS find (**2728**) of evidential value was recovered as part of a larger finds assemblage from farmland within the draft Order Limits, east of Gislingham. The artefact comprises an apparently complete cast copper alloy unidentified object consisting of a shaft with a rectangular cross-section which is 4 mm wide and 27 mm in length. Both ends of the shaft terminate with knobs that taper towards the terminal end.

### **Finningham, Mendlesham and Old Newton**

#### *Non-Designated Heritage Assets*

- 3.3.1089 An unidentified cropmark (**2720**) is located c. 650 m north-east of Gislingham and c. 30 m north-east of the draft Order Limits. No further details are held by the HER. The asset is of **low value** based on its evidential value.

### **Middlewood Green and Stowmarket**

#### *Non-Designated Heritage Assets*

- 3.3.1090 The cropmarks of a series of drainage ditches and field boundaries (**2722**) are located on the northern flank of the Gipping valley c. 900 m north-north-west of Needham Market and partially within the draft Order Limits. The asset is of **low value** based on its evidential value.
- 3.3.1091 The cropmark of a large pit or area of extraction c. 21 m in diameter (**2723**) is located on the western flank of Mill Lane and adjacent to the eastern flank of the draft Order Limits. The asset is of **low value** based on its evidential value.
- 3.3.1092 The cropmark of a small sub-rectangular enclosure (**2721**) is located immediately south-west of Mill Lane, c. 560 m south-south-east of Creting St Peter and crossed by an draft Order Limits access road. The asset is of **low value** based on its evidential value. The enclosure is approximately 70 m by 60 m and the ditches are approximately 4 m in width.
- 3.3.1093 The cropmarks of parallel ditches, possibly a short section of trackway (**2724**) are located on the northern flank of the Gipping valley c. 1 km north-north-west of Needham Market and partially within the draft Order Limits. The asset is of **low value** based on its evidential value.
- 3.3.1094 The cropmarks of a series of field boundaries and ditches (**2725**) are located c. 1.15 km north-north-west of Needham Market and partially within the draft Order Limits. The asset is of **low value** based on its evidential value.

### **Needham Market and Ringshall**

#### *Non-Designated Heritage Assets*

- 3.3.1095 The cropmark of a curvilinear enclosure (**2700**) is located c. 150 m west of Barking Road in Barking, and c. 120 m east of the draft Order Limits. The asset is of **low value** based on its evidential value. The cropmark is located within the larger Barking Tye medieval green (**2232**) HER monument.

- 3.3.1096 The site of an Ancient Woodland (Great Newton Wood) (**2701**) is located at the south-west extent of an unnamed road, c. 1.8 km west of Needham Market and partially within the draft Order Limits. The asset is of **low value** based on its evidential value. The extent of the woodland has been reduced since it was originally mapped, and the remaining trees are located just outside the draft Order Limits.
- 3.3.1097 The site of an Ancient Woodland (Collage Grove) (**2702**) is located north of the Grade II listed Collage Grove Farmhouse (**1231093**), west of Needham Market and outside the draft Order Limits. Nothing of the woodland survives today. A single sherd of very abraded medieval courseware pottery (**2302**) and two potential horse harness rings (**2302**) were recovered within the woodland, recorded as PAS finds. These add little to the potential date of the woodland. The woodland is of **low value** and the finds are of **negligible value**. All have evidential value, and the woodland has historical value.
- 3.3.1098 The site of an Ancient Woodland (Little Newton Wood) (**2703**) is located either side of an unnamed road c. 1.1 km west of Needham Market and c. 80 m north-east of a draft Order Limits access road. The asset is of **low value** based on its evidential value. The extent of the woodland has been reduced since it was originally mapped.
- 3.3.1099 An Ancient Woodland (Lower Wood) (**2707**) is located c. 770 m west of Barking and adjacent to the western flank of the draft Order Limits. The asset is of **low value** based on its evidential value. The extent of the woodland has been reduced since it was originally mapped.
- 3.3.1100 An Ancient Woodland (Keyfield Groves) (**2708**) is located c. 1.5 km north-west of Needham Market and c. 120 m north-west of the draft Order Limits. The asset is of **low value** based on its evidential value. The extent of the woodland has been reduced since it was originally mapped.
- 3.3.1101 The cropmarks of a possible stretch of four or five curving interrupted ditch sections (**2716**) are located to the south-east of the Keyfield Groves woodland (**2708**) and partially within the draft Order Limits. The asset is of **low value** based on its evidential value.

## Great Bricett and Bramford

### *Non-Designated Heritage Assets*

- 3.3.1102 A cobbled surface in a clay/loam matrix (**2704**) was identified in the garden of 3 St Marys Close, Offton at a depth of 300 mm to 400 mm below the local ground surface. The asset is of **low value** based on its evidential value.
- 3.3.1103 An Ancient Woodland (Middle Wood) (**2705**) is located immediately north of Bildeston Road, c. 250 m north-west of Offton and adjacent to the draft Order Limits to the west and east. The asset is of **low value** based on its evidential value. The woodland exists as mapped at the time of writing.
- 3.3.1104 An Ancient Woodland (Somersham Park) (**2706**) is located c. 290 m north of Flowton and adjacent to the draft Order Limits. The asset is of **low value** based on its evidential value. The woodland exists as mapped at the time of writing.
- 3.3.1105 An Ancient Woodland (Round Wood and Elms Grove) (**2709**) is located c. 2 km south-west of Bramford and partially within the draft Order Limits. The asset is of **low value** based on its evidential value. The woodland exists as mapped at the time of writing.

- 3.3.1106 An Ancient Woodland (Bullen Wood) (**2710**) is located immediately to the east of the National Grid Bramford Substation and entirely within the draft Order Limits. The asset is of **low value** based on its evidential value. The extent of the woodland has been reduced since it was originally mapped, likely due to the construction of the substation.
- 3.3.1107 An Ancient Woodland (Miller's Wood) (**2711**) is located between Tye Lane and Bullen Lane, c. 1.5 km west of Bramford and adjacent to the draft Order Limits along Bullen Lane. The asset is of **low value** based on its evidential value. The woodland exists as mapped at the time of writing.
- 3.3.1108 A pit containing charcoal and clay fragments (**2712**) was identified during an archaeological watching brief on Castle Road, Offton, and 240 m south-west of the draft Order Limits. The asset is of **low value** based on its evidential value.
- 3.3.1109 The cropmark of a poorly defined ring ditch (**2713**) is located c. 780 m north of Flowton, 70 m east of Flowton Road and c. 220 m south-south-west of the draft Order Limits. The ring ditch is around 25 m in diameter and is of **low value** based on its evidential value.
- 3.3.1110 Two areas of Ancient Woodland (**2715**) to the north and south of Bulling Green (**2244**) are located c. 360 m north-north-west of the National Grid Bramford Substation and adjacent to the eastern flank of the draft Order Limits. The asset is of **low value** based on its evidential value. The woodland exists as mapped at the time of writing.
- 3.3.1111 The cropmark of a rectangular cropmark (**2717**) is located c. 800 m west of Barking and partially within the draft Order Limits. The asset is of **low value** based on its evidential value.
- 3.3.1112 The cropmarks of a trackway, a small rectangular enclosure, linear ditches and a possible pit (**2726**) are located c. 970 m south-west of Bramford and largely within the draft Order Limits. The asset is of **low value** based on its evidential value. The trackway is visible for around 200 m, aligned east/west, before turning to the north-east. The small rectangular enclosure measures approximately 23 m by 39 m and is appended to the northern flank of the trackway.
- 3.3.1113 The cropmarks of several ditches (**2727**) are located c. 1.3 km south-west of Bramford, c. 120 m west of cropmarks (**2726**) and entirely within the draft Order Limits. The asset is of **low value** based on its evidential value.

## 3.4 Section C: Babergh District Council, Colchester City Council and Tendring District Council

### Location

- 3.4.1 The northern portion of Section C of the Project is located in the County of Suffolk and within the District Borough Unitary of Babergh. The southern portion of Section C is located in the County of Essex and within both the Unitary District Boroughs of Colchester and Tendring. Section C of the Project begins c. 480 m south of Bullen Lane Substation between Flowton and Burstall, c. 1.5 km west of the outskirts of Ipswich. From its northern limit, Section C heads generally south-south-west, bypassing the settlements of Burstall, Chattisham, Capel St Mary, Raydon, Langham and Ardleigh before arriving at the proposed East Anglia Connection Node (EACN) Substation 2 km east of Ardleigh. From here the Project heads west before Section C

terminates at Old Ipswich Road 5 km to the west. Section C of the Project accounts for approximately 28 km of its overall length.

## Topography

- 3.4.2 At the northern extent of Section C, just south of Bramford Substation between Flowton and Burstall, stands at c. 56 m aOD. From here to the A1071 to the south at 37 m aOD the landscape is gently undulating. Section C crosses the Belstead Brook Valley, a tributary of the Orwell south of the A1071, at c. 16 m aOD, before climbing, and passing through a gently undulating landscape between 40 m and 51 m aOD to the B1068 to the south-south-west. Here, Section C crossed the Stour Valley c. 7 m aOD to the west of Stratford St Mary, before passing through undulating land between 38 m and 45 m aOD on its way to its southern limit at Old Ipswich Road.

## Geology

- 3.4.3 From north to south the solid geology of Section C consists of alternating bands of clay, silt and sand of the Thames Group, and sand of the Red Crag Formation. Clay, sand and silt of the Thanet Formation and Lambeth Group underlies the Stour Valley and then to the south of here to its southern terminus, Section C is once again underlain by clay, silt and sand of the Thames Group.
- 3.4.4 The superficial geology in the northern half of Section C is dominated by glacial till of the Lowestoft Formation. The till has a high chalk and flint content and includes outwash sands, gravels, silts and clays. Variation in this deposit model is seen in the Belstead Brook Valley where mixed bands of sand and gravel of the Lowestoft Formation; sand and gravel of the Kesgrave Catchment Subgroup; diamicton head deposits; and sand and gravel of the Kesgrave Catchment Subgroup are recorded. Glacial till of the Lowestoft Formation lies to the south of Belstead Brook Valley and prevails until just north of the Stour Valley. The superficial river valley deposits comprise mixed bands of diamicton head deposits; sand and gravel of the Lowestoft Formation; sand and gravels of the Kesgrave Catchment Subgroup; gravel head deposits; sand and gravel of River Terrace Deposit; and alluvial clay and silt. The superficial valley deposits give way, just to the south of Lamb Corner, to clay, silt and sand of Cover Sand Formation with bands of sand and gravel of the Kesgrave Catchment Subgroup extending to the southern limit of Section C.

## Historic Landscape Characterisation

- 3.4.5 Section C of the Project is located in two National Character Areas; National Character Area 86: South Suffolk and North Essex Claylands and National Character Area 111: Northern Thames Basin. National Character Area 86 is characterised by a high, boulder clay central plateau dissected by small-scale undulating river valley topography. National Character Area 111 is characterised by the suburbs of North London, historic towns and cities and in the area of the Project, by moderately dispersed settlements, arable land and river valleys. (Natural England accessed 29/03/2023).
- 3.4.6 The Suffolk landscape through which the draft Order Limits passes is further divided into Landscape Character Types (LCT) as defined by Suffolk County Council (<https://suffolklandscape.org.uk/> - Accessed 29/03/2023). From the Norfolk/Suffolk border immediately south to Stratford St Mary, the draft Order Limits passes through Ancient Plateau Claylands (LCT 3) before the Rolling Valley Farmlands (LCT 18) of the Belstead Brook Valley. The draft Order Limits then passes through Ancient

Estate Claylands (LCT 1) and Plateau Farmlands (LCT 12) before its crossing of the Stour Valley with bands of Rolling Valley Farmlands (LCT 18) to the north and south of LCT Valley Meadowlands (LCT 26 in the valley bottom).

- 3.4.7 South of the Stour Valley, the draft Order Limits passes into Essex. The Essex landscape of the Northern Thames Basin (NCA 111) has been further divided, by District, into Historic Environment Character Zones (HECZ) as defined in Section C by the Colchester Borough Historic Environment Characterisation Project (CBC/ECC, 2009) and the Tendring District Historic Environment Characterisation Project (TDC/ECC, 2008).
- 3.4.8 The first HECZ through which the draft Order Limits passes is HECZ 1.3: Stour Valley around Langham in the District of Colchester. This area is open and flat within the floodplain of the River Stour and the lower slopes of the Stour Valley. Fields are generally meadow defined by straight and sinuous drainage ditches, although there has been moderate to high 20th century boundary loss. The archaeological character of the zone is dominated by a number of multi-period cropmark complexes.
- 3.4.9 Heading south, the next zone is HECZ 1.4: Langham, which comprises a sloping valley side landscape above the floodplain of the Stour. The field scape includes 18th and 19th century enclosure, enclosed meadow pasture along the Black Brook and, elsewhere in the zone, comprises irregular enclosure, which is likely to be ancient, probably Medieval, in origin. There has been moderate to high field boundary loss within the zone. The archaeology of the zone is dominated by a number of multi-period cropmark complexes that the draft Order Limits passes through. Stray finds of archaeological material from across the zone include a Prehistoric jadeite axe and Neolithic or Bronze Age arrowheads, cores and flakes, Beaker pottery and Roman coins and tile.
- 3.4.10 The next zone HECZ 3.4: Boxted Airfield area, which is located in the District of Colchester, comprises the former extent of the World War II Boxted Airfield. The zone lies on the top of a plateau, bounded by the valley slopes of the Black Brook to the north and the A12 and the valley of the Salary Brook to the south. Many Neolithic axes and other implements have been found within the zone, particularly around Park Lane Farm c. 2 km west of the draft Order Limits. Cropmarks indicative of Bronze Age, Iron Age and Romano-British settlement are also noted in the zone.
- 3.4.11 The Order Limit then passes through a short section of HECZ 12.2: Ardleigh in the District of Tendring (see below) before crossing in to HECZ 12.4: Foxash Estate also in Tendring. The Foxash Estate Zone was largely developed for horticultural purposes in the 20th century and the fieldscape comprised a mixture of regular and irregular fields. Cropmarks are noted sporadically throughout the zone and consist mainly of linear features, enclosures and ring-ditches. There is the potential for the survival of deposits associated with the medieval and post medieval dispersed settlement pattern.
- 3.4.12 The next zone is HECZ 13.2: Bradfield Heath, which includes the EACN Substation 2 km east of Ardleigh. The area was heathland in the medieval and early post medieval period, but it is now largely under arable and some pastoral agriculture. The current fieldscape comprises a mixture of later enclosure by agreement and irregular fields of ancient origin with moderate boundary loss post the 1950s. The zone has a high density of cropmarks indicating the area that has long been the subject of human occupation and activity and there is potential for multi-period archaeological deposits.
- 3.4.13 The draft Order Limits then pass through a second short section of HECZ 12.2: Ardleigh (see below) before entering the northernmost part of HECZ 12.1: Ardleigh

Cropmark Complex. Zone 12.1 The fieldscape is one of historic rectilinear field patterning of possible ancient origin, however, there has been considerable field boundary loss across the zone. The zone includes the nationally important Scheduled 'Crop mark site S of Ardleigh' (1002146) where excavations have revealed a remarkable multi-period archaeological site comprising of a Bronze Age cemetery; an enclosed roundhouse of middle Iron Age date; late Iron Age burials; and evidence for Romano-British settlement including a short-lived defended phase. Kilns and wasters illustrate contemporary pottery production, and a cemetery of Roman date has also been identified along with later Saxon burials.

- 3.4.14 The draft Order Limits then passes in to HECZ 12.2: Ardleigh for a third and final time and the last zone of Section C. Zone 12.2 The zone has a dispersed Medieval settlement pattern of individual farmsteads and halls within a fieldscape that has suffered considerable boundary loss. Largely surrounding the Scheduled Ardleigh Cropmark complex, this zone contains a further range of cropmarks especially in the area around Ardleigh reservoir with several large enclosures being apparent. Further but less concentrated cropmarks are spread throughout the rest of the zone and are likely to represent a range of periods. The Roman road from Colchester to a possible port at Mistley, now the A12, forms the eastern boundary of the zone.
- 3.4.15 The landscape of Essex is broken down further into smaller parcels described as Historic Landscape Character Types and defined in The Historic Landscape Characterisation Report for Essex, Volume 2 (Bennet 2011). The HLC Type data has been supplied by the Essex HER and analysis of it has shown that, in Section 3, the Construction Zone passes through a landscape largely defined by low value 20th century enclosure and areas of post 1950s boundary loss. Also included within the bounds of the Construction Zone in Section C are dispersed parcels of low value 18th to 20th century woodland plantation, built-up areas - urban development, nursery with glass houses, water reservoirs and orchards. There are also medium value parcels of built-up areas - urban development based on their association with listed buildings at Church Farm, the Rectory, Glebe Farm, Malting Farm, Fountains Farm, and Bluebarns Farm.
- 3.4.16 Elsewhere within the Construction Zone in Section C there are parcels of:
- 3.4.17 Common Pre-18th Century Irregular Enclosure which accounts for 17.69% of the Essex landscape (Bennet 2011). These are irregular enclosures vary considerably in size and shape, forming both arable and pasture with sinuous edges and offset corners. They are probably the result of piecemeal enclosure and may originate from the medieval period or earlier.
- 3.4.18 Occasional Piecemeal Enclosure by Agreement which accounts for approximately 8.97% of the Essex landscape (Bennet 2011). These fields were created to subdivide a pre-existing earlier field system and are characterised by straighter boundaries. Dating of origin is difficult but they usually predate the introduction of the later formal Parliamentary Enclosure Acts, and thus may relate in certain parishes to the earlier acts of enclosure.
- 3.4.19 Rare Enclosed Meadow which accounts for 1.69% of the Essex landscape (Bennet 2011). These are sinuous fields that border rivers, often forming part of the flood plain of the river. Many of these areas were established in medieval times.
- 3.4.20 Rare areas of Boundary Loss – with relict elements which account for 2.07% of the Essex landscape (Bennet 2011). These represent field boundary loss since the 1950s due to mechanisation and changes in agricultural practices. This may range from the loss of a single boundary merging two fields into one, or many field

boundaries being removed to form a single field. The resultant field is a hybrid and palimpsest, with edges that may have several periods of origin. The surviving edges of these fields are of historic importance.

- 3.4.21 Very rare Formal style Parliamentary Enclosure which accounts for 0.98% of the Essex landscape (Bennet 2011). Formal style Parliamentary Enclosure is a rigorous rectilinear field system, often with contemporary roads and trackways, that has overwritten any prior landscape enclosure pattern, usually either prior common arable field, or former heathlands, or wastes, associated with the later Parliamentary Enclosure Acts.

## Conservation Areas

- 3.4.22 There are six conservation areas within Section C. These are discussed north to south. They comprise: Lawford (**CA25**), Ardleigh (**CA26**), Higham (**CA40**), Stratford St Mary (**CA41**), Chantry Park (**CA42**) and Dedham (**CA7**).
- 3.4.23 Chantry Park (**CA42**), also a Grade II listed park and garden (**1000271**), is located c. 1.3 km to the east of an arm of the draft Order Limits. Chantry Park was once grazing land prior to the 16th century. It then became the home of Edmund Daundy, a local merchant and Portman. He claimed the land was his 'Chantry'. The park contains three Grade II listed buildings (all scoped out of this DBA), The Chantry (mansion), the Hadleigh Road Entrance Gates and the North Lodge. The park was designated for its historical and aesthetic values, due to this is of **medium value**.
- 3.4.24 Chantry Park and mansion, seen today, is primarily the product of two periods of development. The late 18th to early 19th century landscaped park is attributed to the Russell/Collinson family and the mid-19th century remodelling by Sir Fitzroy Kelly (Ipswich Borough Council, n.d CAA and management plan). Chantry Park has a long history of prominent owners, which adds to its historical value, such as Michael Collinson, noted naturalist; Sir Fitzroy Kelly, Baron of the Exchequer; and Charles Collinson, High Sheriff for the county of Suffolk. It also has several famous garden designers such as William Andrews Nesfield, considered to be one of Victorian Britain's most important landscape architects, who designed the parterre and knot gardens. The park and house ceased to be private in 1928 when it was gifted to Ipswich town as a public park and was officially opened by HRH Princess Mary. Later the mansion served as an International Friendship Centre between WWI and WWII. During WWII the mansion was used as temporary housing during the Blitz and after the war it was used as convalescent home for service men by the Red Cross. Today the mansion is used as a care home by Sue Ryder Foundation (Ipswich Borough Council, n.d).
- 3.4.25 The Park has communal value as it plays host to several social and cultural events such as band concerts and nursery open days. At present the park contains several communal sports facilities such as tennis courts, football pitches, cricket pitches and bowling greens (Ipswich Borough Council, n.d). It also has communal value due the mansions use as a care home.
- 3.4.26 Key features of the park are the listed buildings, a lake, an 'L' shaped pond or lake, a lily pond with fountain, walled gardens, the pleasure grounds and pleasant rolling parkland. The western part of the park is designated as a County Wildlife Site. The formal gardens laid out around the mansion are within the Italianate style, as is The Chantry (Ipswich Borough Council, n.d).
- 3.4.27 The park lies on the western side of Ipswich on the outer edges of the towns suburbs, on the southern side of the Gipping Valley (HE, n.d. Chantry Park, Non Civil

Parish - 1000271 | Historic England). It is bound to the north by Hadleigh Road, also its main entrance, and the A1214 to the south, to the east is a new housing estate and to the west are open agricultural fields. The mansion sits on gently undulating parkland which slopes down to the north, west and east. This topography allows views from the west over the Gipping valley to the north and over countryside to the west. There are also filtered views east over the park from the South Avenue towards Ipswich (HE, n.d). Due to the urban sprawl the historical and present setting of the park differs and detracts from the significance of the asset. Overall the setting of the asset makes a minor contribution to its value. The setting of the park does not extend into the draft Order Limits due to distance.

- 3.4.28 Located c.400 m to the west of the draft Order Limits is Higham (**CA40**). The quiet little village is positioned 3.1 km to the west of East Bergholt. It is of **medium value** due to its historical and aesthetic values which lie with the characterful buildings and pleasing location within this part of Babergh.
- 3.4.29 The date of the creation of this village is not known. Non-designated heritage assets hints at undated and uncharacterised cropmarks to the east of the settlement. These could potentially be pre medieval occupation remains of Higham (Babergh District Council, 2009 adopted 2010, CAA). The Domesday Book of 1086 lists four buildings (at least one or maybe two churches (this is quite unusual given the size of the village) and a mill within Higham and four manors (Babergh District Council, 2009 adopted 2010). This indicates that the areas was wealthy enough for several manor houses but the village was small.
- 3.4.30 Within the boundaries of Higham conservation area there are 10 listed buildings, of which eight are scoped into this DBA. These include: The Old Cottage (**1036961**), Walnut Tree Cottage (**1036962**), The Old Post Office (**1036964**), White Oak and Dysart (**1036965**), Byways (**1051964**), Meadow View, Gabel End and Adjoining Cottage (**1193163**), The Old Guildhall (**1351626**) and Barhams Manor (**1366100**), all Grade II listed. The majority of the building within Higham have historical character and value due to their good retention of original or historical building materials, fixtures and fittings. These include timber framing, thatched or tiles roofs, rendered walls (some are brightly coloured) or weatherboard cladding (Babergh District Council, 2009 adopted 2010). Those at the western end of the conservation area are older with a local vernacular style whilst those at the eastern end tend to be more Georgian in age and style. Victorian building can be found throughout the conservation area. These are characterised by their use of red brick and slate roofs.
- 3.4.31 Higham lies on the east bank of the River Brent. The village was built on the alluvial deposits from this river which were deposited in the Ice Ages (Babergh District Council, 2009 adopted 2010). The river forms the western boundary of the conservation area. It was made navigable in 1709, then known as the Soar Navigation. It took barge traffic from Mistley to Sudbury (Babergh District Council, 2009 adopted 2010). Other important transportation within the area includes the Ipswich to Stratford turnpike road (now the A12) which passed within a mile south of the village. The modernisation of this road has had a negative effect of the quiet rural feeling of the village with the introduction of more traffic (Babergh District Council, 2009 adopted 2010).
- 3.4.32 The conservation area straddles the Lower Street (B1086) to the west and Higham Road as it curves to the east and south, where it slopes down. The curving nature of the roads do not allow for many views along them. However, there are excellent views around a large triangular village green within the central eastern areas of the conservation area (Babergh District Council, 2009 adopted 2010). This is also on a

higher piece of ground compared to the west. The buildings surrounding this space have excellent intervisibility with one another despite the intrusion of a large tree within the triangular area. The eastern part of the conservation area has pavement lining the roads, but this is absent at the western end. The road here is a bit congested with parked cars which makes walking and driving along this part of Higham awkward.

- 3.4.33 Higham is set within the heart of the Dedham Vale and Stour Valley Area of Outstanding Natural Beauty. The majority of properties in Higham are one plot deep, so that the countryside is immediately to hand at the rear of most properties (Babergh District Council, 2009 adopted 2010). This is a key feature within the conservation area. The quiet rural countryside cannot be seen from the centre of the conservation area due to topography the curving roads which are lined with well-established vegetation, but the surrounding rural landscape is visible at the north and south ends, as well as to the rear of the properties within Higham. This landscape would also include views to the draft Order Limits in the southern and eastern parts of the Conservation Area. To the south-east of the conservation area, along the Higham Road, are a small collection of characterful and historical buildings, including a Higham Hall and The Old Vicarage (**1036958**, Grade II listed), Higham Hall (**1036957**, Grade II listed) and the Church of St Mary (**1351625**, Grade II\*listed). Although these assets are outside of the conservation area, they have group value with one another. Overall, the setting of the conservation area contributed significantly to its value. Due to distance, topography and intervening well-established vegetation the asset's setting does not extend into the draft Order Limits.
- 3.4.34 Stratford St Mary (**CA41**) is located approximately 140 m to the east of the draft Order Limits and 1.3 km to the south-west of East Bergholt. The conservation area is divided into two by the A12. The main body of the conservation area is to the west with a smaller area to the east. The asset is of **medium value** due to its historical, evidential and aesthetic values.
- 3.4.35 Along the western side of the conservation area is the River Stour. It was made navigable in 1709, then known as the Soar Navigation. It took barge traffic from Mistley to Sudbury (Babergh District Council, 2007 adopted 2008, CAA). A disused lock to the west of Stratford St Mary is a remnant of this waterway which went out of use in 1928 (3194). Another historical extant transportation route is located on the western side of the village. The Ipswich to Stratford turnpike road, modern day The Street, passes through the western side of the village. The turnpike road once met its counterpart in Essex, Gun Hill/Stratford Road, at a toll house on the Essex side on a bridge. Both the toll house and bridge are now gone (Babergh District Council, 2007 adopted 2008).
- 3.4.36 The history of Stratford St Mary potentially dates to the pre medieval period. Cropmarks to the south-east of the village include a large number of ring ditches clustered around a 'cursus' type monument (Babergh District Council, 2007 adopted 2008). This indicates a prehistoric, Iron Age or Bronze Age, presence here. Roman finds hint at an occupation site near to the village and remains of a Roman road were found near to the river (Babergh District Council, 2007 adopted 2008) and wooden piles in the river of a possible Roman bridge (3024). Stratford St Mary appears in the Domesday Book of 1086. Here a manor with a mill, as well as the Church of St Mary (**1283820**, Grade I listed) to which the village takes its name. Medieval remains from the 14th century, in the form of tiling, were found within close to the church (Babergh District Council, 2007 adopted 2008), located on the eastern extent of the conservation area. The village during this time was prosperous and was able to maintain a market and fair up until the 17th century. Known post medieval

archaeological remains of a bridge were located over the River Stour (Babergh District Council, 2007 adopted 2008). These were found further upstream from the current bridge along with two non-extant water mills. These all add evidential value to the conservation area and given how close they are to the draft Order Limits it would not be unreasonable that similar archaeological remains could be located within the draft Order Limits, particularly the Roman period.

- 3.4.37 Within Stratford St Mary conservation area are 18 listed buildings scoped into the DBA: Church of St Mary (**1283820**, Grade I listed), Weavers House (**1351601**) and Le Talbooth (**1239265**), both Grade II\* listed. The rest are Grade II: Haywards Cottage (**1239265**), Holly House (**1036992**), Clematis Cottage (**1036993**), Kings Arms (**1036996**), Teazles (**1198535**), Valley House (**1198552**), 9 Lower Street (**1198556**), Bay House (**1198562**), Corner House (**1198570**), Idle Waters, The Island (**1198589**), Gunhill Cottages (**1239277**), The Wilderness (**1239278**), Nelsons Cottage (**1283789**), The Swan Inn (**1351599**) and the Black Horse (**1351600**). These listed buildings are not confined to one area but are spread throughout the conservation area and settlement. The older buildings, not just those that are listed, tend to be rendered timber framed with plain tile roofs which are in the style of the local Suffolk vernacular (Babergh District Council, 2007 adopted 2008). Brick is commonly found as a building material in Stratford St Mary, on both older and more modern builds. There also a few properties with 'Suffolk white' brick which potentially came from nearby Sudbury and was popular in the 19th century (Babergh District Council, 2007 adopted 2008). Overall the conservation area has a mix of old and new buildings with distinctive styles.
- 3.4.38 There are three areas of importance within the conservation area (Babergh District Council, 2007 adopted 2008). One is within the smaller designated area to the east of the A12, where the church, two listed cottages, and several farms are located. the second is at the southern end of the conservation area on the south bank of the river. The third, and main focus of the village, is where Upper Street, Lower Street and The Row meet. Here stands a large, and non-designated, 1930's pump house (Babergh District Council, 2007 adopted 2008). Very much in the style of Art Deco. This building differs greatly not only in style but in function to those surrounding it. A large green is also located here which gives a sense of open space.
- 3.4.39 There are a few important views within the conservation area (Babergh District Council, 2007 adopted 2008). Two are located within the centre of the village where Upper Street meets Lower Street. One looks along Upper Street to the west, the other up Lower Street looking to the north. These views appear to be directed towards the draft Order Limits to the west and south-west which may require visualisations and considerations during an impact assessment, Two other views are at the southern end of the conservation area. One looks north over the bridge and the other south over the bridge (Babergh District Council, 2007 adopted 2008).
- 3.4.40 The village of Stratford St Mary lies on the north-eastern bank of the River Stour, the river forms the county boundary between Suffolk and Essex. The village is located on alluvial deposits from the river that were laid down in since the Ice Ages (Babergh District Council, 2007 adopted 2008). Stratford St Mary is also set within the heart of the Dedham Vale Area of Outstanding Natural Beauty. It is located within a wide valley and is hemmed in by the busy A12 to the east (Babergh District Council, 2007 adopted 2008). This road brings an increase in traffic and noise which interferes with the peaceful village pleasantness. The village is surrounded by countryside, which is more peaceful on its western side. The historical and present setting is similar, despite the intrusion of the A12 to the east. Overall, the setting makes a moderate contribution to the assets value. Due to its close proximity to the draft Order Limits,

and despite the valley's topography, the conservation areas setting extends into the draft Order Limits.

- 3.4.41 To the east of an draft Order Limits temporary attenuation drainage, by approximately 1.5 km, and to the east of draft Order Limits, by c. 1.5 km is Dedham conservation area (**CA7**). There is no conservation area appraisal for this asset. Information was gleaned from the setting survey and internet resources such as the Historic England designated asset descriptions. Dedham is located within the River Sour valley near to the border of Essex and Suffolk. The asset is of medium value and has historical and aesthetic values. The conservation area is comprised of the historic heart of the village within the northern section, the parkland of Lower Park (**1239177**, Grade II listed building) and a public park along with a section of Crown Street to the south.
- 3.4.42 During the early medieval period the Royal Forest of Kingswood or Cestrewald extended into Dedham. As far north as Black Brook, Coopers Lane and East Lanes, just to the south of the conservation area. The Lord of Dedham Hall (presumably located near to the present 16th century Hall, which is Grade II listed, **1273828**), located within the north-west corner of the conservation area, was granted in 1245 to cut timber within the forest. This would suggest that not only was there a manorial hall located in Dedham at this time, but as these Halls were rarely isolated in the landscape, then there would have been a settlement located nearby. Dedham was a cloth working village in the late medieval period and it had developed into a prosperous market town in the 16th century (Dedham: Introduction | British History Online ([british-history.ac.uk](http://british-history.ac.uk))). From the 16th and into the 18th century the natural geology of the area was exploited (gravel, sand and brickearth) which added to the wealth of the area (Dedham: Introduction | British History Online ([british-history.ac.uk](http://british-history.ac.uk))). The village of Dedham was and still is focused along Brook Street. The road curves from the south-west, to east, the turns sharply south until it becomes Crown Street.
- 3.4.43 There are many historically characterful buildings along Brook Street and Crown Street including Georgian and Victorian villas, cottages and terraced houses. There is even a Georgian assembly rooms 'Hewitt Memorial Hall', now used as a village hall (1239344, Grade II listed). All of these properties retain many of their historical fixtures and fittings. Other historical buildings date to the medieval and post medieval period. These tend to have the local vernacular style and painted in the distinct local pink or light cream colours. They these buildings are small cottages with tiled or thatched roofs within the outer part of the conservation area whilst the closer to the centre of Dedham the larger they become. Within the centre of Dedham, focused around the Grade I listed Parish Church of St Mary (1239340), the more historically characterful the buildings become. Some of the buildings have exposed timbers, others jettied first floors and many retain their original shop fronts. These seem to be little altered or sympathetically repaired and maintained. The intrusion by modern housing is not apparent along Brook Street but as it turns southwards to become Crown Street some later housing is apparent.
- 3.4.44 Within the southern part of the conservation area are open fields and grass parkland and within the centre is a public park, The Duchy Fields. These are accessible via The Drift and Essex Way. Along The Drift are a series of terraced two-storey cottages known as Southfield or The Flemish Cottages (1239217, Grade I listed). These seven cottages, maybe some of the oldest houses within the conservation area. They have painted exposed timber frames on their first floors (expect the northern most which have timbers on both floors) and painted light pink rendering on the ground and in between the timbers. The roofs are clad in clay roof tiles. The park

gives a sense of open space and communal value to this part of the conservation area. To the south-west of the park is Lower Park (1239177) Grade II listed building which is set within a park landscape. This is not publicly accessible but still adds to the scene of space in this part of the conservation area.

- 3.4.45 The conservation area is located on lowland and surrounded by agricultural fields. It is within the Dedham Vale Area of Outstanding Natural Beauty. To the south-west and south are a dispersed grouping of farms and small collection of residential buildings. To the north is the River Sour. The landscape is quite and rural in nature. The historical and present landscape setting are not too dissimilar. It even inspired John Constable (1776-1837), arguably one of Britain's most established painters. His landscape paintings have made the Dedham Vale famous. He was even educated at the grammar school in Dedham. He particularly liked to paint the church within the conservation area.
- 3.4.46 There are no views to the Lower Park due to well-established vegetation along the border of the parkland and the road to the west. Despite the curing nature of the main roads within the conservation area they do allow for excellent intervisibility between historical properties especially near to the church and along Brook Street (in the east of the conservation area). Overall, the assets setting makes a considerable contribution to the value of the asset. Due to the distance between the conservation area and the draft Order Limits, the setting of the asset does not extend into the draft Order Limits.
- 3.4.47 Located approximately 1.5 km to the north-east of the draft Order Limits is Lawford conservation area (CA25). The conservation area consists of agricultural fields to the east, part of the settlement of Lawford is located at its southern end and the parkland estate of Lawford Hall (1254131, Grade I listed) forms the north and western side. The conservation area is of medium value due to its historic and aesthetic values.
- 3.4.48 The historic value of the conservation area lies with its development. A map from 1777 shows a grouping of buildings around the Church of St Mary (1261462, Grade I listed) within the centre of the conservation area (Tendering District Council 2006, CAA). The maps shows that the other buildings comprised of a parsonage and a large house (now known as Abbots Manor) and Lawford Hall, located to the north-west. At the southern end of the conservation area few buildings line Wignall Street near to the road junctions of Dedham Road and Hungerdown Lane.
- 3.4.49 The church and Lawford Hall are key buildings within the conservation area. The churches isolated location strongly suggests that it was an estate church, to the Hall (Tendering District Council 2006). However, the present Lawford Hall dates to the 1580-83 and the church is medieval in date, constructed in the 13th century. Presumably the church was used by an earlier Hall. Over the next couple of centuries, the settlement along Wignall Street developed, a few buildings are added, altered and demolished near the church and the grounds and Lawford Hall are added to with new buildings and landscape features i.e., woodland, walled gardens, a new Hall and associated buildings.
- 3.4.50 There three distinct areas of interest within the conservation area, Lawford Hall and farm, the church and buildings near to it and the building along Wignall Street (Tendering District Council 2006). Lawford Hall farm is located within the north-eastern part of the conservation area. It has a collection of red brick building with definitive blue diaper patterns. There are a pair of workers cottages here, which date to 1871. Both the cottages and the agricultural buildings have retained their historical characters and add to the character and charm of the Lawford estate. Lawford Hall itself is a very fine building. The north elevation is Elizabethan and is two and a half

storeys tall. Its walls are of a deep pink render under a roof of old clay tiles. It is reached via a nearly north to south driveway lined by a double avenue of limes. A conifer screen to the east of the drive restricts views across the river (Tendering District Council 2006).

- 3.4.51 The church and the buildings to the south of it are located along and off Church Hill. At the top end of the road is the church, with a large car park, and the private entrance to the Hall. The church is set back from the road by its church yard, which gives a sense of space to the building. The two most notable features of the church are the extravagant chancel windows in curvilinear decorated style and its tower (Tendering District Council 2006). The tower is faced in a piebald mixture of brick, flint, puddingstone and septaria. The buildings to the south of the church are all residential in nature. These buildings include: Church Clarke's Cottage, a single storey with attic house. The Old School House, a 19th century Tudor Style house. The Rectory, although a 1960's building, is a pleasing aesthetic building in red brick and classical detailing. The Old Rectory, a large villa style property with unusual moulded brick cornice and string course on the southern elevation and a large porch on the principle north elevation with the arms of St John's Colleges, Cambridge (Tendering District Council 2006). The further south along the road the more it dips down. The road is lined with mature trees and passes thatched cottages and another cottage. These two properties have retained their historical character. At the top of a short rise fringed by dense hedgerows stands Abbots' Manor, a pretty two storey house with sash windows set in pink render under a hipped slate roof (Tendering District Council 2006).
- 3.4.52 At the southern end of the conservation area is Wignall Street and the junction with Dedham Road and Hungerdown Lane. A small council estate, from the 1930's and 50's is located along the eastern end of Wignall Street, these detract from the older more historically characterful buildings at its western end (Tendering District Council 2006). Many of the buildings here are of the local vernacular style those of note include: the Almshouse, a long low range of buildings with a prominent gable and road frontage of diapered brick with an attractive timber arcaded veranda. The Mount, a cottage with plain brick façade. The Old School House a diapered brick with Tudor style detailing (Tendering District Council 2006).
- 3.4.53 The southern part of the parkland has several public footpaths radiating out from Church Hill and from the carpark at its northern end. This attracts dog walkers and locals who utilise the space to roam. This adds communal value to the parkland and to the conservation area. During the walkover survey this car park was frequently in use.
- 3.4.54 The conservation area is within the boundary of the Dedham Vale Area of Outstanding Natural Beauty and is particularly important for the protection the character of Lawford Hall and the Church of St Mary (Tendering District Council 2006). The asset is located between the A137, to the south, a railway line to the north and open countryside to the east and west. Despite the development and the urban sprawl of Lawford and Manningtree to the east of the conservation area. Its immediate setting has not altered much since the first edition OS maps. It is quiet and rural. Noise intrusion from the railway to the north and the increase in traffic to the south hardly detract from the peaceful nature of the conservation area. Within the wider setting to the north-east, is the Stour Estuary. However, there is no intervisibility between the conservation area and the draft Order Limits due to urban sprawl and well-established vegetation.

- 3.4.55 The conservation area has several key views: within the Lawford estate a northern track continues to the edge of the conservation area where it reaches the railway embankment through which the lane passes under a semi-circular arched brick tunnel (Tendering District Council 2006). There is a pleasant view to the north-east from the other side of the tunnel and attractive views between the outbuildings and the tunnel to fields outside the conservation area to the east (Tendering District Council 2006). From the church there is a splendid view eastward over Manningtree and the Estuary, towards the tower of the Royal Hospital School (Tendering District Council 2006). The church's forecourt is surrounded by mature trees and has attractive views over parkland to the west (Tendering District Council 2006). Along Church Hill there are attractive glimpses of parkland on either side of the road. Abbots' Manor has a splendid view to the north-east. A building located along Wignall Street, Park View, has glimpses of the park to the north.
- 3.4.56 Overall, the setting of the conservation area contributes significantly to the assets value. However, due to the distance between the conservation area and the draft Order Limits, its setting does not extend into the draft Order Limits.
- 3.4.57 Ardleigh conservation area (CA26) is located partly within the draft Order Limits. It is a small medieval village located at an important road junction (Tendering District Council 2006) between The Street (north), Station Road (south), Harwich Road (east) and Colchester Road (west). It retains its church (Church of St Mary 1112060, Grade II\* listed) and many vernacular buildings. The well-treed approaches to the north and the east are essential to the character of the village. The village expanded southwards in the 19th century, resulting in further groups of distinctive buildings. Bordering the conservation area's southern edge is a scheduled monument, Crop mark site S of Ardleigh (1002146). Overall, the asset is of high value due to its historical and aesthetic values.
- 3.4.58 Ardleigh has potentially had a very long history. Located to the south, and bordering the conservation area, are scheduled cropmarks (1002146). Potentially the focus of activity and settlement was located near to the road or within the boundary of the conservation area. Given how close these assets are to the draft Order Limits they add archaeological potential to the draft Order Limits. These features and archaeological remains add evidential value to the conservation area, particularly to its southern part.
- 3.4.59 The village of Ardleigh is centred around a crossroads at the northern end of the conservation area (Tendering District Council 2006, CAA). The Church of St Mary is 14th century in date which suggests that there was some sort of settlement here since at least that date. The village remained, small and rural, until the mid-19th century. The first edition OS map, 1840' – 1880's, shows that the settlement at this time is still small and focused around the crossroads. However, two new additions to the area include, New Hall (1112056, Grade II listed), to the south. This is a 19th century manor house located within its own private parkland. At the very southern end of the conservation area is a railway line. The last 50 years or so have seen new additions to Ardleigh including more residential housing and the roads are more busy and congested with traffic. These have put a strain on the village's rural character.
- 3.4.60 The crossroads holds the focal point of the conservation area. Each quadrant has a different quality (Tendering District Council 2006). The south-western quadrant is densely developed. Here a group of historic buildings which line the road can be seen including a stone chapel. The north-western quadrant has an attractive group of older buildings near to the crossroads. The north-eastern quadrant is dominated by the church and mature trees. The south-eastern quadrant has the least townscape or

historical or aesthetic interest (Tendering District Council 2006) and are not be discussed further.

- 3.4.61 The four main roads of the crossroads have several distinctive buildings. To the north, The Street, on its corner with Colchester Road has a two storey cottage with light blue painted render with original clay tiled roof (Tendering District Council 2006). Next door is the Lion Inn which faces The Street and church, this is a pleasing two-storey building with rough rendered walls and dentilled brick eaves. Next door are a series of terraced cottages. The first two are two storeys with slightly jettied first floors. Next are two are single storied, with attics. All of these building are painted in pink tones (Tendering District Council 2006). The next building is Victorian, but it has lost much of its historical character, it was once linked with the non-extant Ardleigh Hall. On the eastern side of the road, north of the church and historically character post office, are a terrace of 19th to 20th century houses with distinctive brick work around to the doors and windows. The further north along this road are several villa style houses in Georgian and Victorian styles. Where Ardleigh Hall once stood, within the top north-western corner of the conservation area, are now modern houses.
- 3.4.62 Colchester Road, to the west of the crossroads, represent the main street of the village (Tendering District Council 2006). Along its northern side is Boxley House, a small cottage with many historical character features. Next door is The Bards, a Victorian villa of red brick. Next is the Village Shop, this was originally two vernacular style cottages with a shop extension on the western half (Tendering District Council 2006). Beyond this are post war housing. On the southern side of Colchester Road is another village shop, much altered. Next to this are three terraced Tudor style buildings, now converted to a single commercial property (Tendering District Council 2006). They have brick ground floors with black painted timber framed first floors. These appear to be the oldest houses within Ardleigh. The next two buildings are painted pink, the eastern one has been modernised whilst the western still retains its local vernacular charm. Next door is the stone Methodist chapel. This differs from the surrounding residential buildings both in use and building material. Next to the chapel are three small, terraced cottages. These are painted in grey, light blue and cream colours and set back from the road by small gardens. Next is a converted house, now a restaurant and takeaway. This building retains many of its local vernacular characterful details despite its conversion. Further west are later buildings which hold little historical character.
- 3.4.63 Station Road, heading south, has a row of old red brick cottages a short distance after the crossroads. Thes have been modernised but still retain their historical character. As the road heads south modern houses, some mimicking local historic character, have been constructed. These are intermingled with understated Victorian and Georgian cottages or small villas. Mid way down Station Road on the eastern side is New Hall. This is a located within a large private parkland which is screened from the road and from view by well-established vegetation. As Station Road nears the railway line the buildings become more industrial. There is a four-storey brick-built warehouse converted for commercial use but retains many of its historical features despite a large extension at the rear. The Tavern House is a three storey Georgian public house now used for commercial purposes. This also retains its historical character. The railway station has been modernised and converted to residential use. It retains some of its character.
- 3.4.64 Ardleigh lies in relatively flat countryside, very open in character, particularly to the north and south-west of the village (Tendering District Council 2006). Despite the general openness of the landscape, the approaches to the older part of the village are relatively well screened (Tendering District Council 2006). From the north, mature

hedgerows and trees on either side of The Street restrict forward views of the village (Tendering District Council 2006). Due to the curving nature of the roads in Ardleigh there are few views up or down the roads and views out into the country sides are restricted to the edges of the conservation areas especially where they give way to agricultural fields. The area very much retains its historical setting. Due to this its setting makes a considerable contribution to its value. As the draft Order Limits are located close to the conservation area and due to the flat topography of the surrounding landscape, the setting of the conservation area extends into the draft Order Limits.

## Baseline Introduction

- 3.4.65 The following cultural heritage baseline for Section C of the Project is presented chronologically by archaeological period and from north to south. Section C is further broken down into geographic parcels to allow the reader to orientate and to locate where on the appropriate figure a particular heritage asset is illustrated. These geographic parcels are largely defined by current settlements, and parish boundaries but also occasionally by landscape features such as high points and valleys and by anthropogenic features such as roads and railways. To avoid repetition, each parcel of Section B is introduced and described only in the first archaeological period where it is appropriate to be used.

## Prehistoric Period

### Palaeolithic

Elmsett, Chattisham and Copdock

#### *Non-Designated Heritage Assets*

- 3.4.66 The geographic parcel encompasses some of the rural Suffolk landscape to the north-west, west, and south-west of Ipswich. Elmsett is a small rural village c.11 km north-west of Ipswich and c.5.2 km north-east of Hadleigh and is sat at high ground at 66 aOD. Nedging-with-Naughton is small village in the northernmost part of this Section, located on the B1078. It consists of three settlements – Naughton, Nedging, and Nedging Tye. The settlement is situated at c.90 m aOD. The Belsted Brooks starts here and flows southwards where it ends in the river Orwell, passing Elmsett on the eastern side. The A1071 divides the rural landscape in a west to east direction between Elmsett in the north and Hintlesham to the south-east, and the Belstead Brook divides the settlements of Burstall and Hintlesham, two small rural villages c.6.5 km north-west and c.7 km west of Ipswich respectively. Burstall sits on low ground at 43 m aOD and is situated c.2.5 km west of Sproughton, another semi-rural village at even lower ground at 18 m aOD. Sproughton is situated on the western side of Ipswich and is separated from the town by the north to south A14 road. On the eastern side, the river Gipping flows in a southerly direction towards the river Orwell. Chattisham, another semi-rural village, is situated c.1.4 km south-east of Hintlesham and is c.8 km south-east of Ipswich, and c.2.4 km north-west of Copdock. Copdock and Washbrook are two semi-rural villages in the south-western edge of Ipswich and are situated along the London Road which joins the A12 to the B113. Copdock sits on higher ground at 54 m aOD whereas Washbrook is a 12 m aOD as the Belsted Brooks flows through the settlement in a northwest to south-east direction.

- 3.4.67 There was a low value axe (**3002**) found in 1924 on Sir Arthur Churchman's estate, c.545 m south of Burstall Lane, and c.60 m east of the draft Order Limits. This asset holds evidential value.

