# 1. Introduction

# 1. Introduction

## 1.1 Purpose of the EIA Methodology Document

- 1.1.1 This document aims to set out for the benefit of ongoing engagement with relevant stakeholders the current proposed scope and methodology for the Cultural Heritage Assessment for the Norwich to Tilbury Project (referred to as the 'Project').
- 1.1.2 This draft document was prepared for review and discussion with relevant statutory environmental bodies and local authorities in 2022. It was then reviewed following the receipt of the Scoping Opinion from the Planning Inspectorate also in 2022, and minor updates have been made to align with the approach taken in the Baseline Report and Chapter 11: Historic Environment in Volume I of the Preliminary Environmental Information Report (PEIR).
- 1.1.3 An initial proposed approach to EIA scoping was outlined in terms of the methodology for survey and assessment in support of the forthcoming Environmental Statement (ES) for the Project.
- 1.1.4 This document was originally drafted based on the best information currently available at the time. It was drafted within and around the 'Route Corridor' presented at non-statutory consultation, referred to as the 'Scoping Report Corridor'. This then formed the basis of the technical assessments for EIA Scoping<sup>1</sup>. However, all additional comments received as part of the ongoing public engagement, including the non-statutory consultation, are being considered and it is acknowledged that the Project may evolve in response to feedback received. Design updates following scoping and non-statutory consultation have also led to the review of this document in 2024, but no further updates beyond those mentioned above have been made.

## 1.2 Project Background

- 1.2.1 Current draft proposals for the Project, referred to as the 2024 preferred draft alignment, which are the subject of the 2024 statutory consultation, comprise:
- A new 400 kV electricity transmission connection of approximately 184 km overall length from Norwich Main Substation to Tilbury Substation via Bramford Substation comprising:
    - Approximately 159 km of new overhead line supported on approximately 510 steel lattice pylons (approximately 50 m in height) some of which are gantries (typically up to 15m in height) within proposed Cable Sealing End (CSE) compounds, or existing or proposed substations
    - Approximately 25 km of 400 kV underground cabling (some of which is located through the Dedham Vale National Landscape (an AONB))

---

<sup>1</sup> The Project now has draft Order Limits and an alignment – which comprise the 2024 preferred draft alignment.

- Six new CSE compounds (each with a permanent access) to connect the overhead lines to the underground cables
- A new 400 kV East Anglia Connection Node (EACN) Substation, with a new permanent access, on the Tendring Peninsula. This is proposed to be an Air Insulated Switchgear (AIS) substation
- Substation extension works at the existing Norwich Main, and Bramford substations and works within the existing Tilbury Substation to connect and support operation of the new transmission connection
- Temporary works associated with construction of the Project

1.2.2 The Waveney Valley Alternative is also being considered and is the subject of consultation and ongoing assessment. This design alternative, if taken forward, would result in changes to those elements of the Project set out below. This would comprise:

- Installation of approximately 157 km of new 400 kV overhead line
- Installation of approximately 27 km of 400 kV underground cabling (some of which is located through the Dedham Vale National Landscape (an AONB))
- Eight new CSE compounds (each with a permanent access) to connect the overhead lines to the underground cables

1.2.3 All other works, other than those listed above would be consistent with either alternative.

1.2.4 The Waveney Valley Alternative, if taken forward and based on the 2024 preferred draft alignment would comprise approximately 2 km less new 400 kV overhead line and approximately an additional 2 km of 400 kV underground cabling and 2 additional new CSE compounds, each with a permanent access, to connect the overhead lines to the underground cables.

1.2.5 In addition, third party utilities diversions and / or modifications would also be required to facilitate the construction of the Project. There would also be land required for mitigation, compensation and enhancement of the environment including Biodiversity Net Gain (BNG).

1.2.6 As well as the permanent infrastructure, land would also be required temporarily for construction activities including for example working areas for construction equipment and machinery, site offices, welfare, storage and temporary construction access.

## 2. Scope of the Assessment

## 2. Scope of the Assessment

2.1.1 Our proposed approach to scoping elements of the cultural heritage assessment is outlined in Table 2.1.

Table 2.1: Scoping of Cultural Heritage Assessment

Matter	Phase	Scoped in	Scoped out	Justification
Terrestrial archaeology – physical effects	Construction	✓		There is known archaeology present within the Route Corridor and the assessment will include consideration of archaeological potential, and to consider potential impacts to yet unknown archaeological remains of all archaeological periods.
	Operation		✓	There will only be a limited need for sub-surface works during operation, which would only affect ground that has previously been disturbed during the construction phase of the Project.
Terrestrial archaeology – setting and indirect effects	Construction and operation	✓		The Project would introduce tall permanent structures and associated infrastructure that would change the setting of archaeological assets and potentially affect their value during construction works and into operation. The potential for indirect effects to archaeology, for example through changes to groundwater, will be included in the assessment. Such effects could affect the preservation of archaeology not directly physically impacted by the Project.
Built heritage – physical effects	Construction and operation		✓	There are no anticipated likely impacts to the physical fabric of built heritage assets. The Project does not currently propose to remove or modify any built heritage assets and effects from vibration are scoped out of assessment for the Project during construction and operation. This will

Matter	Phase	Scoped in	Scoped out	Justification
				be kept under review as the Project evolves.
Built heritage – setting and indirect effects	Construction and operation	✓		The overhead line alignment would introduce tall permanent structures and associated infrastructure that have the potential to change the setting of a built heritage asset, and therefore effect its value.
Historic landscape character	Construction and operation	✓		<p>The construction of the Project has potential to physically impact features of the historic landscape, as well as changing the land use of historic landscape character areas during construction, both of which could affect the value of the historic landscape.</p> <p>The operation of the Project would introduce tall permanent structures and associated infrastructure that has potential to change the historic landscape character, therefore affecting its value. This impact would commence during construction and continue into operation.</p>
Inter-tidal and marine archaeology	Construction and operation		✓	The Project would not interact with inter-tidal or marine areas and therefore there is no potential for impacts to this matter.
Archaeology, built heritage, historic landscape	Decommissioning		✓	The Project is seeking to scope out decommissioning from all assessment due to the length of time over which the Project is expected to operate and any future decommissioning would need to seek appropriate consent at that time. We welcome stakeholder views on whether to scope out effects during decommissioning.

2.1.2 The scope of assessment, outlined above in Table , will be reflected and carried through into subsequent documents of the DCO process, including the EIA Scoping Report, PEIR, Baseline Report and ES.

# **3. Approach to Historic Environment Baseline**

## 3. Approach to Historic Environment Baseline

### 3.1 Introduction

- 3.1.1 This section discusses the approach to determining the study area and gathering data and information to inform the understanding of the Historic Environment Baseline. The baseline understanding is captured in a standalone document, referred to as the 'Baseline Report', and will be appended to the ES.
- 3.1.2 This section of the document also gives an overview of the methodology to determine the historic environment's character and extent, and the significance of the historic environment. This includes any contribution made to the significance of an asset by its setting.
- 3.1.3 The Baseline Report has been written based on a thematic landscape approach to identify relationships between assets, which contributes to their significance, and considers the overall evolution of the landscape narrative within the Project's Route Corridor and study area footprint.
- 3.1.4 As a result of this information, scoping of heritage assets for impact assessment has been undertaken, depending on whether they are within the proposed Route Corridor or if the setting of the asset extends to the proposed Route Corridor and the land within the Route Corridor makes a positive contribution to the significance of the asset. This has captured any heritage assets that may experience a physical impact resulting from construction of the Project. Assets which may experience an impact due to a change to their setting that affects their significance during construction and or operation have also been captured. The wider discussion in the Baseline Report has ensured that the context of the heritage assets assessed in the ES is fully understood.
- 3.1.5 The Baseline Report has adhered to the specification directed in the Chartered Institute for Archaeologists (CIFA) 'standard and guidance for historic environment desk-based assessment' (CIFA, 2014), with the exception that assessment of the impact of the Project and any proposed mitigation will be contained in the ES chapter.
- 3.1.6 The Baseline Report considers the terrestrial archaeology, built heritage, and historic landscapes set out in the EIA Scoping Report and outlined in Table of this document.

### 3.2 Study Area

- 3.2.1 The Project uses a 250 m study area from the latest for data collection and assessment of non-designated heritage assets. Due to the linear nature of the Project and the likely construction related impacts, it is believed that 250 m will encompass heritage assets likely to be physically affected and provide adequate information to understand the archaeological potential of the Project. Whilst also characterising and contextualising the historic environment within the Project's wider environs. This study area is consistent with that used on the Bramford to Twinstead overhead line project and

agreed in the Scoping Opinion in June 2021. Non-designated data between 250 m and 500 m has been reviewed and assets of high importance have been included in the Baseline Report where they provide better understanding of the historic environment within the 250 m study area.

- 3.2.2 A 2 km study area for all designated heritage assets was used for assessment of effects through change to setting. A 3 km study area was employed for designated heritage assets of the highest significance (scheduled monuments, grade I and II\* listed buildings and grade I and II\* registered parks and gardens). While it is not anticipated there would be any physical impacts to designated heritage assets, these study areas would encompass the area of physical works within the Route Corridor should this assumption change. During construction potential impacts could arise from visual, noise, dust, and traffic changes to setting that could affect the value of designated assets. The study areas encompass the areas in which any impacts from these sources are likely to result in significant effects. This is aligned with the Landscape and Visual assessment study area, while acknowledging that the settings of heritage assets are not purely informed by visual considerations. In certain locations, and in accordance with the approach for the Landscape and Visual assessment including Zones of Theoretical Visibility (ZTV), this study area may be increased, for example where topography allows more distant views.

### 3.3 Data Gathering

- 3.3.1 Data was drawn from a range of sources and was managed through a Project specific GIS system.
- 3.3.2 These reference sources included:
- Historic Environment Record (HER) data for known archaeological sites, monuments, find spots and events;
  - Archaeological reports (grey literature) on archaeological interventions within the Route Corridor;
  - Published archaeological journals and monographs, local history books and pamphlets, including local history websites as appropriate;
  - Historic maps, including Ordnance Survey, estate maps, enclosure maps, tithe maps and military plans, all available scales of OS maps were utilised;
  - Available aerial photographs, particularly the Project commissioned UAV/drone aerial survey (see 3.5 for more information);
  - LiDAR data (see 3.5 for more information);
  - Data sets of designations from Historic England's National Heritage List for England; and
  - Conservation areas have recently become available as a data download from Historic England. Data for conservation areas was cross referenced with the local authority websites to ensure accurate data was used.
- 3.3.3 The results of the targeted walkover survey and setting assessment was used to supplement the existing baseline datasets.

## 3.4 Data Presentation

- 3.4.1 Known non-designated heritage assets and conservation areas identified from the sources listed above are referenced using a consistent Project specific identification number in the Baseline Report and ES. The preferred identification number (HER number) from the originating organisations will be provided in a gazetteer accompanying the Baseline Report for cross reference. Designated assets are referenced by their National Heritage List Entry numbers. Descriptions of the heritage assets are reproduced in the appended gazetteer to the Baseline Report.
- 3.4.2 To aid understanding of the thematic approach and landscape context, a second level of Project ID has been provided in the Baseline Report. This group ID, identifies relationships between individual heritage assets, where they have a shared context.
- 3.4.3 Presentation within the Baseline Report has been split based on archaeology, built heritage and historic landscape characterisation. Embedded within this is a further split in discussion based on geographical route areas, which aids discussion and marks areas of relevant interest for heritage officers responsible for the stewardship of specific areas of the Project.
- 3.4.4 Individual and group IDs used are presented as shown in Table .

Table 3.1: Proposed Gazetteer Headings

Project ID	Source Ref	Name	Monument Type	Period	Easting	Northing	Asset Group
1	HER ID	Coin	Findspot	Roman	X	Y	N/A
2	HER ID	Farm 1	Farm	Post Medieval	X	Y	G1
3	HER ID	Outfarm to Farm 1	Outfarm	Post Medieval	X	Y	G1
4	HER ID	DMV	Site of	Medieval	X	Y	N/A

- 3.4.5 Asset groupings and individual heritage asset data sets have been illustrated on accompanying figures to the Baseline Report. The figures support the presentation of discussion thematically.

## 3.5 Aerial imagery for assessment and the scoping of walkover survey

- 3.5.1 The first use of the aerial imagery included the identification of potential heritage assets through an assessment of cropmarks and identification of earthwork features.
- 3.5.2 The aerial imagery was provided to the team as a model, akin to a form of photogrammetry recording of the landscape. The models were used alongside other data sets to further understand any given asset's relationships within the landscape and aid the consideration of archaeological potential.

- 3.5.3 Areas of archaeological interest and identified heritage assets were mapped in GIS, against their location on the model and incorporated into the wider Project GIS data set and gazetteer to contribute to assessment. Identified areas of archaeological interest were further assessed during walkover survey, as discussed below.

## 3.6 Scoping of Walkover Survey

- 3.6.1 Walkover survey was targeted, with areas scoped in or out for site visits to aid a proportionate approach to assessment. Scoping of the targeted walkover focused on areas of perceived limited modern disturbance and areas not so densely vegetated as to obscure the ground surface and local topography. The scoping of areas visited was data led and where ground truthing of the conditions of heritage assets was perceived to be possible. The determination of areas for walkover was undertaken at the earliest opportunity to inform the assessment process.
- 3.6.2 The aerial imagery data was used to analyse where walkover survey provided value to the baseline understanding of the Project. The aerial imagery was useful as a reflection of the most up to date ground conditions within the Route Corridor.
- 3.6.3 The scoping exercise used a holistic understanding of the current site conditions, driven by what is visible on the aerial imagery, and recorded heritage assets, along with professional judgement. The purpose of the walkover survey was to add to the understanding of the historic environment conditions for the baseline and not to catalogue existing conditions of modern farming practice on a field-by-field basis.
- 3.6.4 The following rationale was therefore, applied to the process of scoping areas in or out of the walkover survey:

### Areas scoped out of walkover survey:

- Areas of existing infrastructure, industrial complexes, private gardens, or areas of hardstanding where only observations of modern disturbance would be available on site and the character of the area has been altered. It is unlikely that areas such as these would be physically affected by the Project but even if they were walkover survey would not provide suitable information to inform impact assessment due to the previous changes to the land
- Areas of dense woodland or thick scrubland where identification of any potential earthworks would be difficult and where these areas would not be physically affected by the Project
- Fields which have been subject to previous archaeological investigations, such as geophysical survey or excavation – a walkover survey would not be able to supplement information on heritage assets supplied by intrusive fieldwork
- Fields in very close proximity to houses or surrounded by woodland for a similar proportionate approach that the Project will need to provide a suitable buffer for safety. The ES will set out the approach taken on a case-by-case basis
- Areas removed from the Project, following consultation led changes and/or refinement of design, which are not yet surveyed

### **Areas scoped in for survey:**

- Fields with monument records to ground truth the condition of the asset
- Fields within the Route Corridor in close proximity to a designated heritage asset for the purpose of supporting setting assessment
- Fields where potential assets or activity of interest have been identified through LiDAR or the aerial imagery
- Grassland, identified through the aerial survey, where there is a greater potential to identify any earthworks through probable limited disturbance from agricultural activity

- 3.6.5 Where a field does not meet any of the above, the field was scoped out for walkover survey. The Route Corridor is principally arable fields and it is acknowledged that there are limitations in identifying features of archaeological interest within ploughed fields due to modern agricultural practices, which are likely to have truncated or removed above ground earthworks or other evidence of heritage assets. While it is acknowledged that artefacts brought to the surface from ploughing have the potential to provide evidence for the location of archaeological sites, the purpose of the walkover survey was to ground truth site conditions and not to conduct a systematic fieldwalking exercise.
- 3.6.6 The final data set of assets identified and ground truthed through walkover is incorporated in the main baseline and gazetteer, discussed in section 3.7.
- 3.6.7 It is estimated that approximately 50% of the proposed Route Corridor has been visited, but the exact area will be determined through the analysis of the aerial imagery and the agreement of land access.

### **LiDAR**

- 3.6.8 During the flight for aerial imagery, a Digital Terrain Model (DTM) and Digital Surface Model (DSM) of the flight corridors was collected. Both the DTM and DSM was processed in GIS to create hill shade models for the identification of archaeological features.
- 3.6.9 The DTM and DSM models are available at 25cm resolution. Each DTM and DSM was processed into several hill shades with variation in either the Azimuth (Angle) and or the Altitude (Height). Processing of different hill shades is to allow for the best opportunity to identify archaeological features, which may show up in certain hill shade processes.
- 3.6.10 The LiDAR data was assessed to identify features of potential archaeological interest, as either new heritage assets for the baseline or to supplement knowledge of existing heritage assets.

## **3.7 Walkover Survey Methodology**

- 3.7.1 The walkover survey involved visiting scoped in areas, to assess the presence of any visible areas of past human activity.
- 3.7.2 The analysed data used to scope areas into assessment was available to surveyors in the field, including the original aerial imagery. Surveyors used of an iPad that has a GIS app installed, where up to date baseline data is available and the latest Project

information also displayed to consider all elements of the assessment together in the field.

- 3.7.3 The GIS allows surveyors to make accurate digitised records of observations, as well as taking geo-referenced photos for later use in the office. The information recorded using the GIS platform on the iPad can be easily pulled from the platform and integrated into the main GIS data set for use in the remaining assessment and presentation.
- 3.7.4 Any observations of perceived archaeological interest by surveyors, in addition to the already known assets from other sources, has been added to the Project gazetteer and reported in the Baseline Report. The principal detail of observations from the walkover survey has formed an annex to the Baseline Report, with appropriate, proportionate supplementary information to the main narrative included in the main body of the Baseline Report.

## 3.8 Scoping of Historic Buildings

- 3.8.1 In order to provide a proportionate assessment and due to the large number of listed buildings and non-designated historic buildings within the study areas, a scoping method was applied to determine which listed buildings were taken forward for assessment. At this stage of the Project, it is anticipated that there will be no direct physical impacts on any listed buildings and non-designated historic buildings as a result of the Project. Therefore, the scoping exercise was based on which buildings are likely to experience any change to their settings resulting from the Project, during either construction or operation.
- 3.8.2 The following principals were applied to scope listed buildings and non-designated historic buildings into or out of assessment. Any listed building and non-designated historic buildings identified as having relevant historic interest within the Project development boundary were automatically scoped into assessment.
- 3.8.3 Scoped out were:
- Listed buildings and non-designated historic buildings beyond the 250m study area that are outside the ZTV, as at this distance from the Project the only change to setting is likely to be visual and therefore a lack of visibility of the Project would mean that no change to setting would occur
  - Listed buildings and non-designated historic buildings that are of a type that have a restricted setting due to their inherent characteristics. This group included but was not limited to, milestones, railway stations, road and rail bridges, and gravestones/markers/tombs within churchyards
  - Listed buildings and non-designated historic buildings that are located within settlements and do not have settings that extend beyond the urban area and where the Project will not introduce new infrastructure into this setting. This required assessment to check that any listed buildings in this category with settings that extend to the Project were included in assessment. This was done based on the listed building name, to understand its broad type, and its location. It was assumed that domestic buildings, shops, public houses etc have settings that are informed by their settlement location and do not extend beyond this

- Listed buildings and non-designated historic buildings that are separated from the Project by other major infrastructure (e.g., motorways, major dual carriageways active mainline railways) where it can be reasonably concluded that this infrastructure is a pre-existing barrier that the setting of a building will not extend beyond
- Listed buildings and non-designated historic buildings within Tilbury Docks whose function and significance is derived from the activities of the docks and does not extend beyond the geographical limits of the dockyard to the extent the Project will not introduce new infrastructure into this setting
- Listed buildings and non-designated historic buildings that are separated from the Project by the Bramford, Norwich Main and Tilbury Substations as these structures represent a significant visual impact within the setting of assets that the addition of overhead lines beyond will not create appreciable change. Cumulative likely significant environmental effects will be assessed as part of the ES

- 3.8.4 The above assumptions were kept under review to establish whether there is a need to alter the scoping out thresholds and approach taken. A reasonable proportionate approach was adopted.
- 3.8.5 The buildings within the 2 km study area that are scoped out are listed in an appendix to the Baseline Report. Any buildings that are not scoped out for the above reasons are included in assessment.
- 3.8.6 There were situations in which buildings outside the 2km study area are scoped in, specifically those of high significance (scheduled monuments, grade I and II\* listed buildings and grade I and II\* registered parks and gardens), and where they have a historical and/or functional relationship with a scoped in building within the 2km study area or where landscape and visual assessment indicates the Project would be a prominent visual feature. Listed buildings located immediately adjacent to construction access routes have been included in the assessment. It has been assumed that construction access routes will not be routed through conservation areas.

## 3.9 Settings Assessment

- 3.9.1 The site visit included a settings assessment. The following criteria for settings assessment were used for visiting assets:
- Designated heritage assets (scheduled monuments, registered parks and gardens, listed buildings and conservation areas) located within the 2 km study area, and any variation to this, defined for their assessment
- 3.9.2 Recording of observations for the settings assessment, including a photograph record, were undertaken using the same GIS application outlined in Section 3.7. Access to undertake the setting assessment was principally from publicly accessible areas/paths. In cases where this access did not allow appropriate assessment, access to private land was requested.
- 3.9.3 The contribution that setting makes to significance was determined with reference to Historic England's guidance. The assessment of setting utilised the 'five-step' approach given in part 2 of the good practice advice (GPA3) note (Historic England, 2017).

- 3.9.4 Assessment considered the setting of both built heritage and buried archaeology. This assessment was principally carried out on site, whilst experiencing the setting, and reported on in the Baseline Report, where appropriate.
- 3.9.5 The assessment of curtilage was not a standard consideration alongside setting, and therefore not applied across the Project study area. Design principles to avoid physical impacts to listed buildings and built structures resulted in the avoidance of any land immediately surrounding buildings. Therefore, curtilage was not a relevant factor during assessment.

## 3.10 Assigning value to Heritage Assets

- 3.10.1 Based on the understanding of heritage assets, including their group context within the landscape, an assessment of value was provided within the Baseline Report.
- 3.10.2 Value was provided for individual assets, not groups, but the value accounted for the contribution the asset makes to the group and vice versa for the contextualisation of the asset in relation to others.
- 3.10.3 The value of a heritage asset was derived from the asset's ability to illustrate one or more of the Conservation Principles, described in the 2008 Historic England document, 'Conservation Principles, Policies and Guidance for the Sustainable Management of the Historic Environment' (Historic England , 2008 ).
- 3.10.4 Use of the conservation principles also met emerging recent guidance for cultural heritage impact assessment, which advocates for:
- 'A separate description stage that should ensure that the analysis of cultural significance, which follows, actually articulates the key cultural heritage values that are recognised in the asset and is not simply a description of all of the components of the asset'* (CIFA; IEMA; IHBC, 2021).
- 3.10.5 As discussed in section 3.8, the contribution of setting to the significance of a heritage asset was also considered as part of the assessment of value within the Baseline Report.
- 3.10.6 Accounting for the value of a heritage asset through their ability to demonstrate one or more conservation principles, the contribution of setting, and professional judgement, the following criteria was used for assigning value:

Table 1.2: Heritage Value Assessment Criteria

Value	Criteria for Norwich to Tilbury
Very High	World Heritage Sites (including nominated sites) inscribed for their cultural heritage importance Assets that can contribute significantly to acknowledged international research objectives Assets of acknowledged international importance
High	Scheduled Monuments (including proposed sites) Grade I and II* Listed Buildings

Value	Criteria for Norwich to Tilbury
	<p>Grade I and II* Registered Parks and Gardens</p> <p>Registered Battlefields</p> <p>Protected Wrecks</p> <p>Conservation Areas containing buildings of predominantly high value</p> <p>Non-designated assets of the quality and importance to be designated</p> <p>Assets that can contribute significantly to acknowledged national research objectives</p>
Medium	<p>Grade II listed buildings</p> <p>Grade II Registered Parks and Gardens</p> <p>Conservation Areas containing buildings of predominantly medium value</p> <p>Assets that contribute to regional research objectives and/or have exceptional quality in their fabric or historical associations</p>
Low	<p>Locally listed buildings, or those of equivalent quality in their fabric or historical associations</p> <p>Assets of local importance</p> <p>Assets compromised by poor preservation and/or poor survival of contextual associations</p> <p>Assets of limited value, but with potential to contribute to local research objectives</p>
Negligible	<p>Assets with very little or no surviving archaeological/historical interest</p> <p>Buildings of no architectural or historical note</p> <p>Buildings of an intrusive character</p>
Unknown	<p>The importance of the resource has not been ascertained/is inaccessible</p>

- 3.10.7 The value of the heritage asset, assigned in the Baseline Report, will be carried into the ES for discussion of impact and proportionate mitigatory measures, discussed further in Sections 0 and 0 of this document.

### 3.11 Archaeological Potential

- 3.11.1 Using the baseline thus determined, the Baseline Report that will accompany the ES will present an understanding of the likelihood for hitherto undiscovered archaeological

remains to be present within the Route Corridor. Historic and modern impacts that might potentially have degraded the archaeological resource have been examined to assist in this process.

- 3.11.2 The assessment of archaeological potential will identify the likelihood of the presence of unidentified archaeological remains based on an analysis of the available data sets, previous archaeological findings within the study area and professional judgement. This will be supplemented with mapping of activity to geological and topographical landscape features/zones. Discussion of archaeological potential required a holistic approach from baseline assessment to predicting patterns of past activity.
- 3.11.3 This section will include a narrative about the nature of the archaeological resource along the route by location and period. This will be essential in aiding the understanding of the nature of human activity since the prehistoric period, the evolving nature of settlement and exploitation of the landscape, the way in which past communities have harnessed local resources and consequently the way in which surviving archaeological remains reflect these activities.
- 3.11.4 In the Baseline Report that will accompany the ES archaeological potential will be classified as:
- High for areas where there is a strong likelihood of finding archaeological remains of a given period or type
  - Medium for areas where there is a likelihood of finding archaeological remains of a given period or type
  - Low for areas where there is little likelihood of finding archaeological remains of a given period or type
- 3.11.5 It is intended that as part of a staged approach to assessment, the Baseline Report to accompany the ES, particularly the archaeological potential section, will be used to discuss potential further assessment work. The scoping of further works would be led by a series of research questions to tailor a proportionate and targeted approach to the gaps in our understanding, following the Baseline Report. Therefore, any results from such further assessment will be captured in an update of the ES baseline and or the mitigation strategy, dependent on the programme of this work.

## **3.12 Archaeological Fieldwork**

- 3.12.1 The understanding gained from the Baseline Report will be used to inform further discussion between the Project and heritage consultees with regards to the requirement for potential further fieldwork to inform the baseline understanding and assessment.
- 3.12.2 The overriding aim of all fieldwork will be to target insufficient information in the baseline, as outlined in EN-1, paragraph 5.9.11 in locations that would be physically affected by the Project.
- 3.12.3 Due to the scale of the Project, initial discussion with statutory heritage consultees will be sought to agree parameters for prioritising archaeological fieldwork. It is proposed that those areas of the Project that would experience the greatest impact, including the section of underground cable, new substation and CSE compounds, will be prioritised. Further discussions between the Project and heritage consultees will develop a strategy for proportionate fieldwork to inform the baseline and assessment.

# 4. Approach to Impact Assessment

## 4. Approach to Impact Assessment

- 4.1.1 In establishing impact, the Overarching National Policy Statement for Energy (EN-1) (Department for Energy Security and Net Zero, 2024) the following discussion:
- ‘In considering the impact of a proposed development on any heritage assets, the Secretary of State should consider the particular nature of the significance of the heritage assets and the value that they hold for this and future generations. This understanding should be used to avoid or minimise conflict between their conservation and any aspects of the proposal’.*
- 4.1.2 There is no consistent methodology adopted for cultural heritage for assessing impacts on historic environment assets as part of an EIA, particularly for energy proposals. However, the International Council on Monuments and Sites (ICOMOS) have published guidance on Heritage Impact Assessments for Cultural World Heritage Properties (ICOMOS, 2011).
- 4.1.3 There is also recent guidance from CIFA, Institute of Historic Building Conservation (IHBC) and Institute of Environmental Management and Assessment (IEMA), through the July 2021 document ‘Principles of Cultural Heritage Impact in the UK’. The guidance notes that:
- ‘The magnitude of the impact on cultural significance needs to be assessed. A distinction needs to be drawn as to whether the change will result in only a ‘small’ impact on, say just one component of cultural significance or whether the change would have a greater impact on the totality of cultural significance. The terms ‘large’ ‘medium’ or ‘small’ are acceptable or any other simple scale that offers a form of gradation easily articulated in a written report’ (CIFA; IEMA; IHBC, 2021).*
- ‘A simple graded scale of effects should be defined and applied. However, decisions regarding the acceptability of the proposal will often require the effect to also be articulated within the parameters of the relevant legislative or policy tests that use their own specific language and terminology. For instance, in Environmental Impact Assessment, an impact can result in a significant or non-significant effect’ (CIFA; IEMA; IHBC, 2021).*
- 4.1.4 Although no fixed assessment methodology is provided in the National Policy Statement for Energy (EN-1) (Department for Energy Security and Net Zero, 2024) the ES will be carried out in line with the direction of the document which underpins the 2008 Planning Act.
- 4.1.5 Where there is any potential for an impact to a heritage asset resulting from the Project, these assets will be assessed in full in the ES. This assessment will utilise the assessment of value assigned to heritage assets in the Baseline Report and will assign a magnitude of impact in line with the most up to date design information for the Project.
- 4.1.6 Potential impacts to heritage assets could arise from construction activity, including creation and use of access routes and traffic management, site compounds and working/storage areas, and the operational presence of the overhead line and associated infrastructure. In addition, the potential impact of other environmental

mitigation, such as ecological habitat creation or landscape planting, will be assessed for any impact to heritage assets.

- 4.1.7 Accounting for the above discussion, the following terminology for describing the magnitude of impact, is presented in Table 2.1.

Table 2.1: Criteria for quantifying the magnitude of impact to heritage assets

Magnitude of Impact (term)	Criteria of impact
High	<p>Change to most or all key archaeological materials, such that the resource is totally altered</p> <p>Comprehensive changes to setting of archaeology or built heritage</p> <p>Change to key historic building elements, such that the resource is totally altered</p>
Medium	<p>Changes to many key archaeological materials, such that the resource is clearly modified</p> <p>Considerable changes to setting that affect the character of the asset</p> <p>Change to many key historic building elements, such that the resource is significantly modified</p> <p>Changes to the setting of an historic building, such that it is significantly modified</p>
Low	<p>Changes to key archaeological materials, such that the asset is slightly altered</p> <p>Slight changes to setting</p> <p>Change to key historic building elements, such that the asset is slightly different</p> <p>Change to setting of an historic building, such that it is noticeably changed</p>
Negligible	<p>Very minor changes to archaeological materials, or setting</p> <p>Slight changes to historic building elements or setting that hardly affect it</p>
No change	No change

- 4.1.8 Following an assessment of the magnitude of impact, mitigation measures may be proposed (discussed further in Section 0).
- 4.1.9 The significance of effect is expressed as a result of the value of the heritage asset and the magnitude of impact it would experience as a result of the Project. The significance

will be expressed as major, moderate, minor, negligible or neutral and can be adverse or beneficial. The matrix for reporting of significance of effect is outlined in 4.2, adapted from '*Heritage Impact Assessments for Cultural World Heritage Properties*' (ICOMOS, 2011).

Table 4.2: Significance of Effects Matrix

		Value of Heritage Asset				
		Very High	High	Medium	Low	Negligible
Magnitude of impact	High	Major	Major	Major to moderate	Moderate to Minor	Minor
	Medium	Major to Moderate	Major to Moderate	Moderate	Minor	Negligible
	Low	Major to Moderate	Moderate to Minor	Minor	Negligible	Negligible
	Negligible	Minor	Minor	Negligible	Negligible	Neutral
	No Change	Neutral	Neutral	Neutral	Neutral	Neutral

- 4.1.10 The matrix will be used as a check to ensure that judgements on value, magnitude of impact and significance of effect are balanced, but in all cases professional judgement will be used and the value and impact judgements will be revisited if the significance of effect is unreasonable.

# 5. Mitigation

## 5. Mitigation

- 5.1.1 Proposed mitigation measures will be proportionate to the level of impact and the value of the heritage asset. The need for a proportionate approach is outlined in the 2021 CIFA/IEMA/IHBC document which states:
- ‘The process should be proportionate to the importance of the cultural heritage assets being assessed. It should recognise the scale of the proposal and the potential magnitude of the impact’ (CIFA; IEMA; IHBC, 2021).*
- 5.1.2 A draft Archaeological Mitigation Strategy and Outline Written Scheme of Investigation (WSI) will accompany the DCO application where an understanding of required mitigation measures will be located. It is intended that the draft mitigation strategy will remain a live document throughout the examination phase of the DCO application, to capture any changes in baseline understanding, impact and therefore required mitigation following delivery of any fieldwork results post DCO submission.
- 5.1.3 Additional heritage input will also be made to central Project documents such as the Code of Construction Practice (CoCP) to ensure appropriate mitigation measures are secured in the DCO for both archaeology and the built historic environment, where appropriate.

# 6. Summary

## 6. Summary

- 6.1.1 This document presents the proposed approach to the historic environment input into the DCO application for Norwich to Tilbury, and we would welcome feedback on its content.
- 6.1.2 The focus has been on the methodology for baseline data gathering, including sources of information. In addition, methods of capturing and presenting the data in the Baseline Report have also been presented.
- 6.1.3 The approach to the historic environment input to the DCO application for the Project is presented as a staged approach to assessment. The Baseline Report will inform the current understanding of the historic environment, identifying gaps in knowledge and the need for targeted further assessment.

---

# 1. Introduction

- 1.1.1 This Annex presents the write up of the cultural heritage walkover survey for the Norwich to Tilbury Project. The walkover survey has been conducted to aid the baseline understanding of the historic environment, within the draft Order Limits.
- 1.1.2 The aims of the walkover survey were to:
- Ground truth the current conditions of the land within the draft Order Limits
  - Where possible, identify the rate of survival of heritage assets
  - Identify any previously unrecorded heritage assets within the draft Order Limits
  - Identify areas of modern disturbance which may have impacted the survival rate of any known and or yet unidentified archaeological remains
- 1.1.3 The survey was conducted on a field-by-field basis, however, a targeted approach has been adopted to support a proportionate level of assessment. Details of the scoping mechanism used to determine which fields were targeted, are presented in Annex C of this Baseline Report. The walkover survey was supported by an aerial survey of the route, including the production of 3D models.
- 1.1.4 Future updates to the Baseline Report will contain a figure presenting the coverage of the walkover survey, including fields scoped in and accessed; fields scoped in which the Project was not able to access; and fields scoped out of walkover survey.
- 1.1.5 The walkover to date was conducted over 11 weeks between 15 May 2023 and 8 September 2023. Due to the timing of the walkover survey, the survey commenced based on the Scoping Report Corridor. The Project design was refined on several occasions in 2023, most recently in December 2023 for the purposes of the PEIR and statutory consultation. As a result, additional areas of survey were assessed where programme and land access allowed, or some areas not yet surveyed were removed from scope as the survey progressed. Those areas of the PEIR draft Order Limits not yet assessed surveyed will be completed in 2024.
- 1.1.6 During this time, weather conditions varied. Consequently, ground conditions were also variable with saturated fields following heavy rain, including some areas of land which held large bodies of water.
- 1.1.7 Access across the site was principally on foot. Private land access was agreed through the Project Team, with some observations made from roads or through the use of public rights of way.
- 1.1.8 Setting assessment has also been undertaken, and discussion of the setting of heritage assets is located within the main structure of the Baseline Report.
- 1.1.9 The following section of the Annex present the results of the walkover survey. To aid understanding, the Project is split in to eight Sections:
- [Section A](#): South Norfolk Council
  - [Section B](#): Mid Suffolk District Council

- [Section C](#): Babergh District Council, Colchester City Council and Tendring District Council
- [Section D](#): Colchester City Council
- [Section E](#): Braintree District Council
- [Section F](#): Chelmsford City Council
- [Section G](#): Brentwood Borough Council and Basildon Borough Council
- [Section H](#): Thurrock Council

- 1.1.10 Each of the eight Sections are broken down further into smaller geographical sections. Reporting of observations is based on the general land formation, any observations of known heritage assets, discussion of previously unidentified heritage assets and identified areas of modern disturbance.
- 1.1.11 Where appropriate, observations from the walkover survey have been drawn into the baseline section of the principal section of this report. Heritage assets identified during the production of the baseline report have been given Project I.D. numbers and these are presented in bold type within parentheses e.g. (**101**) for non-designated assets. Listed buildings, scheduled monuments and registered parks and gardens are referred to by their National Heritage List Entry numbers. Conservation areas are identified by their name.

## 2. Results

### 2.1 Section A: South Norfolk

- 2.1.1 This section of the Project is approximately 30 km in length. It runs from the north of Keswick to the south of Roydon and Diss, bisecting the South Norfolk District north/south.
- 2.1.2 The land in this Section of the draft Order Limits is largely rural with most of the fields used for arable production. The land is mostly flat with some minor undulation. Field sizes vary and are mostly rectangular or square. There is a mix of field boundaries in the area, with the majority being drainage ditches, but there are also hedgerows, treelines and permissive boundaries marked only by a change of crop.
- 2.1.3 Outside the boundary of the draft Order Limits, the wider landscape is of a similar agricultural nature with scattered settlements and farmsteads. The larger settlements near the draft Order Limits include Roydon (as part of Diss), Tacolneston and Mulbarton. The landscape also includes travel, and telecommunication infrastructure, some of which transect the draft Order Limits.
- 2.1.4 Key aspects of Section A are:
- Widespread arable crop fields, with occasional pastoral fields for grazing livestock
  - Transport infrastructure routes including A140, A1066, B1113, B1077, water navigation routes (river Tas), National Rail infrastructure (the draft Order Limits runs along the railway line), and public rights of way (footpaths and bridleways)
- 2.1.5 To aid discussion, Section A is split into eight subsections:
- Subsection A1: Dunston to Long Lane (south of Mulbarton)
  - Subsection A2: Long Lane (south of Mulbarton) to Hapton Road (Hapton)
  - Subsection A3: Hapton Road (Hapton) to Northfield Road (east of Tacolneston)
  - Subsection A4: Northfield Road (east of Tacolneston) to the river Tas
  - Subsection A5: River Tas to Long Row
  - Subsection A6: Long Road to Heywood Road (Shelfanger)
  - Subsection A7: Heywood Road (Shelfanger) to Darrow Lane (Bressingham)
  - Subsection A8: Bressingham to Doit Lane/river Waveney

## **Subsection A1: Dunston to Long Lane (south of Mulbarton)**

### **Description of Landform**

- 2.1.6 Subsection A1 begins east of the Norwich Main Substation, west of Ipswich Road and the railway line linking Norwich to London. This area covers approximately 8 km of the draft Order Limits.
- 2.1.7 The draft Order Limits and wider landscape is generally flat with minimal undulation (Plate 1). The flat landscape allows for good visual inspection.
- 2.1.8 The field types are mostly a mix of crop and ploughed fields with some grassland and scrub fields, as well as some fields with horse paddocks. The field boundaries consist of treelines, ditches, hedgerows, with occasional banks, and wooden and electric fencing.

### **Plate 1: Flat arable field within the draft Order Limits, along Shotesham Road, looking south-east**

**Plate 2: Ploughed field to the west of Norwich Main Substation, looking north**

**Plate 3: Crop field, looking north-west**

**Plate 4: Recently planted field, looking south-east**

**Plate 5: Meadow, looking south-west**

## Plate 6: Cropped field, looking west

### Archaeological Features

#### Known Heritage Assets

- 2.1.9 A probable World War Two searchlight battery site (**1240**) can be identified on aerial photographs on a field situated to the west of the railway line and located adjacent to the National Grid Transformer Station. It encompasses an ovoid emplacement, believed to have been used for a searchlight, as well as a pillbox and several other military operational structures and huts. Although significant dismantling had occurred by April 1946, with only the pillbox and three small structures remaining, the site's historical significance remains noteworthy.
- 2.1.10 The Grade II Kenningham Hall (**1373056**), located north of Brickkiln Lane is visible from the draft Order Limits.
- 2.1.11 The site of the Humbleyard Hundred Moot, c. 330 m east of Gowthorpe Lane, now a high point in the landscape and within arable fields. The site of the Humbleyard Hundred Moot (**1122**), c. 330 m east of Gowthorpe Lane, now a high point in the landscape and within arable fields. It is situated where an 'arm' off the western side of the main route is proposed.
- 2.1.12 The site of a workhouse which is noted on the OS One Inch, 1885-1900 map is visible from a crop field within the proposed route, and an 'arm' off to the west of the proposed route cuts into the northern side of this group of buildings.
- 2.1.13 No other known heritage assets were visible during the walkover of Subsection A1 of the draft Order Limits.

**Plate 7: Kenningham Hall (1373056, left), looking north**

**Plate 8: Views to the west from the Humbleyard Hundred Moot Point (1122), looking west**

## Plate 9: Views from a crop field to ‘The Vale’, looking north-west

### Unrecorded Heritage Assets

- 2.1.14 There is a wetland surrounded by humps with undulations as well, in a field belonging to Kenningham Hall (**1373056**) (Plate 10). It is located c. 150 m north-east from a solar panel farm/area and east side of a private track. On the other side of this track, to the west, is a pond. This wetland may be a continuation of this pond, and the track in the middle would have been created subsequently.
- 2.1.15 Three ditches were witnessed to the north and south of the public footpath that cuts west to east beneath the Norwich Main Substation, c. 350 m east of the proposed route. These ditches are probable Medieval to post Medieval fishponds and are noted on an 1846 map of the Dunton Estate.
- 2.1.16 There was a north-east to south-west linear depression within a pasture field c. 250 m south of Brickkiln Lane which could indicate modern enclosure as the field is seen on the historic maps as one large one until modern day.
- 2.1.17 There is a raised copse in a paddock field which is the site of a historic pond, as seen on the OS Six Inch map 1888-1913.
- 2.1.18 No further unrecorded heritage assets were identified during walkover of Subsection A1. Some minor undulations were observed, believed to be either geological or associated with the farming practice of the area.

**Plate 10: Earthworks in a field south of Brickkiln Lane, looking east**

**Plate 11: Undulations in boggy field south of Brickkiln Lane, looking south**

**Plate 12: Probable medieval/post medieval fishpond channel, looking north**

**Plate 13: Probable medieval/post medieval fishponds south of the Norwich Main Substation, looking south-west**

**Plate 14: Linear west to east undulation, looking south.**

**Plate 15: North-east to south-west linear depression/furrow in pasture field, looking south-west.**

## Plate 16: Filled in pond, looking south-east.

### Modern Disturbance

- 2.1.19 The northernmost field in Section A, west of Ipswich Road, is adjacent to the National Grid Norwich Main Substation to the west and north. There is a depot area to the north-east of the field. There are pylons to the south of the field.
- 2.1.20 Other pylons run through some fields such like a field south of Church Road (Plate 17) or east of Ipswich Road. Other pylons run through some fields such like a field south of Church Road (Plate 17) or east of Ipswich Road ((Plate 18). These pylons come from the Norwich Substation.
- 2.1.21 In a field south of Brickkiln Lane, south of a solar farm, open archaeological evaluations were recorded (Plate 19).

