

New York City and Long Island

Explore the Benefits of Our Multifamily Gas Weatherization Program

Create a more comfortable living environment while lowering heating and cooling costs. Building energy efficiency improvements and available incentives through our Multifamily Gas Programs can help you make energy-saving upgrades with confidence.

PROGRAM BENEFIT

- Improve the efficiency of your building all year round with updated air sealing and insulation.
- Increase the sustainability of your building and decrease your maintenance costs.
- Save energy and create a more productive living and working environment.

PROGRAM REQUIREMENTS

Must be a National Grid customer on a qualifying multifamily gas rate code that pays the System Benefits Charge (SBC). A multifamily building must have five or more dwelling units as defined in the current NYS TRM.

WEATHERIZATION MEASURES AND INCENTIVES

Air Sealing	\$4/therm
Attic Cavity Insulation	Up to \$5/sq ft
Above Deck Roof Insulation	Up to \$10/sq ft
Wall Cavity Insulation	\$200/MMBtu
Window Replacement	Up to 8/sq ft

Incentives are capped at up to 70% of projects cost up to \$150,000 per project.

Measure level caps:

- Attic and attic cavity insulation project incentives will be capped at \$25,000 per gas account.
- Roof insulation project incentives will be capped at \$45,000 per gas account.

SUPPLEMENTAL MEASURES AND INCENTIVES (NYC ONLY)

Air Curtains	\$3,000/unit
Hot Water and Steam Pipe Insulation	\$5/linear ft

Incentives are capped at up to 70% of projects cost up to \$75,000 per project.