## Neolithic

### Higham, Holton St Mary, Stratford St Mary and East Bergholt

#### *Designated Heritage Assets*

- 3.4.68 The geographic parcel of Higham, Holton St Mary, Stratford St Mary, and East Bergholt is situated in the semi-rural landscape between Ipswich to the north-east and Colchester to the south-west. The following civil parishes are included in this subsection: Stoke-by-Nayland, Holton St Mary, East Bergholt, and Stratford St Mary. The A12 dissects these settlements as it connects Ipswich to Colchester. The river Brett ends on the southern side of Higham, and the river Stour passes south of Stratford St Mary towards the river Orwell. Higham is a small rural village on low ground at 22 m aOD, and c.10 km north-east of Colchester. The river Stour passes in an easterly direction along the south of village and along the south-west edge of Stratford St Mary, a small semi-rural settlement on the Suffolk/Essex border c.1.7 km southwest of Higham at 6 m aOD. Stratford St Mary is bound by the A12 on the eastern side and the draft Order Limits is placed between here and Higham. East Bergholt is a small semi-rural village bound by the A12 on the north-west side and the B1070 which passes through the settlement. It sits on high ground at 46 m aOD.
- 3.4.69 The **high value** scheduled monument 'Site discovered by aerial photography S of King's Wood' (**1006022**), located c. 480 m east of the draft Order Limits, was discovered by T. Bradford and interpreted as a henge. The asset has evidential and historical value. The cropmarks include a dark penannular circle with an opening on the south-side. The site is not visible at ground level, but it is said that the asset shows as the crop grows at certain time of the year. Aerial photography indicates that a cross is present in the centre of the circle. The site represents potentially a ploughed-out barrow ditch; however, the cross may potentially indicate the site of a post mill.
- 3.4.70 The asset is located c. 400 m west of the A12 Ipswich Road, and between the settlements of Holton St Mary and Stratford St Mary, within an agricultural field. A track way runs past the asset, associated with the farmland within which the monument resides. Immediately to the north-west and north of the asset is a patch of woodland, with another patch of woodland to the south-west of the asset, c. 100 m away. The wider landscape surrounding the asset is also agricultural and rural, divided in places by large thoroughfare such as the A12 as well as smaller roads. Patches of woodland and small settlements are also present, scattered within the landscape, with the largest settlement being East Bergholt, on the eastern side of the A12, c. 1.6 km east of the asset. the asset is located close to the edge of a high plateau of land, c. 49 m aOD, to the south-west, south and south-east of which the land lowers in elevation greatly towards the valley bottom that carries the River Stour, likely the remnant of a glacial palaeochannel. This elevated point in the landscape was likely a key factor in the construction of the asset at this site, commands views over the landscape, whilst positing it close to areas of high resource potential. The setting of the asset contributes moderately to its value, this is because of the changes to the landscape in terms of transport infrastructure placement, settlement growth and the division of the land for agricultural purposes, the landscape type in which the asset now resides. The setting of the asset does not extend to the draft Order Limits.

## Hornestreet, Dedham, Ardleigh and Lawford

### *Designated Heritage Assets*

- 3.4.71 Hornestreet, Dedham, Ardleigh, and Lawford are situated on the north-east and eastern edges of Colchester and includes the following civil parishes: Boxted, Langham, Dedham, Lawford, and Ardleigh. The Dedham Vale National Landscape (an Area of Outstanding Natural Beauty (AONB)), A12 and A120. Boxted is a rural village and civil parish in Essex. c. 8 km north of Colchester just within the southern area of Dedham Vale National Landscape (an AONB). The village is situated on intermediate ground level at c. 47 m aOD. It sits centrally equidistant from the river Stour in the north, the A134 in the west and the A12 in the east. Langham is a village in the City of Colchester District, c.10 km north of Colchester. It sits on intermediate ground at c. 40 m aOD with Black Brook passing in a west to east direction to the north of the settlement. The A12 passes Langham in a northerly direction on the eastern side and separates Langham with Parney Heath. Parney Heath is a rural area within Dedham, c. 10 km north-east of Colchester. It sits on intermediate ground at c.44 m aOD. Ardleigh is a semi-rural village and civil parish c. 6.5 km northeast of Colchester and sits on intermediate ground at c. 37 m aOD. The village is on the A137 which transects the settlement in a west/east direction before heading northeast towards Manningtree. The B1029 also heads in a north to south direction through the village. There is a reservoir to the west and south-west of the settlement, and a disused railway line to the east. Lawford is a large semi-rural village and civil parish in the Tendring district of north-east Essex, c. 2.5 km south-west of Manningtree, c. 35 m aOD. It joins Ardleigh, Manningtree, and Cattawade via the Harwich Road which comes from a westerly direction and cuts through the village towards the north over the river Stour.

### **Boxted CP**

- 3.4.72 The scheduled monument 'Henge 70 m north east of Cross Cottages' (**1019078**), located c. 2.1 km west of the draft Order Limits, includes buried remains of a Neolithic henge, c. 2 km south of the River Stour. The henge is not visible from the ground, however from an aerial views infilled ditches and a central pit-like feature are visible. These cropmarks have been recorded since the 1950s, first identified as a henge in 1975. The henge has a broad circular, penannular ditch, infilled and buried, with two entrances, one on the north and the other on the southern side of the asset. The diameter of the ditch enclosure is c. 40 m, with the ditch being c. 5 m wide, resulting in an internal diameter of c. 30 m. an external bank would have had an external bank, but it has been destroyed over time by ploughing. To protect any archaeological traces of the henge, a 5 m wide margin has been included in the scheduling. Other cropmark features visible are several large pit-like features within the area contained by the ditch and bank, likely part of the ritual use of the enclosure.
- 3.4.73 The asset is located on the north-eastern edge of the settlement of Boxted Cross, bordered by residential buildings along Cocks Hill to the west and south-west and Dedham Road to the south-east, also with some residential properties. To the east, north and north-west, the asset is surrounded by agricultural fields, with some woodland to the north beyond the immediate agricultural land. The asset is located on an area of high land in the landscape c. 48 m aOD, between to palaeochannels. The largest palaeochannel cuts through landscape from the north-west to the north of the asset, c. 530 m away, following a small tributary, before it joins the River Stour as it flows through the Dedham Vale. The second small palaeochannel being south-east of the asset, through a patch of woodland, where Black Brook flows also through the Dedham Vale into the River Stour before it reaches the estuary mouth. Both of these

palaeochannels and their watercourses would have likely been a key aspect of consideration when the henge was constructed here, placing the monument on a raised area of land overlooking and close to two waterways, being areas of high resources. The assets setting contributes moderately to its value, as despite its presence within a mostly rural landscape, changes have occurred close to the asset and afar. The asset is now bordered by a rural settlement, with other close by, and the landscape is also divided in many areas by agricultural practises and transport infrastructure. The asset has evidential and historical value and is **high value**. The setting of the asset does not extend to the draft Order Limits.

### Lawford CP

- 3.4.74 The scheduled monument 'Round barrow W of Lawford Hall' (**1002125**), located c. 2.8 km north-east of the draft Order Limits, is a bowl barrow which was partly excavated in 1812, during which two urns were uncovered. The barrow is located in an agricultural field that is ploughed, yet the asset is still stands at 3ft high. This barrow is an example of one of the very few prehistoric burial mounds in Essex that are still upstanding.
- 3.4.75 The asset is located in a large agricultural field, c. 180 m west of the Lawford conservation area, c. 186 m south-east of the Great Eastern Railway line and c. 270 m north-east of Mill Hill. Aerial imagery indicates that there is vegetation growing on top of the barrow. Surrounding the field which contains the agricultural field are patches of woodland to the north, east and west, with open fields to the south beyond Mill Hill/Dedham Road. The surrounding landscape is a mix of agricultural land, with areas of settlement such as Lawford to the c. 750 m to the south-east.
- 3.4.76 The asset is situated on the edge of an escarpment, which begins where the railway line now transects the landscape. The asset is on the elevation c. 33 m aOD with the lowland terrain to the north lowering to c. 1 m aOD as the land extends toward the estuary. The asset's location on an area of high ground overlooking the lowland valley associated with the marshlands of the River Stour as well as the tributary of the Shir Burn which passes close to the asset and flows into the River Stour, was likely a key factor in the construction of the asset. This location would have overlooked the estuarine landscape of the River Stour, enabling greater views across the landscape but also indicates the proximity of activity to areas of high resource productivity, close to water sources. The setting of the asset contributes considerably to the asset significance, despite the addition of the railway line in the landscape which the asset overlooks. The landscape to the north, which the higher terrain of the asset overlooks, has maintained largely the same with mostly rural, but now agricultural, landscape between the asset and the marshland of the estuary. The asset has historical and evidential value and is **high value**. The setting of the asset does not extend to the draft Order Limits.
- 3.4.77 The scheduled monument 'Settlement site NNE of Lawford House' (**1002157**), located c. 1.8 km north-east of the draft Order Limits, is a site containing a circular bank and ditch, 12-18 inches high and c. 120ft in diameter. The site contains a ring of post holes potentially indicating a large circular hut on the inner section. Pottery and flint were found at the site, with much of the pottery being Rinyo-Clacton in typology. From aerial photography, two ditch causeways are visible, one of which has been excavated. The site is often referred to as a henge, is probably a causewayed enclosure.
- 3.4.78 The asset is located within a long rectangular field on the south-west periphery of the settlement of Lawford. The asset is c. 190 m south-west of the A137 and c. 160 m south of the Lawford conservation area. To the west and south of the asset are more

open agricultural fields and to the north some settlement, then a mixture of agricultural land and patchwork woodland. To the east is the main section of the settlement of Lawford. The asset is located on a large area of upland terrain, c. 36 m, which extends across the landscape to the south and west towards the A12. The asset's location on this area of higher terrain, positions it over the lowering topography of the valley of the Wignall Brook which extends to the north-east towards marshland and estuary of the River Stour. This topography positioning of the asset was likely a deliberate action, placing the asset in a prominent point in the landscape overlooking a water course, areas of high productivity and resources in prehistory. As such is it likely that much of the historical setting of the asset extended to the north-east on the direction of the marshes and coastline. The historic landscape setting has been broken-up by subsequently period of development with the settlements of Lawford and Manning now between the asset and the estuary. As such the setting of the asset contributes moderately to its value as a result of landscape changes. The asset has evidential and historical value and is of **high value**. The setting of the asset does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.4.79 There was a **low value** hand axe (**3274**) was found c. 130 m east of Ardleigh road and c. 160 m north-east of the draft Order Limits between Lamb Corner and Ardleigh. This asset has historical and evidential value.
- 3.4.80 A group of **low value** Neolithic assets were found c. 380 m to c. 480 m south-west of the draft Order Limits and were the following: an axe (**3007**) which was found in a field c. 400 m south of the draft Order Limits; an axe (**3008**) which was found c. 380 m south of the draft Order Limits; a chisel (**3009**) which was found c.480 m south of the draft Order Limits. These assets all have evidential and historical value.
- 3.4.81 There was a **low value** stone axe (**3010**) found in a field c. 150 m north of the draft Order Limits and has historic and evidential value.

### **Bronze Age**

#### *Designated Heritage Assets*

#### **Ardleigh CP**

- 3.4.82 The scheduled monument 'Crop mark site S of Ardleigh' (**1002146**), c. 30 m south of the draft Order Limits. The asset is a multi-period cropmark complex site, which was discovered from aerial photography. Many archaeological material finds have been uncovered since the 1950s due to deep plough in the area, the first being a middle Bronze Age 'urnfield' which was uncovered in 1955, followed by six rings ditches which were then excavated, which produced urned cremations of a similar type and date.
- 3.4.83 The asset is located on the south-eastern periphery of the settlement of Ardleigh, bordering the south-eastern side of the Great Eastern Mainline railway. The land south of the monument comprises mostly agricultural land with some of the land to the east and north-east part of the periphery of the settlement of Ardleigh. The Frating road also runs north-east to south-west through the southern half of the asset. The asset is located on a high plateau in the landscape c. 36 m aOD with two river valley channels close to the asset, one to the north-east on the north-eastern periphery of Ardleigh, where Bargate Lane crosses the Great Eastern Main line, following the Shir Burn tributary that leads into the marshes and estuary of the River Stour. To the south-west of the asset is the other river valley channel, a small

tributary which continues south-west to join the Salary Brook as it leaves Ardleigh Reservoir. The positioning of the asset on this high plateau of land between these two water course valleys was likely a key consideration in the asset's construction, placing it at a focal high point in the landscape, with extending views across the plateau and down into the valleys, where resources are high. The setting of the asset contributes moderately to its value as a result of the changes within the landscape, with the development of transport infrastructure, such as the A120 to the south and the Great Eastern Railway Line to the north-west. Moreover, there are smaller road systems transecting the landscape and settlements and industry have been constructed around the landscape, particularly with the settlement Ardleigh which is partially located within the asset. The asset has evidential and historical value and is **high value**. The setting of the asset does extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.4.84 A **medium value** large cropmark complex on the south bank of the river Stour (**3236**) is adjacent to the draft Order Limits on the north-eastern side. The group consists of three ring ditches, two of which have been destroyed by the reservoir here, another ring ditch (mill mound) with a central pit, and a cropmark trackway which leads to the river to the east of the assets. Here, there is a large group of ring ditches consisting of six large ditches and 19 smaller ones. There is a ditched trackway to the south, a rectangular structure to the east, another group of 12 or more ditches, and a small, square enclosure. These cropmarks indicate the possible site of a settlement or farmstead and hold evidential value. Another cropmark complex near the river comprises of nine small ring ditches, with one having an entranceway and internal pit which a linear cropmark cuts through. There is an additional half ring ditch, linear cropmarks including trackways which lead north to the river. There was a general scatter of worked and burnt flint and a bronze age cremation had been found here. To the south of the above complex, another complex was found that comprised of 14 single ring ditches, a larger single ring ditch, and linear features of possible old field boundaries. Cropmarks of a round barrow cemetery of probably Bronze Age origin were recorded on aerial photographs in 2019. These assets hold historical and evidential value.

#### **Elmsett, Chattisham and Copdock**

#### *Non-Designated Heritage Assets*

- 3.4.85 An aerial photograph of a low value possible ring ditch c. 25 m in a field north of Lodge Cottages (**3003**), c. 550 m south of the draft Order Limits and north of Little Wenham. There was a note in the HER record which suggested that this asset may be modern. This asset has evidential value.
- 3.4.86 There is a **low value** ring ditch (**3004**) c. 5 m north of Wenham Road with the draft Order Limits passing through in a north-easterly direction in the southern part of this asset. The ring ditch is c. 30 m in diameter and, according to the HER, it may be the remains of a prehistoric burial mound. This asset holds historic and evidential value.
- 3.4.87 There is a **low value** cropmark of a partial ring ditch (**3005**) which probably represents a ploughed out Bronze Age barrow. This asset is c. 40 m north of Burstall Lane west of Sproughton, and c. 300 m east of the draft Order Limits. According to the HER, the asset comprises of a ring ditch of an unknown date, a small pit to the west of the ring ditch, and a round barrow. This asset has evidential value.
- 3.4.88 The cropmark of a **low value** possible Bronze Age round barrow (**3324**) of evidential value is located in farmland c. 1 km south of Sproughton and c. 150 m east of the Order Limits. The asset has a diameter of 34 m and was partially excavated in 1984

when it was crossed by a waterpipe. The exposed ditch was c. 4 m wide, at least 2 m deep and contained intrusive Iron Age pottery.

- 3.4.89 There is a **medium value** cropmark series of boundaries, forming incomplete paddocks and fields with an indication of a central trackway, and a small ditch (**3006**) in two agricultural fields between Burstall Lane to the north and the A1071 to the south, with the draft Order Limits running north-west/south-east between the asset sites. These assets are c. 780 m west to c. 1.2 km south-west of Sproughton. The ditch, field, and trackway are undated, and the ring ditch and round barrow are dated to the Bronze Age. This asset has evidential and historical value.
- 3.4.90 There are **low value** cropmarks (**3283**) of a series of boundaries and a ring ditch, with the northern most part within the draft Order Limits c. 615 m south of Burstall Lane. These cropmarks are a series of boundaries that form incomplete paddocks or fields with indication of a central trackway. There is also a small ring ditch and round barrow which is from the Bronze Age period. These assets have evidential value.
- 3.4.91 There is a **low value** cropmark of a partial ring ditch (**3260**) which likely represents a ploughed-out Bronze Age barrow. This asset is situated c. 300 m east of the draft Order Limits and c. 580 m west of Sproughton. This asset is c. 24 m in diameter with the south-west side of the circuit being open or masked in this area. There is also a small pit on the west side of the ring ditch. This asset holds evidential value.
- 3.4.92 There was a **low value** pit and artefact scatter (**3011**) recorded c. 280 m north of Pigeons Lane and c. 140 m north-east of the draft Order Limits during a bulldozer clearance at Valley Farm. The pit contained charcoal and the remains of late Bronze Age urns. This asset held evidential value.
- 3.4.93 A **low value** hoard (**3012**) was found within the draft Order Limits. The find consists of a small socketed probable chisel or possible axe of Late Bronze Age date with another fragment visible within it. Only the blade end of the probable chisel survives and the breaks are clearly hammered and appear old. The asset has historical and evidential value .

## **Hornestreet, Dedham, Ardleigh and Lawford**

### *Non-Designated Heritage Assets*

- 3.4.94 A **low value** scatter of oystershell, brick, and five Roman bronze coins from the 1st to 2nd centuries (**3030**) were found within a field within the draft Order Limits c. 500 m north-east of Langham Hall. These assets hold evidential value.
- 3.4.95 A low value find of Roman tiles (**3031**) were found scattered over three fields c. 140 m west of the draft Order Limits. Another low value Roman tile scatter (**3032**) was found c. 70 m north-west of (**3031**) and c. 165 m north-west of the draft Order Limits. These assets hold evidential value.
- 3.4.96 There is a **low value** group of cropmarks showing ring ditches, pits, trackways, and linear features (**3229**) that are within the draft Order Limits. The cropmark shows a group of three ring ditches with the central one being the focus of an excavation in 1979 and was shown to be Bronze Age in date, but no trace of the others was found. The central ring ditch is described as 'apparently isolated' in example. This asset has evidential value.

## Great Bromley, Little Bromley and Little Bentley

### *Non-Designated Heritage Assets*

- 3.4.97 Great Bromley village lies c. 6 km south of Manningtree and c. 9 km east of Colchester and includes the hamlets of Balls Green, Hare Green and Bromley Cross. The A120 trunk road (with the A133 as a spur off it) cuts right through the middle of the parish. The settlement is sited along a 'Y' shaped road junction between Hall Road (north-west), Badley Hall Road (north-east) and Brook Street (south). It is sites on land that measures c. 26 m aOD. Little Bromley is a rural village and civil parish in the Tendring district, c. 3 km south of Manningtree. The village is a linear settlement in a north to south-west alignment and sits c. 32 m aOD. The village is surrounded by many farmsteads and agricultural areas. Little Bentley village sits on rising ground just to the west of the Holland Brook. The settlement is located around a four way junction between Manningtree Road (north), Tendering Road (east), Church Road (south) and Rectory Road (west). The village measures c.36 m aOD.
- 3.4.98 There is **low value** east/west aligned possible Roman road through Horselycross Street (**3033** and **3035**) is c. 180 m north of the draft Order Limits beginning at Grange Road between Arleigh and Little Bromley . This asset is c. 3 km in length and cuts through the rural landscape north of Little Bromley. Asset (**3035**) is near a modern road alignment, field boundaries and cropmarks. These assets have evidential value.

## Iron Age

### Elmsett, Chattisham and Copdock

#### *Non-Designated Heritage Assets*

- 3.4.99 Two **low value** pits with Iron Age pottery (**3012**) were found during a clearance. The pottery contained a hanging bowl and two other pots which are now in Ipswich Museum. This asset has evidential value.
- 3.4.100 There was a **low value** multi-period artefact scatter (**3022**) that contained possible late Bronze Age sherds, three pits with Iron Age A/B pottery including a hanging bowl, and a Romano-British cremation in an urn with the base of two other pots which were uncovered in a pit during a bulldozer clearance at Valley Farm c. 130 m north-east of the draft Order Limits. These assets have evidential value.
- 3.4.101 There was a **low value** bronze tool hoard (**3099**) found within the draft Order Limits. This asset has evidential value.

### Higham, Holton St Mary, Stratford St Mary and East Bergholt

#### *Non-Designated Heritage Assets*

- 3.4.102 A **low value** La Tene terret (**3013**) was found within the draft Order Limits, c. 850 m west of Stratford St Mary. This asset has historic and evidential value.

### Hornestreet, Dedham, Ardleigh and Lawford

#### *Designated Heritage Assets*

#### **Ardleigh CP**

- 3.4.103 The **high value** scheduled monument 'Crop mark site S of Ardleigh (**1002146**, explained in the above Bronze Age section), is located within the draft Order Limits and extends beyond to the north-east. The asset features a multi-period cropmark

complex which includes Iron Age activity. The prior Bronze Age presence at the site is likely to have influenced the use of the site into the Iron Age, likely representing a desirable area for continued activity. The asset has evidential and historical value. The setting of the asset does extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.4.104 A low value possible Iron Age beaker (**3014**) and a pottery vessel (**3015**) were found c. 225 m south of the draft Order Limits c. 65 m west of the Ipswich Road which runs north to south between Langham and Parney Heath in a small gravel pit at a poultry farm. These assets are dated from the late Iron Age to the Roman period and have evidential and historical value. A low value gold coin of Cunobelinus and a small conical cup were found (**3014**) c. 290 m west of the draft Order Limits c. 65 m west of the Ipswich Road which runs north/south between Langham and Parney Heath in a small gravel pit at a poultry farm. This asset has evidential and historical value.
- 3.4.105 A **low value** coin (**3251**) was found within the draft Order Limits c. 125 m east of the A12 and c. 430 m north-west of the settlement at Parney Heath. The coin has been dated to the late Iron Age to pre-Boudican Roman Colchester. This asset has evidential and historical value. In the same field, a low value gold coin (**3256**) was found c. 30 m east of the A12. This coin was dated to the late Iron Age and has evidential and historical value.
- 3.4.106 A **medium value** complex of five late Iron Age sites (**3016**) was found during excavation and trial trenching to the south of Wick Farm within the draft Order Limits c.2.5 km west of Ardleigh. This complex coincided with a scatter of burnt, possibly prehistoric flint. Trial trenching revealed five late Iron Age farmsteads with settlements varying from the early Iron Age to the early Saxon period/ early medieval period. These remains were located in the northern part of the excavation site (which is within the draft Order Limits) and the east of the excavation site. There was evidence of ironworking that was taking place as the enclosure contained iron deposits, a hammerscale, fragments of a furnace lining, vitrified surfaces, and evidence of a blowing-hole for a set of bellows. These assets hold evidential value. Another excavation (**3017**) on the same site as 3016 revealed a **low value** largely Iron Age occupation with a small area of late Iron Age/Roman activity within the site due to the findings of pottery, pits/post-holes, gullies, and trenches. These assets hold evidential and historical value.
- 3.4.107 Trial trenching in 2007 found an uncovered largely Iron Age settlement at Wick Farm (**3097**) within the draft Order Limits and extending out to the 500 m study area. This asset is of **low value**.
- 3.4.108 Small quantities of **low value** Iron Age and Roman finds including pottery (**3017**) were found during a field walking exercise at Wick Farm, which sits to the south of Wick Lane and the east of the A12 with the topmost section within the draft Order Limits here. An excavation in 2007 revealed largely Iron Age occupation with a small area of Iron Age/early Roman activity in the northwest of the asset which was exemplified by pottery, pits/postholes, gullies, and trenches. Further excavation in 2008 revealed two sites dating to the late Iron Age/early Roman period. These assets have evidential value.
- 3.4.109 **Low value** enclosures and linear features (**3231**) are situated c. 130 m south-east of the draft Order Limits c. 2.5 m west of Ardleigh settlement. An excavation in 2007 revealed the enclosure in six trial trenches where it was dated to the late Iron Age. Other features found in other trial trenches supported this assessment as they were

associated with low levels of activity with one ditch containing a grog-tempered bowl. This asset has evidential value.

- 3.4.110 There is a **low value** cropmark site (**3218**) situated c. 600 m east of Ardleigh settlement of which the boundary of the site spans c. 1.7 km southwards towards Martells industrial estate area. The northernmost, eastern, and central parts of this asset are within the draft Order Limits. A watching brief in 1995-96 revealed multiperiod remains which were subsequently excavated. Features included a late Beaker burial, a single unaccompanied pot in a rectangular pit. Other features included a series of Late Iron age/early roman field ditches and post-medieval features. After a geophysical survey and eleven trial trenches that were excavated in 1997 there had only one been one modern feature and three possible natural origin features that were found. There were no other features relating to Bronze Age or Iron age cemeteries in the north. The lack of archaeological artefacts in both the excavated features and topsoil suggested no intensive archaeology activity in the vicinity of the trenches. Environmental sampling revealed mainly cereal remains and industrial debris. A watching brief at Notcutts Nurseries, Station Road revealed an undated ditch. Aerial imagery from 2014 shows some cropmarks. This asset has evidential value.

## General Prehistoric

### Higham, Holton St Mary, Stratford St Mary and East Bergholt

#### *Non-Designated Heritage Assets*

- 3.4.111 There is a **low value** complex of extensive cropmarks of probable prehistoric date within and around the draft Order Limits between Higham and Stratford St Mary and are the following: Two small ring ditches (**3173**) and (**3174**) of c. 30 m in diameter are situated c. 50 m east of the draft Order Limits; another ring ditch (**3175**) of c. 30 m in diameter which is c. 40 m south of (**3173**) and (**3174**) and outside of the draft Order Limits; a rectilinear enclosure (**3176**) c. 35 m by c. 30 m is situated c. 95 m south of Higham Road within the draft Order Limits; a sub-rectangular enclosure (**3177**) c. 50 m south of Higham Road within the draft Order Limits; a rectangular enclosure (**3178**) c. 30 m south of Higham Road within the draft Order Limits; a small rectangular enclosure (**3179**) is situated c. 40 m east of the draft Order Limits; and a semi-circular enclosure (**3188**) c. 25 m in diameter is situated c. 25 m south of Higham Road within the draft Order Limits. All of these assets have evidential value.
- 3.4.112 A **low value** causewayed sub-square or circular ring ditch traversed by a double ditched enclosure (**3001**) is recorded within the draft Order Limits, c. 15 m north of the B0168, c. 1 km south-west of Holton St Mary. This asset has evidential value.

### Hornestreet, Dedham, Ardleigh and Lawford

#### *Non-Designated Heritage Assets*

- 3.4.113 A **low value** find of a pyroxene, jadeite axe (**3100**) was found in a field c. 60 m north of the draft Order Limits south of Langham Hall. This find has historical and evidential value.
- 3.4.114 A **low value** piece of Belgic pottery associated with a 'red clay' area (**3027**) was found in a field c. 25 m south of the draft Order Limits Little Bromley Road between Ardleigh and Little Bromley. This asset has evidential value.
- 3.4.115 A group of **low value** assets consisting of a ring ditch, pits, linear features, a length of road running north-west from Hungerdowns, and a square enclosure c. 59 m by c.

57 m with an entrance on the east side (**3225**) are situated c. 50 m west of the draft Order Limits. This asset has evidential value.

## Roman Period

### Elmsett, Chattisham and Copdock

#### *Non-Designated Heritage Assets*

- 3.4.116 A **low value** artefact scatter of grey ware pottery (**3020**) was found along a footpath c. 60 m west of the draft Order Limits at Burstallhill. There was also an illegible coin from the 2nd or early 3rd century. These assets have evidential value.
- 3.4.117 There was a **low value** multi-period artefact scatter (**3022**) that contained possible late Bronze Age sherds, three pits with Iron Age A/B pottery including a hanging bowl, and a Romano-British cremation in an urn with the base of two other pots which were uncovered in a pit during a bulldozer clearance at Valley Farm c.130 m north-east of the draft Order Limits. These assets have evidential value.
- 3.4.118 There was a **low value** pottery scatter (**3021**) recorded c. 130 m north-east of the draft Order Limits in a field at Valley Farm c. 1 km north of Washbrook and Copdock. This pottery scatter was found in two pits which contained black and grey ware, a brown handle of an amphora, some complete or near complete urns, and a portion of a conglomerate quern. This asset held evidential value.
- 3.4.119 A **low value** coin (**3043**) was found outside of the draft Order Limits and within the 250 m study area in the Chattisham geographic area. This asset is a worn copper-alloy Roman sesterius of uncertain Antonine ruler x.138-193AD and features an unknown figure standing with an uncertain object in the left arm and its right arm outstretched. This asset has evidential value.
- 3.4.120 A **negligible value** section of a Roman road (**3325**) of evidential value runs north/south following the modern route of the B1113 Swan Hill through Sproughton and passing within 75 m of the Order Limits.

### Raydon, Great Wenham, and Capel St Mary

#### *Non-Designated Heritage Assets*

- 3.4.121 A **medium value** rectilinear enclosure-paddock system (**3237**) is situated on the southern bank of the river Stour within the draft Order Limits to the west of Stratford St Mary. The asset consists of a series of large compounds, one subdivided to form strip enclosure. Within a rectangular enclosure, a smaller square enclosure is situated, and was probably a dwelling. The whole complex may represent a farmstead from the Romano-British period. Cropmarks of a series of conjoined enclosures which probably represent a Roman settlement were recorded on aerial photography in 2019. The asset holds historical and evidential value.
- 3.4.122 A low value Depondius of Trajan (3028) was found within the draft Order Limits c. 900 m west of Stratford St Mary. A low value Sesterius of Trajan (3029) was found in the same field as 3028 but c. 200 m south still within the draft Order Limits, c. 1.5 km south-west of Stratford St Mary. These assets hold evidential value.

### Higham, Holton St Mary, Stratford St Mary and East Bergholt

- 3.4.123 There were low value wooden piles (3024) c.200 m south-east of the draft Order Limits at the Essex/Suffolk border which were noted in the HER to be a possible roman bridge. This asset has evidential and historical value.

## Hornestreet, Dedham, Ardleigh and Lawford

### *Designated Heritage Assets*

#### **Ardleigh CP**

- 3.4.124 The high value scheduled monument 'Crop mark site S of Ardleigh (1002146, see above Bronze Age section), is located within the draft Order Limits and extends beyond to the north-east. The asset features a multi-period cropmark complex which includes activity from the Roman period including Romano-British burials, ditches, pits, pottery and kilns, distributed over a wide area suggesting a large settlement was located in the area. The prior Bronze Age and particularly Iron Age presence at the site is likely to have influenced the use of the site into the Roman period, likely representing a desirable area for continued activity. The asset has evidential and historical value. The setting of the asset does extend to the draft Order Limits.

### *Non-Designated Heritage Assets*

- 3.4.125 A low value excavation (3017) at Wick Farm, within the draft Order Limits c. 2.5 km west of Ardleigh revealed a largely Iron age occupation with a small area of late Iron Age/Roman activity within the site due to the findings of pottery, pits/post-holes, gullies, and trenches. This asset is has evidential value.
- 3.4.126 Low value pottery dated 20-60AD (3036) was found in 1949 at the southern end of a field within the poultry farm c. 130 m south-east of the draft Order Limits adjacent to the A12. The asset is noted to be similar in character as at Camulodunum (Roman Colchester) and has evidential and historical value.
- 3.4.127 There was a stone figure of an infant of medium value (3037) found c. 8 m east of the draft Order Limits west of Boxhouse Lane in the Parney Heath geographic area. This asset was originally covered in gesso (a white paint mixture used to coat surfaces as a paint primer), is of an undoubtably Romano-British origin. It was found in the front garden of Purney Heath and was donated to Colchester Museum. This asset holds historical, evidential and aesthetic values.
- 3.4.128 A low value Roman road (**3206**) begins at the southern bank of the river Stour c. 25 m west of Lower Street and c. 220 m south-east of the draft Order Limits to the west of the A12 and follows the southerly direction of Ipswich Road. It passes through the draft Order Limits at three points and ends on the eastern side of the A12 within the draft Order Limits at Wick Lane. This asset has evidential and historical value.
- 3.4.129 A **low value** findspot of a Colchester Roman Fortress to Early Roman Colonia (**3271**) was found in a field c. 70 m west of Rectory Road and c. 230 m west of the draft Order Limits to the south of Langham Hall. This asset has evidential and historical value.
- 3.4.130 A **low value** scatter of oyster shell and brick, as well as five Roman bronze coins from the 1st to 2nd century (**3273**) were found in a field within the draft Order Limits c. 150 m north of Dedham Road. These assets have evidential value.
- 3.4.131 **Low value** Roman tiles that were scattered across three fields (**3275**) were situated c. 130 m west of Grove Hill and c. 200 m north-west of an draft Order Limits access and c. 280 m south-west of the draft Order Limits, at Perry Lane. This asset has evidential value.
- 3.4.132 There is a low value findspot for an asset dated to the early to late Roman period (3307) situated c. 40 m east of the draft Order Limits c. 245 m south of Dedham Road. This asset has evidential value.

- 3.4.133 A low value possible Roman pottery kiln (**3040**) was found west of Pyghle Farm, Ardleigh, c.90 m west of the draft Order Limits. This asset has evidential value.
- 3.4.134 A low value Roman road linking Mistley to Colchester (3207) heads north-east through Ardleigh and bisects the draft Order Limits in the area of Little Bromley Road. This road is visible through aerial photography and existing alignments. This asset has evidential value.

## **Great Bromley Little Bromley and Little Bentley**

### *Non-Designated Heritage Assets*

- 3.4.135 A possible Roman road of medium value (3035) is situated c. 200 m north of the draft Order Limits between Ardleigh and Little Bromley, its western edge beginning at Grange Road. This asset is evident by modern road alignment, field boundaries, and cropmarks. This asset has evidential and historical value.
- 3.4.136 A low value cropmark (3038) is situated within the draft Order Limits in the southern-most part of the asset adjacent to Ardleigh Road, c. 500 m west of Little Bromley. This cropmark has linear features which probably represent field boundaries despite it not being marked on first edition OS mapping, as well as the presence of a possible Roman road. This asset holds evidential value.
- 3.4.137 There are low value cropmarks (3039) within the draft Order Limits along Grange Road in the Little Bromley geographic area which are believed to be indicative of a Roman road. This asset also contains cropmarks featuring a curvilinear enclosure, field boundary, linear feature, a site, and a trackway which are undated. The asset holds evidential and historic value.

## **Early Medieval**

### **Elmsett, Chattisham and Copdock**

#### *Non-Designated Heritage Assets*

- 3.4.138 A **low value** square enclosure cropmark (**3186**) is situated on the north side of Bottle Bridge Road, c.60 m west of the draft Order Limits that pass in a south-western direction from the Chattisham area. The asset is probably a moat and the site of the Kings Green Cottages. This asset holds evidential value.
- 3.4.139 A **low value** strap fitting (**3069**) was found east of the draft Order Limits in a field. The fitting was made of copper alloy and consists of a pair of annular frames, the larger one being D shaped with a smaller circular one attached. Bats are moulded on the strap fitting on the side bands of the large fitting. This asset has historical and evidential value.

### **Raydon, Great Wenham and Capel St Mary**

#### *Non-Designated Heritage Assets*

- 3.4.140 A **medium value** well-made cast copper-alloy Viking Borre-style lonzengiform openwork brooch (**3081**) was found south of the draft Order Limits at Raydon. The brooch measured 30 mm by 30 mm with the front face decorated by a raised central cross with a circular hole for each quadrant. The back of the face was smooth and undecorated with the pin loop remaining in place with a corroded iron deposit within it, implying that the original pin was iron. Other identical brooches have been found across East Anglia, all made of copper alloy and cast in a mould. Other brooches like

this have been found right across the Viking world from Russia to Dublin. This asset has aesthetic, historical and evidential value.

### **Higham, Holton St Mary, Stratford St Mary, and East Bergholt**

#### *Non-Designated Heritage Assets*

- 3.4.141 A **low value** stirrup (**3093**) was found within the draft Order Limits in the Holton St Mary geographic region. This Stirrup was cast of copper-alloy and was sub-pentagonal in plan with a slightly rolled flange which protrudes backwards from the base. The lower part of the mount had 2 circular holes and 2 knops on slightly concave edges. The apex of the mount was rounded and pierced with a circular hole with a knop on each side of the base. The frontage was decorated at some point with an engraved design which had since worn away, and the rear was undecorated. The asset has evidential value.

### **Hornestreet, Dedham, Ardleigh and Lawford**

#### *Non-Designated Heritage Assets*

- 3.4.142 There is a **low value** earthwork at Ardleigh Heath (**3096**) in a field between the draft Order Limits and an access trackway, with the draft Order Limits touching on the eastern side. This asset is a cropmark of an enclosure in an agricultural field and can be seen in aerial photography. This enclosure was not mapped as part of the NMP, but the former field boundaries were. This asset has evidential value.
- 3.4.143 The Colchester HER holds two records for medieval undefined finds of **unknown value** in the following locations:
- 3.4.144 The findspot of an asset (**3315**) that is situated within the draft Order Limits near Lower Street.
- 3.4.145 There is an findspot of an asset (**3318**) situated within draft Order Limits near the River Stour.

## **Medieval**

### **Elmsett, Chattisham and Copdock**

#### *Designated Heritage Assets*

### **Nedging-with-Naughton CP**

- 3.4.146 The Grade II\* listed 'Brickhouse Farmhouse' (**1037104**), located c. 2.6 km west of the draft Order Limits, is a 15th-16th century timber-framed building. The asset comprises two storeys and has exposed timber frames, brick nogging and a tiled roof. The upper storey of the asset is jettied on its northern side, where remains of shafts, capitals and joints are still exposed. It is likely that this jettying once extended to the southern side of the asset but was later extended on the ground floor with red brick.
- 3.4.147 The asset is located down a private track which leads off of the B1078 and within an active farmyard, with central hardstanding and multiple associated farm buildings. Surrounding the property are agricultural fields on all sides. The wider landscape is also primarily agricultural with some dispersed settlement. The setting of the asset contributes considerably to its significance, with the historical farming association with the landscape maintained into the present. The asset is **high value** and has historical and aesthetic value. The setting of the asset does not extend to the draft Order Limits.

## Elmsett CP

- 3.4.148 The Grade II listed 'Rookery Farmhouse' (**1268459**), located c. 2 km south-west of the draft Order Limits, is a two-storey house, built c.1500 with additions in c.1840-1850. The earlier section of the house is rendered and with a colour-washed timber-frame and plain-tile roof. The later section of the house to the front is built in red brick with Welsh slate roof and brick ridge stacks.
- 3.4.149 The asset is located down a private driveway lined by mature vegetation which leads off Rookery Road, into a large garden lined by mature trees and vegetation which contains landscaped gardens and features such as a tennis court. The asset is located within a small settlement along Rookery Road and Manor Road. The surrounding landscape comprises agricultural and grass fields. The setting of the asset contributes considerably to its value. The asset is of **medium value** and historical and aesthetic values. The setting of the asset does not extend to the draft Order Limits.
- 3.4.150 The following two designated assets from a group. The Grade II listed 'Rectory' (**1037279**), located c. 1.5 km south-west of the draft Order Limits, is a 16th century timber-framed and plastered building with 18th century alterations and additions is located within the medieval scheduled monument 'Moated site at The Old Rectory, 150 m north-east of Malting Farm' (**1019537**), located c. 1.9 km south-west of the draft Order Limits.
- 3.4.151 The Rectory has a tiled roof with a ridge chimney stack. The building is laid out in an L-shape plan with wings to the north-east and south-east. The south-east wing was formerly a cross wing but has subsequently been incorporated into the main block. The doorway to the property has a Tuscan portico with a cornice and plain columns. The scholar and divine, John Boise is said to have been born here and was later rector. The Rectory is in the eastern corner of the moat island. The scheduled monument includes the medieval moated site of the Old Rectory, located 650 m south-west of the Elmsett Parish Church and adjacent to the Elmsett Green to the west. Within the moat is a sub-triangular island, 116 m north-south and 75 m east-west. Surrounding the island is a water-filled moat, 12 m wide and 3 m deep, with a wide causeway across the northern edge of the moat, and footbridge to the south-west.
- 3.4.152 The assets are located within a property that is lined with dense vegetation, on the northern edge of the village of Elmsett. To the west and south are residential plots, to the east Elmsett Green and to the north open farmland. The assets are shielded from Whatfield Road by the dense vegetation lining the property. To the south-east of the assets is a large triangular green and a characterful thatched property (Mannings Cottage **1351609**, this asset has been scoped out of assessment) to the west also lining the green. The village is surrounded by rural fields. The rural village setting of the asset contributes considerably to the value of the asset, despite the increase in the modern development of the village. The vegetation around the assets provides much screening into the village and to the surrounding fields. This vegetation limits the assets setting extending into the surrounding area. The Rectory has historical, evidential and aesthetic value and is **medium value**. The moated site has historical and evidential value and is **high value**. The setting of the assets does not extend to the draft Order Limits.
- 3.4.153 The Grade II listed 'Yew Tree Cottages' (**1037278**), located c. 1.7 km south-west of the draft Order Limits, is a 15th to 16th century timber-framed and plastered asset, originally a hall house. The building has a tiled roof and a ridge chimney stack.

- 3.4.154 The asset is located within a vegetated garden lined by a mature privet hedge along Hadleigh Road. The asset is in a central position in the village where the main roads, The Street and Whatfield Road meet Hadleigh Road. the asset is surrounded by other residential properties to the west, south and east, with Elmsett Green to the north. The rural village setting of the asset contributes considerably to its value, despite the modern growth of the settlement to the south-west and south-east. The asset has historical and aesthetic value and is **medium value**. The setting of the asset is contained to its village setting and does not extend to the draft Order Limits.
- 3.4.155 The Grade I listed 'Church of St Peter' (**1194594**), located c. 960 m south-west of the draft Order Limits, is a small 13th, 14th and 15th century church without aisles. The asset has some 17th century features including pulpit and communion rail.
- 3.4.156 The asset is located within the graveyard associated with the church, which is lined by vegetation and a brick wall. The church has an open setting and is not encroached by the vegetation lining the graveyard. Bordering the asset to the south is the listed farmhouse 'Church Farm' (**1037319**), to the north, east and west are open agricultural fields. The church is located on the periphery of the village of Elmsett, and it is the village church. The surrounding landscape around the asset is an open agricultural landscape. The rural setting of the asset makes a considerable contribution to its value. The asset has historical, aesthetic and communal value and is high value. The setting does not extend to the draft Order Limits.
- 3.4.157 Redhouse Farmhouse' (**1194612**) is a Grade II medieval hall house altered and extended in the 16th-17th century with 18th century fenestration, that features a timber-framed and plastered exterior with a tiled roof. The distinctive ridge chimney stack, adorned with three octagonal shafts, and large external chimney stacks at the northwest and southeast ends contribute to its historical charm. This house is located c. 1.2 km east of Elmsett and c. 1 km south-west of the draft Order Limits. This asset has medium value based on its evidential, historical and aesthetic value.
- 3.4.158 Nestled atop a steep incline, Redhouse Farmhouse enjoys a secluded position set far back from the road. The expansive front garden, characterised by its openness, complements the wooded area to the east of the house. The setting is informed by its location in a farmyard as well as its relationship with the non-designated Farmstead: Red House Farm Elmsett (**3104**). Associated buildings, stand to the left and behind the property. The setting is further informed by the surrounding agricultural landscape with which this asset has a functional and historical relationship. Overall, the setting makes very considerable contribution to its value and does not extend to the draft Order Limits.

### Hintlesham CP

- 3.4.159 Within the settlement of Hintlesham is found the Grade II 'Church of St Nicholas' (**1351644**), c. 1.6 km north-west of the draft Order Limits. The church, a 19th-century restoration of a medieval structure, features an imposing silhouette with its prominent square tower characterized by flint and rubble construction and stone dressings. Aisled nave elevations boast well-preserved 19th-century Perpendicular windows, and a rendered gault brick porch provides a welcoming entry. The chancel, buttressed and adorned with 19th-century decorated style fenestration, adds to the architectural value. The exterior also exhibits traces of notable memorial structures, contributing to the church's historical and aesthetic value. Overall, the church has a medium value due to its evidential, historical, communal and aesthetic value.
- 3.4.160 Its setting is informed by its location within the settlement and its relationship with the other scoped in listed building within the settlement, the post medieval Grade II

‘Hyntle Place’ (**1351643**). The Church of St Nicholas is situated on the edge of the village along a very busy road. The front of the church faces a mix of park fields, a village hall, and a car park, contributing to a vibrant and somewhat busy atmosphere. The immediate setting features a relatively large open churchyard, enclosed by chain fencing and surrounded by established trees and a wooded area. Despite its proximity to the bustling road, the semi-rural surroundings and the presence of greenery provide a blend of tranquillity and activity in the vicinity of the church. The busy-ness of the road is a detractor however, this asset would have been placed deliberately by this road. Therefore, the road does contribute to its understanding. Overall, the setting makes considerable contribution to the asset’s value but does not extend to the draft Order Limits.

- 3.4.161 ‘Manor Farmhouse’ (**1036912**) is a Grade II listed building located along Duke Street, at the south-west end of Hintlesham, c. 1.4 km north-west of the draft Order Limits. is a manor farmhouse was built in the early to mid-16th century with a mid-19th century addition of applied timbers which masquerade as a frame. The asset is constructed from red brick. Overall, the farmhouse has a medium value due to its evidential, historical and aesthetic value.
- 3.4.162 Manor Farmhouse is positioned in close proximity to the road, delineated by a wooden fence. Situated on the edge of the village, the immediate surroundings include period properties along its side of the road, juxtaposed with modern properties on the opposite side. While the setting retains a rural character, its ambiance is marked by activity and busyness, attributable to its location along the village's main road. Nearby agricultural fields contribute to the rural context of Manor Farmhouse. Overall, the setting makes considerable contribution to the asset’s value but does not extend to the draft Order Limits.
- 3.4.163 ‘Wood Farmhouse’ (**1036913**) is a Grade II listed building located along Duke Street, at the south-west end of Hintlesham, c. 1.7 km north-west of the draft Order Limits. The house exhibits a blend of historical elements, featuring a core from the 15th century with later extensions in the 17th and 19th centuries. Encased in brick, the two-story structure adopts a T-plan, showcasing scattered fenestration with diamond-leaded glazing. The central forward gabled wing adds architectural interest, complemented by a brick porch at the right-hand angle. Chimneys with shaped shafts punctuate the roofline. The rear facade preserves remnants of pargetting, emphasizing its historical value. Overall, the farmhouse has a medium value due to its evidential, historical and aesthetic value.
- 3.4.164 Situated off a bustling road, Wood Farmhouse enjoys a sense of enclosure attributed to established hedges and a setback from the road. The surroundings blend agricultural fields with a mix of period and modern housing, albeit with a noticeable level of activity from passing traffic. Overall, the setting makes considerable contribution to the asset’s value but does not extend to the draft Order Limits.
- 3.4.165 ‘Canes Farmhouse’ (**1036949**) is a Grade II listed building found within Burstallhill, along Orchard Lands, c. 390 m south-west of the draft Order Limits. The farmhouse, potentially dating back to the 16th century boasts a rendered exterior with scattered casements, dormers, and distinctive doors. Brick stacks and a weatherboarded rear contribute to its character. Overall, this listed building has a medium value due to its evidential, historical and aesthetic value.
- 3.4.166 The setting is informed by its location in a farmyard and by its historical relationship with the surviving non-designated elements of the Cane's Farm farmstead, which is identified by the Suffolk HER (**3052**). The setting is further characterised by the surrounding agricultural and quiet landscape with which the assets have a functional

and historical relationship. Overall, the setting makes considerable contribution to the asset's value but does not extend to the draft Order Limits.