**Plate 17: Pylons through a field located south of Church Lane, looking east**

**Plate 18: Pylons line through a field east of Ipswich Road, looking west**

**Plate 19: Open archaeological evaluation on a field south of Brickkiln Lane, looking south**

## Subsection A2: Long Lane (south of Mulbarton) to Hapton Road (Hapton)

### Description of Landform

- 2.1.22 Subsection A2 starts 700 m south of Mulbarton, west of Long Lane and east of Bracon Ash. This subsection runs north-east/south-west to Hapton Road and covers approximately 4 km of the draft Order Limits.
- 2.1.23 The land within this part of the draft Order Limits is rural in character consisting mainly of fields with scattered farmsteads. The topography of the draft Order Limits in this subsection is predominantly flat with a natural rise to the north (**Error! Reference source not found.**). It is also characterised by large fields of arable monoculture with long views and slopes and undulations.

The land within Subsection A2 is largely under agricultural production (Plate 21, Plate 22, Plate 24) with the occasional animal pasture field (Plate 23). The field boundaries vary, with drainage ditches, trackways, established treelines, and wire fences being employed.**Error! Reference source not found.**

### Archaeological Features

#### Known Heritage Assets

- 2.1.24 The farmyard, where are located the Grade II barn to Flordon Hall (**1050698**) and the Grade II Piggery 60 yards south of Flordon Hall (**1172231**), is visible from the draft Order Limits (**Error! Reference source not found.**). As for the Flordon Hall (**1050698**), it is not visible due to a tree line to its west.
- 2.1.25 A possible circular ditch is visible as crop marks on aerial photographs, in a field along Flordon Road and Norwich Road (**1038**). It is possible that it could be the remnants of a Bronze Age barrow. This could be a depressed area noted on the walkover survey (**Error! Reference source not found.**). In the same field a line of undulations was visible (Plate 22**Error! Reference source not found.**).
- 2.1.26 There were no further known heritage assets observed in Subsection A2 during the walkover survey.

**Plate 20: Farmyard with the Barn to Flordon Hall and Piggery 60 yards south of Flordon Hall, looking east**

**Plate 21: Possible circular ditch (1038, circled in red) is visible as a depression along Flordon Road and Norwich Road, looking south**

## Plate 22: Undulations visible in a field along Flordon Road and Norwich Road, looking west

### Unrecorded Heritage Assets

There are several depressions within this subsection of the Project. One was seen in a field on the north of Flordon Hall (**1050698**) (**Error! Reference source not found.**). In another area, directly in a field north of Fundenhall Road, was observed a north-south aligned ridge and furrow (

- 2.1.27 Plate 24).
- 2.1.28 During the walkover, an old railway line was observed west of Hapton. This old line is apparent on the First Edition Ordnance Survey of 1884 (Norfolk Sheet LXXXVI.SE).
- 2.1.29 There was a north-east to south-west linear depression in a ploughed field, c. 100 m south-west of Wymondham Road/Flordon Road.
- 2.1.30 No other unrecorded heritage assets were witnessed during the walkover survey.

**Plate 23: Depression in a field north of Flordon Hall, looking east**

**Plate 24: Possible ridge and furrow in a field north of Fundenhall Road, looking south**

**Plate 25: North-east to south-west linear depression in ploughed field, looking south.**

#### Modern Disturbance

- 2.1.31 A top-soil pile was witnessed during the walkover survey. The pile looked to be the soil from a hole which had been intentionally dug in the area next to the field entrance along Wymondham Road (Plate 26).
- 2.1.32 The area is principally agricultural in use and is subject to modern farming practices including large drainage ditches. There are several wood pole power lines across fields north of Flordon Road (Plate 27), north of Marsh Lane (Plate 28) and north of Hapton Road (Plate 29).

**Plate 26: A topsoil pile along Wymondham Road, looking north-east**

**Plate 27: Wooden utility poles in fields north of Flordon Road, looking north-east**

**Plate 28: Wooden utility poles in fields north Marsh Lane, looking north**

## Plate 29: Wooden utility poles in fields north Hapton Road, looking south-west

### Subsection A3: Hapton Road (Hapton) to Northfield Road (east of Tacolneston)

#### Description of Landform

- 2.1.33 Subsection A3 begins south of Hapton Road and goes south until Northfield Road. This area covers approximately 4 km of the draft Order Limits. North-east of this section is Hapton and the south is between Forncett St Mary (south-east) and Tacolneston (south-west).
- 2.1.34 The land use in this area is mostly crop fields with one instance of a recently ploughed field recorded at the time of the walkover survey for this subsection. The field boundaries in this subsection of the route are ditches, change of fields, hedges, roads, tree lines, and shrub lines/borders.
- 2.1.35 The topography in the northern part of this subsection features gentle undulations, gradually sloping from north to south before ascending again (Plate 30). The southern portion similarly exhibits undulations and occasional depressions (
- 2.1.36
- 2.1.37 Plate 31).

**Plate 30: Subsection A3 characterised by hilly landform, looking south**

**Plate 31: Undulation and depression in a field west of Stickfer Lane, looking north-west**

**Plate 32: Crop and ploughed field, looking south.**

**Plate 33: Cropped field, looking east.**

## Plate 34: Cropped field, looking west.

### Archaeological Features

#### Known Heritage Assets

- 2.1.38 Mary's Farmhouse (**1050076**) and its barn immediately north-west (**1302309**) are visible from the draft Order Limits (Plate 35).
- 2.1.39 St Mary's Cottage (**1178686**), Grade II, is visible from the draft Order Limits (Plate 36).
- 2.1.40 No further known heritage assets were observed in Subsection 1C during the walkover survey.

**Plate 35: Mary's Farmhouse and Barn Immediately North-West of Mary's Farmhouse, looking south**

**Plate 36: St Mary's Cottage, looking north-west**

### Unrecorded Heritage Assets

- 2.1.41 A large circular depression was recorded in a field along Stickfer Lane (Plate 37). This feature is apparent on aerial imagery.
- 2.1.42 A linear undulation area was observed on a field along Cheneys Lane, north of Mary's Farmhouse (across the road) and its barn as well as east of St Mary's cottage (Plate 38).
- 2.1.43 No further unrecorded heritage assets were observed within Subsection 1C during the walkover survey.

**Plate 37: Depression in ploughed field west of Stickfer Lane, looking north**

**Plate 38: Undulation line on a field along Cheneys Lane, looking north-west**

### Modern Disturbance

- 2.1.44 Modern disturbance in the Subsection A3 study area comprised communication infrastructure, in the form of wooden utility poles (Plate 39).
- 2.1.45 No other instances of modern disturbance was witnessed during the walkover survey.

**Plate 39: Phone line in the border of a field along Hapton Road, looking south-east**

## **Subsection A4: Northfield Road (east of Tacolneston) to River Tas/Fen Road**

### **Description of Landform**

- 2.1.46 Subsection A4 begins from the south of Northfield Road and runs in a north-east/south-west direction until the Tas river crossing Diss/Fen Road. This area covers approximately 4 km of the draft Order Limits.
- 2.1.47 The draft Order Limits in this subsection is rural, there is no close village or town. The topography of the northern part of this subsection is predominantly undulating (Plate 40), while the middle and southern parts are much flatter (Plate 41).
- 2.1.48 The field types are mostly a mix of crop, some are rapeseed, and meadow. The field boundaries consist of treelines, ditches, hedgerows, roads, with occasional banks.

### **Plate 40: Undulating general landscape in the northern part of subsection A4, looking south**

**Plate 41: Flat general landscape in the southern part of subsection A4, looking east**

**Plate 42: Crop field, looking south.**

**Plate 43: Mixed crop fields, looking west.**

**Plate 44: Scrub border of crop field, looking south-east.**

**Plate 45: Ploughed field, looking south.**

**Plate 46: Overgrown grassland, looking west.**

## Archaeological Features

### Known Heritage Assets

- 2.1.49 The yard of the Grade II Banyard's Hall (1373609) is visible from the draft Order Limits, from a field south of this listed building. This listed building is standing on a moat site which can also be seen from the draft Order Limits (Plate 47). The listed building and the moat site are apparent on the 1884 Norfolk Sheet XCVI.NE.
- 2.1.50 The Quarters Farmhouse, Grade II listed building, is visible from the draft Order Limits, from a field north of low common (Plate 48).

### Plate 47: Yard of Banyard's Hall, looking north

### Plate 48: Quakers Farmhouse, looking south-west

### Unrecorded Heritage Assets

- 2.1.51 The old avenue to the moat site, where the Banyard's Hall (1373609) is located, was visible during the walkover (Plate 49).
- 2.1.52 An unmaintained field boundary ditch was observed off Long Stratton Road (Plate 50). This ditch is visible on the 1884, Norfolk Sheet XCVI.NE with a small area with water at the east end of the ditch.

### **Plate 49: A tree lined avenue leading to Banyard's Hall (1373609), north of Prince of Wales Road, looking south**

**Plate 50: An unmaintained field boundary ditch off Long Stratton Road, looking east**

**Modern Disturbance**

- 2.1.53 Electricity infrastructure was visible during the walkover, with varying electric and telephone distribution poles crossing fields (Plate 51).
- 2.1.54 There was a shed or barn on the edge of an overgrown grass field c. 500 m south of Bunwell Hill.
- 2.1.55 No other modern disturbances were noted during the walkover survey.

**Plate 51: Wood pole power line, along Gilderswood Lane, looking north-east**

**Plate 52: Shed/barn structure on edge of overgrown grass field, looking north.**

## Subsection A5: River Tas/Fen Road to Long Row

### Description of Landform

- 2.1.56 This subsection begins at the River Tas, east of Diss Road/Fen Road in a mostly linear north to south direction to Long Row, covering c. 3 km of the draft Order Limits. This part of the draft Order Limits is very rural, with the nearest settlement, Tibenham, being c. 1.2 km east of the draft Order Limits at its closest point.
- 2.1.57 The landscape within this section of the proposed route is flat with minimal undulations. The land use is for crop production or grassland, with one instance of a meadow, with fields being a mix of regular and irregular shapes. The field boundaries in this section are ditches, hedgerows, tracks, occasional banks, and the river Tas in the northernmost field of this subsection.

### Plate 53: Grass field, looking west.

**Plate 54: Grass field, looking east.**

**Plate 55: Crop field, looking north-east.**

### Archaeological features

### Known Heritage Assets

- 2.1.58 The Old Hall, Grade II\* listed building (**1050563**), is 50 m east to the northernmost field of this subsection but a line of trees is limiting the view from the field.

## Unrecorded Heritage Assets

- 2.1.59 There was a west to east linear undulation observed in the northernmost field of this subsection, c. 50 m south of the River Tas (Plate 56).
- 2.1.60 The ruins of a building were noted during the walkover, in the field entrance of a crop field, on the corner of Diss Road/Mill Road, c. 920 m north of Black Barn Road. An L shaped building appears on the OS One Inch, 1885-1900 map and is still on the map by 1972 (OS 1:10,000/1:10,560, 1949-1972), and on Bing Maps as a building part of Manor Farm as of August 2023. The building is visible on Google Earth Pro from 1982 as ruins, and is at its clearest in 1999 and 2006, with much of the building covered with vegetation by 2022. The building foundations and the L shape is visible from aerial imagery as of August 2023. The building remains may be of significance with its association with the Manor House (**1179387**) and Low Farmhouse (**1373399**).
- 2.1.61 No other unrecorded heritage assets were discovered during the walkover.

### **Plate 56: Undulation line across the northernmost field of this subsection looking east.**

**Plate 57: remains of building, looking north-west.**

**Plate 58: Remains of building, looking east.**

## Plate 59: Building foundations.

### Modern disturbance

- 2.1.62 No modern disturbance was observed within the draft Order Limits, other than the current agricultural activity such as ploughing and harvesting.

## Subsection A6: Long Row to Heywood Road (Shelfanger)

### Description of Landform

- 2.1.63 This subsection of the walkover survey begins on the southern side of Long Row, c. 2.5 km north-east of Winfarthing, to Heywood Road c. 1 km south-east of Shelfanger, and follows a mostly-linear north to south route to towards the land to the east of Shelfanger. This subsection is c. 4.5 km of the draft Order Limits.
- 2.1.64 The topography in this subsection is flat with gentle undulations. Fields are large and regular shaped, and are used for arable crop production, with some ploughed fields. Field boundaries in this section are hedge, ditch, and treelines.

**Plate 60: Crop field, looking north.**

**Plate 61: Crop field, looking west.**

**Plate 62: Crop field, looking north-east.**

**Plate 63: Ploughed field, looking north-east.**

## Plate 64: Grassland adjacent to the Moated Site (1024), looking west

### Archaeological Features

#### Known Heritage Assets

- 2.1.65 The Site of the Winfarthing Great Park Medieval deer park is within the draft Order Limits and consists of c. 2 km north to south within the proposed route. The Site of the Winfarthing Great Park Medieval deer park (**1064**) is within the draft Order Limits and consists of c. 2 km north to south within the proposed route.
- 2.1.66 There is a possible medieval or post medieval moat (**1024**) c. 360 m north of Heywood Road, and c. 1 km east of Shelfanger within arable and grassland fields. The moat is very prominent in the landscape and has very deep ditches with established vegetation in and around it. The draft Order Limits pass through this moat.
- 2.1.67 No other known heritage assets were recorded during the walkover survey.

**Plate 65: Moat ditch (1024) with established vegetation, looking west.**

**Plate 66: Moated site (1024), looking north-west.**

**Plate 67: Site of Medieval deer park (1064), now a grass/crop field, looking north-east.**

**Plate 68: Site of Medieval deer park (1064), looking north-east from Heywood Road.**

### Unrecorded Heritage Assets

2.1.68 No unrecorded heritage assets were recorded during the walkover for this subsection.

## Modern Disturbance

- 2.1.69 There were overhead lines in crop fields c. 390 m east of Hall Road and c. 90 m north-west of Heywood Manor (**1049736**) noted during the walkover survey.
- 2.1.70 No other modern disturbances were discovered.

### Plate 69: Overhead lines in crop field, looking south.

## Subsection A7: Heywood Road (Shelfanger) to Darrow Lane (Bressingham)

### Description of Landform

- 2.1.71 This subsection begins in the field directly south of Heywood Road, c. 800 m south-east of Shelfanger, and ends at the fields to the east of Darrow Road, c. 700 m north-east of Bressingham. This part of the route makes up c. 3.5 km of the draft Order Limits and follows a north to south-west-ward curving route to Bressingham.
- 2.1.72 The land use in this subsection is predominantly crop, with varying size and shaped fields, with field boundaries consisting of a mix of treeline and hedges. The topography in this area varies from flat, undulating, and sloping upwards to the south-east in some fields.

**Plate 70: Crop field with gentle rise to south-east, looking south.**

**Plate 71: Crop field, looking north-west.**

**Plate 72: Crop field, looking north**

**Plate 73: Crop field, looking west**

## Plate 74: Wheat field, looking west

### Archaeological Features

#### Known Heritage Assets

- 2.1.73 No known heritage assets were witnessed during the walkover survey.

#### Unrecorded Heritage Assets

- 2.1.74 No unrecorded heritage assets were witnessed during the walkover survey.

#### Modern Disturbance

- 2.1.75 Modern debris including pottery was witnessed during the walkover in an entrance to a crop field c. 1 km east of Shelfanger Road.
- 2.1.76 Concrete debris in crop field entrance c. 1.1 km east of the B1077.
- 2.1.77 No other modern disturbances were witnessed during the walkover survey.

**Plate 75: Pottery and modern debris in an entrance to a crop field.**

**Plate 76: Concrete debris in field entrance.**

## Subsection A8: Darrow Lane, Bressingham to Doit Lane/river Waveney

### Description of Landform

- 2.1.78 This subsection begins in the fields to the west of Darrow Lane, c. 620 m east of Bressingham and follows a curvilinear route to the river Waveney off Doit Lane c. 760 m south-west of Roydon. The route here follows the landscape between the settlements of Bressingham to the west and Roydon to the south-east.
- 2.1.79 The landscape in this section is flat with occasional minor undulations with are geological rather than archaeological. The field uses are crop, meadow, possible water meadow (in the southern-most end), and recently ploughed. Field sizes and shapes vary, and their boundaries are hedge, ditch, treeline, or track.

### Plate 77: Grassland, looking north-east.

**Plate 78: Paddock and meadow, looking west.**

**Plate 79: Grassland, looking north-west.**

**Plate 80: Scrub field, looking north-east.**

**Plate 81: Raised bank as a border for a crop field, looking north-east.**

#### Archaeological Features

#### Known Heritage Assets

2.1.80 No known heritage assets were witnessed during the walkover survey.

#### Unrecorded Heritage Assets

2.1.81 No unrecorded heritage assets were recorded during the walkover survey.

#### Modern Disturbance

2.1.82 No modern disturbances were witnessed during this subsection of the route.

## 2.2 Section B: Mid Suffolk and Babergh

- 2.2.1 This section of the Project is approximately 41 km in length and covers the area from the south of Diss to Finningham. The A1066 bounds the draft Order Limits to the north, the A143 cuts through east to west, and the north-east to south-west railway line bounds the draft Order Limits to the east, cutting through Site between Gislingham and Finningham in the southern-most part of this section.
- 2.2.2 The land within the draft Order Limits and study area is mostly rural and agricultural land which is flat with minimal undulation. This allows for good visual access to the fields within the draft Order Limits. Field sizes vary and many of the field shapes are irregular. The field types are varied: crop, ploughed field, Meadow, and scrubland were recorded. The field boundaries consist of ditches, hedgerows, occasional instances of a change of crop, fencing, and/or trackways.
- 2.2.3 Outside of the draft Order Limits, the landscape is rural with scattered settlements and farmsteads. The largest settlement in this section, Diss, and its associated Conservation area, are, at its closest, c. 700 m north-east of the draft Order Limits. Wortham Ling, a Site of Special Scientific Interest, which is an expansive area of flat scrubland, is to the west of subsection B1. The landscape is mostly flat, with occasional gentle hills and slopes, and travel infrastructure including the railway line, the A143, and many B roads are in the wider area.
- 2.2.4 The walkover survey was conducted in bright, warm, and occasional overcast weather.
- 2.2.5 For ease of understanding, this section has been divided into 14 subsections:
- Subsection B1: River Waveney/Ling Road to Old Bury Road (Wortham)
  - Subsection B2: Wortham to Mellis Road
  - Subsection B3: Mellis Road to Gislingham
  - Subsection B4: Gislingham to Wickham Road.
  - Subsection B5: Wickham Road to Mendlesham Road (north)
  - Subsection B6: Mendlesham Road (south) to Cay Hill
  - Subsection B7: Cay Hill (south) to Bells Lane
  - Subsection B8: Bells Lane (south-west) to A14.
  - Subsection B9: A14 to Hill House Lane
  - Subsection B10: Hill House Lane (south) to Ipswich Road, Ringshall Stocks
  - Subsection B11: Ipswich Road, Ringshall Stocks (south) to Castle Road, Offton
  - Subsection B12: Castle Road, Offton (south) to Blood Hill
  - Subsection B13: Blood Hill (east) to Tye Lane
  - Subsection B14: Tye Lane (south) to Burstall Lane (North)

## Subsection B1: River Waveney/Ling Road to Old Bury Road (Wortham)

### Description of Landform

2.2.6 This subsection of the walkover report begins on the southern side of High Road, Roydon along the north to south Doit Lane. Here, the draft Order Limits curve to the east in a half-moon shape to the east of Wortham Ling and straighten out at the bottom of the subsection on the northern side of Old Bury Road, east of Wortham. This subsection covers c. 4 km of the draft Order Limits.

The draft Order Limits and the wider landscape is mostly flat with minimal undulation or hills, this has allowed for good visual inspection. Land use in this subsection is crop, grassland, and one instance of a meadow. The field sizes vary in shape and size, with many being large and irregularly shaped. The field boundaries in this subsection are hedgerow, ditch, treeline, and fencing.

### Plate 82: Grass field, looking south-west

**Plate 83 Paddock, looking north-west.**

**Plate 84: Crop field, looking south.**

**Plate 85: Crop field, looking west.**

**Plate 86: Crop field with east-to-west rise in landscape.**

### Archaeological Features

### Known Heritage Assets

2.2.7 No known heritage assets were witnessed during the walkover survey.

### Unrecorded Heritage Assets

2.2.8 A raised linear north-east to south-west ridge was noted during the walkover survey, in a crop field c. 25 m east of Marsh Lane.

2.2.9 No other unrecorded heritage assets were witnessed during the walkover survey.

## Plate 87: Raised linear ridge in crop field, looking south-east.

### Modern Disturbance

- 2.2.10 No modern disturbance was recorded during the walkover survey.

### Subsection B2: Wortham to Mellis Road

#### Description of Landform

- 2.2.11 This subsection begins on the southern side of Old Bury Road, c. 500 m east of Wortham Conservation Area to the northern edge of Mellis Conservation Area along Mellis Road. This subsection begins on the southern side of Old Bury Road, c. 500 m east of Wortham Conservation Area to the northern edge of Mellis Conservation Area along Mellis Road. The draft Order Limits are slightly curved to the east between the settlements of The Brook, Burgate, Thrandeston, and Mellis. This subsection is c. 2.5 km of the draft Order Limits.
- 2.2.12 The land in this subsection consists of crop fields of varying sizes and shapes, with the land being used primarily for arable crop, and occasionally meadows. The field boundaries used in this area are hedgerow, ditch, trackways, and in two instances, Mellis Road.

**Plate 88: Meadow, looking north**

**Plate 89: Crop in field, looking south-east.**

**Plate 90: Crop in field, looking south**

**Plate 91: Crop field with scrub border, looking south-west.**

**Plate 92: Crop field, looking north.**

**Plate 93: Crop field with meadow border, looking south.**

## Archaeological Features

### Known Heritage Assets

- 2.2.13 There is a medieval moat in a grass field c. 800 m east of Mellis Road, and c. 1.6 km south-east of Wortham. There is a medieval moat (**2260**) in a grass field c. 800 m east of Mellis Road, and c. 1.6 km south-east of Wortham. There were undulations in this field which may be indicative of the moat and were seen during the walkover survey.
- 2.2.14 The possible Roman Road (**2113**), which runs north-west to south-east, transects through a large, rectilinear crop field which had an undulating topography. This field is adjacent to Dam Lane, north-west of Mellis Conservation Area.

### Plate 94: Field in which there is a moat (2260), looking east.

**Plate 95: Field with Roman Road (2113) running north-westerly through (circled), looking north.**

2.2.15 No other known heritage assets were recorded during the walkover survey.

#### Unrecorded Heritage Assets

- 2.2.16 There was a raised mound in a grass field c. 200 m south of Bury Road, due east of Rookery Farm.
- 2.2.17 There were possible ridge and furrow undulations c. 300 m south of Bury Road, due south of Rookery Farm.
- 2.2.18 There were circular and linear depressions in a grass field c. 200 m south of Bury Road.
- 2.2.19 There was a circular depression in crop field c. 1.1 km south of Bury Road.
- 2.2.20 No other unrecorded heritage assets were witnessed during the walkover survey.

**Plate 96: Raised mound in grass field south of Bury Road, looking north.**

**Plate 97: Possible ridge and furrow, looking east.**

**Plate 98: Circular and linear depressions in grass field, looking east.**

**Plate 99: Circular depression, looking south.**

### **Modern Disturbance**

2.2.21 No modern disturbances were recorded during the walkover survey.

## Subsection B3: Mellis Road to Wickham Road, Wickham, Skeith

### Description of Landform

- 2.2.22 This subsection of the walkover survey report begins west of Mellis Road and Mellis Conservation Area, and heads south past Gislingham on the eastern side, to Wickham Road, Wickham Skeith. This section of the draft Order Limits is c. 5 km of the proposed route.
- 2.2.23 The land use in this section is mostly for arable crop production with many of the fields in crop at the time of the survey. There was one instance of a mixed crop and ploughed field in the southern end of this subsection. The fields themselves are varied in size and shape. The field boundaries used are hedge, ditch, woodland, road, trackways, permissive areas of crop change, the north-east to south-west railway line, and a farmyard.

### Plate 100: Crop field with slope to west, looking west.

**Plate 101: Crop field, looking east.**

**Plate 102: Crop in field, looking north.**

**Plate 103: Crop field, looking west.**

**Plate 104: Ploughed field, looking north-east.**

## Archaeological Features

### Known Heritage Assets

- 2.2.24 Undated cropmarks in a crop field c. 280 m north-east of Gislingham were possibly witnessed during the walkover survey as the surveyors noted undulations in the field. Undated cropmarks (**2719**) in a crop field c. 280 m north-east of Gislingham were possibly witnessed during the walkover survey as the surveyors noted undulations in the field.
- 2.2.25 No other known heritage assets were noted during the walkover survey for this subsection.

### **Plate 105: Undulations in a crop field where cropmarks (2719) are noted in the HER, looking south-east.**

### Unrecorded Heritage Assets

- 2.2.26 A circular depression was recorded in a crop field c. 300 m north of Wickham Road.
- 2.2.27 No other unrecorded heritage assets were noted during the walkover survey.

## Plate 106: Circular depression in crop field, looking east.

### Modern Disturbance

2.2.28 No modern disturbances were recorded during the walkover survey.

#### **Subsection B4: Gislingham to Wickham Road.**

2.2.29 This subsection has not yet been surveyed.

#### **Subsection B5: Wickham Road to Mendlesham Road (north)**

2.2.30 This subsection has not yet been surveyed.

#### **Subsection B6: Mendlesham Road (south) to Cay Hill**

2.2.31 This subsection has not yet been surveyed.

#### **Subsection B7: Cay Hill (south) to Bells Lane**

2.2.32 This subsection has not yet been surveyed.

#### **Subsection B8: Bells Lane (south-west) to A14.**

2.2.33 This subsection has not yet been surveyed.

#### **Subsection B9: A14 to Hill House Lane**

2.2.34 This subsection has not yet been surveyed.

#### **Subsection B10: Hill House Lane (south) to Ipswich Road, Ringshall Stocks**

2.2.35 This subsection has not yet been surveyed.

#### **Subsection B11: Ipswich Road, Ringshall Stocks (south) to Castle Road, Offton**

2.2.36 This subsection has not yet been surveyed.

#### **Subsection B12: Castle Road, Offton (south) to Blood Hill**

2.2.37 This subsection has not yet been surveyed.

#### **Subsection B13: Blood Hill (east) to Tye Lane**

2.2.38 This subsection has not yet been surveyed.

#### **Subsection B14: Tye Lane (south) to Burstall Lane (North)**

##### **Description of Landform**

2.2.39 This subsection of the walkover survey begins at the fields to the south of Tye Lane, c. 1 km east of Flowton, and curves in an s shape south to the fields between Burstall and Sproughton.

2.2.40 The land use in this subsection is crop and the fields vary in size and shape with many irregular in shape. The topography in this section is mostly flat with minor undulations

and some instances of gentle sloping. Field boundaries in this section consist of ditches, treeline, hedge, verge, and one instance of a trackway.

**Plate 107: Crop field with pylons along the southern border, looking south.**

**Plate 108: Crop field with wooden utility poles, looking south-west.**

**Plate 109: Crop in field with gentle sloping, looking south-east.**

**Plate 110: Crop in field with pylon along the north-western border, looking north.**

## Archaeological Features

### Known Heritage Assets

- 2.2.41 No known heritage assets were noted during the walkover survey.

### Unrecorded Heritage Assets

- 2.2.42 No unrecorded heritage assets were noted during the walkover survey.

### Modern Disturbance

- 2.2.43 Pylons and overhead lines in fields as near to a substation featured in many of the fields due to the proximity of the substation on Bullen Lane, c. 1 km north-east of Burstallhill.
- 2.2.44 There was a possible back-filled trench noted in the centre of a crop field, c. 400 m south of Bullen Lane.
- 2.2.45 No other modern disturbances were noted during the walkover survey.

## Plate 111: Overhead lines above crop field, looking north-east.

**Plate 112: Overhead lines and wooden utility poles on northern border of crop field, looking north-east.**

**Plate 113: Substation visible from crop field, looking north.**

**Plate 114: Possible back-filed trial trench, looking south-west.**

## 2.3 Section C: Babergh, Colchester and Tendring

- 2.3.1 From its northern limit, Section C heads generally south-south-west, by-passing the settlements of Burstallhill, Chattisham, Capel, Higham, Dedham, Langham and Ardleigh before arriving at the proposed East Anglia Connection Node (EACN) Substation 2 km east of Ardleigh. From here the Project heads west before Section C terminates at Old Ipswich Road 5 km to the west. Section C of the Project accounts for approximately 28 km of its overall length.
- 2.3.2 Towards the northern limit of Section C, the Bullen Lane Substation, situated between Flowton and Burstall, marks a notable elevation point. As we progress southward to the A1071, the terrain exhibits gentle undulations. Section C traverses the Belstead Brook Valley, a tributary of the Orwell situated south of the A1071, and then ascends through a gently undulating landscape varying in elevation. Continuing its journey, the section proceeds through undulating terrain enroute to the B1068 to the south-southwest, where it crosses the Stour Valley. Subsequently, it moves through undulating land on its way to its southern boundary to the north of Little Bentley.
- 2.3.3 For ease of understanding, this section has been divided into seven subsections:
- Subsection C1: Burstall Lane (south) to Chattisham Road
  - Subsection C2: Chattisham Road (south) to Bottle Bridge Road
  - Subsection C3: Bottle Bridge Road (south) to Sandpits Lane (B1070)
  - Subsection C4: Sandpits Lane (south) to River Stour
  - Subsection C5: River Stour (south) to Ipswich Road (A12)
  - Subsection C6: Ipswich Road (A12) to Railway south to Ardleigh
  - Subsection C7: Railway south to Ardleigh to Harwich Road

### **Subsection C1: Burstall Lane (south) to Chattisham Road**

#### **Description of Landform**

- 2.3.4 In Subsection C1, the landscape showcases a blend of undulating fields and woodlands along the A1071. The terrain varies, with gentle slopes, plateaus, valleys, and natural dips scattered throughout, resulting in an overall uneven and undulating topography.

## Plate 115: Undulating field along Pigeons Lane, looking north-west

### Archaeological Features

### Known Heritage Assets

- 2.3.5 No unrecorded heritage assets were identified during walkover of Subsection C1.

### Unrecorded Heritage Assets

- 2.3.6 No unrecorded heritage assets were identified during walkover of Subsection C1. Some minor undulations and depressions were observed along the A1071 believed to be associated with the farming practice of the area (Plate 116).

## Plate 116: Some undulation within a field along the A1071, looking north-west

### Modern Disturbance

- 2.3.7 No modern disturbance was observed during the walkover.

## **Subsection C2: Chattisham Road (south) to Bottle Bridge Road**

2.3.8 This subsection has not yet been surveyed.

## **Subsection C3: Bottle Bridge Road (south) to Sandpits Lane (B1070)**

### **Description of Landform**

- 2.3.9 Subsection C3 runs over 5.5 km and offers a diverse landscape within its fields. Some fields remain relatively flat with subtle undulations, while others feature small depressions and gentle rises. Additionally, several fields showcase a combination of rises and depressions, contributing to an overall undulating character. (Plate 117, Plate 118).
- 2.3.10 Fields within this subsection serve varying agricultural purposes, either dedicated to crop cultivation, hosting meadows, or designated as grasslands. Throughout the walkover, the observed field boundaries encompassed a combination of natural elements such as tree lines and hedges, alongside man-made features like roads, tracks, shrubbery, and open fields.

### **Plate 117: Relatively flat field within subsection C3 along Acacia Road, looking west**

## Plate 118: Undulating field near Sandpits Lane, looking north

### Archaeological Features

#### Known Heritage Assets

- 2.3.11 No known heritage assets were observed during the walkover.

#### Unrecorded Heritage Assets

- 2.3.12 Some depressions within mostly flat fields were observed during the walkover along Acacia Road (Plate 119).

**Plate 119: A depression in the south of a mostly flat field along Acacia Road, looking north**

**Modern Disturbance**

2.3.13 Some overhead cables were observed during the walkover (Plate 120).

**Plate 120: Overhead cables within a field along Acacia Road**

## Subsection C4: Sandpits Lane (south) to River Stour.

### Description of Landform

- 2.3.14 This subsection of the walkover begins at the fields south of Sandpits Lane and covers c. 3 km of the route, in a mostly straight linear route to the south-west to the northern bank of the river Stour. This subsection of the route is in the landscape between Holton St Mary in the north-east and Higham to the south-west.
- 2.3.15 The landscape in this sub-section is mostly flat, with some gentle slopes, and some minor undulations. The land use here varies, and features, crop fields, meadows, and water meadows, grassland, and sheep pastureland. The boundaries are ditch, hedge, treeline, bank, road, or change of crop. The field sizes and shapes vary but are for the most part regular, particularly in the northern part of this sub-section.

### Plate 121: Crop field, looking south-west.

**Plate 122: Crop field with undulations, looking west.**

**Plate 123: Undulating grassland, looking south.**

**Plate 124: Grassland or pasture, looking south-east.**

**Plate 125: Recently cropped field, looking east.**

**Plate 126: Water meadow, looking south-east.**

**Plate 127: Water meadow, looking south.**

### Archaeological Features

### Known Heritage Assets

- 2.3.16 No known heritage assets were witnessed during the walkover survey for this subsection.

### Unrecorded Heritage Assets

- 2.3.17 An old boundary was brought to our attention by the owner within the field along the B1068, encompassed by the draft Order Limit. This old boundary is visible on the OS six inch, 1842-1952 map. The owner also gave access to a map from 1936 where the

boundary can be observed. Today, this boundary is still in use. There is a wire and wooden fence on it.

**Plate 128: An old boundary within a field along the B1068, looking south**

**Plate 129: The old boundary within a field along the B1068, looking south**

## Plate 130: A 1936 map showing the old boundary along the B1068

- 2.3.18 There was a linear depression in water meadow, c. 125 m north-east of river Stour.
- 2.3.19 There was a water-filled depression in water meadow, c. 90 m north-east of river Stour.
- 2.3.20 There were undulations in recently harvested field, looking east.
- 2.3.21 There was a mounded former boundary noted in between crop field directly south of Holly Bush Corner.
- 2.3.22 There was a large oval depression noted in a recently ploughed field directly south of Sandpits Lane (Plate 134).

- 2.3.23 No other unrecorded archaeology was noted during the walkover survey for this sub-section.

**Plate 131: 125 m north of the River Stour, looking south-east.**

**Plate 132: Water filled depression in water meadow, looking east.**

**Plate 133: Linear depression in recently harvested field, looking east.**

**Plate 134: Large oval depression noted in a field along Sandpits Lane, looking south-east**

### Modern Disturbance

- 2.3.24 There were overhead lines north to south in a crop field south of Sandpits Lane.
- 2.3.25 There were two mounds built by Natural England in order to save animals from drowning in wet weather and floods in the water meadow directly north of the river Stour.
- 2.3.26 No other modern disturbances were noted during the walkover for this sub-section.

**Plate 135: Overhead lines over crop field.**

**Plate 136: Mound built by Natural England, looking south-west.**

### **Subsection C5: River Stour (south) to Ipswich Road**

#### **Description of Landform**

2.3.27 Subsection C5 presents a diverse landscape characterized by a variety of flat fields, each with its unique features. Some fields remain completely flat, while others very gently slope downward. Among them, several fields are designated for paddocks,

creating a pastoral atmosphere. Additionally, within this subsection, you'll find flat fields adorned with thriving crops and lush grasslands, contributing to the visual richness of the area.

- 2.3.28 The boundaries within Subsection C5 exhibit a diverse composition, reflecting the area's natural and man-made elements. These boundaries incorporate a combination of stately trees, well-maintained hedges, sturdy metal fences, and even a natural river to the north-east, which serves as a defining feature. Alongside these, are found trackways and wooden fences contributing to the delineation of the fields, creating a harmonious blend of both natural and constructed elements that define this subsection's character.

### Archaeological Features

#### Known Heritage Assets

- 2.3.29 No known heritage assets were observed during the walkover.

#### Unrecorded Heritage Assets

- 2.3.30 A possible bank, ditch was observed during the walkover, in the south of Nightingale Hill, north of Black Brook. However, it could be natural.

### Plate 137: A possible bank on the south of Nightingale Hill, looking west

#### Modern Disturbance

- 2.3.31 A building in ruin and some beehives were observed along Furze Lodge. (Plate 138, Plate 139)

- 2.3.32 A decorative masonry was found within the draft Order Limit, c. 400 m west to Lower Street and c. 170 m west to the River Stour. A few metres further north-west, near the draft Order Limit was observed a shed.

**Plate 138: A collapsed building along Furze Lodge, looking south-west**

**Plate 139: Beehives along Furze Lodge, looking west**

## **Plate 140: A shed found c. 140 m west to the River Stour, looking south-west**

## **Subsection C6: Ipswich Road (A12) to Railway south to Ardleigh**

2.3.33 This subsection has not yet been surveyed.

## **Subsection C7: Railway south to Ardleigh to Harwich Road (A137)**

### **Description of Landform**

- 2.3.34 This subsection runs over c. 5.5 km. Along Little Bromley Road, the landscape is marked by a variety of field types and boundary characteristics. The predominant feature is the flatness of the fields, which are mainly utilized for crop cultivation such as oilseed rape growing. These expansive fields create a sense of openness and agricultural activity. While most fields maintain a flat profile, some exhibit subtle variations such as undulations or depressions.
- 2.3.35 The field boundaries in this subsection are equally diverse, incorporating elements such as fences, tree lines, hedges, and private tracks. These boundaries not only define the fields but also contribute to the overall character of the landscape, combining natural and man-made features seamlessly.

**Plate 141: Flat field near Hungerdown Lane, looking north-east**

**Plate 142: Oilseed rape growing in a field along Grande Road, looking east.**

### Archaeological Features

#### Known Heritage Assets

2.3.36 No known heritage assets were observed during the walkover.

#### Unrecorded Heritage Assets

- 2.3.37 Undulations and depressions were observed within fields along Little Bromley Road and Grange Road (**Error! Reference source not found.**, Plate 144).

### Plate 143: Undulations and depressions along Little Bromley Road

### Plate 144: Undulations in a flat field along Grange Road, looking north-east

### Modern Disturbance

- 2.3.38 Overhead cables and pylon masts were observed throughout the surveyed fields near Grange Road.

**Plate 145: Overhead cables and pylon masts through surveyed fields near Grange Road and Little Bromley Road**

## 2.4 Section D: Colchester

- 2.4.1 Section D of the Project is entirely situated within Essex County and the Colchester District. Commencing at Old Ipswich Road, Section D proceeds in a westerly direction, skirting the communities of Highwoods and Horkesley Heath to the south. It then takes a south-western turn, bypassing the settlements of West Bergholt, Eight Ash Green, and Marks Tey. The culmination of Section D is at the border between the Colchester and Braintree Districts, approximately 2 km south-west of Marks Tey. This segment of the Project accounts for approximately 19 km of its total length.
- 2.4.2 Starting from the Old Ipswich Road, the draft Order Limits traverse a gently undulating landscape. The landscape gradually rises as the draft Order Limits cross London Road, located west of Great Horkesley. Moving north, the terrain slopes down as the draft Order Limits cross a tributary valley of the Stour Valley. The landscape then climbs again before the draft Order Limits turn south-west near the B1508. Following this path, the draft Order Limits run along the eastern side of a north-south aligned tributary valley. The draft Order Limits cross this tributary valley, and the terrain gradually rises again. The landscape then descends into the Stour Valley, where the draft Order Limits cross the river. After leaving the valley, the draft Order Limits pass through gently undulating terrain as they continue south-east to their southern boundary near the Colchester (B)/Braintree District border.
- 2.4.3 Beyond the boundaries of the draft Order Limits, the region maintains its rural character, featuring settlements of different sizes based on their proximity to major towns like Colchester. The landscape retains its rural quality, dotted with dispersed farmsteads. Additionally, the area encompasses transportation networks like the A134, A12, A129, A414, and a railway line stretching from north-east to south-west.
- 2.4.4 This subsection is split into seven subsections for ease of understanding. They are:
- Subsection D1: Old Ipswich Road (west) to Straight Road (east)
  - Subsection D2: Straight Road (west) to London Road (east)
  - Subsection D3: London Road (west) to Fossetts lane
  - Subsection D4: Fossetts lane (South) to Ford Street Hill (A1124)
  - Subsection D5: (South) Ford Street Hill (A1124) to the railway crossing the Roman River
  - Subsection D6: The railway crossing the Roman River to Salmon Lane
  - Subsection D7: Salmon Lane to Houchin's Lane/ Colchester Road (A120)

### **Subsection D1: Old Ipswich Road (west) to Straight Road (east)**

#### **Description of Landform**

- 2.4.5 Subsection D1 begins east of the A12, north-east of Highwoods and south-west of Langham. This area covers approximately 3 km of the draft Order Limits.
- 2.4.6 The draft Order Limits and the surrounding landscape exhibit a predominantly flat terrain (Plate 146), although occasional rises and slopes create gentle undulations (Plate 147). While some variations in ground elevation exist, the overall landscape is

characterized by its flatness, providing favourable conditions for effective visual inspection.

- 2.4.7 The fields encompass a variety of types, primarily a blend of cultivated (cereals) and ploughed fields (Plate 183). The demarcations between fields are defined by a combination of treelines, ditches, hedgerows, occasional banks, and a mix of wooden and electric fencing.

#### **Plate 146: A flat field near Lodge Lane, looking north-east**

**Plate 147: Undulation in a field along Lodge Lane, near the A12, looking north-west**

**Plate 148: Crop field along lodge Lane, looking east**

## Archaeological Features

### Known Heritage Assets

- 2.4.8 The Langmoor House, Grade II listed building (**1274047**), is 30 m east to the northern side of a field, but a line of trees and Langham Lane are limiting the view from the field.
- 2.4.9 There were no further known heritage assets observed in Subsection D1 during the walkover survey.

### Unrecorded Heritage Assets

- 2.4.10 Several linear undulations were observed in fields along Long Lane and near Langham Lane.
- 2.4.11 There were no further unrecorded heritage assets observed in Subsection D1 during the walkover survey.

## Plate 149: Linear undulation along Lodge Lane, looking north-west

### Modern Disturbance

- 2.4.12 There was no modern disturbance observed in Subsection D1 during the walkover survey.

## Subsection D2: Straight Road (west) to London Road (east)

### Description of Landform

- 2.4.13 Subsection D2 commences east of Straight Road and extends horizontally towards the west of London Road. This segment encompasses an approximate distance of 3.5 kilometres within the draft Order Limits.
- 2.4.14 In Subsection D2, the landscape presents a diverse topography, featuring elements of depression, undulation with rises and slopes, but mainly stretches of flat terrain (Plate 150, Plate 151). This varied landscape provides a dynamic backdrop for the surrounding environment.
- 2.4.15 Within this subsection, the fields showcase an assortment of agricultural activities. Some are dedicated to cereal crops, while others host the growth of onions. Additionally, ploughed fields contribute to the agricultural mosaic (Plate 152, Plate 153, Plate 154).
- 2.4.16 The boundaries between fields in this subsection are delineated by a medley of natural and man-made features. Tree lines, serving as natural dividers, intermingle with the occasional presence of public footpaths and roads, while areas of scrub and hedges contribute to the field demarcations. Additionally, ditches play a role in separating these agricultural plots, creating a harmonious blend of boundaries within the landscape.

