

EV Make Ready Program

Station Activation Restriction Form

Project with application number IA/CE-_____ consists of the locations and stations below.

Charging Location Name	
Charging Location Address	
Number of Stations/Plugs	_____ Stations _____ Plugs _____ Total Maximum kW

The Customer shall **NOT** authorize or permit _____ (“Contractor”) to
Contractor Name

activate and the Contractor shall **NOT** activate the stations identified above until provided with written approval by National Grid. The stations can only be activated when the Customer and the Contractor receive the written approval from National Grid. This control is necessary to prevent the service transformer from becoming overloaded. If the Customer authorizes the Contractor to activate and/or the Contractor activates the station(s) without the prior written approval from National Grid, Customer shall be liable to the extent that any claims, costs, expenses or losses result from the service transformer failure caused by such unauthorized station activation.