### **Burstall CP**

- 3.4.167 The Grade I listed asset 'Church of St Mary' (**1036948**), located c. 1 km west and c. 700 m south of the draft Order Limits, is a parish church built largely in the early 14th and 15th century, restored later in 1866 and 1870-73 by Fredrick Barnes of Ipswich. The asset is built in flint and rubble, part rendered, with stone plinths, quoins, further dressings and plain tile roofs.
- 3.4.168 The asset is located within the small rural settlement of Burstall, situated at the heart of the settlement along The Street. The church is situated within a maintained lawned churchyard, with limited vegetation giving the church a very open setting. The church is located close to some characterful properties and some modern properties within the village. There is a band of dense trees on the periphery of the churchyard to the west and south, limiting views in these directions. Surrounding the village are agricultural fields with bands of thick woodland to the south, beyond which is the Hintlesham Golf club. The National Grid Bramford 400kV Substation is located 1 km north of the asset. The rural village setting of the asset makes a considerable contribution to its value. The asset has aesthetic, historical and communal value and is high value. Its setting does not extend to the draft Order Limits.
- 3.4.169 'Mulberry Hall' (**1036947**), is a Grade II listed building located within Burstall, c. 600 m south of the draft Order Limits. This house is dating back to c. 1500, features a timber-framed structure with subsequent alterations. The asymmetrical facade includes two stories with four 3-light timber cross casements and a distinctive door. The house, historically linked to Cardinal Wolsey's estate, is a testament to its rich heritage. Overall, this listed building has a medium value due to its evidential, historical and aesthetic value.
- 3.4.170 This hall is positioned with a setback from the road, featuring a spacious front garden and an open setting. The property is delineated from the road by a low hedge or fence, while neighbouring post medieval Grade II farm buildings (**1351618**) border it on the right. The overall ambiance is one of openness and semi-rurality along a road that experiences moderate traffic. Its setting is further informed by its historical relationship with other listed buildings within the settlement: the medieval Grade I Church of St Mary (**1036948**) and the post medieval Grade II 'Half Moon' (**1351619**). Overall, the setting makes considerable contribution to the asset's value but does not extend to the draft Order Limits.
- 3.4.171 'Fenn Farmhouse' (**1351617**) is a Grade II listed building located along Thorpes Hill, c. 850 m south-east of Burstall. The draft Order Limits would pass approximately 15 m south-west of this farmhouse. The Order Limit is c. 180 m north-east of the asset. The farmhouse, originating from the late 15th or early 16th century, displays a charming timber-framed and brick exterior. The entrance front is adorned with replaced diamond mullioned casements, while the rear echoes this characteristic window style. Overall, this listed building has a medium value due to its evidential, historical and aesthetic value.
- 3.4.172 The farmhouse is situated adjacent to a very busy main road (A1071), contributing to a semi-exposed feel despite hedging and a wall. The surroundings consist of fields to the west and a private caravan and fishing club to the south. The rural ambiance is, however, accompanied by the constant noise from the adjacent lively road. The busy-ness of the road is a detractor however, this farmhouse would have been placed deliberately by this road. Therefore, the road does contribute to its

understanding. The setting is further informed by its historical relationship with the non-designated Fen Farm farmstead (**3162**) as well as with the surrounding agricultural land. The Farmstead (**3162**) is located partially within the draft Order Limits and is of low evidential value. Overall, the setting makes considerable contribution to the Grade II listed farmhouse's value and extends to the draft Order Limits.

- 3.4.173 Within Sproughton are found two medieval listed buildings in the study area, the Grade II\* 'All Saints' Church' (1285956) and the Grade II 'The Wild Man' (**1351646**). The church is located c. 940 m east of the draft Order Limits while the house is 740 m south-east of it. The church stands as a notable medieval structure with a square, unbuttressed west tower showcasing an embattled parapet and restored windows. The nave features a three-bay north and south arcade, and the south aisle includes a 2-light Decorated window, a 3-light Perpendicular window, and a porch with a 3-centre arched entrance. The church is further adorned with a 15th century octagonal font and various monuments, including one to Mrs Bull dated 1634, featuring a kneeling figure within an aedicule with angels and an achievement.
- 3.4.174 The Wild Man, with origins in the early and later 16th century, showcases timber-framed construction and a rendered exterior. Notable features include 20th century timber casements, a blocked doorway, and dormer casements. The interior, though altered, preserves stop-chamfered beams and exposed framing, highlighting the historic charm of the structure. Overall, while the church has high value due to its evidential, historical, aesthetic and communal value, the house has medium value based on its evidential, historical and aesthetic value.
- 3.4.175 The setting of both these assets is informed by their location within the settlement as well as their relationship with each other and with others listed buildings in Sproughton such as the post medieval Grade II 'Sproughton Hall' (**1285915**) and the post medieval Grade II 'Barn about 50 metres South West of Sproughton Hall' (**1351647**). Both assets are recorded on the first edition of the OS map of 1886. The direct surroundings of the church and house have not changed much since that time, but the built-up area has grown, particularly to the south, and the wider environment has been transformed by the addition of the A14, the emergence of industrial areas to the east and south-east and the development of Ipswich. Overall, the setting of the church and the Wild Man house makes considerable contribution to their value but does not extend to the Order Limit as it is limited in the settlement.

## Chattisham CP

- 3.4.176 Within the settlement of Chattisham are found three medieval listed buildings, the Grade II\* 'Church of All Saints' (**1351620**), the Grade II 'Church farmhouse' (**1036952**) and the Grade II 'The Claves' (**1193456**), between c. 260 m and c. 490 m north-west of the draft Order Limits. The church, originating in the early 14th century with later modifications, stands out with a reduced-height tower, distinctive aesthetic elements like diagonal buttresses, and a harmonious blend of flint, brick, and stone dressings. The nave, featuring rendered walls and 19th century perpendicular-style windows, complements the chancel with flint cobbles and buttresses. The farmhouse with its mix of 16th, 17th, and later 20th century elements, features a complex plan including a timber-framed 16th century wing, a 17th century cross range, and a 20th century addition to the north. As for The Claves, a late 15th or early 16th-century timber-framed house, it features exposed framing, a thatched roof, and scattered leaded casement windows. The house's historical character is preserved with a traditional design, including an axial brick stack and a 4-centre arched doorhead, showcasing its rural ambiance. Overall, they have a group value and while the

church has high value based on its evidential, aesthetic, communal and historical value, the two Grade II buildings have medium value due to their evidential, historical and aesthetic value.

- 3.4.177 The setting of the three listed buildings is informed by their location within the settlement as well as their historical relationship between each other and with other post medieval listed buildings such as 'The Old Rectory' (**1351622**), 'Chattisham Place' (**1036951**) and 'Cartshed at Chattisham Place' (**1351621**). While the setting of the Clayes is limited to its garden and to The Street, the setting of the church and the farmhouse is wider, with an open view to the south from the farmhouse. Overall, the setting of these three medieval listed buildings makes a considerable contribution to their value, but while the setting of The Clayes does not extend to the draft Order Limits, the one of the church and the farmhouse extends to it.
- 3.4.178 The scheduled monument 'Moated site at Moat Farm, 450 m south of Cobbler's Corner' (**1019889**), located c. 815 m north-west of the draft Order Limits, is a well preserved medieval moated site, which includes a roughly rectangular island, measuring 69 m north-south by 52 m east-west. The moat is water filled, measuring 10 m wide and 1.5 m deep, recently revetted with wood along the outer edge of the northern side of the moat. In the north-eastern corner a small pond feature extends out of the moat c. 14 m in diameter, potentially used for watering horses. The island would have been entered by a causeway, c. 5 m wide, along the eastern side of the moat, via a wooden bridge. The moated site appears on a map from 1595, which indicates there was a building at its centre named 'Tenements Claydons'. There is a post-medieval farmhouse to the north which is thought to have been the successor to the previous house on the island. The island remains largely undisturbed by post-medieval and modern activity, retaining archaeological structural evidence and buried features relating to the asset's development across its periods of occupation. There is potential for historical landscape understanding through buried silts in the base of the moat.
- 3.4.179 The asset is located 450 m south of Cobbler's Corner, where Woodlands Road meets Clay Hill. The asset is lined with mature vegetation, following the outline of the moat. The immediate and surrounding landscape is that of a rural, agricultural landscape, with some clusters of buildings close by and a linear settlement lining Duke Street to the north. The setting of the asset contributes considerably to its setting, located within a rural landscape and next to the successive post-medieval house which followed the previous medieval house located at the centre of the moat. There are some outbuildings immediately to the west which are a modern addition and disturb the asset's setting slightly, but there is some mature vegetation between these buildings and the moat. The asset has evidential and historical value and is high value. The setting of the asset does not extend to the draft Order Limits, with the landscape divided between the asset and the draft Order Limits by The Street, as well as intervening buildings, agricultural land and field boundaries.

### **Copdock and Washbrook CP**

- 3.4.180 Along Elm Lane, c. 500 m south-west to Washbrook and Copdock and c. 1.4 km east to the draft Order Limits is found the Grade II 'Tudor Cottage' (**1036933**). This cottage, likely built in the late 15th or early 16th century, showcases its historical evolution through subsequent modifications in the 17th, 18th, and 20th centuries. The timber-framed structure features a quaint two-story facade, rendered walls, and a pantile roof. Architectural elements include an off-centre brick stack, a 20th century porch, and various small-paned windows. Overall, the cottage has a medium value due to its evidential, historical and aesthetic value.

- 3.4.181 Nestled behind a lengthy driveway and surrounded by meticulously maintained gardens, Tudor Cottage exudes a sense of seclusion. The entrance imparts an enclosed ambiance, yet the immediate surroundings of the house unfold into an open, rural landscape, contributing to its quaint charm. The distant hum of busy roads is perceptible. The busy-ness of the road is a detractor however, this asset would have been placed deliberately by this road. Therefore, the road does contribute to its understanding. Overall, the setting of this property makes a considerable contribution to its value but it does not extend to the draft Order Limits.
- 3.4.182 'Dakons' (**1036897**) is a Grade II listed building located along Pigeons Lane, c. 1 km north-west of Washbrook and Copdock, c. 280 m south-west of the draft Order Limits access, and c. 390 m south-east of the draft Order Limits. The house, constructed in the first quarter of the 16th century and later, showcases a timber-framed exterior encased in brick. The front gable wall features c. 1700 mixed bond brickwork, with a boarded door under a 20th century porch and first-floor casements exhibiting soldier arches. Overall, the house has a **medium value** due to its evidential, historical and aesthetic value.
- 3.4.183 Dakons' House is situated set back from the road, with a hedge and fence creating a separation, and it boasts a large front garden. The setting imparts a distinctly rural ambiance, surrounded by a mix of both period and modern properties. However, the visual landscape to the north is notably affected by a new build opposite, which now dominates a significant portion of the surrounding view. The broader surroundings maintain a serene and rural atmosphere. This setting is further informed by its relationship with the non-designated Washbrook Street (**3160**). Overall, the setting makes a moderate contribution to its value and does not extend to the draft Order Limits.
- 3.4.184 Located c. 700 m north-west is the Church of St Mary (**1194408**), a Grade II\* listed building, found c. 425 m south-east of the draft Order Limits. The church, with origins dating back to the 12th century and notable early and later 14th-century features, presents an intriguing exterior. The three-stage square tower, crowned with an embattled brick parapet, incorporates early brickwork and diagonal offset buttresses. The exterior also reveals a north baptistry, a 19th century addition with matching plinth and banding, contributing to the church's aesthetic value. Overall, this church has a **high value** due to its evidential, historical, communal and aesthetic value.
- 3.4.185 Nestled within a secluded valley, the church is an isolated presence, devoid of immediate neighbouring settlements except for a solitary house. The picturesque surroundings offer expansive views down the valley, with the church occasionally visible from elevated vantage points across the wider landscape. The setting is characterised by a blend of scrubland and wooded areas, creating a serene and distinctly rural ambiance. The setting is also informed by the relationship between the church and its churchyard as well as the low value earthworks of an extraction pit and a bank of unknown date (**3190**). The non-designated assets here hold evidential and historical value. Overall, the setting of the church makes a considerable contribution to its value and extends to the draft Order Limits with a close draft Order Limits permanent access.

### Belstead CP

- 3.4.186 The Grade II\* Church of St Mary (**1194048**) is located c. 400 m east of Belstead, c. 2.1 km south-east of draft Order Limits. The church reflects a rich historical tapestry with elements dating back to the 16th century. The exterior showcases a square 14th century tower with a brick embattled parapet, strategically set against the middle bay of the nave. The south nave features a 2-light 14th century window, while the west

window has been restored in a 1980s Perpendicular style. The chancel exhibits two 2-light cusped Y-traceried windows with almost triangular heads. Notably, the north chapel, dating from the 16th century and later, presents a white brick embattled parapet and 19th century plain lights beneath 16th century moulded brick 4-centre arched hoods. The architecture seamlessly weaves together various historical periods, creating an exterior adorned with distinctive features that narrate the church's enduring legacy. Overall, this church has a high value due to its evidential, historical, communal and aesthetic value.

- 3.4.187 Perched atop a hilltop, the Church of St Mary commands a serene presence at the village's edge. The churchyard, enclosed by a wooden fence and sparse hedgerow, offers a tranquil retreat. The broader setting unfolds with picturesque pasture fields dedicated to sheep, expanses of farming land, and interconnected access roads linking neighbouring villages. Despite the tranquillity of the local roads, the persistent hum of traffic noise from the nearby A14 motorway is discernible, a constant reminder of the broader regional activity. This road changed the wider setting of this asset since its creation, but the immediate setting did not change and is characterized by a serene churchyard, enclosed by established trees, and a wooded area, fostering a peaceful and secluded atmosphere. Its setting is also informed by its proximity with the post medieval Grade II\* 'Belstead Hall' (**1351648**) and its Grade II barn (**1285906**). Overall, the setting makes considerable contribution to the assets' value but does not extend to the draft Order Limits.
- 3.4.188 The Grade II\* listed Church of St Peter (**1194324**) is located c. 400 m east of Belstead, c. 1.5 km south-south-east of draft Order Limits. The exterior of the Parish Church of St Peter reflects a blend of medieval and later architectural styles. The three-stage embattled tower, dating back to the 14th century, stands with diagonal buttresses and a stair turret. The nave, primarily constructed in the 15th century, features stepped buttresses and panel-traceried windows on each side. A south porch, built with flint and brick, enhances the architectural character, while well-preserved features like the octagonal font and west gallery contribute to the church's historical and aesthetic value. Noteworthy features include the tomb of John Marven, a renowned bellringer who passed away in 1789. To the northeast, a Commonwealth War Graves site adds historical value. Overall, this church has a high value due to its evidential, historical, communal and aesthetic value.
- 3.4.189 The church is situated in a churchyard adorned with mature trees, but with its west side more open. The elevated position provides a vantage point overlooking the new A12 and A14, c. 400 m east of the church, that changed the tranquillity of its setting. Positioned to the east of the village, adjacent to the post medieval Barn at Copdock Hall (**1351635**), also a Grade II listed building, the church finds itself in a rural landscape near the Old A12. Its setting is informed by the historical relationship between the church and the listed barn. Changes in infrastructure, such as the A12/ A14, may have potentially influenced the parish borders, therefore, the setting makes a moderate contribution to its value and does not extend to the draft Order Limits.
- 3.4.190 The 13th century 'Old Hall' (**1193864**) is a Grade II\* listed building located between the Belstead village and Capel, c. 2.7 km south-east of an draft Order Limits permanent main access route and c. 3 km south-east of the draft Order Limits. This hall, a 13th/14th century timber-framed residence with subsequent modifications, showcases features like a distinctive chimney stack and hipped crosswing. The entrance is adorned with pilasters, a dentilled canopy, and a sturdy 3-board door. Overall, this asset has medium value due to their evidential, historical and aesthetic value.

- 3.4.191 The property is situated in a quiet and peaceful rural setting. It is surrounded by open flat fields to the south, south-west, and north, while dense woodland occupies the northeast and west. The expansive fields contribute to the area's openness. The immediate surroundings include farm-related buildings and a yard. Overall, the setting of this property makes a very considerable contribution to its value, but it does not extend to the draft Order Limits.
- 3.4.192 'Woodsend And No 1 Woodsend' (**1036891**) is a Grade II divided house, dating back to c. 1500 with later extensions and restoration in the 1980s. It boasts an exposed timber frame and plain tile roofs. It is located along London Road, c. 1.6 km north-east of Capel, c. 1.7 km south-east of an draft Order Limits permanent access and c. 2.3 km south-east of the draft Order Limits. This listed structure has a **medium value** due to its evidential, historical and aesthetic value.
- 3.4.193 The property is prominently positioned along a busy road, separated by a brick wall and sporadic bushes. The road's considerable traffic generates a constant and noticeable noise both to the front and rear of the house. The busy-ness of the road is a detractor however, this house would have been placed deliberately by this road. Therefore, the road does contribute to its understanding. The surroundings contribute to an open ambiance, as the nearby houses are modern rather than period, creating a contrast with the historical character of the property. However, its close position to the A12, c. 130 m west, affect its value. Overall, the setting of this property makes a moderate contribution to its value. Also, the setting does not extend to the draft Order Limits.

#### *Non- Designated Heritage Assets*

- 3.4.194 A **low value** moat at Burstall Hall (**3103**) is situated c. 2 km north-west of Sproughton, with the south-western boundary within an draft Order Limits permanent access route. The asset is an L-shaped remnant of a possible sub-rectangular moat which surrounds Burstall Hall Farmstead (**3114**). The low value farmstead is visible on the first edition OS map and is laid out in a dispersed plan. The farmhouse is set away from the yard within a rural and isolated location. There has been significant loss of the working buildings with the remainder being converted for residential use. These assets have evidential value.
- 3.4.195 The **low value** Ipswich to Bury St Edmunds railway line (**3244**) cuts through the draft Order Limits from Stowmarket in the north-west to Needham Market in the south-east. The Ipswich and Bury Railway was built as part of an extension of the Eastern Union Railway in November 1846 and was merged with the railway in July 1847. In the present day, this stretch of line is part of the Great Eastern Main Line Service and also forms part of the Ipswich to Ely line. This asset has historic and evidential value.
- 3.4.196 A **low value** moat (**3047**) is present at Colegreen Farm, Chattisham, c. 135 m from an draft Order Limits permanent access. This asset is of an elongated rectangle shape, with the western and northern 'arms' with water, and the southern and eastern 'arms' having been filled in. The north-western corner of the moat overlaps the boundary of the low value post medieval farmstead (**3105**) at Coles Green Farm, c. 75 m east of the draft Order Limits. The farmstead is visible on the first edition OS map and is laid out in a regular courtyard plan with additional detached elements and is set within a rural and isolated location. The farmhouse is set away from the yard, and there has been partial loss of the working buildings. These assets hold historic and evidential value.
- 3.4.197 There was a **low value** bronze padlock with distinct characteristics (**3246**) found within the draft Order Limits. The padlock is composed of a square section chamber

that includes a projecting area housing a keyhole. On the opposite side, there is a corroded attached rod, potentially depicting the head of an animal. The padlock measures a maximum length of 55.2 mm and stands at a height of 40 mm. This artifact provides valuable historical evidence of the craftsmanship and locking mechanisms utilised during the medieval period. The asset holds evidential and aesthetic value.

- 3.4.198 A low value artefact scatter which contained pottery (**3048**) c. 200 m south of an draft Order Limits permanent access that transects Washbrook Road and Pigeons Lane. This asset has evidential value.
- 3.4.199 A low value coin (**3051**) was found in the 250 m study area of the draft Order Limits in the Washbrook and Copdock area. This asset is a copper-alloy Rose farthing of King Charles I dated c. 1625-1949 and has evidential value.
- 3.4.200 Several low value PAS assets were found in the region of the draft Order Limits near Sproughton. These assets have evidential and historical value and comprise:
- A silver medieval penny (**3053**) from the reign of Edward I, dated c.1302-1310
  - A silver penny (**3054**) dated from the reign of Edward III in the post-Treaty period c.1369-1377
  - A very worn silver penny (**3055**) probably from the reign of Edward III c. 1351-1377
  - A half of a silver penny (**3056**), estimated to be from the reign of Henry V c. 1413-1422
  - A mount (**3057**) which was a complete cast copper-alloy bar mount with a pendant loop from the Medieval period. It is rectangular and bevelled at the terminal end and was cast in two parts
  - A buckle (**3058**). This asset is a d-shaped frame, oval in section, and constructed out of an incomplete cast of copper alloy. The bar is narrowed and offset for the pin which was present
  - A buckle (**3059**). This asset was a cast copper-alloy buckle from the Medieval period and was of an oval lipped frame with a plate and was d-shaped in section
  - A buckle (**3060**) This asset was an oval cast copper-alloy buckle frame with a rectangular integral plate which is sub-triangular and tapered towards the attachment end
  - A strap end (**3061**) was and consisted of a folded sheet metal in a rectangular shape and section. The asset had a missing end where one of the two attachments would have been. The asset had two holes in the attachment end for separately cast rivets, of which, one was present
  - A strap end (**3063**) was also found. This asset was an incomplete cast copper-alloy strap end, circular in shape, and rectangular in section. It was uncertain which end was the top, but an acorn motif was suspended from a stem on one of the ends
  - A strap fitting (**3064**) was found and consisted of a rectangular shape. The front face was decorated with a single line border with a series of horizontal, vertical, and diagonal lines within it

- A buckle (**3066**). This asset was an incomplete cast copper-alloy edge of a possible buckle frame, the rest was missing due to old breaks. The buckle was decorated with an oval knop pierced by two circular holes in the middle of the outer edge and the frame itself was decorated with a central groove
- A buckle (**3067**) was an incomplete cast copper-alloy buckle frame from the medieval or post medieval period. Both the inside and the outside edges were decorated with a central triangular knop with semi-circular knops above and below
- A key (**3068**). The key was a cast copper-alloy key from the medieval or post medieval period and was cast in a single piece with a circular bow which was oval in section
- A copper-alloy tap (**3070**) was cast and comprised of a tapering cylinder with a central circular perforation. On the top of the tap sat a cast flat, undecorated cockerel with a three-pointed comb
- Metal working debris (**3077**) consisted of two fragments of cast copper-alloy most likely as a result of metal working
- A furniture fitting (**3079**) was a cast copper-alloy circular bar and was assumed to be an incomplete handle possibly for a casket or a drawer. The asset was divided into three ovals with collars made of two bands between them
- A buckle (**3080**). This asset was a cast copper-alloy double looped buckle frame. The buckle frame and strap bar survive intact, but the pin was missing. Neither loop of the frame has a pin
- A low value buckle (**3082**) was found within the Burstall, Sproughton, and Hintlesham geographic regions. This asset was a cast copper-alloy buckle with an oval frame with an offset and cylindrical bar and thickened outer edge. Traces of gilding are visible on both the frame and the plate, and the pin is missing due to historic breaks. This asset is nearly identical to an example found in London and holds evidential and historic value.
- A low value finger ring (**3083**) was found within the Burstall, Sproughton, and Hintlesham region. The design of the ring features a bezel in the form of two clasped hands with a hoop made from a strip of metal with the ends soldered together at a butt joint. The motif originated in the Roman period but became more popular through the 15th century in Europe with fide rings given during betrothals or marriages. This asset has evidential and historical value

## Raydon, Great Wenham and Capel St Mary

### *Designated Heritage Assets*

#### Raydon CP

3.4.201

The 'Church of St Mary' (**1286247**) is a Grade II\* listed building located within the settlement of Raydon, c. 750 m west of the draft Order Limits. The Church, dating from the late 13th to early 14th century and restored in 1883, showcases a distinctive aesthetic value. The exterior features a square bell house with louvres and a pyramidal roof, contributing to the visual character of the structure. The nave exhibits offset buttresses, and the south side presents a well-preserved late 19th-century gabled porch housing the original entrance, adorned with a niche. The churchyard, complementing the architectural richness, encompasses a wall tablet

commemorating John Mayor, adding historical depth to its value. Overall, this church has high value based on its evidential, historical, communal and aesthetic value.

- 3.4.202 Its setting is informed by its location within the settlement as well as its relationship with other listed buildings which are scoped out from the study area. The church, centrally positioned in the village churchyard, is accessed through two entrances, one with a low wall and iron gate on the east side, featuring a memorial. A hedge borders the south side, while mature trees encircle the churchyard to the north and west, creating a semi-residential, semi-rural ambiance. The western entrance, marked by a small wooden gate, leads to a relatively quiet space. Fields with horses and associated structures characterize the west and north, providing a pastoral backdrop. To the east lies the village's main road, generating audible traffic sounds within the churchyard. Despite this, the overall setting exudes a tranquil atmosphere, complemented by the compact size of the churchyard. Therefore, the setting of the church makes a considerable contribution to its value but does not extend to the draft Order Limits.
- 3.4.203 'Raydon Hall' (**1193333**) is a medium value Grade II listed building located c. 200 m north-east of the settlement of Raydon and c. 440 m west of the draft Order Limits. The Hall, now divided into two dwellings, exhibits architectural elements spanning the probable early 16th century hall range and a later 16th century cross wing. The cross wing, once jettied, reveals a rebuilt right return in red brick, housing an external off-set stack with a reconstructed upper part in the 20th century. The Hall has evidential, historical, and aesthetic value. The asset is accessed via private trackways, with one being gated access. The asset is located within a farmyard complex which includes a garden to the west of the asset, the farmyard to the east and a wider agricultural landscape. The Hall (**1193333**) is situated in the south-western edge of the non-designated RAF Raydon (**3189**).

### Wenham Magna CP

- 3.4.204 The Grade II\* 'Wenham Place' (**1351955**) and Grade II 'Walled Garden attached to north of Wenham Place' (**1285667**) are located c. 100 m south of Great Wenham Place, c. 1.3 km east of the draft Order Limits. Wenham Place (**1351955**) was built in the early 16th century and has had alterations and additions made since its construction. The red brick in Flemish bond exterior with exposed timber framing and infill on the northern façade is from its original construction, with some of the red brick in English bond on the southern façade being added later. The changes in the brick laying styles indicate a change in aesthetic preference of the time in which they were created, as well as indicate addition of a new part of the building. The asset has a red pan tiled roof and is laid in a 'L'-shaped plan with the medieval wings to the east and north, and the post-medieval wings to the north and south-east, and a taller range to the west. There are original interior features inside Wenham Place, such as a brick spiral staircase, moulded joists, an arched fireplace, and a possible Jacobean overmantel which add to the historic and aesthetic value of the asset. Damage made to the roof by the agricultural riots in the 19th century add historic provenance to the value of the asset too. An owner of Wenham Place, Willie Lot, also owned a cottage at Flatford which was featured in a painting by John Constable.
- 3.4.205 The Walled Garden attached to the north of Wenham Place (**1285667**) was constructed in the 16th century, most likely at the same time as Wenham Place (**1351955**), and features repairs from a later date, and a 19th century summer house. The wall is constructed of red brick with some diapering and is c.3 m in height. It encloses a rectangular garden on the northern side of Wenham Place (**1351955**). The south-western side of the wall is stepped and has a polygonal buttress at the

angle which may show the remains of a former wing of the main house. There is a 19th century summer house with a round-headed archway and with carved barge boards, as well as gateways on the north and west walls. There are two bee holes within the north wall.

- 3.4.206 Wenham Place (**1351955**) and the Walled Garden (**128566**) have group value and also hold evidential, aesthetic, and historic value. While Wenham Place has high value based on its evidential, historical and aesthetic value, the walled garden has medium value based on the same qualifying values.
- 3.4.207 Their setting is informed by their roadside location and being both in at the entrance of a yard. It is also informed by their historical and functional relationships. Wenham Place enjoys a quiet atmosphere, with expansive flat agricultural fields and large farm buildings to the west. The adjacent Walled Garden, set amidst agricultural buildings to the east, complements the overall rural feeling. These assets are documented on the OS map from 1886, and their immediate as well as broader surroundings have remained unchanged since then. Overall, their setting makes very considerable contribution to their value but does not extend to the draft Order Limits.
- 3.4.208 The Grade II\* 'Priory Farmhouse' (**1351956**) and the Grade II 'Old Rectory' (**1194528**) are both located within the settlement of Great Wenham, c. 1.2 km east of the draft Order Limits. The Priory Farmhouse boasts a timber-framed structure with evidence of 15th century or earlier origins, a 1699-dated chimney stack, and various wings revealing the passage of time. Further south-west, c. 140 m, the Old Rectory, with a 16th century or earlier origin, presents an exposed timber frame and later Georgian and Victorian wings. Although the frame retains its integrity, some features have been introduced from elsewhere. Overall, while the Priory Farmhouse had a high value, the Old rectory holds a medium value, both based on their evidential, historical and aesthetic value.
- 3.4.209 Their setting is informed by their location within the settlement. Both properties are documented in the first edition of the OS map dating back to 1886. Since that time, only the northern part of the settlement has undergone alterations, witnessing the emergence of new dwellings that primarily affect the setting of the northern section of Priory Farmhouse's yard, obstructing the westward view. Nestled in the eastern end of Great Wenham, the Priory Farmhouse enjoys a secluded ambiance accessed via a private trackway. Surrounded to the north by agricultural buildings, its wider setting includes expansive agricultural fields, the nearby Grade II\* St. John's Church (**1033403**) and other listed buildings such as the Old Rectory (**1194528**), the 'Walnut Thatch' (**1033402**) and the 'Pump Adjacent to Scullery Wall Priory Farmhouse' (**1285636**), the latter being scoped out from the study area. Opposite St. John's Church (**1033403**), the Old Rectory stands with a front garden enclosed by a brick wall and gate. While neighbouring residences are nearby, the south and east sides of the property are embraced by fields, providing a quiet and rural setting. The mature trees contribute to the privacy of the Old Rectory's garden. Overall, the setting of both the Priory Farmhouse and the Old Rectory makes considerable contribution to their value but does not extend to the draft Order Limits being limited to the settlement.
- 3.4.210 'Walnut Thatch' (**1033402**), a Grade II listed house with origins in the 16th century is located within Great Wenham, c. 1 km east of the draft Order Limits. Its exposed timber frame, red plain tiled roof, and red brick chimney stacks exemplify a historical charm. Combining evidential, historical, and aesthetic elements, Walnut Thatch is recognized as a medium value heritage asset, contributing to the cultural richness of its surroundings and preserving a tangible link to the past.

- 3.4.211 Walnut Thatch enjoys a strategic location at a Y junction, situated behind a well-maintained garden that creates a buffer from the road. The thick, well-established hedge effectively shields the asset from immediate view, fostering a sense of privacy. The surrounding environment is characterized by characterful properties within a small, dispersed settlement. Opposite the house, the Grade II\* listed 'St John's Church' (**1033403**) contribute to the historical and cultural context. Overall, the setting of Walnut Thatch makes a considerable contribution to its value but does not extend to the draft Order Limits.
- 3.4.212 'Wenham Hill' (**1285661**) is a Grade II listed building located c. 700 m south of Great Wenham and c. 1.6 km east of the draft Order Limits. Wenham Hill, a residence with H-shaped architecture dating back to the 16th century or earlier, presents a distinctive exterior marked by four imposing red brick chimney stacks. Overall, it holds a medium value based on its evidential, historical and aesthetic value.
- 3.4.213 Wenham Hill is situated along a private road within an expansive and private landscaped parkland, surrounded by mature trees that contribute to its sense of seclusion. The property's setting is further enhanced by the inclusion of agricultural fields in its wider surroundings. Notably, there is the recent construction of the A12, located approximately 600 meters to the south of the asset, but it cannot be seen from the house. Overall, the setting is limited to the parkland and does not extend to the draft Order Limits. In addition, the setting makes a considerable contribution to the asset's value.

### Wenham Parva CP

- 3.4.214 The following assets (**1003759**, **1033405**, **1033410**) form part of a group of medieval assets located within the grounds associated with Wenham Castle (**1003759**) and are assessed below:
- 3.4.215 The high value scheduled monument 'Wenham Castle (Little Wenham Hall)' (**1003759**) which is also Grade I listed (**1033405**), located c. 1.5 km south of the draft Order Limits, was built in the latter half of the 13th century, believed to be 1260-1290, and comprises a hall and chapel. During the middle of the 16th century some minor alternations were made to the building. The asset is a fortified manor house in an L-shaped plan, containing a Tudor-roofed banqueting hall over the Chapel of St Petronilla with piscina (shallow basin used for washing communion vessels) and aumbrey (recessed cabinet in church wall for containing sacred vessels and vestments). Built in early Flemish brick and ashlar with an embattled parapet and with a turret termination to spiral stair leading to the roof. The asset is surrounded by a moat which encloses a large area than just the castle, taking in other buildings many of which are listed also. The asset is of great importance as it represents an example of one of the earliest uses of home-made bricks in England, also in the fact it was built with the purpose of being a house and not a keep.
- 3.4.216 The asset is located on the periphery, c. 1 km north-east, of the settlement of Little Wenham, within a property containing multiple other barn-style buildings, in part still surrounded by the original moat which is associated with the asset. The asset is lined by a band of mature vegetation to the west and south, positioned on the external side of the moat. The asset is surrounded in the wider landscape by agricultural land, with some settlements close by, the closest being Capel St Mary c. 430 m to the south-east. The settlement of Great Wenham is situated c 1.1 km south-west of the asset. the asset is located on the eastern side of a tributary valley which Stutton Brook runs south to the A12 where is then flows south-east towards the River Stour Estuary. This position next to the tributary was likely a key consideration in the construction of the asset, placing it next to a point of resource in the landscape and likely providing a

means without to create the water filled moat which once surrounded the entire property containing the asset. The setting of the asset makes a considerable contribution to the value of the asset, despite the settlement growth of Capel St Mary to the south-east, which is screening by a thick band of woodland. Moreover, the removal of the railway way line of LNER Hadleigh Branch which ran to the north-east of the asset, this once proximal transport features has been removed, however a band of vegetation following the old railway line still transects the landscape. Overall, the setting of this asset does not extend to the draft Order Limits.

- 3.4.217 The Grade I listed asset 'Church of St Lawrence, Formerly Church Of All Saints' (**1033410**), located c. 1.2 km south-east of the draft Order Limits pipeline and 1.4 km south of the draft Order Limits, is a 13th century parish church with 14th, 15th and 16th century additions. The 15th century west tower is built from mainly rubble and flint with some flint flushwork, with 16th century red brick bell chamber to the tower with ashlar and stone dressings. The south porch is timber framed, with a brick dwarf wall. Red plain tile roofing covers the nave and chancel. There is 17th and 18th century panelling within the church.
- 3.4.218 The asset is located within the grounds of a moated site with multiple other listed buildings and a schedule monument. The asset is on the northern edge of the collective group of buildings within the moated site. The asset is located off the The Row, a road that leads into the settlement of Little Wenham. To the south-west, south and south-east of the asset is a band of mature trees providing some screening into the landscape. To the north there are open views over farmland towards the LNER Hadleigh Branch railway that used to run across the landscape north-west to south-east. The setting of the asset contributes considerably to its value. The asset has aesthetic, evidential, historical and communal value and is high value. The setting of the asset does extend to the draft Order Limits situated just beyond the route of the former LNER Hadleigh Branch Railway.
- 3.4.219 The 'Church of St John' (**1033403**), designated Grade II\*, stands as a heritage structure with high value, underscored by its evidential, historical, and aesthetic value. The church is located within Great Wenham, c. 1.1 km east of the draft Order Limits. The church exhibits a harmonious blend of architectural styles, including a 14th century chancel with an added south porch, a 14th century nave featuring north and south porches, and a 15th century west tower. Flint with stone dressings characterizes the tower, while the rest of the church is plastered with exposed stone windows. The timber-framed south porch adds a distinctive touch to the nave. The west tower, buttressed and adorned with louvred bell chamber windows, boasts a four-centred head west window.
- 3.4.220 The Church of St John, nestled within a churchyard occupies a central position in the heart of a village. Surrounded by residences to the south and east, the church is situated along a road, elevated above the surrounding terrain. A field adorns its northern boundary, complemented by the presence of mature trees enhancing the churchyard's ambiance. This setting, slightly elevated from the road, offers a serene atmosphere. Beyond the immediate vicinity, the landscape opens up to fields and a rural expanse, contributing to the overall charm of the locale. While the setting makes a considerable contribution to the church's value, it does not extend to the draft Order Limits.
- 3.4.221 'Threeways' (**1033404**), a Grade II listed house tracing its origins to the 16th century with subsequent alterations and 20th century restorations, possesses a medium value rooted in its evidential, historical, and aesthetic value. The timber-framed and plastered structure, adorned with red plain tiled roofs, exhibits a jettied crosswing to

the left and a hipped and gabled right range with later brick additions. This asset is located in Little Wenham and c. 1 km east of the draft Order Limits.

- 3.4.222 Threeways is positioned at the corner of a road, slightly set back, creating a sense of enclosure with the presence of hedges and established trees. The wider setting unfolds into a predominantly rural and agricultural landscape, contributing to a quiet atmosphere. Therefore, the surroundings make a considerable contribution to the asset's overall value. However, the setting does not extend to the draft Order Limits.
- 3.4.223 North of Little Wenham, c. 500 m, is found the Grade II 'Manor Farmhouse' (**1194545**) located c. 720 m south, and 880 m east of the draft Order Limits. This house, a 16th century or earlier timber-framed dwelling with red plain tiled roofs, showcases a classic L-shaped design. This house has medium value based on their evidential, historical and aesthetic value.
- 3.4.224 Nestled just off the main road and separated by a front garden, Manor Farmhouse enjoys a setting surrounded by expansive agricultural fields and an open landscape. The property's open garden is enclosed by wooden fencing, providing a quiet outdoor space. The initial edition of the OS map from 1885 features this property, and over the years, commercial activities have emerged approximately 300 meters to the north-west of the asset. Overall, the setting of this asset makes a considerable contribution to the asset's value but does not extend to the draft Order Limits.
- 3.4.225 Found c. 2 km north of Little Wenham, the Grade II listed 'Vauxhall' (**1351957**) is a listed building located c. 240 m west of the draft Order Limits. Dating back to c. 1500, this timber-framed house features a red plain tiled roof and a prominent off-centre red brick chimney stack. Situated on a moated site, this property holds historical value, having been previously owned by the Vaux Family and later linked to Leigh Priory in Essex. Overall, this house has medium value based on their evidential, historical and aesthetic value.
- 3.4.226 Nestled in a quiet and rural setting, the property is surrounded by expansive agricultural fields that contribute to the serene ambiance. The undulating landscape features large, open crop fields, creating a picturesque environment. To the south, there is a farmyard, and beyond stretch several woodlands, enhancing the overall tranquillity of the location. Overall, the setting of this asset makes a very considerable contribution to the asset's value and extends to the draft Order Limits.

### Capel St Mary CP

- 3.4.227 Church of St Mary' (**1285712**) is a Grade II\* listed building located within Capel, along The Street, c. 2.4 km south-east of the draft Order Limits. The Church of St Mary, with its medieval origins, showcases a mix of architectural styles. The 13th/14th century chancel, 15th century nave, south porch, and west tower form an integral part of the church's exterior. The intricate details include features like buttresses, cinque foiled windows, and a notable porch with carved embellishments. The west tower, displaying elements of the mid-12th century, boasts red brick repairs and a distinctive embattled top. The historic and well-maintained exterior, along with the surrounding graveyard, contributes to the church's value. In addition, the church has a group value with other listed buildings around it, within the settlement, but outside the study area. Overall, the church has high value based on its evidential, historical, communal and aesthetic value.
- 3.4.228 Its setting is informed by its location within the settlement as well as within a churchyard. The church commands an elevated position on a hill, including its cemetery, providing a scenic vantage point. Despite the elevation, a busy road runs alongside, generating noticeable traffic noise within the churchyard. The entrance

faces the road, but a hedge shields the view to the south. The busy-ness of the road is a detractor however, these assets would have been placed deliberately by this road. Therefore, the road does contribute to their understanding. The cemetery encircles the church, and nearby residences are visible from various angles. The elevated location allows the church to be seen from a distance, contributing to its prominence in the surrounding residential area. The presence of mature trees and a recent building attached to the north complements the overall setting. Overall, the setting makes a considerable contribution to the church's value. It is important to highlight that, while the setting greatly enhances the asset, it does not extend to the draft Order Limits.

- 3.4.229 'Spring Hill' (**1033397**), a Grade II listed house dating back to the 16th century or earlier, holds a medium value based on its evidential, historical and aesthetic value. The timber-framed and plastered exterior, with red plain tiled roofs, reflects historical evolution through later additions. Notable elements include an off-centre left red brick chimney, a jettied design, and a 1577 plaster date. The two-bay gabled range and a 20th-century lean-to porch contribute to its architectural character.
- 3.4.230 Spring Hill is positioned approximately c. 270 m south of Capel and approximately c. 2.4 km east of the draft Order Limits. It is situated along a private road within a landscaped area, enveloped by mature trees and agricultural fields. Overall, the setting makes a considerable contribution to the asset's value, but it does not extend to the draft Order Limits.
- 3.4.231 Along Grove Lane, c. 500 north of Capel, are two Grade II listed buildings, the 14th century 'Jermyns Farmhouse' (**1285740**) and the 16th century 'Barn approx 30 metres South West of Jermyns Farmhouse' (**1033434**). There are located c. 1.4 km south of the draft Order Limits. They both have medium value based on their evidential, historical and aesthetic value.
- 3.4.232 Their setting is informed by their location at the end of a track, in a farmyard. It is also informed by their relationship with each other. Their setting is further characterized by the surrounding agricultural landscape with which these assets have a functional and historical relationship. Overall, their setting makes great contribution to their value but does not extend to the draft Order Limits.
- 3.4.233 At the end of Grove Lane, c. 700 m north of Capel, is the 16th century or earlier 'Wenham Grove Farmhouse' (**1194667**), a Grade II listed building located c. 1.2 km south of the draft Order Limits. The farmhouse, with its exposed timber frame, painted brick-faced wall, and distinctive eaves brackets, presents a blend of history and modern features. This house has medium value based on their evidential, historical and aesthetic value.
- 3.4.234 Its setting is informed by its location in a farmyard, with other agricultural buildings. The setting is further informed by the surrounding agricultural landscape with which the asset has a functional and historical relationship. Nestled within private land and surrounded by farmland with a gently undulating terrain, Wenham Grove Farmhouse enjoys a quiet setting at the end of a quiet rural trackway. The expansive and flat surroundings impart a serene sense of space to the property. Overall, the setting makes a very considerable contribution to the farmhouse's value but does not extend to the draft Order Limits.

### Shelley CP

- 3.4.235 The scheduled monument 'Moated site and remains of demolished parts of Shelley Hall, a post-medieval great house' (**1019815**), located c. 2.1 km north-west of the draft Order Limits is a moated site and remains of demolished parts of Shelley Hall.

The Moat is thought to have been contemporary with the present Shelley Hall, created as a garden feature for Sir Philip Tilney in the early 16th century. The moat is situated c. 32 m east of the present Shelley Hall, including a square island c. 50 in diameter. A geophysical survey was conducted that revealed the outline of the buried remains of a formal garden, identifying linear features and a small square structure, which is possibly a dovecote identified in a survey from 1533. The square island is surrounded by a partly waterfilled moat measuring 14 m wide and 3 m deep. The outer side of the western edge of the moat is lined with brick in some places, with aerial imagery suggesting this brick lining and riveting may have once covered all four sides of the moat, both on the inner and outer edges. There is a brick bridge on the western side of the moat leading to the central island, aligned with a Tudor door which was originally part of the gate house. This may indicate that the builder incorporated the moat and building into the original plan, or alternatively the moat may be a modification of an earlier medieval site, perhaps the medieval manor of Shelley c.1519, predating Shelley Hall. Structural remains highlighted through geophysical surveys may also indicate this presence of a former house. Shelley Hall is thought to have been much larger than it is today, with some of the surviving buildings not included in the scheduling (a range of the asset aligned north-south with a cross wing at the southern end and the gatehouse projecting westward from the north-west corner), with some of the house obscured by 19th century additions (east face of the gatehouse). There are earthworks which indicate foundations of earlier demolished sections of the house, these are included in the scheduling. Remains features also include garden walling, assumed to be remains of a two-storey range, thought to be an alley linking a kitchen in the west to a hall to the east of the courtyard, opposite the moat. This sectioning of walling is also included in the scheduling. Queen Elizabeth I paid a visit to the Tilney Family (cousins of the Queen) at the Hall on 11th August 1561. Work was undertaken in 1999 on the moated site to recreate a 16th century garden on the island, these works included raised ponds so as not to disturb any buried archaeological remains. The ground beneath modern features is included but the above installations such as fences and modern paths are not included, a later section of the walling, connected to the 16th and 17th century garden wall, is also excluded, however the buried remains of the wall below the modern installations are included.

3.4.236 The asset is located 300 m to the south-west of Shelley parish church, on the south-west edge of the small rural settlement of Shelley. The scheduled monument is located within private grounds, located off Shelley Road down a long circular private drive. The asset is shielded from the east by a dense patch of woodland that borders the asset. The asset is surrounded in the wider landscape by small patches of woodland and much agricultural land. To the east of the asset are more buildings associated with the Shelley Hall estate. The setting of the asset contributes considerably to the value, in association still with the Shelley Hall estate, with surrounding gardens providing a distinction between the asset and the landscape, whilst also providing some screening. The asset is located within a rural landscape, with some small settlements placed in the vicinity. The asset has historical, evidential and aesthetic value and is high value. The setting of the asset does not extend to the draft Order Limits.

3.4.237 The 'Church of All Saints' (**1351959**) is a Grade II\* listed building located within the settlement of Shelley, c. 2 km north-west of the draft Order Limits. The church presents a harmonious blend of architectural elements spanning several centuries. The early 14th century structure, possibly with earlier origins, showcases a diverse range of features, including the distinctive red brick Tylney Chapel from the 16th century and a thoughtfully preserved south porch. The flint and ashlar construction,

complemented by brick crenelations on the north tower, contributes to the church's visual appeal. Overall, this church has high value based on its evidential, historical, communal and aesthetic value.

- 3.4.238 The Church of All Saints is situated in a commanding position within its churchyard, elevated above the adjacent road. The open boundaries allow for unobstructed views of the church, creating a serene and rural atmosphere. Residences to the east add a sense of community, while the western side faces some traffic from the nearby road. A track to the south and expansive fields to the west, south, and northwest contribute to the quiet surroundings. The church shares a heritage group value with three other listed buildings that are scoped out from the study area, as well as a scheduled monument (**1019815**) and three additional listed buildings to the southwest that are also scoped out, enhancing its historical context within the local landscape. Overall, the setting of the church makes a very considerable contribution to its value but does not extend to the draft Order Limits.
- 3.4.239 Benton End House (**1194592**) in Hadleigh is located approximately 2.8 km to the west of the draft Order Limits. This Grade II\* listed building is of high value and has aesthetic and historical value. It has good retention of historical fixtures, fittings and character. It was constructed in the 16th century or later, the front elevation dates to the 18th century. It is two stories tall with attics, the first-floor projects out slightly. It is timber framed with plastered walls. Its roof is clad in tiles with three Dormer windows.
- 3.4.240 The building is 'L' shaped. the asset is set back from the road by a small garden and is screened from view by well-established vegetation. The asset is part of a farm, the complex is to the east and south. To the north is a grassed area with trees. To the west is green fields and a stream. To the south is an agricultural field. The road to the west can be busy at times. The first edition OS map shows that the surrounding area changes little, except for the loss and creation of new builds within the farm complex and a few new buildings along the road to the north and south. The map also shows that the farm was once called Rookery Farm. Overall, the assets setting makes a considerable contribution to its value. Due to the distance the assets setting does not extend into the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.4.241 A medium value moat (**3042**) is situated c.250 m north of the draft Order Limits north of Wenham Road. This asset is of an irregular shape, on a square platform, is occupied, and wet but this water probably occupies a larger area than originally. This asset surrounds Birch House Farmhouse, a Grade II Listed building (**1036898**) of medium value. Due to the location and association with the listed building, this asset is of medium value. The Birch House Farmstead (**3046**) which sits within and extends out of the south-western edge of the moat (**3042**), is also of low value. The farmstead was visible on the first edition OS map and is dated to the 19th century. The farmstead is laid out in a dispersed plan, detached from the farmhouse. The non-designated assets **3042** and **3046** hold evidential and historical value.
- 3.4.242 A low value coin (**3089**) was found within the 250 m study area within the Raydon geographic region. This asset was an incomplete (cut in half) silver penny from the reigns of Henry II to Henry III c.1180-1247. It was minted in London by an uncertain moneyer. This asset has evidential value.

## Higham, Holton St Mary, Stratford St Mary and East Bergholt

### *Designated Heritage Assets*

#### Higham CP

- 3.4.243 The Grade II\* listed 'Church of St Mary' (**1351625**) is located approximately 300 m to the west of the draft Order Limits. It is of high value due to its historical and aesthetic values which lie with its good retention of historical character. The church has 13th century origins but the present structure dates to the 14th to 15th centuries. The church was restored in 1888 and later in c.1893 a porch was added. The walls of the church are flint with ashlar dressing. It has a tiled roof and a western tower. The church was, potentially, the church to Higham Hall, a predecessor to the current building. The present Hall (**1036957**) is located to the east and its ground are to the south-east of the church. The immediate setting of the church includes the churchyard in which it is set and Higham Hall. To the west, south and north-east are grassland fields. Further to the south is the River Stour, to the north is The Old Vicarage (**1036958**, see below) and Higham Road. This is a quiet, rural area and private. Despite the alterations to Higham Hall, the present setting of the asset would not be too dissimilar to its historic one. Therefore, the assets setting makes a considerable contribution to its value. Due to the close proximity, the asset setting extends into the draft Order Limits.
- 3.4.244 Located approximately 350 m to the west of the Oder Limits is The Old Vicarage (**1036958**), a Grade II listed building. It is of medium value and has historic and aesthetic value due to its good retention of historical character. The property dates to the 16th century with 19th and 20th century alterations. The house is timber framed with yellow/orange painted render between the timbers. The front roadside elevation is jettied on the eastern side. the roof is clad in slate. The asset is set almost onto the road, only a small pavement separates the two. The road is quite and rural. Immediate to the south-east is a converted bar which has retained its historical character. To the north is well-established vegetation which screens from view and area of grassland or fields. To the west and south are agricultural fields. Further to the south is Higham Hall (**1036957**, Grade II) and Church of St Mary (**1351625**, Grade II\*). Further to the north-west is the historically characterful village of Higham. Historically and presently the setting of the asset would not have changed much. Due to this the setting makes a considerable contribution to its value. The asset's setting does extend into the draft Order Limits due to its proximity and open nature of the countryside.
- 3.4.245 'The Pound' (**1351624**) is a Grade II listed farmhouse located approximately 1.5 km to the west of the draft Order Limits. It is of medium value due to its historical and aesthetic values. The large property dates to the 16th to 17th century with a 19th century wings and 20th century alterations. It is timber framed with rendered and red brick facade. The building is single story with attics, there is a jettied wing to the south. The setting of the asset is similar to its historic one. The property is surrounded by its farm complex which in turn is surrounded by agricultural fields and wooded areas to the north and south. The farm is in an isolated location and is quite and rural. the assets setting makes a considerable contribution to its value. Due to the distance and intervening well-established vegetation the assets setting does not extend into the draft Order Limits.
- 3.4.246 The Grade II 'Broomhouse to north of The Hall' (**1267300**) is located c. 800 south of Higham, c. 90 m west of the draft Order Limits. Broomhouse, a 15th century H-plan house, boasts a timber-framed and plastered exterior with distinct ridged and gabled peg-tiled roofs. The large central chimney, built of red brick, enhances its historic

character. Recent and jettied cross-wings exhibit casements on both storeys, contributing to the picturesque features of the house. Overall, this asset has a medium value based on its evidential, historical and aesthetic value.