### Plate 150: Undulations within a field north of Old House Road, looking north

**Plate 151: Flat field between London Lane and School Lane, looking north-east**

**Plate 152: Onion plantation in a field along Broad Lane, looking south**

**Plate 153: Cereals growing within a field along Redhouse Lane, looking north-east**

**Plate 154: Ploughed field along the A134, looking south-east**

### Archaeological Features

### Known Heritage Assets

- 2.4.17 Rose Cottage (**1110883**), a grade II listed building, is facing one surveyed field along Redhouse Lane. However, a high tree line is limited the visibility of this field from the listed building.
- 2.4.18 One field along the A134 is facing four listed buildings in Great Horkesley: Village Hall (**1267662**), Danbury Cottage (**1267675**), Messrs Peatling And Cawdron (**1222667**) and

House Adjoining And To The North Of Peatling And Cawdron (**1222668**). A low height hedge along the A134 limits the view of the field from these buildings (Plate 155).

- 2.4.19 Another listed building Chapel Cottage (**1222607**) is near a field along the A134. Here again a medium height hedge limits the view of the field from this building. Just like the listed buildings Barn To South Of New Barn House (**1222924**), Highlands (**1222981**) and School House (**1222923**) which are facing a field along School lane. However, for the latter, the field is visible from the buildings (Plate 156).

**Plate 155: Village Hall (1267662), grade II listed building, near the draft Order Limit, facing a surveyed field along the A134, looking north**

**Plate 156: Barn To South Of New Barn House (1222924) in front of a surveyed field, looking east**

**Unrecorded Heritage Assets**

- 2.4.20 During the walkover of Subsection D2, several notable landscape features were observed. Numerous depressions were noticed across the fields, and, at times, the ground dipped and then rose within the fields, forming lines of depression in their midst (

**Plate 157 : A depression area within a field along Redhouse Lane, looking north**

**Plate 158: Line of depressions within a field along Broad Lane, looking south**

2.4.21 , **Error! Reference source not found.**)

2.4.22 In this section, the walkover revealed the presence of undulations in the landscape. These subtle rises and falls in the terrain contribute to the varied topography within Subsection D2.

**Plate 157 : A depression area within a field along Redhouse Lane, looking north**

**Plate 158: Line of depressions within a field along Broad Lane, looking south**

**Plate 159: Gentle undulations along a field west of Pepper's Road, looking east**

**Plate 160: Undulation within the east part of a surveyed field along Broad Lane, looking south**

### Modern Disturbance

- 2.4.23 In this section, a notable feature is the presence of several wood pole power lines traversing the fields. These power lines crisscross the landscape, adding an element of utility infrastructure to the agricultural terrain of Subsection D2 (Plate 161).
- 2.4.24 The draft Order Limits is traversed by the A134 infrastructure.

## Plate 161: Wood pole power lines in subsection D2, along school Lane and Redhouse Lane

### Subsection D3: London Road (west) to Fossetts lane

#### Description of Landform

- 2.4.25 In Subsection D3, the landscape of the fields presents a diverse range of topographical features. As one moves closer to London Road, the fields tend to be relatively flat. However, as you head westward, the terrain becomes more undulating, marked by a considerable amount of rise and slope. Near Colchester Road and Holt's Road towards the west, undulations and depressions become more prominent. Further south-west in this subsection, steep slopes characterize certain areas within the fields, creating a varied and dynamic landscape (Plate 162, Plate 163, Plate 164).
- 2.4.26 Within this subsection, the fields exhibit a versatile array of land use. Some areas are dedicated to crop cultivation, while others serve as paddocks for livestock. There are patches of grassland and meadows as well, contributing to the agricultural diversity of the region. Additionally, a number of fields have been left abandoned, further enhancing the multifaceted nature of land use in Subsection D3 but making it more difficult to study the ground (Plate 165).
- 2.4.27 The boundaries delineating the fields within this subsection are defined by a combination of natural and man-made features. Roads, hedges, treelines, and open fields play their role in separating the agricultural plots. Tracks and shrubs also contribute to demarcating the field boundaries, creating a blend of distinct characteristics within the landscape.

**Plate 162: Flat paddock near London Road, looking east**

**Plate 163: A field with steep western rise, plateau, and upper undulations between Vinesse Road and London Road, looking east**

**Plate 164: A field near Colchester Road, looking south**

**Plate 165: Fields that seem unused near Vinesse Road, looking south**

## Archaeological Features

### Known Heritage Assets

- 2.4.28 The listed building grade II, Barn To North Of Knowles Farmhouse (**1267632**) is adjacent to a surveyed field west of London Road. The field is visible from the listed building. Only a wooden fence is between the field and the building (Plate 166).
- 2.4.29 In one of the fields within Subsection D3, a noteworthy discovery was made when a Roman tile, potentially associated with a building or kiln (**4074**), was previously recorded. During our recent walkover survey, we had the opportunity to collaborate with the landowner, and it was during this survey that we came across additional Roman tiles strewn across the terrain. These finds seemed to cluster around the vicinity of what appeared to be a potential kiln or building site. Interestingly, on the same survey day, local residents in the neighbouring fields also stumbled upon Roman tiles and bricks, sparking their interest in preserving these historical artifacts. The locals were keen on recording these Roman findspots with the HER to document their historical significance. These intriguing discoveries were made in fields characterized by a highly undulating landscape, marked by deep depressions and significant variations in elevation, which added an element of complexity and intrigue to the archaeological findings in Subsection D3 (Plate 167, Plate 168).

### **Plate 166: Barn To North Of Knowles Farmhouse (1267632) adjacent to a surveyed field west of London Road, looking north**

**Plate 167: Tiles, bricks and other finds in fields not far from Colchester Road. Some are potentially from the Roman era.**

**Plate 168: Area of 4074 (Roman tile found, possibly a building or a kiln), where other potential Roman finds were noticed during the walkover, looking East.**

#### Unrecorded Heritage Assets

- 2.4.31 Modest depressions and subtle undulations were noted in predominantly flat fields adjacent to Vinesse Road.
- 2.4.32 In the fields adjacent to Colchester Road, where potential Roman artifacts were unearthed (Plate 167, Plate 168), the landscape displayed a range of features, including pronounced rises and slopes, as well as notable undulations and depressions (Plate 169, Plate 170).

**Plate 169: Gentle undulations running north-south across a flat field near Vinesse Road, looking north.**

**Plate 170: The fields in the draft Order Limits near Colchester Road exhibit variations in elevation, creating a pattern of rolling topography.**

**Modern Disturbance**

- 2.4.33 No modern disturbance was observed during the walkover.

**Subsection D4: Fossetts lane (South) to Ford Street Hill (A1124)**

- 2.4.34 This subsection has not yet been surveyed.

**Subsection D5: (South) Ford Street Hill (A1124) to the railway crossing the Roman River**

**Description of Landform**

- 2.4.35 In Subsection D5, the predominant topographical feature is a mostly flat landscape, with occasional gentle rises, particularly noticeable in the northern vicinity near the railway line. This subsection is approximately 3 km long.
- 2.4.36 Here, the fields primarily serve agricultural purposes, predominantly cultivated for crops. The demarcations defining these fields are a diverse combination of natural and man-made features. They include hedges, ditches, grass verges, shrubs, and open fields.

**Plate 171: Flat field in Subsection D5, along Brook Road, looking south-east**

**Plate 172: Gentle rise from south to north in a field near the railway, looking north-west**

#### Archaeological Features

#### Known Heritage Assets

2.4.37 No known heritage assets were witnessed during the walkover survey.

#### Unrecorded Heritage Assets

2.4.38 No unrecorded heritage assets were identified during walkover of Subsection D5. Some minor undulations and depressions were observed along Brook Road believed to be either geological or associated with the farming practice of the area.

## Modern Disturbance

- 2.4.39 The draft Order Limits is traversed by the railways 400 m south to Rectory Road.
- 2.4.40 There were several instances of telephone and power cables crossing the fields in Subsection D5.

### **Plate 173: Overhead cables in fields along Brook Road, looking north-east**

### **Subsection D6: The railway crossing the Roman River to Colchester Road (A120)**

#### Description of Landform

- 2.4.41 In the subsection D6, the topography predominantly presents a flat profile, intermingled with subtle undulations and occasional rising terrain features near the Roman River (Plate 174, Plate 175). This subsection runs over c. 5 km.
- 2.4.42 Regarding land use, the subsection D6 encompasses a diverse array of agricultural activities. It encompasses meadows or cattle fields, areas with shrub vegetation, plots dedicated to cereal cultivation, and sections recently subjected to ploughing for agricultural purposes. The boundaries that segregate these fields are defined by a combination of natural elements such as hedges, tracks, tree lines, and ditches, alongside the presence of shrubbery, collectively forming the distinct boundaries within this subsection.

**Plate 174: Flat field west to Great Tey Road, looking north-west**

**Plate 175: Elevations in a Field Adjacent to the Roman River, looking south-east**

## Archaeological Features

### Known Heritage Assets

- 2.4.43 No known heritage assets were observed during walkover within Subsection D6.

### Unrecorded Heritage Assets

- 2.4.44 In proximity to the railway line, two fields within the vicinity exhibit some bumps/ elevations. These topographical features introduce a distinctive undulating characteristic to the landscape, forming a notable presence in the area adjacent to the railway (Plate 176, Plate 177).
- 2.4.45 No more unrecorded heritage assets were identified during walkover of Subsection D5. Some minor undulations were observed through the subsection believed to be either geological or associated with the farming practice of the area.

## Plate 176: Rise and undulations in a field along the Roman River

**Plate 177: Large rise in a field near the railway, looking south-east**

**Plate 178: Gentle undulations east to Great Tey Road, looking south-west**

### Modern Disturbance

- 2.4.46 Overhead cables (Plate 179) were noted during the walkover survey crossing several fields near Brook Road/ Great Tey Road and near Upp Hall (**1223380**).
- 2.4.47 During the walkover, the construction of an agricultural building and the presence of construction vehicles and related infrastructure were observed, all enclosed within a perimeter of metal fencing.
- 2.4.48 Plate 179A mess heap was observed in a field near Great Tey Road (Plate 180).
- 2.4.49 During the walkover, the construction of an agricultural building and the presence of construction vehicles and related infrastructure were observed, all enclosed within a perimeter of metal fencing.

**Plate 179: Some overhead cables in subsection D6**

**Plate 180: Spoil heap**

**Plate 181: Agricultural building, construction vehicles and related infrastructure to the north-east of a field near Houchin's Lane.**

## 2.5 Section E: Braintree

- 2.5.1 Section E of the Project is located wholly within the County of Essex and the District of Braintree. Section E begins at the Colchester/Braintree District border c. 2 km south-west of Marks Tey and heads generally west-south-west bypassing the settlements of Coggeshall, Kelvedon, Silver End, Faulkbourne and Fairstead. Section E terminates at Fuller Street that marks the Braintree/Chelmsford District border. Section E of the Project accounts for approximately 16 km of its overall length.
- 2.5.2 The land in this section of the draft Order Limits is largely rural with the land used for arable production or animal grazing. The land is mostly flat with some pockets of undulations and slopes. Field sizes and shaped vary but are mostly regular in shape. There is a mix of field boundaries in this subsection, with the majority being hedgerow and ditch, but roads, trackways, and fencing are also used.
- 2.5.3 Outside of the draft Order Limits, the area remains rural, with settlements that vary in size which depends on their proximity to a larger town such as Chelmsford, Billericay, Braintree, and Colchester. The landscape remains rural with scattered farmsteads. The landscape also includes travel infrastructure such as the A120, A12, A129, A414, and the north-east to south-west railway line.
- 2.5.4 This subsection is split into five subsections for ease of understanding. They are:
- Subsection E1: Houchin's Lane/ Colchester Road (north) to Pantlings Lane
  - Subsection E2: Pantlings Lane to Park Gate Road
  - Subsection E3: Park Gate Road to the railway south of Cressing Road (north)
  - Subsection E4: Railway south of Cressing Road (south) to Fairstead Road
  - Subsection E5: Fairstead Road to Boreham Road

### **Subsection E1: Houchin's Lane/ Colchester Road (north) to Pantlings Lane.**

#### Description of Landform

- 2.5.5 This subsection begins at the fields to the west of the Roman River to the north of Colchester Road, A120, c. 400 m west of Broad Green. The land in this section is rural and mostly used for arable crop production, with some fields in crop, and others recently ploughed at the time of the survey. Field sizes and shapes vary, and their borders consist of tracks, hedges, ditches, permissive change of crop boundaries, treeline, and scrub.

#### Archaeological Features

##### Known Heritage Assets

- 2.5.6 No known heritage assets were witnessed during the walkover survey.

##### Unrecorded Heritage Assets

- 2.5.7 There was a linear undulation noted in crop field c. 1 km east of Great Tey Road.
- 2.5.8 Undulations were recorded in crop field, c. 500 m east of Great Tey Road.

- 2.5.9 A north-east to south-west Linear depression was recorded in ploughed field, c. 350 m east of Great Tey Road.
- 2.5.10 Linear undulations were recorded in a ploughed field, c. 300 m north of Colchester Road/Coggeshall Road.
- 2.5.11 Irregular topography in the south-western area of a crop field, c. 150 m north of Pantlings Lane was recorded.

**Plate 182: Linear undulation in ploughed field, looking east.**

**Plate 183: Undulations in crop field, looking west.**

**Plate 184: North-east to south-west linear depression, looking south-east.**

**Plate 185: Undulations in ploughed field, looking south.**

## Modern Disturbance

- 2.5.12 A group of agricultural buildings were in the process of being erected along the northern edge of a recently-harvested field c. 300 m north of Colchester Road, A120. The associated debris, plant, and fencing were also within the vicinity.

## Sub-Section E2: Pantlings Lane to Park Gate Road

### Description of Landform

- 2.5.13 This sub-section of the walkover report begins at Pantlings Lane, and heads in a south-western direction to Park Gate Road which is north of Rivenhall. This subsection transects the two Conservation Areas, Silver End and Kelvedon, to the west and east respectively. The landscape in this area is mostly flat with some areas where there are gentle slopes.
- 2.5.14 Between the two CAs Silver End to the west and Kelvedon to the east and their associated settlement areas.
- 2.5.15 Large fields of regular shape, which are mostly flat with gentle undulations. Deep ditches between fields, established hedgerows.

## Plate 186: Ploughed field, looking west.

**Plate 187: Field with young crop, looking north-east.**

**Plate 188: Image showing openness of the landscape in this subsection, looking east.**

## Archaeological Features

### Known Heritage Assets

- 2.5.16 There were no known heritage assets recorded during the walkover survey.

### Unrecorded Heritage Assets

- 2.5.17 There were no unrecorded heritage assets recorded while on walkover survey.

### Modern Disturbance

- 2.5.18 No modern disturbances were recorded during the walkover survey.

## **Sub-Section E3: Park Gate Road to the railway south of Cressing Road (north)**

### Description of Landform

- 2.5.19 Subsection E3 begins at the south-western side of Park gate Road and ends at the railway line to the south-west of Cressing Road. This covers a distance of c. 3.5 km, aligned north-east to south-west, along the draft Order Limits.
- 2.5.20 The land here includes large, flat agricultural fields with crop. The land connected to Rivenhall Palace (1122598) contain a few paddocks or grassland fields. This land undulates with the natural topography and slopes gently up to the north-west. Other paddocks were noted at the northern end of the Subsection, at Ford Farm and towards the southern end of the Subsection at Whiteheads Farm.
- 2.5.21 The field boundaries along the draft Order Limits includes well established and well maintained hedges which either sit alongside or within ditches. The paddocks or grassland fields at Rivenhall Palace and Whiteheads Farm were enclosed by wooden fences.

**Plate 189: Linear scrub field, looking north.**

**Plate 190: Paddock on Rivenhall Place estate, looking north-west.**

## Plate 191: Paddock on Rivenhall Place estate, looking south.

### Archaeological Features

#### Known Heritage Assets

- 2.5.22 No known heritage assets were recorded during the walkover survey.

#### Unrecorded Heritage Assets

- 2.5.23 There was a circular depression with a linear channel-like depression coming off it in the direction of the lake in the Rivenhall Place Estate. Within this paddock, there were at least two other instances of circular depressions along the lake boundary. These depressions are possibly the same circular areas which are shown on the Rivenhall Place and Mundon Hall estate maps from 1716-17. These circular areas would correlate in the same area prior to the development of the man-made lake, and are not shown on later maps in the early 19th century.

### Modern Disturbance

- 2.5.24 No modern disturbances were recorded during the walkover survey.

## Sub-Section E4: Railway south of Cressing Road (south) to Fairstead Road

### Description of Landform

- 2.5.25 This subsection runs over c. 4 km. It presents a landscape characterized by a blend of gently sloping fields and predominantly flat expanses. The landscape is further enriched by the presence of natural features such as hedges, trees, and tree lines, contributing to its visual diversity. Additionally, tracks and farm buildings are interspersed across the terrain, augmenting the overall rural ambiance.
- 2.5.26 The fields within this subsection are predominantly dedicated to crop cultivation, indicating agricultural productivity in the region. The alterations in crop types in certain fields reflect the seasonal dynamics of farming practices.
- 2.5.27 Field boundaries within Subsection E4 exhibit a combination of features, encompassing hedges, ditches, tracks, and tree lines. These elements serve functional and aesthetic purposes, delineating field boundaries while enhancing the visual allure of the countryside.

## Archaeological Features

### Known Heritage Assets

2.5.28 No known heritage assets were observed during the walkover.

### Unrecorded Heritage Assets

2.5.29 Large circular depression was noticed within a flat field along Pink Lane.

## Plate 192: Circular depression in a flat field along Pink Lane

### Modern Disturbance

2.5.30 Football pitches are located within the draft Order Limits, in a field along Church Hill.

2.5.31 Overhead cables and posts were observed through a field east to Church Hill.

**Plate 193: Football pitches within a field along Church Hill**

**Plate 194: Overhead cables and posts in a field east to Church Hill**

## Sub-Section E5: Fairstead Road to Boreham Road (east)

### Description of Landform

- 2.5.32 The subsection E5 runs over c. 3 km. it encompasses a diverse landscape characterized by varying topography and land use. The fields in this area exhibit gentle slopes, flat expanses, and undulating terrain, contributing to the visual diversity of the surroundings. These fields primarily serve agricultural purposes, with crop cultivation being a predominant activity. The changing patterns of crops across the landscape reflect the seasonal nature of farming in this region. Additionally, woodlands, scrub, and tree lines punctuate the fields, adding natural elements to the landscape.
- 2.5.33 The boundaries of these fields present an amalgamation of features, including hedges, ditches, tracks, and roadways. These elements serve the dual purpose of delineating field limits while enhancing the visual appeal of the countryside. In certain areas, the boundary is characterized by hard standings and open fields, providing a mix of natural and man-made delineations.

### Plate 195: Flat field along Ranks Green Road, looking north

## Plate 196: Undulating field north to Fuller Street, looking north

### Archaeological Features

### Known Heritage Assets

2.5.34 No known Heritage Assets were observed during the walkover.

### Unrecorded Heritage Assets

2.5.35 A circular depression was observed in the middle of this subsection, south to Ranks Green Road. However, it might be associated with the farming practice of the area.

2.5.36 Depressions and undulations were noticed in three fields in the western part of this subsection, north of Fuller Street.

## Plate 197: A circular depression in a field south to Ranks Green Road, looking south-east

**Plate 198: Depressions and undulations were noticed in three fields in the western part of this subsection.**

**Modern Disturbance**

- 2.5.37 A fence area and barrels were found south to Ranks Green Road.
- 2.5.38 Overhead cables and poles run through some fields within the draft Order Limits, in this subsection.

**Plate 199: A fence area and barrels south to Ranks Green Road, looking west**

## Plate 200: Poles and pylons within this subsection

## 2.6 Section F: Chelmsford

2.6.1 Section F of the Project is located wholly within the County of Essex and the District of Chelmsford. Section F begins at the Braintree/Chelmsford District border c. 2 km south-west of Marks Tey and heads generally south-south-west bypassing the settlements of Chatham Green, Little Waltham, Roxwell, Writtle and Margaretting. Section F terminates between Little Hyde Farm and Margaretting Hall Cottages on the Chelmsford/Brentwood District border. Section F of the Project accounts for approximately 20 km of its overall length.

2.6.2 This subsection is split into six subsections for ease of understanding. They are:

- Subsection F1: Boreham Road (west) to Braintree Lane (east)
- Subsection F2: Braintree Lane (west) to Chelmsford Road (east)
- Subsection F3: Chelmsford Road (west) to Woodhall Hill (east)
- Subsection F4: Woodhall Hill (west) to Roxwell Road, A1060 (north)
- Subsection F5: Roxwell Road, A1060 (south) to Nathans Lane (north)
- Subsection F6: Nathans Lane (south) to A12 (north).

### **Subsection F1: Boreham Road to Braintree Lane (east)**

2.6.3 This subsection has not yet been surveyed.

### **Subsection F2: Braintree Lane (west) to Chelmsford Road (east)**

2.6.4 This subsection has not yet been surveyed.

### **Subsection F3: Chelmsford Road (west) to Woodhall Hill (east)**

#### **Description of Landform**

2.6.5 The subsection F3 runs over c. 4 km and encompasses a diverse landscape characterized by varying topography and land use, offering a visually dynamic and agriculturally significant region within the study area.

2.6.6 The fields in this subsection display a range of features, including rises, slopes, and flat areas. These fields have been utilized for various purposes, from crop cultivation to meadows. Some areas bear the traces of ploughing, while others showcase the natural beauty of grassy school fields.

2.6.7 Field boundaries in Subsection F3 are delineated by a mix of elements, including roads, hedges, tracks, ditches, tree lines, and banks. These features define the limits of the fields and contribute to the character of the landscape.

#### **Archaeological Features**

##### **Known Heritage Assets**

2.6.8 No known heritage assets were observed during the walkover.

## Unrecorded Heritage Assets

- 2.6.9 There is a series of raised and depressed area north of Larks Lane.
- 2.6.10 Some undulations were observed within fields through this subsection, especially north and south-west of Partridge Green.

### **Plate 201: Series of raised and depressed area north of Larks Lane, looking west**

### **Plate 202: Some undulations in fields, though this subsection**

## Modern Disturbance

- 2.6.11 Concrete pillar with manhole cover area as well as a visible pipeline mark leading to the concrete manhole cover area were visible during the walkover north of Larks Lane.

**Plate 203: Concrete pillar with manhole cover area within a field north Larks Lane, looking north**

**Plate 204: Visible pipeline mark in a field north Larks Lane, looking south**

## **Subsection F4: Woodhall Hill (west) to Roxwell Road, A1060 (north)**

### **Description of Landform**

- 2.6.12 This subsection runs over c. 3 km and encompasses a diverse landscape characterized by varying topography and land use. Overall, this area exhibits a gentle undulating terrain with occasional rises, offering a visually dynamic and agriculturally significant region.
- 2.6.13 The fields within this subsection have primarily served agricultural purposes, with varying patterns of crop cultivation and meadows. These fields may display traces of ridge and furrow, reflecting historical farming practices. The combination of crop fields and meadows contributes to the agricultural diversity of the landscape.
- 2.6.14 Field boundaries in Subsection F4 are delineated by a mix of features, including hedges, shrubs, ditches, tree lines, and open fields. These natural and man-made elements define field limits while enhancing the visual appeal of the countryside.

## **Plate 205: Field with rise along River Can, looking north-west**

## Plate 206: Possible ridge and furrow in a field near Mashbury Road, looking north

### Archaeological Features

#### Known Heritage Assets

- 2.6.15 No known heritage assets were observed during the walkover.

#### Unrecorded Heritage Assets

- 2.6.16 Some undulations and depressions were observed during the walkover within field in the draft Order Limits. They might be associated with the farming practice of the area or be geological.

**Plate 207: Depression within a field south to Chignal St James, looking south**

**Plate 208: Undulations within fields through the draft Order Limits**

### Modern Disturbance

- 2.6.17 Some overhead cables and poles run some fields through this subsection.
- 2.6.18 A water pipe is found on the east part of a field near Mashbury Road
- 2.6.19 A wooden fence enclosure is found in a field along River Can.

**Plate 209: Overhead cables and poles east part of the F4 subsection**

**Plate 210: A water pipe in a field along River Can, looking south**

## Plate 211: A wooden fence enclosure in a field along River Can, looking east

### Subsection F5: Roxwell Road (A1060) (south) to Nathans Lane, Edney Common (north)

#### Description of Landform

- 2.6.20 This subsection of the proposed route begins at the land south Roxwell Road, c. 1.6 km north-east of Newney Green to the land north of Nathans Lane, c. 1 km east of Edney Common. The A414, Ongar Road West, transects the route east to west through the draft Order Limits.
- 2.6.21 The landform in this section was mostly flat with instances of undulation in some fields, however, this could have been due to ploughing and the presence of crop. Land use in this section were arable crop and recently ploughed fields, and the field boundaries were hedgerow and ditches.

#### Archaeological Features

#### Known Heritage Assets

- 2.6.22 Undulations were recorded in a crop field, c. 500 m north-west of Nathans Lane in which undated cropmarks of field boundaries were noted on the HER.

### **Plate 212: Undulations in crop field, looking south.**

#### **Unrecorded Heritage Assets**

- 2.6.23 There was a circular depression recorded in the eastern edge of a crop field c. 400 m south-east of The Causeway.
- 2.6.24 A circular depression was noted in the central-eastern section of a crop field, c. 800 m north-west of Nathans Lane.

### **Plate 213: Circular depression in crop field, looking south.**

**Plate 214: Circular depression in crop field, looking west.**

**Plate 215: Ploughed field, looking north-east.**

## Plate 216: Ploughed field, looking south-east.

### Modern Disturbance

- 2.6.25 No modern disturbances were witnessed during the walkover survey.

### Sub-Section F6: Nathans Lane, Edney Common (south) to A12 (north)

#### Description of Landform

- 2.6.26 This part of the walkover survey begins at the land south of Nathans Lane, Edney Common, to the land north of the A12, and is c. 4 km of the route.
- 2.6.27 The landform in this section is mostly flat with limited undulation, though there are instances of gentle slopes in the landscape, especially south to this subsection. The fields themselves are large and irregular shaped and are used for arable crop and wildflower meadows.

**Plate 217: Crop field, looking west.**

**Plate 218: Crop field, looking north-east.**

**Plate 219: Crop field, looking south-east.**

**Plate 220: Wildflower meadow, looking north.**

## Plate 221: Undulating field on a field along Ivy Barn Lane, looking west

### Archaeological Features

### Known Heritage Assets

- 2.6.28 No known heritage assets were visible during the walkover survey.

### Unrecorded Heritage Assets

- 2.6.29 Some undulations and rises were identified during walkover of Subsection F6. However, they may be geological or linked to farming practices in the region.

**Plate 222: A field rising to east, south to Nathans Lane, looking east**

**Plate 223: Rising field with undulations west to Writtle Road, looking north**

**Plate 224: Undulations within a field west to Writtle Road, looking north**

**Plate 225: Undulating field west to Writtle Road, looking south**

## Plate 226: Undulations within a field north to Ivy Barn Lane, looking east

### Modern Disturbance

2.6.30 No instances of modern disturbance noted during the walkover survey except some overhead cables and poles north of this subsection.

## Plate 227: Some power lines within a field along Nathans Lane and Margaretting Road

## 2.7 Section G: Basildon and Brentwood

- 2.7.1 This section of the Project is approximately 14.5 km in length. The northern end of section G begins south-east of the A12, at the land c. 1.5 km north-east of Ingatestone to the Railway, west of Basildon and the southern end is located at the Brentwood/Basildon/Thurrock District border on the railway line between West Horndon to the west and Basildon to the east.
- 2.7.2 The land types at this section vary as the more northern fields and their wider areas are more rural than the rural and industrial nature of the land to the south of the Stanford le Hope bypass.
- 2.7.3 This section of the walkover report has been divided into two sections for ease of understanding. They are:
- Subsection G1: A12 (south) to Railway Line north-east of Hutton (north)
  - Subsection G2: Railway Line north-east of Hutton (south) to Railway line west to Basildon

### **Subsection G1: A12 (south) to Railway line north-east of Hutton (north)**

#### **Description of Landform**

- 2.7.4 This subsection begins Limits from the land south of the A12 to the land north of the Railway line c. 2.3 km north-west of Billericay, and covers c. 5 km of the proposed route.
- 2.7.5 The land in this section was mostly flat with occasional pockets of undulations and gentle slopes. The flatness of the landscape allowed for good visual access of the draft Order Limits.
- 2.7.6 The field types are mostly crop or recently ploughed fields, with two instances of grassland or meadows with hedgerows and ditches used as field boundaries.

**Plate 228: Crop field, looking north.**

**Plate 229: Crop field, looking west,**

**Plate 230: Crop field, looking south.**

**Plate 231: Ploughed field, looking north-west.**

## Plate 232: Grazing field or meadow, looking north.

### Archaeological Features

#### Known Heritage Assets

- 2.7.7 Field boundaries at Westlands Farm are noted on the HER and undulations in the fields were witnessed by the surveyors during the walkover, but they were unable to confirm whether these undulations were indeed these cropmarks.
- 2.7.8 No other known heritage assets were witnessed during the walkover survey.

#### Unrecorded Heritage Assets

- 2.7.9 A north to south rectilinear raised area was recorded in the south-west corner of a crop field adjacent to Old Church Road, c. 1 km south-east of Padham's Green.
- 2.7.10 There was a circular depression in the north-east part of a ploughed field c. 215 m south of Old Church Road, Padhams Green.
- 2.7.11 There was a circular concrete slab raised slightly up from the ground in the southern section of a ploughed field, c. 115 m north of the railway line east of Shenfield.
- 2.7.12 There was a circular depression in the southern section of a ploughed field, c. 250 m of the railway line east of Shenfield.
- 2.7.13 No other unrecorded heritage assets were witnessed during the walkover survey.

**Plate 233: North to south linear raised area, looking north.**

**Plate 234: Circular depression in ploughed field, looking north-west.**

**Plate 235: Low concrete slab circled in red, looking south-west.**

**Plate 236: Circular depression in ploughed field, looking south-west.**

### Modern Disturbance

- 2.7.14 Telephone poles and lines were recorded along the northern area of a crop field c. 60 m south of Padham's Green Road.
- 2.7.15 No other modern disturbances were witnessed during the walkover survey.

## Plate 237: Telephone poles and lines in field, looking south.

### Subsection G2: Railway line north-east of Hutton (south) to Railway line west to Basildon

#### Description of Landform

- 2.7.16 This subsection begins at the land south of the west-east railway line, c. 2.5 km north-west of Billericay, and is c. 6.5 km of the proposed route.
- 2.7.17 The land in this subsection was varied, with flat to gently undulating areas, to pockets of rolling hills. Land use was for arable crop production in fields in varying sizes and shapes. Field boundaries in this subsection of the proposed route were hedges, ditches, a farmyard, change of crop.

## Plate 238: Crop field, looking north.

**Plate 239: Crop field, looking north-west.**

**Plate 240: Crop field with gentle slope to east, looking east.**

**Plate 241: Crop fields, with pylons in the field to the back, looking north-west.**

**Plate 242: Crop field, looking north.**

**Plate 243: Meadow field, looking north.**

**Plate 244: Pasture field, looking north.**

**Plate 245: Scrub field, looking south.**

#### Archaeological Features

#### Known Heritage Assets

2.7.18 No known heritage assets were witnessed during the walkover survey.

#### Unrecorded Heritage Assets

2.7.19 A c. 3 m wide circular raised mound was recorded in the south-western area of a pasture field with grazing sheep c. 25 m north-east of Dunton Road.

2.7.20 No other unrecorded heritage assets were noted during the walkover survey.

**Plate 246: Raised circular depression in pasture field, looking north-east.**

## Modern Disturbance

- 2.7.21 There were a series of east to west pylons and wooden utility poles in a crop field c. 700 m south of Rayleigh Road.
- 2.7.22 No other modern disturbances were witnessed during the walkover survey.

## 2.8 Section H: Thurrock

- 2.8.1 Section H, the final Section of the Project, is located wholly within the County of Essex and the District of Thurrock. This section of the Project is approximately 14 km in length. Section H begins at the Brentwood/Basildon/Thurrock District border on the railway line between West Horndon to the west and Basildon to the east. From its northern limit, Section H heads south bypassing the settlements of Bulpham, Horndon on the Hill, Stanford le Hope and East and West Tilbury before terminating at the Tilbury Substation 700 m north of the Thames.
- 2.8.2 This section of the walkover report has been divided into two sections for ease of understanding. They are:
- Subsection H1: Railway west of Basildon to A13 Stanford le hope Bypass (north)
  - Subsection H2: Stanford le Hope Bypass (south) to river Thames

### **Subsection H1: Railway west of Basildon to A13 Stanford le hope Bypass (north)**

#### Description of Landform

- 2.8.3 This subsection of the walkover survey is c. 9 km of the proposed route from the south-side of the A127 Southend Arterial Road, north-west of Basildon, to the north-side of the Stanford le Hope Bypass, west of Stanford le Hope. The route follows a mostly straight north to south direction and then curves to the west of Horndon on the Hill and then to the east of a group of Listed Buildings (Cholleys Farmhouse **1111647**, Saffron Gardens **1111557**, and Walls at Saffron Gardens **1111558**).
- 2.8.4 The fields in this subsection for the walkover were arable crop which were either under crop or recently harvested at the time of the walkover survey, but there was also grass fields, a cow pasture field, and a Golf Course (Dunton Golf Course). The fields were for the most part regular shaped with field boundaries that were hedge, ditch, fences, track, and change of crop.
- 2.8.5 The landscape in this part of the proposed route is mostly flat with some instances of upward sloping to the south, until the landscape gets to its highest point in the area around Horndon on the Hill in the southern-most area of this subsection.

**Plate 260: Crop field, looking north-east.**

#### Archaeological Features

#### Known Heritage Assets

2.8.6 No known heritage assets were seen during the walkover survey.

## Unrecorded Heritage Assets

- 2.8.7 A small depression was recorded in a grass field c. 745 m south of the Southend Arterial Road.
- 2.8.8 No other unrecorded heritage assets were witnessed during the walkover survey.

### Plate 261: Depression in grass field, looking south.

## Modern Disturbance

- 2.8.9 A gas main sign was witnessed along the southern border of a crop field c. 220 m east of Cholleys Farmhouse (**1111647**) where the track meets the crop field. This gas mains sign is situated within one of the 'arms' from the main proposed route corridor.
- 2.8.10 No other modern disturbances were witnessed during the walkover survey.

## Subsection H2: Stanford le Hope Bypass (south) to river Thames

### Description of Landform

- 2.8.11 This sub-section of the walkover makes up c. 7.2 km of the proposed route from the Bypass at Stanford le Hope to c. 500 m north of the river Thames. The proposed route is in a curvilinear north to south direction between Chadwell St Mary, East Tilbury, and Mucking.
- 2.8.12 The fields within this section vary, with the majority being arable crop fields which were either in crop or were recently harvested at the time of the walkover survey, but there was also a golf course, a public park, and a paddock for horses. The field boundaries in this section were the following: fence, ditch, hedge, change of crop, road, and the West Tilbury Conservation Area (CA28).

- 2.8.13 The landscape in this section of the walkover survey varied, with much of the flat landscape being to the south of West Tilbury. The high points in the landscape were in the areas south of the Stanford le Hope Bypass and in and around the Maple Park and Orsett Golf Course, with a constant downward slope down to Linford, and West Tilbury.
- 2.8.14 Much of the southern-most fields had some form of modern infrastructure within them, either pylons or wooden utility poles, with many fields having overhead lines within. The closer to Tilbury Docks the fields were, the more infrastructure was noted.

**Plate 262: Crop field looking south-west.**

**Plate 263: Crop field, looking north-west.**

**Plate 264: Orsett Golf Course, looking east.**

**Plate 271: Overhead lines within a crop field, looking south-west.**

**Plate 272: Crop field, looking north-east.**

**Plate 273: Crop field, looking south-east.**

#### Archaeological Features

#### Known Heritage Assets

- 2.8.15 No recorded heritage assets were seen during the walkover survey in this subsection of the proposed route.

## Unrecorded Heritage Assets

- 2.8.16 There were two instances of low-height circular concrete structures that were recorded during the walkover for this subsection of the route. Both instances (Plate 274, Plate 275) were in adjoining fields (north to south) along the eastern side of the crop fields.
- 2.8.17 No other unrecorded heritage assets were noted during the walkover survey.

**Plate 274: Low-level concrete structure in crop field (circled in red), looking north-west.**

**Plate 275: Low-level concrete structure in ploughed field, looking east.**

## Modern Disturbance

- 2.8.18 In one crop field directly south of the north-east to south-west railway line, there was exploratory equipment and markers in the northern end of the field (Plate 276).
- 2.8.19 In another crop field directly south of the north-east to south-west railway line and adjacent to the above field, there were two exploratory bore holes that were seen during the walkover survey (Plate 279Plate 277, Plate 279).
- 2.8.20 In another crop field directly south of the north-east to south-west railway line there was a fenced-off compound with vehicles and plant in on the northern edge of the field near to the field entrance (Plate 278).
- 2.8.21 No other instances of Modern Disturbance were seen during the walkover survey.

### **Plate 276: 'Goal posts' and markers (exploratory equipment) in crop field with overhead lines and pylons, looking south.**

**Plate 277: Potential borehole in crop field with overhead lines, looking south.**

**Plate 278: External company compound with vehicles and plant in crop field with pylons and overhead lines, looking east.**

**Plate 279: Potential boreholes in crop field (circled in red) with pylon and overhead lines, looking north-west.**

## **Annex E**

### **Scoped Out Listed Buildings**

# Contents

1.	Scoped out Listed Buildings	3
2.	Listed Buildings included in the Baseline Report but scoped out of assessment in the PEIR	126

# 1. Scoped out Listed Buildings

1.1.1 In accordance with the methodology presented in the EIA Scoping Report (National Grid, 2022) for the Project listed buildings have been scoped out if:

- The buildings are beyond the 250 m study area and are outside the ZTV. At this distance from the Project the only change to setting is likely to be visual and therefore a lack of visibility of the Project would mean that it can be reasonably concluded that no change to setting would occur
  - At this stage no buildings have been scoped out on this basis but this will be reviewed at the point an updated ZTV is produced
- Buildings that are of a type that have a restricted setting due to their inherent characteristics. This group includes, but may not be limited to milestones, signposts, or way makers, drinking fountains, pump heads, dove cots, icehouses, and gravestones /markers/ tombs within churchyards
  - These are identified by their building type in the table below
- Buildings that are located within settlements and do not have settings that extend beyond the urban area and where the Project does not introduce new infrastructure into this setting. This requires a rapid assessment to check that any buildings in this category with settings that extend to the Project are included in assessment. This has been undertaken based on a building's location (supported by review of current mapping and aerial imagery). It was assumed that domestic buildings, shops, public houses have settings that are informed by their settlement location and do not extend beyond this, except were demonstrated otherwise by location information. This also includes buildings located within conservation areas
  - These are identified by the name of the settlement in which they are located in the table below
- Buildings that are separated from the Project by other major infrastructure (e.g., motorways, major dual carriageways, active mainline railways) where it can be reasonably concluded that the infrastructure was a pre-existing barrier that the setting of a building would not extend beyond
- Buildings within Tilbury Docks whose function and significance is derived from the activities of the docks and do not extend beyond the geographical limits of the dockyard as the Project does not introduce new infrastructure into this setting
- Buildings that are separated from the Project by the Bramford, Norwich Main and Tilbury Substations as these structures already have a notable influence

on the setting of assets that the addition of overhead lines beyond does not create appreciable change. Cumulative likely significant environmental effects will be assessed as part of the ES

Table 1.1 Scoped out listed buildings with reason for scoping

List Entry	Name	Grade	Easting	Northing	Reason for scoping out
1025024	BUTTON HALL	II	563175	190995	Located within Herongate and Ingrave settlement

1480306	Dick Nunn's Smithy	II	585152	222626	Located within Coggeshall settlement

## 2. Listed Buildings included in the Baseline Report but scoped out of assessment in the PEIR

2.1.1 In accordance with the methodology presented in the EIA Scoping Report (National Grid, 2022) for the Project any other listed buildings (not already scoped out for one of the above reasons) would be scoped out where it has been identified that their settings do not extend to the Project and therefore there would be no potential for impact. This is identified through the assessment of setting and value in Appendix 11.1: Historic Environment Baseline Report, and where identified (Table 2.1), these buildings are not taken forward for impact assessment in the PEIR.