- 3.4.247 Broomhouse, situated along a private road, is immersed in a quiet and rural environment. The surrounding landscape includes agricultural fields to the south, west, and east, with a wooded area to the north and east. Nestled within farm fields down an isolated track, the setting exudes a serene and secluded ambiance, harmonizing with nature's tranquillity. Overall, the setting makes a very considerable contribution to the asset's value and extends to the draft Order Limits due to its proximity to it.
- 3.4.248 Within Higham conservation area (**CA40**) there are three listed buildings dating to this time period:
- Within the eastern part of the conservation area is 'Byways' (**1051964**), a Grade II listed building. It is located approximately 500 m to the west of the draft Order Limits. It is of medium value due to its historical and aesthetic values. It dates to the 15th or 16th centuries and altered then the 17th century. It is timber framed and clad in pink/red rendering. It is two stories tall with its gable end facing the road. The building is set back from the road by a gravelled area. It is side onto the road which differs from all the other building, except to the building next to it on the west, in the village. It is surrounded by residential properties which are all historically characterful. The properties to the west and east are close together giving a confined feeling to the asset. This part of the village is congested with parked cars which add to the confinement feeling. The historical and present setting of the asset, which is and was one of a small rural village surrounded by agricultural fields, has not changed much over the last hundred years or so. Therefore, the setting of the asset makes a considerable contribution to its value. Due to the village location, and the distance, the asset's setting does not extend into the draft Order Limits
  - In the central part of the conservation area is 'Barhams Manor' (**1366100**), it is located approximately 500 m to the west of the draft Order Limits. It is Grade II listed and is of medium value due to its historical and aesthetic values. The front of the house dates to c.1500 with 16th century and later additions. It was remodelled in the late 18th century in a classical style. Later in the 19th century a rear service wing was added. It is timber framed and with a white painted render. The front range would have originally been an open hall with cross wings. The building is set back from the road by a garden and largely hidden from view by a well-established and well-maintained hedge. To the west of the asset is the important junction of Higham Road and the B1068. This forms a triangular green area. Surrounding the asset are the residential properties of Higham. This quiet and rural settlement, and its immediate garden, inform the setting of this asset. The asset's historical setting would not be dissimilar to its present one. Overall, its setting makes a considerable contribution to its value. Due to its village location, and distance away, the asset's setting does not extend into the draft Order Limits
  - The Grade II listed medium value Old Cottage (**1036961**) is situated in the south-western part of the conservation area. It is c.730 m west of the draft Order Limits. The asset has historical, evidential, and aesthetic values due to the retention of its historical character. The asset dates from the 16th century and has had later alterations and additions. It is a single storeyed property with a timber frame and a thatched roof. The exposed timbers on the exterior are infilled with light yellow or cream painted render. The front porch projects from the façade and features

the name of the property. The building is set on the road in a central village location which can be busy and congested with parked cars. There are residential buildings from later periods surrounding the asset. The setting of the asset makes a considerable contribution to its value but does not extend to the draft Order Limits due to the distance between them

- 3.4.249 'Gillfords Hall' (**1283138**) is located approximately 2.8 km to the west of the draft Order Limits. It is Grade I listed and is of high value and has historical and aesthetic values. It has retained many historical fixtures, fittings and character. The present house was constructed for the Mannock family in 1428 with early 16th, early 18th and late 19th century alterations and additions. The building is timber framed and built around a quadrangle courtyard. It is two stories tall with a red brick gatehouse on the southern side. A great hall is located on the northern side. The asset is located within extensive parkland. There are gardens, ponds and outbuildings to the south-east, east, north-east, and north. The asset setting is quiet, peaceful and private. The properties setting makes a considerable contribution to its value. Due to the distance, the assets setting does not extend into the draft Order Limits.

### **Holton St. Mary CP**

- 3.4.250 Lark Hall (**1036983**) is located approximately 10 m away from the draft Order Limits which surround the entirety of the asset. The hall is Grade II listed and is of medium value and has aesthetic and historical value. It was constructed in the early 15th century with later alterations/ part of one of its wings was reconstructed in c.1939. It is timber framed and has rendered walls. It is two stories tall, with attics, with two large gables on its front elevation one each side. The north-eastern gable is jettied on the first floor.
- 3.4.251 The asset is set back from the road at an angle and within a garden. To the west is a large residential property. Both are surrounded by agricultural fields. The road to the north curves round the properties. The only change from the first edition OS map compared to today's layout is the loss of some field boundaries to the north, The loss of the farm complex to the property to the west and the change in name from Lates Farm to Lark Hill. Overall, the asset setting makes a considerable contribution to its value. As the asset is in close proximity to the draft Order Limits, its setting extends into them.
- 3.4.252 Located approximately 15 m to the north-west of the draft Order Limits is Pintins (**1036984**). This Grade II listed building is of medium value and has aesthetic and historical values. The house was constructed in the late 15th century with 16th century and later alterations. It was renovated in the 20th century and extended. It is timber framed with render wall. The roof is clad in thatch. It is single story with attics.
- 3.4.253 The asset is set back from the roadside by a garden. This is framed by a hedge along the roadside to the south-east. The house overlooks an agricultural field to the east. To the north, north-east and south-west are wooded areas. To the west is a later property. Overall, the assets setting has not changed since the first edition OS map. It remains quiet and rural. Therefore, the assets setting makes a considerable contribution to its value. Due to the close proximity of the draft Order Limits the assets setting extends into them.
- 3.4.254 The Church of St Mary (**1351596**) is located approximately 760 m east of the draft Order Limits within the village of Holton St Mary. The village, in part, takes its name from this asset. It is Grade II\* listed and is of high value and has aesthetic and historical value. It has a good retention of historical fixtures, fittings and character. The church dates to the 13th and 15th century, it was restored in 1882. It was built

out of flint with ashlar dressings. It has a plain tile clad roof. The west tower is unusual and appear to truncate, this was either a deliberate design style or the tower relates to when the church was potentially smaller and then later expanded.

- 3.4.255 The church is set back from the main road by a churchyard. This gives a sense of space to the asset and an area of quietness next to the busy road to the north. To the south and west are green fields and a large agricultural field. To the north-west, south-east and east are the residential properties along the road within the village. The first edition OS map shows that many of these properties are later. The increase in properties has altered the semi-rural residential setting of the asset to more rural residential. Overall, the assets setting makes a moderate contribution to its value. The asset setting does extend it to the draft Order Limits.
- 3.4.256 Lampitts (**1351595**) is located approximately 815 m east of the draft Order Limits within the village of Holton St Mary. It is Grade II listed and is of medium value and has historic and aesthetic values. The house was constructed in the 15th century with later alterations and additions. It is timber framed with rendered walls. It is two stories tall with a thatched roof. The building was originally an open hall before it was divided into two floors.
- 3.4.257 The asset is located within a small garden and surrounded by later residential properties. This and the well-established vegetation around the garden gives an enclosed feeling to the asset. The first edition OS map of the area shows that the house was originally set within a large garden. The road to the east of the asset is later. The assets setting has now gone from quiet, rural semi residential to residential with a semi busy main road to the north. Overall, the assets present setting makes a minor contribution to its value. Due to the intervening buildings the asset's setting does not extend into the draft Order Limits.
- 3.4.258 Dewlands Farmhouse (**1036963/1036986**) is located approximately 250 m to the south-west and 270 m north-west of the draft Order Limits. The asset straddles the parish boundary between Holton St Mary and Higham and so has two NHL entries. The Grade II listed farmhouse is of medium value and has aesthetic and historical value. It was constructed in the 16th century, with extensive alterations including an early 19th century front range. The building is timber framed with rendered walls and a plain tiles roof. There is a large 20th century conservatory to the side of the house which is not in keeping with the historical character of the building.
- 3.4.259 The asset is set back from the road by agricultural and grassland fields. To the south-east is a large paddock and stables. To the west is the farm complex. To the north-west is a large barn. Surrounding the asset are more agricultural or grassland fields. To the south is an area of woodland. It is quiet and rural in nature. The first edition OS map of the area shows that the paddocks and barn are recent. The farm complex to the west has little changed but several out building to the east of the house are now non-extant. Overall, the assets setting makes a considerable contribution to its value. Due to the proximity of the draft Order Limits to the asset, the farmhouse's setting extends into them.
- 3.4.260 Holton Hall (**1036980**), approximately 500 m to the east of the draft Order Limits. Is a Grade II listed building. It has medium value and has aesthetic and historical values. It was built in the early 16th century with later additions and alterations. The front range dates to the 19th century. The rear older range is timber framed and cased in brick which is rendered and pargetted.
- 3.4.261 The asset is set back from the road by a large parkland garden to the north, east and south. To the west and south are the farm complex. Surrounding the asset are

agricultural fields. To the east is the village Holton St Mary. To the north-west along the road residential buildings. Little has changed since the 1st edition OS map save for the removal and creation of new buildings within the farm complex and in the village. Overall, the assets setting makes a considerable contribution to its value. The interviewing farm complex means that the assets setting does not extend into the draft Order Limits.

### East Bergholt CP

- 3.4.262 The Lodge (**1286124**) and The Lodge Cottage (**1351938**) are both located approximately 1.8 km to the east of the draft Order Limits. The Lodge is Grade II\* listed and is of high value, the cottage is Grade II listed and is of medium value. They both have historical and aesthetic values and have a good retention of historical fixtures, fittings and character. The Lodge dates to 1505 but was remodelled in 18th century and enlarged and remodelled in the early 20th century. It is in the Tudor style as of the 20th century remodel. It is timber framed with part cast brick and rendered. It has an ashlar porch and detailing. The roof is clad in plane tiles. It is two stories tall and due to the extensions; it is now a large building. The cottage, located to the north of The Lodge, dates to the late 16th century. It is timber framed with a red brick plinth. It is two stories tall. The front elevation has an underbuilt in red brick with a Flemish bond. The roof is clad in plain roof tiles. The east end of the building is jettied on the first floor.
- 3.4.263 The two assets are located off the main road, to the east and north, by a large green field, joined garden and a wooded area. This wooded area is to the north, west and south-west of the assets. To the east and south are green fields and parkland. The 1st edition OS maps shows that the road is a later addition. Other than the road and the loss of a building to the north of the assets, little had changed since this map. Therefore, the assets setting makes a considerable contribution to its value. Due to the distance and intervening woodland, the asset's setting does not extend into the draft Order Limits.
- 3.4.264 The Grade I listed 'Church of St Mary' (**1193803**), located c. 2.8 km east of the draft Order Limits, is a 14th century church with 15th century alterations, with a 1525 datestone on the tower. Later alterations were made during the 20th century by TG Jackson. The tower is built in brick with a flint face, the north aisle is mainly brick with some septaria and roughly dressed stone. The south isle is brick and flint and there is plain tile roofing throughout. There are many interior monuments including a memorial to the wife of John Constable, Maria Constable.
- 3.4.265 The asset is located within a graveyard along The Street/Rectory Hill, and opposite Flatford Road, on the south-western edge of the settlement of East Bergholt. The graveyard is lined by a low brick wall and the entrance to the church faces a war memorial to the south, at the junction with Flatford Road. the asset is close to the road edge and there are some mature trees lining this road. The largest part of the settlement of East Bergholt is located to the north and north-east of the asset. The wider landscape is that of patchwork agricultural fields lined by hedgerow field boundaries and patches of trees. The asset is north-west of the settlement of Flatford, this area is an iconic historic landscape associated with the artist Constable and his famous landscape scenes. The setting of the asset contributes considerably to the value of the asset, located within the rural village community of East Bergholt but on the periphery away from the modern development of the settlement. The asset has historical, aesthetic and communal value and is high value. The setting of the asset does not extend to the draft Order Limits.

## Stratford St. Mary CP

- 3.4.266 The medium value Grade II listed 'Leatherjacket Farmhouse' (**1198460**) is located approximately 1 km to the east-south-east of the draft Order Limits within Stratford St Mary. This farmhouse dates, probably, to the late 15th century with 16th and 17th, and later, alterations. There is a date carved into a Dorman window that reads '1622'. The timber framed, with pink painted rendering, two story property is located close to the A12. It is set back and down from the road by a small garden. Surrounding the property is a fence and well-established vegetation. The house has, historically, always been located close to the road. When it was first constructed the road would not have been as busy as it is today. With the conversion of the road to an A road and with the increase in noise from modern vehicles, the setting of the originally quite location has been negatively affected. Despite the increase in the size of the road and its users, not much for the assets setting has changed. It is still surrounded by agricultural fields, with a wooded area to the east. The asset has historical, aesthetic, and evidential value, and the setting of the asset makes a considerable impact to the value of the asset. Due to the distance and the intervening A12, the setting does not extend to the draft Order Limits.
- 3.4.267 Located approximately 120 m south and 200 m east of the draft Order Limits, within Stratford St Mary, is the Grade II\* listed 'Lowe Hill House' (**1036991**). This is a high value asset due to its rich historical and aesthetic values. This 'L' shaped property dates, probably, to the early 15th century, with alterations in the 16th and early 17th century. This house has distinctive exposed timber frames with white painted render between the timbers. Its roof is clad in plain tiles with three large, tall chimneys. Originally the property would have had an open hall with a two-storey rear range, it is now two stories throughout. The main western elevation, which faces Higham Road, has a jettied south-western end with a large gable. This property retains many of its original features, including its main doorway which can only be seen from the interior. Its windows have modernised but retain their historical character.
- 3.4.268 The house is located on the south-eastern quadrant of a crossroads, between Higham Road, east to west and south, and Green Lane to the north. The building over looks agricultural fields to the north, north-east, north-west, west and south-west. To the east is Brook Farm and to the south is another residential property. The dispersed nature of the buildings and the fields gives a sense of space and quietness to the asset. The historical and present setting of the house is very similar. Therefore, the assets setting makes a considerable contribution to its value. Due to the proximity, and open nature of the fields, the house's setting extends to the draft Order Limits.
- 3.4.269 Located approximately 1.4 km east-south-east of the draft Order Limits, just outside (by 105 m) of Stratford St Mary conservation area (**CA41**) is 'Ravenys' (**1198518**). This Grade II listed building was built in the late 15th to 16th century with 20th century alterations. It is timber framed, the ground floor is brick, and the first floor is simply decorated render.
- 3.4.270 It is 'L' shaped in plan with its longest side face onto, and set next to, Dedham Road. The house over looks agricultural fields to the west, with a large garden to the north and east. to the north is the dispersed settlement of Stratford St Mary, to the south are more agricultural fields. The road (occasionally busy) and fields give a sense of space and, due to the lack of other buildings close by, quiet. The historical and present setting of the asset is not too dissimilar. Therefore, the assets setting makes a considerable contribution to its value. It is of medium value due to its historical and

aesthetic values and its good retention of historical detailing and character. Due to the distance the house's setting does not extend to the draft Order Limits.

- 3.4.271 To the east of the draft Order Limits, by approximately 1.6 km, is the Grade II listed 'Whalleys' (**1351598**). This early to mid-16th century house, with later 17th century alterations and 20th century restoration, is of medium value due to its historic and aesthetic values. The building is timber framed with red painted rendering. Its first floor is jettied with moulded bre-somer. The building is located along, but set back within a garden, Dedham Road. It is surrounded and over looks agricultural fields. It is quite and rural in nature. The present and historic setting would have been similar. Therefore, its setting makes a considerable contribution to its value. Due to the distance away, this asset's setting does not extend into the draft Order Limits.
- 3.4.272 Within the western part of Stratford St Mary conservation area (**CA41**) are:
- 'The Kings Arms' (**1036996**) and the 'Corner House' (**1198570**) are both Grade II listed buildings located approximately 230 m to the east of the draft Order Limits. The buildings are of medium value due to their historic and aesthetic values and good retention of historic character. They are both located towards the north-western end of the village. The Kings Arms dates to, probably, the early 16th century with later alterations. It is timber framed with rough cast rendering, now painted white. The Corner House is a 16th century, with later alterations and additions, two story house. It has distinctive exposed timber framing, in between which is yellow painted render
  - The buildings are both located within the heart of the village, near to the important road junctions of Upper Street, Lower Street and Higham Road. They are surrounded by residential properties, some are historically characterful, and some are modern (to the east). To the south is an Art Deco pump house which is characterful but out of place in this historical village. The road junction and green space to the south and south-east of the properties, adds space to the assets roadside and village setting. The buildings historical and present setting would have been similar, however modern housing within the wider village setting, and the introduction of the Art Deco pump house, have altered the quite village ambiance. Therefore, their setting makes a moderate contribution to the property's heritage value. Despite the close proximity of the draft Order Limits the assets settings do not extend into the draft Order Limits. This is due to interviewing well-established vegetation to the west and north-west and that the settlement of Stratford St Mary does not extend into the draft Order Limits
  - Within the central part of Stratford St Mary is 'Nelsons Cottage, Rosebank Cottage and Side Cottage' (**1283789**). These Grade II listed buildings are located approximately 400 m to the east of the draft Order Limits. They are of medium value due to their historical and aesthetic values. These three terraced cottages date to the 15th century, Nelsons Cottage and Side Cottage were originally one house. They were altered in the 16th and 17th centuries and Rosebank Cottage was re-fronted in the 19th century. They are all timber framed with rendered front elevations, Rosebank Cottage has a simply decorated light cream painted render, Nelsons Cottage is a light orange colour and Side Cottage is painted white. All three properties are set onto the pavement, Nelsons Cottage and Side Cottage are stepped back within the pavement compared to the joined properties to the north and south. The road on which they are set, The Street, is busy and congested with parked cars. Even though the road forms part of its present and historical setting, the increase in cars, parked and travelling, detract from the quite rural village location. The historical and present setting would not be dissimilar

and therefore the setting of these three buildings adds considerable contribution to their value. The assets setting does not extend into the draft Order Limits as their setting is confined to the village of Stratford St Mary

- 'Weavers House' (**1351601**), Grade II\* listed, is located approximately 270 m north-east of the draft Order Limits. It is of high value due to its historical and aesthetic value which lie with its good retention of historical fixtures and fittings. It dates to the mid-early 16th century and has exposed wooden frame with white painted rendering between the timbers. the two-story structure has a jetties first floor. It is set almost onto the pavement and road, but a small wall and garden separate it from the routeway. To the north is the end of Stratford St Mary, east is the car park to the Black Horse (**1351600**, post medieval public house, Grade II). To the south is agricultural fields and The Street. Further to the east of the A12, the noise of which does disrupt the quite nature of the asset. The car park and end of village location give a sense of space to the asset. The historical and present setting would not have been dissimilar. Therefore, the assets setting makes a considerable contribution to the assets value. The assets setting does not extend to the draft Order Limits as it is a village location
- At the southern end of the Stratford St Mary conservation area (**CA7**) is 'Idle Waters, The Island' (**1198589**) a Grade II listed house. It is located approximately 210 m to the south-east of the draft Order Limits pipeline and is of medium value due to its historical and aesthetic values. The property dates to the 16th century with 17th century alterations. It was re-fronted and divided into two residences in the 19th century, later in c.1977 it was re-converted back into on house

It is set back and lower than the road to the east. to the west and south is the River Stour. To the north is a series of terraces cottages attached to the northern end of Idle Waters. These properties are shorter in height to the listed building and are painted a light pink colour. Within the wider setting of the listed building are agricultural fields or green space to the west, the busy A12 to the east. Stratford St Mary village to the north and a collection of buildings (see below) to the south. The location of this building was an important one as it was close to the bridge over the River Stour and its tollhouse. The assets historical and present setting has not changed much, save for the introduction of the A12. Therefore, the setting make a considerable contribution to its value. Due to the proximity of the draft Order Limits to the listed building, its setting extend into the draft Order Limits

- To the south of 'Idle Waters, The Island' (**1198589**), are a collection of three buildings: 'Le Talbooth' (**1239265**), a Grade II\* listed building, along with two Grade II listed 'Gunhill Cottages' (**1239277**) and 'The Wilderness' (**1239278**). The two Grade II listed buildings are dated to the post medieval period and are discussed in that section. Le Talbooth is located approximately 205 m south-east of the draft Order Limits. It is of high value due to its historical and aesthetic values which lie with its high retention of historical fixtures and fittings
- Le Talbooth dates to the 16th century, it has later additions which are in keeping with the historical character of the main building. The additions make the property 'Z' shaped. It has exposed timber framed with white painted render between. The south-west and south-eastern elevations are jettied on the first floor. The building is set within a complex of buildings, now used for the Le Talbooth restaurant and accommodation. The north-western elevation overlooks a green area, later building and the River Sour, the north-eastern elevation overlooks the River Stour and the Street, the south-western and south-eastern elevations overlook the layer

complex and carparking area. The area surrounding the building gives it a sense of space. The river side location is an important aspect to the setting as is the bridge crossing to the north-east. Originally there would have been a toll house here, for which the asset takes its name, this is no longer extant. The noise from the A12 to the east and the later additions of the complex around the have altered the setting of the asset. Therefore, the setting makes a moderate contribution to the value of the listed building. The assets' setting does not extend into the Order Limit as it is confined to its immediate area.

3.4.273 Within the eastern part of Stratford St Mary conservation area (**CA41**) are:

- The 'Church of St Mary' (**1283820**) is Grade I listed and located approximately 1.1 km south-east of the draft Order Limits. The church is of high value due to its historical and aesthetic values which lie with its early construction date and style. It was constructed in the 14th century with additions from the 15th and 16th centuries. The church was largely re-built in the 19th century. The building was constructed out of flint, which is unusual and not seen elsewhere in Stratford St Mary. The church is quite large for such a small village and its location, set some distance from the main body of the settlement and separated by the A12, gives an isolated feeling to the church

It is set within a small church yard with several buildings to the north and west. The western building are now a popular farm and shop. To the south-east are the dispersed settlement of Stratford St Mary while the rest of the village is to the west on the other side of the A12. Within the wider setting are agricultural fields. The road immediately north and east of the church are rural but can be busy. The historic and present setting would have been similar, save for the farm shop and the noisy A12. Therefore, the setting of the asset makes a moderate contribution to its value. Due to nearby A12, the asset's setting does not extend into the draft Order Limits

- The Grade II listed 'Haywards Cottage' (**1036990**) is located approximately 1.4 km to the east of the draft Order Limits. This early to mid-16th century, with later additions, timber framed cottage is of medium value due to its historical and aesthetic value. The cottage has a brick ground floor and rendered first floor. Both are painted in a distinctive light orange colour

The house is set almost directly onto Dedham Road. The road is semi-rural and can be busy at times. The house overlooks the garden wall of another Grade II listed building, Teazles (**1198535**), a post medieval house. Within the wider setting of Haywards Cottage is the dispersed settlement of Stratford St Mary to the north-west and south-east. surrounding the property are agricultural fields. The dispersed nature of the surrounding buildings the road and the fields gives a sense of space to the property. The assets historical and present setting would have been similar; therefore, its setting makes and considerable contribution to the value of the asset. Due to the distance and the intervening A12 the assets setting does not extend into the draft Order Limits

#### *Non- Designated Heritage Assets*

3.4.274 A low value coin (**3087**) was found within the draft Order Limits in the Holton St Mary geographic region. The coin was a complete silver penny from the reign of Edward I c. 1300-1302 and was minted in Durham. The legend repeats on both faces due to an error at the striking stage. This asset has evidential value.

3.4.275 A low value strap end (**3044**) was found within the draft Order Limits in the Holton St Mary geographic area. This asset is a copper-alloy medieval composite strap end

sating to 1270-1450AD and consists of two outer sheets and a forked spacer in between. This asset is of low value.

- 3.4.276 A low value purse (**3094**) was found in the 250 m study area within the Holton St Mary geographic region. The asset consisted of a fragment is a copper-alloy purse frame from the period c. 1450-1550. The frame would have originally fitted to a bar and suspension mount. The exterior was decorated with an incised zig-zag or cross hatched design. This asset has evidential value.

### *Designated Heritage Assets*

#### **Boxted CP**

- 3.4.277 The 'Church of St Peter' (**1238709**) comprises a mid-12th-century west tower constructed of indurated conglomerate, with repairs in red brick at the top stage. The nave, added in c. 1300, features tall ridge and gable roofs, with north and south aisles incorporating chamfered arches and piers. The south aisle includes cinquefoil windows and a bay window, while the south porch is a medieval timber-framed structure with early-style roofing. The perpendicular-style chancel, dating from the late 14th century, showcases re-set windows and details. The early English north aisle, c. 1300, exhibits indurated conglomerate, with a bricked-up north door. Inside, notable features include a c. 1300 crown-post roof, an 1836 gallery on slender cast iron columns, a brick floor, and a monument to Richard Blackmore in a chest of uncertain date. Overall, this Grade I listed church, located within Church Lane, c. 900 m north-west of Boxted and 2.4 km north of the draft Order Limits, has high value based on its evidential, historical, communal, and aesthetic value.
- 3.4.278 The church is situated in a churchyard along the east side of a quiet road. The yard's boundaries are defined by a combination of a wooden fence, brick wall, and shrubs. Some residences surround the churchyard, and further south and west, open fields unfold. While visible from the road, the church is set back within the churchyard. To the west, there is an additional section of the cemetery, divided by a track. Overall, the setting makes a considerable contribution to the church's value but does not extend to the draft Order Limits.

#### **Langham CP**

- 3.4.279 The high value Grade I listed 'Church of St Mary' (**1223452**), located c. 45 m west of the draft Order Limits, is a 14th century, and earlier, church built in rubble and flint, with some Roman brick and with a stone trim. The church was built in the 14th century with some parts of the asset from an earlier time, and consists of a west tower, nave, south aisle and chancel which are all constructed from rubble and flint, roman brick in parts, and a stone trim. The tower has angled buttresses which face a western direction and have four off-sets beneath the first floor, followed by two stages with trefoiled lancets, and red brick pinnacles. The south wall of the aisle also has angled buttresses, three wall buttresses, and four two-light cinquefoil windows beneath head-stopped labels. The roofs are ridged, gabled, and peg tiled and feature a chancel with a finial cross on the eastern apex. The southern chancel wall also has a priest's door and two 14th century trefoiled windows with quatrefoil 'eyes' and labels. There is a c.1300AD window in the northern wall of the nave and a 20th century porch. The internal character of the church is historic and features internal fillets and rolls to the tracery of the north nave windows, bench ends with poppy heads and angels, a dug-out chest and a 13th century chest in the vestry.
- 3.4.280 The asset is set down a trackway which leads to the church and yard and is surrounded on all sides by established woodland. The church and yard themselves are open and peaceful due to its location outside of the settlement and without the

continuous presence of loud vehicles and foot traffic. The church has historical, communal, evidential, and aesthetic value. Its setting contributes to its value, and its proximity to the draft Order Limits on the eastern side, its setting extends to the draft Order Limits.

- 3.4.281 The 15th century Grade II 'Pungford Cottages' (**1223498**) and the 16th century or earlier Grade II 'Langford Hall' (**1223469**) are two listed houses located within Langham, north-east part of the settlement. While Pungford is only c. 30 m west of an draft Order Limits Bellmouths fencing/junction/ RLB and cabling haul road, Langford is c. 90 m north-west of the draft Order Limits. They both have medium value based on their evidential, historical, and aesthetic value.
- 3.4.282 Their setting is informed by their location within the settlement. Langford Hall is situated within a curve of a rural road, its presence subtly set back by a well-tended garden. Along the road's southern and eastern stretches, residential properties and buildings complement the scenery, while the northern and eastern views open up to expansive agricultural fields. To the west and south, a wooded area adds a touch of natural allure to the surroundings. Similarly, Pungford enjoys a quiet locale at a T-junction, nestled within the rural roads. Its residence, surrounded by a garden, stands back from the roads. Bordering the eastern horizon, agricultural fields contribute to the scenic backdrop, while residential properties dot the northern, western, and southern landscapes. Both Langford Hall and Pungford are documented in the first edition of the OS map dating back to 1880. Over time, Langford Hall's immediate surroundings have undergone minimal alterations, maintaining a semblance of continuity. In contrast, Pungford has experienced subtle changes with the emergence of residences to its south and west. Additionally, their broader setting has witnessed transformations, including the introduction of the A12, c. 500 m to the east and the expansion of Langham. Overall, while the setting of Langford hall makes a very considerable contribution to its value, the setting of Pungford makes a considerable contribution to its value. For both assets, their setting extends to the draft Order Limits.
- 3.4.283 Along School Road, within Langham, are two medieval Grade II listed buildings, the 15th century 'Bakers' (**1267263**) and the 15th century 'Tudor Cottage' (**1223551**). They are situated c. 870 m west-south-west of the draft Order Limits Bellmouths fencing/junction/ RLB and cabling haul road and c. 1 km south-west of the draft Order Limits. These assets have a group value with two other post medieval listed buildings located along the same road, 'Little Oaks Barn' (**1267131**) and 'Lyme Cottage' (**1223528**). Overall, Bakers and Tudor Cottage have medium value based on their evidential, historical, and aesthetic value.
- 3.4.284 Their setting is informed by their location within the settlement and along a road. It is further informed by their historical relationship with each other and with other listed buildings along the same road such the post medieval 'Little Oaks Barn' (**1267131**) and 'Lyme Cottage' (**1223528**). These assets are documented in the first edition of the OS map dating back to 1880. Over time, their immediate surroundings have undergone minimal alterations, maintaining a semblance of continuity, even if there was an expansion of Langham, especially south-west of them. The broader setting has witnessed transformations, including the introduction of the A12 to the east. Overall, the setting of the two medieval houses makes a considerable contribution to their value but does not extend to the draft Order Limits as limited to the settlement.
- 3.4.285 Within the north part of Langham is the Grade II listed 'Hill Farmhouse' (**1267303**). It is situated c.1.25 km west of the draft Order Limits. The farmhouse, a 16th century and earlier residence with an L-plan layout and underbuilt jetty, features distinctive

architectural elements such as a red brick Elizabethan chimney stack and small-paned sashes. The historical and aesthetic value is accentuated by its gabled porch and overall design. Overall, this asset has medium value based on its evidential, historical, and aesthetic value.

- 3.4.286 Nestled in a tranquil rural setting, Hill Farmhouse is discreetly positioned along a private track, shielded from view by the surrounding fields and woodland to the southwest. The property is complemented by a garden and a yard to the north, contributing to its serene and secluded ambiance, far from the bustle of traffic. Overall, its setting makes a very considerable contribution to its value but does not extend to the draft Order Limits.
- 3.4.287 Within the south part of Langham are two medieval Great II listed buildings, the 16th century and earlier 'Chaplins Farmhouse' (**1267247**) and the 15th century 'Langham Oak Cottage' (**1223523**). They are situated between c. 800 m and c. 1.2 km north of the draft Order Limits. These assets have medium value based on their evidential, historical, and aesthetic value.
- 3.4.288 Nestled in the quiet southern part of Langham, Chaplins Farmhouse enjoys a secluded position, set back from the quiet rural road by a garden. Situated at the southern end of a residential neighbourhood, the property is surrounded to the north and east by residential properties, while agricultural fields stretch to the south and west, and a wooded area lies to the northwest. Similarly, Langham Oak Cottage, with its picturesque setting, is set back from the quiet road, surrounded by vast agricultural fields, contributing to the overall rural ambiance of the location. Overall, their setting makes a considerable contribution to their value but does not extend to the draft Order Limits.
- 3.4.289 The 'Glebe Farmhouse' (**1223526**) is approximately 1 km north-east of Langham and 10 m from the draft Order Limits at its closest point. The draft Order Limits surround this asset. This Grade II, a 16th/15th century timber-framed residence, features a jettied cross-wing, large red brick chimney, and distinctive peg-tiled roofs. The mixed fenestration, including a dormer with a gable, adds to its historical value. Overall, this farmhouse has a medium value based on its evidential, historical, and aesthetic value.
- 3.4.290 Glebe Farmhouse is situated within a private access area, forming part of a farm complex and surrounded by expansive agricultural fields. The surrounding landscape includes several large properties and farms to the west and east, contributing to its tranquil and rural environment. The setting is further informed by its historical relationship with post medieval assets within the same area such as the 'Barn To East of Glebe Farmhouse' (**1223548**), 'Ewens Farmhouse' (**1267273**) and 'Glebe House' (**1223527**). Overall, its setting makes a considerable contribution to this asset's value and extends to the draft Order Limits.
- 3.4.291 North of Langham Hall are found one Grade I listed building, the 13th century 'Church of St Mary' (**1223452**) and two Grade II listed buildings, the 13th century Grade II 'Barn west of The Hall' (**1267268**) and the early 16th century Grade II 'Church Farmhouse' (**1223464**). They have a group value. While the church has a high value due to its evidential, historical, communal, and aesthetic value, the two other Grade II have medium value based on their evidential, historical, and aesthetical value.
- 3.4.292 These assets are situated between c. 40 m and c. 300 m of the draft Order Limits, the church being the closest and the barn the furthest. Their setting is informed by their historical and functional relationship with each other as well as with six post

medieval listed buildings, the 18th century Grade II\* listed building 'The Hall' (**1223465**), the 18th century 'Pond Villa' (**1267302**), the undated 'Langham Hall Farmhouse' (**1223466**), the 17th century 'Barn north-west of The Hall' (**1267301**), the 19th century 'Redhouse' (**1223467**) and the 19th century 'School north-west of Church of St Mary' (**1223463**). Nestled within a rural landscape, they are located in a quiet setting. The barn is within a farming settlement, and they are all surrounded by woodlands to the east and west, and fields extending north and south. Other residences are scattered throughout the landscape, further enhancing the cohesive character of this rural environment. The presence of the A12 to the east, though nearby, does not detract from the serene atmosphere that defines the surroundings of these structures. Overall, the setting of these three assets makes a very considerable contribution to their value. While the setting of the barn does not extend to the draft Order Limits as it is limited to the farming settlement, the setting of the church and the farmhouse extend to it due to their proximity with it.

- 3.4.293 'Mulberry House' (**1273800**) is located approximately 60 m north-east of the draft Order Limits. This Grade II listed building is of medium value and has aesthetic and historical values. It retains many of its historical character and fixtures and fittings. This house dates to the 18th century. It was constructed out of red brick with a Flemish Bond. It is two stories tall with attics, with a shorter two-story plaster walled extension to the north.
- 3.4.294 The asset is set back from the road by a garden and is exposed to the road. The house overlooks a flat agricultural field to the west. To the north-east is a road junction between Gun Hill and an unnamed road. The road, junction, field and garden give a sense of space to the semi-rural residential asset. To the north is a wooded area. To the north-east, east and south are the contribution of Gun Hill which is lined on its eastern side by other residential properties. Some of these properties are later. Overall, the assets setting makes a considerable contribution to its value. Due to the proximity of the draft Order Limits the asset's setting extends into them.
- 3.4.295 At the western end of Lambs Corner is the Grade II listed 'Mount Pleasant' (**1273738**) located approximately 290 m north-east of the draft Order Limits. The asset is of medium value and has aesthetic and historical value. The building dates to the 16th century but has been much modernised recently. It is two stories tall with a timber frame and painted plaster walls.
- 3.4.296 The house is set back from the road by a garden and screened from view by a well-established hedge. To the east and west are residential properties. To the north is the parkland for a large farm. To the south is an agricultural field. The garden and hedge give a confined feel to the asset despite the end of village and rural setting. The house to the west is later, as are several of the properties to the east. Overall, the houses setting makes a moderate contribution to its value. The assets end off village setting does not extend to the draft Order Limits.
- 3.4.297 Located approximately 325 m to the east of the draft Order Limits is 'Hill House in Park West North West of Lambs Corner' (**1239409**). This Grade II listed building is of medium value and has aesthetic and historical value. The house was constructed in c.1716. It is three stories tall, in parts, and was built out of painted brick. It has a large extension on either side of its front elevation, these were built in the 18th century, and were altered in the 19th century.
- 3.4.298 The asset is located within and surrounded by landscaped parkland. To the west, north and north-east are dense woodland. To the north are outbuildings. The assets setting is isolated and quiet. The 1st edition OS map shows little change since then. Therefore, the asset's setting makes a considerable contribution to its value. The

parkland does not extend into the draft Order Limits, therefore the assets setting does not extend into them.

- 3.4.299 'Rye Farmhouse' (**1239440**) is located approximately 365 m north-west of the draft Order Limits. This Grade II\* listed building is of high value and has historical and aesthetic values and retains many historical fixtures and fittings as well as character. The property dates to c.1400 with later additions and alterations. It is timber framed, which is partly exposed, with plastered walls. It is 'L' shaped in plan and is two stories tall. The roof is ridged, gabled and clad in peg tiles.
- 3.4.300 The farmhouse is located to the east of Lambs Corner in Dedham. It is set back from the road by a large garden. To the east and west are residential properties. To the north is agricultural fields. Further to the west is a wooded area. To the south is the road. The houses on either side are modern and the farm complex, to the west, is no longer extant. This has altered the historical setting of the asset. Overall, the asset setting makes a minor contribution to its value. The asset's setting does not extend into the draft Order Limits due to the intervening residential buildings.
- 3.4.301 Located approximately 420 m to the north of the draft Order Limits is 'Beeches Cottages' (**1273740**). These Grade II listed buildings are of medium value and have historic and aesthetic values. The semi-detached properties were constructed in the 16th century. They are timber framed with plastered walls. They are located on the southern side of Long Road West, set back by a garden a partially screened from view by well-established vegetation. Historically these properties would have been surrounded by agricultural fields with the odd residential, or farm related building along the very straight east to west road. Today they are more residential properties. The properties opposite, obscure the historical views of the cottages which would have overlooked an agricultural field. Overall, the assets location makes a moderate contribution to its value. Due to the semi-rural residential location the asset's setting does not extend into the draft Order Limits.
- 3.4.302 'The Lamb Inn' (**1239410**) is located approximately 345 m to the north-east of the draft Order Limits. It is Grade II listed as is of medium value with historic and aesthetic values. It was constructed in the 16th century with later additions. The public house, now a private home, is of one story tall with attics. It is timber framed with painted plaster and brick walls. The roof is thatched with three large Dormer gable windows on the front elevation. The asset is set back from the road by a large, gravelled area. The road is lined with residential properties. To the north is parkland for a large farm. The historical and present residential village setting is not too dissimilar. Therefore, the assets setting makes a considerable contribution to its value. The asset's village setting does not extend into the draft Order Limits.

## **Dedham CP**

- 3.4.303 Located approximately 1.3 km to the north-east of the draft Order Limits is the Grade II listed 'no. 12 Cooper's Lane' (**1225601**). The asset is of medium value and has aesthetic and historic value. The cottage dates to the 16th century, or earlier. It is timber framed, parts of it are painted brick, part render, part weatherboarding. Roof is gabled and clad in clay pantiles. The asset is located side on to Coopers Road. To the east is dense woodland to the north and south are residential buildings, to the east is agricultural fields. This is not too dissimilar to its historical setting. Therefore, the asset setting makes a considerable contribution to its value. Due to the distance, the asset's setting does not extend into the Order Limit.
- 3.4.304 'Knights Manor' (**1273808**) is located approximately 1.6 km to the north-north-east of the draft Order Limits. This Grade II\* listed building is of high value and has aesthetic

and historical values. It has retained many of its original fixtures and fittings and historical character. The house dates to the 16th century. It is two stories tall with an exposed timber frame and painted plaster infill. The roof is clad in red clay tiles with a large central chimney stack with four octagonal shafts. The front elevation has a central door. The house is set back from the road by a garden. The road can be busy. To the east and the west, along the road are other, later, residential properties. Surrounding these are agricultural fields. The increase in houses along the road has altered the assets once rural roadside location. Therefore, the assets present setting makes a moderate contribution to its value. Due to the semi-rural residential location of the asset, its setting does not extend into the draft Order Limits.

- 3.4.305 Located approximately 1.5 km to the north-east of the draft Order Limits is 'The Castle House' (**1239249**). This Grade II listed building is of medium value and has historical and aesthetic values. It was first constructed in the 15th century, and greatly altered over the next several centuries, most notably in the 16th and 17th centuries. The western part of the building is thought to date to the 15th century and the southern side from the 16th to 17th century. The property is large, two stories tall with light yellow painted rendered walls. The house has had many uses over the years, most notably as a clothier's house, it has a blue plaque noting that Sir Alfred Munning, President of the Royal Academy, once lived here. It is at present a museum, called The Munnings Art Museum, however this is temporarily closed at present. The house is set at an angle to the road with its garden to the east. To the north is another road, East Road, which forms a junction with Castle Hill (road) to the north-west of the asset. Lining both roads are dispersed residential buildings and agricultural fields. This is not too dissimilar to the assets historical setting. Therefore, the assets setting makes a considerable contribution to its value. The assets setting does not extend into the draft Order Limits due to the distance.
- 3.4.306 Located to the east-south-east of the draft Order Limits by approximately 1.8 km is 'Lower Park' (**1239177**) and 'Coach House to South of Lower Park' (**1273830**). These two Grade II listed buildings are of medium value and have aesthetic and historical value. Lower Park is a large house which dates to the early 19th century, it was constructed out of grey gault brick with an English bond. The roof is clad in slate and has a parapet wall. It is two stories tall with attics. The windows to which are round-headed Dormers. The coach house also dates to the early 19th century. It was built out of gault brick with a Flemish bond. Its roof is also slate clad and is happy and has lead bonnets. It is two stories tall. It has a blocked rounded-headed archway entrance, this was replaced by a door to one side.
- 3.4.307 Both assets are set within extensive parkland with the settlement of Dedham to the north-west, north, north-east, east and south-east. There is a public park to the north-east. To the south of the main house and surrounding the coach house are other buildings. The assets setting has changed little since the 1st edition OS map. Therefore, the asset setting makes a considerable contribution to their values. Due to the distance, the assets setting does not extend into the draft Order Limits.
- 3.4.308 'Southfields the Flemish Cottages' (**1239217**) is located approximately 1.9 km to the east-south-east of the draft Order Limits. This Grade I collection of attached cottages are of high value and have historical and aesthetic values. They have retained many of their historical fixtures, fittings and character. The seven cottages date to the 15th century, they were added to create a courtyard complex. They are two stories tall. Some of the ground floors, specifically those along roadside, have painted plaster walls and exposed wooden frame with painted plaster infills on the first floors. The roofs are ridged and gabled and clad in peg tiles. The cottages are set onto a road to the east which leads to a public park, The Duchy Fields, to the north and from the

main road in Dedham to the east. To the north-east and east are later properties. To the west is the parkland for 'Lower Park' (**1239177**) to the south is a green area and further to the south is the continuation of the parkland. The assets are part of the residential and private and public spaces of the village. The 1st edition OS map shows that the two houses to the north-east and east are later. Other than the reduction of the gardens in which the assets once sat little has changed within the immediate setting of the cottages. Overall, the asset setting makes a moderate contribution to its value. Due to the distance away, their setting does not extend into the draft Order Limits.

## Lawford CP

- 3.4.309 'Humberlands' (**1254102**) and 'Barn Approximately 30 Metres South West of Humberlands' (**1261441**) are located 1.8 km to the north-east of the draft Order Limits. These Grade II listed buildings are of medium value and have aesthetic and historical values. The house dates to the 15th to 16th centuries with a 20th century eastern extension. It is timber framed with panel pargetted and a red pantile roof. It is two stories tall with gable Dormas within the extension. The barn dates to the 17th century with 18th century alterations. It is timber framed and clad in weatherboarding. It has a pan tiled roof. It is five bays long. It has an intact brick herring bone threshing floor. The assets are located farm from the road by agricultural fields to the south, west, south, south-east, east and north-east, to the north and north-west are wooded areas. Further to the north-west is a railway line. This is a quiet and secluded area. The present and historical setting are not too dissimilar and therefore the assets setting makes a considerable contribution to its value. Due to the distance the asset setting do not extend into the Order
- 3.4.310 The 'Church of St Mary' (**1261462**) is located approximately 2.3 km to the north-east of the draft Order Limits. This Grade I listed building is of high value due to its historical and aesthetic value. It also has communal value as an active church. The building is also located within the Lawford conservation area (**CA25**). The church dates to the 14th century with alterations and additions from the 16th and 17th, and later, centuries. The walls are of flint, septaria and brock with limestone dressing. The mix of building materials has allowed for some created pattern making on the walls. This adds to the unusual and unique qualities of the building. The asset was potential for the use of the manorial complex to the north-east. However, the present 'Lawford House' (**1254131**), is not contemporary with the church so it is possible that an earlier manor house was located here. The asset which is set back from the road by the churchyard. To the south-west are residential properties. To the north, east and south-east are agricultural fields. These and the churchyard give a sense of space to the asset. To the west is a large car park and the grounds to Lawford House. The asset historical and present setting are not too dissimilar. It still retains its quiet, rural feeling. Therefore, the assets setting makes a considerable contribution to its value. Due to the distance way, the asset's setting does not extend into the draft Order Limits.

## Ardleigh CP

- 3.4.311 'Old Hall' (**1273829**) is located approximately 800 m north-east of the draft Order Limits. This Grade II listed building is of medium value and has aesthetic and historical value. It was constructed in c.1800 out of red brick, in a Flemish Bond, over two floors. Its roof is hipped and clad in slate with a chimney at each end. Its front elevation is symmetrical with a central door with a large window on each side. The same sized windows, of which there are three, are located on the first floor. The asset is located at the end of a Dedham Health village. Set back from the road by a

large, gravelled area. The area has changed since the 1st edition OS map. The settlement has grown and removed most of the farmland that straddled the road to the north. This has also resulted in the demolition of the assets farm complex. To the west, where the farmhouse would have overlooked agricultural fields, are now residential properties. To the south, the fields remain. Overall, the assets setting makes a moderate contribution to its value. Due to the distance the asset's setting does not extend to the draft Order Limits.

- 3.4.312 The listed 'Bloomfields Farmhouse' (**1253915**) and its later (18th century) barn (**1261548**) are located approximately 30 m to the west and 8 m north of the draft Order Limits. They are both Grade II listed and are of medium value due to their historical and aesthetic values. They also have group value, and as such are discussed together. The farmhouse dates to the 16th century, or earlier with alter alterations and additions. It is timber framed with light cream plastered walls. It is two stories tall with a distinctive double hipped roof with attics. The barn, to the north of the farmhouse, is later but may have earlier origins. These maybe contemporary with the house. The barn is timber framed with weatherboard cladding.
- 3.4.313 Both assets are located within a small farm complex which is accessed via a private track way. The farm complex has altered over time with the demolition and construction of new buildings. The surrounding setting includes agricultural fields. It is a quiet and rural area. The present and historical setting of both the assets would not have been dissimilar. Therefore, the assets setting make a considerable contribution to their values. Due to the proximity of the Project, the assets' setting extends to the draft Order Limits.
- 3.4.314 Approximately 40 m to the south of the draft Order Limits is the 'Maltings Farmhouse' (**1112093**). This Grade II listed building is of medium value due to its historical and aesthetic values and good retention of historical character. This 16th century, with later additions and alterations, s timber framed and clad in rough cast render. It has a plain red tiles roof with red brick chimneys. It is constructed over two stories. The eastern chimney has a plaque over the internal fireplace which reads 'H K 1597'. The assets immediate setting includes the farm complex to the east, its garden and the road, Maltings farm Lane, to the north. The asset overlooks agricultural field sot the north and is surrounded but other fields. Historically the assets setting would not have been too dissimilar as it is today. The farm complex has lost and gained several buildings and lost its pond to the north, according to the 1st edition OS map. Overall, the assets setting makes a considerable contribution to its value. Due to the proximity of the Project, the asset's setting extends to the draft Order Limits .
- 3.4.315 'Clarkes Farmhouse' (**1322649**) is located approximately 270 m north-west of the draft Order Limits and 440 m north of the draft Order Limits. This Grade II listed building has medium value due to its historical and aesthetic values. The two-story building was constructed in the 16th and 18th century with later alterations and additions, it is timber famed with plastered walls. Its roof, which contains attics, is clad in plain red tiles with two different sized Dorma windows. On the front elevation is a gable end on its north-eastern end. The farmhouse is set back from the road by its farm complex which hides it from view of the road. This farm complex has developed over the years from the 1st edition OS map. As has the surrounding area. The road, which was once devoid of houses, id now lined with large properties set back from the road by gardens. To the east is a large nursery with large green houses. Over all the assets setting makes a moderate contribution to tis setting. The asset's farmyard setting does not extend into the draft Order Limits.

- 3.4.316 'Thatched Cottage' (**1322652**) is a Grade II listed building located approximately 240 m to the north-east of the draft Order Limits. It is of medium value due to its historic and aesthetic values and for its good retention of historical character. The single-story property, with attics, is timber framed with white painted render between the exposed timbers. the roof is thatched with a hip facing the road. The roof also contains two eyebrow Dormas. The property is set back from the road by a garden. However, it is visible from the road. To the west and south of the asset are later outbuilding and a swimming pool is to the south-west. Surrounding the property is its garden and agricultural fields to the north and south. The road, according to the 1st edition OS map, was once mostly devoid of other properties. Today there are several residential properties lining the street. Overall, the asset setting makes a moderate contribution to its value. Due to the proximity of the Project, the asset's setting extends to the draft Order Limits.
- 3.4.317 Located approximately 1.4 km to the south of the draft Order Limits, is 'Hulls Farmhouse' (**1112055**). This Grade II listed building has medium value due to its historic and aesthetic values. The house dates to the 16th or 17th century with early 20th century alteration and extension. The building is timber framed with hanging cedar shingle cladding. The farm and its farmhouse are in an isolated location just north of the A12. The farmhouse is on the western side of a trackway and the farm complex is on the eastern. The farm complex has grown since the 1st edition OS map and there are added field boundaries within the surrounding agricultural fields. The A12 is also recent. Due to these changes the setting of the asset makes a moderate contribution to its setting. Due to distance away, the assets setting does not extend into the draft Order Limits.
- 3.4.318 The Grade II\* listed 'Church of St Mary' (**1112060**), located c. 150 m south-east of the draft Order Limits, is a 14th century parish church with a 15th century west tower and south porch. The asset has later 18th and 19th century additions. The church is made of flint, rubble, septaria, Roman brick and puddingstone, with dressings of brick and limestone and red plain tile roof.
- 3.4.319 The asset is located within the north-eastern corner of the settlement and conservation area of Ardleigh (**CA26**). The asset is located within a lawned graveyard, with scattered mature trees and shrubs, lined with a low brick wall. The asset is situated on the junction between Harwich Road and Station Road B1029. Close to the asset along station road are multiple characterful properties. The settlement of Ardleigh is surrounded by agricultural fields, some scattered small settlements as well as a railway line passing along the south-eastern edge of the settlement. The setting of the asset contributes considerably to its value, as the church created so serve the rural community of Ardleigh. The setting of the asset does extend to the draft Order Limits, which pass close to the edge of the settlement and the reach of the church, both in terms of its parish setting and also visually due to the height of the church tower. The asset has historical, aesthetic and communal value and is high value.
- 3.4.320 Located approximately 640 m to the south of the draft Order Limits is the 15th century, or earlier, with later alterations and addition, 'Gatehouse Farmhouse' (**1112085**). It is Grade II listed and is of medium value due to its historic and aesthetic values. It is timber framed with light cream painted rendering. The front elevation has a jettied cross wing on the first floor, western side. the house is set back from Crown Lane North, and enclosed by, a garden. The farm complex is north along the roadside. the road itself can be busy. Surrounding the property are agricultural fields. To the west are several residential and industrial buildings. Within the wider setting is a quarry and industrial area to the north, the busy A12 to the west, Ardleigh reservoir

is to the south. The area surrounding the asset has changed since the first edition OS map (reservoir, A12, quarry and industrial estate etc). Whilst the assets immediate farm complex setting has little altered, Therefore the assets setting makes a moderate, save for the demolition and introduction of buildings and a swimming pool, its wider setting has altered greatly. Overall, the farmhouses setting makes a moderate contribution to its value. Due to the intervening quarry the asset's setting does not extend into the draft Order Limits.

- 3.4.321 'Harvey's Farmhouse' (**1322648**) is located approximately 1.15 km to the south of the draft Order Limits. It is Grade II listed and of medium value due to its historic and aesthetic values. The house is 15th century, or earlier. It has later additions and alterations. It is timber framed with plastered walls. The farmhouse is accessed via a trackway with its farm complex to the south-east. Little of the original farm complex, seen on the 1st edition OS map, survives. The present surrounding of the asset also differ from the map. The Ardleigh Reservoir, the busy A120 and the industrial estate to the south-west are all relatively recent additions to the landscape. The farmhouse would have originally overlooked agricultural fields, to the north, it now overlooks the reservoir. Overall, the asset setting makes a moderate contribution to its setting. Due to the distance and intervening reservoir the asset setting does not extend into the draft Order Limits.

#### *Designated Heritage Assets*

#### **Little Bromley CP**

- 3.4.322 The 'Church of St Mary' (**1337175**) is located approximately 580 m south-west of the draft Order Limits. This Grade II\* listed building is of high value and has aesthetic and historical value. It retains many of its historical fixtures and fitting along with its historical character. This parish church was constructed in the early 12th century with 14th, 15th and 16th additions and was restored in the 19th and 20th centuries. It was constructed out of puddingstone rubble, some of which are plastered. It has stone dressing with additions of red brick to the west tower. There is a stepped chimney to the west of the north wall which is unusual. The asset is located next to a modern farm to the north and to the east is 'The Old Rectory' (**1111420**). To the west is a new build. Surrounding the church is its church yard and agricultural fields. This gives the church a sense of space and adds to the quiet and rural feeling of the area. According to the 1st edition OS map the farm to the north was Little Bromley Hall, this is now non-extant along with a building to the west. Overall, the assets setting makes a moderate contribution to its value. Due to the distance away the asset's setting does not extend into the draft Order Limits.
- 3.4.323 Located approximately 110 m to the south-west of the draft Order Limits proposed verge and landscaped buffer and 2.2 km south-east of the draft Order Limits, is 'Grove Farmhouse' (**1337174**). This Grade II listed building is of medium value and has aesthetic and historical value. The farmhouse dates to the 16th century and is timber framed with plastered walls. The asset is set back from the road by a small garden and a large green grassed field to the east. to the west is a large agricultural field. Little has changed to this setting according to the 1st edition OS map apart from the loss of the farm complex to the south and new building located along the road to the east and north-east. Due to the loss of the farm complex the assets setting makes a moderate contribution to its value. Due to the close proximity of the Project the asset's setting extends to the draft Order Limits.

## Elmstead CP

- 3.4.324 Located approximately 2.9 km to the south of the draft Order Limits are the Grade II\* listed 'Elmstead Hall' (**1146647**) and the Grade I listed 'Church of St Anne and St Lawerance' (**1337162**). These two assets are of high value and have aesthetic and historic value. They retain many important historical characteristics and style. They are both located close to one another in a manorial complex and due to this they have added group value. Elmstead Hall dates to the 15th and 16th centuries, possibly earlier, with later alterations and additions. This grandiose building is timber framed with pale pink painted plaster walls. It is two stories tall with attics, the roof is tall and clad in red tiles. The front elevation has a central doorway and slightly projecting front gables on each end. The Church of St Anne and St Lawerance is located to the east of the Hall. This dates to 12th century with a c. 1310 chancel and south tower and c.1330-1340 south chapel. These have all been repaired and altered over the centuries. The walls of the church are a mix of rubble with puddingstone, limestone has been used for dressing, the roof is a mix of red tiles and lead.
- 3.4.325 Both assets are located in flat, quiet, rural area. To the north and north-west of the hall is a farm complex. To the south is grassland. Surrounding the church is the church yard, this extends to the south to a large car park. Surrounding both assets are open agricultural fields. The churchyard, parking area and green spaces give an open feel to the assets. The asset setting has changed little over the centuries save for the removal and building of buildings within the farm complex, a quarry located to the south-west and the busy A120 to the north and north-east. This has little effect on the asset save for the increase in vehicular noise which hardly effects the quiet nature of the area. Overall, the assets setting makes a considerable contribution to their value. Due to the distance, neither asset setting extends into the draft Order Limits.

## Great Bromley CP

- 3.4.326 To the 2.1 km south of the draft Order Limits, is the Grade I listed 'Church of St George' (**1337189**). This building is of high value due to its historic and aesthetic value. It has retained many of its historical fixtures, fittings and character. The church was constructed in 14th century and additions in the 15th century, it was restored in the 19th century. It was built out of mixed rubble with brick and limestone dressing. The asset is located within the settlement of Great Bromley near to the junction of Badley Hall Road and Hall Road. It is set back from the road by a church yard and a car park to the south. To the south-west and west are later residential and social buildings. To the south is the contribution of the village. To the east are green fields, to the north-east is a large house and grounds. To the north is a wooded area and a lake. Overall, the assets setting is quiet, rural and part of a village. The churchyard and car parking areas give a sense of space. The historical setting would have similar to today's except for the later additions to the village. Therefore, the assets setting makes a moderate contribution to its value. Due to the distance away, the assets setting does not extend into the draft Order Limits.
- 3.4.327 'Braham Hall' (**1337155**) is located approximately 255 m to the north-east of the draft Order Limits. This Grade II listed building is of medium value and has aesthetic and historical value. It dates to the 16th or 17th century with later additions and alterations. It is timber framed with plastered walls. It has a red plain tile roof that outshoots to the rear. It is two stories tall with an unusual two story gabled porch. It is located far from the road with a garden to the south and its farm complex to the north. To the north-west are several residential houses. Surrounding the property is agricultural fields. According to the 1st edition OS map the farm complex buildings

and the residential properties are new additions. Therefore, the assets setting makes a moderate contribution to its value. The asset's setting does extend into the draft Order Limits due to its proximity.

### Little Bentley CP

- 3.4.328 To the south-east of the draft Order Limits proposed verge and landscaped buffer by approximately 1.8 km are the Grade II listed 'Bentley Hall' (**1308648**) and Grade I listed 'Church of St Mary' (**1111455**). The Hall is of medium value and the church is of high value. Both have historical and aesthetic value and have retained many of their fixtures, fittings and historical character. The Hall dates to the 16th century, or earlier rear range, with a 19th century front range. It is timber framed with a red brick front elevation. It is two stories tall with distinctive front and side gables. The church, which is located a short distance down the roads, to the south, dates to the 12th century with 13th, 15th, 16th and 18th century additions. It was constructed with mixed rubble including puddingstone, Roman brick and 16th century brickwork. There are limestone and brick dressing.
- 3.4.329 The Hall is set back from Church Road by a garden with a well-established hedge and tree line along the road. The northern side of the garden is exposed allowing good views to the building. To the west and north-west are the farm complex. To the north, east and south are green areas. The areas to the north and east gives a sense of space to the asset. The church is set back from the road by its churchyard which is not enclosed. This, and the agricultural fields surrounding the church gives a sense of space to the asset. This historic and present setting of both assets are to not dissimilar. Overall, the assets setting makes a considerable contribution to their value. Due to the distance, the assets setting does not extend into the draft Order Limits.

### *Non-Designated Heritage Assets*

- 3.4.330 A medium value moat at Ardleigh Wick (**3095**) c. 5 m south of the draft Order Limits in the Ardleigh geographic region. This asset is visible as an earthwork feature and holds historical and evidential value.
- 3.4.331 A series of low value medieval finds were found at Wick Farm (**3097** and **3090**) during a fieldwalking exercise, and later excavation revealed probable medieval to post medieval field ditches and a trackway. The assets are within the draft Order Limits. Medieval to post medieval pottery was collected during the field walking exercise, as well as the remains of a ditched trackway which was probably used in the 13th to 19th centuries as a link road from Crown Lane to Wick Lane (north to south). The medieval and post medieval remains are likely to have related to the forerunners of Wick Farm, as a moated enclosure is thought to have been the farmstead prior to the extant one now. A 12th to 13th century boundary ditch in the north of the asset suggested a medieval origin to the existing land division patterns. There are also medieval and post medieval ditches and pits which lay along the edge of the marginal land in the valley floor, and post medieval gullies which were interpreted as pens for livestock. Two small cropmark enclosure were found near dwellings in the south-eastern part of the asset and are dated to the post medieval period. These assets have evidential value.
- 3.4.332 The medium value churchyard of St Mary's Church (**3091**) is c. 20 m west of the draft Order Limits at Langham. During a watching brief in 1993, a single large stone was found in a trench in the churchyard. This stone was identical to those used in the windowsills of the church. This asset holds evidential, historical, and communal value.

- 3.4.333 There was a low value findspot of a bronze padlock and a square section of a chamber with a projecting area and keyhole (**3276**) situated within the draft Order Limits c. 320 m south-west of Parney Heath. This asset has evidential value.
- 3.4.334 There is a findspot for two low value medieval assets (**3304**, **3305**) situated. Within the draft Order Limits c.2 km east of Boxted settlement. This asset has evidential value.
- 3.4.335 The Colchester HER holds three records for medieval undefined metal detector finds of unknown value in the following locations:
- From land within the draft Order Limits, the asset (**3311**) was recovered near Lower Street
  - From land within the draft Order Limits asset (**3317**) was recovered near the River Stour
  - A findspot from the medieval period (**3270**) is situated outside the draft Order Limits near Langham Hall.

## Post Medieval

### *Designated Heritage Assets*

#### **Nedging-with-Naughton CP**

- 3.4.336 The Grade II listed 'Underwood Grange' (**1037105**), located c. 1.9 km west of the draft Order Limits, is a 16th-17th century timber framed and plastered building with a tiled roof. The asset has been restored and renovated; however, the timber framing remains exposed on the front. The asset comprises two storeys and has a ridge chimney stack.
- 3.4.337 The asset is located down a long, densely vegetated private driveway which leads off the B1078, to the south. The asset is set within densely vegetated garden surrounded by vegetation on each border of the property. Between the assets property and the B1078 is an open grass field and patch of woodland. Surrounding the assets property to the east, south and west and open field. The asset is located within a rural agricultural landscape, with some farm barn buildings to the north-west on the asset within the property grounds. The OS six-inch map from 1884 indicates that there were once other associated farm builds to the north-west of the asset that are no longer present. The asset appears to be set within a landscape that resembles the historical agricultural landscape of the asset. The setting of the asset contributes considerably to its value. The asset is medium value and has historical, aesthetic, and evidential value. The setting of the asset does not extend to the draft Order Limits.

#### **Elmsett CP**

- 3.4.338 The Grade II listed 'Wheelwright Cottages' (**1351463**), located c. 1.9 km south-west of the draft Order Limits, is a 18th - 19th century timber-framed cottages faced in brick and painted. The asset has one storey, a thatched roof and two ridged chimney stacks.
- 3.4.339 The asset is located within a small, grassed garden lined with a wooden fence, close to the road edge of The Street. The asset is located on the corner of the road where it is joined by Ipswich Road. opposite the asset is the Elmsett Green and to the east, west and south are residential properties. The village as a whole is surrounded by agricultural land. The rural village setting of the asset contributes considerably to the

value of the asset, despite the modern development in the village to the south-west and south-east. The asset has historical, aesthetic, and evidential value and is medium value. The setting of the asset does not extend to the draft Order Limits.

- 3.4.340 The Grade II listed 'Wall Farmhouse' (**1351462**), located c. 1.9 km south-west of the draft Order Limits, is a 17th century timber-framed and plastered building with a wing to the north-east and extended to the north-west. The asset has a thatched roof with a central ridge chimney stack.
- 3.4.341 The asset is located within a garden lined with a medium height privet hedge to the south-west and dense mature vegetation to the south-east along the Ipswich Road which the asset is situated on. The north-western and northern eastern borders are similar, comprising mature vegetation and privet hedge. The north-eastern and eastern edge of the property borders a large agricultural field. To the west and south are modern residential properties. The setting of the asset contributes moderately to its value due to the encroachment of the modern residential settlement to the south-west and south into the agricultural land which once surrounded the then farm, which appears now to be a residential property only. The asset has historical, aesthetic, and evidential value and has medium value. The setting of the asset is confined to its residential setting and the neighbouring agricultural field and so the setting of the asset does not extend to the draft Order Limits.
- 3.4.342 The following two assets form a group. The Grade II listed 'Laurel Cottage' (**1194605**), located c. 1.4 km south-west of the draft Order Limits, is a two storey, 16th century timber framed, plastered building. There is a 19th century gault brick block on the north-west side of the asset. The Grade II listed 'Barn to east of Lauren Cottage' (**1351443**), located c. 1.44 km south-west of the draft Order Limits.
- 3.4.343 The assets are located within a garden lined with dense vegetation, shielding a lot of the property from the road, at the junction of Offton Road and Flowton Road. The assets are located on the north-eastern periphery of the settlement of Elmsett and are surrounded by agricultural fields. The setting of the assets contributes considerably to their value. The assets have historical and evidential value and are of medium value. Their setting does not extend to the draft Order Limits.
- 3.4.344 'Hill Farmhouse' (**1037320**) is a Grade II listed building that is set back from Flowton Road, c. 1 km south of the draft Order Limits. This farmhouse is a 16th-17th century timber-framed and plastered building, showcases exposed timber-framing on the north side and sham timber-framing on the east end. The traditional aesthetic includes casement windows, a central ridge chimney stack, and a gabled dormer on the front, with a modern gabled porch. Overall, the farmhouse has medium value based on its evidential, historical and aesthetic value.
- 3.4.345 Situated in an open landscape just off the main road, the setting of this house is informed by its location in a farmyard with a stream located behind the outhouse. The setting is also informed by the surrounding agricultural landscape with which it has a functional and historical relationship. The setting makes a very considerable contribution to the asset's value but does not extend to the draft Order Limits.
- 3.4.346 The Grade II listed 'Church Farm' (**1037319**) is located along Manor Road, c. 300 m north of Elmsett, and c. 900 m south-west of the draft Order Limits. The 16th-17th century Church Farm, with remnants of a moat, has undergone significant renovation. It features a tiled roof, small modern casement windows, and an interior with exposed timber-framing and a ridge chimney stack. Overall, the house has medium value based on its evidential, historical and aesthetic value.

- 3.4.347 The house is situated on the outskirts of a rural village, adjacent to the medieval Grade I listed Church of St Peter (**1194594**). It enjoys an open setting with expansive views, positioned on elevated ground. The property features a large garden bordered by a ditch to the north, with mature trees enhancing the surroundings. Overall, the setting make considerable contribution to the asset's value but does not extend to the draft Order Limits.
- 3.4.348 The Grade II Listed 'Elm Farmhouse' (**1351464**) is located along Whatfield Road and c. 1.9 km south-west of the draft Order Limits. The asset is of **medium value** and has historical, evidential, and aesthetic value. The asset is dated to the 17th to 18th centuries and is a two-storeyed timber framed and pink plaster-cladded building. Its immediate setting is enclosed by vegetation and fencing within a central village location, and the wider setting is the agricultural landscape. The asset's setting does not extend to the draft Order Limits.

### Hintlesham CP

- 3.4.349 The Grade I listed asset 'Hintlesham Hall' (**1036917**), located c. 2 km from the draft Order Limits, is a country-house, built c. 1576, now in use as a hotel. The house was altered in the 1680's by Henry Timperley, then later remodelled in c. 1725-40 by Richard Powys. The asset is built in brick with a rendered main façade, stone dressings and hipped plain tile roof. The house was originally constructed with an E-shaped plan, the centre of the build was removed or incorporated in the 18th century into the façade. To its north is the 'Service ranges, stables, former coach house and brewhouse attached to Hintlesham Hall' (**1036918**). The stables and service range exhibit a blend of 17th century and early 18th century features, with an underlying 16th century core. The 1710 Sun Insurance plaque on the service range provides a specific historical marker. The former coach house, displaying a red brick hipped tile roof and semi-circular archways, maintains a 18th century aesthetic. Additionally, the brewhouse, marked by a 1980s Venetian window, reflects a more recent renovation. Overall, the hall has high value while the other listed building has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.350 The assets are located on the north-western edge of the linear settlement of Hintlesham, down a private track leading off the A1071. These assets are set within a large, grassed garden interspersed with rows of mature trees. To the north and rear (east) of the assets is the Hintlesham Golf club and to the west, open fields and south a mixture of woodland, agricultural land and the edge of the golf club before reaching the village. The front (west) of the assets looks over the long driveway of the assets and agricultural land which extends beyond the A1071. Apart from the golf course immediately to the east, much of the surrounding landscape is agricultural, with some patches of woodland. The setting of the assets contributes considerably to their value. The setting of both assets does not extend to the draft Order Limits.
- 3.4.351 Along Priority Road, c. 2 km north of Hintlesham and c. 2.2 km south-west of the draft Order Limits, is the Grade II listed 'Hintlesham Priory' (**1193814**). The architectural evolution of Hintlesham Priory spans several periods, with its origins dating back to the 16th century or earlier. Initially timber framed, the structure has undergone transformations, predominantly encased or replaced with red brick. The 19th century which introduces distinctive elements, including a two-storey canted bay and a series of cross-casement windows on both floors. An early 19th century 6-panel door adds to the character. Overall, the priory has medium value based on its evidential, historical and aesthetic value.
- 3.4.352 Set back from the road at the end of a short private track, Hintlesham Priory is surrounded by mature trees, with gardens both at the front and rear. Beyond lie

agricultural fields, creating a secluded and rural environment. To the north, there is a residential property, contributing to the quiet and isolated nature of the surroundings. Overall, the setting of the asset makes considerable contribution to the asset's value but it does not extend to the draft Order Limits.

- 3.4.353 The only Grade II post medieval listed building within the settlement of Hintlesham, that is scoped in, is 'Hyntle Place' (**1351643**). It is located c. 900 m west of the draft Order Limits. Hyntle Place, a residence originating from the 16th century with subsequent early 19th-century and later additions, showcases a charming exterior with its timber framed structure enveloped in gault brick. The H-plan design comprises a two-bay hall, flanked by gabled cross wings extended in the 19th century. Overall, the house has medium value based on its evidential, historical and aesthetic value.
- 3.4.354 The setting is informed by its location within the settlement and its relationship with the other scoped in listed building within the settlement, the medieval Grade II 'Church of St Nicholas' (**1351644**). Hyntle Place is situated at a discreet distance from the thoroughfare, ensconced within maintained mixed-height borders. Positioned in a central village locale, the property enjoys a quiet reprieve, shielded from the adjacent bustling road. The busy-ness of the road is a detractor however, this asset would have been placed deliberately by this road. Therefore, the road does contribute to its understanding. The deliberate seclusion imparts a distinguished and tranquil ambiance to the residence, contributing to an environment of refined serenity for its occupants. Overall, the setting of the asset makes considerable contribution to its value and being confined to the settlement it does not extend to the draft Order Limits.

### **Burstall CP**

- 3.4.355 There is one post medieval Grade II listed building 'Burstall Hill Cottages' (**1036950**). It is located c. 670 m south-west of the draft Order Limits. Burstall Hill Cottages, late 17th or early 18th century, showcase an exterior with rendered brick, thatched roof, and symmetrical design. Each cottage features a metal-framed casement and boarded door, complemented by a central axial brick stack. Overall, the cottage has medium value based on its evidential, historical and aesthetic value.
- 3.4.356 Situated on an elevated plane relative to the road, the asset boasts a quiet setting with its entrance discreetly oriented away from the road. A hedge borders the roadside, contributing to the property's sense of privacy. Toward the north-east lies a quaint courtyard, complemented by the allure of a thatched roof. To the west and south, expansive fields enhance the tranquillity of the surroundings, creating a rural ambiance. Additionally, some residences to the north further characterise the quiet locale. Overall, the setting of the asset makes considerable contribution to its value but does not extend to the draft Order Limits.
- 3.4.357 Within the settlement of Burstall are two post medieval Grade II listed buildings along The Street: the 17th century 'Barn at White House Farm' (**1351618**) and the 16th century 'Half Moon' (**1351619**). They are located c. 700 m south of the draft Order Limits. They both have medium value based on their evidential, historical and aesthetic value.
- 3.4.358 Their setting is informed by their location within the Burstall settlement where there are other listed buildings: the early 16th century Grade II 'Mulberry Hall' (**1036947**) and the medieval Grade I 'Church of Saint Mary' (**1036948**). They all have historical relationship and form a group value. Burstall is a small settlement with agricultural fields all around which didn't change since the 19th century according to the first

edition OS map of 1886. Overall, the setting of the assets makes considerable contribution to the assets' value and being confined to the settlement it does not extend to the draft Order Limits.

3.4.359 Located c. 600 m south-west of Burstall is the Grade II listed 'Mill Farm Cottage' (**1036954**), c. 1.1 km south-west of the draft Order Limits. This early 17th century cottage, enriched with early-mid 19th century additions, showcases a timber framed and rendered exterior. Highlighted by a distinctive axial brick stack, the property features a projecting gabled porch with a circular footprint and Gothic-inspired casements. The distinctive exterior elements contribute to the overall appeal and value of this cottage. Overall, the cottage has medium value based on its evidential, historical and aesthetic value.

3.4.360 Mill Farm Cottage enjoys a secluded setting within its own farmyard, accessible through a narrow track bordered by hedges. The property is surrounded by diverse features, including a pond or lake to the northeast within the farmyard and dense woodland to the south, acting as a natural screen from the Hintlesham Hall golf course to the southwest. Open farmland with occasional woodland pockets characterizes the northern view, contributing to the overall rural and secluded ambiance of the property. Overall, the setting makes a considerable contribution to the asset's value but does not extend to the draft Order Limits.

### **Sproughton CP**

3.4.361 Within the settlement of Sproughton are two Grade II listed buildings, the 'Sproughton Hall' (**1285915**) and the 'Barn about 50 metres south-west of Sproughton Hall' (**1351647**). They are located to the north of the settlement, approximately 850 m east of the draft Order Limits. They have medium value based on their evidential, historical and aesthetic value.

3.4.362 The setting of both these assets is informed by their location within the settlement as well as their relationship with each other and with other listed buildings in Sproughton such as the medieval Grade II\* listed 'Church of All Saints' (**1285956**) and the medieval Grade II listed 'The Wild Man' (**1351646**). The Sproughton Hall is recorded on the first edition of the OS map of 1886. The direct surroundings of the house and the barn have not changed much since that time, but the built-up area has grown, particularly to the south, and the wider environment has been transformed by the addition of the A14, the emergence of industrial areas to the east and south-east and the development of Ipswich. Overall, the setting of these two listed buildings makes considerable contribution to their value but does not extend to the draft Order Limits as it is limited in the settlement.

3.4.363 Along the B1113, 300 m south of Sproughton is the Grade II listed 'Prync's Lodge' (**1036921**). It is located c. 590 m east of the draft Order Limits. Prync's Lodge, likely originating in the 16th century and extensively renovated in the 17th century, features timber-framed construction and a rendered exterior. The structure, now comprising two stories, includes 20th century timber casements and a mid-17th century brick stack. Overall, the lodge has medium value based on its evidential, historical and aesthetic value.

3.4.364 Prync's Lodge is nestled just off a private drive. Tall hedges and lush foliage provide a degree of seclusion from the bustling nearby road, which generates considerable noise. The property shares its surroundings with a grand-looking property across the road, complemented by brick walling. The setting makes considerable contribution to its value but does not extend to the draft Order Limits.

- 3.4.365 'Sproughton Manor' (**1036922**) is a Grade II listed building located c. 500 m north-east of Sproughton, and c. 1.2 km east of the draft Order Limits. Sproughton Manor, built in 1863, boasts a grey brick exterior with grey and yellow stone accents. The asymmetrical building features three bays, showcasing charming elements like a half-hipped gable, a distinctive mansard porch, and intricate brickwork. The rear garden front maintains symmetry and features Victorian craftsmanship, including crested ridge tiles and historical arms of Henry Philipps and Lucy Birch Philipps. Overall, the manor has medium value based on its evidential, historical, aesthetic and communal value.
- 3.4.366 Sproughton Manor is situated at the end of a private track, providing a secluded setting surrounded by woodland. The immediate surroundings have remained consistent since the first edition of the OS map in 1884, also retaining a rural ambiance with agricultural fields. However, changes to the east, including the construction of the new A14 and the development of an industrial estate and Ipswich dwellings, have altered the broader landscape. Overall, the setting makes a moderate contribution to its value but does not extend to the draft Order Limits.

### Chattisham CP

- 3.4.367 The Grade II listed building 'the Orchards' (**1036894**) is located along Chattisham Road, c. 830 m south-east of Chattisham, c. 300 m south-east of an draft Order Limits permanent access and c. 540 m south-east of the draft Order Limits. It is a dwelling dating to the later 16th century with subsequent 18th century and 20th century modifications, presents a formal exterior with timber framing rendered and brick extensions. The plaintile roof, part-glazed door, and casement windows contribute to its historic and aesthetic value. Overall, this house has medium value based on its evidential, historical and aesthetic value.
- 3.4.368 The Orchard is positioned with a setback from the road, delineated by an established hedgerow, providing a degree of enclosure. The surrounding area consists of extensive open rural fields, fostering a quiet ambiance associated with agricultural activities. The proximity to a semi-busy road is a notable feature of the setting. Overall, the setting makes a considerable contribution to the asset's value but does not extend to the draft Order Limits.
- 3.4.369 'Coles Green Farmhouse' (**1285727**), is a Grade II listed building dating to the mid to late 16th century with subsequent alterations, combines timber framing and brick construction with plaintile roofs. The L-plan structure includes an original 16th century house, a rear wing, and a c. 1800 additional bay. The two-story façade features late 19th century tripartite sashes, an early 19th century sash, and a distinctive brick porch. It is located along Chattisham Road, c. 650 m south-east of Chattisham, c. 100 m east of an draft Order Limits permanent access and c. 340 m south-east to the draft Order Limits. Overall, the farmhouse has a medium value based on its evidential, historical and aesthetic value.
- 3.4.370 Coles Green Farmhouse is set back from the road, enveloped by a variety of vegetation at mixed heights. The immediate surroundings include associated farm buildings and machinery, contributing to the agricultural character. The broader setting extends to a rural agricultural landscape which the asset has a historic and functional relationship and is marked by a semi-busy road nearby. The property's location is defined by a balance between seclusion and its connection to the agricultural context. Overall, the setting makes considerable contribution to the asset's value and extends to the draft Order Limits.

- 3.4.371 Within the settlement of Chattisham are three post medieval listed buildings, the 16th century Grade II Listed 'Old Rectory' (**1351622**), the later Grade II Listed 17th century 'Chattisham Place' (**1036951**) and the Grade II Listed mid-18th century 'Cartshed at Chattisham Place' (**1351621**). They are located between, c. 240 m and 400 m north-west of the draft Order Limits. They have group value. Overall, these three listed buildings have medium value based on their evidential, historical and aesthetic value.
- 3.4.372 Their setting is informed by their location within the settlement and by their historical relationship with each other as well as with three medieval listed buildings, also located within Chattisham: the Grade II\* listed 'Church of All Saints' (**1351620**), the Grade II listed 'Church farmhouse' (**1036952**) and the Grade II listed 'The Clayes' (**1193456**). The setting of each of the three post medieval buildings are limited to their garden (Old Rectory) or yard (Chattisham Place and Cartshed at Chattisham Place). Overall, their setting makes considerable contribution to their value but does not extend to the draft Order Limits.
- 3.4.373 'Chattisham Hall' (**1193450**) is a Grade II listed building located c. 220 m north-west of Chattisham and c. 840 m of the draft Order Limits. The hall, c. 1830, is a two-storey L-plan house with tripartite sashes, a central door, and a Doric porch. Overall, the building has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.374 Chattisham Hall is surrounded by a mid-height hedge and fence, set back with a driveway and lawns. The expansive grounds feature large pockets of established trees, creating a tranquil and rural ambiance. The wider surroundings include period properties and vast open crop fields, contributing to the serene and quiet setting of the property. Overall, the setting makes a considerable contribution to the asset's value but does not extend to the draft Order Limits.
- 3.4.375 'Doves Cottage' (**1036953**) is a Grade II listed building located c. 480 m north of Chattisham and c. 850 m north-west of the draft Order Limits. The cottage, a late 16th-century timber framed and rendered dwelling, showcases features such as casement windows, a distinctive boarded door, and a brick stack. Overall, the cottage has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.376 Doves Cottage is nestled in a dip set back from the road and discreetly shielded by an established hedgerow with mixed-height vegetation. Accessible via a long driveway, the house remains subtly concealed behind the natural boundary. The broader setting unfolds with undulating crop fields and a nearby road, creating a quiet environment. The setting makes a considerable contribution to the asset's value but does not extend to the draft Order Limits.
- 3.4.377 The 'Old Mill Cottage' (**1193444**) is a Grade II listed building located c. 1 km north-east of Chattisham, and c. 250 m north-west of the draft Order Limits. Old Mill Cottage, originally a mill house, exudes historical value with its later 16th and 17th century timber-framed structure, adorned with a thatched roof. The exterior features three 20th century timber casements, complemented by a pair of windows creating an eyebrow dormer. A boarded door and an axial brick stack complete the external elements. Overall, the cottage has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.378 Nestled along a tranquil country road, Old Mill Cottage enjoys a setting tucked away in a secluded valley-like field that adds to its sense of privacy. The cottage is thoughtfully enclosed by a combination of hedges, a high bank, and trees, creating a secluded area. The surrounding environment is characterized by serene quietude, contributing to the rural ambiance. As one looks beyond, the wider landscape unfolds

with picturesque agricultural fields, complemented by a high bank on the opposite side. Therefore, the setting makes a very considerable contribution to the asset's value but does not extend to the draft Order Limits.

### **Copdock and Washbrook CP**

- 3.4.379 At the T section between Church Lane and Hadleigh Road are two Grade II listed buildings, the 16th century 'Red House' (**1285933**) and the 17th century 'Barn c20 m south-east of Red House' (**1036924**), located c. 1 km north-east of the draft Order Limits. Overall, they have medium value based on their evidential, historical and aesthetic value.
- 3.4.380 Red House and its barn are located off the main road in the rural countryside, positioned a distance from the main town. The property is noticeable when the road descends from a hilltop vantage point. Despite the proximity to a very busy road, both assets are enclosed by a red brick wall and sporadic trees, contributing to a partially shielded setting. Their setting is also informed by their historical relationship with each other. The immediate setting has remained consistent since the first edition of the OS map in 1886, also retaining a rural ambiance with agricultural fields. However, changes to the west and east, including the construction of the new A14 and the development of an industrial estate and Ipswich dwellings, have altered the broader landscape. Overall, the setting makes a moderate contribution to its value but does not extend to the draft Order Limits.
- 3.4.381 'Copdock Lodge' (**1036890**), a Grade II listed building, is located along London Road, c. 800 m south-west of Washbrook and Copdock, c. 1.6 km south-east of the draft Order Limits. This Grade II listed house, possibly originating from the 17th century and later modified, presents an exterior characterized by red brick, potentially encasing a timber frame core. The asset was formerly symmetrical and features a central door surrounded by sashes with glazing bars. Overall, this listed building has a medium value based on its evidential, historical and aesthetic value.
- 3.4.382 Copdock Lodge is set back from a notably busy road, discreetly separated by a red brick wall. The front of the property imparts a sense of openness, juxtaposed by large, established vegetation that encloses the sides and rear, fostering a secluded atmosphere. The busy-ness of the road is a detractor however, this lodge would have been placed deliberately by this road. Therefore, the road does contribute to its understanding. Overall, the setting contributes to its value but does not extend to the draft Order Limits.
- 3.4.383 The Grade II listed 'Fen Farmhouse' (**1036895**) is located at the end of a private track, and that sets back from Hollow Road. It is found c. 830 m south-east of the draft Order Limits. Fen Farmhouse, blending 16th century and c. 1600 builds with a 20th century restoration, features a timber-framed exterior with rendering and a plain tile roof. The roof structures, featuring collars and cranked braces, enhance the farmhouse's aesthetic value. Overall, this farmhouse has medium value based on its evidential, historical and aesthetic value.
- 3.4.384 Its setting is informed by its location in a farmyard, in a rural environment. The setting is further shaped by the surrounding agricultural land with which the asset has a historic and functional relationship. The serene environment augments the value of the farmhouse. This property is documented on the OS map from 1884, and the only recent addition in the close setting is a new dwelling approximately 230 meters to the south-east. Overall, the setting of this asset makes considerable contribution to its value but does not extend to the draft Order Limits.

- 3.4.385 'Chaloners Cottage' (**1036896**) is a Grade II listed building located within the settlement of Washbrook and Copdock, and c. 840 m south-east of the draft Order Limits. This cottage, with its 17th century core and late 18th century refacing, presents a valuable blend of historical and aesthetic value. The timber-framed structure, encased in Flemish bond brickwork, displays a symmetrical façade with a reeded doorcase and six recessed panels. The axial brick stack and visible timber frame on the left-hand gable wall add to its historical value. There are other listed buildings (scoped out of the study area) within the settlement which enhance the historical value of this cottage. Overall, the cottage has medium value based on its evidential, historical and aesthetic value.
- 3.4.386 This setting is informed by its location within the settlement. This cottage is situated off the main road, setting back by a mid-sized front garden and wooden fence. Since the OS map version 1884, the settlement of Washbrook and Copdock has grown a little, especially east of the building, but the majority of surrounding buildings exhibit period architecture, contributing to the character of the area. The small village boasts a quiet semi-rural location, but the constant and noticeable road noise from the A12 and A14 in the distance is a notable feature. Overall, the setting makes moderate contribution to the asset's value but does not extend to the draft Order Limits.
- 3.4.387 'Birch House Farmhouse' (**1036898**) is a Grade II listed building located c. 1.2 km south-west of Chattisham, c. 250 m north-west of the draft Order Limits. The farmhouse, dating back to the early 17th century with subsequent 18th century and later modifications, presents a timber-framed exterior with rendered surfaces and plain tile roofs. Overall, the farmhouse has medium value based on its evidential, historical and aesthetic value.
- 3.4.388 The setting is informed by its location in a farmyard and its historical relationship with the medieval and medium value non-designated moat (3042) as well as the post medieval low value non-designated Farmstead: Birch House Farm (3046). The farmhouse is enclosed by a surrounding fence and hedge adorned with mixed vegetation hedging. The broader surroundings feature crop fields and agricultural buildings, accompanied by associated machinery. The setting combines a sense of privacy within its immediate boundaries with a wider landscape characterized by agricultural elements, contributing to its overall context. Overall, the setting makes considerable contribution to the asset's value and extends to the draft Order Limits.
- 3.4.389 'Belldown' (**1194246**), a Grade II listed building, is located along London Road, c. 340 m of the south of Washbrook and Copdock, c. 1.6 km south-east of the draft Order Limits. Belldown, an early to mid-18th-century house, boasts a red brick façade, Flemish bond style, and a black glazed pantile roof. The architecture is enhanced by a brick plinth, a first-floor band, and a modillion cornice. Three 20th century casement dormers and original doors with HL hinges add to its character. Overall, the house has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.390 Its setting is informed by its roadside location. The busy-ness of the road is a detractor however, this asset would have been placed deliberately by this road. Therefore, the road does contribute to its understanding. However, the constant traffic noise from other nearby busy roads, including the new A12 and A14, located c. 850 m east, is also noticeable. Despite efforts to enclose, the surroundings of this asset feel relatively open, with high mixed vegetated borders. To the rear, the setting transitions into a rural mix of cottages and fields, while the front overlooks open fields and the road. Overall, the setting makes considerable contribution to the asset's value but does not extend to the draft Order Limits.

- 3.4.391 'The barn at Copdock Hall' (**1351635**) is a Grade II listed building, located along Church Lane, south-east of Washbrook and Copdock, and c. 1.9 km south-east of the draft Order Limits. The barn is a significant late-16th century threshing barn with notable aesthetic and historical value. Built of hand-made brick with diamond-patterned diaper work, the barn has undergone alterations and extensions over the centuries while retaining original fabric and an impressive roof structure. Remaining in agricultural use until recently, the barn reflects the status of its owner, Sir Lionel Tollemarche, High Sheriff of Suffolk. With crow-stepped gables and slate roof covering, the linear form of the barn includes projecting midstreys and decorative breather openings. Despite interior alterations, the exposed roof structure and original features contribute to its aesthetic value. Overall, the barn has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.392 The barn is centrally located within expansive grounds near the Grade II\* listed Church of St Peter (**1194324**), and the Copdock Hall, offering open and extensive views of Ipswich and the surrounding countryside. The setting is informed by the historical relationship between the barn and the church. The setting is generally quiet in terms of human activity, providing a serene ambiance. However, the constant and loud traffic noise from the nearby new A12 and A14 is notable, impacting the overall acoustic environment. Overall, the setting is confined to its yard setting and the adjacent agricultural field to the north. Therefore, the setting makes a considerable contribution to the asset's value and does not extend to the draft Order Limits.
- 3.4.393 'Amor Hall' (**1194446**) is a Grade II listed building located north of Washbrook and Copdock, and c. 600 m south of the draft Order Limits. The hall, dating back to the mid-16th century with subsequent modifications in the early 17th and mid-19th centuries, is a timber-framed structure, rendered and fronted with ashlar, stands under a crested plaintile roof. A symmetrical four-baywhiche features a left-side crosswing, adorned with small-paned casements and a canted porch leading to a panel plank door. Overall, this asset has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.394 Amor Hall enjoys a secluded setting, even it is close to the village, along a tranquil track. The immediate surroundings exude a sense of enclosure, attributed to the presence of associated stables and cottages to the east. The front of the property opens up to vast, rural fields, creating a serene and countryside atmosphere. However, the ambiance is tempered by the persistent and loud traffic noise emanating from the nearby bustling main roads. The busy-ness of the road is a detractor however, these assets would have been placed deliberately by this road. Therefore, the road does contribute to their understanding. Overall, the setting makes a considerable contribution to the asset's value and does not extend to the draft Order Limits.

### **Belstead CP**

- 3.4.395 Near Belstead village are two listed buildings, the 16th century Grade II\* 'Belstead Hall' (**1351648**) and the 17th century Grade II 'Barn at Belstead Hall' (**1285906**), and located c. 2 km south-east of the draft Order Limits. They have a group value. While the hall has high value, the barn has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.396 Belstead Hall and its barn are situated in a secluded location, obscured from the road by a lengthy driveway leading to the hall. The entrance is strategically positioned near the Grade II\* listed 'Saint Mary's Church' (**1194048**), ensuring convenient access. Beyond the estate, the broader landscape unfolds with agricultural fields and pasture lands, contributing to the overall rural ambiance. Despite the tranquillity of

the surrounding areas, the persistent and pronounced traffic noise from the nearby A14 motorway is notable. This road changed the wider setting of these assets since their creation, but the immediate setting did not change and is characterized by a serene churchyard, enclosed by chain fencing, established trees, and a wooded area, fostering a peaceful and secluded atmosphere. Their setting is also informed by their historical relationships between each other and with the Church (**1194048**). Overall, the setting makes considerable contribution to the assets' value but does not extend to the draft Order Limits.

- 3.4.397 'Felcourt' (**1194223**) is a Grade II listed building located along the Avenue, c. 680 m south of Washbrook and Copdock and c. 2 km south-east of the draft Order Limits. Felcourt, built in 1858 by E. B. Lamb for Frederick de Grey, is a red brick structure and yellow and red sandstone dressings. The irregular plan and asymmetrical facades, notably the principal ones facing south and east, contribute to its aesthetic value. The entrance which features a gabled wing, showcasing a multi-storey structure with carefully crafted windows and a prominent multiple-stack apex. The south which adds further character, projecting divergent roof lines and stacks. Overall, this asset has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.398 Nestled within a private drive, Felcourt is prominently situated, set far back from the road, with its house concealed from immediate view along the extensive driveway. The upper floor gable becomes visible from the surrounding playing fields, imparting a sense of enclosure attributed to the well-established vegetation. The broader setting encompasses paddocks, a playing field, a bustling road, and extends to rural fields, culminating in the presence of the A12 to the rear. Overall, the setting makes a considerable contribution to the asset's value and does not extend to the draft Order Limits.
- 3.4.399 The Grange' (**1194480**) is a Grade II listed building, found along Pigeons Lane, c. 900 m north-west of the village of Washbrook and Copdock, and c. 130 m south-west of the draft Order Limits. The Grange, a house with a rich history dating back to the 16th century and 17th century, received a late-19th century extension that reshaped its original structure. The property features a mix of timber-framed and rendered sections. The main range, with a Flemish bond brick ground floor and timber-framed first floor, showcases a central door, flanked by replacement casements. Overall, the asset has medium value, both based on their evidential, historical and aesthetic value.
- 3.4.400 The Grange is set back from the road, creating a sense of enclosure with the use of well-established hedges. Within this defined boundary, the property opens up, offering a quiet and rural ambiance. The wider setting extends to a picturesque rural landscape featuring a mix of crops, pastures, and paddocks. The setting is further informed by its relationship with the non-designated Washbrook Street (**3160**). Overall, the setting makes a considerable contribution to the asset's value and does not extend to the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.4.401 There is a **low value** bridge (**3129**) is situated within the draft Order Limits c.1.3 km north-east of Elmsett. This asset was shown on Hodkinson's map of 1783 and has evidential value. The current state of the asset is unknown.
- 3.4.402 The **negligible value** site of a former milestone (**3319**) of evidential value is located north of the A1071, c. 1.2 km south of Sproughton and c. 110 m east of the Order Limits.

- 3.4.403 The **low value** hill farm farmstead (**3123**) is situated c. 245 m west of the draft Order Limits to the east of Burstalhill. The Farmstead is visible on the 1st edition OS map set out in a loose plan with a detached farmhouse set away from the yard. There has been partial loss of the working buildings and there are some modern sheds on the side of the Farmstead. This asset is associated with the Grade II listed medium value Church Farmhouse (**1036952**) and holds evidential and historic value.
- 3.4.404 The **low value** Church Farm Farmstead (**3153**) is situated just south of Lower Barn Road, Chattisham, c.275 m north of the draft Order Limits to the south of the settlement. It bounds All Saints (**1351620**) and Church Farmhouse (**1036952**) on the east. The farmstead is visible on the 1st edition OS map as being laid in a regular U-shaped plan with additional detached elements, one of which was the farmhouse which is set away from the yard. There has been significant loss of the working buildings with the remainder being converted into residential use. The asset has evidential value.
- 3.4.405 The **low value** Higham Hall Farmstead (**3149**) is situated c. 90 m south of Higham Road and c. 160 m west of the draft Order Limits. It is bound by St Mary's Church to its west. The farmstead is visible on the 1st edition OS map as being laid in a regular courtyard multi-yard with three full-plan ranges, an L-shaped range, and additional detached elements, one of which was the farmhouse which was is set away from the yard. There has been a significant loss of the working buildings with the remainder converted to residential use and the construction of modern sheds. This asset is associated with Higham Hall (**1036957**) and has historical and evidential value.
- 3.4.406 There are **low value** earthworks (**3018**) consisting of three parallel ditches situated c. 110 m to c. 150 m west of the draft Order Limits north of Washbrook Road/Pigeons Lane. These earthworks hold evidential value.
- 3.4.407 The **low value** Cherryground Farmstead (**3131**) is situated c. 230 m north of the draft Order Limits. This farmstead is visible on the 1st edition OS map as being laid out in a dispersed plan with a detached farmhouse set away from the yard. The farmstead is still extant with all the buildings being converted into residential dwellings. This asset has evidential and historical value.
- 3.4.408 The low value Chattisham Place Farmstead (**3146**) is situated along the western side of Chattisham Road c. 25 m - of Chattisham and c. 100 m north-west of the draft Order Limits between Chattisham and Wenham Road. The farmstead is visible on the 1st edition OS map laid in a loose courtyard plan with additional detached elements, with the farmhouse being one of these. There has been significant loss of the working buildings with the addition of modern sheds on site since its construction. This asset holds evidential value.
- 3.4.409 The low value Church Farm Farmstead (**3153**) is situated just south of Lower Barn Road, Chattisham, c. 200 m north of the draft Order Limits to the south of the settlement. It bounds All Saints Church (**1351959**) on the east. The farmstead is visible on the 1st edition OS map as being laid in a regular U-shaped plan with additional detached elements, one of which was the farmhouse which is set away from the yard. There has been significant loss of the working buildings with the remainder being converted into residential use. The asset has evidential value.
- 3.4.410 The low value Old Mill House (**3159**) is situated c. 15 m back off Lower Barn Road and c. 220 m west of the draft Order Limits which span north to south over Washbrook Road. The mill and leat were shown on a map from 1595 and the leat survives on maps from the present day. The asset has evidential and historical value.