Table 2.1 Listed buildings included in the Baseline Report but scoped out of assessment in the PEIR

# Appendix 11.2: Historic Environment Assessment Tables

# Appendix 11.2 – Historic Environment Assessment Tables

## 1.1 Introduction

- 1.1.1 This appendix has been produced to support Chapter 11: Historic Environment in Volume I. It sets out the results of the assessment conducted as part of the PEIR, outlining the preliminary effects on:
- Designated and Non-designated Heritage Assets during construction – see Section 2
  - Designated Heritage Assets during operation (and maintenance) – see Section 3
- 1.1.2 The ID numbers included in the tables below for designated assets refer to the National Heritage List Entry number. The ID numbers included for non-designated heritage assets are Project ID numbers, which are used throughout Chapter 11: Historic Environment in Volume I, and all supporting appendices and figures. The values attributed to heritage assets below are described in Appendix 11.1: Baseline Report. The effects listed below are reported in relation to the section of the Project that they are located, as per the below Project Sections:
- Section A: South Norfolk Council
  - Section B: Mid Suffolk District Council
  - Section C: Babergh District Council, Colchester City Council and Tendring District Council
  - Section D: Colchester City Council
  - Section E: Braintree District Council
  - Section F: Chelmsford City Council
  - Section G: Brentwood Borough Council and Basildon Borough Council
  - Section H: Thurrock Council

## 2. Preliminary Construction Effects

### Designated Heritage Assets

#### Section A

Table A11.2.1: Preliminary Construction Effects on Listed Buildings – Section A

Section A: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1178820	Church of All Saints	I	High	Plant movement, tall cranes for pylon construction causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1049992	Church of All Saints	I	High	Distant plant movement, tall cranes for pylon construction causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1180035	Church of St Mary	I	High	Plant movement, tall cranes for pylon construction causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1050237	Church of St Remigius	I	High	Plant movement/ noise, tall cranes for pylon construction,	Standard construction	Significant temporary negative effect

Section A: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
				<p>three pulling locations, haul road construction causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.</p> <p>Waveney Valley Alternative would also introduce plant movement/noise and a large construction working area, resulting in the same effects.</p>	mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	
<b>1373056</b>	Kenningham Hall	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, access road construction causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1050442</b>	Glebe Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line (overhead line) mitigation works causing a major change to the rural aspect of the asset's setting, which makes a minor contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1050698</b>	Flordon Hall	II*	High	Plant movement/ noise, tall cranes for pylon construction, near two pulling locations, haul road construction, overhead line mitigation works causing a	Standard construction mitigation as outlined in Appendix 4.1:	Significant temporary negative effect

				major change to the rural aspect of the asset's setting, which makes a minor contribution to its value	Draft Outline CoCP in Volume III.	
<b>1172231</b>	Piggery 60 Yards South of Flordon Hall	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near two pulling locations, haul road construction, overhead line mitigation works causing a major change to the rural aspect of the asset's setting, which makes a minor contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1373055</b>	Barn to Flordon Hall	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near two pulling locations, haul road construction, overhead line mitigation works causing a major change to the rural aspect of the asset's setting, which makes a minor contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1050372</b>	Limetree Farm Cottages	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
<b>1152683</b>	Limetree Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul	None	Not significant temporary negative effect

Section A: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
				road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value		
<b>1050373</b>	Barn East of Limetree Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
<b>1152690</b>	Stables Immediately South-East of Limetree Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
<b>1373217</b>	Cart Shed and Hay Loft South-East of Limetree Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect

Section A: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1050374	Corner Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1152699	Barn Adjoining Corner Farmhouse on South-West	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1178686	St Mary's Cottage	II	Medium	Plant movement/ noise, tall cranes for pylon construction, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1050076	Mary's Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a	None	Not significant temporary negative effect

Section A: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
				moderate contribution to its value		
<b>1302309</b>	Barn Immediately North-West of Mary's Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
<b>1171167</b>	Ebenezer Cottage	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value	None	Not significant temporary negative effect
<b>1373609</b>	Banyard's Hall	II	Medium	Plant movement/ noise, tall cranes for pylon construction, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
<b>1049644</b>	Wood Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works causing a	None	Not significant temporary negative effect

Section A: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
				moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value		
1373606	Quaker's Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, haul road construction causing a major change to the rural aspect of the asset's setting, which makes a minor contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1179387	Manor House	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works, BT overhead line mitigation works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1373399	Low Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works, BT overhead line mitigation works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section A: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1373400	Old Hall	II	Medium	Plant movement/ noise, tall cranes for pylon construction, haul road construction, overhead line mitigation works, causing a major change to the rural aspect of the asset's setting, which makes a minor contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1179474	Tibenham Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, haul road construction, overhead line mitigation works, causing a moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value	None	Not significant temporary negative effects
1050786	White House	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works, BT overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effects
1050829	Park Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, haul road construction, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effects

<b>Section A: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Construction Effect</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1049736</b>	Heywood Manor	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works, BT overhead line mitigation works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1386527</b>	Willow Bough Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effects
<b>1049737</b>	Willows Farmhouse	II	Medium	Plant movement/ noise, tall cranes for pylon construction, near a pulling location, haul road construction, overhead line mitigation works, causing a moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value	None	Not significant temporary negative effects
<b>1373552</b>	Hawthorn Cottage	II	Medium	Plant movement/ noise, tall cranes for pylon construction, haul road construction, causing a minor change to the rural aspect of the asset's setting,	None	Not significant temporary negative effects

Section A: Listed Buildings

2.1.1 There are no Registered Parks and Gardens included in assessment in the PEIR within Project Section A.

## Section B

Table A11.2.4: Preliminary Construction Effects on Listed Buildings – Section B

<b>Section B: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Construction Effect</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1181735</b>	Church of St Mary the Virgin	II*	High	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1033123</b>	Church of St Mary	I	High	Plant movement/ noise, tall cranes for tower construction, near two pulling locations, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1180592	Spring Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near two pulling locations and haul road construction causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1352279	Rookery Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1033192	Spalls Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1352072	Church of St Peter	I	High	Plant movement/ noise, tall cranes for tower construction, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1231082	Church of St Mary	I	High	Plant movement/ noise, tall cranes for tower construction, haul road construction, Cable undergrounding works, tower dismantling works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1231088	The Dower House	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, haul road construction, overhead line mitigation works and pipeline protection works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1231756	Church of St Mary	I	High	Plant movement and noise during Project undergrounding works and tower dismantling works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1231364	Lower Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near two pulling location, haul road construction and overhead line mitigation works causing a moderate change to the rural	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
				aspect of the asset's setting, which makes a moderate contribution to its value	CoCP in Volume III.	
1033018	Church of St Mary	I	High	Plant movement/ noise, tall cranes for tower construction, near a pulling location, haul road construction and overhead line mitigation works causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1251602	Long Meadow	II	Medium	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1251594	Barn 50 Metres East of Castle Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works and tower dismantling works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1263030	Church of St Mary	I	High	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1251598	Mount Pleasant Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1250948	Valley Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, for tower dismantling, near a pulling location, haul road construction, overhead line mitigation works and pipeline protection works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1251595	Court Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, haul road construction and overhead line mitigation works causing a major change to the rural aspect of the	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline	Significant temporary negative effect

ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
				asset's setting, which makes a moderate contribution to its value	CoCP in Volume III.	
1182737	The Rookery	II	Medium	Plant movement/ noise, tall cranes for tower construction and haul road construction causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1032787	Park House	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, haul road construction and a works compound location causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1032788	Former Stable Block at St Johns Farm About 15m North of Park House	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, haul road construction and a works compound location causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1182135	Former Groom's House and Coach House About 30m East of Park House	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, haul road construction and a works compound location causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1352238	Hill House	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location and haul road construction works causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1181694	Gibsons Farm House	II	Medium	Plant movement/ noise, tall cranes for tower construction, for tower dismantling, near a pulling location and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1181726	Hall Farm House	II	Medium	Plant movement and noise during Project undergrounding works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1032806	Barn About 30 m West of Hall Farm House	II	Medium	Plant movement and noise during Project undergrounding works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1352239	Pountney Hall	II	Medium	Plant movement and noise during Project undergrounding works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1032805	Barn About 40 m North East of Poutney Hall	II	Medium	Plant movement and noise during Project undergrounding works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1352111	Starhouse Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction works and overhead line mitigation works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1182599	Abbey Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction and haul road construction works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1180451	Hempnalls Hall	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location and haul road construction works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1352480	Willow Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction and haul road construction works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1032244	Boundary Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction works and pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1352504	Lodge Cottage	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction works and pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1180527	Mendlesham Hall	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction works, overhead line mitigation works, and pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1032727	Grange Farmhouse	II	Medium	Plant movement/ noise for pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1180790	Barn And Attached Cartshed, 50 m North of Grange Farmhouse	II	Medium	Plant movement/ noise for pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1032730	Hill Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, haul road construction works and overhead line mitigation works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1180903	Barn, 40 m South West Of Rookery Farm	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction, overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1182121	Poplar Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near pulling location and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1352325	Doles Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, overhead line mitigation works, and haul road construction works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1032663	Star Orchard	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, overhead line mitigation works, and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
				makes a moderate contribution to its value		
1032662	Firtree Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, overhead line mitigation works, and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1182102	Upland House	II	Medium	Plant movement/ noise, tall cranes for tower construction and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1032661	Grange Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1182013	Stowupland Hall	II	Medium	Plant movement/ noise for pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1033189	Upper Lonsdales Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, overhead line mitigation works, and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1033215	Roydon Hall	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, overhead line mitigation works, and haul road construction works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1284584	Barn 30 Metres North West of Roydon Hall	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, overhead line mitigation works, and haul road construction works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1352074	Garden Wall Enclosing Garden to South Side of Roydon Hall	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, overhead line mitigation works, and haul road construction works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1182339	Hill Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1352073	Creeping Hall	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1033214	Grove Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location and haul road construction works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1277414	Newton Cottages	II	Medium	Plant movement/ noise, tall cranes for tower construction and haul road construction works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1231093	College Grove Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works and tower dismantling works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1231581	Bungeons Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works and tower dismantling works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1231443	Home Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works and tower dismantling works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1231522	Fairfax House	II	Medium	Plant movement and noise during Project undergrounding works and tower dismantling works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1278102	Ashburnham Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works and tower dismantling works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1231305	Moat Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction works and overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1278293	Former Stable Range 30 m West of Moat Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction works and overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effect	Mitigation	Significance of Effect
1033021	Gibbons Farm Cottage	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction works, Project undergrounding works and tower dismantling works and overhead line mitigation works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1352142	Hascot Hill Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction works, Project undergrounding works and tower dismantling works and overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1032952	Ringshall House	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction works and tower modification works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Significant temporary negative effect

Table A11.2.6: Preliminary Construction Effects on Conservation Areas – Section B

Section B: Conservation Areas					
ID Number	Name	Value	Construction Effect	Mitigation	Significance of Effect
<b>CA47</b>	Mellis	Medium	Plant movement and noise during Project undergrounding works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
<b>CA45</b>	Badley Church Green	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location, haul road construction, pipeline mitigation works and overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting,	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section B: Conservation Areas					
ID Number	Name	Value	Construction Effect	Mitigation	Significance of Effect
			which makes a moderate contribution to its value		

2.1.2 There are no Registered Parks and Gardens included in assessment in the PEIR within Project Section B.

## Section C

Table A11.2.7: Preliminary Construction Effects on Listed Buildings – Section C

<b>Section C: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1033409</b>	Wenham Grange	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction and overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1033410</b>	Church of St Lawrence, Formerly Church of All Saints	I	High	Plant movement, tall cranes for tower construction causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Neutral
<b>1036898</b>	Birch House Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near a pulling location and haul road construction causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1036952</b>	Church Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction, overhead line mitigation works and pipeline protection works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1036957	Higham Hall	II	Medium	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1036958	The Old Vicarage	II	Medium	Plant movement and noise during Project undergrounding works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1036963/ 1036986	Dewlands Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1036983	Lark Hall	II	Medium	<p>Plant movement and noise during Project undergrounding works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.</p> <p>The construction vibration assessment (Chapter 14: Noise and Vibration in Volume I and Figure 14.2: Initial Construction Noise and Vibration Assessment Outputs in Volume II) identified that the asset would potentially be significantly negatively affected by</p>	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III, in particular NV04 in relation to vibration. Also for vibration, specific BPM mitigation measures would be developed.	<p>Significant temporary negative effect due to change to setting.</p> <p>Significant negative effects from construction vibration would be expected to be avoided and mitigated to a minimum with the use of BPM, therefore the effects</p>

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
				underground cable construction, without specific best practical means (BPM) mitigation measures.		are likely to be not significant.
1036984	Pintins	II	Medium	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1036985	Tiffins	II	Medium	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1036991	Lowe Hill House	II*	High	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1111421	Gig House Approximately 10 m North East of Newhouse Farmhouse	II	Medium	Plant movement and noise during the construction of an EACN access carriageway causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1111459	Jenning's Farmhouse	II	Medium	Plant movement and noise during the construction of an EACN access carriageway causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1112060	Church of St Mary	II*	High	Plant movement and noise, tall cranes for tower construction, haul road construction, overhead line mitigation works, pipeline protection works and Project undergrounding works, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1112086	Thatched Cottage	II	Medium	Plant movement and noise, overhead line mitigation works, pipeline protection works and Project undergrounding works, causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1112088	Whaley Farmhouse	II	Medium	Plant movement and noise during pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1112091	Hungerdowns Farmhouse	II	Medium	Plant movement and noise during permanent bund construction and substation construction causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
1112093	Maltings Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1112094	Blue Barns Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction and pipeline protection works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1147592	Beaumaris Witheys	II	Medium	Plant movement and noise, overhead line mitigation works, pipeline protection works and Project undergrounding works, causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1147645	Gods House Farmhouse	II	Medium	Plant movement and noise during temporary drainage works and temporary cable compound activity causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1147743	Bounds Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, Project undergrounding works, near a pulling location and permanent bund construction causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1147771	Barn Approximately 40 Metres North West of Lodge Farmhouse	II	Medium	Plant movement and noise during pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1194408	Church of St Mary	II*	High	Plant movement and noise, tall cranes for tower construction and haul road construction causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1198589	Idle Waters, The Island	II	Medium	Plant movement and noise during temporary drainage works causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1223452	Church of St Mary	I	High	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1223463	School North West of Church of St Mary	II	Medium	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1223464	Church Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1223469	Langford Hall	II	Medium	Plant movement and noise during Project undergrounding works and temporary cabling haul road use causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1223498	Pungford Cottages	II	Medium	Plant movement and noise during temporary cabling haul road use causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1223526	Glebe Farmhouse	II	Medium	<p>Plant movement and noise during Project undergrounding works and temporary cabling haul road use causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value</p> <p>The construction vibration assessment (Chapter 14: Noise and Vibration in Volume I and Figure 14.2: Initial Construction Noise and Vibration Assessment Outputs in Volume II) identified that the asset would potentially be significantly negatively affected by underground cable construction, without specific best practical means (BPM) mitigation measures.</p>	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III, in particular NV04 in relation to vibration. Also for vibration, specific BPM mitigation measures would be developed.	<p>Significant temporary negative effect</p> <p>Significant negative effects from construction vibration would be expected to be avoided and mitigated to a minimum with the use of BPM, therefore the effects are likely to be not significant.</p>
1223527	Glebe House	II	Medium	Plant movement and noise during Project undergrounding works and temporary cabling haul road use causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1223548	Barn to East of Glebe Farmhouse	II	Medium	<p>Plant movement and noise during Project undergrounding works and temporary cabling haul road use causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.</p> <p>The construction vibration assessment (Chapter 14: Noise and Vibration in Volume I and Figure 14.2: Initial Construction Noise and Vibration Assessment Outputs in Volume II) identified that the asset would potentially be significantly negatively affected by underground cable construction, without specific best practical means (BPM) mitigation measures.</p>	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III, in particular NV04 in relation to vibration. Also for vibration, specific BPM mitigation measures would be developed.	<p>Significant temporary negative effect</p> <p>Significant negative effects from construction vibration would be expected to be avoided and mitigated to a minimum with the use of BPM, therefore the effects are likely to be not significant.</p>
1253912	Fountain Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, near two pulling locations, overhead line mitigation works, haul road construction and pipeline protection works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1253913	Wick Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, overhead line mitigation works, haul road construction and pipeline protection works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1253914	Barn Adjacent to Road at Wick Farm	II	Medium	Plant movement/ noise, tall cranes for tower construction, overhead line mitigation works, haul road construction and pipeline protection works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1253915	Bloomfields Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, overhead line mitigation works, haul road construction and pipeline protection works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1261548	Barn Approximately 40 m North East of Bloomfields Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, overhead line mitigation works, haul road construction and pipeline protection works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1267140	Grove Cottage	II	Medium	Plant movement and noise during Project undergrounding works and temporary cabling haul road use causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1267273	Ewens Farmhouse	II	Medium	Plant movement and noise during Project undergrounding works, temporary cabling haul road use and temporary drainage works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1267300	Broomhouse to North of The Hall	II	Medium	Plant movement and noise during Project undergrounding works and temporary cabling haul road use causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1273800	Mulberry House	II	Medium	Plant movement and noise during Project undergrounding works, adjacent to a cable compound and temporary cabling haul road use causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1285586	Wall and Gates adjacent to Road, Enclosing Garden to North of Wenham Grange	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction and overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1285727	Coles Green Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction and haul road construction works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1322652	Thatched Cottage	II	Medium	Plant movement and noise during Project undergrounding works and temporary cabling haul road use causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1337176	Newhouse Farmhouse	II	Medium	Plant movement and noise during the construction of an EACN access carriageway causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
1337177	Barn Approximately 20 m West of Newhouse Farmhouse	II	Medium	Plant movement and noise during the construction of an EACN access carriageway causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
1351596	Church of St Mary	II*	High	Plant movement and noise during Project undergrounding works and temporary cabling haul road use causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
1351617	Fenn Farmhouse	II	Medium	Plant movement/ noise, tall cranes for tower construction, haul road construction and overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1351620	Church of All Saints	II*	High	Plant movement/ noise, tall cranes for tower construction, haul road construction and overhead line mitigation works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1351625	Church of St Mary	II*	High	Plant movement and noise during Project undergrounding works and haul road construction causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1351957	Vauxhall	II	Medium	Plant movement and noise during Project undergrounding works, pipeline protection works, and haul road construction causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1337174	Grove Farmhouse	II	Medium	Plant movement and noise during the construction of an EACN access carriageway causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1337155	Braham Hall	II	Medium	Plant movement and noise during the construction of an EACN access carriageway causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
1036982	Holton Place	II	Medium	Plant movement and noise during Project undergrounding works and haul road construction causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1111418	Pair of Cottages Approximately 10 m South of the Fox and Hounds Public House	II	Medium	Plant movement and noise during the construction of an EACN access carriageway causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
1147792	Milestone on East Verge Approximately 240 m South of Harts Lane	II	Medium	Plant movement/ noise, tall cranes for tower construction and near a pulling location causing a minor change to the roadside aspect of the asset's setting, which makes a major contribution to its value	The asset is located within the draft Order Limits and so should be demarcated during construction to avoid accidental damage	Not significant temporary negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
1322614	Lodge Farmhouse	II	Medium	Plant movement and noise during pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
1223465	The Hall	II*	High	Plant movement and noise during Project undergrounding works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
1223466	Langham Hall Farmhouse	II	Medium	Plant movement and noise during pipeline protection works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect

Table A11.2.8: Preliminary Construction Effects on Scheduled Monuments – Section C

Section C: Scheduled Monuments					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1002146	Crop mark site S of Ardleigh	High	Plant movement and noise, tall cranes for tower construction, haul road construction, overhead line mitigation works, pipeline protection works and Project undergrounding works, causing a moderate change to the rural aspect of the asset's setting, which makes a	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

			moderate contribution to its value

Table A11.2.9: Preliminary Construction Effects on Conservation Areas – Section C

<b>Section C: Conservation Areas</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>CA41</b>	Stratford St Mary	Medium	Plant movement and noise during Project undergrounding works and temporary drainage works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	None	Not significant temporary negative effect
<b>CA26</b>	Ardleigh	Medium	Plant movement and noise, tall cranes for tower construction, haul road construction, overhead line mitigation works, pipeline protection works and Project undergrounding works, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

2.1.3 There are no Registered Parks and Gardens included in assessment in the PEIR within Project Section C.

## Section D

Table A11.2.10: Preliminary Construction Effects on Listed Buildings – Section D

<b>Section D: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1224521</b>	Church of St James	I	High	Plant movement, tall cranes for pylon construction, haul road construction and overhead line mitigation works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1110894</b>	Old Bouchiers Hall	II	Medium	Plant movement, tall cranes for pylon construction, near a pulling location, haul road construction and public right of way (PRoW) works causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1170055</b>	Green Farmhouse	II	Medium	Plant movement, tall cranes for pylon construction, haul road construction and PRoW works causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1169966</b>	Numbers 1, 2 And 3 Brick Cottages	II	Medium	Plant movement, tall cranes for pylon construction, near a pulling location, haul road construction and overhead line	Standard construction mitigation as outlined in	Significant temporary negative effect

Section D: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
				mitigation works causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Appendix 4.1: Draft Outline CoCP in Volume III.	
<b>1170085</b>	Church House Farmhouse	II	Medium	Plant movement, tall cranes for pylon construction, haul road construction, pipeline mitigation works causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1222602</b>	Fordham Place	II	Medium	Plant movement, tall cranes for pylon construction, near a pulling location and haul road construction causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect
<b>1222665</b>	Wisteria	II	Medium	Plant movement and noise during the Project undergrounding works, and haul road construction causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1222667</b>	Messrs Peatling And Cawdron	II	Medium	Plant movement and noise during the Project undergrounding works, and haul road construction causing	Standard construction mitigation as outlined in	Not significant temporary negative effect

Section D: Listed Buildings						
ID Number	Name	Grade	Value	Construction Effects	Mitigation	Significance of Effect
				a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Appendix 4.1: Draft Outline CoCP in Volume III.	
<b>1222668</b>	House Adjoining And To The North Of Peatling And Cawdron	II	Medium	Plant movement and noise during the Project undergrounding works, and haul road construction causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1222771</b>	Knowles Cottage	II	Medium	Plant movement and noise during the Project undergrounding works, and haul road construction causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1222772</b>	Knowles Farmhouse	II	Medium	Plant movement and noise during the Project undergrounding works, and haul road construction causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1222850</b>	Old House Farmhouse	II	Medium	Plant movement/ noise for Project pipeline protection works, causing a minor change to the rural aspect of the asset's setting, which	Standard construction mitigation as outlined in Appendix 4.1:	Not significant temporary negative effect

<b>Section D: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
				makes a moderate contribution to its value	Draft Outline CoCP in Volume III.	
<b>1222851</b>	Coachouse To West Of Old House Farmhouse	II	Medium	Plant movement/ noise for Project pipeline protection works, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1222853</b>	Barn At Oldhouse Farmyard, Aligned North South	II	Medium	Plant movement/ noise for Project pipeline protection works, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1222854</b>	Barn, Aligned East West At Oldhouse Farm	II	Medium	Plant movement/ noise for Project pipeline protection works, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Not significant temporary negative effect
<b>1222857</b>	Granary At Oldhouse Farm	II	Medium	Plant movement/ noise for Project pipeline protection works, causing a minor change to the rural aspect of the asset's setting, which	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline	Not significant temporary negative effect

<b>CA28</b>	West Tilbury	High	Plant movement and noise during the Project undergrounding works through the CA causing a physical effects and a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Standard construction mitigation as outlined in Appendix 4.1: Draft Outline CoCP in Volume III.	Significant temporary negative effect

2.1.7 There are no Registered Parks and Gardens included in assessment in the PEIR within Project Section H.

## 2.2 Non-designated Heritage Assets

### Section A

Table A11.2.26: Preliminary Construction Effects on Non-Designated Heritage Assets – Section A

<b>Section A: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1000</b>	Medieval and post-medieval pottery	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1001</b>	Neolithic polished flint axehead	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1003</b>	Bunwell Wood medieval moat	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1005</b>	Prehistoric worked flints and Bronze Age copper alloy socketed axehead	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1007</b>	Possible Bronze Age barrow and possible undated gallows site	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1008</b>	Site of medieval field system	Low	No physical effect as asset located outside draft Order Limits	None	Neutral
<b>1010</b>	Kenningham deserted medieval village	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
<b>1012</b>	Dairy Farm	Low	No physical effect as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1013	Medieval moated site	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
1014	Medieval moats	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1015	Medieval moated site	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1016	Roman and medieval to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1017	Neolithic/Early Bronze Age polished flint axehead	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1018	Medieval pottery sherds, Low Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1019	Roman pottery sherds	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1020	Prehistoric pot boiler concentration	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
1022	Part of Roman settlement at Venta Icenorum, plus multi-period finds	High	No physical effects as asset located outside draft Order Limits	None	Neutral
1023	Medieval coin	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1024	Possible medieval or post medieval moat	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
1025	Medieval coin	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1026	Medieval moat	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1027	Medieval moat	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1029	Medieval strip fields	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
1032	Earthworks of possible medieval manorial site and ridge and furrow	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1033	Cropmarks of a ring ditch, possible Bronze Age or Roman round barrow, or Iron Age roundhouse	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1034	Roman and medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1035	Potentially prehistoric flints	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1036	Medieval and post medieval pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1037	World War One military airfield	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1038	Medieval coin	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1040	Site of post medieval brick kiln	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1041	Multi-period finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1043	Cropmarks of undated rectangular enclosures	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1044	Medieval pottery sherds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1047	Timber framed barn	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1048	Post medieval brickworks	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1049	Multi-period finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1052	Multi-period finds scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1053	Roman and medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1054	Roman brooch and post medieval buckle	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1055	Undated possible kilns, pits and ditches and post-medieval field boundary	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
1056	Banyard's Hall medieval moat	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1057	Bunwell Bronze Age hoard	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1058	Multi-period finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
1059	Middle Bronze Age socketed spearhead	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1060	Medieval coin	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1061	Roman coin and Middle Saxon pin	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1062	Multi-period finds including undatable furnace bottom	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
1063	Multi-period finds scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1064	Site of Winfarthing Great Park medieval deer park	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1065	Neolithic/Bronze Age and medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1066	Possible Roman settlement and multi-period finds	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1067	Site of Kenningham Church	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1069	Neolithic flint core	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1070	Mesolithic flint tranche axehead and medieval metal objects	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1071	Post-medieval ditch	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1072	Cropmarks of medieval strip fields	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1075	Possible Roman settlement and multi-period finds	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1076	Medieval pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1077	Medieval pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1078	Prehistoric flake	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1079	Medieval pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1080	Medieval pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1081	Medieval pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1082	Roman coin and unidentified object	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1083	Mesolithic and Neolithic worked flints and Bronze Age socketed point	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1084	Prehistoric burnt flint	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1085	Late medieval or early post medieval pottery sherd, east of Eton's Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1086	Former site of the Roydon Head Roman statue	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1087	Multi-period finds scatter	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
1088	Undated and Roman finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1089	Deserted medieval/post medieval settlement and multi-period finds	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1090	Possible site of medieval house, lower slope of valley just above valley floor	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1091	Prehistoric flint artefacts and medieval pottery sherds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1092	Prehistoric flint artefacts	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect

<b>Section A: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1093</b>	Multi-period objects and pottery sherds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>1094</b>	Possible site of medieval house, lower slope of valley just above valley floor	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1095</b>	Roman brooch	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1096</b>	Possible site of medieval house, lower slope of valley just above valley floor	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1097</b>	Prehistoric flint flakes and Roman Pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1098</b>	Prehistoric flint artefacts and Iron Age/Early Saxon pottery sherds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1099</b>	Roman and medieval pottery sherds, east of Water Leydons	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1100</b>	Roman brooch	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1101</b>	Prehistoric burnt flint	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1102	Multi-period finds scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1103	Multi-period metal detector finds and pottery sherds. Possible associated with deserted medieval/post medieval settlement (1089)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
1105	Medieval metal finds	Low	Construction of the Project would remove most of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
1106	Late Saxon pendant	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1107	Multi-period objects	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1108	Neolithic and medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1111	Multi-period metal detector finds and burnt mound	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
1112	Prehistoric flint artefacts and medieval pottery sherds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1113	Prehistoric flint flakes	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1114	Prehistoric pit	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1117	Multi-period finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1118	Multi-period findspot	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1119	Medieval and post medieval metalwork	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1120	Prehistoric burnt mound	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
1121	Roman coin	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1122	Site of Humbleyard Hundred moot, Swardeston	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1123	The Roydon Head Roman statue (original site)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1124	Prehistoric pot boiler concentration, field east of Vine Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

<b>Section A: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1125</b>	Roman horse-head copper alloy bowl escutcheon	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1126</b>	Medieval metalwork	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1127</b>	Iron Age coin	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1130</b>	Early Saxon cemetery, Roman settlement and multi-period finds	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
<b>1131</b>	Undated, Middle Bronze Age and Late Saxon to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1132</b>	Multi-period finds scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1133</b>	Multi-period finds scatter	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1136</b>	Bronze Age, Iron Age, Roman and possible Early Saxon features	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1137</b>	Iron Age to post medieval objects	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
<b>1138</b>	Four medieval coins	Low	Construction of the Project would remove some of the	None	Not significant, permanent, negative effect

ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
			recorded area of this asset, negatively affecting its value		
1139	Early Roman coin hoard and multi-period finds	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1141	Medieval to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1142	Cropmark of ring ditch	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1143	Medieval and post medieval metalwork	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1144	Iron Age and Roman features and possible Roman building at Dunston Hall golf course	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1146	Undated post hole, Iron Age pits and quarries at Dunston Hall Golf Course	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1147	Bronze Age and Iron Age features, Iron Age buildings	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1148	Post medieval coin	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1149	Medieval horse harness pendant and multi-period metal objects and coins	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

<b>Section A: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1150</b>	Undated linear ditch cropmark	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1151</b>	Multi-period finds scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1152</b>	World War Two pillbox and searchlight battery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1155</b>	Late Iron Age to Roman and Late Saxon to post medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
<b>1156</b>	Late Saxon and medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1157</b>	Medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1158</b>	Bronze Age, Roman, Saxon, medieval and post medieval objects	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1159</b>	Medieval to post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1160</b>	Undated and unidentified cropmark	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

<b>Section A: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1161</b>	Late Iron Age to Roman and Saxon to post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
<b>1162</b>	Multi-period finds scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1164</b>	Roman, Early Saxon and Late Saxon to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1166</b>	Medieval pendant	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1167</b>	Bronze Age, Saxon and post medieval metal objects	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1168</b>	Roman metal-working site and Roman, Early Saxon and Late Saxon to post-medieval finds	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
<b>1169</b>	Earthworks of undated ditch, bank, trackway, and enclosure	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1170</b>	Multi-period metal objects and pottery sherds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1171</b>	Possible Bronze Age ring ditch	Neg	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1172	Possible undated archaeological site	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1175	Silver pilgrim badge and multi-period finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1176	Medieval finger ring	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1177	Medieval brooch and spur	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1178	'Money Close' placename	Neg	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1179	Prehistoric worked flint and Roman to post-medieval metal objects	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1181	Site of St James' Chapel, Gowthorpe, Swardeston	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1182	Small enclosed Roman inhumation cemetery: prehistoric, post-medieval and undated features and multi-period finds	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1184	Late Bronze Age flint scatters, post medieval building material	Low	Construction of the Project would remove some of the	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
			recorded area of this asset, negatively affecting its value		
<b>1185</b>	Late Bronze Age flint concentrations, post medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>1186</b>	Probable post medieval boundary	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1188</b>	Multi-period finds scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1189</b>	Multi-period objects, coins, and pottery sherds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1190</b>	Roman, Early Saxon, medieval and post-medieval finds	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1191</b>	Medieval strap end and post medieval spur	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1192</b>	Roman, Late Saxon, medieval and post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
<b>1193</b>	Multi-period finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1195</b>	Multi-period finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1198	Possible Early Saxon to medieval human remains	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1199	Coin of George III	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1200	Coin of William III	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1202	Medieval coins	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1203	Prehistoric flints, Roman and medieval pottery sherds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1204	Late Bronze Age, Roman, medieval, and post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1205	Medieval and post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1206	Roman, Early Saxon, and Late Saxon to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1207	Medieval and late medieval to post medieval pottery sherds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1208	Mesolithic flint blade core, Roman coins and medieval to post medieval objects	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1209	Post medieval brick making and extraction site	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1211	Post medieval trackway or road	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1212	Possible undated enclosure and associated ditches	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1213	Medieval or post medieval weight	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1214	Post medieval field boundaries	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1217	Roman and Middle/Late Saxon to post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
1218	Multi-period findspot	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1219	Bronze Age rapier	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1221	Shallow earthworks of probable medieval to post medieval date, Swardeston Hill	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1222	Possible linear cropmarks of uncertain	Low	Construction of the Project would remove some of the	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
	archaeological significance		recorded area of this asset, negatively affecting its value		
1223	Cropmarks of a series of post medieval field boundaries	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1224	Middle/Late Bronze Age, Late Iron Age/Roman and medieval to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1225	Roman and Late Saxon to post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
1227	Probable area of medieval settlement and undated field boundaries and possible ring-ditch	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
1228	Late Saxon bridle fitting	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1229	Prehistoric and Early Neolithic worked flint and multi-period pottery	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1230	Multi-period finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
1231	Medieval to post-medieval field boundaries and enclosure	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1232	Probable site of medieval village of Gowthorpe	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
1233	Prehistoric, Roman and Late Saxon to post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
1234	Prehistoric worked flint, Roman, medieval, and post-medieval ceramic artefacts	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1235	Prehistoric and Neolithic worked flint, Roman, medieval, and post-medieval pottery, post-medieval clay pipe	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1237	Cropmarks of undated field boundaries	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1238	Late prehistoric piercer, medieval and post-medieval pottery, post-medieval clay pipe	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1239	Post-medieval pottery and clay pipe	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1240	Site of a probable World War Two searchlight battery	Low	Construction of the Project would potentially remove some of the recorded area of	Survey of site to record surviving features	Not significant, permanent, negative effect

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
			this asset, negatively affecting its value		
1241	Earthworks of medieval to post medieval enclosures and boundaries surrounding Mangreen Hall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1242	Multi-period finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1243	Cropmarks of fragmentary undated ditches	High	No physical effects as asset located outside draft Order Limits	None	Neutral
1245	Cropmarks of a series of boundary ditches, enclosures, and ponds of probable medieval to post medieval date	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1246	Neolithic to Roman, Early Saxon and medieval finds	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1247	Cropmarks of ditches, possibly relating to former field boundaries of possible Iron Age to Roman date	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1248	Cropmarks of undated ditches, possibly relating to former field boundaries	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1249	Former site of 18th century milestone marking Norwich 4 miles and Ipswich 39 miles	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1250	Cropmarks of fragmentary ditches of unknown date	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1252	Medieval coin hoard (dispersed) and Roman, Late Saxon Anglo-Scandinavian, and post-medieval coins	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
1254	Cropmarks of rectilinear enclosures, field boundaries and ditches of unknown, but possible Roman date	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1255	Cropmarks of field boundaries and ditches of unknown, but possible Roman date	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1256	Cropmarks of possible enclosures, a ring ditch, field boundaries and ditches of unknown, but possible Roman date	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1260	Cropmarks of fragmentary enclosures and field boundaries of unknown but possible Iron Age to Roman or Saxon date	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1261	Large area of dispersed cropmarks of fragmentary enclosures and field boundaries of possible prehistoric to Roman date, Dunston Park	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1262	Cropmarks of possible Bronze Age to Iron Age ditches	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1263	Multi-period finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1264	Cropmarks of undated ditches	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1265	Roman, Early Saxon and Late Saxon to post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1266	Roman and post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1267	Roman coin	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
1268	Medieval and post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1269	Multi-period finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1270	Bronze Age enclosure and other prehistoric and undated remains	Medium	Construction of the Project would remove some of the	Archaeological excavation and recording	Significant, permanent, negative effect

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
			recorded area of this asset, negatively affecting its value		
1271	Roman pits and possible field system south of Mangreen Farm, Swardeston	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1272	Possible Quaker burial ground at Quaker Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1273	Multi-period finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1274	Late Saxon stirrup-strap mount	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1275	Roman and medieval to modern finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1277	Multi-period finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1278	Multi-period finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1279	Multi-period metal objects	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1280	Multi-period metal objects	Low	Construction of the Project would remove some of the	To be determined following further assessment	Not significant, permanent, negative effect

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
			recorded area of this asset, negatively affecting its value		
1281	Post-medieval button	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1282	Roman and Late Saxon to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1283	Late Bronze Age, Roman to Middle Saxon and medieval to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1284	Medieval to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1285	Medieval and post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1286	Roman and medieval to post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1287	Undated possible kilns and extraction pits and post-medieval field boundaries	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1289	Multi-period finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1290	Roman folding knife handle	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect

<b>Section A: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1291</b>	Late Saxon/medieval and post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1293</b>	Late Iron Age to Roman and medieval to post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1294</b>	Roman, Middle Saxon, and medieval coins	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>1295</b>	Roman/Early Saxon strap fitting and Early Saxon brooch	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1297</b>	Undated possible ditches and pits and post-medieval field boundaries	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1298</b>	Roman and Late Saxon to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1299</b>	Roman, medieval, and post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>1300</b>	Medieval lead pot mend and undatable copper alloy casting waste	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>1301</b>	Multi-period finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1302	Medieval to post-medieval finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
1303	Undated possible linear features and post-medieval field boundaries	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
1315	Cropmarks of a polygonal enclosure/ring ditch or possible Roman temple	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1316	Cropmarks of double ditched trapezoidal enclosure	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1317	Cropmarks of enclosures and boundaries to west of Venta Icenorum	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1318	Cropmarks of three ring ditches in a line, possible Bronze Age round barrows, or Iron Age roundhouses	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1321	Cropmarks of two sub-rectangular pit-like features	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1322	Cropmarks of medieval to post medieval boundary ditches and banks	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1323	Cropmarks of boundaries of either Roman or medieval to post medieval date	High	No physical effects as asset located outside draft Order Limits	None	Neutral

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1324	Cropmarks of possible pre-Roman boundary ditches and field boundaries	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1325	Parent record for complex area of phased cropmarks.	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1326	Roman to post-medieval finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1327	Roman, medieval and post medieval objects	High	No physical effects as asset located outside draft Order Limits	None	Neutral
1328	Site of a possible Bronze Age barrow cemetery	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
1329	Site of a probable Bronze Age ring ditch	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1331	Site of a probable Bronze Age ring ditch	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
1332	Site of a probable Bronze Age ring ditch	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
1333	Roman enclosures and associated remains	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section A: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
1334	Neolithic flint find	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
1335	Possible site of post-medieval market and multi-period finds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

## Section B

Table A11.2.27: Preliminary Construction Effects on Non-Designated Heritage Assets – Section B