- 3.4.411 The low value Washbrook Street (**3160**) is situated on the southern side of Pigeons Lane c. 1 km north-west of Washbrook and Copdock, and c. 25 m east of the draft Order Limits. This asset was a c. 650 m long row of eight tenements with their occupier's names featured along the street line on a map from 1595. Some of the existing buildings may include elements of the original Tudor buildings. This asset holds evidential and historic value. The row of buildings on Pigeons Lane includes a low value unnamed farmstead (**3128**). This Farmstead is visible on the 1st edition OS map and is laid in a regular plan with a farmhouse attached to the agricultural range. Since its drawing on the OS map, it has been lost. The farmstead (**3128**) is associated with Washbrook Street (**3160**) and has shared low value, as well as historical and evidential value.
- 3.4.412 The low value Hill Farm Farmstead (**3134**) is situated c. 115 m north of Burstall Lane and c. 180 m due west of the draft Order Limits. The farmstead is from the 19th century and is in a regular U-shaped plan with working agricultural buildings and a farmhouse which is set away from the yard. There has been total change of the farmstead layout since it was first constructed. This asset holds evidential value.
- 3.4.413 The low value Perry Barn Farmstead (**3135**) straddles the draft Order Limits c. 225 m north of Burstall Lane. This Farmstead is from the 19th century and is of a regular L-shaped plan with agricultural buildings and a farmhouse which is set away from the yard. There has been total change to the Farmstead since its construction. This asset holds evidential value.
- 3.4.414 The low value Abbey Oaks Farmhouse Farmstead (**3136**) is situated c. 140 m east of the draft Order Limits and c. 300 m south of Burstall Lane. The Farmstead and farmhouse are from the 19th century and there are also converted buildings within this complex. The Farmstead is of a regular plan formed by the farm buildings with the farmhouse set away from the yard. There has been partial loss of the original farm buildings. This asset holds evidential value.
- 3.4.415 The low value Ivywell Farm Farmstead (**3137**) is situated on the northern side of the A1071 (Hurdle Makers Hill) and is c. 170 m east of the draft Order Limits between Hintlesham Park and Chantry Park. The Farmstead originates in the 19th century and is of a regular U-shaped plan which was formed by the working buildings, and a farmhouse that is set away from the yard. There has been total change to the farmstead layout from its original layout. This asset holds evidential value.
- 3.4.416 The low value Sproughton Park (Villa Farm) Farmstead (**3138**) is situated 50 m north-east of the draft Order Limits, between Hintlesham Park and Chantry Park. This Farmstead is from the 19th century and is of a regular plan formed by its agricultural buildings and with a farmhouse set away from the main yard. There has been significant loss of the traditional farm buildings since its construction. This asset holds evidential value.
- 3.4.417 The low value Burstall Bridge (**3145**) is situated over Flowton Brook within the draft Order Limits. The Bridge is visible on Bowen's map (**1755**) and Hodgkinson's map (**1783**) but its construction date is unknown. It was described in 1880 with a segmental brick arch over 2 segments with brick parapets and coping, with a wooden post and guards at each side. The HER record states that the precise location and history has not been checked. This asset has evidential and historical value.
- 3.4.418 The low value Fen Farm Farmstead (**3262**) is situated on the southern side of Thorpes Hill, A1071 which joins the settlement of Hintlesham with the western Ipswich suburbs, and is c. 160 m west of the draft Order Limits which pass these settlements north/south. The Farmstead is visible on the 1st edition OS map as being

laid out in a regular multi-yard plan with additional detached elements. One of which is the farmhouse which is set away from the yard. There has been a significant loss of the working buildings with the addition of large modern sheds, and now the site is used as a car dealership. This asset has evidential value.

- 3.4.419 There are a series of low value crop marks (**3098**) within the draft Order Limits which appear on the OS Six Inch, 1840s-1880s County Layer and indicate probable post-medieval field boundaries which are semi-extant. These field boundaries have evidential value.
- 3.4.420 A low value copper-alloy jetton (**3072**) was found within 250 m of the draft Order Limits. The asset's faces were very worn, but one face featured an orb design and the other face was most likely a rose. This asset has evidential value.
- 3.4.421 There is a low value Milestone (**3026**) within the draft Order Limits c. 2.3 km east of Hintlesham along the A1071 Thorpes Hill Road which leads to the western suburbs of Ipswich. This asset holds evidential and historical value.
- 3.4.422 A series of low value PAS finds were discovered within 250 m of the draft Order Limits. These assets have evidential and historical value and comprise of:
- A buckle (**3062**). This asset was a fragment of the outside edge of a cast copper-alloy buckle, with the rest missing due to old breaks. It was decorated with an openwork quatrefoil in the centre of the outside edge.
  - A hooked tag (**3065**). This asset was incomplete cast copper-alloy hooked tag, but the attachments loop and hook were missing due to old breaks. The openwork sub-circular plate is decorated with a series of 10 small circular holes and 2 trefoil holes and bordered with pellets.
  - A copper-alloy jetton (**3073**). The asset featured an orb and rose design by the Nuremburg master, Hans Schultes II from the period c.1586-1603.
  - A silver coin (**3074**). This asset is a silver threepence from the reign of Elizabeth I c. 1570-1579.
  - A silver coin (**3075**). This asset was very worn and was possibly a threepence from the reign of Elizabeth I c.1558-1603.
  - A coin (**3076**). This asset was a Richmond round farthing from the reign of Charles I c.1625-1649.
  - A tap (**3078**). This asset was an incomplete cast copper-alloy barrel tap spout, circular in shape and broken at both ends due to historic breaks. There was a ridge along the top and centre of the spout. The end that would not have been pushed into the barrel featured a rectangular knob which would have been used to hammer the tap into the barrel without incurring damage.
- 3.4.423 A low value jetton (**3084**) was found within the Burstall, Sproughton, and Hintlesham region. This asset was a copper-alloy rose and orb jetton of the Nuremburg Master Hans Krauwinkel II in the period c.1586-1635. The Jetton features a central circular aperture, 3 crowns and 3 lis arranged centrifugally around a central rose all within an inner circle. On the reverse, it features an imperial orb surmounted by a cross pattee within a double stranded trefoil within an inner circle. This asset has evidential and historical value.

## Raydon

### *Designated Heritage Assets*

- 3.4.424 'Valley House' (**1036967**) is a Grade II listed building located c. 300 m north-west of Raydon and c. 900 m west of the draft Order Limits. Valley Lodge, a historical dwelling with origins in the 16th century, underwent a significant 1911 remodel. Featuring a timber-framed structure with rendered walls and a plain tile roof, it boasts diverse architectural elements, including a gabled porch and cross casements. The house has medium value based on their evidential, historical and aesthetic value.
- 3.4.425 Situated by the roadside, Valley Lodge faces occasional traffic, but a large hedge provides separation. The road slightly dips, accentuating the asset's position. Structures to the southeast, potentially agricultural, contribute to the immediate surroundings. The broader setting encompasses agricultural fields and Raydon to the south-east, fostering a quiet and rural atmosphere. Overall, the setting makes great contribution to its value but does not extend to the draft Order Limits.
- 3.4.426 'Raydon House Nursing Home' (**1193318**) is a Grade II listed building within the settlement of Raydon, south area, c. 360 m north-west of the draft Order Limits. This house, a transformed 17th century cross wing, showcases later additions like the late 18th century to early 19th century front wing. This nursing home features a central stairhall plan and an Ionic porch leading to a 6-panel door. Its aesthetic features include well-proportioned sashes, a canted bay, and additional single-story elements. Overall, the house has medium value based on their evidential, historical and aesthetic value.
- 3.4.427 The setting of this property is informed by its location within the settlement. It is set back from a moderately busy road, with a garden and fence providing separation. Across the road, there's a grassed area adjacent to a T-junction, contributing to an open feeling. The surrounding area includes residential settlements to the north, south, and northeast, while agricultural fields extend to the west. Overall, it is a relatively quiet and tranquil residential setting. Therefore, the setting make a considerable contribution to the asset's value but being limited to the settlement it does not extend to the draft Order Limits.

## Wenham Parva CP

- 3.4.428 Around the site of the medieval scheduled monument 'Wenham Castle (Little Wenham Hall)' (**1003759**) are five post medieval listed buildings, the 16th century Grade II\* listed 'Barn Approximately 150 Metres North Of Little Wenham Castle And West Of Church Of St Lawrence' (**1194552**), the 16th century Grade II listed 'Garden Wall Approximately 20 Metres North West Of Little Wenham Castle' (**1033406**), the 16th century Grade II listed 'Little Wenham Hall Farmhouse' (**11285599**), the 17th century Grade II listed 'Farm Buildings Complex To West Of Barn And Buildings Listed 3/80 Little Wenham Castle' (**1351958**), and the 17th century Grade II listed 'Farm Buildings Complex Approximately 50 Metres North Of Little Wenham Castle Adjacent To South Of The Churchyard' (**1194648**). They are all located c. 700 north-west of Capel, and c. 1.2 km south-east of the draft Order Limits. They have group value. Overall, based on their evidential, historical and aesthetic value, the Grade II\* barn has high value and the four Grade II listed building has medium value.
- 3.4.429 These five listed building share the same setting, informed by their location within the broader manorial complex, centred around the medieval scheduled monument 'Wenham Castle (Little Wenham Hall)' (**1003759**), showcasing their group value. The historical and functional relationships between these five listed buildings further shape their shared environment, as well as their relationship with the schedule

monument (**1003759**) and two other medieval listed buildings (**1033410** and **1033405**) within the site. As evidenced by the first edition OS map of 1885, their setting remains largely unchanged over time. Enclosed within an immediate setting, there are open views to the north over farmland towards the LNER Hadleigh Branch railway that used to run across the landscape north-west to south-east. Their surroundings are characterized by a quiet, agricultural landscape, establishing a functional and historical rapport with the listed buildings. Notably, the area attracts numerous dog walkers due to the presence of Public Rights of Way (PROWs), adding to the dynamic and lived-in nature of the setting that continues to enhance the value of these closely-knit structures. Overall, the setting of the five post medieval listed buildings makes a very considerable contribution to their value but does not extend to the draft Order Limits.

- 3.4.430 Within the northern part of Little Wenham are three Grade II listed buildings within the same yard, the possibly 17th century origin 'Wenham Lodge' (**1033407**), the 18th century 'Cartlodge adjacent to road and approximately 30 metres north west of wenham lodge' (**1033408**) and the 17th century 'Outbuilding, probably a former Dairy/Bakehouse/Brewhouse adjacent to north of Wenham Lodge' (**1194677**). These assets are located along Raydon Road, c. 970 m east of the draft Order Limits. They all have medium value based on their evidential, historical, and aesthetic value.
- 3.4.431 Their setting is informed by their location in a yard surrounding by mature trees, grass bank and red brick walls. Their setting is also characterised by their historical and functional relationship with each other as well as with a non-designated Farmstead. As evidenced by the first edition OS map of 1885, their setting remains largely unchanged over time. The setting is further informed by the surrounding agricultural and quiet landscape with which the assets have a functional and historical relationship. Overall, the setting contributes to the assets' value and does not extend to the draft Order Limits.
- 3.4.432 Along Bottle Bridge Road are two Grade II listed buildings, the early 19th century 'Wenham Grange' (**1033409**) and its early 19th century 'Wall And Gates Adjacent To Road, Enclosing Garden To North Of Wenham Grange' (**1285586**). Wenham Grange is situated in a secluded setting, set back from the road and discreetly separated by listed building wall and gates. The feeling of enclosure is heightened by the presence of associated buildings and the natural barrier of established trees and bushes that envelop the property. Additionally, farm buildings located behind the grange contribute to the sense of seclusion. The setting of the wall and gates (**1285586**) does not reach to the draft Order Limits.
- 3.4.433 Both assets are associated with each other are of medium value. They both have aesthetic, historical, and evidential value. They are located c. 1.5 km north-east of Little Wenham, c. 90 m east of the draft Order Limits access route, and c. 240 m south of the draft Order Limits. There would be a draft Order Limits permanent access from the farmyard. The setting of these two listed buildings is further informed by the relationship between each other and with the non-designated farmstead Wenham Grange (**3167**). The setting is also characterised by the surrounding agricultural and quiet landscape with which the assets have a functional and historical relationship. The setting contributes to the asset's values and extends to the draft Order Limits.

### Wenham Magna CP

- 3.4.434 'Keepers Cottage, Mill Hill, Capel St Mary' (**1473644**) is a **medium value** Grade II Listed Building. It is dated to c.1700 and holds evidential, aesthetic, and historic value. The building is an example of the rural vernacular style of the 18th century

constructed of timber frames with monk bond brickwork and features an extension to the west and north from the 19th century. Its outbuildings were demolished in the 20th century, and in the same period, a northern extension was converted into a bathroom. It is set within established vegetation down a private track and the wider setting is rural, agricultural land. While its setting informs its value, it does not extend to the draft Order Limits.

### **Shelley CP**

- 3.4.435 The 17th century 'Wayside' (**1193203**), the 16th century 'Fox Farmhouse' (**1036969**), the 16th century 'Layham Hall' (**1193181**) and the early 17th century 'Ponds Farmhouse' (**1193243**) are four Grade II listed buildings found in the countryside between Shelley and Raydon. They are located between c. 1.5 km and c. 1.8 km west of the draft Order Limits. They all have medium value based on their evidential, historical and aesthetic value.
- 3.4.436 Situated in a rural landscape along countryside roads, these structures collectively embrace a shared setting. Encircled by expansive agricultural fields, they evoke a sense of openness and tranquillity. Each property is set back from the road, nestled within gardens or farmyards, and a few are enveloped by the presence of mature trees. Overall, their setting contributes to their value but does not extend to the draft Order Limits.
- 3.4.437 The late 16th century 'Spider Hall' (**1193209**), along with the 17th century 'Barn To Spider Hall' (**1351627**) and the early 19th century 'Lodge To Spider Hall' (**1036968**) are three Grade II listed buildings, located between c. 1.3 km and c. 1.6 km west of the draft Order Limits and between Raydon and Shelley. They have group value. They all have medium value based on their evidential, historical and aesthetic value.
- 3.4.438 The setting of these structures is shaped by their positioning in a rural area and by the historical and functional connections they share. Positioned prominently at the entrance and in close proximity to the road, the lodge stands in contrast to the other two listed buildings. These are situated further away from the road, found at the terminus of a private track, and are embraced by a courtyard adorned with mature trees. The expansive setting extends to include agricultural fields, with Raydon approximately 900 m to the east and Shelley around 500 m to the west. Overall, their setting contributes to their value but does not extend to the draft Order Limits.
- 3.4.439 'Sulleys Manor' (**1286268**), 'Five Bay Barn At Sulleys Manor Farm' (**1193263**) and 'Six Bay Barn At Sulleys Manor Farm' (**1351628**) are three Grade II listed buildings, set back from Sulleys Hill, c. 1 km south-west of Raydon and c. 1 km north-west of the draft Order Limits. They range in origin from the 16th century to the 18th century. Overall, they all have medium value based on their evidential, historical and aesthetic value.
- 3.4.440 Their setting is informed by their location in a farmyard, at the end of a private track. Their setting is also informed by their location in a rural environment, surrounded by agricultural fields giving a sense of tranquillity and space to these assets. The setting is further characterised by their historical and functional relationship with each other. Overall, their setting contributes to their value but does not extend to the draft Order Limits.

### *Non-Designated Heritage Assets*

- 3.4.441 The low value Birch House Farmstead (**3046**) sits within and extends out of the south-western edge of a moat (**3042**), c.230 m north-west of the draft Order Limits. The farmstead was visible on the 1st edition OS map and is dated to the 19th

century. The farmstead is laid out in a dispersed plan, detached from the farmhouse. These assets hold historic and evidential value.

- 3.4.442 The low value Longlands Barn (**3125**) is situated within the draft Order Limits, c. 530 m north-west of Wenham Road. The Farmstead appears on the 1st edition OS map but has been abandoned since. This asset holds evidential value.
- 3.4.443 The low value Rookery Farm (**3126**) is situated along Wenham Road with an access track leading from the main draft Order Limits along its northern boundary. The Farmstead is visible on the 1st edition OS map as a regular L-shaped plan with additional detached buildings, and a farmhouse that is attached to the agricultural range. The farmstead now has modern additions. This asset holds evidential value.
- 3.4.444 The low value Acacia Farm Farmstead (**3142**) is situated on the north side of Acacia Road c.190 m north-east of the draft Order Limits and c. 700 m west of Great Wenham. The farmstead was from the 19th century and was laid in a loose two-sided plan formed by the working agricultural buildings with a farmhouse which is set away from the yard. It has been demolished but holds evidential value.
- 3.4.445 The low value farmstead at Wenham Grange (**3167**) is situated on the southern side of Bottle Bridge Road c. 5 m south of the south-west/north-east aligned draft Order Limits. The farmstead and farmhouse are from the 19th century and are laid in a regular E-shaped plan formed by the working buildings with the farmhouse set away from the yard. There has been partial loss of the traditional buildings in this complex. This asset holds historic and evidential value.
- 3.4.446 The low value Pipers Went (Vent) Farmstead (**3133**) is situated on the corner of the B1070 and with its eastern edge within the draft Order Limits between Raydon and Great Wenham. The Farmstead is dated to the 19th century as being a regular courtyard F-shaped plan with agricultural buildings and a farmhouse which was set away from the yard. Only the farmhouse survives from this Farmstead. This asset holds evidential and historical value.
- 3.4.447 The low value Hadleigh Railway (**3165**) is a c. 10 km long disused railway line from Hadleigh eastwards to c. 2 km east of Capel where it joined a north to south line to Bentley. It transects the draft Order Limits c. 1.3 km north of Little Wenham. The line opened in 1847 and closed in 1932 for passengers and 1965 for freight. Much of the embankment survives along the route, with the embankment being incorporated into a nature walk on the Hadleigh end. This asset has historical and evidential value.

## Higham CP

### *Designated Heritage Assets*

- 3.4.448 'Wasses farmhouse' (**1199984**) is located approximately 1 km to the north-west of the draft Order Limits. It is Grade II listed and is of medium value and has aesthetic and historical values. Its dates to the 18th century with an early 19th century external feature. It is timber framed with plastered walls. It is single story with attics, there is a two-story gable on the front elevation. The asset is set back from the road by a garden. To the north is a road junction. To the south and north-east is the farm complex. Surrounding the building is flat agricultural landscape. The asset is partly screened from view by well-established vegetation. The 1st edition OS map shows little change in the landscape since this date. Therefore, the assets setting makes a considerable contribution to its value. Due to the distance, the assets setting does not extend into the draft Order Limits.

- 3.4.449 'Nether Hall Farmhouse' (**1200611**) and the 'Barn Immediately South East of Nether Hall Farmhouse' (**1351916**) are both located approximately 1.7 km to the west of the draft Order Limits. They are both Grade II listed and are of medium value with historical and aesthetic values. The farmhouse dates to the 17th century. It is timber framed and is two stories tall. The ground floor is faced with red brick, the first floor is plaster. The barn dates to the 17th century and is timber framed with weatherboard cladding with a tiled roof.
- 3.4.450 The two assets are set back from the road by a garden and green area. The road is not busy, they are screened from the road by a well-established hedge. Surrounding the assets are agricultural fields. To the south is a wooded area and a stream. The 1st edition OS map shows that the farm complex has reduced in size. Overall, the assets quiet, rural agricultural and roadside setting has altered little. Therefore, the assets setting makes a considerable contribution to their value of the assets. Due to the distance, the assets setting does not extend into the draft Order Limits.
- 3.4.451 'Lower House Farmhouse' (**1033502**) is a medium value Grade II Listed Building situated 1.9 km west of the draft Order Limits. It is located in the rural countryside off Marsh Road c.1.5 km north-west of Higham. The property has two storeys and is dated to the 16th to 17th century and is constructed with timber frames and plaster built on an 'L' shaped plan with wings that extend to the south and west. The property is set back off the road and is set within a farming complex which is on the northern side of the asset. The asset is enclosed by established vegetation to the front of the property and is surrounded in its wider setting by an agricultural landscape. The asset has historical and evidential value, and its setting does not extend to the draft Order Limits.
- 3.4.452 'Thornington Hall' (**1200597**), approximately 2.1 km to the west of the draft Order Limits, is a Grade II\* listed building. It is of high value and has aesthetic and historical value. The Hall has retained many of its historical fixtures, fittings and character. The property dates to the 17th century, it is timber framed with yellow painted plaster walls. It is a large building and almost 'E' shaped in plan with a large extended wing to the north-eastern side. It is two stores tall with attics. the building is set back from the road by a small garden, it can easily be seen from the road. Immediately to the east is a trackway, stream and an agricultural field. This gives a sense of space to the asset. To the south, over the road, is the farm complex for the property. Surrounding the asset are green fields. To the west are other large properties. Thornington Hall is located and the eastern end of the small, quiet, dispersed settlement of Thornington Street. The assets present and historical setting would not have been too dissimilar. Therefore, the asset setting makes a considerable contribution to the value of the asset. Due to the distance the assets setting does not extend into the draft Order Limits.
- 3.4.453 To the west of the draft Order Limits, by approximately 300 m, is the Grade II 'Higham Hall' (**1036957**), Higham. The Hall is of medium value due to its historical and aesthetic values. This early 19th century country house was built out of white brick, which is pebble-dashed at the rear, over two floors with attics. It has an overall Georgian style. The rear range dates to the 17th century. This is built out of red brick with an English bond. To the west of the Hall is the Church of St Marys (**1351625**) Grade II\*, which dates to the medieval period. The church was potentially part of an early manor complex which the current Hall proceeded. The Hall is set within an ornate garden to the east and south. To the north is a large grassland field. Further to the south is the Rover Stour, to the north is Higham Road and to the north-west is The Old Rectory (**1036958**) Grade II, and Higham conservation area. Both of these assets, and the Church of St Mary, retain many of their historical fixtures, fittings and

buildings. The setting of this assets has changed little since the first OS map of the area, save for the demolition and building of new and old buildings within the estate. Therefore, the setting of the asset makes a considerable contribution to the value of the building. Due to the close proximity of the draft Order Limits, the setting of the Hall extends into the draft Order Limits.

- 3.4.454 'Tea Caddy Cottage' (**1036956**) is a Grade II listed building located approximately 220 m north of Higham conservation area (**CA40**) and approximately 760 m west of the draft Order Limits. It is of medium value and has historic and aesthetic values. It is early 19th century in date and was constructed out of red brick, with a trencher bond, over two stories. The symmetrical property has curved side wall, which is an unusual feature. It is set back from Hadleigh Road by a garden. To the south and north are a dispersed collection of buildings, both residential and farm related. To the west and east are agricultural fields and a wooded area to the north. This part of Higham is quiet and rural. Despite the addition of the properties to the north and south, most of the assets setting is unchanged since the 1st edition OS map of the area. Due to the additions in the landscape, the setting of the asset makes a moderate contribution to its value. As the property is far from the draft Order Limits, its setting does not extend into them.
- 3.4.455 Located 315 m to the west of the draft Order Limits is Higham Lodge (**1036966**), a Grade II listed building in Higham. It is of medium value due to its historical and aesthetic values, and for its good retention of its Georgian style. This large house dates to the early 19th century with later additions, it is constructed out of brick with a slate roof and in two stories tall with attics. The assets present and historical setting is similar. The building is set in parkland and surrounded by woodland to the west and south-east. To the north are a collection of buildings associated with the property. To the south-west is another large Georgian style house and further west along the road is the village of Higham. The park and woodland give an enclosed and isolated feeling to the asset. Overall, the assets setting makes a considerable contribution to its value. Due to the intervening well-established vegetation the setting of the asset does not extend into the draft Order Limits.
- 3.4.456 Located on the corner of Higham Road and Lower Street, are two Grade II listed buildings, 'The Old Post Office' (**1036964**) and 'White Oak Cottage and Dysart' (**1036965**). They are approximately 500 m to the west of the draft Order Limits. Both have medium value due to their historic and aesthetic values. The Old Post Office dates to the 17th century with later alterations. It is timber framed with pink/red painted rendering. On the eastern side of the front elevation is an extension with large shop windows and a catslide roof where the post office was once located. There is a sign above the door here which states 'Higham Post Office'. White Oak Cottage and Dysart are two cottages which date to the 17th century. Dysart, eastern, is a later addition. White Oak Cottage is timber framed with white painted render and Dysart is red brick. Both are single story with attics and Dormer windows. The shared roof is tile with thatch along the top ridge and to the rear. This is an unusual style of roofing not seen elsewhere in the village.
- 3.4.457 Both buildings are located on the south-eastern side of Higham Road, near to the road junction with Lower Street. Each property is set close to the road, the extension of the Old Post Office is set onto the road. The road is not too busy but can get congested with parked cars to the north-east. Surrounding the properties are other historical characterful houses. The village of Higham is quiet and rural. The historical and present setting of the assets would not have been too dissimilar. Therefore, their setting makes a considerable contribution to their value. Their setting does not extent into the Oder Limits due to the distance.

- 3.4.458 Walnut Tree Cottage' (**1036962**) is located at the south-western end of the conservation area, approximately 650 m north-west of the draft Order Limits. The asset of medium value due to its historic and aesthetic values. The Grade II listed building dates to the 17th century. It is 'L' shaped in plan, with the entrance to the rear and an arm of the building facing onto Higham Road. It is timber framed and clad in yellow/orange painted render. The building is set onto the road, which can be busy and congested with parked cars. Surrounding the asset are residential buildings that are historically characterful. This is a quiet and rural village location. Historically and presently the assets setting would not have been too dissimilar. Therefore, the setting makes a considerable contribution to its value. Due to the distance, the assets setting does not extend into the draft Order Limits.
- 3.4.459 At the eastern end of the conservation area is 'Meadow View, gable End and Adjoining Cottage' (**1193163**) a Grade II listed building. It is located approximately 480 m to the west-north-west of the draft Order Limits. It is of medium value due to its historical and aesthetic values. The house dates to the late 17th century with 19th century alterations. It is timber framed with pale pink painted render. The property was built over two stories and was originally three houses but is now two. The eastern part of Gable Cottage has a slate roof, the rest of the building has a red tiled roof. The property is set back from the Higham Road by a garden with a well-established hedge around Meadow View. To the west of the houses is the historical characterful village of Higham (however the houses to the east and south have little heritage value) and to the east are agricultural fields. Both properties overlook a field to the south which slopes down gently. The introduction of the new houses along this road has altered the historical setting of the assets. As the name suggests they would have overlooked the meadow to the south, this is now disrupted by a later house. Therefore, the setting of the assets makes a moderate contribution to its value. The asset's setting does not extend into the draft Order Limits due to the topography and mature tree lined hedgerows of the intervening landscape.

### **Holton St. Mary CP**

- 3.4.460 'Mayfields' (**1036981**) is located approximately 350 m to the south-east of the draft Order Limits and 430 m north-west of Holton St Mary. The Grade II listed building is of medium value and has evidential, aesthetic and historical values. It was constructed in the early 17th century with late 17th century alteration and later additions. It is timber framed with some painted brick casing. It has a plain tiled roof and it is two stories tall. The asset is situated on a bend on Hadleigh Road and is set back from the road within a fenced garden. There is some established vegetation within the grounds of the property, and it is surrounded by an agricultural landscape. The setting informs its value but does not extend to the draft Order Limits.
- 3.4.461 Located approximately 800 m to the east of the draft Order Limits is the Grade II listed 'Laburnam House' (**1036979**). It is of medium value and has aesthetic and historical value. It was constructed in the late 16th to 17th century as a school. It has since, in the 20th century, been converted to a private residence. It is timber framed, part underbuilt with brick, and with rendered walls. The roof is clad in tiles. It is two stories tall. The asset is set back from the road by a large gravelled area used as parking for the adjacent Church of St Marys (**1351596**). To the north, east and south-east are later residential buildings. The road to the north is busy. To the south-west is a grassland field and an agricultural field to the west. The churchyard of St Marys and its car park gives a sense of space to the asset. The 1st edition OS map shows that the village at this time was sparsely populated. Today it is much busier. Therefore, the assets setting makes a moderate contribution to its value. Due to the

semi-rural residential nature of the assets, its setting does not extend into the draft Order Limits.

- 3.4.462 'Holton Place' (**1036982**) is a Grade II listed building located c. 600 m north-west of Holton St Mary and c. 190 m north-east of the draft Order Limits. Holton Place is a house with a front range dating back to around 1700 and potential earlier origins, featuring 19th-20th century alterations. The rear range likely originates from the 16th century, with a timber framed structure, rendered and underbuilt in brick, and a plain tile roof. Overall, this asset has a medium value based on its evidential, historical and aesthetic value.
- 3.4.463 Holton Place is situated within a quiet and rural setting, set back from the road and encompassed by a spacious garden and a protective brick wall. The northern vicinity features farm buildings, while the southern side is bordered by additional residential properties. To the north, there are other structures related to farming. The asset enjoys a serene atmosphere, surrounded by expansive agricultural fields, and benefits from a road that is not overly busy. Overall, the setting makes a considerable contribution to the asset's value and extends to the draft Order Limits.
- 3.4.464 'Tiffins' (**1036985**) is a Grade II listed building located c. 1.1 km west of Holton St Mary and c. 70 m north-east of an draft Order Limits temporary attenuation drainage and outfall location and c. 100 m north-west of the draft Order Limits. This asset, a 17th century residence with 20th century renovations and extensions, boasts a timber framed structure, thatched roof, and red brick stack. The one-storey and attic layout include a board door and 20th century casements, blending historic value with modern functionality. Overall, this house has a medium value based on its evidential, historical and aesthetic value. This asset, concealed from view along a secluded road, resides in a quiet rural environment enveloped by woodlands. Expansive fields stretch to its north, east, and west, while to the south-east, another listed building, 'Pintins' (**1036984**) adds to the heritage group value, emphasizing its historic context and value. Overall, the setting makes a very considerable contribution to the asset's value. In addition, despite the woodland surrounding the asset, the setting extends to the draft Order Limits due to the proximity between the asset and the draft Order Limits.
- 3.4.465 Along the B1070 and a deceleration lane, are two Grade II listed buildings, the late 16th century 'Four Sisters Farmhouse' (**1351597**) and the late 16th century 'Barn approximately 20 metres north west of Four Sisters Farmhouse' (**1198496**) located c. 400 m east of Holton St Mary and c. 1.4 km east of the draft Order Limits. They have a group value and a medium value based on their evidential, historical and aesthetic value.
- 3.4.466 Situated within a farmyard complex, the late 16th-century 'Four Sisters Farmhouse' (**1351597**) and the accompanying barn (**1198496**) are surrounded by characterful agricultural properties. However, their setting is impacted by their location at the junction of the modern A12, resulting in significant noise from traffic, which also constitutes a visual intrusion. Despite this, the farmyard is enveloped by well-established vegetation, contributing to a sense of enclosure. The wider setting extends to include expansive agricultural fields. Their setting is further informed by the historical and functional relationship between these two assets. Overall, the setting makes moderate contribution to the assets' value and does not extend to the draft Order Limits.
- 3.4.467 Located approximately 1.7 km to the west of the draft Order Limits, within Higham, is the 'Old Mill House' (**1286299**). This Grade II listed building is of medium value due to its historical and aesthetic values. This mid-18th century, with later additions, two

story house was constructed with red brick in a Flemish bond. Its roof is clad in slate. The assets setting is isolated and accessed via a private track. To the west is the River Stour, to the north are outbuildings. Surrounding the property are agricultural fields and woodland to the west. It is a quiet and peaceful location. Its historical setting would not have been too dissimilar to its present one. The location of the river was vital to the function of the building and is a key feature of its setting. Due to this its setting makes a considerable contribution to its value. The distance between the asset and the Order Limit means that its setting does not extend into the draft Order Limits.

- 3.4.468 'Valley House' (**1223746**) is Grade II\* listed building located between Higham and Langham and c. 1.2 km west of the draft Order Limits. Valley House, a 16th century residence, features a timber-framed and plastered structure across two stories with attics. The roof is ridged, gabled, and peg-tiled. On the south front, there is a 17th century timber porch. Notably, a stairs-wing in red brick projects northward, housing a dog-leg staircase with carved newels and turned balusters—a fine example of craftsmanship. The stair tower's casement windows, although renewed, maintain their original charm beneath moulded labels. The dwelling is further characterized by three red brick chimney-stacks, each boasting octagonal shafts. Overall, this asset has high value based on its evidential, historical and aesthetic value.
- 3.4.469 Valley House is situated along a private drive, enveloped by wooded surroundings, contributing to its secluded atmosphere. The immediate setting comprises well-maintained gardens and woodland areas. The broader surroundings feature expansive agricultural fields, extending towards a modern industrial unit to the southwest. The overall location exudes a rural ambiance. The setting makes a moderate contribution to the asset's value and does not extend to the draft Order Limits.

### **Stratford St. Mary CP**

- 3.4.470 'The Clock House' (**1036989**) is a Grade II listed property located approximately 680 m to the east of the draft Order Limits, within Stratford St Mary. It is of medium value and has historical and aesthetic values. It dates to the early 17th century and was re-modelled in the 20th century. It is timber framed with pebble-dashed cladding. The building is 'L' shaped and two stories tall with attics. The asset forms part of a complex of building set within a wooded area, to the west, north and east, and grounds and green fields to the south. It is a quiet and rural area. Historic map evidence shows that little has altered to the setting of the asset since the first edition OS map, save for the addition and alteration of some of the building complex. Therefore, the assets setting makes a considerable contribution to its value. However, given the distance, the assets setting does not extend into the Order Limit.
- 3.4.471 'The Swan Inn' (**1351599**), Grade II listed, is located within the central part of the Stratford St Mary conservation area. It is located approximately 410 m to the south-east of the draft Order Limits. It is of medium value and has historic and aesthetic value. The public house was constructed in the late 16th to 17th century with 20th century alterations. It is timber framed with white painted rendering. The front has a large jetties gable end with exposed timber frame. There is a later, modern extension to the rear which is not in keeping with the historic character of the building. The property is set back slightly from the road by a gravelled area. To the north is a lane and to the south is a car park. The route ways and the car park give a sense of space to the asset. The public house overlooks an area of well-established vegetation which hides the River Sour and an elongated island. Within the wider setting to the north and the south are the residential properties of Stratford St Mary. Most of these

retain their post medieval and Georgian historical character, the rest (to the north) are of modern design and not in keeping with the character of the village. According to the 1st edition OS map the village location of the asset has not changed but the buildings surrounding it have increased. The road is busy and congested with cars and traffic. Overall, the assets setting makes a moderate contribution to its value. Due to the intervening well-established vegetation, and the village location, the assets setting does not extend into the draft Order Limits.

- 3.4.472 Within the central part of Stratford St Mary village is Valley House (**1198552**), Grade II listed. It is located approximately 470 m to the east of the draft Order Limits. It is of medium value and has historic and aesthetic value. It was built in the early-mid 19th century. It is a two stories tall, Georgian style villa. Within its Welsh slate roof is a raised, circular roof lantern. The building is set back from the road within a large garden. The house can easily be seen from the road and overlooks some well-established vegetation. This hides the River Sour and an elongated island. Valley House differs from most of the properties in Stratford St Mary due to its large garden, which informs its immediate setting. To the south and north are residential properties, most have post medieval and Georgian historical character. The road can be busy with traffic and parked cars. The present setting of Valley House is not too dissimilar to that seen on the 1st OS map of the area. There are, however, a few more houses within the village, and the road is more busy. Therefore, the setting of the asset makes a considerable contribution to its value. The assets setting does not extend into the draft Order Limits as it is screened from view by well-established vegetation and the village does not extend into the draft Order Limits.
- 3.4.473 Located along the eastern side of The Street within Stratford St Mary conservation area (**CA41**) are a series of five joined Grade II listed buildings: 'Holly House' (**1036992**), '9 Lower Street' (**1198556**), 'Clematis Cottage' (**1036993**), 'Bay House' (**1198562**) and 'The Black Horse' (**1351600**). They are all of medium value and have historical and aesthetic values due to their retention of historical character. All are located approximately 450 m to the east of the draft Order Limits within the central part of Stratford St Mary.
- 3.4.474 'Holly House' (**1036992**), also known as nos 7 and 8 Holly House, is a 17th century property that was re-fronted in the 19th century. It is timber framed and encased in brick. The property was once a police station before being converted into two houses.
- 3.4.475 To the south of Holly House is 'no. 9 Lower Street' (**1198556**). This property dates to the 17th century, or earlier, with 20th century alterations. It is timber framed with a white or light cream painted, and slightly decorated on the first floor, render. Its two stories tall with attics with two Dormer Windows.
- 3.4.476 To the south of no. 9 Lower Street, is 'Clematis Cottage' (**1036993**). This is also a 17th century, or earlier, house with 20th century alterations. It is timber framed with light orange painted render. It is two stories tall.
- 3.4.477 To the south of Clematis Cottage is 'Bay House' (**1198562**). This was originally a pair of symmetrical houses which date to the 19th century. They are two stories tall with whitewashed brick and Welsh slate tiled roof. They front elevation has a distinctive two stories tall, large, bay window set between two large porches.
- 3.4.478 To the south of Bay House is 'The Black Horse' (**1351600**) public house. This dates to the early 17th century, with 20th century alterations. It is timber framed with white painted render. It is two stories tall. It has two entrances on its front elevation, the northern one is blocked off.

- 3.4.479 These properties are defined by their setting which includes the quiet, rural village location. The road, and pavement, which they are all set on was once quite but is now congested with parked cars and moving vehicles. The road itself is quite wide which gives a sense of space to the assets. The public house has a car park to the south which also adds to the sense of space. This end of the conservation area is full of historically characterful buildings, most seem to have a Georgian style, but the Weavers House (1351601) to the south-west is older (medieval) in date. Further to the north is the village of Stratford St Mary and to the south are agricultural fields. This end of the village has not changed since the 1st OS map of the area and would not have been dissimilar in the 17th century when most of these houses were building. Therefore the assets setting considerably contributed to their value. As their setting is one of a small rural village, their setting does not extend to the draft Order Limits.
- 3.4.480 At the southern end of the Stratford St Mary conservation area are two Grade II listed buildings, 'Gunhill Cottages' (**1239277**) and 'The Wilderness' (**1239278**). They are both located approximately 300 m to the east of the draft Order Limits. They are both of medium value due to their historical and aesthetic values. Gunhill Cottages were constructed in the 18th century in red brick with a Flemish bond. They are one story tall with attics, the roof is red tile with Dormer windows. The Wilderness is a 17th to 18th century two stories tall, with attics, house. It is timber framed with white painted rendering.
- 3.4.481 Both properties are located along the access to the 'Le Talbooth' (**1239265**, Grade II\*) which is medieval in date. Both also overlook The Street to the east and well-established vegetation which hides the A12 from view. However, the vegetation cannot hide the noise from the busy A road. To the north is the River Sour and the important bridge crossing which would have once held a toll house, now non-existent but the restaurant took its name from. The houses were and are located next to this important route crossing. The landscape around these properties has changed since they were constructed and from the 1st edition OS map. There are more buildings around Le Talbooth as are the car parks for the venue. The A12 to the east is also recent as are new roads to the south over the A road. Overall, the setting of the assets makes a moderate contribution to their value. Due to the intervening well-established vegetation to the west of the assets, their setting does not extend into the draft Order Limits.
- 3.4.482 At the eastern end of the conservation area is the Grade II 'Teazles' (**1198535**). It is located approximately 1.3 km to the east of the draft Order Limits. It is of medium value and has historic and aesthetic values. This property dates to the later 16th century and was originally two semi-detached cottages but are now one house. It is timber framed with white painted rendered walls. Its front elevation has two large gables and a mismatch of different sized windows. The house is setback from the Dedham Road by a garden. The property overlooks the garden wall of another listed property, 'Haywards Cottage' (**1239265**, Grade II) which is medieval in date. To the north and south-east of Teazles is the dispersed settlement of Stratford St Mary, to the west, south and north-east are agricultural fields. This is a quiet, rural area but the road can sometimes be busy. The historical and present setting of the building would not have been too dissimilar, therefore the assets setting makes a considerable contribution to the value of the building. Due to the distance away, the assets setting does not extend into the draft Order Limits.
- 3.4.483 At the south-eastern end of the conservation area is 'The Oldguild Hall' (**1351626**), a Grade II listed building. It is located approximately 480 m to the west of the draft Order Limits. It is of medium value due to its historical and aesthetic values and good

retention of historical character. This late 16th century house has possibly earlier origins. It has a rear wing which dates to the 17th century was renovated in the 20th century. It is timber framed with light cream painted render. The roof is thatched. It is set back from Higham Road by a small garden and gravelled area. It is at the south-eastern end of the village of Higham, which is full of historically characterful properties. To the south-west, south and south-east are agricultural fields and the topography slopes down to the south. However, any views from this property to the south across the fields are screened from view by well-established vegetation that lines the road. The assets end of village and roadside setting surrounded by fields would have been similar in the past. Therefore, the assets setting makes a considerable contribution to its setting. The asset setting does not extend into the draft Order Limits due to distance and intervening well-established vegetation.

### *Non-Designated Heritage Assets*

- 3.4.484 A low value coin (**3086**) was found within the 250 m study area of the draft Order Limits. It was a silver halfgroat from the reign of Charles II c.1660-1662 and has historical and evidential value.
- 3.4.485 The low value Ipswich and Stowmarket Navigation (**3245**) bisects the draft Order Limits c. 215 m north of Badley Hill and snakes its way west to east in a south-west direction as part of the river Gipping. The date the canal was opened is unknown, but it links the two towns together and makes the river Gipping navigable. The fifteen locks on the 16-mile canal were closed in 1934. This asset has historical and evidential value.
- 3.4.486 The low value canalised river Stour (**3194**) dissect the draft Order Limits in a west to east direction in the landscape to the west of Stratford St Mary. The river Stour was most likely used as navigation prior to the 17th century as it was the subject of Letters Patent in 1638 from Charles I to Arnold Spencer. Nothing was done because of the Civil War and it was re-considered again in 1658, but improvements weren't improved until an Act in 1705 came into place for works to go ahead between Manningtree and Sudbury. These works were completed by 1709 because of interests in coal in Sudbury. The river Stour Trust was formed in 1968 to restore the navigation. This asset has historical, communal, and evidential value.
- 3.4.487 The low value Noakes Barn Farmstead (**3132**) is situated c. 18 m west of the draft Order Limits between Noaks Road and Sandpits Lane. This farmstead is visible on the 1st edition OS map as laid out in a regular U-shaped plan with detached elements, and a farmhouse which was attached to the agricultural range. The farmstead is now lost, but still holds evidential value.
- 3.4.488 The low value Dewlands Farm Farmstead (**3154**) is situated c. 200 m west of Sandpits Lane and c. 230 m south-west of the draft Order Limits which pass through on the eastern and southern sides. The Farmstead is visible on the 1st edition OS map as being laid out in a regular full-plan courtyard with detached elements, One of which was the farmhouse which is set away from the yard. The Farmstead survives intact and is of low value and is associated with the medium value listed buildings (**1036963** and **1036986**). The farmstead has evidential value.
- 3.4.489 The low value Holton Place Farmstead (**3155**) is situated on the north side of Sandpits Lane and c. 165 m east of the draft Order Limits. The farmstead is visible on the 1st edition OS map as being laid out in a regular full plan with detached elements, one of which is the farmhouse. There has been partial loss of the working buildings and the addition of modern sheds. This asset is of low value and is associated with the medium value listed building, Holton Place (**1036982**).

- 3.4.490 The low value Yew Tree Farmstead (**3139**) is situated alongside Higham Road c. 170 m east of the draft Order Limits between Higham and Stratford St Mary. The Farmstead is from the 19th century and is laid in a regular U-shaped plan formed by the working agricultural buildings and a farmhouse which is set away from the yard. Of the farmstead, only the farmhouse is extant. This asset holds evidential value.
- 3.4.491 The low value Brook Farm Farmstead (**3157**) is situated between the two sections of Higham Road, c. 75 m south of the draft Order Limits. The farmstead is from the 19th century with an early 16th century farmhouse with converted buildings. The complex is of a regular plan formed by the working agricultural buildings and the farmhouse which is set away from the yard. The entire farmstead is extant. This asset is associated with the medium value Lowe Hill House (**1036691**) and holds historical and evidential value.
- 3.4.492 The low value Bobbitts Hall Farmstead (**3141**) is situated c. 60 m south of the B1068 through Stratford St Mary and c. 120 m east of the draft Order Limits here. The Farmstead is from the 19th century and consisted of a farmstead, farmhouse, and buildings which have since been converted. The farmstead is laid in a regular L-shaped plan formed by the agricultural buildings and a farmhouse which is set away from the yard. There has been significant loss of the traditional buildings in this cluster. This asset has evidential value.
- 3.4.493 The low value Birch House Farmstead (**3046**) sits within and extends out of the south-western edge of a moat (**3042**), c. 230 m north-west of the draft Order Limits. The farmstead was visible on the 1st edition OS map and is dated to the 19th century. The farmstead is laid out in a dispersed plan, detached from the farmhouse. These assets hold historic and evidential value.
- 3.4.494 The low value Rookery Farm (**3126**) is situated along Wenham Road with an access track leading from the main draft Order Limits along its northern boundary. The Farmstead is visible on the 1st edition OS map as a regular L-shaped plan with additional detached buildings, and a farmhouse that is attached to the agricultural range. The farmstead now has modern additions. This asset holds evidential value.
- 3.4.495 The low value farmstead at Wenham Grange (**3167**) is situated on the southern side of Bottle Bridge Road c.5 m south of the draft Order Limits which run in a south-westerly to northeasterly direction here. The farmstead and farmhouse are from the 19th century and are laid in a regular E-shaped plan formed by the working buildings with the farmhouse set away from the yard. There has been partial loss of the traditional buildings in this complex. This asset holds historic and evidential value.

## **Boxted CP**

### *Designated Heritage Assets*

- 3.4.496 The 18th century 'Chase Cottage' (**1238746**), the 19th century 'Potash Cottage' (**1238758**), the 18th century 'Rivers Hall' (**1238777**) and the 16th century 'Plains Cottage' (**1238701**) are four Grade II listed buildings, all located in the countryside of Boxted and between c. 2.1 km and c. 2.5 km west of the draft Order Limits. They all have medium value based on their evidential, historical and aesthetic value.
- 3.4.497 These properties are situated in a rural setting. While Chase and Plains Cottage are positioned along roads, Potash Cottage and Rivers Hall enjoy a more secluded ambiance, surrounded by mature trees. The broader environment for all these properties is agricultural, with fields encompassing their surroundings. Overall, the assets' settings contribute to their value but do not extend to the draft Order Limits.

## Langham CP

- 3.4.498 'Faith Cottage' (**1273686**) is located approximately 480 m to the north-east of the draft Order Limits. It is Grade II listed and of medium value and has aesthetic and historical value. The cottage potentially dates to the 18th century. It is single storey tall and is 'L' shaped in plan. It has a thatched roof. The walls are timber framed and partly rendered in painted plaster and weatherboarding. The asset is located onto the road at an angle which leaves space for a small garden and parking space. It is located not far from the main road junction in Lambs Corner settlement. The road to the north and south has several other cottage type properties, most have some historical character. To the west, and which the asset partly over looks, is parkland to Hill House (**1239409**). Overall, the assets setting is semi-rural, residential. This is similar to its historical one. The assets setting makes a considerable contribution to its value. The asset's setting does not extend into the draft Order Limits due to the intervening parkland of Hill House.
- 3.4.499 'Grove Cottage' (**1273789**) is located approximately 510 m to the north-east of the draft Order Limits. The Grade II listed building is of medium value and has aesthetic and historical value. The now two cottages were constructed in the 17th century. They are a long range, timber framed semi-detached set of cottages with painted plastered walls. The cottages are set back from the road by a pavement and very small gardens. They are surrounded, to the north and south, by other residential properties, some have similar historical characteristics. To the east is a large well-established hedge. The road can be busy. The 1st edition SO map of the area shows little change from the rural-residential setting of the asset. Save for a few more recent residential properties being constructed and the development of the woodland from agricultural field to the east. Overall, the assets setting makes a moderate contribution to its value. Due to the residential nature of its location, the setting of the asset does not extend to the draft Order Limits.
- 3.4.500 'Monks Farmhouse' (**1239212**) is located approximately 750 m to the south-east of the draft Order Limits. The Grade II listed building is of medium value with historical and aesthetic values. The building dates to c.1700. It is of two stories tall with plastered walls. The steeply pitched roof is clad in peg tiles with a ridge and is hipped. It has chimneys at each end of the building. The asset is set within a large parkland or green grassed fields. To the north-east is the farm complex. It has an isolated feeling, and the area is quiet and rural. The 1st edition OS map shows that the farm complex today has reduced in size and the field or parklands have lost their field boundaries. Overall, the assets setting makes a moderate contribution to its value. Due to the distance, the assets setting does not extend into the draft Order Limits.
- 3.4.501 'The Grove' (**1239260**) and 'Stable Block to the North East of the Grove' (**1273810**) are located approximately 1.1 km to the north-east of the draft Order Limits. They are both Grade II listed and have medium value. They have aesthetic and historical value, although they are potentially in different ownership now, they have group value. The Grove was constructed in c.1800. It is two storeys, with attics, large property. It has a slate clad mansard roof with a central roof turret made of glass. The stables were potential constructed at the same time as the main building. This large structure is two stories tall with a central pediment in the roof over a slightly projecting front. The central entranceway is arched and painted blue. It is constructed out of painted brick in a Flemish bond.
- 3.4.502 The assets are set back from the road by gardens and gravelled areas used for parking. The road can be busy. To the east are more gardens and parkland, to the west is an agricultural field which the Grove would look out over if it were not for the

well-established tree line lining the road. Sporadically located along the road are other large residential houses or farms. The area is quiet and rural in feeling. The 1st edition OS map only shows the introduction of a few new properties along the road. Therefore, the assets setting makes a considerable contribution to their value. Due to the distance both assets' setting do not extend into the draft Order Limits.