<b>Section B: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>2000</b>	Pit on East Side of Hascot Hill Valley, Battisford, (Palaeolithic)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>2003</b>	Prehistoric hut site or ditch with cut deer antlers and flint flakes (Mesolithic) in peaty deposit	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2004</b>	A fragment flintworking debris of probable Mesolithic to Neolithic date. A small narrow blade, which is roughly triangular in cross-section. There is a small amount of thick patination on the dorsal face	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2005</b>	A fragment of Mesolithic to early Neolithic flintworking debitage, or possibly a late Mesolithic microlith. It is roughly triangular in shape	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2008</b>	Causewayed ring ditch of unknown date	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2009	Oval cropmark, Bullen Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2012	Wortham Ling (Preh)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2013	A body sherd of a Neolithic probable carinated pot, the fabric is black/brown and has burnt flint inclusions, There are two crude stamps below the shoulder, possibly made with the tip of a bone	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2015	Scatter of Late Neolithic/Early Bronze Age flints	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2016	An assemblage of eight lithic implements with a combined total weight of 95.39g. They are struck from unpatinated dark grey/brown flint and date to the later Prehistoric period, c.3,500-800 BC	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2017	An unpatinated snapped flint long flake or blade. It is triangular in section with edge retouch along one edge, the opposite (thicker) edge cortical	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2018	An unpatinated flint flake or blade struck from a grey/black flint. It has a sub-triangular section and is snapped both longitudinally and transversely, with limited edge retouch or use-wear	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2019	A complete flint Neolithic retouched flake. It is a secondary flake, roughly triangular in shape. A small amount of cortex remains to either side of the dorsal face	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2020	A complete flint Neolithic to early Bronze Age flint core. It is roughly conical in shape with small flaking scars running in different directions on every face. A small amount of thin pebble cortex remains on one face. The flint is dark brown in colour	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2021	27 worked flints and debitage, all of Neolithic to Early Bronze Age date. Debitage: x7 secondary flakes; x9 tertiary flakes; x1 tertiary blade. Worked material: x4 scrapers; x1 awl; x1 retouched blade; 4 retouched flakes	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2022	Eight flakes of flintworking debitage probably dating from the Neolithic to the Early Bronze Age (4000-1600 BC).1. Tertiary flakeLength: 27.6mm; Width: 15.9mm; Thickness:4.6mm;	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
	Weight: 1.788g.2. Core&nbsp;Length: 43.66mm; Width: 44.1mm; Thickness: 16.2mm				
<b>2023</b>	Findspot of a fragment of a Bronze-Age bronze blade, very corroded. (BA)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2024</b>	Rook Hill Farm ('Field 4')	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2025</b>	Findspot of a Bronze-Age barbed and tanged flint arrowhead	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>2027</b>	Findspot of a Bronze-Age barbed and tanged arrowhead found on a Prehistoric settlement site. (BA)	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
<b>2028</b>	Cropmark of two ring ditches	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2029</b>	Cropmark of a large ring ditch	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2037</b>	Small mound or possible barrow of unknown date	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2038	Possible concentric ring ditch of unknown date traversed by an irregular enclosure	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2039	Ring ditch of unknown date, within an irregular enclosure	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2042	Findspot Bronze Age Palstave	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2043	Multi-period finds scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2044	Copper alloy basal looped spearhead	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2045	Bronze Age Hoard	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2046	Findspot of a Bronze-Age socketed axe fragment	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2047	North of Ashburnham Farm, Barking, (Prehistoric)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2048	Blade fragment of a bronze socketed axe. Sketch of outline on Finds Record sheet, recorded at rally. No other significant finds seen, single Roman and Medieval coins mentioned	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2050	Four worked flint implements of later Prehistoric date, probably Bronze Age or later in date, c.2,150-1 BC. They have a combined total weight of 37.96g	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2051	Multi period archaeological artefacts	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2052	Incomplete copper-alloy razor. All edges broken, it originally had a broad blade with a curved cutting edge. At the back of the blade (the blunt edge) are one complete and two incomplete sub-square	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2053	A body sherd from a handmade pottery vessel of probable later Bronze Age to Iron Age date. It has a grey/brown fabric with many crushed white flint inclusions	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2054	A fragment from the tip of a spearhead of Bronze Age date. A short section from close to the tip survives intact with both ends terminating in old breaks	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2055	A flint flake, dorsal face is 80% cortex, one flake scar on this face. There is a notch in one edge and a hinge fracture at the distal end	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2060	An incomplete copper-alloy fragment, possibly from the tip of a blade, perhaps a sword or dagger. It is rectangular in form with tapering and curved tip, pointed oval in cross section and with a slightly flattened mid rib	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2061	A fragment of a copper alloy Bronze Age socketed axe. Only a small section of the socket and the side loop survive. There is a casting seam down the centre of the socket fragment behind the loop. The loop is D-shaped in cross section	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2062	Large Park Field	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2063	Findspot of an Iron-Age miniature terret ring	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2068	Iron-Age settlement site	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2069	Field E of Beans Lane (IA)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2070	Hill House Farm (IA)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2071	A fragment of a probable knobbed terret which is heavily burnt and distorted, Late Iron Age in date	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2072	Bronze unit, some wear and some recent damage on the edge. Identifiable as VA 154-3 "Kentish uncertain", Hobbs 2484-2486 "uninscribed south-eastern bronze".	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2073	Silver Iron Age coin fragment, "Early Face Horse" type (Gregory 1992 type Ca)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2074	Copper alloy brooch, Colchester type. Missing pin and part spring and much of the catchplate; very bent and quite heavily corroded. The wings have traces of grooves	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2075	Bronze coin, Trinovantian, of Cunobelin, corroded and abraded	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2076	A handmade body sherd from a pottery vessel of prehistoric date. It has a grey/brown fabric with	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
	medium to large white quartzite/flint inclusions				
2078	A body sherd from a handmade ceramic vessel of later Prehistoric date, possibly a handle fragment. It has a sandy grey/brown fabric, fired red/brown at the surfaces and containing multiple burnt flint inclusions	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2079	A complete silver Iron Age half unit, dating to the period c.40 BC to AD 20. Unclear uninscribed East Anglian silver 'Boar/Horse'	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2080	A complete silver Iron Age East Anglian inscribed unit of Antedios, dating to c.AD 10-30. 'Antedios Antedi E-Type' or 'Antedios Antd D-Bar'.ABC, 87, nos.1642-5.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2081	A fragment of a copper alloy Iron Age probable strap fitting. All that survives in one curving arm, which is D-shaped in cross-section and becomes slightly straighter towards one end. The outer edge of this arm is decorated with a longitudinal groove	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2083	A copper-alloy Iron Age unit or a core for a plated silver unit of the North Thames region/uncertain tribe, dating to 60 BC- 20 BC. Obverse depicting horse galloping left. Reverse depicting a horse galloping right. Very worn.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2085	An incomplete copper-alloy late Iron Age early Roman Nauheim derivative brooch, One piece with two surviving spring coils, pin and remaining coils are missing.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2086	A fragment of a copper-alloy late Iron Age to early Roman Langton Down bow brooch, only the incomplete spring cover and fragment of the bow now survives.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2088	Copper alloy brooch fragment, Langton Down type. Upper part only, missing pin; damaged spring cover and bow. No surviving decoration on the spring cover. Reeding with a rounded top on the bow.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2089	Copper alloy brooch, Colchester type. Missing spring, pin, wing, catchplate; very corroded. The surviving wing stub has no surviving decoration.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2090	This copper-alloy item is a broken portion of a larger object. It probably forms part of a closed ring or terret	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2091	The worn incomplete wings and upper bow fragment of a copper-alloy Late Iron Age to early Roman Langton Down type bow brooch	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2092	The worn incomplete wings and upper bow fragment of a copper-alloy Late Iron Age to Early Roman Langton Down type bow brooch.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2093	Copper-alloy brooch, Aucissa type	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2094	1 prehistoric body sherd with flint temper 1 rim fragment from a dish in greyware, 2nd century 1 rim fragment of Oxfordware red colour coat, imitation of a Dressel 38, 4th century.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2095	A very worn and corroded fragment of a copper-alloy of a Roman bow brooch most similar to a rosette type	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2096	A complete copper-alloy cosmetic mortar. The bow is crescent shaped with a central longitudinal groove and an end loop.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2100	A body sherd from a Roman grey ware Belgic storage vessel. It has combed decoration on the exterior surface	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2101	An incomplete copper-alloy Late Iron Age to Roman Langton Down brooch.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2102	A worn and incomplete cast copper-alloy Rosette brooch of Iron Age to Roman date.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2103	An incomplete copper-alloy zoomorphic vessel mount of Late Iron Age to Roman date.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2104	An incomplete copper-alloy centre-looped cosmetic mortar of late Iron Age to Roman date. It has a crescent shaped bow, missing one half/end due to old breaks, that is V-shaped in section and expands at its back towards the centre.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2108	An incomplete copper-alloy Iron Age to Roman brooch of the Colchester type, dating to AD 20-60.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2109	A complete Iron Age to Roman copper-alloy penannular brooch dating to circa AD 1-100.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2110	Roman artefact scatter of pottery. (Rom)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2111	Roman pottery vessel full of denarii of Antoninus Pius (AD 138-161)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
2112	Findspot of a Roman puddingstone quern.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2113	Roman road (part of)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2114	Scatter of Rom pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2115	Location of (preh?) worked flint scatter marked	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2116	North of Middle Farm, Barking, (Prehistoric). Location of (Prehistoric?) worked flint scatter	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2117	Findspot of a Neolithic polished flint chisel and small axe	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2118	Near Valley Farm, Offord. Thin scatter, heavy clay soil.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2119	Near Home Farm, Somersham. Thin scatter in heavy clay soil found fieldwalking pipeline route.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2120	Near The Clamps, Somersham. Found fieldwalking pipeline route: Thin pottery scatter, heavy clay soil: 1 Flake-prehistoric. Also, 1 rim sherd; 1 handle sherd and 3 rim sherds-all Medieval. Coarseware 13th-14th century.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2124	A total of three flint flakes of later Prehistoric date. They have a combined total weight of 30.89g and date to the later Neolithic to Iron Age periods	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2125	An unpatinated long flake struck from a brown flint. It has parallel flake scars on the dorsal face and limited crude edge retouch	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2126	Three worked flint flakes of later Prehistoric date, c.2,500-1 BC. They have a combined total weight of 27.81g	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2127	An unpatinated flint flake, possibly a flake from a core. It has a hinge fracture and one snapped end, with limited edge retouch on all sides. The flake measures 27.12mm in length, 32.30mm in width, 8.80mm in thickness and 7.46g in weight	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2128	An unpatinated squat flint flake of later Prehistoric date. It has a hinge fracture at the proximal(?) end, partial cortex on one side, and limited flake removal and crude edge retouch. The flake is struck from a grey/brown flint	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2130	An unpatinated squat flake struck from a pale orange/brown flint. The flake is possibly natural and retains its cortex on the dorsal face, which is slightly concave. It has crude and irregular steep edge retouch on all edges	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2131	Multi period archaeological finds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2132	Six fragments of flintworking debitage of uncertain Mesolithic to early Bronze Age date. Five secondary flakes and one tertiary flake. Total weight: 40.08g	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2134	Dense and widespread Roman artefact scatter of pottery and metalwork, including brooches, coins, figurines and pin	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2135	Roman artefact scatter of pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2137	Roman artefact scatter, including an armlet	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2138	A143 Scole-Stuston Bypass (Rom). Rom coin and pottery (also Sax)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2139	Scatter of Roman pottery	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2140	St John's House Hospital, Lion Road (Rom). series of Roman features.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2141	Roman artefact scatter of metalwork and pottery.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2142	Bramford to Wattisham pipeline. Thin scatter, heavy clay soil: 2 rim sherds, 3 body sherds, RB?--; 2 body sherds-Med (13th-14th century).	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2143	Bramford to Wattisham gas pipeline. Pottery scatter, 180m found fieldwalking along pipeline. Heavy boulder clay, flat. Roman pot, including Samian and tile fragments.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2144	A possible Roman road	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2149	Hill Farm, Somersham. (Rom). Metal detected metalwork scatter.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2151	Probable location of Roman building	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
<b>2155</b>	Roman medieval and post medieval features at land off Bury Road	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2156</b>	Berrys Meadow (Tithe Map) (OS 164) (Rom). 2 sherds Rom pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2157</b>	Long Cooks (Tithe Map) (OS 381). Pottery scatter found by R Colchester during fieldwalking survey, consisting of 9 Rom rims, 1 Samian base and 40 sherds	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>2158</b>	Mary's Field (Tithe Map) OS 687. Roman scatter.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2159</b>	Roman artefact scatter	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
<b>2160</b>	Bronze handle from a wax spatula found metal detecting in 2002	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>2161</b>	Roman artefact scatter (Rom)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2162	Roman artefact scatter	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2165	Multi period Assorted Archaeological Finds (such as copper alloy, coin)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	To be determined following further assessment	Not significant, permanent, negative effect
2166	Multi period Assorted Archaeological Finds(such as jetton, coin, token, figurine, vessel)	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2168	A copper alloy nummus of Crispus dating to c.317 AD. Sear, 1988: no. 3925. Reverse: SOLI INVICTO COMITI, Sol standing left.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2169	Barbarous radiate (legend and image blundered, undersized), corroded reverse.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2170	Roman cu lion mount	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2171	Worn incomplete silver hammered coin, probably a sixpence of Elizabeth I	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2172	Ae3 size, corroded. Copper alloy	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2173	A worn silver Soldino, probably of Doge Michele Steno, c.1400-1413 AD. One edge of the coin is missing due to old breaks.	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2174	A cast copper-alloy uniface coin weight of Post-Medieval date. It is circular in form with a mark of value on one face that depicts St. Michael spearing a dragon. The entire object measures 12.59mm in diameter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2175	Small fragment of decorated roman bangle-type bracelet. It is a slightly curved, parallel-sided strip of bronze 27mm long, 6mm wide and 2mm thick. The ornament is profuse, and includes a zone 7mm long	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2176	An Early Medieval copper alloy wrist clasp dating to the fifth-sixth centuries. It is an example of Hines type B12 clasp-half, and is a hookpiece with a T-shaped bar. It is 37.28mm long	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2177	Rechen Meister type of jeton, 16th century	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2178	Copper alloy brooch, Colchester derivative type with rear hook spring attachment. Missing spring, pin; damaged rear hook and catchplate; areas of severe corrosion. The wings have a concave broad mould	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2179	A complete copper-alloy tumbler lock slide key in very good condition.    The handle of this key is rectangular in shape measuring 44mm in length, two thirds of the handle is 9.1mm in width	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2180	A copper-alloy Roman nummus of the House of Constantine, c.348-353 AD. Reverse: Illegible legend, Soldier spearing a fallen horseman. Uncertain mint.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2181	Robertson 2000, 46 no. 223: "The late Mr. Maw, banker, of Needham Market, formerly had in his possession the antiquities shown on figs. 1, 2, and 3, consisting of (i) a bronze bowl or vessel with zoomorphic handles, ornamented with enamel; (ii) a shallow	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2182	A fragment of a gilded silver keystone disc brooch, comprising part of the edge, one outer setting and the central setting. The rest is now missing due to old breaks.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2183	A worn copper-alloy Roman barbarous radiate copying uncertain ruler, c.275-285 AD. Reverse: IIIIV[], A ewer?	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2184	Multi period silver, coins and ceramic	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2185	blue greeish white enamel	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2186	Three fragments of Medieval pottery, dating to AD 1250-1450.- Handle fragment from a jug; it has a C-shaped profile and part of the jug body at one end. The core is light grey and the surface cream in colour. It bears traces of green glazing.	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2187	A silver Medieval halfpenny of Edward I (AD;1272-1307), Withers type 1-3, dating to AD 1280-1282. Mint of Bristol	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2189	Rook Hill Farm ('Field 5')	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets

2244	Bullen Green, Bramford	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2245	Park, Bramford	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2247	Little Bricett Church	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2248	Moat Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2249	Medieval circular moat and findspot of Medieval pottery and mortar	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2250	Hill Farm	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2252	Hempnalls Hall; Caldecott	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2253	Medieval moat.	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2254	Procters Barn	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2255	Medieval clamp kiln floors	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2256	Swattesfield Hall: Swattisfield Hall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2257	Ivy House Farm (Ivy Cottage)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2260	Moatyards	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2261	Old Yards (Tithe Map)(OS 777). mall scatter (22 sherds) of C13-C14 and late Med pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2262	Old Farm (OS 731). small scatter of Med sherds, adjacent and to NW of moat of Old Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2263	Potter's Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2264	Eldens (Tithe Map)(OS 738). Small square ? moat ploughed out.	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2265	Garden Pightle, Wicks Farm (Tithe Map) (OS 715)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2266	Backhouse Field, Wicks Farm (Tithe Map)(OS 714)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2267	Berrys Meadow (Tithe Map) (OS 164) (Med). Soilmarks of square ditched enclosure (possible moat)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2268	Stack Pightle (Tithe Map) (OS 693). Scatter consisting of 79 sherds, 8 rims late C13 and iron shears	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2269	Burnt House Field (Tithe Map) (OS 378). Pottery scatter consisting of 7 rims late C13, 28 sherds and 1 green glazed Med.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2270	First Birds (OS 778). Med pottery scatter, 1 Thetford type rim, 9 C13 rims, 27 C13/C14 rims, 2 C14 glazed sherds, 189 Med sherds and 4 fragments of lava quern.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2271	Little Barn Meadow (Tithe Map) (OS 741). Pottery scatter consisting of 75 Med sherds and 17 rims	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2273	Bruses (Tithe Map) (OS 248). Pottery scatter consisting of one C12 ?rim, three C13/C14 rims, one C17 rim and 19 Med sherds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2275	Further Barn Close (Tithe Map) OS 696. Med scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2276	Church Meadow (Tithe Map) OS 708. Med scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2277	Carters (Tithe Map) OS 713. Med scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2278	Carters (Tithe Map) OS 713. Med scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2279	First Birds (Tithe Map) OS 764. Med scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2280	Berrys Meadow (Tithe Map) (OS 164). Pottery scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2281	Bratts Field (Tithe Map). Sherds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2282	Pond Meadow (Tithe Map) (OS 687). , flattened, small, ?rectangular soilmark.	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2283	Cottage Meadow (Tithe Map) (OS 92). Pottery scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2284	Little Carrs (Tithe Map) (OS 376). Pottery scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2285	Medieval artefact scatter of metalwork. (Med)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2286	Metal detector finds, 'Field 5' (Med)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2287	Findspot medieval seal matrix	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2288	Little Mendlesham Field (Tithe Map) OS 755. Med scatter	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2289	Middle Catts (Tithe Map) OS 772. Med scatter	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2290	First Paradise (OS 355). Thin Med pottery scatter of only 5 sherds	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2301	World War II type 23 pillbox, with doorway with blast wall.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2302	A very abraded body sherd of medieval coarseware.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2304	Crude lead pendant: bottle-shaped with a narrow neck and rim pierced by a suspension hole. The front face of the expanded oval plate is decorated or carved with an abstract flowing curvilinear design	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2306	Outfarm: Old Barn	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2307	The front half of a folded sheet copper alloy buckle plate. The rest of this buckle plate is missing due to an old break. It is square in shape, measuring 33mm by 33mm in size.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2308	Outfarm: Bullocks Ley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2309	Farmstead: Eastlands Farm (Upper Eastlands Farm)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2310	A worn and damaged mid-14th century silver medieval halfpenny of Edward III's Third 'florin' coinage, London mint (1344-1351 AD; North 1131).  This coin has suffered various losses to its circumference	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2311	A strip of metal 72mm long, 8mm wide and 2.8mm thick. The strip remains of the same breadth over a length of 57mm, with rounded ends each of which is pierced by a centrally-placed hole of 3mm gauge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2312	A silver Medieval penny of Alexander III of Scotland, c.1280-1286 AD. Seaby no. 5054	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2314	A cut silver voided short cross halfpenny of John, Class 5b, c.1205-1210 AD. Wren, 1992: p. 53	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2315	A fragment of a silver Medieval finger ring	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2317	Silver gilt Medieval mount	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2318	A Medieval silver halfgroat of Edward III (AD 1327-1377), Fourth Coinage, Post-Treaty Period dating to AD 1369-1377 (N 1289). Mint of London. The coin has been clipped. Ref: North 1975: 45	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2319	Findspot of a Roman button and loop fastener	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2400	Badley Walk. formal approach avenue to & beyond formerly Badley Hall, runs in a straight line for 1350m from the Stowmarket road to the front of the Hall, and is 40m wide	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2402	St Johns, now Park House	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2404	Post Medieval artefact scatter of metalwork and coins	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2406	Rook Hill Farm, Offton	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2407	Thornham Park; Thornham Hall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2408	Farmstead: Rook Hill Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2409	Post Medieval bridge shown on a map of 1783.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2410	Badley Bridge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2411	Milestone - A45	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2412	Metal detecting finds of mainly P-Med metal work	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2414	Evidence of landscaping at Barking Hall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2415	St John's House Hospital, Lion Road	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2416	An incomplete cast copper-alloy hooked tag of Post-Medieval date, probably falling within Read's Early Post-Medieval Class E Type 3 hooked tags	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2417	Ivy House Farm, Mellis Road	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2418	Farmstead: Castle Farm	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral

2533	Farmstead: Badley Bridge House (Badleybridge Farm)	low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2534	Badley Walk. formal approach avenue to & beyond formerly Badley Hall, runs in a straight line for 1350m from the Stowmarket road to the front of the Hall, and is 40m wide	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2536	Small earthenware pot. It is c. 75 mm high and has a base diameter of 38 mm, flaring to a cordon two-thirds of the way up (diameter here 64 mm) and then curving inwards again to the rim	low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2537	A silver Post Medieval thimble.	low	No physical effects as asset located outside draft Order Limits	None	Neutral
2538	A Post Medieval silver sixpence of Charles I (AD 1625-1649), Group D, bell issue mark dating to AD 1634-1635 (N 2241). Tower of London mint. Ref: North 1975: 136	low	No physical effects as asset located outside draft Order Limits	None	Neutral
2539	A complete lead post-medieval alnage cloth seal. There are two parts each comprising three conjoined discs. A narrow strip links the two slightly larger central discs - now split at one side	low	No physical effects as asset located outside draft Order Limits	None	Neutral
2540	An incomplete lead post-medieval milled medallion. The object is flattened and roughly hexagonal in shape, but may have been more circular originally	low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2541	Multi period archaeology artefacts: Copper alloy, silver, ceramic	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
2542	A complete copper-alloy medieval buckle frame with integral cast plate. The frame is hexagonal in shape with an expanded outer edge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2543	A complete copper alloy nail, measuring 34mm in length. Its head is circular in plan with a flat top and base, it is 8mm in depth and 10mm in diameter. The shaft is rectangular in cross-section	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2544	Copper alloy cast scabbard chape, missing almost all of the sheet backplate and damaged at the top and slightly squashed on the left side	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2545	An incomplete moulded copper alloy mount of Post-Medieval date. At least a quarter of the mount is missing due to old breaks. The mount is asymmetrical in shape	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2546	A complete copper alloy sword belt fitting, 36mm in length and 14mm in width. Its plate is roughly rectangular in shape, flaring outwards slightly at the terminal end	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2547	Cast copper alloy dress fastener dating to the post medieval period. The central area of the dress fastener is hexagonal in shape, with open work geometric design inside	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2600	St John's House Hospital, Lion Road (Preh)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2601	Neolithic settlement site. (Neo)	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
2700	Barking Tye. cropmarks	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2701	Great Newton Wood	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2702	College Grove. Site of ancient woodland	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2703	Little Newton Wood	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2704	Undated cobbled surface, 3 St Marys Close. Cobbled surface in clay/loam matrix found levelling garden at depth of 300/400mm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2705	Middle Wood	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2706	Ancient Woodland, Somersham Park	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2707	Lower Wood	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2708	Keyfield Groves	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2709	Round Wood / Elms Grove	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2710	Bullen Wood	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2711	Miller's Wood	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2713	Broad but relatively poorly defined ring ditch cropmark of circa 25m diameter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2714	A143 Scole-Stuston Bypass (Un). Human skeletal remains formerly in Norwich Castle Museum	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2715	Bushy Grove; Foregrove. Two areas of ancient woodland	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2716	Keyfield Groves. Possible stretch of 4 (or 5) curving interrupted ditch sections	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2717	Cropmark of an undated rectangular shaped enclosure	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2718	Black spread, on N side of stream, no dateable objects	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2719	Unknown cropmark of unknown date	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2720	Irregular enclosure of unknown date	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2721	Cropmark of a subrectangular enclosure	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2722	Cropmarks of series of drainage ditches and field boundaries	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2723	Cropmark of a large pit	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
2725	Cropmarks of a series of field boundaries and ditches	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section B: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
2726	Cropmarks including an enclosure, trackway, linears and a pit	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2727	Cropmark several ditches	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
2728	An apparently complete copper alloy unidentified object. This object consists of a shaft with a rectangular cross-section which is 4mm wide and 27mm in length	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

## Section C

Table A11.2.28: Preliminary Construction Effects on Non-Designated Heritage Assets – Section C

<b>Section C: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>3000</b>	Langham Camp, Ipswich Road, Colchester - POW	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>3001</b>	Sub-square or circular ring ditch traversed by double ditched enclosure	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>3002</b>	Axe, found AD 1924 on Sir Arthur Churchman's estate about 8 chains south of Abbey Oaks Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>3004</b>	Ring ditch, circa 30m diameter	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>3006</b>	Cropmarks of a series of boundaries, forming incomplete paddocks/fields with an indication of central trackway. Also a small ring ditch	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
<b>3010</b>	A stone axe found in Dedham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>3011</b>	Two LBA pits: oblong pit with charcoal and remains of two LBA urns; pit with LBA pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>3012</b>	Two pits with IA pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3013	A La Tene terret found east of Broomhouse	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3014	A coin of Cunobelinus and pottery found at Blackbrook Hill, Langham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3015	A pottery vessel found Blackbrook Hill, Langham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3016	Cropmarks and archaeological remains of Iron Age/Roman/Early Medieval date at Wick Farm, Ardleigh, Essex	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
3017	Small quantities of Roman finds found during fieldwalking. Excavation revealed a small area of Late Iron Age/Roman activity at Wick Farm, Ardleigh	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
3018	Earthworks of three parallel ditches	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3020	Pottery scatter east of Burstallhill	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3021	Valley Farm Pottery scatter	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3022	Cremation urn and other pottery	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3023	Cropmarks west of Oak Tree corner	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3024	Wooden piles (possibly Rom bridge)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3025	Cropmarks west of Springfield Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3026	A1071; Hurdle Makers Hill, site of Milestone	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3027	Pottery sherd from north edge of Ardleigh Schedule area	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3028	Roman coin found east of Broomhouse	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3029	Roman coin found east of Broomhouse	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3030	Longlands Barn is a field barn visible on the 1st Ed OS map	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3031	Scatter of Roman tile found west of Langham Hall	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3032	Scatter of Roman tile found at Perry Grove, Langham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3033	East-West possible Roman road through Horsleycross Street	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3034	Cropmark of a penannular enclosure north west of Rookery Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3035	Cropmark of a possible Roman road extending east-west north of Little Bromley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3036	Scatter of Roman pottery found at Blackbrook Hill, Langham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3038	Cropmark of linear field boundaries north of Cottsgreen Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3039	Cropmarks of enclosures, field boundaries and trackways at Grange Road	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3040	A possible Roman pottery kiln west of Pyghle Farm, Ardleigh	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3041	A cast lead object of uncertain date or function	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3042	Birch House Farm Moat	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
3044	A copper-alloy Medieval composite strap end, dating to AD 1270-1450	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3045	Glebe House cropmarks consisting of linear features, ditched trackways and an oval enclosure	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3046	Birch House Farm is a farmstead visible on the 1st Ed Os map. The farmstead is laid out in a regular full plan with additional elements	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3047	Moat at Colesgreen Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3048	Scatter of Medieval pottery found 1973	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3049	Glebe House: Linear Cropmarks	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3051	A copper-alloy Rose farthing of Charles I, c.1625-1649 AD. As North, 1975: no. 2291	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3053	A silver Medieval penny of Edward I c.1302-1310 AD	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3054	A silver Medieval penny of Edward III c.1369-1377 AD	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3055	A very worn silver Medieval penny, probably of Edward III c.1351-1377 AD	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3056	An incomplete silver Medieval penny, possibly of Henry V, c.1413-1422 AD	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3057	A complete cast copper-alloy bar mount with pendant loop	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3058	An incomplete cast copper-alloy buckle frame. It is a d-shaped frame which is oval in section	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3059	A cast copper-alloy buckle frame. It is an oval lipped frame with a plate and is d-shaped in section	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3060	A cast copper-alloy buckle frame. It is an oval frame with an integral plate which is rectangular in section	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3061	A cast copper-alloy strap. It is a sheet metal strap end which is folded, it is rectangular in shape and in section	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3062	A fragment of a cast copper-alloy buckle frame. It is the outside edge of a buckle frame, the rest of which is missing due to old breaks	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3063	An incomplete cast copper-alloy strap end. It is circular in shape and rectangular in section	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3064	An incomplete cast copper-alloy strap fitting. It is rectangular in shape and in section and is comprised of two plates held together with a single circular separately cast rivet	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3065	An incomplete cast copper-alloy hooked tag	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3066	An incomplete cast copper-alloy possible buckle frame tag which appears to be part of the outside edge of a buckle frame	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3067	An incomplete cast copper-alloy buckle frame. It is a large double trapezoidal frame which is rectangular in section with a central bar for the pin which is missing	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3068	A cast copper-alloy key cast in a single piece and has a circular bow which is oval in section	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3069	A cast copper alloy strap fitting or swivel of Medieval date. It consists of a pair of annular frames. The larger of the two is D-shaped with a circular section and has zoomorphic terminals	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3070	A cast copper-alloy tap handle of Medieval or Post-Medieval date. It comprises a tapering cylinder with a central circular perforation. On top of which is a cast flat cockerel	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3071	Cropmark of a north/south aligned ditched trackway near Langham	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3072	A copper-alloy jetton. Both faces are very worn but one is certainly an orb design and the other is probably a rose	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3073	A copper-alloy rose and orb jetton of Post-medieval date by Nuremburg master Hans Schultes II AD 1586-1603	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3074	A silver threepence of Elizabeth I c. AD 1570-1579	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3075	A very worn silver coin of Elizabeth I c. AD 1558-1603. Possibly a threepence	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3076	A Richmond round farthing of Charles I c. AD 1625-1649	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3077	Two fragments of cast copper-alloy of uncertain date, most likely the result of metal working	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3078	An incomplete cast copper-alloy barrel tap spout of Post-medieval date. It is circular in shape and is broken at both end due to old breaks. There is a ridge along the top and down the centre	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3079	A cast copper-alloy circular bar. It is probably an incomplete handle, possibly for a casket or drawer, most likely of Medieval or Post-medieval date. It is circular in section and is broken	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3080	A cast copper alloy double looped buckle frame. The buckle frame and strap bar survive intact, but the pin is missing. Iron corrosion can be seen on the strap bar. Neither loop of the frame has a pin	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3082	A cast copper-alloy buckle of Medieval date. It has an oval frame with offset and narrowed cylindrical bar, and thickened outer edge. The outer edge is cylindrical in form and has a slightly curved profile	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3083	A fragment of a silver gilt finger ring, only the bezel now survives due to old breaks. The bezel is in the form of two clasped hands. This finger ring is most likely to be of later medieval or early post medieval in date	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3084	A copper-alloy Rose and Orb jetton of Nuremberg Master Hans Krauwinckel II, c.1586-1635 AD. As Mitchiner 1988: no. 1574. The jetton has a central circular aperture	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3085	Cropmark of part of an irregular shaped enclosure west of Hill House	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3086	A silver halfgroat of Charles II, c.1660-1662 AD	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3087	A complete silver medieval penny of Edward I, dating to the period AD 1300-1302. Minted in Durham	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3088	Boxted WWII Airfield	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
3089	An incomplete (cut half) silver medieval penny of Henry II to Henry III, dating to the period AD 1180-1247. Uncertain class. Minted in London by uncertain moneyer.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3090	Small quantities of post medieval tile and pottery was recovered during fieldwalking, later excavation revealed medieval /post medieval field ditches, At Wick Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3091	Churchyard of St Mary's Church, Langham	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
3092	Cropmarks of ditches aligned predominantly NE-SW near Langham	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3093	A copper-alloy Early Medieval stirrup-strap mount, dating to AD 1000-1100. It is sub-pentagonal in plan and it has a slightly rolled flange protruding backwards from its base	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3094	A fragment of a copper alloy purse frame of Late Medieval to Early Post Medieval date, consisting of a curved length of the frame	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3095	Complete rectangular moat at Ardleigh Wick	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
3096	Cropmark of an enclosure on Ardleigh Heath	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3097	Medieval finds were found during fieldwalking, later excavation revealed probable medieval/post medieval field ditches and trackway on Wick Farm, Ardleigh	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3098	NMP data - Cropmarks of field boundaries SE of Sproughton	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3099	Bronze tool hoard including a small socketed probable chisel or possible axe with another fragment visible within it	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
3100	Pyroxene, jadeite axe, Campbell Smith type II a	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3101	Dedham Heath. Large historic heath shown on the 1777 Chapman & Andre Map, to the south of Dedham village	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3103	Burstall Hall. L-shaped remnant of possible sub-rectangular moat surrounding Burstall Hall	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3105	Coles Green Farm is a farmstead visible on the 1st Ed OS map	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3114	Burstall Hall is a farmstead visible on the 1st Ed OS map	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3123	Hill Farm farmstead is visible on the 1st Ed OS map	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3125	Longlands Barn is a field barn visible on the 1st Ed OS map	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3126	Rookery Farm is a farmstead visible on the 1st Ed OS map	Low	Construction of the Project would remove some of the	Archaeological excavation and	Not significant, permanent, negative effect

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
			recorded area of this asset, negatively affecting its value	recording if required	
3129	Bridge shown on Hodskinson's 1783 map	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3131	Cherryground is a farmstead visible on the 1st Ed OS map	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3132	Noakes Barn is a farmstead visible on the 1st Ed OS map	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3133	Pipers Went (Pipers Vent Farm), Raydon. 19th century farmstead and farmhouse	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3134	Hill Farm, Sproughton. 19th century farmstead and farmhouse	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3135	Perry Barn, Sproughton. 19th century farmstead and farmhouse	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3136	Abbey Oaks Farmhouse (Grove Farm), Sproughton. 19th century farmstead and farmhouse with converted buildings	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3137	Ivywell Farm, Sproughton. 19th century farmstead and farmhouse	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3138	Sproughton Park (Villa Farm), Sproughton. 19th century farmstead and farmhouse	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3139	Yewtree House, Stratford St Mary. 19th century farmstead and farmhouse	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3141	Bobbitts Hall, Stratford St Mary. 19th century farmstead and farmhouse	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3142	Acacia Farm, Wenham Magna. 19th century farmstead and farmhouse	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3145	Bridge shown on Bowen's 1755 and Hodskinson's 1783 maps	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3146	Chattisham Place is a farmstead visible on the 1st Ed OS map	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3149	Higham Hall is a farmstead visible on the 1st Ed OS map	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3153	Church Farm is a farmstead visible on the 1st Ed OS map	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3154	Dewlands Farm is a farmstead visible on the 1st Ed OS map	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3155	Holton Place is a farmstead visible on the 1st Ed OS map	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3157	Brook Farm, Stratford St Mary. 19th century farmstead and 16th century farmhouse with converted buildings	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3159	Old Mill House: A water mill and leat shown on map of 1595	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3160	Washbrook Street: Eight tenements with names of their occupiers are shown along the street line on 1595 map	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3162	Fen Farm is a farmstead visible on the 1st Ed Os map. The farmstead is laid out in a regular multi yard with additional detached elements. The farmhouse is detached and set away from the yard	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3165	Disused branch railway line from Hadleigh to Bentley. The railway opened in 1847, closed for passengers in 1932 and closed for freight in 1965	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3166	Cropmark of a ring ditch c. 20m in diameter	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3167	Wenham Grange, Wenham Parva. 19th century farmstead and farmhouse. Regular courtyard E-shaped plan formed by working agricultural buildings. The farmhouse is set away from the yard. Partial loss (less than 50%) of the traditional farm buildings	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3168	Cropmarks: Mostly rectilinear field boundaries	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3169	Stratford Bridge crossing River Stour	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3170	Cropmark: Double ditched rectangular feature of unknown date, visible as a faint cropmark	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3172	Cropmark: Enclosures and ditches	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3173	Cropmark: Ring ditch	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3174	Cropmark: Ring ditch	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3175	Cropmark: Ring ditch	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3176	Cropmark: Rectilinear enclosure	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3177	Subrectangular enclosure of unknown date, traversed by another semi-circular enclosure	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3178	Cropmark: Rectangular enclosure	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3179	Cropmark: Rectangular enclosure	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3180	Field boundary	Negligible	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3181	Brimlin Wood: Ancient Woodland	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3182	Wenham Thicks: Ancient Woodland	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3183	Burstall Long Wood: Ancient Woodland	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3184	Rectilinear sided earthwork bank in a field adjoining Belstead Brook, Thorpes Hill	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3186	Cropmark: Square enclosure, possible moat	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3188	Cropmark: Semi circular enclosure	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3189	RAF Raydon	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3190	Earthworks: extractive industry	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
3191	Cropmarks of linear field boudaries north of Copdock	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3192	Cropmarks: Field system and pits	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3194	River Stour Navigation	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Building recording and/or monitoring if required	Not significant, permanent, negative effect
3195	Cropmark: Small ring ditch	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3196	WWII Auxiliary Operation Base and Observation Post	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3198	Brick vaults beneath Langham Church	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
3202	Pillbox, Tractor Depot, Ardleigh	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3203	Road Barrier (destroyed), Glebe Bridge, Little Bromley Rd, Ardleigh	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3204	Road Barrier (destroyed), Home Farm Bridge, Home Farm Lane, Ardleigh	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3205	Ammunition Shelter (destroyed), Ardleigh Court, Ardleigh	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3206	Roman road near Motts Farm, extending NNE	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3207	Roman road: Colchester heading north east through Ardleigh	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3208	Cropmarks of a rectilinear enclosure	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3209	Cropmarks of linear features	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3210	Cropmarks of field boundaries	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3212	Cropmarks of former field boundaries at Kiddles Cottage	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3213	Cropmarks of various linear features possibly a sub-rectangular enclosure at Kiddles Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3214	Cropmarks of several parallel linear features at Malting Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3216	Cropmarks of possible rectilinear enclosure and pits near Langham Hall	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3217	cropmarks of an enclosure at Wormseywood Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3218	Cropmarks of ditches and pits south of Ardleigh	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3219	Cropmarks of linear features and field boundaries north of Wick Farm, Ardleigh	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3220	Cropmarks of a curvilinear enclosure at Rookery Bungalow	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3221	Cropmarks of a sub-rectangular enclosure at Rookery Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3222	cropmarks of a rectilinear enclosure at Grange Road	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3223	Cropmarks of field boundaries north east of Ardleigh reservoir	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3225	Cropmarks of a prehistoric enclosure and ring ditch at Bounds Farm, Ardleigh	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3226	Cropmarks of linear features, rectilinear enclosures and an oval enclosure near Riddlesdale Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3227	Cropmarks of linear features being part of field systems or trackways South and West of Little Bromley Hall	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3228	Cropmark of a possible ring ditch at Cattsgreen Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3229	Cropmarks showing ring ditches, pits, trackways, and linear features east of Ardleigh	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3231	Cropmarks Enclosures and linear features north of Gatehouse Farm, Ardleigh reservoir	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3232	Cropmarks of linear features and ring ditches at Badley Hall	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3233	Cropmarks of a rectilinear enclosure with three sides and two entrances to east of Ardleigh	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3234	Cropmarks of three ring ditches North of Norman's Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3235	Cropmarks of a double ring ditch, 'D' shaped enclosure and a linear ditch at Grange Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3236	Cropmark complex at Ducuras Farm comprising several ring ditches and linear features	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
3237	Rectilinear enclosure-paddock system east of Broomhouse	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
3238	Cropmark of a large sub-circular enclosure joined by a short ditched trackway to a smaller pear shaped enclosure south of Hill House	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3239	Cropmarks of ring ditches and a rectilinear field system east of Broomhouse	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3240	Cropmarks of a possible enclosure and double-ditched trackway at Blackbrook Hill, Langham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3241	Group of interwar houses and associated small-holdings at 7-18 Coggeshall Road	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3243	Large lump of glass waste found at Bounds Farm	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
3244	Ipswich to Bury St Edmunds railway line. Opened in November 1846	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3245	Ipswich And Stowmarket Navigation	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3246	A bronze padlock found West of Purney Heath	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3251	Coin found north-west of Parney Heath	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3252	Copper alloy token found near Parney Heath	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3253	Silver coin found near Parney Heath	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3254	Silver coin found near Parney Heath	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3255	Silver coin found near Parney Heath	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3256	Gold coin found near Parney Heath	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3258	A silver pin found near Stratford St Mary	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3262	Fen Farm is a farmstead visible on the 1st Ed Os map. The farmstead is laid out in a regular multi yard with additional detached elements	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3268	Confidential PAS find	N/A	No physical effects as asset located outside draft Order Limits	None	Neutral
3270	Confidential PAS find	N/A	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3271	Confidential PAS find	N/A	No physical effects as asset located outside draft Order Limits	None	Neutral
3273	Scatter of oystershell, brick and five bronze coins found east of Langham	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3274	Stone axe found in Dedham Parish	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3275	Scatter of tile fragments found west of Langham Hall	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3276	Bronze padlock found west of Purney Heath	Low	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3283	Cropmarks of a series of boundaries and a ring ditch south of Burstall Lane.	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
3300	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3301	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3302	Confidential PAS find	N/A	This find has been removed and therefore would not be	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
			affected by construction of the Project.		
<b>3303</b>	Confidential PAS find	N/A	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>3304</b>	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
<b>3305</b>	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
<b>3306</b>	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
<b>3307</b>	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
<b>3308</b>	Confidential PAS find	N/A	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>3310</b>	Confidential PAS find	N/A	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>3311</b>	Confidential PAS find	N/A	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3312	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3313	Confidential PAS find	N/A	No physical effects as asset located outside draft Order Limits	None	Neutral
3314	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3315	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3316	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3317	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3318	Confidential PAS find	N/A	This find has been removed and therefore would not be affected by construction of the Project.	None	Neutral
3319	A1071 Milestone	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral

Section C: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
3320	Cropmarks of field system with a series of pits	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3322	WWII pillbox	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3323	WWII pillbox	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3324	Cropmarks of a ring ditch	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
3325	A1100 Roman road	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral

## Section D

Table A11.2.29: Preliminary Construction Effects on Non-Designated Heritage Assets – Section D

<b>Section D: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>4001</b>	Pillbox, Great Porters Farm, Fordham Heath	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>4004</b>	Pillbox (destroyed), NW corner of Fiddler's Wood, Fordham Bridge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>4006</b>	Crabtree Lane, Great Horkesley GHOCCL 98	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>4008</b>	Site Of Lower Mill, River Colne	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>4009</b>	Spigot Mortar Emplacement (destroyed), Police Station, Great Horkesley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>4010</b>	Ammunition Shelter (destroyed), Woodlands Farm, DGreat Horkesley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>4011</b>	Ammunition Shelter, Fiddlers Wood, Fordham Bridge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>4014</b>	Teybrook Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4018	North of Gean Trees	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4021	Pillbox, Great Porters Farm, Fordham Heath	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4022	Pillbox, Great Porters Farm, Fordham Heath	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4023	Pillbox, Great Porters Farm, Fordham Heath	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4024	Pillbox, Fordham Bridge	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
4025	Pillbox, field junction south of Fordham Bridge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4026	Pillbox, South bank of River Colne, Fordstreet	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
4028	Pillbox, East of Fordstreet Hill	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
4029	Pillbox, West of Fordstreet Hill	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4030	Great Horkesley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4037	Spigot Mortar Emplacement, East of Fordham Bridge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4038	Anti-Tank Rails, Fordham Bridge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4039	Road Barrier (destroyed), Fordham Bridge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4040	Spigot Mortar Emplacement, west of Fordham Bridge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4041	Road Barrier (destroyed), Fordstreet Hill	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4042	Road Barrier / Anti-Tank Pimple, New Road, Fordstreet	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4043	Pillbox (destroyed), W of Fordstreet Hill, Fordstreet	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
4044	Pillbox (destroyed), S of New Road, Fordstreet	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4049	Boxted WWII Airfield – Administrative Site	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4050	Colchester Road	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4053	Coney Byes Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4056	Eastgore	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4057	Little Tey House	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
4058	Church Farm, Little Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4059	Teybrook Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4061	Cropmarks close to Tey Brook Piggeries, Great Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4062	Cropmarks near Horkesley Plantation, Great Horkesley	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4063	Boxted WWII Airfield	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
4065	West of New Enfield's Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4066	East of Great Hororkesley	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
4067	East of Breewood Hall	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4069	Shrublands	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
4070	Church of St Margaret and St Catherine, Aldham	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4071	Church of St Margaret, Aldham	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4072	Aldham Hall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4073	Church House Wood, Aldham	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4074	Near Crabtree House	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4075	Cobbs Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4077	West of Great Porters Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4078	East of Fordstreet	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4081	Fordham Hall Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4082	Fordham Hall Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4083	East of Church House Farm. Aldham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4084	West Of Aldham Hall	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4085	West of Church House Farm, Aldham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4086	Near Fiddlers Wood	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4088	East of Fordham	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4089	West of Great Porters Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4090	West of Fordham Bridge	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4092	South East Of Church House Farm, Aldham	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4093	Fordham	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4094	Fordham-Place Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4095	Site of mill near Fordham Bridge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4096	Cropmarks at Cuckoo's Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4099	Aldhamhall Wood	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4100	Cropmarks SW of Kings Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4102	Cropmarks SW of Watercress Hall	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4103	Cropmarks NW of Fordham Bridge	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4104	Fossetts Lane	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4107	West of Blue Barns Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4109	Blue Barns Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4118	North side of Bullbanks Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4119	Anti-Tank Ditch, Fordstreet	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4120	Great Horkesley area	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4121	Stane Street	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4123	Stane Street - Roman	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4127	Post-Medieval Silver Finger-Ring	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4128	Fieldwalking finds from Aldham and Marks Tey and Kelvedon	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4129	The Grove	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4130	The Grove	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4131	East side of Breewood Hall	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4132	Pond Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4133	Mill House	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4134	Church House wood, Aldham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4142	Dedham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4152	Aldham village	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4155	Fordham-Chaucers Lane-The Bungalow	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4159	Toll House Cottage, Fordstreet Hill, Gallows Green	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4161	Brickmaking around West Bergholt	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
4163	PART EXCAV by Davies, GMR,	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4183	Late Iron Age occupation features, south of Park Lane, Langham	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4184	Charcoal-rich pits, north-west of Holly Tree Farm, Boxted	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4185	Charcoal-rich pits, south of Redhouse Farm, Boxted	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4186	Late Iron Age occupation features, south of Boxted Road, Great Horkesley	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4187	Hoxnian lake deposits, Marks Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4189	Tye Green, Boxted Road, Great Horkesley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4193	Garden wall at Teybrook Farm, Brook Road, Great Tey	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4197	Brickworks North of Primrose House / Colliers Brick Works, Marks Tey and Aldham	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4205	Undated cropmarks, near Boxted Heath, Boxted	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4207	Broad Green, Great Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4208	Hey Green, Little Horkesley	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4211	Boxted Heath	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4212	Gallows Green, Aldham	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4214	Motts Farm, Marks Tey	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4215	Godbolt's Farm, Marks Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4217	Knaves Farm, Marks Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4220	Broadgreen Farm, Great Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4222	Salmon's Farm, Great Tey	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4224	East Gores Farm, Great Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4225	Teybrook Farm, Great Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4227	Cropmarks east of Great Horkesley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4228	Undated cropmarks east of Great Horkesley	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4229	Church of St Margaret, Aldham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4230	Signpost on A134 & Old House Road, Great Horkesley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4231	Runkins Corner, Langham Road, Boxted	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4232	W.H. Collier Brick and Tile Works, Church Lane, Marks Tey	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
4233	Post-Medieval Silver Finger-Ring	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4234	Fieldwalking finds from Aldham and Marks Tey and Kelvedon	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4235	Iron Age pot	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4236	Roman sherds and coin.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4237	East side of Breewood Hal	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
4238	Pond Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4239	Mill House	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4240	Church House wood, Aldham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4241	Aldham village	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4242	Fordham-Chaucers Lane-The Bungalow	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4243	Cropmarks of linear ditches in Langham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4344	Multiperiod Buildings and Ruins Ensemble, Ford Street, Aldham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4345	Boxted WWII Airfield – Dispersed Site No. 4 (Sick Quarters)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4346	Ancliary site associated with the WWII airfield	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4347	Farm building to S of Breewood Hall	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4348	Milestone, London Road, Great Horksley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4349	Cold War Nuclear Monitoring Post, Langham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4350	Church Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section D: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
4351	Shrublands	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4352	East of Tye Green	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4353	Site SW of Old Bouchiers Hall	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4354	Cropmarks SW of Oak Tree Cottages	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
4355	St John's Church, Little Tey	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
4357	All Saints Church, Fordham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

## Section E

Table A11.2.30: Preliminary Construction Effects on Non-Designated Heritage Assets – Section E

<b>Section E: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>5001</b>	Porters Hall Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5002</b>	Milepost on A120 at Feering (site of)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5005</b>	Coggeshall Road, Feering	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5007</b>	Dovehouse Field, Cressing Temple	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5008</b>	Mount Pleasant	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5013</b>	Dovehouse Field, Cressing	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5014</b>	Kane Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>5015</b>	Pointwell Mill	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5019</b>	Land east of Church Road (excl. SAM), Rivenhall	High	No physical effects as asset located outside draft Order Limits	None	Neutral