- 3.4.503 The 17th century Grade II 'Grove Cottage' (**1267140**) is located along Grove Hill, north-east part of Langham, c. 60 m west of the draft Order Limits. This cottage, a 17th century or earlier house, features a timber-framed, white weatherboarded exterior with a thatched roof. It includes red brick chimneys, wooden casements on both storeys, and a single-storey extension facing the lane. This asset has medium value based on its evidential, historical and aesthetic value.
- 3.4.504 Situated alongside a rural road, Grove Cottage is surrounded by a gravelled area and garden, creating a sense of open space. Agricultural fields stretch to the east and north, while to the west, a farm complex is present. A wooded area adds to the scenery on the southern side. The overall setting is characterized by a quiet and rural ambiance. This asset is documented in the first edition of the OS map dating back to 1880. Over time, its immediate surroundings have undergone minimal alterations, maintaining a semblance of continuity. However, the broader setting has witnessed transformations, including the introduction of the A12 to the east and the expansion of Langham. Overall, its setting makes considerable contribution to its value and extends to the draft Order Limits.
- 3.4.505 The 16th/17th century Grade II 'Lyme Cottage' (**1223528**) and the 16th century Grade II 'Little Oaks Barn' (**1267131**) are both located within Langham, along one of its main roads. They are situated between c. 900 m and c. 1.1 km south-west of the draft Order Limits. They have group value. They have medium value based on their evidential, historical and aesthetic value.
- 3.4.506 Their setting is informed by their location within the settlement and along a road. It is further informed by their historical relationship with each other and with other listed buildings along the same road such the medieval Tudor Cottage (**1223551**) and Bakers (**1267263**). Lyme Cottage is positioned at a crossroads along a road, directly facing the road junction, which imparts a sense of open space. Situated at the northern end of a rural residential neighbourhood, the property is surrounded by characterful residences to the east, with agricultural fields extending to the north. In contrast, Little Oaks Barn is situated along a road to its south, with a private track to the east. The semi-rural, semi-residential area includes a yard to the east and fields further north. Both properties contribute to the historical landscape of Langham along School Road. These assets are documented in the first edition of the OS map dating back to 1880. Over time, their immediate surroundings have undergone minimal alterations, maintaining a semblance of continuity, even if the expansion of Langham, especially south of the Lyme Cottage might affect its setting. The broader setting has witnessed transformations, including the introduction of the A12 to the east. Overall, the setting of Little Oaks Barn makes a considerable contribution to its value while the one of Lyme cottage makes a moderate contribution to its value. The setting of both the assets does not extend to the draft Order Limits as limited to the settlement.
- 3.4.507 The late 16th century or earlier Grade II 'Keepers Cottage' (**1266286**), the 16th century Grade II 'Wybornes' (**1223473**), the 18th century Grade II 'Mount Pleasant' (**1223517**) and the 16th/17th century Grade II 'Thatchways' (**1223468**) are all located in the north part of Langham in a scattered manner. Keepers Cottage is situated c. 450 m west of the draft Order Limits, Thatchways is c. 1.5 km west to the draft Order Limits, while the two others are between 800 m and 900 m also west of the draft

Order Limits. They have medium value based on their evidential, historical and aesthetic value.

- 3.4.508 Situated in the northern part of Langham, Keepers Cottage is nestled along a private road, surrounded by a garden bordered with mature trees. Thatchways joins the landscape, positioned set back from the road within a spacious garden. The asset enjoys a quiet setting, shielded by a hedge that screens it from the road. Slightly downhill and sloping towards the east, Thatchways captures the essence of a rural environment. To the north lies a wooded area, while to the south, expansive agricultural fields unfold. Across the road, an opposite view reveals a neighbouring farm. Wybornes, located along a quiet road, enjoys a garden enclosed by hedges and wooden fences, with mature trees enhancing the surroundings. Mount Pleasant, concealed from view, stands along a private track within a garden surrounded by woodlands. The immediate area exhibit a semi-rural, semi-residential character, with fields to the west, south, and across the road, contributing to the overall quiet and rural ambiance of the region. Overall, the setting makes a considerable contribution to their value but does not extend to the draft Order Limits.
- 3.4.509 Within Langham, in the southern part of the settlement are found three Grade II listed buildings, the 17th or earlier century 'Maltings Farmhouse' (**1267245**), the 17th century 'Floral Dene' (**1267249**) and the 17th century 'Park Lane Farmhouse' (**1267248**). They are situated between c. 800 m and c. 1 km north of the draft Order Limits. They have medium value based on their evidential, historical and aesthetic value.
- 3.4.510 Their setting is informed by their location within the settlement as well as along a road. Maltings Farmhouse set back from the slightly busy road; its view discreetly shielded by well-established vegetation. To the south and west, expansive agricultural fields unfold, while residential properties flank the north and east. The village exudes a quiet ambiance. Floral Dene, nestled at the eastern end of a small linear roadside settlement, also enjoys a quiet atmosphere. Overlooking agricultural fields to the east, northeast, south, southeast, and west, it's surrounded by a characterful residential neighbourhood included some listed buildings scoped out from the study area. Park Lane Farmhouse, also set back from the road, in a garden. It stands surrounded by vast agricultural fields, contributing to the overall rural character of the area. Overall, the setting makes a considerable contribution to their value but does not extend to the draft Order Limits.
- 3.4.511 Within Langham Hall, along Dedham Road, are found seven Grade II listed buildings: The 18th century or earlier 'Holly Tree Cottage' (**1223472**), 'Walnut Tree Cottage' (**1223518**), the 16th century 'The Old House' (**1223514**), the earlier 'Whalebone House' (**1223753**), the 17th/18th century and earlier 'Highfield Cottage' (**1223747**), the mid-19th century 'Forge Cottage' (**1223750**) and the early 19th century 'Smithy south of and adjoining Forge' (**1223751**). They are located between c. 280 m and c.600 m west of the draft Order Limits. They all have medium value based on their evidential, historical and aesthetic value.
- 3.4.512 Situated within the Langham Hall settlement, these properties are characterized by their roadside location. Each enjoys a semi-rural/semi-residential setting, surrounded by a wider landscape dominated by agricultural fields. All these residences are set back from the road, featuring gardens that contribute to their overall charm and character. Overall, their setting makes a considerable contribution to their value but as it is limited to the settlement, it does not extend to the draft Order Limits.
- 3.4.513 South-east of Langham Hall are found three Grade II listed buildings: The 19th century 'Glebe House' (**1223527**), the 16th century 'Barn to east of Glebe

Farmhouse' (**1223548**) and the 16th century and later 'Ewens Farmhouse' (**1267273**). They are all approximately 50 m from the draft Order Limits, Glebe House to the west, the farmhouse surrounded by the draft Order Limits, and Ewans Farmhouse east of the draft Order Limits. They have group value, and all have medium value based on their evidential, historical and aesthetic value.

- 3.4.514 Their setting is informed by their rural location with agricultural fields all around with which they have historical relationship. They are all set back from the road within garden or farmyard. Their setting is further informed by their historical relationship with each other as well as with the medieval listed 'Glebe Farmhouse' (**1223526**). Overall, the setting makes a considerable contribution to the assets' value, and it does extend to the draft Order Limits.
- 3.4.515 North of Langham Hall are found one Grade II\* listed building, the 18th century 'The Hall' (**1223465**) and five Grade II listed buildings, the 18th century 'Pond Villa' (**1267302**), the undated 'Langham Hall Farmhouse' (**1223466**), the 17th century 'Barn north-west of The Hall' (**1267301**), the 19th century 'Redhouse' (**1223467**) and the 19th century 'School north-west of Church of St Mary' (**1223463**). They have a group value. While The Hall has a high value, the five Grade II have medium value all based on their evidential, historical, and aesthetical value.
- 3.4.516 These assets are situated between c. 40 m and c. 400 m west of the draft Order Limits, the school being the closest and Pond Villa the furthest. Their setting is informed by their historical and functional relationship with each other as well as with three medieval listed buildings, the 14th century Grade I Church of St Mary (**1223452**), the 13th century Grade II 'Barn west of The Hall' (**1267268**) and the early 16th century Grade II 'Church Farmhouse' (**1223464**). Nestled within a rural landscape, they collectively form a distinctive group within a small farming settlement. Accessible only through private roads, these assets are surrounded by woodlands to the east, fields stretching to the north and south, and other residences scattered throughout the landscape. The proximity of these heritage properties contributes to their group value, creating a harmonious blend with the natural surroundings. The setting includes parkland, paddocks, and gardens, providing a tranquil and secluded atmosphere, despite the nearby A12 to the east. The undulating terrain, with The Hall slightly situated downslope, offers scenic views of agricultural fields to the north, enhancing the overall rural character of the area. Overall, the setting of these asset makes very considerable contribution to their value.
- 3.4.517 The Hall's (**1223456**) and farmhouse's (**1223466**) settings extend to the draft Order Limits as they (draft Order Limits) pass through the parkland associated with the Hall from the north to the south-west. While the setting of the school extends to the draft Order Limits due to its proximity, the setting of the others does not extend to the draft Order Limits as it is limited to the farming settlement. The setting of the Red House (**1223467**) does not extend to the draft Order Limits as it is within the former garden setting of the Hall (**1223456**), nor does the barn (**1267301**) as its setting extends to the Farmhouse (**1223466**).
- 3.4.518 'Valley House' is a **high value** Grade II\* Listed Building situated c.1.2 km west of the draft Order Limits. It is situated c.220 m south of the river Stour It was constructed in the 16th century and is a two storeyed timber-framed and plastered building with attics, roof ridges, a gable, peg tiles, and three chimney stacks. It has a later 17th century timber porch on the southern façade. Internally, it has a stair wing constructed of red brick which projects northwards, dog-leg stairs with carved newels

and turned balusters which are an excellent example of their kind. Its internal original features, as well as its fabric contribute to its evidential, historic, and aesthetic value.

- 3.4.519 Its immediate setting is enclosed within its grounds with established vegetation and can be accessed via a private track which also leads to an industrial centre on the asset's western side. There has been some loss of the historic character of the land surrounding the house since its construction due to the industrial centre, but this does not affect its value since the land wasn't associated with 'Valley House'. The setting does not extend to the draft Order Limits.

### Dedham CP

- 3.4.520 'Bargates Farmhouse' (**1239082**) is located approximately 1.5 km to the north-east of the draft Order Limits. The Grade II listed farmhouse is of medium value and has aesthetic and historical value. The building dates to the 17th century. It is timber framed with weatherboard cladding. It has a 19th century red brick wing to the north-west. The farm complex is to the south and west. On its western side it is surrounded by a large agricultural field. To the east is the road and a wooded area with a house. To the south is a residential property and a railway line. The two residential properties are later, but the rest of the assets setting is similar to that depicted on the 1st edition OS map. Therefore, the assets setting makes a considerable contribution to its value. Due to the distance away the asset's setting does not extend into the draft Order Limits.
- 3.4.521 'Bell Cottage' (**1239488**) is located approximately 1.1 km to the east of the draft Order Limits. This Grade II listed building is of medium value and has aesthetic and historical value. The cottage was constructed in the early 19th century; however, the front elevation was re-used from an earlier building. The property in July 2023 was undergoing extensive renovations. It is timber framed with plastered walls. The roof is ridged, gabled and clad in peg tiles. The asset is set back from the road by a garden but can clearly be seen from the road. To the west and south are residential buildings. The western buildings are later. To the north and east is a large agricultural field. To the south-east is parkland and a car park for a large property to the south. The 1st edition OS map shows that the assets were part of farm. The complex was to the north, this is now non-extant and has been replaced with residential buildings. Overall, the assets setting makes a moderate contribution to its value. The cottage's setting, due to the distance, does not extend into the draft Order Limits.
- 3.4.522 'Upper Park' (**1239213**) is located approximately 1.3 km to the east of the draft Order Limits. This Grade II listed building is of medium value and has aesthetic and historical value. This large house was built in the 18th century in the 'cottage style'. The structure is timber framed with plastered walls with some exposed brick. The asset is located close to the road but screened from view by a large and well-established hedge. To the north-west is the garden, to the north-east is a large agricultural field. To the south is another large field and to the southeast is a farm. According to the 1st edition OS map the house was originally set in a garden surrounded by parkland. To the west of the building were large 'U' shaped barns. These are now non-extant. Overall, the asset setting makes a minor contribution to its value. Due to the distance away the asset's setting does not extend into the draft Order Limits.
- 3.4.523 Located approximately 1.3 km to the northeast of the draft Order Limits 'Black Weatherboarded Barn at Shelley Glebe Farm' (**1239219**) and across the road to the east is 'Brook Farmhouse' (**1273809**). Both are Grade II listed and are of medium value and have aesthetic and historical values. The barn dates to c.1500. It is timber frames and clad, as the name suggests, in black weatherboarding. It has a thatched

roof, which is not original. The building has now been converted for residential purposes. The farmhouse dates to the 16th century and later. It is two stories tall with a partly exposed timber frame, which is infilled with painted plaster. Its roof is ridged, hipped and clad in peg tiles with eaves.

- 3.4.524 The barn is almost set onto the roadside save for a small grass verge and a pavement. The 1st edition OS map shows, as today, that the barn was on its own within an enclosed area. It is not clear where the farmhouse, for Shelley Glebe Farm, was once located. Potentially it was attached to the western side of the barn, or it was non-extant by the time of the map. The barn may have been used by Brook Farm on the opposite side of the road hence why it survived and not the farmhouse. Brook Farmhouse is located at an east to west angle to the north-east to south-west aligned road. It is located within a garden. Both assets are surrounded by agricultural fields and residential or farm related buildings along the southern or eastern sides of Grove Hill (road). The assets historical setting has changed slightly, with the potential loss of the farmhouse of the barn, and the introduction of new buildings along the road. Therefore, the assets setting makes a moderate contribution to their value. Due to the distance neither of the assets setting extends into the draft Order Limits.
- 3.4.525 The Grade II Listed 'Rookery Farmhouse' (**1273805**) is located approximately 1.1 km to the east of the draft Order Limits. The asset is of medium value and has aesthetic and historical value. It was constructed in the 16th century, or earlier. It is timber framed which is partly exposed and infilled with painted plaster. It has a thatched roof over two stories with several red brick chimneys. It is 'U' shaped in plan. The house is set back from the semi busy road by a garden and well-established hedge which gives a sense of enclosure to the house. The farm complex is now non-extant, it was located to the west and north-west, and has been replaced by gardens and later houses. The property would overlook an agricultural field to the south if the road was not lined with well-established vegetation. The addition of the houses along the road and to the north of the farmhouse as well as the loss of the farm complex, have altered the assets historical setting. Overall, the assets setting makes a moderate contribution to its value. Due to the distance the assets setting does not extend into the draft Order Limits.
- 3.4.526 The Grade II Listed Buildings 'Pennypot Cottage and Ramplins' (**1239408**) are located approximately 1.6 km to the east-south-east of the draft Order Limits on the western side of Dedham Conservation Area (**CA7**). The assets are of medium value and have aesthetic and historical value and a good retention of historical character. These three, mid-19th century cottages are single storey tall with attics. They have a red brick front wall (which are a different shade in each property), and a peg tiled and rambrelled roof. The assets face out onto the street with a small garden outside. The road is steeper at the southern end than the northern. The road can be busy. On the opposite side of the road, and overlooked by the cottages, are later bungalows set back from the road. To the south-west are historically characterful buildings. According to the 1st edition OS map this property was once a smithy. The cottages, historically and presently, marks the end of the residential part of Dedham village. They would have once overlooked an agricultural field. Overall, the assets setting makes a moderate contribution to their value. Due to the distance away these assets setting do not extend into the draft Order Limits.
- 3.4.527 The Grade I Listed Building 'Parish Church of St Mary's' (**1239340**) is located approximately 1.7 km to the east of the draft Order Limits. The church is of high value and has aesthetic and historical values. It also has communal value as an active church at the heart of the Dedham community. The building dates to 1492 (Dedham and Ardleigh Parishes: History of St Mary's, Dedham (dedham-and-ardleigh-

parishes.org.uk)). It has been altered greatly over centuries and now has a perpendicular style. The church is located on the southern side of the High Street within a churchyard. To the south is The Duchy Fields, a public park, to the north, east and west are residential and commercial properties. Many of them have retained their historical character. This part of the settlement is busy, and the asset forms a focal point for the village. Setting wise, the present and historical would not have been too dissimilar. Therefore, the assets setting makes a considerable contribution to the church value. Due to the distance, and the churches residential setting, the assets setting does not extend into the draft Order Limits.

- 3.4.528 Lifkins Farmhouse' (**1239446**) is located approximately 1.6 km to the north-east of the draft Order Limits. This Grade II listed building is of medium value and has aesthetic and historical value. The farmhouse was constructed in the 17th century with later alterations. It is two stories tall with a ridged and gabled roof clad in peg tiles. Its walls are of painted plaster. The asset is set back from the road by a large garden and wooded area which screens the asset from the road. This also give the property an isolated feeling despite the location of a small settlement to the east. This settlement has developed since the 1st edition OS map. The map also shows that the farm complex was to the east of the house, but this is now non-extant. Overall, the assets setting makes a moderate contribution to its value. Due to the distance the asset setting does not extend into the draft Order Limits.
- 3.4.529 'Boxhouse Farmhouse' is a medium value Grade II Listed Building c.460 m east of the draft Order Limits. The property is located off a rural road and is set within a farming complex with characterful and working buildings. It is enclosed by a high hedge and wall and features established trees in the grounds. It is on the eastern side of the A12, and the traffic noise can be heard from the asset's location. In its wider setting, the A12 is to the west and agricultural land surrounds to the north, east, and south. The two storeyed house is dated to the 16th century and is timber framed and plastered with surviving pargetting panels. Inside, 17th century plaster ceilings and some remains of the original roof construction remain and contribute to its overall evidential and historical value. The asset's setting contributes to its value but does not extend to the draft Order Limits.
- 3.4.530 'Dalethorpe, Dalethorpe End, and Middle Dalethorpe' is a medium value Grade II Listed Building c.580 m south-east of the draft Order Limits. The asset is a large 18th century house that has been much altered and has later additions since its construction. It is constructed of brick and has two storeys and has a mixed tile and slate clad roofs. The oldest part of the building is the north-west wing which has an initialled table referring to Thomas Fimen, possibly referring to an owner or architect of the property. The asset has evidential, aesthetic, and historical value. The asset is located within the rural landscape west of Dedham Conservation Area (CA7) and the A12 is c.200 m to the west of the asset. The asset's setting contributes to its value but does not extend to the draft Order Limits.

## Lawford CP

- 3.4.531 'Grange Farmhouse' (**1254100**) is a Grade II listed building located approximately 1.2 km to the north-east of the draft Order Limits. It is of medium value and has aesthetic and historical value. The house was constructed in the late 18th century, with earlier origins. It was constructed out of red brick with a symmetrical front elevation. It is two stories tall with attics. Its roof contains two boxed Dormer windows. The asset is set back from the road by a gravelled area. It faces the road to the north-west and overlooks an agricultural field. To the south-west is other farm buildings associated with the farm. Surrounding the farm are agricultural fields. It is a quiet and rural area.

The field to the north-west, the road and gravel area give a sense of space to the asset. According to the 1st edition OS map of the area not much has changed apart from the demolition and creation of new farm buildings in the farm complex. Therefore, the asset's setting makes a considerable contribution to its value. Due to the distance away, the asset's setting does not extend into the draft Order Limits.

- 3.4.532 'Lower farmhouse' (**1261442**) and 'Barn Approximately 60 Metres South West of Lower Farmhouse' (**1254183**) are located approximately 1.1 km to the north-east of the draft Order Limits. These Grade II listed buildings are of medium value and have aesthetic and historical value. The farmhouse dates to c.1600 with later alterations. It is timber framed and clad in rough rendering. It is single story with attics and three Dormer windows in the red roof tile clad gabled roof. The barn dates to the 16th century with 18th century alterations. It is timber framed and clad in weatherboarding. It is five bays long.
- 3.4.533 The farmhouse is set back from the road by a garden which then expands out into the field to the north-east. The barn is part of the farm complex, mostly now converted for residential purposes, to the south. It is surrounded by green grassed areas with a driveway and yard area to the north-east, east and south-east. The road to the east is quiet and rural. Surrounding both assets are agricultural fields. The 1st edition OS map shows little change since the map was created, except for an addition of a barn in the farm complex and the farm to the south-west, Wisdoms Farm, is no longer extant. Overall, the assets setting makes a considerable contribution to their setting. Due to the distance, the assets setting does not extend into the draft Order Limits.
- 3.4.534 'Glanfields' (**1254182**) is located approximately 1.3 km to the north-east of the draft Order Limits. This Grade II listed building is of medium value with historical and aesthetic values. The house was constructed in the 17th century, or earlier, with later alterations and additions. The building is 'L' shaped and two stories tall. It was constructed out of red brick with weatherboard cladding to the north-eastern gable and south-western range. The asset is set back from the road by a large garden and paddock or grass area to the north-west. The garden wraps round the property including some outbuilding and a swimming pool to the south. Surrounding the garden are agricultural fields. The road is to the north-west. According to the 1st edition OS map of the area the asset, and its much smaller garden, were part of a large field. Barns can be seen to the south in another field. Due to the extension of the garden and look of the barns the assets setting makes a moderate contribution to its value. Due to the distance, the asset setting does not extend into the draft Order Limits.
- 3.4.535 'Lawford House' (**1261450**) is located approximately 1.9 km to the north-east of the draft Order Limits. This Grade II listed building is of medium value with historical and aesthetic values. This large property dates to the 17th century with and 18th to 19th century front range. This is constructed out of gault brick, the rear range is timber framed with brick facing. It has a hipped grey slate tiled roof with a parapet wall. It is two stories tall. The symmetrical front elevation contains a large central door with a double pillared porch. The asset is set within its own small parkland or garden. It is possible the parkland to the south is also part of the property. To the east are new builds. To the north and further to the east are the urban sprawl of Lawford. To the south and west are agricultural fields. According to the 1st edition OS map the parkland to the south and the new build area to the east was all once parkland for the house. Surrounding the property was agricultural fields. Overall, the assets setting makes a moderate contribution to its value. Due to the distance away, the assets setting does not extend into the draft Order Limits.

- 3.4.536 Located within Lawford conservation area (**CA25**) is 'Lawford Hall' (**1254131**). It is approximately 2.5k to the north-east of the draft Order Limits. This Grade I listed building is of high value and has historical and aesthetic value and has retained many of its historical fixtures, fittings and character. This large property dates to c.1580-83, with possibly earlier origins and with later additions and alterations. It was built for the Waldegrave family. It is timber framed with plastered walls. The front façade was faced in red brick in 1756. It is half 'H' shaped in plan with long wings extending to the north, with two staircase turrets, and breaking forward to the south. The asset is set within an extensive and well-maintained parkland. To the north is a wooded area, to the west is a walled garden. To the south is an avenue of trees lining the driveway. To the east is a trackway leading to a farm to the north-east. Little has altered setting wise to this asset since the 1st edition OS map. Therefore, the assets setting makes a considerable contribution to its value. Due to the distance and parkland setting, the asset setting does not extend into the draft Order Limits.

### **Ardleigh CP**

- 3.4.537 Located approximately 1.4 km to the east of the draft Order Limits is 'Holly Lodge Farmhouse' (**1254097**). This asset is Grade II listed and is of medium value with historic and aesthetic values. This 17th century, or earlier house, with 18th century and later alterations and additions. It is timber framed with red brick walls. It is two stories tall with attics. There is an 18th to 19th century dairy attached to the property. This has a brick floor with slate shelves and hanging hooks. The asset is set back from the road by agricultural fields, which also surround the property. The farmhouse is set within a garden, to the north of the farm track. The farm complex is to the west and south. Although the farm complex has altered over the years by the creation and removal of buildings, the assets farmyard and agricultural landscape setting has not altered. Overall, the asset setting makes a considerable contribution to its value. Due to the distance the assets setting does not extend into the draft Order Limits.
- 3.4.538 'Milestone on East Verge Approximately 240 Metres South of Harts Lane' (**1147792**) is located within the draft Order Limits. The asset is of medium value and has historical value. The milestone dates to the 18th or 19th century and is made of stone. It is triangular in plan with a raised head. The asset is located within a green verge, to the eastern side of the road, next to an active industrial area and layby area. Google Street View (March 2021) shows that the milestone has been removed from its upright position and lies flat on the ground.
- 3.4.539 The present setting includes the green grassed verge, the Old Ipswich Road to the north-west and the layby and industrial area to the south-east. The milestone is noted on the 1st edition OS map of the area. It is located on the eastern side of the road and surrounded by agricultural fields. The milestone is noted to say 'Colchester...4 Ipswich.....14'. The asset still maintains its roadside setting although the surroundings have changed. Its roadside location within the draft Order Limits informs its setting and makes a considerable contribution to its value. Its setting extends to the draft Order Limits.
- 3.4.540 Located approximately 50 m to the north of the draft Order Limits, are two Grade II listed buildings: 'Thatched Cottage' (**1112086**) and 'Beaumaris Witheys' (**1147592**). They both are of medium value due to their historic and aesthetic values and for their good retention of historical character. Thatched Cottage dates to 1832, it is one storey tall with a thatched roof. The roof contains two eyebrow Dormans and a Dormer in each front gable end, at each end of the front elevation. It is timber framed with plastered walls. To the south-west is Beaumaris Witheys. This pair of cottages, which date to the 18th and 19th century, are single story with attic. The road is

thatched with four sets of eyebrow Dormer windows. The building is timber framed with white painted plaster.

- 3.4.541 Both properties are located at the corner of Dead Lane and Dedham Road. This junction allows for two green triangular areas in front of the properties. This and the road junction give a sense of space. Both roads can be busy. To the north, east and south-west are other residential properties not in keeping with the historical character of the cottages. Historically the setting of the assets are not too dissimilar, there are however more and later properties lining both roads. Overall, the assets setting makes a considerable contribution to their values. Due to the close proximity of the draft Order Limits both the assets' settings extend into the draft Order Limits.
- 3.4.542 To the west of the draft Order Limits by approximately 30 m is the Grade II listed 'Bounds Farmhouse' (**1147743**). This building has historical and aesthetic values and is of medium value. The farmhouse was constructed in the 17th to 18th centuries, but possibly has earlier origins. It was built out of red brick with black headers and diapering. The building is two stories tall with a red tile clad hipped roof. The roof also contains two hipped Dormer windows, with finials, and two tall chimneys with bands and pilasters. The front elevation of the property is symmetrical with a central entrance way with a pillared, projecting porch.
- 3.4.543 The building is set back from the road by a well-maintained garden. It is partly obscured from view by well-established vegetation. The property would overlook agricultural fields to the east, but these are screened from view by well-established hedge that lines the road. To the south of the farmhouse is a garden and tennis courts. Beyond these are agricultural fields. To the west are the continuation of these fields. To the northwest is a large nursery farm with many green houses. To the north is the farm complex for the farmhouse. This has lost most of its buildings since the 1st edition OS map. Further north is a later house with ornate grounds. Historically the present-day setting would not be too dissimilar, except to the later house and green houses to the north and north-west. Therefore, the assets setting makes a moderate contribution to its value. Due to the proximity of the draft Order Limits the assets setting extends into them.
- 3.4.544 Located approximately 30 m to the south of the draft Order Limits is 'Fountain Farmhouse' (**1253912**). This Grade II listed building is of medium value and has historical and aesthetic values. The house was constructed in the 17th century with a later 19th century front range. It was built over two stories with red brick. Its front elevation is Georgian in style and is symmetrical. The central door is framed on either side by large windows on ground and first floor, with an arched window above the door.
- 3.4.545 The farmhouse is set back from the road by a garden and a green grassed area. The farm complex is to the west. The 1st edition OS maps shows that some of these buildings have since been demolished. To the east is the start of Ardeley Reservoir to the south is Wick Lane and a later residential property. To the south-west is a quarry. To the west are agricultural fields. To the north is a green grassed area and a water way which leads to Ardeley Reservoir. The quarry and reservoir are later additions to the landscape and have altered the wider historical setting of the asset. Overall, the assets setting makes a moderate contribution to its value. Due to the proximity of the asset to the draft Order Limits its setting extends into them.
- 3.4.546 Approximately 70 m to the south of the draft Order Limits is the Grade II listed 'Wick Farmhouse' (**1253913**) and 'Barn Adjacent to Road at Wick Farm' (**1253914**). These Grade II listed buildings are of medium value due to their historic and aesthetic values. The farmhouse was constructed in c.1760 with later alteration. Its front range

is timber framed with light creamed painted plaster render. The two-story structure, with attics, has a red tile clad roof. The front range has a nearly north to south hipped roof and the eastern range, aligned east to west has a double gabled roof. There are windows within the gables ends of the house. The barn is located to the north of the farmhouse. This dates to the early 19th century. It is timber framed and clad in black painted weather boarding. It has a red pan tiled roof. There are two lean-to cart lodges/stables at each end. The barn is quite large, eight bays in total. Originally the barn had a shaft which ran into the barn which was used to propel a horse driven wheel. This was located to the road. This has since been removed.

- 3.4.547 The farmhouse is set back from the road, which is lined by a thick hedge, by a courtyard area and farm complex. The house is almost hidden from the road by large barns, included the listed barn. This faces side onto the road. The house faces west and faces a small garden with large well-established tree line. To the south of the house is continuation of the garden and tree line. To the north are later barns for the farm. This, according to the 1st edition OS map, was originally the location of a field which the listed barn would have looked out onto. The road is quiet with the three residential properties to the west. Surrounding the assets are agricultural fields. Further to the south is a later quarry. Aside from the quarry and later barns, the historical setting of the assets have little changed. Overall, the farmhouse setting makes a considerable contribution to its value and the barn setting makes a moderate contribution to its value. Due to their proximity to the draft Order Limits the assets' setting extends into the draft Order Limits.
- 3.4.548 Located approximately 190 m to the north-west of the draft Order Limits is 'Whaley Farmhouse' (**1112088**). It is Grade II listed and is of medium value and has historic and aesthetic values. The property dates to the 17th century, or earlier, with later alterations and additions. It is timber framed with plastered walls. It is two stories tall with a red plain tiled roof. The farm complex is to the north of the house and there is a large courtyard property to the south. Surrounding the farmhouse are gardens and grassland fields. The house and farm complex are accessed via a track way. Not much has changed in the landscape, save for the addition and removal of field boundaries and buildings. It remains a quiet and rural farm. Its setting, therefore, makes a considerable contribution to its value. Due to the close proximity of the asset to the draft Order Limits, its setting extends into the draft Order Limits.
- 3.4.549 The following two Grade II listed assets form a group, 'Lodge Farmhouse' (**1322614**) and 'Barn Approximately 40 Metres North West Of Lodge Farmhouse' (**1147771**). The Lodge Farmhouse, c. 190 m south-east of the draft Order Limits, is a house with a 15th to 16th century rear and 19th century front, built from red brick at the front of the property. To the rear, the property is timber framed and plastered, with red plain tile roofing across the property. The barn, c.120 m south-east of the draft Order Limits is a 19th century timber framed and weatherboarded barn, with a brick plinth and grey slate roof. The landscape surrounding these assets is rural agricultural, with the northern part of the Ardleigh reservoir c.300 m to the west.
- 3.4.550 The assets are located within the same property, located along Lodge Lane which joins the main road of Colchester Road A137. The assets property is lined by mature vegetation along Lodge Lane and Colchester Road. The asset is close to other properties which make up a scattered settlement around the periphery of Ardleigh. The landscape in the area is dominated by agricultural fields, with the Ardleigh reservoir to the west of the assets at the end of Lodge Lane. A railway line runs c. 400 m south-east of the junction of Lodge Lane and Colchester Road. The setting of the assets contributes considerably to their value, as part of the same property and within an agricultural landscape which ties to the historical function of the assets. The

setting of the assets does extend to the draft Order Limits which passes through the agricultural land to the north-west of the asset. The assets have aesthetic, historical and evidential value and are medium value.

- 3.4.551 To the north of the draft Order Limits by approximately 240 m is the Grade II listed 'Hungerdowns Farmhouse' (**1112091**). The house is of medium value due to its historical and aesthetic values. It was constructed in the 17th century with an 18th century front range. It is constructed out of red brick over two stories with attics. There are three gabled Dormer windows in the roof, which is clad in red plain tiles. The asset is set back from the road by a well-maintained garden and pollard trees which line the roadside. Within the surrounding area are large nursery green houses, to the west, south-west and south-east. To the north and east is a woodland and to the south are green fields. The introduction of the green houses has altered the historical setting of the asset. However, the solar farms are screened from view by well-established vegetation. Overall, the asset's setting makes a moderate contribution to the asset's value. The asset's setting does extend into the draft Order Limits due to its proximity and views to the south over agricultural fields.
- 3.4.552 The Grade II listed 'Tudor Cottage and Well House' (**1112087**), located c. 430 m south-east of the draft Order Limits, comprises two cottages made up of several buildings, of 17th and 18th century origin with later alterations. The cottages are timber framed and plastered with red plain tile roofing. The asset is located within a small group of residences on the outskirts of the settlement of Ardleigh, close to the road edge of Green Lane, set behind a low hedge. To the north of the asset are more residential properties and to the east, west and south are agricultural and grass fields, with the main settlement of Ardleigh beyond the agricultural fields to the east. The surrounding area is largely that of an agricultural and rural landscape, with scattered small settlements around the village of Ardleigh. To the south of the asset is a railway line and to the east, Ardleigh reservoir. The setting of the asset contributes moderately to its value, still within a rural settlement, but with some modern residential development and industry in the area to the south. The setting of the asset does not extend to the draft Order Limits. The asset has aesthetic and historical value and is medium value.
- 3.4.553 The Grade II listed 'New Hall' (**1112056**), located c. 330 m west of the draft Order Limits, is a two storey early to middle 19th century house, built in gault brick with a grey slate roof and projecting eaves. The asset is located within the southern half of the conservation area of Ardleigh (**CA26**), situated within a large private garden filled with dense mature vegetation, off Station Road. Along the northern and western edge of the asset's property boundaries are residential properties and roads, to the south a railway line and to the east, an open agricultural field. The wider landscape around the asset is that of an agricultural landscape, with some industry to the north-east and south-west. The setting of the asset contributes moderately to its value, with the development of modern properties close to the asset. The setting of the asset does not extend to the draft Order Limits. The asset has historical and aesthetic value and is medium value.
- 3.4.554 Located approximately 120 m to the north-west of the draft Order Limits at its closest point is 'Blue Barns Farmhouse' (**1112094**). This Grade II listed building is of medium value due to its historical and aesthetic values. The house dates to the 18th century, with possibly earlier origins. It is constructed out of red brick over two stories with attics. The roof is gambrel and clad in red plain tiles. There is a date noted on one of the gables which reads 'T BB 1803'. The farmhouse is located within a large yard with the farm complex to the south. There is little heritage value in the farm complex as the original farm buildings have been replaced with later additions. The 1st edition

OS map shows that the asset is surrounded by grassed areas which maybe landscape gardens and agricultural fields. Presently, to the north are residential properties and later farms to the west is the busy A12. To the south is an industrial area and scrub land. To the east are agricultural fields. Overall, the assets setting makes a moderate contribution to its value. The assets agricultural setting does extend into the draft Order Limits due to proximity.

- 3.4.555 To the north-west of 'Blue Barns Farmhouse' (**1112094**) is 'Blue Barn Cottage' (**1147610**) and 'Thorpe Ley' (**1223503**). They are located approximately 160 m north-east of the draft Order Limits, along Old Ipswich Road, c. 750 m south of Langham. These Grade II listed buildings are of **medium value** due to their evidential, historical and aesthetic value. The cottage dates to the 18th century with later 20th century additions. It is single story with attics. The roof is thatched. Thorpe Ley, c. 1700, is a timber-framed and plastered house with a distinctive peg-tiled gambrel roof.
- 3.4.556 Their setting is informed by their roadside location. They are both set within a garden with a well-established hedge. To the north of the cottage, east of the house is a restaurant, to their west is the busy and noisy A12, to the south is an industrial area and to the east are agricultural fields. Their historical setting has been removed by the later additions of the A12, industrial area and the restaurant. Overall, the assets setting makes a minor contribution to their value. Despite being in such proximity to the draft Order Limits, their setting does not extend into them due to the intervening industrial area.
- 3.4.557 The Grade II listed 'Bovill's Hall' (**1307139**), located c. 700 m south-west of the draft Order Limits, is a 15th century house with potentially earlier origin, with later 18th and 19th century alteration and extensions. The original building is timber framed with a painted brick face and hipped grey slate roof. The 18th and 19th century additions are built of similar materials. The asset was known as one of the four manors of Ardleigh, with Sandford Lambe as Lord in 1796.
- 3.4.558 The asset is located within a large private garden bordered by mature vegetation and down a private drive which leads off the B1029 Station Road. The asset is situated on the periphery of the settlement of Ardleigh, close to an area of new housing development which borders the southern side of the railway which runs south-west to north-east c. 170 m north of the asset. To the north of the asset is the main settlement of Ardleigh, to the east and west open agricultural fields and to the south some agricultural fields as well as an area of industry including an industrial estate. The setting of the asset contributes moderately to its value with the encroachment of the extension of the settlement of Ardleigh, the railway line passing close to the asset and the industrial land to the south. The visual screening of the asset along the B1029 restricts views towards the draft Order Limits and the development east of the asset and the boundaries and division lines of other properties reduce the limits of the asset. As such the setting of the asset does not extend to the draft Order Limits. The asset has historical and aesthetic value and is medium value.
- 3.4.559 Located approximately 240 m south of the draft Order Limits is 'Gods House Farmhouse' (**1147645**). This Grade II listed building is of medium value due to its historic and aesthetic values. It was built in the 17th century with a timber frame and rough rendered walls. It is two stories tall and has a symmetrical front elevation with a large central chimney in the red tile clad roof. The farmhouse is set back from Harts Lane by its garden, it is in clear view of the road and over looks an agricultural field to the south. The farm complex is to the east and north. Harts Lane can be busy at times. The surrounding setting includes agricultural fields and dispersed residential and farm related buildings along the road. The assets historical and present setting

are not too dissimilar. Therefore, the assets setting makes a considerable contribution to the value of the listed building. Due to its proximity to the draft Order Limits, and the open agricultural fields, the assets setting extends into the draft Order Limits.

- 3.4.560 Approximately 420 m to the south-west of the draft Order Limits, are two Grade II listed buildings: 'Mill House' (**1112057**) and 'Pheonix Steam Mill and Engine House' (**1322634**). These assets are of **medium value** and have historical and aesthetic values. These two properties are located next door to one another along Station Road in Ardleigh conservation area (**CA21**). Mill House dates to the mid to late 19th century. It was constructed out of gault brick in a Georgian style. The roof is clad in grey slate and is hipped. To the south is the Pheonix Steam Mill and Engine House. This is a large structure which is four stories tall with attics. It was also constructed in the mid-19th century in white brick. The first-floor door was used for winching in materials, the winching mechanism is still intact. There is a large extension to the rear of the property that is not in keeping with the character of the building.
- 3.4.561 Both assets are set back from Station Road by a small garden, Mill House, and a bollard gravel area, Pheonix Steam Mill and Engine House. Both overlook the well-established vegetation and residential properties on the opposite side of the road. To the north-east are the grounds of 'New Hall' (**1112056**). To the north are residential buildings, which are later but have tried to mimic the Georgian style of these properties. To the south is an open yard area for a public house. Further to the south is the railway line. Overall, the setting of these roadside assets is a rural residential. Their setting has changed since they were constructed by the creation of new houses along the road. Therefore, the assets setting makes a moderate contribution to their value. Due to the intervening vegetation and properties, the assets' setting does not extend into the draft Order Limits.
- 3.4.562 The Grade II listed 'Ardleigh Park' (**1112050**), located c. 1.6 km south of the draft Order Limits, is an 18th century house, possibly of earlier origin with later alterations and additions. The three-storey asset has a gault brick face c. 1830 and a hipped grey roof. The house has been known previously as 'New House' and 'New Park' (F.H Erith 'Ardleigh in 1796', 1978).
- 3.4.563 The asset is located in private grounds, down a private drive, located off of Park Road. the assets property includes large open lawns dotted with mature trees, as well as mature tree and hedge boundaries across the properties, some of which line the border of the property with Park Road. To the south-east of the asset is a large triangular area of woodland. The wider landscape comprises agricultural land with a solar power farm c. 500 m to the east, an area of industry bordering the assets property ground to the north, and the A120, c. 850 m to the south-west. The park setting of the asset contributes considerably to its value and the setting of the asset does not extend to the Order Limit, despite the potential for intervisibility. The asset has historical and aesthetic value and is medium value.
- 3.4.564 Located approximately 600 m to the north-west of the draft Order Limits is the Grade II 'Goodhall' (**1147569**). This asset is of medium value due to its historical and aesthetic values. It was constructed in the 18th to 19th centuries out of grey brick. The two-story structure has a Georgian style. The house is set back from a road junction (between Coggeshall Road and Hunters Chase) by a garden and large well-established hedge. The house faces away from the roads in a southerly direction and over looks a long garden that runs parallel to Coggeshall Road. To the east are agricultural fields. To the west are residential properties. These are later additions to the landscape, according to the 1st edition OS maps. Overall, the asset setting is

similar to its historical one. Therefore, its setting makes a considerable contribution to its value. The asset setting does not extend into the draft Order Limits due to the distance.

- 3.4.565 'Forge Cottage' (**1147810**) is located approximately 690 m south-west of the draft Order Limits. The Grade II listed building is of medium value and has historic and aesthetic values. The property dates to the 17th century, or earlier, with later alterations and additions. It is timber framed with painted white plaster between the timbers. The asset is set back from the busy road by a garden and large wall. Historically the assets setting would have been rural, with a few houses and farms lining the roads to the west and north. The property would have also been located at the southern side of a road junction between Crown Lane North and Old Ipswich Road. Today the area is more residential, and a later property has been built next to the road junction. The busy and noisy A12 and its junction to the west along with a large quarry to the north-east and Ardleigh Reservoir to the south have been constructed in recent years. This has eradicated the original setting of the asset therefore the assets setting makes a minor contribution to its value. Due to the distance in intervening quarry the assets setting does not extend into the draft Order Limits.
- 3.4.566 Approximately 850 m to the south-west of the draft Order Limits, are two Grade II listed buildings: 'Hillhouse Farmhouse' (**1308402**) and two attached barns (**1112092**) which are located c. 30 m to the west of the farmhouse. These two assets are of medium value due to their historical and aesthetic values. The farmhouse dates to the 18th and 19th centuries with later additions and alterations. It was constructed out of red brick, with black headers, over two stories. The barns date to the 17th and 18th centuries. They are timber framed with black weatherboard cladding. They have now been converted to residential use. The assets form part of a farm complex which is accessed via a track way. The assets present setting includes agricultural fields, the Ardleigh Reservoir to the south and a large lake to the north-west. This differs to what is portrayed on the 1st edition OS map of the area. Here the maps shows that the farm is surrounded by agricultural fields. Overall, the assets setting makes a moderate contributions to their value. Their setting does not extend into the draft Order Limits due to the distance between them.
- 3.4.567 Located approximately 1.3 km to the south of the draft Order Limits are 'Spring Valley Mill House' (**1112054**, Grade II listed) and 'Spring Valley Mill' (**1112053**, Grade II\* listed). The house is of **medium value** and the mill is of **high value** due to their historic and aesthetic values. They also have group value and form part of the same mill complex. The house dates to the 17th to 18th century with later alterations and additions, it is timber framed with white painted weatherboarding on the first floor. The ground floor is white painted plaster. The mill is late 18th century in date. It is timber framed with white painted weatherboarding on the first floor and white painted brick on the ground floor. The mill was originally powered by a stream but has since been converted to steam. At present the mill is not in operation.
- 3.4.568 The two assets are located off Springvalley Lane. The road sweeps down to the south and is lined on either side by well-established vegetation. The mill gable end faces onto the roadside. The house is set back from the road by a garden. To the north and south of the assets are wooded areas. To the west is an agricultural field. To the north-east is the mill pond which once powered the mill. To the south is the busy A120 and to the north-west is a railway line. The noise of the road and railway line disrupts the quiet and rural nature of the assets. Overall, the asset immediate setting has altered little, except for the introduction of more trees to the north. Therefore, the assets setting makes a considerable contribution to its value. Due to

the distance and topography the setting of these assets does not extend into the draft Order Limits.

- 3.4.569 'Wood Cottage' (**1112083**), Grade II listed, is located approximately 1.8 km to the south of the draft Order Limits. It is of medium value due to its historic and aesthetic values. The property is single story with attics. It is timber framed with white painted plaster. It was constructed in the 17th and 18th century with later alterations and alterations. Its roof is thatched with two gabled windows on the front elevation. The cottage is set back from the Bromley Road by a garden and largely screened from view by a well-established hedge. The road can be busy. Surrounding the property are agricultural fields, to the east are later properties. Overall, the assets setting has changed from an isolated property to one along a more residential road. Therefore, its setting makes a moderate contribution to its value. Due to the distance away the asset setting does not extend into the draft Order Limits.
- 3.4.570 To the west of 'Wood Cottage' (**1112083**), approximately 1.8 km to the south of the draft Order Limits, are 'Collierswood Farmhouse' (**1322645**) and 'Barn Approximately 100 Metres South West Of Collierswood Farmhouse' (**1112082**). They are both Grade II listed and are medium value. The assets have historical and aesthetic value and have group value. Collierswood Farmhouse is a two-storey 19th century red brick house with hipped grey slate roof. The asset is shown as Wades Piece on a map from 1822 with W. Downes, later as Colliers Wood in 1830 by Herbert Coates. The Barn is a late 18th century in date with older origins, that is timber framed and weather boarded and with a red pan tiled roof. the barn originally comprised 10 bays with two gabled midstreys, one midstrey was later demolished but the rear doors and front opening remain, and four bays were added to the south, resulting in a very long 19th century barn of 14 bays. To the left (north) of the midstrey is a small engine house and four bay cartlodge in place of the demolished midstrey.
- 3.4.571 The assets are located down a private driveway which leads off of the Bromley Road. The assets are located within the same property and are part of a scattered settlement in an agricultural landscape. To the north of the asset, on the opposite side of the Bromley Road is a triangular woodland. To the south of the asset, c. 610-680 m, is the A120 and to the north-east, c. 400-460 m, is a solar power farm. The setting of the assets contributes considerably to their value and the setting of the assets does not extend to the draft Order Limits.
- 3.4.572 The Grade II listed 'Rose Cottage' (**1253911**), located c. 560 m south of the draft Order Limits, is a 17th century cottage with later alterations and additions. The single storey asset is timber framed, with brick facing, rough rendering and a red tiled gambrel roof.
- 3.4.573 The asset is located within a scattered settlement between Ardleigh to the north-west and Great Bromley to the south-east. The asset situated on Waterhouse Lane, close to the junction with Morrow Lane, is set back from the road behind a gravel driveway which leads into a lawned garden with some mature vegetation and with a hedge lining the property boundary. Waterhouse Lane is lined with dense vegetation restricting views to and from the property. The asset is located close to other residential properties and a business to the east, possibly a farm, with many large modern barns present within the property. Much of the surrounding landscape is dominated by agricultural land, with scattered settlement and a solar power farm to the south-west. The setting of the asset contributes moderately to the assets value. There is the potential for visibility between the asset and the draft Order Limits to the north, however, the setting of the asset does not extend to the draft Order Limits. The asset has historical and aesthetic value and is medium value.

- 3.4.574 In Lambs Corner is the Grade II listed 'Thatched Cottage' (**1266269**). It is located approximately 420 m to the north-east of the draft Order Limits. It has medium value and has historic and aesthetic values. The cottage dates to the 17th century. It is timber framed and rendered. The cottage is small, only three rooms. It has a hipped thatched roof, which contains a dormer window in the front elevation, with an off centre chimney. The asset is set back from the road junction, between Ardleigh Road, Grove Hill and Birchwood Road, by a small garden with a well-established hedge. This hedge screened the asset from the roads. To the north-east, east and south-east is dense woodland. To the south-west, west and north-west are residential houses. This part of the settlement was once less populated and to woodland is a later addition. Therefore, the assets setting makes a moderate contribution to its value. Due to the intervening urban form, the asset setting does not extend into the draft Order Limits.