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
5020	Rivenhall Roman Villa, Anglo-Saxon Hall, Cemetery & Church Site	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5021	The Visitor Centre, Cressing Temple; Site code : Medieval	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5022	The Visitor Centre, Cressing Temple; Site code : Medieval to post medieval	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5024	Rivenhall WWII Airfield - Dispersed Site Sleeping Site 2	Medium	No physical effects as asset located on the edge of the draft Order Limits	None	Neutral
5025	Rivenhall WWII Airfield - Dispersed Site Sleeping Site 3	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
5027	Rivenhall WWII Airfield - Dispersed Site Sleeping Site 6	Medium	No physical effects as asset located on the edge of the draft Order Limits	None	Neutral
5028	Rivenhall WWII Airfield - Dispersed Site Mess Site 2	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
5029	Rivenhall WWII Airfield - Sewage Works	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
5033	Strutt & Parker Farm (Faulkbourne Farm), Cressing, Witham: Possible Prehistoric site	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5036	Rivenhall Place Designed Landscape	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
5039	Dovehouse Field-Cressing Temple	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5041	Frame Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
5044	Dines Hall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
5045	Church Field, White Notley	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
5050	Cressing Temple	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5051	Cressing Temple	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5052	Cressing Temple	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5053	Cressing Temple	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5054	Cressing Temple	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5055	East of White Notley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
5056	NW of Hole Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
5057	South of Maltings Farm, White Notley	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
5060	Rivenhall Roman Villa, Anglo-Saxon Hall, Cemetery & Church Site	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
5061	Rivenhall Roman Villa, Anglo-Saxon Hall, Cemetery & Church Site-Medieval	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5065	Cressing Temple	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5067	North of Ford Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5068	Felixhall Park	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5069	Porter's Farm	Medium	No physical effects as asset located on the edge of the draft Order Limits	None	Neutral
5072	Old Camp Meadow	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
5073	Windmill Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
5074	Cressing	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5075	North of Rivenhall Hall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
5076	Rivenhall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
5077	Near Rook Hall	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
5078	Houchins Farm	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5079	Coggesshall Abbey	High	No physical effects as asset located outside draft Order Limits	None	Neutral
5089	West of Coggeshall Hall	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
5091	East side of Cogeshall Hamlet	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
5092	South of White Notley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5093	East of White Notley	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
<b>5094</b>	Rivenhall Parks I and II	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>5095</b>	Rivenhall Parks III and IV	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
<b>5098</b>	Cropmark NW of Oak Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>5099</b>	Cropmark N of Troys Wood	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>5100</b>	Cropmark NE of Homecot	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>5101</b>	Cropmark NE of White Notley Sewage Works	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5102</b>	Cropmark S of Westocks Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>5103</b>	Cropmarks around Dines Hall	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
5104	Cropmark S of Newneys Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
5105	North East of Three Ashes Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5113	Cropmark NE Whitehead's Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
5114	Cropmark N of Whitehead's Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5115	Cropmark S & E of Whitehead's Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
5116	South of Silver End	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
5117	South of Silver End	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
5118	South of Hole Farm, Witham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5120	Cropmark SE of Whitehead's Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
5122	East of Parkgate Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5123	Cropmark S of Leapingwells	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5124	North of Parkgate Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5125	Cropmark N of Porter's Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
5127	Cropmarks S of Scrip's Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
5128	Cropmarks N of Surrex	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5129	Monks Down Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5130	Drainage System along the River Blackwater	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5131	Great Warren Field CT4b	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5136	Scripps Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required as site are on the	Significant, permanent, negative effect

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
				edge of the draft Order Limits	
<b>5139</b>	South-east of Coggeshall Hall	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>5140</b>	South-east of Coggeshall Hall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5142</b>	Site of Fulling mill	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5143</b>	Langley Green	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>5144</b>	Langley Green	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>5145</b>	Langley Green	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>5146</b>	South of Feeringbury	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>5147</b>	Long mortuary enclosure and round barrow 160m SW of Frame Farm	High	No physical effects as asset located outside draft Order Limits	None	Neutral

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
5148	Possible Roman road between Coggeshall and Kelvedon	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
5151	Stane Street - Roman	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
5154	Lower Warren Field	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
5160	North of Godfry's Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5164	South-east of Park House	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5172	River Blackwater, East of Coggeshall Hamlet	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5178	Long Croft Field	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5179	Appletons Field, Rivenhall	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5180	Ashfield Wood	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
5183	Church Field, White Notley: Roman	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral

Section E: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
<b>5184</b>	Church Field, White Notley: Medieval	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5186</b>	Cressing Temple	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5187</b>	Rivenhall: Roman	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5188</b>	Rivenhall: Medieval	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5190</b>	Barn 40 m SE of Porters Farmhouse	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5193</b>	Signpost opposite Westock Farm, Fairstead	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>5196</b>	Cressing to Terling Pipeline-Anglian Water	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>5201</b>	Rivenhall Airfield / Bradwell Quarry Area Site A6 and A7	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect

## Section F

Table A11.2.31: Preliminary Construction Effects on Non-Designated Heritage Assets – Section F

<b>Section F: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>6001</b>	Little Farm (Cropmarks)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>6003</b>	Bumpstead's Farm (Cropmarks)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6004</b>	Lee Farm (Cropmarks)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
<b>6005</b>	Coptfoldhall Farm (Cropmarks)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6006</b>	Cole Hill (Cropmarks)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6007</b>	Ring ditch and linear features (Cropmarks)	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
<b>6008</b>	Circular cut feature (Cropmarks)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6010</b>	Brickbarns Road (Cropmarks)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6011	WWI landing ground at Broomfield Court	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6015	Lee Wood- possible earthwork	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6016	Cropmarks south of Goodmans Farm, Great & Little Leighs	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6017	Border Wood, Partridge Green Estate, Broomfield	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6018	Un-named Wood I, Partridge Green Estate, Broomfield	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6019	Un-named Wood II, Partridge Green Estate, Broomfield	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6020	Ash Tree Corner	High	No physical effects as asset located outside draft Order Limits	None	Neutral
6021	Little Waltham-Ash Tree Corner	High	No physical effects as asset located outside draft Order Limits	None	Neutral
6024	Hoestreet Cottages (Cropmarks)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6025	Great Stonage Farm (Cropmarks)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6029	Land south of Goodmans Lane, GLBP94 (Cropmarks)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6030	North of Waltham (Cropmarks)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6031	South east of Goodmans Farm (Cropmarks)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6033	Little Waltham-Ash Tree Corner	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6034	Little Waltham-Ash Tree Corner	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6035	Little Waltham-Ash Tree Corner	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6036	Broom Wood Quarry - Broads Green	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6038	Cropmarks at Minnow End	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6039	Cropmarks north of Stacey's Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6041	Montpeliers Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6044	Hoestreet Farm	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
6045	Lee Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6046	West of Brickbarns Farm (Cropmarks)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
6047	South of Boyton Hall	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
6048	Coptfold Chapel	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6049	Hedgehall	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6050	Partridge Green	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6052	Beaumont Otes or Beaumond Moates	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6053	Cropmarks E of Whitbreads Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6054	West of Terling Spring (Cropmarks)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6055	West of Cole Hill (Cropmarks)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
6056	North of Hole Farm (Cropmarks)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6057	South of Terling Spring (Cropmarks)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6059	South of Great Waltham (Cropmarks)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
6060	Roxwell Pit	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6061	West of Broomfield	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6062	Stacey's Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
6063	Milestone, 78m north of junction of A131 with Whitbreads Farm Lane	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6064	Pillbox, Langleys, Great Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6065	Pillbox, Langleys, Great Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6066	Pillbox, Whites Plantation, Langleys, Great Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6067	Pillbox, Whites Plantation, Langleys, Great Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6068	Pillbox, Langleys, Little Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6069	Pillbox, Langleys, Great Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6070	Pillbox, Whites Plantation, Langleys, Little Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6071	Spigot Mortar Emplacement, Ash Tree Corner, Little Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6072	Two Spigot Mortar Emplacements, NW of Winckford Bridge, Little Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6073	Road Barrier (destroyed), Winckford Bridge, Little Waltham	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
6074	Pillbox, Ash Tree Corner, Little Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6078	Quarry west of Rectory Lane, Great and Little Leighs (Cropmarks)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6082	Floodlight (destroyed), SW of Writtle	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
6083	Floodlight base, Thatcher's Farm, Vicarage Road, Roxwell	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6084	Floodlight (destroyed), Great Waltham	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
6085	Floodlight (destroyed), W of Lyons Hall, Gt. Leighs	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6086	Ammunition Shelter (destroyed), Little Waltham Lodge, Little Waltham	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
6087	Ammunition Shelter, E of Boreham Road, Gt. Leighs	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6088	Auxiliary Unit Operational Base, Gt., and Lt. Leighs	High	No physical effects as asset located outside draft Order Limits	None	Neutral
6089	Cold War Nuclear Monitoring Post, Little Waltham	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
6091	Broom Wood Quarry - Broads Green	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
<b>6092</b>	Sturgeon's Farm (Cropmarks)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6093</b>	Montpeliers Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6094</b>	Lee Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6096</b>	Coptfold Chapel	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6097</b>	Hedgehall	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6098</b>	Partridge Green	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6099</b>	East of Woodhall Farm	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6101</b>	Border Wood	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6102</b>	Border Wood	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>6104</b>	The Chelmsford-Braintree-Long Melford Roman road	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6105	GHQ Line Anti-Tank Ditch	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
6107	Little Waltham	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
6108	Coin From Little Waltham.	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6109	Dragonsfoot Field	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
6111	Little Waltham Lodge	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6112	Little Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6113	Ash Tree Corner	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6114	Ash Tree Corner	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6115	Ash Tree Corner	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6117	North of Lyons Hall	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6118	Dragonsfoot Field	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6119	Dragonsfoot Field	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6120	West of Broomfield	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Not significant, permanent, negative effect
6121	New Barn Lane	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6122	Sturgeon's Farm	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
6124	Church of St Margaret, Margaretting	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6125	Church of St James, Chignall St James	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6129	East of Woodhall Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6130	East of Woodhall Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6131	East of Woodhall Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6132	East of Woodhall Farm	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
6133	Beaumont Otes	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6134	Beaumont Otes	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6135	East of Woodhall Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6137	Ash Tree Corner	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6138	Ash Tree Corner	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6139	Little Waltham-Ash Tree Corner	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6140	Church of St James, Chignall St James	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6141	Fieldwalking at Broomfield Hospital	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6142	Fieldwalking at Broomfield Hospital	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6143	Fieldwalking at Broomfield Hospital	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section F: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
6144	Border Wood	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6145	Broomfield Hospital	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6147	Chatham Green Post Windmill Roundhouse	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6173	Buttsbury	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording	Significant, permanent, negative effect
6175	Almshouses at Great and Little Leighs	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6179	Pillbox (destroyed), meadow SE of Winckford Bridge, Little Waltham	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
6180	Sheepcotes Farm, Sheepcotes Lane, Little Waltham	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
6181	Chathamhall Spring (Cropmarks)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

## Section G

Table A11.2.32: Preliminary Construction Effects on Non-Designated Heritage Assets – Section G

<b>Section G: Non-Designated Heritage Assets</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>7001</b>	Bomb crater N of Mountnessing Hall	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>7003</b>	Cropmarks	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>7004</b>	West of Little Burstead Common (cropmarks)	Negligible	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>7005</b>	Little Farm (cropmarks)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
<b>7006</b>	Westlands Farm (cropmarks)	Negligible	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
<b>7007</b>	Padham's Green Road (cropmarks)	Negligible	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>7008</b>	Little Hyde Farm (cropmarks)	Negligible	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
<b>7009</b>	Botney Hill Road (cropmarks)	Low	Construction of the Project would remove some of the	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section G: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
			recorded area of this asset, negatively affecting its value		
7010	Hutton Village	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
7013	Alan-Williams Turret, junction, Church Lane/Raileigh Road, Hutton	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
7014	Road Barrier (destroyed), junction Church Lane/Raileigh Road, Hutton	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
7015	Woodfield Cottage (cropmark)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
7017	Dunton Hall possible DMV	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
7020	Mountnessing Hall	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
7022	Bury Woods (earthworks)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
7023	Mill Fields (fishpond)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
7024	Mill Fields (earthworks)	Low	Construction of the Project would remove some of the	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section G: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
			recorded area of this asset, negatively affecting its value		
<b>7025</b>	Cropmark east of Blind Lane	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
<b>7026</b>	Cropmarks nr. Bladen's Wood	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>7027</b>	Little Burstead-Whitehall Manor (moat)	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>7032</b>	Extending SW-NE from Brentwood through Mountnessing (Roman road)	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
<b>7034</b>	Metal detecting finds, Humes Farm, Hutton	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>7037</b>	Mill Fields (findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>7038</b>	Stock Road, Ingatestone - exact NGR not known (findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>7042</b>	Havering Grove Farm, Rayleigh Road, Hutton (building)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
<b>7043</b>	Lawness (crop mark)	Negligible	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

**Section G: Non-Designated Heritage Assets**

<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Construction Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>7044</b>	Cropmarks NW of Blunts Wall Farm	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral

## Section H

Table A11.2.33: Preliminary Construction Effects on Non-Designated Heritage Assets – Section H

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8001	Pillbox, Orsett Road	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8002	Road Barrier (destroyed), Orsett Road, Orsett	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8003	South Garden Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8004	Spigot Mortar Pit, corner of field, St. James Church, W. Tilbury	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8005	Spigot Mortar Pit, Church Road, West Tilbury	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8006	Spigot Mortar Site (destroyed), Manor Farm, West Tilbury	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8010	North Ring, Mucking	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
8012	West Tilbury	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
8014	Horndon to Barking Gas Pipeline - Site 1	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8015	Mucking, East Tilbury	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
8016	WWII Bombing Decoy, "Bulphan", Essex	High	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8017	WWI landing ground at Orsett	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8019	Bomb crater west of Haycock cottages	Negligible	No physical effects as asset located outside draft Order Limits	None	Neutral
8020	Tilbury Power Station	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8023	Low Street Brick Works	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8025	Land at East Tilbury and Linford Area of Prehistoric ritual landscape and Roman field boundaries	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
8026	Geophysical Survey Report - Land at East Tilbury, Essex	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8029	Military Camp (destroyed), S of Stanford Road, Orsett	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8030	Land adjacent to Walton Hall Farm, Linford, Stanford Le Hope	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8031	Butts Lane, Stanford-Le-Hope, Essex	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8032	Mucking-Linford-Holford Wood Road-Rainbow Shaw Pits	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8033	Mucking-Linford-Holford Wood Road-Rainbow Shaw Pits	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8034	Mucking-Linford-Holford Wood Road-Rainbow Shaw Pits	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8035	Mucking-Linford-Holford Wood Road-Rainbow Shaw Pits	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8036	Orsett-Barrington's Farm, Loft's Farm	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
8037	Stanford le Hope	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8046	Mucking Heath	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8047	Orsett	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8048	West of Brook Farm	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
8049	Stanford le Hope	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8050	East of Brook Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8051	Near Dame Elyns	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8054	North Ring, Mucking	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8055	North Ring, Mucking	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8056	Mucking: Neolithic	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8057	Mucking: Beaker period	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8058	Mucking: Early to Middle Bronze Age	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8059	Mucking: Late Bronze Age	High	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8060	Mucking: Iron Age	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8061	Mucking: Roman	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8062	Mucking: Early to Middle Saxon	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8063	Mucking: Middle to Late Saxon	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8064	Mucking: Medieval	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8065	Mucking: Post medieval	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8066	Cropmarks north of High House	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8068	Anti-glider ditches south-east of Bowaters Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8071	Cropmarks south of Saffron Garden	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8072	Cropmarks south-west of Dame Elyns	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8074	West Tilbury - Low Street	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8075	Mucking - Rainbow Wood	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8076	West Tilbury - Coal Road, East of Low Street Lane	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8082	Cropmarks to the north of Mill House Farm	High	No physical effects as asset located outside draft Order Limits	None	Neutral
8083	West Tilbury- High House	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8084	East of Mill House, Chadwell St Mary	High	No physical effects as asset located outside draft Order Limits	None	Neutral
8086	Manor Farm	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8087	Mucking Creek Valley	Medium	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8088	West Tilbury - Mill House Farm	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8089	Holford Farm	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
8090	Holford Farm	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8095	Linford	low	No physical effects as asset located outside draft Order Limits	None	Neutral
8099	East of West Tilbury	low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect
8100	Tilbury - Wick House	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Significant, permanent, negative effect

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8101	Tilbury	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8102	West side of East Tilbury Marshes (Findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8104	Orsett-Collingwood Farm	low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Significant, permanent, negative effect
8106	East or West Tilbury (Findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8107	Mucking Creek Valley (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8108	Stapleford Tawney (Epping) to Horndon Archaeological Field Survey (Findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8115	HCF: Horndon - Tilbury (Coalhouse Fort) Gas Pipeline (Findspot)		No physical effects as asset located outside draft Order Limits	None	Neutral
8116	HCF: Horndon - Tilbury (Coalhouse Fort) Gas Pipeline (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8117	HCF: Horndon - Tilbury (Coalhouse Fort) Gas Pipeline (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8118	HCF: Horndon - Tilbury (Coalhouse Fort) Gas Pipeline (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8119	Orsett-South of Orsett Hall (Findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8120	Tilbury (Findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8121	West Tilbury - Condoover's Pit (Findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8122	Stanford le Hope - only 4 fig NGR (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8124	Fieldwalking along the Epping-Horndon Gas Pipeline (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8125	Mucking: Palaeolithic (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8126	Golf Course, St. Cleres Hall (Findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8127	Golf Course, St. Cleres Hall (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8128	Golf Course, St. Cleres Hall (Findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8129	Golf Course, St. Cleres Hall (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8130	Golf Course, St. Cleres Hall (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8131	West Tilbury - Coal Road, East of Low Street Lane (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8133	Mucking Creek Valley (Findspot)	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	None	Not significant, permanent, negative effect
8139	Orsett Hall Estate Brick Works	Low	Construction of the Project would remove some of the recorded area of this asset, negatively affecting its value	Archaeological excavation and recording if required	Not significant, permanent, negative effect
8144	Road Barrier (destroyed), Stanford-le-Hope by-pass	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8145	Road Barrier (destroyed), London Road, Stanford-le-Hope	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8151	Road Barrier (destroyed), Cooper's Lane, West Tilbury	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

Section H: Non-Designated Heritage Assets					
ID Number	Name	Value	Construction Effects	Mitigation	Significance of Effect
8152	Biosolids Dryer at Tilbury sewage works	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8153	West Tilbury (Findspot)	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8154	East Tilbury Foreshore	High	No physical effects as asset located outside draft Order Limits	None	Neutral
8155	Croparks NW of High House	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
8156	Archaeological remains and cropmarks west of Mucking	High	No physical effects as asset located outside draft Order Limits	None	Neutral
8157	Archaeological remains and cropmarks west of Mucking	Medium	No physical effects as asset located outside draft Order Limits	None	Neutral
8158	Archaeological remains and cropmarks west of Mucking	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8159	Archaeological remains and cropmarks west of Mucking	Low	No physical effects as asset located outside draft Order Limits	None	Neutral
8160	Archaeological remains and cropmarks west of Mucking	Low	No physical effects as asset located outside draft Order Limits	None	Neutral

### 3. Preliminary Operational Effects

#### Designated Heritage Assets

#### Section A

Table A11.2.34: Preliminary Operational Effects on Listed Buildings – Section A

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
1178820	Church Of All Saints	I	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effects	Not significant negative effect
1049992	Church of All Saints	I	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1180035	Church of St Mary	I	High	The Project would introduce tall infrastructure within the setting of the asset,	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
				causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value		
1050237	Church of St Remigius	I	High	<p>The Project would introduce tall infrastructure within the setting of the asset, causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.</p> <p>The Waveney Valley Alternative would, following reinstatement of historic field boundaries, would cause a minor change to the rural aspect of the asset's setting.</p>	There is no suitable mitigation to reduce this effect apart from the Waveney Valley Alternative	<p>Significant negative effect (Waveney Valley overhead line design)</p> <p>Not significant negative effect (Waveney Valley Alternative)</p>
1373056	Kenningham Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
1050442	Glebe Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1050698	Flordon Hall	II*	High	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1172231	Piggery 60 Yards South of Flordon Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1373055	Barn to Flordon Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
				asset's setting, which makes a minor contribution to its value		
1050372	Limetree Farm Cottages	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1152683	Limetree Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1050373	Barn East of Limetree Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1152690	Stables Immediately South-East of	II	Medium	The Project would introduce tall infrastructure within the	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
	Limetree Farmhouse			setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value		
<b>1373217</b>	Cart Shed and Hay Loft South-East of Limetree Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.	There is no suitable mitigation to reduce this effect	Not significant negative effect
<b>1050374</b>	Corner Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
<b>1152699</b>	Barn Adjoining Corner Farmhouse on South-West	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
1178686	St Mary's Cottage	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1050076	Mary's Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.	There is no suitable mitigation to reduce this effect	Not significant negative effect
1302309	Barn Immediately North-West of Mary's Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1171167	Ebenezer Cottage	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
				asset's setting, which makes a minor contribution to its value		
1373609	Banyard's Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1049644	Wood Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1373606	Quaker's Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1179387	Manor House	II	Medium	The Project would introduce tall infrastructure within the	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
				setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value		
1373399	Low Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1373400	Old Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1179474	Tibenham Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
1050786	White House	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1050829	Park Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1049736	Heywood Manor	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1386527	Willow Bough Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect	There is no suitable mitigation to reduce this effect	Significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
				of the asset's setting, which makes a moderate contribution to its value		
1049737	Willows Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1373552	Hawthorn Cottage	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1049738	Vine Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1343675	Barn Immediately South of Vine Farmhouse	II	Medium	The Project would introduce tall infrastructure within the	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
				setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a minor contribution to its value		
<b>1050238</b>	Bluepump Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
<b>1373310</b>	The Gables	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1373273</b>	Limetree Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a major change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect

Section A: Listed Buildings						
ID Number	Name	Project Grade	Value	Operational Effects	Mitigation	Significance of Effect
1050271	The Hermitage	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1154298	Thatch End The Haven	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a major change to the rural aspect of the asset's setting, which makes a minor contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1050236	Grove Farmhouse	II	Medium	<p>The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.</p> <p>The Waveney Valley Alternative would, following reinstatement of historic field boundaries, not cause a change to the</p>	There is no suitable mitigation to reduce this effect	<p>Significant negative effect (Waveney Valley overhead line design)</p> <p>Neutral (Waveney Valley Alternative)</p>

				rural aspect of the asset's setting.		

Table A11.2.35: Preliminary Operational Effects on Scheduled Monuments – Section A

<b>Section A: Scheduled Monuments</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Operational Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1021463</b>	Venta Icenorum: Roman town and associated prehistoric, Anglo-Saxon, and medieval remains	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Table A11.2.36: Preliminary Operational Effects on Conservation Areas – Section A

<b>Section A: Conservation Areas</b>					
<b>ID Number</b>	<b>Name</b>	<b>Value</b>	<b>Operational Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>CA19</b>	Tacolneston	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
<b>CA20</b>	Winfarthing	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

3.1.1 There are no Registered Parks and Gardens included in assessment in the PEIR within Project Section A.

## Section B

Table A11.2.37: Preliminary Operational Effects on Listed Buildings – Section B

<b>Section B: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Operational Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1181735</b>	Church of St Mary the Virgin	II*	High	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of any removed historic field boundaries and earthworks	Neutral
<b>1033123</b>	Church of St Mary	I	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
<b>1180592</b>	Spring Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1352279</b>	Rookery Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1033192</b>	Spalls Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting,	There is no suitable mitigation to reduce this effect	Significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
				which makes a moderate contribution to its value		
<b>1352072</b>	Church of St Peter	I	High	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1231082</b>	Church of St Mary	I	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
<b>1231088</b>	The Dower House	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1231756	Church of St Mary	I	High	The Project would underground a section of 132 kV overhead line, currently supported by pylons, resulting in the removal of two towers c. 500 m to the west of the asset. The closest new 400 kV pylon would be located over 1 km to the north-west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.	Reinstatement of damaged/ removed historic field boundaries and earthworks	Not significant, permanent, positive effect
1231364	Lower Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1033018	Church of St Mary	I	High	The Project would result in no change within the setting of the asset	None	Neutral
1251602	Long Meadow	II	Medium	This section of the Project is undergrounding works causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1251594	Barn 50 Metres East of Castle Farmhouse	II	Medium	The Project would underground a section of 33 kV overhead line, currently supported by pylons, resulting in the removal of several towers c. 250 m to the west and south of the asset. The closest new 400 kV tower would be located c. 600 m to the south-west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Not significant, permanent, positive effect
1263030	Church of St Mary	I	High	The Project would underground a section of 33 kV overhead line, currently supported by pylons, resulting in the removal of several towers c. 600 m - 750m to the west and south of the asset. The closest new 400 kV pylon would be located c. 880 m to the south-west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Not significant, permanent, positive effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1251598	Mount Pleasant Farmhouse	II	Medium	The Project would underground a section of 33 kV overhead line, currently supported by pylons, resulting in the removal of several pylons c. 600 m to the south-west of the asset. The closest new 400 kV pylon would be located c. 870 m to the south-west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value.	Reinstatement of damaged/ removed historic field boundaries and earthworks	Not significant, permanent, positive effect
1250948	Valley Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1251595	Court Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1182737	The Rookery	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1032787	Park House	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1032788	Former Stable Block at St Johns Farm About 15m North of Park House	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1182135	Former Groom's House and Coach House About 30m East of Park House	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1352238	Hill House	II	Medium	The Project would result in no change within the setting of the asset	None	Neutral
1181694	Gibsons Farm House	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1181726	Hall Farm House	II	Medium	The Project would result in no change within the setting of the asset	None	Neutral

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1032806	Barn About 30m West of Hall Farm House	II	Medium	The Project would result in no change within the setting of the asset	None	Neutral
1352239	Pountney Hall	II	Medium	The Project would result in no change within the setting of the asset	None	Neutral
1032805	Barn About 40m North East of Poutney Hall	II	Medium	The Project would result in no change within the setting of the asset	None	Neutral
1352111	Starhouse Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1182599	Abbey Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1180451	Hempnalls Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1352480	Willow Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1032244	Boundary Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1352504	Lodge Cottage	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1180527	Mendlesham Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1032727	Grange Farmhouse	II	Medium	The Project would result in no change within the setting of the asset	None	Neutral
1180790	Barn And Attached Cartshed, 50 m North of Grange Farmhouse	II	Medium	The Project would result in no change within the setting of the asset	None	Neutral

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1032730	Hill Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1180903	Barn, 40 m South-West Of Rookery Farm	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1182121	Poplar Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1352325	Doles Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1032663	Star Orchard	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1032662	Firtree Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1182102	Upland House	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1032661	Grange Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1182013	Stowupland Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1033189	Upper Lonsdales Farmhouse	II	Medium		There is no suitable mitigation to reduce this effect	Not significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1033215	Roydon Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1284584	Barn 30 m North West of Roydon Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1352074	Garden Wall Enclosing Garden to South Side of Roydon Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1182339	Hill Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1352073	Creeting Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1033214	Grove Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1277414	Newton Cottages	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1231093	College Grove Farmhouse	II	Medium	The Project would underground a section of 132 kV overhead line, currently supported by pylons, resulting in the removal of several towers c. 450 m to the south-west of the asset. The closest new 400 kV tower would be located c. 630 m to the west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Not significant, permanent, positive effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1231581	Bungeons Farmhouse	II	Medium	The Project would underground a section of 132 kV overhead line, currently supported by pylons, resulting in the removal of some towers c. 50 m to 100m to the south-west of the asset. The closest new 400 kV tower would be located c. 530 m to the west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Not significant, permanent, positive effect
1231443	Home Farmhouse	II	Medium	The Project would underground a section of 132 kV overhead line, currently supported by pylons, resulting in the removal of a tower c. 150 m to the north of the asset. The closest new 400 kV tower would be located c. 800 m to the north-west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Not significant, permanent, positive effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1231522	Fairfax House	II	Medium	The Project would underground a section of 132 kV overhead line, currently supported by pylons, resulting in the modification of a tower c. 130 m to the east of the asset. The closest new 400 kV tower would be located c. 850 m to the north-west and whilst taller would be beyond the immediate setting of the asset. This would cause no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1278102	Ashburnham Farmhouse	II	Medium	The Project would underground a section of 132 kV overhead line, currently supported by pylons, resulting in the modification of a tower c. 360 m to the west of the asset. The closest new 400 kV tower would be located c. 1.3 km to the north-west and whilst taller would be beyond the immediate setting of the asset. This would cause no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1231305	Moat Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1278293	Former Stable Range 30 m West of Moat Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1033021	Gibbons Farm Cottage	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1352142	Hascot Hill Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1032952	Ringshall House	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1251803	Tye Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1251587	Rose Cottage Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1262688	The Old Vicarage	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1262690	Prospect House	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of any removed historic field boundaries and earthworks	Neutral
1251596	Maltings House	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of any removed historic field boundaries and earthworks	Neutral

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1251597	The Mutton	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of any removed historic field boundaries and earthworks	Neutral
1262691	Offton Place	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of any removed historic field boundaries and earthworks	Neutral
1251696	Hill Farmhouse	II	Medium	The Project would underground a section of 33 kV overhead line, currently supported by pylons, resulting in the dismantling of several pylons c. 250 m to the north of the asset. The closest new 400 kV tower would be located c. 220 m to the south-west within the setting of the asset. This would cause a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1262693	Grove Farmhouse	II	Medium	The Project would underground a section of 33 kV overhead line, currently supported by pylons, resulting in the removal of some pylons c. 100 m to the north-east of the asset. The closest new 400 kV pylon would be located c. 530 m to the south-west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of any removed historic field boundaries and earthworks	Not significant, permanent, positive effect
1262659	Gunn's Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1251669	Bleak Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1033263	Bullenhall Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section B: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1251603	Thornbush Hall	II	Medium	The Project would result in no change within the setting of the asset	None	Neutral

Table A11.2.38: Preliminary Operational Effects on Scheduled Monuments – Section B

Section B: Scheduled Monuments						
ID Number	Name	Value	Operational Effects	Mitigation	Significance of Effect	
1006049	Offton Castle	High	The Project would underground a section of 33 kV overhead line, currently supported by pylons, resulting in the removal of some pylons c. 120 m to the south of the asset. The closest new 400 kV pylon would be located c. 440 m to the south-west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of any removed historic field boundaries and earthworks	Not significant, permanent, minor positive effect	

Table A11.2.39: Preliminary Operational Effects on Conservation Areas – Section B

Section B: Conservation Areas					
ID Number	Name	Value	Operational Effects	Mitigation	Significance of Effect
CA47	Mellis	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value. The closest new 400 kV pylon would be located c. 740 m to the north-west and beyond the immediate setting of the asset.	Reinstatement of any removed historic field boundaries and earthworks	Neutral
CA45	Badley Church Green	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

3.1.2 There are no Registered Parks and Gardens included in assessment in the PEIR within Project Section B.

## Section C

Table A11.2.40: Preliminary Operational Effects on Listed Buildings – Section C

<b>Section C: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Operational Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1033409</b>	Wenham Grange	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
<b>1033410</b>	Church of St Lawrence, Formerly Church of All Saints	I	High	The Project would result in no change within the setting of the asset	None	Neutral
<b>1036898</b>	Birch House Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1036952</b>	Church Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
<b>1036957</b>	Higham Hall	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1036958	The Old Vicarage	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1036963/ 1036986	Dewlands Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1036963	Dewlands Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1036983	Lark Hall	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1036984	Pintins	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1036985	Tiffins	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1036991	Lowe Hill House	II*	High	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1111421	Gig House Approximately 10 m North East of Newhouse Farmhouse	II	Medium	The Project would introduce the EACN access carriageway within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1111459	Jenning's Farmhouse	II	Medium	The Project would introduce the EACN access carriageway within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1112060	Church of St Mary	II*	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1112086	Thatched Cottage	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1112088	Whaley Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1112091	Hungerdowns Farmhouse	II	Medium	The Project would introduce tall infrastructure and possibly bunds within the setting of the asset, causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1112093	Maltings Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1112094	Blue Barns Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1147592	Beaumaris Witheys	II	Medium	The Project would underground a section of 33 kV overhead line, currently supported by wooden poles, resulting in the removal of several poles c. 120 m+ to the east of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of any removed historic field boundaries and earthworks	Not significant positive effect
1147645	Gods House Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1147743	Bounds Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1147771	Barn Approximately 40 m North West of Lodge Farmhouse	II	Medium	This section of the Project is temporary pipeline protection works causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1194408	Church of St Mary	II*	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1198589	Idle Waters, The Island	II	Medium	This section of the Project is temporary drainage works causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1223452	Church of St Mary	I	High	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1223463	School North West of Church of St Mary	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1223464	Church Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1223469	Langford Hall	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1223498	Pungford Cottages	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1223526	Glebe Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1223527	Glebe House	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1223548	Barn to East of Glebe Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1253912	Fountain Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1253913	Wick Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1253914	Barn Adjacent to Road at Wick Farm	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1253915	Bloomfields Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1261548	Barn Approximately 40 m North East of Bloomfields Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1267140	Grove Cottage	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1267273	Ewens Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1267300	Broomhouse to North of The Hall	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1273800	Mulberry House	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1285586	Wall and Gates adjacent to Road, Enclosing Garden to North of Wenham Grange	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1285727	Coles Green Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1322652	Thatched Cottage	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1337176	Newhouse Farmhouse	II	Medium	The Project would introduce the EACN access carriageway within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1337177	Barn Approximately 20 m West of Newhouse Farmhouse	II	Medium	The Project would introduce the EACN access carriageway within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1351596	Church of St Mary	II*	High	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1351617	Fenn Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1351620	Church of All Saints	II*	High	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1351625	Church of St Mary	II*	high	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1351957	Vauxhall	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1337174	Grove Farmhouse	II	Medium	The Project would introduce the EACN access carriageway within the setting of the asset, causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1337155	Braham Hall	II	Medium	The Project would introduce the EACN access carriageway within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1036982	Holton Place	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1111418	Pair of Cottages Approximately 10 m South of the Fox and Hounds Public House	II	Medium	The Project would introduce the EACN access carriageway within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1147792	Milestone on East Verge Approximately 240 m South of Harts Lane	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
1322614	Lodge Farmhouse	II	Medium	This section of the Project is pipeline protection works causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section C: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1223465	The Hall	II*	High	This section of the Project is pipeline protection works causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1223466	Langham Hall Farmhouse	II	Medium	This section of the Project is pipeline protection works causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Table A11.2.41: Preliminary Operational Effects on Scheduled Monuments – Section C

Section C: Scheduled Monuments					
ID Number	Name	Value	Operational Effects	Mitigation	Significance of Effect
1002146	Crop mark site S of Ardleigh	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Table A11.2.42: Preliminary Operational Effects on Conservation Areas – Section C

Section C: Conservation Areas					
ID Number	Name	Value	Operational Effects	Mitigation	Significance of Effect
CA41	Stratford St Mary	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
CA26	Ardleigh	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

3.1.3 There are no Registered Parks and Gardens included in assessment in the PEIR within Project Section C.

## Section D

Table A11.2.43: Preliminary Operational Effects on Listed Buildings – Section D

<b>Section D: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Operational Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1224521</b>	Church of St James	I	High	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1110894</b>	Old Bouchiers Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect
<b>1170055</b>	Green Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant negative effect

Section D: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1169966	Numbers 1, 2 and 3 Brick Cottages	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1170085	Church House Farmhouse	II	Medium	The Project would result in no change within the setting of the asset	None	Neutral
1222602	Fordham Place	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1222665	Wisteria	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
1222667	Messrs Peatling And Cawdron	II	Medium	This section of the Project is undergrounded	Reinstatement of damaged/ removed	Neutral

Section D: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
				causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	historic field boundaries and earthworks	
<b>1222668</b>	House Adjoining And To The North Of Peatling And Cawdron	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
<b>1222771</b>	Knowles Cottage	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
<b>1222772</b>	Knowles Farmhouse	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

Section D: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
				makes a moderate contribution to its value		
<b>1222850</b>	Old House Farmhouse	II	Medium	This section of the Project is pipeline protection works causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
<b>1222851</b>	Coachhouse To West Of Old House Farmhouse	II	Medium	This section of the Project is pipeline protection works causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
<b>1222853</b>	Barn At Oldhouse Farmyard, Aligned North South	II	Medium	This section of the Project is pipeline protection works causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral

<b>Section D: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Operational Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1222854</b>	Barn, Aligned East West At Oldhouse Farm	II	Medium	This section of the Project is pipeline protection works causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
<b>1222857</b>	Granary At Oldhouse Farm	II	Medium	This section of the Project is pipeline protection works causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
<b>1222861</b>	Oak Cottage	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/ removed historic field boundaries and earthworks	Neutral
<b>1222862</b>	Church Of England School	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the	Reinstatement of damaged/ removed historic field	Neutral

Section D: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
				asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	boundaries and earthworks	
1222863	New Barn House	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/removed historic field boundaries and earthworks	Neutral
1222893	Barn To North Of Barn Aligned East West At Oldhouse Farm	II	Medium	This section of the Project is pipeline protection works causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/removed historic field boundaries and earthworks	Neutral
1222923	School House	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/removed historic field boundaries and earthworks	Neutral

<b>Section D: Listed Buildings</b>						
<b>ID Number</b>	<b>Name</b>	<b>Grade</b>	<b>Value</b>	<b>Operational Effects</b>	<b>Mitigation</b>	<b>Significance of Effect</b>
<b>1222924</b>	Barn To South Of New Barn House	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/removed historic field boundaries and earthworks	Neutral
<b>1222977</b>	Breewood Hall	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/removed historic field boundaries and earthworks	Neutral
<b>1222979</b>	Cart Lodge With Granary Over To South Of Breewood Hall	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-construction, which makes a moderate contribution to its value	Reinstatement of damaged/removed historic field boundaries and earthworks	Neutral
<b>1222981</b>	Highlands	II	Medium	This section of the Project is undergrounded causing no change to the rural aspect of the asset's setting, following reinstatement post-	Reinstatement of damaged/removed historic field boundaries and earthworks	Neutral

ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
	Westcocks Farmhouse			moderate contribution to its value		
<b>1168121</b>	Granary Approximately 20m South of Westcocks Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1123449</b>	Great Warley Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1248834</b>	Barn Approximately 40m West-South-West of Great Warley Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1337818</b>	Barn Approximately 40m South-West of Great Warley Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1123454</b>	Beauchamps	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor	There is no suitable mitigation	Not significant, negative effect

Section E: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
				change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	to reduce this effect	
<b>1123457</b>	Troys Hall	II*	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant, negative effect
<b>1169484</b>	Cockerell's Farmhouse and Bakehouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant, negative effect
<b>1306737</b>	Coggeshall Hall Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant, negative effect
<b>1123869</b>	Barn 20 m North West of Coggeshall Hall Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant, negative effect

Section E: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1123839	The Old Cottage	II	Medium	The Project would underground a section of 33 kV overhead line, currently supported by pylons, resulting in the removal of a pylon from the immediate setting of this asset, 32 m to the south. The closest new 400 kV pylon would be located 240 m south-west and whilst taller would be beyond the immediate setting of the asset. This would cause a minor positive change to the rural aspect of the asset's setting, which makes a moderate contribution to its value.	None	Not significant, positive effect
1171147	Monk's Farm Cottages	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a major change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1123868	Hungry Hall Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
1123812	Pound Farmhouse	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate	There is no suitable mitigation	Significant negative effect

Section E: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
				change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	to reduce this effect	
<b>1123797</b>	Felix Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1305802</b>	The Clock House	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1337627</b>	The Orangery	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a moderate change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant negative effect
<b>1170991</b>	Rook Hall	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Significant, negative effect

Section E: Listed Buildings						
ID Number	Name	Grade	Value	Operational Effects	Mitigation	Significance of Effect
1122598	Rivenhall Place	II*	High	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant, negative effect
1338253	Bridge to Rivenhall Place	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a negligible change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant, negative effect
1146765	Homecot	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant, negative effect
1123455	Pond Cottage	II	Medium	The Project would introduce tall infrastructure within the setting of the asset, causing a minor change to the rural aspect of the asset's setting, which makes a moderate contribution to its value	There is no suitable mitigation to reduce this effect	Not significant, negative effect
1123461	Hill Farmhouse	II	Medium	This section of the Project is a temporary haul road causing no change to the rural aspect of the asset's setting, following reinstatement post-construction,	Reinstatement of any removed historic field boundaries and earthworks	Neutral

## PROJECT INFORMATION:

PROJECT NAME	Norwich to Tilbury, Ardleigh, Essex
TYPE OF WORK	Geophysical Survey
PLANNING REF.	n/a
PARISH NO.	n/a
CONSULTANT/AGENT	Arcadis Consulting (UK) Ltd
CLIENT	National Grid
PROJECT CODE	ARDL23
NGR	NGR TM 07332 29021
PARISH	Ardleigh, St Mary the Virgin
LOCAL AUTHORITY	Ardleigh Parish Council
FIELDWORK DATES	07/06/2023, 29/08/2023 – 31/-8/2023, 14/09/2023
OASIS REF.	headland1-521299
ARCHIVE REPOSITORY	Headland Archaeology

## PROJECT SUMMARY

*Headland Archaeology (UK) Ltd was commissioned by Arcadis Consulting Ltd (the Consultant) on behalf of National Grid (the Client) to undertake a geophysical (magnetometer) survey on land covering 39 hectares approximately 1.5km east of Ardleigh, Essex. This geophysical survey report will be submitted in support of a Development Consent Order (DCO) and may also inform future archaeological strategy at the site, if required.*

*Anomalies primarily of geological and recent agricultural origin have been identified by the survey, including one former field boundary recorded on first edition historic mapping; several other former boundaries are not recorded by the survey.*

*No anomalies of probable archaeological interest are identified. This is in contrast to the findings of a review of historic environment data, which revealed a plethora of cropmarks, indicative of prehistoric and Roman activity in the surrounding landscape but also within the GSA. Those cropmark features within the GSA include a Roman road, and several rectilinear and linear features. It is considered that the most likely reason for the apparent inability of the survey to detect these cropmark features (assuming they haven't been ploughed away since the air photographs were taken) is due to a lack of magnetic contrast between the fill of the features and the surrounding soils, the homogenous sandy nature of the soils possibly accounting for the apparent lack of visibility.*

*Based solely on the results of the geophysical survey, the archaeological potential of the GSA is assessed as low. However, due to the likely poor magnetic contrast on this site, the overall potential should be considered to be uncertain.*

# NORWICH TO TILBURY, ARDLEIGH, ESSEX

## GEOPHYSICAL SURVEY REPORT

### 1. INTRODUCTION

Headland Archaeology (UK) Ltd was commissioned by Arcadis Consulting Ltd (the Consultant) on behalf of National Grid (the Client) to undertake a geophysical (magnetometer) survey on a block of land approximately 1.5km east of Ardleigh, Essex (Illus 1). This geophysical survey report will be submitted in support of a Development Consent Order (DCO) for the scheme and may also inform future archaeological strategy, if required.

The scheme of work was undertaken in accordance with the requirements of the National Planning Policy Framework (DLUHC 2023) and with the Written Scheme of Investigation for Geophysical Survey (WSI) (Headland Archaeology 2023).