#### *Non-Designated Heritage Assets*

- 3.4.575 The low value Stratford Bridge (**3169**) is situated c. 220 m south-east of the draft Order Limits to the west of Stratford St Mary. The bridge crosses the river Stour and was evident on Saxton's map of 1575 and also Speede's map on 1610. This asset has evidential and historical value. This asset is adjacent to a possible Roman bridge (3024) represented by timber piles.
- 3.4.576 The low value area of Dedham Heath (**3101**) is situated within the draft Order Limits at Parney Heath and Lamb Corner on its western and south-western sides. The Heath is c. 3.6 km wide and follows the Long Road West from Parney Heath/Lamb Corner towards Manningtree. The Heath is shown in the 1777 Chapman and Andre map located to the south of Dedham settlement as an irregular c.179ha area and with some scattered buildings along the edge of the heath. This asset has communal, historical, and evidential value.
- 3.4.577 The medium value brick vaults at Langham Church (**3198**) are situated beneath St Mary's Church c. 70 m west of the draft Order Limits which run adjacent to the river Stour on its western side. The asset was discovered in 1985 when the rotting floor was lifted in the south aisle to reveal three brick vaults, one of which was partially revealed and the other two were under the vestry. The vault which was visible was constructed of flint rubble with a yellow mortar. In 1997, an exaction of four pits for a proposed organ gallery revealed part of the inhumation. The alignment of the burial was east to west and appeared to pre-date the 13th century tower and the 14th century west wall of the church. The vaults (**3198**) are associated with the Grade I listed Church of St Mary (**1223452**), and has historical, evidential, and communal values.
- 3.4.578 A low value copper alloy token (**3252**) was found in a field c. 50 m west of Boxhouse Lane, and c. 185 m north-east of the draft Order Limits north-west of Parney Heath settlement. In the same field but c. 160 m west of Boxhouse Lane and c. 60 m north-east of the Order Limit, a low value silver coin (**3253**) was found. These assets have evidential value.
- 3.4.579 A low value silver coin (**3254**) was found in a field within the draft Order Limits c. 155 m north of Birchwood Road to the south-east of Parney Heath settlement. In the same field, another low value silver coin (**3255**) was found c.140 m north of Birchwood Road. These assets have evidential value.
- 3.4.580 The Colchester HER holds nine records for post-medieval undefined finds of unknown value in the following locations:

- There were three findspots (**3300**, **3301**, **3302**) found within the draft Order Limits. These assets were found during metal detecting and have evidential value.
- There is a findspot (**3310**) situated outside the draft Order Limits near the River Stour. This asset has evidential value.
- A findspot (**3312**) is situated within the draft Order Limits west of the A12. This asset has evidential value.
- A findspot (**3313**) is situated along the edge of the draft Order Limits near Lower Street. This asset has evidential value.
- A findspot (**3268**) was situated outside the draft Order Limits near Lamb Corner. This asset has evidential value.
- A findspot (**3316**) is situated within the draft Order Limits near the River Stour. This asset has evidential value.
- The findspot (**3314**) is situated within the draft Order Limits near Lower Street. This asset has evidential value.

## Great Bromley, Little Bromley, and Little Bentley

### *Designated Heritage Assets*

#### Little Bromley CP

- 3.4.581 'Dickley Hall' (**1261101**) and 'Barn Approximately 40 Metres South of Dickley Hall' (**1240272**) are both located 1.9 km north-east of the draft Order Limits proposed verge and landscaped buffer and 3.3 km to the east of the draft Order Limits. These Grade II listed buildings are of **medium value** and have historic and aesthetic values. The Hall mainly dates to the 18th, 19th and 20th centuries but has its origins in the 15th to 16th centuries. The large house is timber framed with red brick walls and a red tiled roof. The large red brick concertina chimney is believed to be from the original hall. It is two stories tall. The barn dates to the 18th or 19th century. It is timber-framed and clad in weatherboarding with a brick plinth. It is seven bays long.
- 3.4.582 These two assets are located far from a road within an isolated farm. The complex is to the south of the Hall. To the north is a garden and surrounding the farm are agricultural fields. To the south is a quarry. The area is quiet and rural in nature. The farm complex has altered since the 1st edition OS map, some of the original buildings have been replaced with modern ones. The quarry also does not appear in this map, instead there is Skip Hatch Hill. The buildings which are no longer extant as is the road they once sat next to. Overall, the assets setting makes a considerable contribution to its value. Due to the distance, these assets setting do not extend into the draft Order Limits.
- 3.4.583 Located immediately east of the proposed verge and landscaped buffer and 2.2 km to the east of the draft Order Limits, along Bentley Road, are 'Pair of Cottages Approximately 10 Metres South of the Fox and Hounds Public House' (**1111418**). This Grade II listed asset is of medium value and has aesthetic and historical value. These cottages date to the 18th or 19th centuries. They are single storey, with attics, with a timber frame and weatherboard cladding. They have a red plain tiled gabled roof that contains a central brick chimney. The gable ends contain windows for the attics. The assets are set back from the road by a gravel area and partly hidden from the road by a well-established hedge. To the north is the Fox and Hounds Public House, which is in close proximity to the listed buildings, to the north-east is the garden for the properties, to the south and south-east is a farm complex. To the east

are agricultural fields. The road on which the assets side fronts onto, can be busy. According to the 1st edition OS map, the public house was originally a smithy and there were several buildings to the north and east of the cottages. These are no longer extant or have been amalgamated into the public house. To the south-east the farm complex remains but this has altered significantly since the 1st edition OS map. To the west the agricultural fields remain. Due to the alteration of the farm complex and the creation of the public house, the assets setting makes a minor contribution to its value. Due to its close proximity to the draft Order Limits the assets setting extends into them.

- 3.4.584 Approximately 140 m to the north of the draft Order Limits, is the Grade II listed 'Jennings Farmhouse' (**1111459**). This house is of medium value and has historical and aesthetic values. The property was constructed in the 17th century with a later rear addition. It is timber framed with weatherboard cladding. It is two stories tall with attics. The roof is hipped and clad in red clay roof tiles, it has a large central red brick chimney. The rear has several Dormer windows. The asset is set back from the road by a garden, but it is visible from the road. To the north a converted barn and to the west is a later residential building. According to the 1st edition OS map the farm complex, now non-extant, was to the west and north-west. The property was also called Normans. Similar to today the surrounding landscape includes the road, which curves round to the west and agricultural fields. Due to the loss of the farm complex the assets setting only makes a moderate contribution to its value. Due to the close proximity of the draft Order Limits to the asset, the assets setting extends into the Order Limit.
- 3.4.585 A collection of three listed buildings: 'Newhouse Farmhouse' (**1337176**), 'Gig House Approximately 10 Metres North East of Newhouse Farmhouse' (**1111421**) and 'Barn Approximately 20 Metres West of Newhouse Farmhouse' (**1337177**), are located approximately 300 m north-east of the draft Order Limits. They are all of **medium value** and have aesthetic, historical and group value. The farmhouse was constructed in the 18th century, with possibly earlier origins, it has later additions and alterations. It is timber framed with white ashlar lined plaster. The roof is double range, with a parapet wall, and clad in grey slate. The property is two stories tall, with attics, and is Georgian style. The gig house dates to the 18th century and was constructed out of red brick with a red tiled roof. It contains a chimney and is single storey tall. The barn was constructed in the 18th to 19th century out of re-used medieval timber. The building is timber framed and clad in weatherboarding. It has a grey slate roof. It is five bays long. It has now been converted to residential use and is no longer in the ownership of Newhouse farmhouse.
- 3.4.586 The farmhouse is set back from Shop Road by a garden and screened from view by well-established hedge. To the north-east is the gig house. To the south of this is a gravel area and a driveway. To the north and west of the buildings are green grass areas and garden as well as a large agricultural field. The barn is also set back from the road by a garden. To the east are residential building. To the south-west of all three properties are residential buildings lining the road and agricultural fields. The rural residential feel of the assets can also be seen on the 1st edition OS map. The increase in residential properties along the road and the change in ownership of the barn has altered the original setting of the assets. Therefore, the assets setting make a moderate contribution to the assets value. Due to the close proximity of the draft Order Limits, the asset's setting extends into the draft Order Limits.
- 3.4.587 'Ash House' (**1337154**) is located approximately 400 m north-east of the draft Order Limits. This Grade II listed building is of **medium value** with historical and aesthetic values. This large house dates to the 17th or 18th century with later additions and

alterations. It is timber framed with plastered walls. It its two stories tall with attics. The asset is set back from the road by a large garden that stretches along the road in east and west direction. The house is screened from view by a well-established hedge. Surrounding the garden are agricultural fields. According to the 1st edition OS map the house was originally part of a north to south aligned field. Therefore, the asset setting makes a moderate contribution to its setting. The assets garden location, surrounded by agricultural fields does not extend into the draft Order Limits.

- 3.4.588 Located approximately 560 m to the south-west of the draft Order Limits is 'The Old Rectory' (**1111420**). This Grade II listed building is of **medium value** and has aesthetic and historical value. The house dates to the 18th century, it was constructed out of red brick with a hipped red tile clad roof. It is square in shape and it two stories tall with attics and a cellar. The asset is set back from its roadside junction, with Church Road and Spratts Road, by a garden. The garden is surrounded by well-realised vegetation. This gives a sense of enclosure to the building. Surrounding the garden are agricultural fields. To the west is 'Church of St Marys' (**1337175**) and a farm. According to the 1st edition OS map this farm was once the location of Little Bromley Hall, now non-extant. Other than this, little has changed in the assets setting since this map. Therefore, the asset setting makes a considerable contribution to its value. The asset setting does not extend into the draft Order Limits due to the well-established garden hedge.
- 3.4.589 Approximately 600 m to the north-east of the draft Order Limits, is 'Chequers Farmhouse' (**1111419**). This Grade II listed building is of **medium value** and has historic and aesthetic values. It was built in the 17th or 18th century with a 19th century red brick facing. It is single story, with attics, tall with a red plain tiled gabled roof. The chimney is red brick and located within the centre of the roof. The front elevation has two gabled Dormer windows. The eastern side of the property is a large extension which adds little to the historical character of the building. The asset is set back from the road by a garden and is surrounded by agricultural fields. To the west are residential buildings. The listed building location is quiet and rural. The fields give the asset a sense of space. According to the 1st edition OS map of the area the asset setting has changed slightly. The maps show properties to the west and east, these are now non-extant. To the west where the recent residential properties are, was once a Methodist Chapel and several buildings, these are now non-extant. Therefore, the assets setting makes a moderate contribution to its value. Due to the distance, and the intervening residential properties in Little Bromley to the south, the assets setting does not extend into the draft Order Limits.

### Great Bromley CP

- 3.4.590 The Grade II listed 'The Walnut Tree' (**1337190**), located c. 1.2 km south of the draft Order Limits, is a 17th century cottage with later additions. The property has a timber frame, is plastered and has a red plain tile gambrel roof. The asset comprises a long cottage of attached buildings, from right to left, dating from the 17th, 18th and 19th century with a further 20th century extension to the front of the asset.
- 3.4.591 The asset is located within a lawned garden lined by a hedge, situated on Carringtons Road and is part of a scattered settlement between Ardleigh to the north-west and Great Bromley to the south-east. To the north and south of the property are agricultural fields. The asset is located within a wider agricultural landscape that has scattered settlements, with the main thoroughfare of the A120 c 1.5 km to the south. The surrounding landscape is open with similar low-lying terrain around the landscape resulting in wider views into the landscape. The setting of the asset contributes moderately to its setting, with the scattered settlement around the

landscape and solar power industry to the west and main transport links to the south. The setting of the asset does not extend to the draft Order Limits, despite the open landscape to the north of the asset. The asset has historical value and is medium value.

- 3.4.592 To the south of the draft Order Limits by approximately 1.7 km are the Grade II listed 'Great Bromley House' (**1111449**) and 'Barn and Attached Cartlodge Approximately 50 Metres South of Great Bromley House' (1147085). These assets are of medium value and have historical and aesthetic values. Great Bromley House dates to c.1780 with a later rear range. It is timber framed with white painted plaster. It is two stories tall with attics. The roof is clad in grey slate, with three Dorman windows, and a parapet wall. The two chimneys are red brick. The front elevation is symmetrical. The barn and cartlodge date to the 18th century. The single building is timber framed with weatherboard cladding. The barn is five bays long and the cartlodge is three bays long. To the south-east is a granary. The whole building is not in good condition.
- 3.4.593 The two assets are located along Hall Road, which can be busy. The house is set back slightly by a small garden with a well-established hedge which partly screens the asset from view. The barn complex is located to the south-east of the house. Its south-western end is located almost onto the road. The setting of both assets includes the road and the farm complex. To the west and south-east are later residential and farm related properties. Surrounding the assets are agricultural fields. The house would have originally overlooked these fields but this is obscured by the hedge. Overall, the assets setting make a moderate contribution to their value. Due to the distance these assets setting do not extend into the draft Order Limits.
- 3.4.594 The Grade II\* listed 'Copley Dene and Wall attached to left' (**1147103**) is located c. 2.7 km south-west of the draft Order Limits. The asset is an early to mid-18th century house and wall with later alterations. The asset comprises two storeys and is built in red brick with hipped red plain tile double range roofs and end chimney stacks. The building is symmetrical, has two storeys, and three light angled bays. There is a central brick band within the brickwork. There are small paned vertically sliding sashed windows with brick arches and a small, panelled sliding sash above a central doorway. The property features timber pilasters with moulded capitals and bases, a frieze, dentilled soffits moulded to a pediment and reaveal panels. The later additions include a 20th century part glazed door, three 20th century lights to the attic. There is another two storyed, two bayed extension to the right of the property that is joined to the original asset. The internal features which are original include pannelled rooms, a ground floor fireplace with fluted side columns, a first floor fireplace with pilasters, moulded ceiling cornices, moulded architraves to six panelled doors, marble fireplace with fluted columns, and other fireplaces from the 18th and 19th centuries. These features contribute to the asset's value.
- 3.4.595 The asset is located on the southern periphery of the settlement of Great Bromley, down a private driveway lined with mature trees, off the B1029, Parsons Hill. The asset is situated within a lawned garden which is surrounded on all sides by mature vegetation. Neighbouring the asset along its northern border is an equine supplies shop with large barns as part of the shop. Opposite the asset on the eastern side of the B1029 is the grounds of a former hospital 'Hamilton Lodge'. The B1029 is lined by mature vegetation screening views to and from the asset to the north-east to the south-east. To the south of the asset, c. 320 m, is the A120, and to the west open agricultural fields with the A120 in the distance as it travels north-west towards Colchester. The wider landscape surrounding the asset is an agricultural landscape with small settlements within the landscape. The setting of the asset contributes moderately to its value, with barns lining the assets property to the north and the

busy A120 to the south. The setting of the asset does not extend to the draft Order Limits. The asset has historical and aesthetic value and is high value.

### Little Bentley CP

- 3.4.596 'Abbots Hall' (**1261150**) is located approximately 1.2 km to the north-east of the draft Order Limits. This Grade II listed building is of **medium value** and has aesthetic and historical value. The property dates to the 17th century, or earlier, with 18th century alterations and additions. It is timber framed with plastered rear and red brick front elevation. The roof is clad in red tiles with a palisade wall. The asset is set back from the busy road by a large garden, it is screened from the road by well-established vegetation. To the south and south-east are large barns. To the east is the road and a large farm. To the west and north-west are manmade lakes. In the wider setting, the asset is surrounded by an agricultural landscape. To the south is the busy A120 which the road to the east forms a junction with. Apart from the alteration to the farm complex, with later buildings, and the creation of the A120 and lakes, little has changed within the setting of the asset since the 1st edition OS map. Therefore, the assets setting makes a considerable contribution to its value. Due to the distance, the assets setting does not extend into the draft Order Limits.
- 3.4.597 Approximately 1.8 km east of the draft Order Limits is 'Hempstall's Farmhouse' (**1240504**). This Grade II listed building is of **medium value** with historic and aesthetic values. The farmhouse dates to the 17th century, or earlier, with an early 19th century front range. This is brick built whilst the rear of the property is timber framed with weatherboard cladding on the first floor and brick on the ground floor. The asset is set far back from the A120 by agricultural fields. The property is accessed via three trackways, to the north, east and west. To the north and south-west of the farmhouse is a green grassed or garden areas. To the south-east, east and north-east is the farm complex. Since the 1st edition OS map this farm complex has altered with the removal and creation of buildings over all the assets setting makes a considerable contribution to its value. Due to the distance, the asset setting does not extend into the draft Order Limits.
- 3.4.598 Approximately 1.2 km to the south-east of the draft Order Limits, is the Grade II listed 'Paddock Hall' (**1111458**). It is of **medium value** and has historic and aesthetic values and has retained its historical character. This house dates to the 17th century with later additions and alterations. It has exposed timber frame with red plaster infill. The roof is thatched with a large Dormer window. It is single story with attics. There is a later extension to the west. The asset is set back from the road by a large garden and screened from view by a well-established hedge. Originally the asset would have been located within a small rural settlement surrounded by agricultural fields. Today the house is located within a dispersed settlement with farms to the north and north-west. Also to the north-west is a wooded area. To the east is a farm. These assets are later, except for the farm to the north, but this has altered significantly since the 1st edition OS map. Overall, the assets setting makes a moderate contribution to its value. Due to the distance, the asset's setting does not extend into the draft Order Limits.
- 3.4.599 Located to the north-east of Paddock Hall, along the same road (approximately 1.3 km to the south-east of the draft Order Limits is 'Old maltings to West of Malting Farmhouse' (**1147177**). This Grade II listed building is of medium value and has aesthetic and historic values. This early 19th century red brick building is two story tall with an unusual pan tiled roof. The roof outshoots to the west, this forms a covered, single story storage area or corridor. It is five bays long. The building is located end onto the road, aligned near north to south. To the north-east and east is

the farm, most of which has been replaced with modern buildings. Surrounding the asset is agricultural fields. The road can be busy at times. The setting is not too dissimilar to that seen on the 1st edition OS map. Therefore, the assets setting makes considerable contribution to its value. Due to the distance, the asset's setting does not extend into the Order Limit.

- 3.4.600 'Octagonal Lodge Cottages to South West of Church' (**1111454**) is a single building located approximately 1.9 km to the south-east of the draft Order Limits. This Grade II listed building is of **medium value** and has historic and aesthetic values. It was constructed in the 19th century with an unusual octagonal plan. It has an exposed timber frame with red/orange painted plaster infill. It is single story with a thatched roof with a plaster chimney stack. This is believed to have been the 'Lodge to Bentley Manor' (**1308648**), to the north. The asset is set back from the road, which can be busy, by a small patch of concrete. To the north are several later barn type buildings and a yard area. To the east is the road and agricultural fields. These are screened from view by well-established vegetation. To the south is a small, wooded area. Surrounding the asset are other characterful properties and agricultural fields. To the north is Bentley manor and farm and the 'Church of St Mary' (**1111455**). The assets setting has not altered much since the 1st edition OS map, save for the outbuildings to the north and alterations to Bentley manor farm. Therefore, the assets setting makes a considerable contribution to its value. Due to the distance. The asset's setting does not extend into the draft Order Limits.

## Horsely Cross

### *Designated Heritage Asset*

- 3.4.601 'Abbots Hall' (**1261150**) is located approximately 1.2 km to the east of the draft Order Limits. This Grade II listed building is of medium value and has aesthetic and historical value. The property dates to the 17th century, or earlier, with 18th century alterations and additions. It is timber framed with plastered rear and red brick front elevation. The roof is clad in red tiles with a palisade wall. The asset is set back from the busy road by a large garden, it is screened from the road by well-established vegetation. To the south and south-east are large barns. To the east is the road and a large farm. To the west and north-west are manmade lakes. surrounding the property are agricultural fields. To the south is the busy A120 which the road to the east forms a junction with. Apart from the alteration to the farm complex, with later buildings, and the creation of the A120 and lakes, little has changed within the setting of the asset since the 1st edition OS map. Therefore, the assets setting makes a considerable contribution to its value. Due to the distance, the assets setting does not extend into the draft Order Limits.
- 3.4.602 To the east of the draft Order Limits, by approximately 1.8 km is 'Hempstall's Farmhouse' (**1240504**). This Grade II listed building is of medium value with historic and aesthetic values. The farmhouse dates to the 17th century, or earlier, with an early 19th century front range. This is brick built whilst the rear of the property is timber framed with weatherboard cladding on the first floor and brick on the ground floor. The asset is set far back from the A120 by agricultural fields. The property is accessed via three trackways, to the north, east and west. To the north and south-west of the farmhouse is a green grassed or garden areas. To the south-east, east and north-east is the farm complex. Since the 1st edition OS map this farm complex has altered with the removal and creation of buildings. Overall the assets setting makes a considerable contribution to its value. Due to the distance, the asset setting does not extend into the draft Order Limits.

## Little Bentley and Monkey Street

### *Designated Heritage Assets*

- 3.4.603 'Thatched Cottage at Termination of Old Harwich Road' (**1147160**) is located approximately 250 m south-west of the draft Order Limits. It Grade II listed and of medium value and has historic and aesthetic values. The cottage was constructed in the 17th century with later alteration and additions. It is timber framed with plastered walls. The property is two jointed structures, the one to the south-west has a tiled roof, the one to the north-east is thatched with an eyebrow Dormer window. The combined property is two stories tall with attics. The asset is set next to a private road which was the original road into and out of Workhouse Green, now mostly extant due to the creation of the A120. The access road to the remaining settlement is now to the south-east of the asset. Immediately to the west of the cottage is the busy and noisy A120, this is screened from view by well-established vegetation, but the noise is still present. To the north-east, east and south-east is a large property and its grounds. Surrounding the assets are agricultural fields. The assets setting has changed since the 1st edition OS map and now makes a moderate contribution to its value. Due to the intervening A120 the assets setting does not extend into the draft Order Limits.
- 3.4.604 To the south of the 'Thatched Cottage at Termination of Old Harwich Road' (**1147160**) is 'Ryecroft' (**1111456**). This Grade II listed building located approximately 500 m to the south-west of the draft Order Limits. It is of medium value and has aesthetic and historical value. It was constructed in the 17th to 18th century with later alterations and additions. It is timber framed with plastered walls. It is one story tall with attics. It has two gabled Dormer windows within the red plain tiled roof. A small extension to the rear is possible a former oven. The asset is set back from the road by a garden and screened from view by a well-established hedge. To the north and west are the garden to the property. To the east is the road and storage area, which was once a farm complex, according to the 1st edition OS map. The surrounding area includes agricultural fields and the busy and noisy A120 to the west. Overall, the assets setting makes a moderate contribution to its value. Due to the intervening A120 the assets setting does not extend into the draft Order Limits.
- 3.4.605 Located to the south-east of the draft Order Limits, by approximately 950 m is 'Filde Hall' (**1147166**). This Grade II listed building of medium value and has aesthetic and historical value. The house was constructed in the early 19th century out of Gault brick. It is a large property, two stories tall, with a possible cellar. Its roof is hipped and clad in grey slate. The asset is set far back from the Rectory Road and Church Road by a large parkland and garden, to the south. Immediately to the north is a large barn. The vegetation and the barn screen the asset from the roads. Within the wider setting are residential properties lining the roads to the north, north-east and east. These are surrounded by agricultural fields. According to the 1st edition OS map, apart from the creation of the garden, with a pond and lawn, to the south and the creation of new houses along the roads, little has altered within the setting of the asset. Overall, the assets setting makes a considerable contribution to its value. Due to the distance, and intervening properties along Rectory Road to the north, the assets setting does not extend into the draft Order Limits.
- 3.4.606 'Park Farmhouse' (**1111451**) is located approximately 1 km to the west of the draft Order Limits. This Grade II listed building is of medium value and has aesthetic and historical value. This late 17th century with 19th and 20th century alteration and extension, is timber framed with a brick ground floor and a rough rendered first floor. The north-western part of the structure is original, this was symmetrical with a porch

over the central entranceway. The south-eastern extension includes a north-western door with window to the south-east and two windows on the first floor. This extension looks to be newly constructed compared to the original part of the property. The farmhouse is located within a garden set back from the road. To the north is the main farm complex and to the south-west is a large barn. The road to the west forms a cross junction to the south-west with another road. Surrounding the asset is agricultural fields and several later residential properties line the road to the north and south. The farm complex to the north has altered significantly since the 1st edition OS map. This alteration means that the asset's setting makes a moderate contribution to its value. Due to the distance, and intervening farm complex, the asset's setting does not extend into the draft Order Limits.

## Modern

### Elmsett, Chattisham and Copdock

- 3.4.607 Three **low value** WWII pillboxes (**3321**, **3322**, **3323**) of evidential value were located around the junction of the A1071 and the B1113 c. 1.2 km south of Sproughton and c. 250 m east of the Order Limits. Two of the assets (**3322**, **3323**) were destroyed by 1976, whilst the third comprises an extant Type 22 concrete pillbox (**3321**) with concrete block interior anti-ricochet wall.

### Higham, Holton St Mary, Stratford St Mary and East Bergholt

#### *Designated Heritage Assets*

- 3.4.608 The Grade II listed 'Ketelfield and Attached Garden Terrace and Steps to the South Elevation' (**1416968**) is located approximately 830 m to the west of the draft Order Limits. It is of medium value due to its aesthetic values and style. The house was designed by the nationally renowned Aldington and Craig between 1975-78. Historic England has described the property as 'an early and rare example of a bespoke, well-proportioned, steel-framed private house in England, referencing Mies Van der Rohe's seminal Farnsworth House, meticulously adapted to integrate with and respect its setting'. The building is single storey with a flat roof and a steel frame, which is exposed. The main entrance to the house is from the sloping north side, across a pedestrian bridge. The elevations are clad in timber.
- 3.4.609 The house is set back from Hadleigh Road within a large garden with a wooded areas to the north, east, west and south-west. This gives an enclosed feeling to the building. Within the wider setting are houses along Hadleigh Road, to the south and north, agricultural fields to the east and wooded and green spaces to the west. Overall, the asset's setting makes a considerable contribution to its value. Due to the distance, the asset's setting does not extend into the draft Order Limits.

### Raydon, Great Wenham and Capel St Mary

#### *Non-Designated Heritage Assets*

- 3.4.610 The low value RAF Raydon site at Notley Industrial Park (**3189**) is situated c. 380 m east of Raydon and c. 800 m west of Little Wenham, with much of the asset within the draft Order Limits. The airfield was built during 1942 - 43 and closed in 1958 was one of the more complete World War II WW USAAF bases in East Anglia that was not used during the later Cold War. Since the mid-20th century, the area has been used for agriculture with one instance of the site being used to house emergency vehicles for the Home Office in the 1970s. The asset has evidential and historic value.

- 3.4.611 The medium value Boxted WWII Airfield (**3088**) lies c. 700 m west to c. 2.5 km west of Ardleigh and straddles the draft Order Limits between Horkesley Heath and Ardleigh. The Airfield opened in 1943 and closed in 1946, housing American bomber and fighter units during the War, with three runways linked by a perimeter track, 45 loop dispersals, and six frying pan dispersals. This asset holds historical value.

### **Higham, Holton St Mary, Stratford St Mary, and East Bergholt**

#### *Non-Designated Heritage Assets*

- 3.4.612 The **low value** site of two WWII Auxiliary Operation Base and Observation Post (**3196**) are situated in woodlands c.80 m to c. 170 m north-west of the draft Order Limits to the west of Holton St Mary and is accessed via a private trackway off Sandpits Lane. The Observation Post was a dugout c. 1.2 m by c. 1.2 m originally hidden within a large hollow tree trunk of c. 2.4 m in height. The Observation Post was only discovered when the tree trunk had deteriorated and fallen on its side, some of which remains in situ. The condition of the asset is unknown and it has evidential, historical, and communal value.

### **Hornestreet, Dedham, Ardleigh and Lawford**

#### *Non-Designated Heritage Assets*

- 3.4.613 A low value pillbox (**3202**) is situated within a tractor storage depot c. 130 m south of the draft Order Limits to the which pass the settlement of Ardleigh to the north-east. This asset is constructed of brick with a concrete core which is visible due to its deterioration. It is c. 6 m in diameter, c. 3.5 m in height and is hexagonal in shape which is unusual for this design. This asset has evidential and historical value.
- 3.4.614 The low value site of a destroyed Road Barrier (**3203**) is situated on a track where the north-east/south-west railway line crosses Little Bromley Road c. 610 m east of Ardleigh settlement and c. 10 m west of the draft Order Limits here. Contemporary records stated 'Road barrier. Glebe bridge. Ardleigh' yet there is nothing visible on an aerial image taken in May 1946. This asset holds historical value.
- 3.4.615 The low value site of a destroyed road barrier (**3204**) is situated along home Farm Lane near the bridge over said railway c. 5 m north of the draft Order Limits which pass along the north-eastern side of Ardleigh settlement. A contemporary record stated 'road barrier. Home farm bridge. Ardleigh' and an aerial photograph from May 1946 shows soil marks on both the north and south sides where the blocks or pimples had been taken up. This asset is not extant but holds historical value.
- 3.4.616 The low value site of an Ammunition Shelter (**3205**) is situated within the south-east corner of the pleasure grounds of Ardleigh Court c. 18 m north of Harwich Road on the eastern side of Ardleigh Conservation Area and c.180 m south-west of the draft Order Limits. The Ardleigh Court pleasure grounds have been re-developed with new houses and a lightly wooded grassland and the exact position of the asset cannot be determined although nothing seems to be extant. This asset has historical value.
- 3.4.617 The site of the low value Langham Camp (**3000**) is situated c. 420 m north of Wick Lane on the western side of Ardleigh and within the draft Order Limits. The HER record states that it was the site of a World War II prisoner of war camp but offers no other description. This asset holds historical value.
- 3.4.618 The low value group of interwar houses and associated small-holdings at 7-18 Coggeshall road (**3241**) which sit between Coggeshall Road and Harwich Road with the southern end within the draft Order Limits which pass Ardleigh along the north-eastern side. This complex was constructed by the Land Settlement Association Ltd

(LSA) with the intention of providing work on small holdings for the unemployed industrial workers who were principally from the north of England, with the inspiration from the Carnegie UK Trust. These assets hold communal, aesthetic, and historical value.

## Undated

### Elmsett, Chattisham and Copdock

#### *Non-Designated Heritage Assets*

- 3.4.619 The low value Burstall Long Woodland (**3183**), an Ancient Woodland, is situated c. 950 m north-east of Burstall and adjacent to the draft Order Limits which pass the settlement of Burstall on the eastern side. This asset holds evidential and historical value.
- 3.4.620 The **low value** Brimlin Wood (**3181**), an Ancient Woodland, is situated c.5 m north of the draft Order Limits which pass on the east side from Little Wenham in the south. This asset is holds historic value.
- 3.4.621 The **low value** woodland, Wenham Thicks (**3182**), is an Ancient Woodland on the southern side of Wenham Road c. 12 m south of an draft Order Limits permanent access and c. 130 m of the draft Order Limits. This asset holds historical and evidential value.
- 3.4.622 The **low value** cropmarks of a field system and pits (**3320**) of evidential value are located immediately west of the B1113 c. 1 km south of Sproughton and c. 60 m east of the Order Limits.
- 3.4.623 There are **low value** cropmarks (**3191**) situated within the draft Order Limits in agricultural fields to the east of the A14. This asset consists of cropmarks of a double ditch and traces of fields and hold evidential value.
- 3.4.624 There are **low value** cropmarks of a field system (**3192**) as situated on the southern side of the A1071 and c. 15 m south of the draft Order Limits in the Sproughton area. The cropmarks show a single field boundary and is not marked on the 1st edition OS mapping. This assets holds evidential value.
- 3.4.625 There are earthworks of **negligible value** (**3190**) are situated c. 175 m east of Spring Road c. 800 m north-east of Copdock, and c. 230 m east of an draft Order Limits branch in this area. The earthworks are of two extractive pits (c. 75 m in length) and a bank (c. 235 m in length) which are parallel to Spring Brook so could have been used as a flood defence. This asset has evidential value.
- 3.4.626 A **low value** lead weight (**3041**) of evidential value was found within 250m of the draft Order Limits in the Washbrook and Copdock area.
- 3.4.627 There is a rectilinear sided earthwork bank of low value shown in a field adjoining Belstead Brook (**3184**). This asset is situated along the northside of the Thorpes Hill road and is bound by the draft Order Limits on the south-eastern side. The draft Order Limits here pass in southern direction between Hintlesham and the western Ipswich suburbs. In 1920/21, the feature was described as 'traces of an early British encampment'. The feature was not shown on the 1974 1:10,000 map and all field boundaries have now gone. This asset has evidential value.

### Raydon, Great Wenham and Capel St Mary

- 3.4.628 There is an irregular field boundary of negligible value (3180) which is situated partially within the draft Order Limits which is aligned north/south between Raydon and Little and Great Wenham. This asset has evidential value.

### **Higham, Holton St Mary, Stratford St Mary and East Bergholt**

- 3.4.629 A low value double ditched rectangular cropmark (**3170**) is situated within the draft Order Limits c. 225 m east of Sandpits Lane in a field north of Bobbitts Hall. The feature can be seen as a faint cropmark and has evidential value.
- 3.4.630 A low value ring ditch (**3166**) of c. 20 m in diameter is situated within the draft Order Limits c.15 m north of Higham Road. This asset is north of low value rectilinear field boundaries (**3168**) which extend from Higham Road towards Green Lane on the eastern border and sits within the draft Order Limits. These assets have evidential value.
- 3.4.631 A group of low value enclosures and ditches (**3172**) are situated c. 45 m south of Higham Road by the river bound by St Mary's Church on the eastern boundary and are c. 170 m west of the draft Order Limits. These assets have evidential value.
- 3.4.632 A low value small ring ditch (**3195**) is situated c. 15 m west of Higham Road and c. 80 m south-east of the draft Order Limits. This asset has evidential value.
- 3.4.633 There is a low value group of cropmarks (**3239**) within the draft Order Limits c.1.2 km west of Stratford St Mary consisting of 12 ring ditches, plus elements of a rectilinear system. These assets have evidential value.
- 3.4.634 A low value silver pin (**3258**) was found within the draft Order Limits c. 375 m west of the river Stour which passes the settlement of Stratford St Mary on the western side. This asset has evidential value.

### **Hornestreet, Dedham, Ardleigh and Lawford**

- 3.4.635 There are low value undated cropmarks (**3092**) that are situated in a north-east to south-west direction within the draft Order Limits at Parney Heath. These were visible in aerial photographs from 2006 and hold evidential value.
- 3.4.636 There are low value cropmarks (**3212**) c.230 m north-east of the draft Order Limits along Boxhouse Lane. These cropmarks have evidential value. A series of low value cropmarks of various linear features at Kiddles Farm (**3213**) sit on the western side of Boxhouse lane with the south-western corner within the draft Order Limits. These features a possibly a sub-rectangular enclosure of possible prehistoric date, but this is yet to be confirmed. This asset is of low value.
- 3.4.637 There are low value cropmarks (**3214**) situated on the western side of Dedham Road c. 1.5 km south-east of Langham and the draft Order Limits sit in the north-east corner of the field. The cropmarks are of several parallel linear features and some of which appear on the 1st edition OS map 6' series. The asset has evidential value.
- 3.4.638 There are low value cropmarks of possible rectilinear enclosure and pits (**3216**) that are situated within the draft Order Limits c.700 m north-east of Langham Hall. The enclosure is incomplete as there is a trackway through the eastern side, and there is

geology that could be masking other cropmark features in the field. This asset has evidential value.

- 3.4.639 The cropmark of a medium value large sub-circular enclosure (**3238**) is situated within the draft Order Limits between Parney Heath and Lamb Corner and extends in a south-western direction in the direction of Harts Lane. The enclosure is c. 50 m in diameter and is joined by a short, ditched trackway to a smaller pear-shaped enclosure. The smaller enclosure has 2 entrances on the eastern side, and a further short stretch of funnel-shaped trackway leads out from one of these and heads in a southeasterly direction. A very broad ditched trackway aligned north-south cuts the stretch of trackway linking the 2 enclosures and aligns with an existing lane to the north and a belt of woodland to the south. The asset is comparable to the 'banjo' enclosures of Wessex which were interpreted as stock corrals. There is no other comparison within Essex but the size of the asset has been interpreted as a farm or stock yards. This asset holds historical and evidential value.
- 3.4.640 There are low value cropmarks of a possible enclosure and double-ditched trackway (3240) are situated on the western side of the A12 and c. 95 m south-east of Black Brook, c. 800 m north-west of Parney Heath settlement. It is located c. 145 m east of the draft Order Limits. This asset has evidential value.
- 3.4.641 There are low value undated cropmarks of linear features (**3025**) situated in a field c.330 m west of Nightingale Hill, c. 230 m west of the draft Order Limits which follow the westward direction of Black Brook until Greyhound Hill. These features probably indicate a field system and have evidential value.
- 3.4.642 Low value cropmarks of a rectilinear enclosure (**3208**) are situated c. 250 m north of the centre of Ardleigh with the north and north-eastern sections of the asset within the draft Order Limits. These cropmarks may represent a part of an enclosure and hold evidential value.
- 3.4.643 Low value cropmarks of linear features (**3209**) are situated on the eastern side of Waterhouse Lane and the southern side of Little Bromley Road with the topmost section of the asset within the draft Order Limits here. Some of these cropmarks represent former field boundaries. This asset has evidential value.
- 3.4.644 The low value Ardleigh Heath (**3210**) is situated along the western side of Dedham Road and the northern side of Fen Lane with the eastern side within the draft Order Limits. These cropmarks illustrate two former field boundaries which run parallel to Fen Lane. This asset has historical and evidential value.
- 3.4.645 There are low value cropmarks of an enclosure (**3217**) that are situated c. 200 m north of the draft Order Limits c. 600 m west of Grange Road. The cropmarks are of a possible partial curvilinear enclosure c. 40 m in diameter. Other marks in the field are likely to be linear geological marks and some pit like feature. This asset has evidential value.
- 3.4.646 There are low value cropmarks of linear features and field boundaries (**3219**) are situated within the draft Order Limits. These field boundaries are marked on the 1st edition OS mapping and the asset holds evidential value.
- 3.4.647 There are low value cropmarks of a curvilinear enclosure at Rookery Bungalow (3220) that are situated c. 40 m north of the draft Order Limits. The asset is c.54 m in diameter and holds evidential value. Along the northern boundary of this asset, there are other low value cropmarks of a rectilinear enclosure (**3221**) situated c .60 m east of the draft Order Limits at Rookery Farm on

- 3.4.648 There are low value cropmarks of a rectilinear enclosure (**3222**) that are situated c. 150 m north-east of the draft Order Limits. This asset has evidential value.
- 3.4.649 There is a large area of low value mixed asset cropmarks including field boundaries and pits (3223) which have been removed since the drawing of the 1968 6' OS map. This loss of assets implied post-war boundary loss. They are situated c. 300 m west of Ardleigh settlement and the site covers a substantial area along Wick Lane to Harwich Road to the south. The asset is within the draft Order Limits in the northern section. The cropmarks are of a rectilinear enclosure with internal pits which were recorded in 2006 and are located between the road and the reservoir. A part of an existing complex consisting of several linear features was mapped previously as part of the NMP. The area where the pits are continues in the field to the north, but these have not been recorded as part of the NMP. Geological marks in this area possibly mask some of the archaeological activity. A possible curvilinear enclosure was mapped during an update in 2010 and there appears to be hundreds of pits within this area which may or may not be of archaeological origin. These cropmarks have evidential value.
- 3.4.650 There are low value cropmarks of linear features, rectilinear enclosures and an oval enclosure (**3226**) that are situated on the eastern side of Grange Road c. 120 m north-east of the draft Order Limits. This asset has evidential value.
- 3.4.651 There are medium value cropmarks which may be linear features being part of field systems or trackways (**3227**) that are situated in a north-west to south-east area from Ardleigh Road to Badley Hall Road of c. 2 km in length, with the draft Order Limits sitting centrally within the asset. These cropmarks cover a large area and are mainly of linear features being part of field systems or trackways, but there are also ring ditches and several enclosures and what may have been a henge. The putative henge is next to a square enclosure in the north and a group of ring ditches to the south. Another wide-ditched circular feature further south which is without entrances. There are a few ring ditches south of this and several concentrations of pits. There were at least 16 ring ditches to the east of the henge. The asset has evidential value. Adjacent to (3227) on the western boundary, there is a low value possible ring ditch (3228) which has the northernmost boundary within the draft Order Limits. Both (3227) and (3228) have evidential value.
- 3.4.652 Low value linear features (**3232**) are situated within the draft Order Limits c. 200 m north of Little Bromley Road. These features sit at a right angle to a Roman road and probably mark a field division. There were also possible ring ditches north-east of Badley Hall. This asset has evidential value.
- 3.4.653 A low value rectilinear enclosure with three sides and two entrances (**3233**) is situated on the northern side of Morrow Lane and within the draft Order Limits on the eastern side of Ardleigh settlement. The northern, longer side of the rectilinear enclosure is possibly causewayed. This asset has historical and evidential value.
- 3.4.654 A low value group of three ring ditches (**3234**) are situated on the eastern side of Grange Road, with the draft Order Limits bordering the western edge of the asset and in the south-western corner of the asset. These ditches were not mapped during the NMP and have not featured on any aerial photography. This asset has evidential value.
- 3.4.655 A low value group of assets consisting of a double ring ditch, 'D' shaped enclosure and a linear ditch (**3235**) are situated within a field which is bound by the draft Order Limits on the western edge. There are cropmarks of a ring ditch and a rectilinear enclosure also. These features have evidential value.

- 3.4.656 There are low value field boundaries (**3023**) are situated within the draft Order Limits c. 585 m northeast of Ardleigh settlement. This asset has evidential value.
- 3.4.657 There are two fields in which a possible low value penannular ditched enclosure and linear features situated amongst many periglacial features (**3034**) are bound by Hunters Chase to the north, Dedham Road to the west and Rookery Chase to the south, within the draft Order Limits north of Ardleigh. These assets have evidential value.
- 3.4.658 A negligible value find of a large lump of glass waste (**3243**) c. 50 m west of the draft Order Limits found in 1969 within Bounds Farm. This asset holds evidential value.
- 3.4.659 There are low value cropmarks (**3240**) within the draft Order Limits which show a possible enclosure and a stretch of a double-ditched trackway. There is another low value group of undated cropmarks (**3045**) c. 400 m north of (**3240**) and within the draft Order Limits c. 50 m north of Dedham Road which shows a large area consisting of linear features, ditched trackways, and an oval enclosure which may be a ploughed-out copse. Another group of low value linear features (**3049**) and a site with a low value ditched trackway aligned north-south (**3071**) are within the draft Order Limits here. The feature (**3071**) is visible as cropmarks on aerial photographs. All these assets hold evidential value.
- 3.4.660 There is part of a low value irregular shaped enclosure with an entrance on the west side (**3085**) situated c.40 m east of the draft Order Limits. This asset holds evidential value.
- 3.4.661 The Colchester HER recorded one undefined asset found during a metal detecting exercise (**3303**) which was found in a field c. 50 m north of Perry Lane and c.15 m south of an draft Order Limits access track. This asset has an unknown value.

## 3.5 Section D: Colchester City Council

### Location

- 3.5.1 Section D of the Project is located wholly within the County of Essex and the District of Colchester. Section D begins at Old Ipswich Road, Colchester and heads west bypassing the settlements of Highwoods and Horkesley Heath to the south before turning to the south-west and bypassing the settlements of West Bergholt, Eight Ash Green, and Marks Tey. Section D terminates at the Colchester/Braintree District border c. 2 km south-west of Marks Tey. Section D of the Project accounts for approximately 19 km of its overall length.

### Topography

- 3.5.2 From the Old Ipswich Road at 40 m aOD the draft Order Limits passes through a gently undulating landscape that gradually rises to 60 m aOD where the draft Order Limits cross London Road c. 1.3 km west of Great Horkesley. From here, the landscape falls to 46 m aOD as the draft Order Limits cross a tributary valley of the Stour Valley 2.7 km to the north, before climbing again to 51 m aOD to where the draft Order Limits turn to the south-west just north of the B1508. The draft Order Limits then hugs the eastern flank of a north/south aligned tributary valley of the Colne Valley c. 2.4 km to the south. The draft Order Limits crosses the tributary valley at 33 m aOD just to the south of Bergholt Road. From here, the gently undulating landscape rises to 41 m aOD before beginning its descent into the Stour

Valley where it crosses the river at 15 m aOD. The draft Order Limits then climbs out of the valley before passing through a gently undulating landscape between 31 m aOD in the Roman River Valley and 48 m aOD as it continues south-west and its southern limit at the Colchester (B)/Braintree District border.

## Geology

- 3.5.3 The solid geology of Section D consists almost entirely of clay, silt, and sand of the London Clay Formation with just three small pockets of Crag Group Sand c. 1 km south-west of Aldham. From the Old Ipswich Road to the A134 immediately north of Great Horkesley the superficial geological deposits largely comprise clay, silt, and sand of Cover Sand Formation with small areas of sand and gravel of the Lowestoft Formation and sand and gravel of the Kesgrave Catchment Subgroup. From the A134 to the southern limit of the Section at the Colchester/Braintree District border the superficial deposits are dominated by diamicton glacial tills of the Lowestoft Formation, also known as 'boulder clay'. Exceptions to this pattern are seen in the tributary valley of the Stour Valley where clay, silt, sand and gravel head deposits are recorded; in the tributary valley of the Colne Valley where similar head deposits are encountered as well as alluvial clays, silts, sands and gravels, and sand and gravel of the Kesgrave Catchment Subgroup; in the Colne Valley where bands of similarly described deposits of head and alluvium are recorded as well as Kesgrave Catchment Subgroup sand and gravel, sand and gravel River Deposits 2, and clay, silt and sand of Cover Sand Formation; and in the Roman River Valley where head, Kesgrave Catchment Subgroup, Cover Sand, and interglacial lacustrine deposits of clay and silt are recorded.

## Historic Landscape Characterisation

- 3.5.4 Section D of the Project is in the District of Colchester and largely within the National Character Area (NCA) 111: Northern Thames Basin with the last 3.5 km of the Section at its south-western limit located in National Character Area 86: South Suffolk and North Essex Claylands. National Character Area 111 is characterised by the suburbs of North London, historic towns, and cities and in the Project, by moderately dispersed settlements, arable land, and river valleys. National Character Area 86 is characterised by a high, boulder clay central plateau dissected by small-scale undulating river valley topography (Natural England accessed 05/04/2023).
- 3.5.5 The Essex landscape of the Northern Thames Basin (NCA 111) has been further divided, into Historic Environment Character Zones (HECZ) as defined in Section D by the *Colchester Borough Historic Environment Characterisation Project* (CBC/ECC, 2009).
- 3.5.6 The first zone through which the draft Order Limits pass is HECZ 3.4: Boxted Airfield area, which comprises the former extent of the World War II Boxted Airfield. The zone lies on the top of a plateau, bounded by the valley slopes of the Black Brook to the north and the A12 and the valley of the Salary Brook to the south. Many Neolithic axes and other implements have been found within the zone, particularly around Park Lane Farm c. 2 km west of the draft Order Limits. Cropmarks indicative of Bronze Age, Iron Age and Romano-British settlement are also noted in the zone.
- 3.5.7 Heading west, the next zone is HECZ 3.3: Boxted, which comprises a broad plateau with a fieldscape of irregular and regular fields, of ancient, probably medieval origin, and enclosed heathland now sub-divided into rectilinear fields. Prehistoric, Iron Age, and Roman stray-finds have been recovered in the zone and here are also several

areas of cropmarks, including ring-ditches of probable Bronze Age date, enclosures of later prehistoric or Roman date and undated field-systems and trackways. The medieval and post medieval period is represented by surviving historic landscape elements and the built environment.

- 3.5.8 The next zone is HECZ 3.1: The Horkesleys, which has a largely flat, rural landscape with dispersed historic settlements. The fieldscape comprises irregular fields, of ancient, probably medieval, origin. The village of Great Horkesley originally comprised a church/hall complex and a scatter of farms and cottages along the old Roman Road. Little Horkesley also had its origins as a church/hall complex. Below ground survival of archaeological remains is anticipated throughout the zone as indicated by the occurrence of cropmarks likely representing ring-ditches of probable Bronze Age date, enclosures of later prehistoric or Romano-British date and a series of field boundaries and trackways that could be prehistoric, Romano-British or medieval in origin. A Roman lead coffin and two other burials are known close to the draft Order Limits at the south-western limit of the zone. The medieval period is represented by several moated sites as well as the surviving-built environment and historic landscape beneath which medieval below-ground features probably survive.
- 3.5.9 Moving south-west, the draft Order Limits crosses the south-eastern extremity of HECZ 2.4: Fordham and rural land to the west. This zone is largely rural with irregular fields, of ancient, probably medieval, origin and dispersed historic settlements, comprising a church/hall complex (now Fordham) and a scatter of farms and cottages. The medieval field pattern is largely preserved within the present landscape although there has been some field boundary loss. There is potential for palaeo-environmental deposits within the stream valleys. The limited archaeological investigations undertaken in this zone have identified evidence of Romano-British and medieval occupation.