The WSI was produced to the standards laid down in the European Archaeological Council's guideline publication, EAC Guidelines for the Use of Geophysics in Archaeology (Europae Archaeologia Consilium 2016) and the Chartered Institute for Archaeologists' (CifA) Standard and Guidance for Archaeological Geophysical Survey (CifA 2014b). The survey was also carried out in line with the same best practice guidelines.

The survey was carried out in three mobilisations; on June 7th 2023, August 29th to August 31st 2023, and on September 14th 2023. This was to allow for the harvest of mature crops, which once harvested, allowed for suitable ground conditions.

#### 1.1. SITE LOCATION, TOPOGRAPHY AND LAND-USE

The geophysical survey area (GSA) covers approximately 39 hectares and comprises six fields (F1 to F6 inclusive) under arable cultivation, centred

at NGR TM 07332 29021. The GSA is bisected by Hungerdown Lane, with two fields (F1 and F2) to the west of the lane, and four (F3 to F6) to the east. Little Bromley Road borders the GSA to the south with Grange Road to the east and fields extending beyond to all sides. Moorehouse Farm and its outbuildings are situated between F2 and F4. There are three electricity pylons in F5 and F6.

All fields had been harvested prior to survey (Illus 2 to Illus 4 inclusive) although a strips of bird cover prohibited survey around the eastern and western sides of F6.

Topographically the land within the GSA is generally level, with a gentle slope downwards from north to south from approximately 37m to approximately 35m Above Ordnance Datum (AOD).

#### 1.2. GEOLOGY AND SOILS

The underlying bedrock comprises Thames Group - clay, silt and sand, a sedimentary bedrock formed between 56 and 33.9 million years ago during the Palaeogene period. This is overlain by Cover Sand - clay, silt and sand, sedimentary superficial deposits formed between 2.588 million years ago and the present during the Quaternary period (UKRI 2023).

The soils are described as slightly acid loams and clays with impeded drainage, as classified in the Soilscape 8 Association (Cranfield University 2023).

## 2. ARCHAEOLOGICAL BACKGROUND

The information in this section has been abstracted from Essex Historic Environment Record (EHER) data and provided by Arcadis Consulting.

Numerous cropmarks are recorded within and surrounding the GSA. Covering much of the GSA, HER polygon (MEX9188) records linear cropmarks (probable field divisions) at right angles to the Roman road which links Mistley with Colchester (MEX9020), which is aligned north-east/south-west, across the south of the GSA, and which is identified as a double-ditched cropmark on air photographs.

Also recorded as part of the same asset, are two possible ring ditches located north-east and east of Bradley Hall respectively.

In close proximity to (but just outside) the GSA to the immediate north-west, cropmarks indicative of a ring ditch, pits and a length of probable undated road are recorded, in addition to other linear features (MEX8391).

Other cropmarks interpreted as a double-ditched enclosure, trackways, and other linear features (MEX43488) are recorded to the immediate east of the GSA.

Approximately 240m east of the GSA, a group of three ring ditches is recorded, all with a diameter of 25m (MEX9394).

Approximately 260m east of the GSA, the HER records a double-ditched 'D' shaped enclosure, rectilinear enclosure, and linear ditch, prehistoric in date (MEX9430). North of this, approximately 150m east of the GSA, is a cropmark rectilinear enclosure, of likely prehistoric date (MEX43490). Further north still, 210m north-east of the GSA, are cropmarks indicative of a partial curvilinear enclosure, 40m in diameter, of unknown date (MEX1041356).

In the wider landscape, approximately 1km south-east of the GSA, cropmarks (MEX8620) covering a large area and including field systems, trackways, enclosures, ring ditches and a possible henge are present. At least 16 ring-ditches are recorded to the east of the possible henge.

The GSA is clearly located within a landscape of high archaeological potential.

## 3. AIMS, METHODOLOGY & PRESENTATION

### 3.1. AIMS AND OBJECTIVES

The principal aim of the geophysical survey was to gather information to establish the presence/absence, character, and extent of any archaeological remains within the GSA. This will enable an assessment to be made of the impact of the proposed development on any sub-surface archaeological remains if present, and thereby inform any further investigation strategies, as appropriate.

The specific archaeological objectives of the geophysical survey were:

- to provide information about the nature and possible interpretation of any magnetic anomalies identified,
- to therefore determine the likely presence/absence and extent of any buried archaeological features, and
- to prepare a report summarising the results of the survey.

### 3.2. METHODOLOGY

Magnetic survey methods rely on the ability of a variety of instruments to measure very small magnetic fields associated with buried archaeological remains. A feature such as a ditch, pit or kiln can act like a small magnet, or series of magnets, that produce distortions (anomalies) in the earth's magnetic field. In mapping these slight variations detailed plans of sites can be obtained, as buried features often produce reasonably characteristic anomaly shapes and strengths (Gaffney & Gater 2003). Further information on soil magnetism and the interpretation of magnetic anomalies is provided in Appendix 1.

Magnetometry is the most widely used geophysical survey technique in archaeology as it can quickly evaluate large areas and, under favourable conditions, identify a wide range of archaeological features including infilled cut features such as large pits, gullies and ditches, hearths, and areas of burning, and kilns and brick structures. It is therefore good at locating settlements of all periods, prehistoric field systems and enclosures, and areas of industrial or modern activity, amongst others. It is

less successful in identifying smaller features such as post-holes and small pits (except when using a non-standard sampling interval), unenclosed (prehistoric) settlement sites and graves/burial grounds. However, magnetometry is by far the single most useful technique and was assessed as the best non-intrusive evaluation tool for this site.

The survey was undertaken using four Bartington Grad601 sensors mounted at 1m intervals (1m traverse interval) onto a rigid frame. The system was programmed to take readings at a frequency of 10Hz (allowing for a 10-15cm sample interval) on roaming traverses (swaths) 4m apart (Illus 6). These readings were stored on an external weatherproof laptop and later downloaded for processing and interpretation. The system was linked to a Trimble R12 Real Time Kinetic (RTK) differential Global Positioning System (dGPS) outputting in NMEA mode to ensure a high positional accuracy for each data point.

MLGrad601 and MultiGrad601 (Geomar Software Inc.) software was used to collect and export the data. Anomaly GeoSurvey v1.12.5 (Lichenstone Geoscience) and QGIS v3.28.5 software was used to process and present the data respectively.

### 3.3. DATA PRESENTATION AND TECHNICAL DETAIL

A general site location plan is shown in Illus 1 at a scale of 1:10,000. Illus 2 to Illus 5 inclusive are site condition photographs. Illus 6 shows the GPS swaths, and the location and direction of the site condition photographs, at 1:7,000. Illus 6 and Illus 7 show overviews of the processed magnetometer data and interpretation respectively, also at a scale of 1:7,000, as well as known heritage assets within or adjacent to the GSA. Fully processed (greyscale) data, minimally processed data (XY trace plot) data and interpretative plans are presented by Sector, also at 1:2,500, in Illus 9 to Illus 17 inclusive.

Technical information on the equipment used, data processing and magnetic survey methodology is given in Appendix 1. Appendix 2 details the survey location information and Appendix 3 describes the composition and location of the site archive. Data processing details are presented in Appendix 4. A copy of the OASIS entry (Online Access to the Index of Archaeological Investigations) is reproduced in Appendix 5.

The survey methodology, report and any recommendations comply with the Written Scheme of Investigation (Headland Archaeology 2023),

guidelines outlined by Europae Archaeologia Consilium (EAC 2016) and by the Chartered Institute for Archaeologists (CIfA 2014b). All illustrations from Ordnance Survey (OS) mapping are reproduced with the permission of the controller of His Majesty's Stationery Office (© Crown Copyright).

The Illustrations in this report have been produced following analysis of the data in 'raw' (minimally processed) and processed formats and over a range of different display levels. All illustrations are presented to display and interpret the data to best effect. The interpretations are based on the experience and knowledge of Headland management and reporting staff.

## 4. RESULTS & DISCUSSION

### 4.1. SITE CONDITIONS

Magnetometer survey is generally recommended over any sedimentary bedrock but the 'average response' on Thames Group clay, silt and sand may be variable and can be poor (English Heritage 2008; Table 4). The overlying superficial deposits of Cover Sand may also reduce the effectiveness of the technique. Nevertheless, magnetometry was still the most appropriate non-intrusive geophysical technique for evaluating the GSA, taking account of the limitations noted in Section 3.2 and above.

Surface conditions were generally good (Illus 2 to Illus 4 inclusive) and data quality was also good with only minimal post-processing required. No problems were encountered during the fieldwork, although two strips along the east and west edges of F6, were unsuitable for survey due to bird cover (Illus 5).

The magnetic background is generally fairly uniform although there are broader areas of low magnitude enhancement, particularly in the north of F5, as well as more clearly defined sinuous anomalies forming irregular patterning at several locations, notably in F5 and F6 (see Section 4.5).

Against this magnetic background, anomalies of geological, agricultural, modern, and uncertain origin have been recorded (Illus 8). No anomalies of likely archaeological origin have been identified.

The fact that these anomalies were recorded suggests that there was sufficient magnetic contrast, for the detection of some types of features, notwithstanding the limitations of magnetometer survey to identify the types, sizes, and period of

archaeological features as described in Section 3.2. However, the generally average to poor response to magnetometer survey on Thames Group clay, silt, and sand, combined with the presence of the overlying superficial deposits, may indicate that the magnetic contrast across the GSA is likely to be low such that certain types of features, particularly those that may be small and/or shallow, may not be detectable on this site. It is therefore not certain whether the survey is giving a true indication of the extent of sub-surface archaeological features.

The anomalies are discussed below according to their interpreted origin.

#### 4.2. FERROUS AND MODERN ANOMALIES

Ferrous anomalies, characterised as individual 'spikes', are typically caused by ferrous (magnetic) material, either on the ground surface or in the plough-soil. Little importance is normally given to such anomalies, unless there is any supporting evidence for an archaeological interpretation, as modern ferrous debris is common on most sites, often being introduced into the topsoil during manuring or tipping/infilling.

Bands or small areas of magnetic disturbance recorded along the field edges are likely to be due to the accumulation of ferrous debris around field margins or to ferrous material in the boundary itself. Examples of this are recorded in the centre of F2, where two bands of disturbance are caused by fencing around two small copses.

Three 'halos' of magnetic disturbance recorded in F5 and F6 are due to the proximity of electricity pylons.

#### 4.3. AGRICULTURAL ANOMALIES

One low magnitude linear anomaly (Illus 8 - FB1) recorded in the south-west corner of F5 correlates with a field boundary recorded on the OS 1888 first edition mapping. However, several other boundary features also depicted on the first edition mapping are not visible in the data.

Throughout the GSA, a series of low magnitude linear trend anomalies record the orientation of modern ploughing regimes, while more broadly spaced dipolar anomalies, such as those in F2, locate modern field drains.

#### 4.4. ANOMALIES OF GEOLOGICAL ORIGIN

The geological background across the GSA is largely homogenous but with broad, vague, and amorphous areas of geological variation and more

numerous irregular linear and curvilinear anomalies recorded, particularly in F5 and F6 (see Section 4.1, para. 3).

#### 4.5. ANOMALIES OF UNCERTAIN ORIGIN

Within the centre-north of F5, and the east of F6, several very low magnitude sinuous anomalies are recorded (Illus 14 and Illus 17 – U1 and U2). These anomalies are interpreted as of uncertain origin, as they form a more regular but discontinuous pattern that could be indicative of archaeological activity. However, these anomalies lack any definite pattern or morphology that would allow for a more certain interpretation. On balance it is considered most likely that these anomalies are also natural in origin although an archaeological origin cannot be completely discounted, especially in light of the density of archaeological features in the surrounding landscape.

#### 4.6. ANOMALIES OF POSSIBLE OR PROBABLE ARCHAEOLOGICAL ORIGIN

Despite the density of archaeological remains surrounding the GSA and cropmarks interpreted as archaeological features within the GSA, no anomalies of likely archaeological origin have been identified by the survey.

The most probable reason for this is a lack of magnetic contrast in the homogenous sandy soils and geology of the GSA, a factor which may not impact the visibility of cropmarks.

### 5. CONCLUSION

Anomalies primarily of geological and recent agricultural origin have been identified by the survey, including one former field boundary recorded on first edition mapping; several other former boundaries have not recorded by the survey.

No anomalies of probable archaeological potential have been identified. This contrasts with the findings of a review of historic environment data, which revealed a plethora of cropmarks, indicative of prehistoric and Roman activity not only in the surrounding landscape but also within the GSA. Those cropmark features within the GSA include a Roman road, and several rectilinear and linear features. It is considered that the most likely reason for the apparent inability of the survey to detect these cropmark features (assuming they haven't been ploughed away since the air photographs were

taken) is due to a lack of magnetic contrast between the fill of the features and the surrounding soils, the homogenous sandy nature of the soils possibly accounting for the apparent lack of visibility.

Based solely on the results of the geophysical survey, the archaeological potential of the GSA is assessed as low. However, due to the likely poor magnetic contrast on this site, the overall potential should be considered to be uncertain.

## 7. APPENDICES

### APPENDIX 1 MAGNETOMETER SURVEY

#### *Magnetic susceptibility and soil magnetism*

Iron makes up about 6% of the earth's crust and is mostly present in soils and rocks as minerals such as maghaemite and haematite. These minerals have a weak, measurable magnetic property termed magnetic susceptibility. Human activities can redistribute these minerals and change (enhance) others into more magnetic forms so that by measuring the magnetic susceptibility of the topsoil, areas where human occupation or settlement has occurred can be identified by virtue of the attendant increase (enhancement) in magnetic susceptibility. If the enhanced material subsequently comes to fill features, such as ditches or pits, localised isolated and linear magnetic anomalies can result whose presence can be detected by a magnetometer (fluxgate gradiometer).

In general, it is the contrast between the magnetic susceptibility of deposits filling cut features, such as ditches or pits, and the magnetic susceptibility of the topsoil, subsoil, and rock, into which these features have been cut, which causes the most recognisable responses. This is primarily because there is a tendency for magnetic ferrous compounds to become concentrated in the topsoil, thereby making it more magnetic than the subsoil or the bedrock. Linear features cut into the subsoil or geology, such as ditches, that have been silted up or have been backfilled with topsoil will therefore usually produce a positive magnetic response relative to the background soil levels. Discrete feature, such as pits, can also be detected.

The magnetic susceptibility of a soil can also be enhanced by the application of heat. This effect can lead to the detection of features such as hearths, kilns, or areas of burning.

#### *Types of magnetic anomaly*

In most instances anomalies are termed 'positive'. This means that they have a positive magnetic value relative to the magnetic background on any given site. However, some features can manifest themselves as 'negative' anomalies that, conversely, means that the response is negative relative to the mean magnetic background.

Where it is not possible to give a probable cause of an observed anomaly a '?' is appended.

It should be noted that anomalies interpreted as modern in origin might be caused by features that are present in the topsoil or upper layers of the subsoil. Removal of soil to an archaeological or natural layer can therefore remove the feature causing the anomaly.

The types of response mentioned above can be divided into five main categories that are used in the graphical interpretation of the magnetic data:

#### ***Isolated dipolar anomalies (iron spikes)***

These responses are typically caused by ferrous material either on the surface or in the topsoil. They cause a rapid variation in the magnetic response giving a characteristic 'spiky' trace. Although ferrous archaeological artefacts could produce this type of response, unless there is supporting evidence for an archaeological interpretation, little emphasis is normally given to such anomalies, as modern ferrous objects are common on rural sites, often being introduced into the topsoil during manuring.

#### ***Areas of magnetic disturbance***

These responses can have several causes often being associated with burnt material, such as slag waste or brick rubble or other strongly magnetised/fired material. Ferrous structures such as pylons, mesh or barbed wire and buried pipes can also cause the same disturbed response. A modern origin is usually assumed unless there is other supporting information.

#### ***Lightning-induced remnant magnetisation (LIRM)***

LIRM anomalies are thought to be caused in the near surface soil horizons by the flow of an electrical current associated with lightning strikes. These observed anomalies have a strong bipolar signal which decreases with distance from the spike point and often appear as linear or radial in shape.

#### ***Linear trend***

This is usually a weak or broad linear anomaly of unknown cause or date. These anomalies are often caused by agricultural activity, either ploughing or land drains being a common cause.

#### ***Areas of magnetic enhancement/positive isolated anomalies***

Areas of enhanced response are characterised by a general increase in the magnetic background over a localised area whilst discrete anomalies are manifest by an increased response (sometimes only visible on

an XY trace plot) on two or three successive traverses. In neither instance is there the intense dipolar response characteristic exhibited by an area of magnetic disturbance or of an 'iron spike' anomaly (see above). These anomalies can be caused by infilled discrete archaeological features such as pits or post-holes or by kilns. They can also be caused by pedological variations or by natural infilled features on certain geologies. Ferrous material in the subsoil can also give a similar response. It can often therefore be very difficult to establish an anthropogenic origin without intrusive investigation or other supporting information.

#### ***Linear and curvilinear anomalies***

Such anomalies have a variety of origins. They may be caused by agricultural practice (recent ploughing trends, earlier ridge and furrow regimes or land drains), natural geomorphological features such as palaeochannels or by infilled archaeological ditches.

## **APPENDIX 2 SURVEY LOCATION INFORMATION**

An initial survey base station was established using a Trimble VRS differential Global Positioning System (dGPS). The magnetometer data was georeferenced using a Trimble RTK differential Global Positioning System (Trimble R10 model).

Temporary sight markers were laid out using a Trimble VRS differential Global Positioning System (Trimble R8s model) to guide the operator and ensure full coverage. The accuracy of this dGPS equipment is better than 0.01m.

The survey data were then super-imposed onto a base map provided by the client to produce the displayed block locations. However, it should be noted that Ordnance Survey positional accuracy for digital map data has an error of 0.5m for urban and floodplain areas, 1.0m for rural areas and 2.5m for mountain and moorland areas. This potential error must be considered if coordinates are measured off hard copies of the mapping rather than using the digital coordinates.

*Headland Archaeology cannot accept responsibility for errors of fact or opinion resulting from data supplied by a third party.*

## **APPENDIX 3 GEOPHYSICAL SURVEY ARCHIVE**

The geophysical archive comprises an archive disk containing the raw data in XYZ format, a raster image

of each greyscale plot with associate world file, and a PDF of the report.

The project will be archived in-house in accordance with recent good practice guidelines ([http://guides.archaeologydataservice.ac.uk/g2gp/Geophysics\\_3](http://guides.archaeologydataservice.ac.uk/g2gp/Geophysics_3)). The data will be stored in an indexed archive and migrated to new formats when necessary.

## **APPENDIX 4 DATA PROCESSING**

The gradiometer data has been presented in this report in processed greyscale and minimally processed XY trace plot format.

Data collected using RTK GPS-based methods cannot be produced without minimal processing of the data. The minimally processed data has been interpolated to project the data onto a regular grid and de-striped to correct for slight variations in instrument calibration drift and any other artificial data.

A high pass filter has been applied to the greyscale plots to remove low frequency anomalies (relating to survey tracks and modern agricultural features) to maximise the clarity and interpretability of the archaeological anomalies.

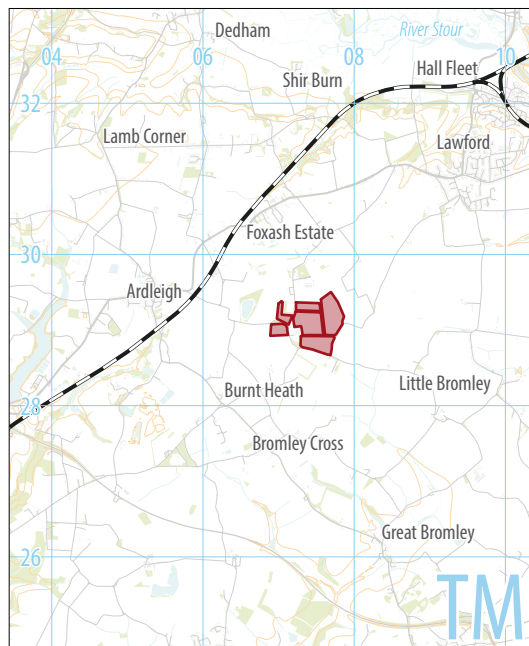

The data has also been clipped to remove extreme values and to improve data contrast.

# Appendix 12.1: Hydrology and Land Drainage Baseline

# Appendix 12.1 - Hydrology and Land Drainage Baseline

## 12.1 Introduction

12.1.1 This appendix has been produced to support Chapter 12: Hydrology and Land Drainage in Volume I. It sets out the Hydrology and Land Drainage baseline relevant to the Project regarding surface water discharges and abstractions. Only active discharges and abstractions have been included.

## 12.2 Surface Water Discharges

12.2.1 Existing consented discharges to surface water have been obtained from the Environment Agency<sup>1</sup> (January 2024). The information on active discharges is presented in Table A12.1.1 below. The locations are shown in Figure 12.1: Study Area and Water Environment Features at Volume II.

Table A12.1.1: Existing Consented Surface Water Discharges

Project Section	Consent No.	Discharge Type	Receiving Watercourse
A	AN/PRENF11559/001	Domestic property (single) (incl. farm house)	River Tas
A	AN/PRELF20038/002	Wastewater Treatment Works (WwTW) (not water co) (not Sewage Treatment Plant (STP) at a private premises)	River Tas
A	AN/PR4NF1026X/002	WwTW (not water co) (not STP at a private premises)	River Tas
A	AN/AW4NF396X/002	WwTW/Sewage Treatment Works (water company)	River Tas
A	AN/PRENF15071/001	Domestic property (single) (incl. farm house)	Unnamed ditch/River Tas tributary
A	AN/PR4NF616X/003	WwTW/Sewage Treatment Works (water company)	Unnamed ditch/River Tas tributary
A	AN/EPRAB3290VF/001	Education/Nursery/School/College/Uni/ Training Venue	Frenze Beck tributary

## Executive Summary

This Flood Risk Assessment (FRA) Screening Report has been produced to support the Preliminary Environmental Information Report (PEIR) for the Norwich to Tilbury Project (hereafter referred to as 'the Project') (formerly known as East Anglia Green Energy Enablement ((GREEN)) and will be provided as Appendix 12.2 of the PEIR. A FRA will be produced to support the Development Consent Order (DCO) application and will support the assessment presented in the Environmental Statement (ES). This screening assessment states the sources of flood risk that are screened in to and out of the FRA and provides evidence and justification for the sources that have been screened out.

Flooding from rivers, the sea, surface water and groundwater have been screened in for assessment in the FRA. The FRA will document risks to the Project from these sources during construction and over its operational lifetime. The FRA will also assess the potential for the Project to increase flood risk from any of these sources, in accordance with the requirements set out in relevant national policy, and recommend flood resilience and mitigation measures, which would be secured through the DCO.

Flooding from sewers and water mains has been screened out and no further assessment of these sources will be included in the FRA. Most of the land within the draft Order Limits is rural/agricultural and therefore is not expected to be served by the sewer or water mains networks, consequently with the risk of flooding considered to be low. For more developed land within the draft Order Limits, based on review of available data, no areas at elevated risk from these sources have been identified within the draft Order Limits. The Project is not anticipated to increase flood risk from these sources elsewhere.

Flooding from reservoirs, canals and other artificial sources has also been screened out. Flooding from reservoirs is a residual risk and one that is not considered to pose an onerous risk to the Project given the stringent inspection and maintenance requirements imposed under UK legislation. No canals are present within the study area and no other artificial sources of flooding that pose a risk to the Project have been identified. The Project is not anticipated to increase flood risk from these sources elsewhere.

The adopted approach of undertaking a screening assessment will deliver a site-specific FRA that is more concise and focused on assessing key sources of flood risk.

# 1. Introduction

# 1. Introduction

## 1.1 Overview of the Project

- 1.1.1 The Norwich to Tilbury Project (referred to as ‘the Project’) (formerly known as East Anglia Green Energy Enablement ((GREEN)) would facilitate the transfer of power from the East Anglia region to the rest of the National Electricity Transmission System (NETS) thereby enabling connection of offshore wind generation, nuclear power generation and interconnectors which are expected into East Anglia by 2035.
- 1.1.2 Current draft proposals for the Project, referred to as the 2024 draft alignment, which are the subject of the 2024 statutory consultation, comprise:
- A new 400 kV electricity transmission connection of approximately 184 km overall length from Norwich Main Substation to Tilbury Substation via Bramford Substation comprising:
    - Approximately 159 km of new overhead line supported on approximately 510 steel lattice pylons (approximately 50 m in height) some of which are gantries (typically up to 15m in height) within proposed Cable Sealing End (CSE) compounds, or existing or proposed substations
    - Approximately 25 km of 400 kV underground cabling (some of which is located through the Dedham Vale National Landscape (an AONB))
  - Six new CSE compounds (each with a permanent access) to connect the overhead lines to the underground cables
  - A new 400 kV East Anglia Connection Node (EACN) Substation, with a new permanent access, on the Tendring Peninsula. This is proposed to be an Air Insulated Switchgear (AIS) substation
  - Substation extension works at the existing Norwich Main, and Bramford Substations and works within the existing Tilbury Substation to connect and support operation of the new transmission connection
  - Temporary works associated with construction of the Project
- 1.1.3 An alternative design at the Waveney Valley (referred to as the Waveney Valley Alternative) is also being considered and is the subject of consultation and ongoing assessment. This design alternative, if taken forward, would result in changes to those elements of the Project set out below. This would instead comprise:
- Installation of approximately 157 km of new 400 kV overhead line
  - Installation of approximately 27 km of 400kV underground cabling (some of which is located through the Dedham Vale National Landscape (an AONB))
  - Eight new CSE compounds (each with a permanent access) to connect the overhead lines to the underground cables
- 1.1.4 All other works, other than those listed above would be consistent with either alternative.
- 1.1.5 The Waveney Valley Alternative, if taken forward and based on the 2024 preferred draft alignment would comprise approximately 2 km less new 400 kV overhead line and

approximately an additional 2 km of 400kV underground cabling and 2 additional new CSE compounds (each with a permanent access) to connect the overhead lines to the underground cables.

- 1.1.6 In addition, third party utilities diversions and / or modifications would also be required to facilitate the construction of the Project. There would also be land required for mitigation, compensation and enhancement of the environment including Biodiversity Net Gain (BNG).
- 1.1.7 The Project in its current form is a Nationally Significant Infrastructure Project (NSIP) for which National Grid intends to apply for the granting of an order for development consent to the Secretary of State.
- 1.1.8 The Project also constitutes Environmental Impact Assessment (EIA) development as defined in the Infrastructure Planning EIA Regulations 2017 (the 'EIA Regulations').

## 1.2 Purpose of this Document

- 1.2.1 This FRA Screening Report has been produced to support the PEIR and is provided as Appendix 12.2. A FRA will be produced to support the DCO application and will support the assessment presented in the Environmental Statement (ES).
- 1.2.2 This screening assessment states the sources of flood risk that are screened in to and out of the FRA and provides evidence and justification for the sources that have been screened out.
- 1.2.3 Screening has been undertaken with a view to ensuring the FRA is proportionate. This approach will deliver a site-specific FRA that is more concise and focused on assessing key sources of flood risk. Consideration has been given to both risks to the Project during construction and over its operational lifetime, and the potential for the Project to increase flood risk from any of these sources, in accordance with the requirements set out in relevant national policy.

## 1.3 Consultation

- 1.3.1 This document has been produced to response to feedback received following a thematic meeting with the relevant flood risk management authorities (the Environment Agency and the Lead Local Flood Authorities (LLFAs) (Norfolk County Council, Suffolk County Council, Essex County Council and Thurrock Council).
- 1.3.2 An FRA Scoping Technical Note (Annex 1) was produced following the thematic meeting to set out the approach to preparing the FRA for the Project. Feedback was received from the Environment Agency and LLFAs on the Technical Note and this FRA Screening document addresses feedback received.
- 1.3.3 Feedback was also received from the Environment Agency as part of the 2023 non-statutory consultation. Their comments with respect to flood risk are summarised in Table 1.1.

**Table 1.1 – Summary of Environment Agency Feedback to the 2023 non-statutory Consultation**

<b>Environment Agency Comment</b>	<b>Project Response</b>
Most of the towers have been sequentially sited to lie in Flood Zone 1, however we note that some towers are located within Flood Zone 3, including adjacent to the River Gipping, River Waveney, Roxwell Brook, and River Wid. Justification should be provided as to why the substations [typo: towers] cannot be relocated into Flood Zone 1.	The Project is currently going through a design change control process following consideration of all consultation feedback received. As part of this, design modifications are being considered including those which relocate pylons (towers) located within Flood Zone 3 to Flood Zone 1. Justification for any pylons which remain in Flood Zone 3 following this process will be provided in the FRA.
If they are to remain in Flood Zone 3 then level for level compensatory flood storage should be provided for the volume of storage taken up by each tower, to the height of the 1% annual exceedance probability (AEP) with climate change flood event, to ensure the towers do not increase flood risk elsewhere, as required by the Exception Test in paragraph 5.7.16 of EN1.	Flood data has been requested from the Environment Agency to obtain information on flood levels. Further information and assessment, where required, will be included in the FRA.
The towers should also be designed to remain operational in a flood as required in paragraph 5.7.24 of EN1.	Noted. This will be covered in the FRA.
The substations are also mostly located within Flood Zone 1. However, the substation at Tilbury is in Flood Zone 3 and its location appears to overlay many ordinary watercourses. The impacts on the ordinary watercourses should be assessed in the FRA and permits for the works should be obtained from the LLFA. The flood zones in this location are defended tidal flood zones so an assessment of the impacts of the removal of flood storage on the breach flood risk within the area should be undertaken, and flood compensation provided if the impacts are not insignificant. The FRA should also detail how the substation would remain resilient and operational in a flood resulting from a breach of the flood defences, as required in paragraph 5.7.24 of EN1.	<p>Works are proposed within the existing substation site at Tilbury to accommodate the Project. Effects on ordinary watercourses will be addressed in the FRA.</p> <p>It is envisaged that permits and consents will be applied for post-grant of the DCO (or where appropriate ‘wrapped up’ within the DCO subject to further engagement), as part of detailed construction planning once a contractor has been engaged.</p> <p>The flood data requested from the Environment Agency includes data in the vicinity of Tilbury Substation. This data will be used to inform a full assessment of flood risk to and arising from the substation works.</p>
An environmental permit for flood risk activities will be required for work in, under, over or within 8 metres (m) from a fluvial main river and from any flood defence structure or culvert or 16 m from a tidal main river and from any flood defence structure or culvert. This	It is envisaged that permits and consents will be applied for post-grant of the DCO (or where appropriate ‘wrapped up’ within the DCO subject to further engagement), as part of detailed construction planning once a contractor has been engaged.

Environment Agency Comment	Project Response
includes works in, under and within 8 m of the Tilbury Flood Storage Area.	

## 1.4 Structure of this Report

1.4.1 The structure of this report is summarised in Table 1.2.

Table 1.2 - Structure of this Report

Chapter	Content
1: Introduction	Background information and a summary of engagement with relevant consultees and stakeholders.
2: Regulatory and Planning Policy Context	Summarises relevant local and national flood risk and drainage policies.
3: Potential Sources of Flooding	Summarises the main sources of flood risk to the Project during construction and operation. States the sources that have been screened in and out of the FRA, with justification.
4: Summary and Conclusions	Summarises the FRA Screening and states the conclusions.

# 2. Regulatory and Planning Policy Context

## 2. Regulatory and Planning Policy Context

### 2.1 Introduction

2.1.1 The following legislation and policy will be considered when producing the FRA:

- The Flood and Water (Amendment etc.) (EU Exit) Regulations 2017
- Overarching National Policy Statement (NPS) for Energy (EN-1) (Department for Business, Energy, and Industrial Strategy (DESNZ), 2024a)
- NPS for Electricity Networks Infrastructure (EN-5) (DESNZ, 2024b)
- National Planning Policy Framework (NPPF) (Ministry of Housing, Communities and Local Government, 2023)
- Flood Risk and Coastal Change National Planning Policy Guidance (PPG) (MHCLG, 2022)
- Flood Risk Assessments: Climate Change Allowances (Environment Agency, 2022a)

2.1.2 Key local strategies relevant to the FRA include:

- Essex Flood Risk Management Strategy (Essex County Council, 2018)
- Suffolk Flood Risk Management Strategy (Suffolk County Council, 2016)
- Norfolk Flood Risk Management Strategy (Norfolk County Council, 2015 and 2021 review)

2.1.3 These set out policies to reduce the impact of flooding to local communities within the counties and outline the requirements of new development in terms of managing surface water runoff and drainage.

2.1.4 The below guidance will also be considered when producing the FRA:

- The Sustainable Drainage Systems (SuDS) Design Guide for Essex (Essex County Council, 2020)
- Essex Green Infrastructure Strategy (Essex County Council, 2020)
- Essex Green Infrastructure Standards (Essex County Council, 2022)

### 2.2 National Policy Statements

2.2.1 NPS EN-1 is the key overarching policy relevant to the Project. This is supported by NPS EN-5.

2.2.2 Paragraph 5.8.13 of EN-1 states '*A site-specific flood risk assessment should be provided for all energy projects in Flood Zones 2 and 3 in England...In Flood Zone 1 in England..., an assessment should accompany all proposals involving:*

- *Sites of 1 hectare or more*
- *Land which has been identified by the Environment Agency or Natural Resources Wales (NRW) as having critical drainage problems*

- *Land identified (for example in a local authority strategic flood risk assessment) as being at increased flood risk in future*
- *Land that may be subject to other sources of flooding (for example surface water)*
- *Where the EA or NRW, Lead Local Flood Authority, Internal Drainage Board or other body have indicated that there may be drainage problems.'*

- 2.2.3 Paragraph 5.8.14 states that FRAs *'should identify and assess the risks of all forms of flooding to and from the project and demonstrate how these flood risks will be managed, taking climate change into account.'*
- 2.2.4 The minimum requirements for FRAs are set out in Paragraph 5.8.15 and include that an FRA should *'be proportionate to the risk and appropriate to the scale, nature and location of the project and consider the risk of flooding arising from the project in addition to the risk of flooding to the project'*.
- 2.2.5 NPS EN-5 covers resilience to climate change and the need to look to design for flood resilience. Paragraph 2.3.2 of EN-5 states *'Applicants should in particular set out to what extent the proposed development is expected to be vulnerable, and, as appropriate, how it would be resilient to:... flooding, particularly for substations that are vital for the electricity transmission and distribution network'*.
- 2.2.6 Paragraph 2.3.3 of EN-5 advises that *'the resilience of the project to the effects of climate change must be assessed in the Environmental Statement (ES) accompanying an application', also stating that 'future increased risk of flooding would be covered in any flood risk assessment'*.

# 3. Potential Sources of Flooding

## 3. Potential Sources of Flooding

### 3.1 Overview

- 3.1.1 An overview of the sources of flooding that have been reviewed and their brief description can be found in Table 3.1.

Table 3.1 - Sources of Flooding

Source of Flooding	Description
Flooding from rivers (fluvial)	Floodwater originating from a nearby watercourse when the amount of water exceeds the channel capacity of that watercourse.
Flooding from the sea (tidal)	Flooding originating from the sea or a connected waterbody when seawater overflows onto land through extreme tidal conditions, storm surge or breach.
Flooding from surface water (pluvial)	Flooding caused by intense rainfall exceeding the available infiltration and/or drainage capacity of the ground.
Flooding from groundwater	Flooding caused when groundwater levels rise above ground level following prolonged rainfall.
Flooding from sewers and water mains	Flooding originating from surface water, foul or combined drainage systems, typically caused by limited capacity or blockages.
Flooding from reservoirs, canals, and other artificial sources	Failure of infrastructure that retains or transmits water or controls its flow.

- 3.1.2 As stated in the Scoping Opinion (Planning Inspectorate, 2022), the Planning Inspectorate agreed that the Project would be of low vulnerability to flooding from sewers and reservoirs and that this matter can be scoped out of the ES. Nevertheless, taking on board feedback from the LLFAs, a high-level screening of all sources of flood risk has been undertaken.

### 3.2 Data Collection

- 3.2.1 This FRA Screening has been informed by a desk study which has drawn on the following key information sources:
- Ordnance Survey mapping, aerial mapping, and Magic Maps (DEFRA, 2023a)
  - Statutory Main River map for England (Environment Agency, 2023a)
  - Catchment data explorer database (Environment Agency, 2023b)
  - Flood Map for Planning (Environment Agency, 2023c)
  - Long term flood risk map for England (Environment Agency, 2023d)
  - Spatial flood defences database (Environment Agency, 2023e)

- The Historic Flood Map and Recorded Flood Outlines datasets (Environment Agency, 2022b)
- Strategic Flood Risk Assessments (SFRAs) produced by relevant Local Planning Authorities
- British Geological Survey (BGS, 2023) Geology of Britain Viewer

### 3.3 Flood History

#### Flooding from Rivers and the Sea

- 3.3.1 The Environment Agency Historic Flood Map and Recorded Flood Outlines datasets show no areas within Sections A, B, D, G (as presented on Figure 1: Site Location Plan and Project Sections in Annex 2) of the Project that have previously been flooded.
- 3.3.2 There is one Recorded Flood Outline in Section C, associated with a fluvial flood event on the River Stour in 1968 and one in Section E associated with a fluvial flood event on the River Blackwater in 1947. There are two Recorded Flood Outlines in Section F, associated with fluvial flood events on the River Chelmer in 1947 and 2001. There are three Recorded Flood Outlines in Section H, all associated with a tidal flood event on the River Thames in 1953.
- 3.3.3 A review of the information on historical flooding presented in the SFRAs has been undertaken and no further events have been identified that affected land within the draft Order Limits.

#### Flooding from Surface Water

- 3.3.4 Publicly available information on past surface water flood events in the vicinity of the Project is higher level than the information available for flooding from rivers and the sea. Several surface water events are reported in the SFRAs, with some of these being described as significant events. However, information on areas effected in these events is lacking or presented at a broad geographic scale.
- 3.3.5 Mapping of past surface water flood events has been requested from the LLFAs. Once provided, a review will be undertaken to determine if any of the events affected land within the draft Order Limits of the Project.

#### Flooding from Groundwater

- 3.3.6 Very few historical flood events attributed to groundwater are reported in the datasets reviewed and none of those reported are understood to have affected land within the draft Order Limits.

### 3.4 Flooding from Rivers and the Sea

#### Overview

- 3.4.1 The Project is located within the catchments of multiple main rivers and their tributaries. Most of these watercourses are not tidally influenced within the study area and coupled with the distance from the coast, most of the Project is not at risk of flooding from the sea.

- 3.4.2 A small number of the watercourses in the study area are tidally influenced, including the River Thames.

## Flood Mapping

- 3.4.3 According to the Environment Agency Flood Map for Planning, most of the Project is in Flood Zone 1 (low risk), land with an annual chance of flooding from rivers and the sea of less than 1 in 1,000 (0.1%).
- 3.4.4 However, there are numerous locations where the Project would cross areas of Flood Zone 3 (high risk) and Flood Zone 2 (medium risk). Figure 2: Flood Risk Areas, in Annex 2, shows the extents of Flood Zones 2 and 3 within the study area.
- 3.4.5 Table 3.2 provides a summary of the Projects' interactions with Flood Zone 3, based on the current design, which is subject to further refinement, along with the corresponding watercourse the flood extent is associated with. The Flood Zone 3 extents are illustrated in Figure 2: Flood Risk Areas in Annex 2.

Table 3.2 - Summary of Project Interactions with Flood Zone 3

Project Section	Watercourse	Construction/Operational Risk
A – South Norfolk	River Tas and tributaries	Haul roads (temporary), pulling location <sup>1</sup> , pylon construction work areas, construction drainage infrastructure
	Frenze Beck and tributary	Haul roads (temporary)
A – South Norfolk B – Mid Suffolk	Waveney Valley Overhead Line (River Waveney)	Haul roads (temporary), pylons, pulling locations, pylon construction work areas, construction drainage infrastructure
A – South Norfolk B – Mid Suffolk	Waveney Valley Alternative (River Waveney)	Cable section, construction drainage infrastructure, trenchless crossing work areas, haul roads (temporary)
B – Mid Suffolk	River Dove tributaries	Haul roads (temporary), pulling locations, overhead line crossing protection work areas, construction drainage infrastructure
	River Gipping and (unnamed) tributaries	Haul roads (temporary), pylon construction work areas, construction drainage infrastructure
	Wattisham Watercourse	Haul roads (temporary), construction drainage infrastructure

<sup>1</sup> Pulling locations are temporary sites that would be established around tension/angle towers, to pull/string the OHLs through the pylons.

Project Section	Watercourse	Construction/Operational Risk
	Somersham Watercourse	Haul roads (temporary), pylon construction work area
C – Babergh, Colchester and Tendring	Belstead Brook	Haul roads (temporary), construction drainage infrastructure
	Spring Brook	Haul roads (temporary), construction drainage infrastructure
	Stutton Brook	Permanent access road
	River Stour	Cable section, construction drainage infrastructure, trenchless crossing work areas, haul roads (temporary)
	Black Brook	Cable section, construction drainage infrastructure, haul road (temporary)
D – Colchester	Hillhouse Wood Brook	Haul road (temporary)
	River Colne	Haul roads (temporary), pulling location, construction drainage infrastructure
	Roman River	Permanent access road, haul roads (temporary)
E – Braintree	River Blackwater and tributary	Haul roads (temporary), pylon construction work area, pulling location, construction drainage infrastructure
	River Brain	Haul roads (temporary), construction drainage infrastructure
F – Chelmsford	River Ter and tributary	Haul roads (temporary), construction drainage infrastructure
	River Chelmer	Pylon construction work area, pulling location
	Chignall Brook	Haul road (temporary), pylon construction work area, construction drainage infrastructure
	River Can and tributaries	Haul roads (temporary), pylon construction work areas, pulling location, overhead line crossing protection work areas, construction drainage infrastructure
	River Wid tributary	Haul roads (temporary), pulling location, overhead line crossing protection work areas, construction drainage infrastructure
G – Brentwood/ Basildon	River Wid and tributaries	Haul roads (temporary), pulling location, pylon construction work area, construction drainage infrastructure

Project Section	Watercourse	Construction/Operational Risk
H – Thurrock	Thames Estuary / West Tilbury Marshes	Construction – underground cable and substation compounds, haul roads (temporary), trenchless crossing work areas, construction drainage infrastructure Operation (and maintenance) – Tilbury Substation, permanent access road

3.4.6 As indicated in Table 3.2, most of the Project interactions with Flood Zone 3 are temporary (i.e., during construction). During operation (and maintenance), interactions with Flood Zone 3 are limited to a small number of pylons and access roads and works with the existing footprint of Tilbury Substation.

3.4.7 The FRA will present further assessment of floodplain interactions, based on the design presented in the DCO application, informed by detailed flood model data provided by the Environment Agency.

## Flood Defences

3.4.8 According to the Environment Agency Asset Information and Maintenance (AIMS) database (Environment Agency, 2023e), there are flood defences within all sections of the Project. The watercourses these defences are associated with are:

- Section A: Frenze Beck and River Waveney (natural high ground)
- Section B: The Channel and the Belstead Brook (natural high ground), River Gipping (engineered high ground)
- Section C: Stutton Brook, River Stour, River Brett, and Salary Brook (natural high ground)
- Section D: St Botolph's Brook, the River Colne, Hillhouse Wood Brook, the Roman River, and its tributaries (natural high ground)
- Section E: River Blackwater, one of its tributaries and the River Brain (natural high ground)
- Section F: River Ter, Straw Brook, River Chelmer, Chignall Brook, River Can, Roxwell Brook and River Wid tributary (natural high ground)
- Section G: River Wid, its tributary, Stock Brook, Haverings Grove Brook, the River Crouch, and tributaries of the Mardyke (natural high ground)
- Section H: Mardyke tributaries, the Tilbury Main Sewer and its tributary (natural high ground), River Thames (Tilbury Power Station concrete wall defence)

3.4.9 The Environment Agency 'reduction in risk of flooding from rivers and sea due to defences' dataset (Environment Agency, 2023f) shows areas that have reduced flood risk from rivers and sea due to the presence of flood defences. These areas are limited in the vicinity of the Project, with the most extensive area being at the southern end of the Project between West Tilbury and the River Thames.

- 3.4.10 The FRA will outline proposed mitigation measures/commitments to ensure no detrimental effects on flood risk from rivers and the sea or the functioning of flood defences. It is envisaged that Flood Risk Activity Permits (FRAPs) for works affecting main rivers and Land Drainage Consents for works affecting ordinary watercourses will be applied for post-grant of the DCO, or alternatively protection provisions would be agreed with the relevant authorities to undertake such works within the powers of the Order.

## Third Party Infrastructure Works

- 3.4.11 There are numerous locations where proposed mitigation works (e.g., undergrounding of existing third-party infrastructure assets) are required as part of the Project, as shown on Figure 3: Proposed Project Design in Annex 2. There are several locations where works are required to third-party assets such as telecommunications, overhead lines and gas and oil pipelines. At some of these locations there would be interactions with land designated as Flood Zone 3 (land with an annual chance of flooding from rivers greater than 1 in 100 (1%); or greater than 1 in 200 (0.5%) from the sea). These locations are listed below by watercourse.

- River Tas and tributaries
  - UKPN 11 kV overhead line
- River Waveney
  - UKPN 11 kV overhead line
  - UKPN 33 kV overhead line
- River Gipping and tributaries
  - UKPN 11 kV overhead line
  - UKPN 33 kV overhead line
  - UKPN cable
- Somersham Watercourse
  - UKPN cable
- Stutton Brook
  - Cadent gas pipeline
- Ardleigh Reservoir
  - UKPN 11 kV overhead line
  - Cadent gas pipeline
- River Colne and tributary
  - UKPN 11 kV overhead line
  - Cadent gas pipeline
  - Water pipelines
- Roman River

- Cadent gas pipeline
- River Blackwater tributary
  - UKPN 11 kV overhead
  - Water pipeline
- River Ter
  - UKPN 11 kV overhead line
- River Chelmer
  - Water pipelines
- River Can
  - National Gas Transmission gas pipeline
- Roxwell Brook
  - National Gas Transmission gas pipeline
- River Wid and tributaries
  - Cadent and National Gas Transmission gas pipelines
  - UKPN 11 kV overhead line
  - UKPN 33 kV overhead line
  - BT overhead line
  - Water pipeline

- 3.4.12 Due to the nature of the third-party infrastructure works no operational effects on flood risk from rivers or the sea are anticipated, and further assessment is therefore screened out.
- 3.4.13 It is considered that any potential temporary effects on flood risk during construction of the works would be manageable through good practice measures, further detail of which will be provided in the FRA.
- 3.4.14 In conclusion the risk of flooding from rivers and the sea to and arising from the Project is **screened in** during construction and operation (and maintenance), and further assessment of the temporary effects on flood risk from third party infrastructure works will also be included in the FRA.

## 3.5 Flooding from Surface Water

### Flood Mapping

- 3.5.1 The Environment Agency Risk of Flooding from Surface Water Map (Environment Agency, 2023d) is informed by 'direct rainfall' modelling undertaken at a high (2 m) spatial resolution. It illustrates the areas at elevated risk of surface water flooding, in low spots down-gradient of sloping ground or in topographic valleys associated with current or former watercourses.

- 3.5.2 The mapping categorises land at high, medium, low, and very low risk of flooding. Land at a high risk of surface water flooding is defined as having an annual chance of flooding of greater than 1 in 30 (3.3%). A medium risk of flooding equates to an annual chance of flooding of between 1 in 30 (3.3%) and 1 in 100 (1%). A low risk of flooding is categorised as an annual chance of flooding of between 1 in 100 (1%) and 1 in 1,000 (0.1%) and land at a very low risk of flooding has an annual chance of flooding of less than 1 in 1,000 (0.1%).
- 3.5.3 The map shows surface water flood risk is variable along the Project alignment. Most of the land within the draft Order Limits is shown to be at 'very low' risk of surface water flooding but there are multiple areas shown to be at higher risk. Figure 2: Flood Risk Areas, in Annex 2, illustrates the areas at high risk of surface water flooding.
- 3.5.4 Table 3.3 provides a summary of the Project interactions with areas at high risk of surface water flooding.

**Table 3.3 - Summary of Project Interactions with Areas at High Risk of Surface Water Flooding**

<b>Section</b>	<b>Location Reference</b>	<b>Construction/Operational Risk</b>
A – South Norfolk	Norwich Main Substation	Haul road (temporary)
	RG003, RG007, RG014, RG018, RG20	Pulling areas, haul roads (temporary)
	Near pylon RG023	Haul road (temporary)
	Between pylon RG028 and 029	Haul road (temporary) and site access point <sup>2</sup>
	RG30 to RG033	Haul road (temporary)
	RG042	Haul road (temporary), pulling area
	RG049	Haul road (temporary), construction works area, construction drainage infrastructure
	RG062 and RG065	Haul road (temporary)
	Between pylon RG070 and RG071	Haul roads (temporary)
	Between pylon RG073 and RG074	Haul roads (temporary)
	RG078	Haul roads (temporary)

<sup>2</sup> The location on a Primary Access Route where construction vehicles will transition between the local road network and haul roads.

Section	Location Reference	Construction/Operational Risk
B – Mid Suffolk	RG089 and RG90	Pylon construction works areas, pulling area and haul roads (temporary), construction drainage infrastructure
	Waveney Valley Alternative	Cable section, construction drainage infrastructure, trenchless crossing work areas, haul roads (temporary)
	Between pylon RG096 and RG097	Haul road (temporary)
	RG101	Haul road (temporary)
	RG102	Pulling location
	Between pylon RG116 and RG117	Haul road (temporary), construction drainage infrastructure
	RG122 to RG124	Haul road (temporary) and site access point, pulling area
	RG134 to RG135	Haul road (temporary), pylon construction work area
	RG141	Pulling area
	RG142 to RG145	Haul road (temporary), construction drainage infrastructure
	RG146 and RG148	Pulling area
	Between pylon RG155 and RG156	Haul road (temporary)
	RG157	Pulling area
	RG162 to RG166	Haul road (temporary), construction drainage infrastructure
	Between pylon RG168 and RG171	Haul road (temporary)
	RG173	Pulling area
	RG177, RG185 and RG189	Haul road (temporary)
C – Babergh, Colchester and Tendring	JC015	Pulling area, haul road (temporary)
	JC018	Haul road (temporary), construction drainage infrastructure, permanent access road
D – Colchester	JC021	Pylon construction work area
	JC024	Pulling area and construction drainage infrastructure

Section	Location Reference	Construction/Operational Risk
	Between pylon JC030 and the CSE compound	Haul road (temporary), permanent access road
	CSE compound	CSE construction compound, haul road (temporary),
	Cable section	Haul roads (temporary), construction drainage infrastructure
	CSE compound/TB001	CSE construction compound
	TB033	Permanent access road, haul road (temporary)
	TB041	Haul road (temporary)
	TB044 and TB049	Pulling location
	Between pylon TB060 and TB061	Haul road (temporary)
E – Braintree	Between pylon TB077 and TB078	Haul road (temporary), construction drainage infrastructure
	Between pylon TB082 and TB083	Permanent access road, haul road (temporary)
	TB091	Permanent access road, haul road (temporary)
	TB100	Haul road (temporary)
	TB101	Pulling area
	TB104	Permanent access road
	TB108	Pulling location, pylon construction working area
	TB113	Pulling area, construction drainage infrastructure
F – Chelmsford	TB117 to TB121	Haul road (temporary), pylon construction working areas
	TB122	Haul road (temporary)
	Between TB125 and TB126	Haul road (temporary), construction drainage infrastructure
	TB133, TB142 and TB144	Pulling location
	TB148	Permanent access road, pulling location, haul road (temporary)
	TB150 to TB152	Haul road (temporary)
	TB155 and TB156	Pulling location, haul road (temporary)

Section	Location Reference	Construction/Operational Risk
	TB157	Construction drainage infrastructure
	TB160	Pulling area, pylon construction working area, haul road (temporary)
	TB162	Pulling location
	TB168	Pulling location, haul road (temporary)
	TB172 to TB174	Pulling location, haul road (temporary), construction drainage infrastructure
	TB179	Pulling location, construction drainage infrastructure, haul road (temporary)
	TB181	Pulling location, haul road (temporary)
	TB184	Pylon construction working area, haul road (temporary), construction drainage infrastructure
G – Brentwood/ Basildon	TB186 to TB190	Pylon construction working area, haul road (temporary), construction drainage infrastructure, permanent access road
	TB193	Pylon construction working area, haul road (temporary), construction drainage infrastructure
	Between pylon TB194 and TB195	Haul road (temporary)
	Between pylon TB197 and TB201	Pylon construction working area, pulling area, construction drainage infrastructure, haul roads (temporary)
	TB203	Pylon construction working area
	TB207 and TB209	Pulling location, haul road (temporary)
	TB216	Pulling location
	TB217	Pylon construction working area
	TB222	Permanent access road
	TB228 to TB229	Pulling locations, pylon construction working areas
H – Thurrock	TB229 and TB230	Pulling location, haul road (temporary), permanent access road
	TB232	Haul roads (temporary), construction drainage infrastructure
	Between pylon TB253 and TB257	Pylon construction working area, pulling areas, haul roads (temporary)

Section	Location Reference	Construction/Operational Risk
	TB258 to TB263	Pulling location, haul road (temporary), CSE construction compound, permanent access road
	Cable section	Construction drainage infrastructure
	Tilbury Substation	Construction – Tilbury Substation construction compound Operation (and maintenance) – Tilbury Substation

- 3.5.5 As indicated in Table 3.3, except for Tilbury Substation, where works are proposed within the existing footprint of the site, the Projects interactions with areas at high risk of surface water flooding are temporary (i.e., during construction).
- 3.5.6 The FRA will present further assessment of interactions with the high risk surface water flood zone, based on the design presented in the DCO application. The FRA will also assess the potential for the Project to increase baseline surface water flood risk and will recommend and secure suitable management and mitigation measures.
- 3.5.7 Key principles and initial proposals will be described within a preliminary surface water drainage strategy which will be produced to support the ES.

## Third Party Infrastructure Works

- 3.5.8 In some of the locations where third-party infrastructure works are required there would potentially be interactions with land shown to be at high risk of surface water flooding. These locations are listed below.
- Section A
    - 11 kV overhead line
    - 33 kV overhead line
    - BT overhead line
  - Section B
    - 11 kV overhead line
    - 33 kV overhead line
    - 132 kV overhead line
    - BT overhead line
  - Section C
    - 11 kV overhead line
    - 132 kV overhead line
  - Section D
    - 11 kV overhead line
  - Section E

- 11 kV overhead line
- 33 kV overhead line
- 132 kV overhead line
- BT overhead line
- Section F
  - 11 kV overhead line
  - BT overhead line
- Section G
  - 11 kV overhead line
  - 33 kV overhead line
  - 132 kV overhead line
  - BT overhead line
- Section H
  - 11 kV overhead line
  - 132 kV overhead line
  - BT overhead line

- 3.5.9 Due to the nature of the third-party infrastructure works no operational effects on surface water flood risk are anticipated, and further assessment is therefore screened out.
- 3.5.10 It is considered that any potential temporary effects on surface water flood risk during construction of the works would be manageable through good practice measures, further detail of which will be provided in the FRA.
- 3.5.11 In conclusion the risk of flooding from surface water to and arising from the Project is **screened in** during construction and operation (and maintenance), and further assessment of the temporary effects on flood risk from third party infrastructure works will also be included in the FRA.

## 3.6 Flooding from Groundwater

- 3.6.1 Groundwater flooding occurs when groundwater rises to the ground surface. There are generally two forms of groundwater flooding (i) 'clearwater flooding' associated with the water table rising to the surface in areas of permeable bedrock geology such as chalk; and (ii) 'river-groundwater interaction' where river levels interact with permeable superficial deposits within river valleys, flooding areas far from the river without necessarily overtopping raised riverbanks.
- 3.6.2 Figure 4: Superficial Geology, in Annex 2, shows the superficial geology of the study area whilst Figure 5: Bedrock Geology, in Annex 2, illustrates the bedrock geology. This information from the British Geological Society (BGS, 2023), is summarised by Project section in Table 3.4 below. A full description of the geology of the study area will be included in Chapter 9: Contaminated Land, Geology and Hydrogeology in Volume I of the PEIR.

- 3.6.3 Key bedrock aquifer designations (Defra, 2023) with respect to groundwater flood risk are indicated in brackets and italics in Table 3.4. Principal aquifers are found where the geology exhibits high permeability and these aquifers provide a high level of water storage, capable of supporting water supply on a strategic scale. Secondary A aquifers are defined as having permeable layers capable of supporting water supplies at a local scale.

Table 3.4 – Summary of Geological Conditions

Section	Bedrock Geology	Superficial Deposits
A – South Norfolk	Undifferentiated deposits of the Lewes Nodular Chalk Formation, the Newhaven Chalk Formation, the Culver Chalk Formation, and the Portsdown Chalk Formation, together referred to as the White Chalk Subgroup ( <i>Principal aquifer</i> )	Present beneath the whole of the study area in the South Norfolk section and predominantly comprise the Lowestoft Formation
B – Mid Suffolk	White Chalk Subgroup, Crag Group, Newhaven Chalk Formation, Red Crag Formation, Chillesford Church Sand Member ( <i>Principal aquifers</i> ). Undifferentiated deposits of Thanet Formation & Lambeth Group ( <i>Secondary A aquifers</i> ) Thames Group (comprising the London Clay Formation and the Harwich Formation)	Present beneath the whole of the study area in the Mid Suffolk section and predominantly comprise the Lowestoft Formation
C – Babergh, Colchester and Tendring	Large proportion of this section is underlain by bedrock geology of the Thames Group. Other bedrock strata present are Red Crag Formation ( <i>Principal aquifer</i> ) and undifferentiated deposits of the Thanet Formation and the Lambeth Group ( <i>Secondary A aquifer</i> )	Present beneath most of the study area but highly variable, mostly associated with river valleys
D – Colchester	Large proportion of this section is underlain by bedrock geology of the London Clay Formation ( <i>non-aquifer</i> ). The exception to this is very small outcrops of the Crag Group ( <i>Principal aquifer</i> ) located to the north of Marks Tey	Present beneath most of the study area but highly variable, mostly associated with river valleys
E – Braintree	London Clay Formation ( <i>non-aquifer</i> )	Present beneath the whole of the study area in the Braintree section and includes Lowestoft Formation, Kesgrave Catchment Subgroup and head, alluvium and glaciofluvial deposits.

Section	Bedrock Geology	Superficial Deposits
F – Chelmsford	Majority of this section is underlain by bedrock geology of the London Clay Formation ( <i>non-aquifer</i> ). Other bedrock strata present include Bagshot Formation and Claygate Member ( <i>both Secondary A aquifers</i> )	Present beneath the whole of the study area in the northern part of the Chelmsford section, limited areas within the southern part where superficial deposits are indicated to be absent
G – Brentwood/Basildon	Majority of this section is directly underlain by bedrock geology of the London Clay Formation ( <i>non-aquifer</i> ). However, in some areas the London Clay is overlain by Claygate Member and Bagshot Formation ( <i>both Secondary A aquifers</i> )	Present beneath approximately half of the study area in this section, coverage decreases moving southwards.
H – Thurrock	Northern half of this section is underlain by bedrock geology of the London Clay Formation ( <i>non-aquifer</i> ). The bedrock geology then transitions through the following strata: Harwich Formation, Lambeth Group, Thanet Formation ( <i>all three Secondary A aquifers</i> ) and White Chalk Subgroup ( <i>Principal aquifer</i> )	Present beneath most of the study area, predominately comprises Head Deposits.

- 3.6.4 Groundwater flood risk varies throughout the study area. In some parts of the study area (for example, in most of Mid Suffolk) this risk is negligible according to the SFRAs. Whereas in other parts of the study area (for example in south-east Babergh) there is a risk of groundwater flooding associated with certain geologies and ground conditions, such as locations where chalk bedrock is not overlain by impermeable superficial drifts.
- 3.6.5 The assessment regarding flooding from groundwater in the FRA will be undertaken using information from desk-based sources. It will be informed by subsequent assessment work to be carried out in relation to geology and hydrogeology which will be reported in the ES.
- 3.6.6 In conclusion the risk of flooding from groundwater to and arising from the Project is **screened in** during construction and operation (and maintenance).

## 3.7 Flooding from Sewers and Water Mains

- 3.7.1 Flooding from sewers and water mains can result from lack of capacity, blockages within the network or failure of infrastructure such as pumps. Any area that benefits from sewerage and water mains infrastructure has a potential risk of flooding, but the likelihood and consequences are increased by topographic constraints such as low spots or flow paths that could influence the behaviour of floodwater originating from these networks.
- 3.7.2 Most of the land within the draft Order Limits is rural and in agricultural use, and therefore is not expected to be served by major sewer or water mains infrastructure.

Hence the risk of flooding from these sources to most of the land within the draft Order Limits is low.

- 3.7.3 For areas within the draft Order Limits which are more developed, a review of the Risk of Flooding from Surface Water map has been undertaken to aid in identifying any significant low spots or flow paths that water emanating from sewer/water main networks would travel along. As described in Section 3.5, there is very limited operational project infrastructure in areas at high risk of surface water flooding and no significant low spots or flow paths have been identified which would direct water towards Project infrastructure in the event of a water mains or sewer burst/breach.
- 3.7.4 A review of the SFRAs did not highlight any parts of the draft Order Limits to be at elevated risk of flooding from sewers and water mains.
- 3.7.5 The Project is not anticipated to impact on or increase baseline flood risk from these sources. This is because, due to the nature of the Project, foul water generation and potable water supply need during operation (and maintenance) would be negligible, and SuDS measures will be included in the design to manage site drainage. The Project would not add to the loading / demand on sewer and water supply systems. During construction, foul water would be suitably managed in accordance with the Construction Environmental Management Plan and potable water supply need would also be relatively minor.
- 3.7.6 In conclusion the risk of flooding from sewers and water mains to and arising from the Project is **screened out** during construction and operation (and maintenance).

## 3.8 Flooding from Reservoirs, Canals, and other Artificial Sources

- 3.8.1 The Environment Agency Risk of Flooding from Reservoirs Map (Environment Agency, 2023d) illustrates the potential flood extent if large, embanked reservoirs were to fail and release the water that they hold. The flood map shows two flooding scenarios: 'dry day' and 'wet day'. The 'dry day' scenario predicts the flooding that would occur if the dam or reservoir failed when rivers are at normal levels. The 'wet day' scenario predicts how much worse the flooding might be if a river is already experiencing an extreme natural flood.
- 3.8.2 The assessment of flooding from reservoirs is focussed on the operational (and maintenance) phase of the Project as the likelihood of reservoir failure during the four years of construction (2027 – 2031) is remote. The flood map shows that the following areas of the draft Order Limits are within the reservoir flood envelope:
- Section B – Mid Suffolk: two pylons (wet day), permanent access road (wet day)
  - Section C – Babergh, Colchester and Tendring: permanent access road (dry day and wet day)
  - Section F – Chelmsford: two pylons (wet day), permanent access road (wet day)
  - Section G – Brentwood/Basildon: three pylons (one wet day, two dry day), permanent access roads (dry day and wet day)
- 3.8.3 Areas at residual risk of flooding from reservoirs are therefore very limited within the draft Order Limits.

- 3.8.4 The reservoir flood maps represent an extreme worst-case scenario of dam breach flooding, and the chances of a reservoir failing in the UK are extremely remote. This is due to the stringent inspection and maintenance requirements imposed by the Reservoirs Act 1975 as amended by the Flood and Water Management Act 2010. This form of flooding is therefore not considered to pose an onerous risk to the Project infrastructure that is in the predicted reservoir flood envelope, namely a small number of pylons and access routes.
- 3.8.5 No canals have been identified in the study area.
- 3.8.6 Ordnance Survey mapping has been reviewed to identify if there are any other artificial sources of flood risk, with a particular focus on the infrastructure most vulnerable to flooding (i.e., operational above ground infrastructure: pylons, substations and CSE compounds). Several ponds have been identified within the study area. Lidar data has been used to determine if any of the ponds are embanked and, therefore, if flooding could occur if they were to be breached. The ponds identified within the study area are not considered to pose a flood risk to the Project for reasons such as the following: the ponds are not in the same catchment as the above ground infrastructure, they are not embanked such that they do not pose a risk in the event of a breach, or they are not of a sufficient size to pose a risk.
- 3.8.7 No other potential artificial sources of flood risk to the Project have been identified. Due to the nature of the works proposed, the Project is not anticipated to increase flood risk elsewhere from reservoirs, canals, and other artificial sources.
- 3.8.8 In conclusion the risk of flooding from reservoirs, canals, and other artificial sources to and arising from the Project is **screened out** during construction and operation (and maintenance).

### 3.9 Summary of Sources Screened In

- 3.9.1 Flooding from rivers, the sea, surface water and groundwater have been screened in for further assessment in the FRA. The FRA will use publicly available data; detailed flood model data from the Environment Agency and data collected via the Project's ground investigations, to assess these sources of risk, including consideration of the predicted effects of climate change over the Project lifetime.

### 3.10 Summary of Sources Screened Out

- 3.10.1 Flooding from sewers and water mains has been screened out of assessment in the FRA.
- 3.10.2 Flooding from reservoirs, canals and other artificial sources has been screened out of assessment in the FRA.
- 3.10.3 The Project is not anticipated to increase flood risk elsewhere from these sources.

# 4. Summary and Conclusions

## 4. Summary and Conclusions

- 4.1.1 This FRA Screening document has been produced to support the PEIR for the Norwich to Tilbury Project.
- 4.1.2 The main sources of flood risk to the Project during construction and operation (and maintenance) have been summarised and screened.
- 4.1.3 Flooding from rivers, the sea, surface water and groundwater have been screened in for further assessment in the FRA. The FRA will report on the assessment taken to understand whether the Project is likely to be at risk of flooding from these sources or is likely to increase flood risk from these sources elsewhere in accordance with the requirements set out in relevant national policy.
- 4.1.4 Flood risk from sewers and water mains, reservoirs, canals, and other artificial sources have been screened out of assessment in the FRA. Justification for this is provided within this document.

## Environmental Impact Assessment – Technical Note

[May 2023]

EIA Topic	Hydrology and Land Drainage
Purpose of document	Agree key aspects of the scope and methodology for the Flood Risk Assessment with the Environment Agency and the Lead Local Flood Authorities.
Circulation	Environment Agency and Lead Local Flood Authorities
Date of issue	Wednesday 10 <sup>th</sup> May
Feedback requested by	Friday 26 <sup>th</sup> May

## 1. Introduction

This technical note sets out the approach to preparing a Flood Risk Assessment (FRA) for the East Anglia Green Energy Enablement (GREEN) Project ('the Project'). This note presents information on the sources of flood risk to be assessed, sets out policy and guidance to be followed, sources of baseline data, and describes the approach to assessing flood risk to the Project and arising from the Project during its construction and operation. This note concludes with a description of the intended approach to reporting the assessment.

This note is shared with a view to gaining agreement from the Environment Agency and Lead Local Flood Authorities (LLFA) on these key parameters.

### 1.1 Sources of Flood Risk

In line with the Projects Scoping Opinion, received in December 2022, it is intended that the FRA will assess flood risk from the following sources, during both construction and operation of the Project:

- Fluvial
- Tidal
- Pluvial (including effects on retained existing agricultural drainage or the removal of this as a result of the construction)
- Groundwater

The Planning Inspectorate agreed that the Project would be of low vulnerability to flooding from sewers and reservoirs and that these sources can be scoped out of the Environmental Statement and its accompanying FRA.

### 1.2 Policy and Guidance

The FRA will be prepared to fulfil the requirements set out in the Overarching NPS for Energy EN-1 and EN-5 (inclusive of any new or different obligations in the emerging updates to these documents – currently the 2023 revised drafts).

The assessment will draw on guidance provided in the Flood Risk and Coastal Change Planning Practice (Department for Levelling Up, Housing and Communities and Ministry of Housing, Communities & Local Government, 2022), in particular with reference to the requirement for the FRA to assess future flood risk to and arising from the project over a 75 year development lifetime.

### 1.3 Sources of Baseline Data

It is proposed that the FRA will be informed by existing published flood data sets and reports, including, where applicable, outputs from Environment Agency flood models. Given the nature of the Project, it is not considered that any surveys or new modelling would be required to generate information to inform the FRA.

Key sources of information will include:

- Online flood maps (Environment Agency, 2023)
- Strategic Flood Risk Assessments and Surface Water Management plans prepared on behalf of the host local authorities
- Flood modelling outputs (flood extent, depth and hazard data)
- Site topography data from LiDAR
- Historical flooding records held by the Environment Agency and LLFAs
- Flood defence data from the AIMS database

Flood risk management and mitigation measures will be informed by LLFA policies and published Sustainable Drainage (SuDS) guidance, and in consultation with the Environment Agency and LLFAs.

### 1.4 FRA Approach

It is proposed that the FRA will assess flood risk to the Project and arising from the Project during both construction and operation. During construction, vulnerable Project components include construction compounds, drive/reception pits associated with underground sections of the route, temporary soil storage and laydown areas and temporary haul roads. The FRA will characterise flood risk to these elements and assess the potential effects of temporary watercourse crossings and crossings of flood defences.

The FRA will set out Project commitments to the management of surface water runoff from construction compounds and describe Emergency Flood Incident Response procedures.

During operation of the Project the FRA will focus on any permanent above ground infrastructure e.g., Cable Sealing End (CSE) compounds and will consider the potential effects of climate change on rainfall intensity and peak river flows/tide levels over a 75 year development lifetime. Residual flood risk will be assessed where applicable and the FRA will describe operational surface water drainage proposals.

The FRA will set out Project commitments to manage and mitigate any flood risk effects of the operational phase.

### 1.5 Reporting

It is proposed to report the FRA in the following four stages:

- Stage 1 – Baseline flood risk
- Stage 2 – FRA for Project construction
- Stage 3 – FRA for Project operation
- Stage 4 – Flood risk management and mitigation measures and FRA conclusions

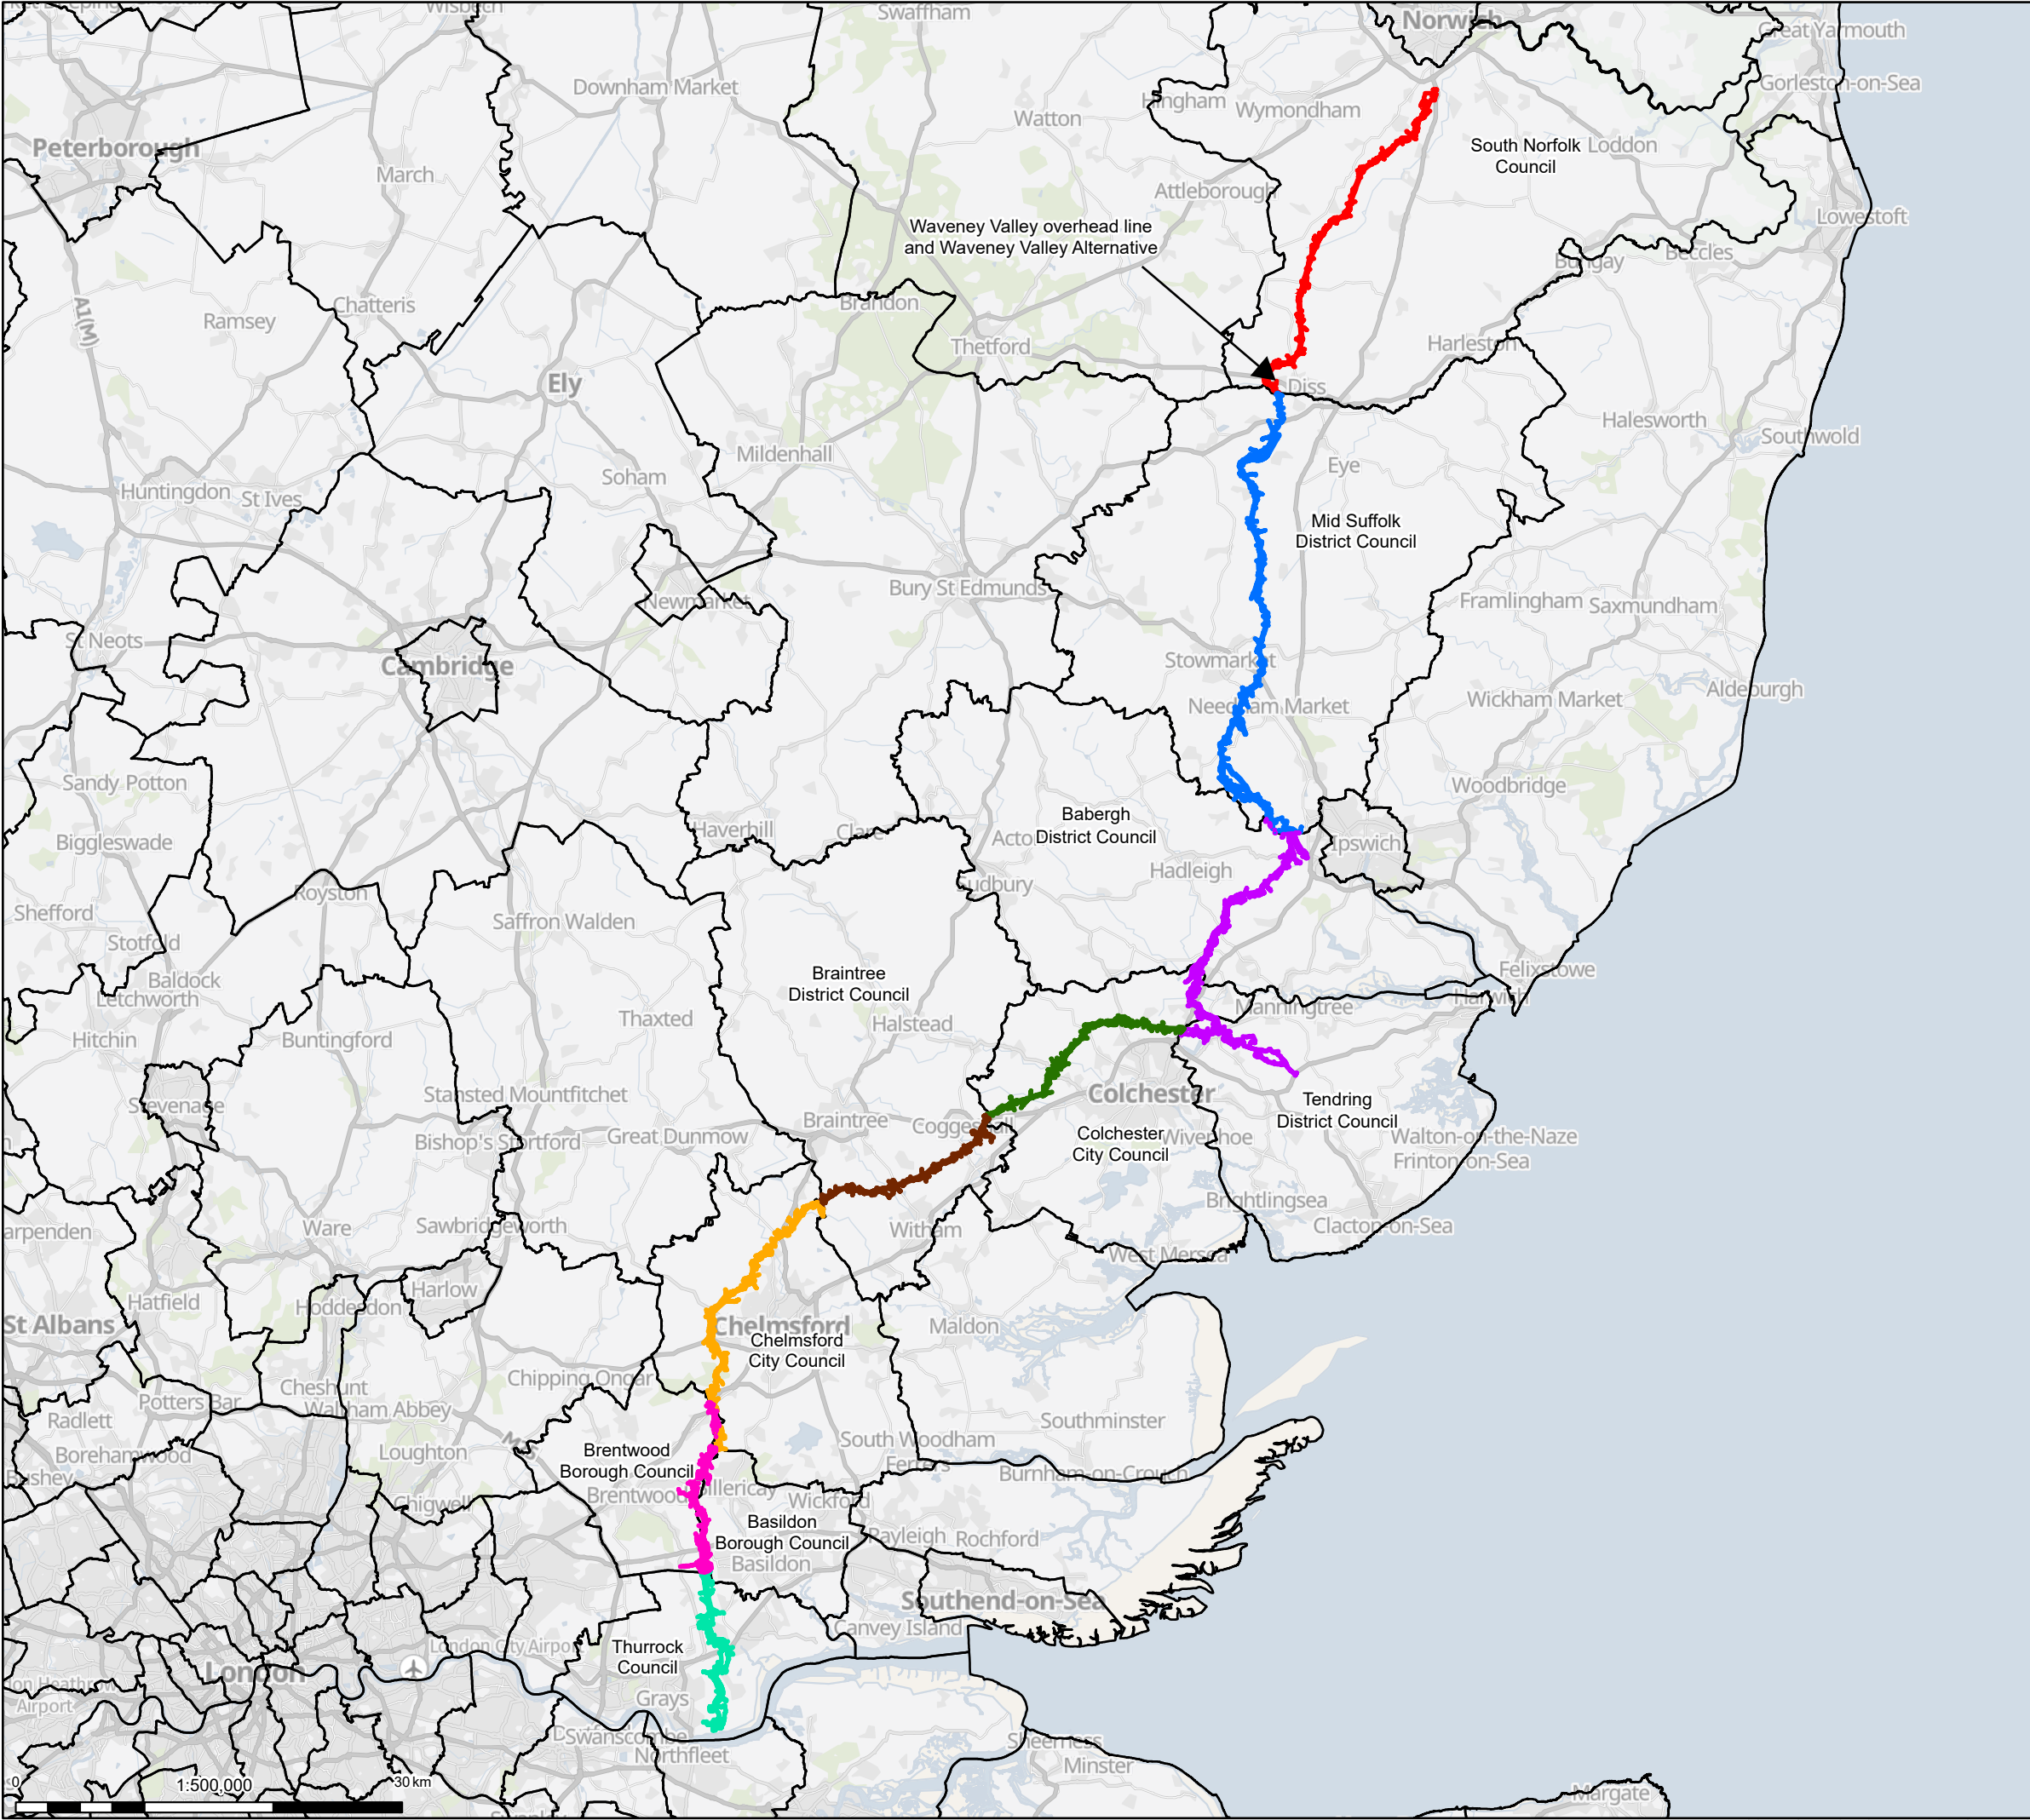

It is proposed to share reporting on the findings of each stage of the assessment with the Environment Agency and LLFAs for review, providing for the opportunity to address any comments, prior to moving to the next stage of assessment, with the aim of agreeing all matters prior to the submission of the Development Consent Order (DCO) application. Current status of agreements are presented in Table 1-1.

**Table 1-1. Matters for inclusion in the Statement of Common Ground (SoCG) and current status**

PROJECT:  
Norwich to  
Tilbury

Title:  
  
Figure 3 - Appendix 12.2 -  
Proposed Project Design  
Page 6 of 60

Designed	J. Glynn	Date	April 2024
Drawn	K. Fischer	Date	April 2024
Checked	A. Fell	Date	April 2024
Approved	K. Burrows	Date	April 2024
Scale:	1:10,000	Datum:	AOD
Original Size:	A3	Grid:	OS
Suitability Code:	A2	Project Number:	10059280

Suitability Description:  
Accepted as Concept Stage

Drawing Number: 10051663-ARC-EGN-ZZ-DR-ZZ-00051	Revision: A
--	----------------

**Proposed permanent design details**

- Proposed overhead line alignment
- Proposed pylon position
- Proposed overhead line permanent access roads (no physical works)
- Proposed 11kV overhead line mitigation required
- BT overhead line mitigation

**Proposed temporary design details**

- Satellite construction compound
- Proposed overhead line access routes water crossing
- Proposed overhead line watercourse crossings
- Proposed overhead line construction SuDS basins
- Proposed site access points
- Proposed overhead line haul road
- Proposed overhead line crossing protection access route
- Proposed crossing protection access route buffer
- Proposed pylon construction work area
- Proposed overhead line pulling location
- Proposed overhead line crossing protection work area
- Proposed UKPN overhead line mitigation work area (wood pole lines)
- Proposed BT overhead line mitigation work area
- Proposed construction laydown areas

Note: The proposed overhead line alignment and proposed underground cable alignment together comprise the 2024 preferred draft alignment.

Proposed permanent attenuation drainage pond

Proposed temporary design details

Proposed CSE compound/substation construction compound

Proposed overhead line access routes water crossing

Proposed temporary attenuation drainage

Proposed temporary attenuation drainage

Proposed overhead line construction SuDS basins

Proposed site access points

Proposed temporary construction haul road

Proposed overhead line haul road

Proposed overhead line crossing protection access route

Proposed crossing protection access route buffer

Proposed pylon construction work area

Proposed overhead line pulling location

Proposed overhead line crossing protection work area

Proposed UKPN overhead line dismantle towers

Proposed UKPN overhead line existing tower (to be modified)

Proposed UKPN overhead line temporary structures (only angles)

Proposed UKPN dismantle centreline

Proposed UKPN existing centreline (modified)

Proposed UKPN temporary diversion centreline

Proposed UKPN tower access

Proposed UKPN overhead line mitigation work area (wood pole lines)

Proposed UKPN cable construction swathe

Proposed UKPN diversion order limits

Proposed UKPN cable sealing end platform

Proposed UKPN overhead line temporary works

Proposed BT overhead line mitigation work area

Proposed pipeline cathodic protection work area

Proposed construction laydown areas

Note: The proposed overhead line alignment and proposed underground cable alignment together comprise the 2024 preferred draft alignment.

Pipeline cathodic protection

Proposed temporary design details

Proposed overhead line access routes water crossing

Proposed overhead line construction SuDS basins

Proposed site access points

Proposed overhead line haul road

Proposed overhead line crossing protection access route

Proposed crossing protection access route buffer

Proposed pylon construction work area

Proposed overhead line pulling location

Proposed overhead line crossing protection work area

Proposed UKPN overhead line mitigation work area (wood pole lines)

Proposed BT overhead line mitigation work area

Proposed pipeline cathodic protection work area

Note: The proposed overhead line alignment and proposed underground cable alignment together comprise the 2024 preferred draft alignment.

Print Date: 03-14-24 17:25:03 COPYRIGHT: NOT TO BE REPRODUCED WITHOUT THE WRITTEN PERMISSION OF NATIONAL GRID ELECTRICITY TRANSMISSION PLC

**Proposed project design details**

- Draft order limits
- Proposed overhead line alignment
- Proposed full line tension gantry
- Proposed pylon position
- Proposed underground cable alignment
- Proposed cable sealing end compound
- Proposed environmental areas
- Other temporary and permanent construction and operational works

**Discipline specific constraints**

- 250m Study Area

**Superficial geology**

- Made Ground (undivided) - artificial deposit
- Worked Ground (undivided) - void
- Infilled Ground - artificial deposit
- Alluvium - clay, silt, sand and peat
- Alluvium - clay, silt, sand and gravel
- Lynch Hill Gravel Member - sand and gravel
- Taplow Gravel Member - sand and gravel
- Boyn Hill Gravel Member - sand and gravel
- Black Park Gravel Member - sand and gravel
- Head - clay, silt, sand and gravel

Note: The proposed overhead line alignment and proposed underground cable alignment together comprise the 2024 preferred draft alignment.
