9C. Heritage Impact Assessment Screening

9C.1 Introduction

9C.1.1 This document presents an initial assessment of the potential impacts of the Weston Marsh to East Leicestershire Project (the Project) on the cultural heritage baseline, and is provided as part of the non-statutory Draft Environmental Statement (DES) (referred to in this document as "DES" and non-statutory DES").

9C.1.2 Screening of potential impacts from the Project on individual heritage assets (receptors) has been undertaken. The first stage of this has been to identify where there is the potential for an impact. Where no impacts are likely these assets have been screened out of further assessment. This includes where:

- A receptor is both outside of the draft Order Limits and outside of the Zone of Theoretical Visibility (ZTV).
- The receptor is not extant – i.e. it has been demolished or destroyed, or where the baseline evidence is too uncertain to confirm its existence, such as a documentary reference to a discovery with an uncertain location, or where the record is of an isolated findspot.
- Where, in the case of receptors within the ZTV, it is of a type of heritage asset unlikely to be impacted by change to its setting from the Project. This includes post-medieval farmsteads, functional structures such as pumps, milestone and community buildings, or earthworks created through historic agricultural processes, or for the majority of buried archaeological remains.
- Finally, where there is an assumption detailed in **Chapter 9 Cultural Heritage** that would act as design mitigation and avoid the potential for impact.

9C.1.3 Section 9C.7 of this appendix lists all receptors screened out through this process and provides a justification. These lists will be reassessed for the Environmental Statement (ES) when other evidence, including the potential for impacts from vibration and noise, will be considered.

9C.1.4 Sections 9C.2-9C.7 of this appendix considers the significance and setting of assets where there is the potential for the Project to have an impact. This includes:

- a statement describing the heritage significance of the receptor
- an assessment of its setting, or the reasons why this is not applicable
- a description of the potential impact
- an assessment of the potential for significant effects based on the likely value of the receptor, the initial magnitude of impact and the resulting initial significance of effect.

9C.1.5 Where there is the potential for a significant effect the outcome of the 'initial significance of effect' assessment has been written in **bold** (for example, **Moderate adverse**) and the potential impact is considered in more detail in **Chapter 9 Cultural Heritage,** which includes consideration of how mitigation will be applied.

9C.2 Section 1: South Holland District

Table 9C.1 Initial impact assessment, prior to the application of any mitigation, for Section 1

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Pinchbeck Engine (NHLE: 1004966) Pinchbeck Engine Draining Pump (NHLE: 1146782)	**Pinchbeck Engine** is both a scheduled monument and a grade II listed building. It is a drainage engine built to dewater Pinchbeck Marsh. The red brick engine house has a date stone of 1833. Originally the building had a chimney which has since been demolished to eaves level, reflecting the transition over time from its original steam driven power to diesel and then to electricity (Ref 9C.1). Inside, the building is divided by a spine wall: one side houses a boiler manufactured by Galloways Ltd (dated 1893), and the other contains the adjacent restored beam engine. Notable elements include a high-pressure cylinder in addition to the usual low-pressure one. The flywheel drives a scoop wheel via reduction gears. The engine and engine house are maintained and managed by The Internal Drainage Board. The **Pinchbeck Engine** has architectural interest through its surviving original beam engine, itself a piece of nationally important engineering history, and through its functional but distinctive engine house, an element of the drained fenland landscape. The Pinchbeck Engine also possesses considerable historic interest as an integral part of the local story of the fenland drainage, representing a notable point in the industrialised drainage and agriculture of the 19th and 20th centuries. There would be no physical impact to the **Pinchbeck Engine** from the Project.	The proposed towers and overhead line (overhead line) will cross flat fenland north of the pumping engine, whose setting is primarily functional and defined by the drainage network and the surrounding drained fields. This distinctive, low-lying, intensively farmed land has subsided over time due to peat shrinkage; the most prominent features are flood embankments and distant vertical landmarks (church towers/spires), with occasional woodland belts, the Spalding power plant to the south, and existing high-voltage overhead lines to the north/north-east and south-east, alongside a low-voltage line running parallel to the road. The landscape is largely artificial and the pumping engine is integral to its operation; the setting therefore makes a strong positive contribution to significance. The setting of the asset would remain legible and it is not characterised by designed or sensitive views, but the proposed towers and overhead line would introduce a new, large-scale modern element within this long-established agricultural landscape. This would result in a negligible magnitude of impact.	Potential for change to setting	High	Negligible	Minor adverse
Moated site of monastic grange with adjacent earthworks at Rigbolt House (NHLE:1009979) Rigbolt House (NHLE: 1064459)	**Rigbolt House** group includes the scheduled earthworks and archaeological remains of a medieval moated monastic grange and the adjacent grade II listed post-medieval house. The scheduled monument has archaeological interest as a result of the buried and earthwork remains of the moated site, including potential organic remains within waterlogged deposits as the ditched remain water-filled in places. The grange would have been a moderately high-status farm providing food and other resources for the associated monastery.	The asset's setting is within a post-medieval/ modern drained fenland agricultural landscape that differs markedly from its likely medieval, pre-drainage context. The site lies near another moated site (approximately 860 m to the south) and forms part of a wider group of comparable assets in this area. While intervisibility between sites may historically have occurred, existing dense tree cover to the south currently screens views towards the proposed overhead line. More distant south-westerly views from the site may be possible but would be at greater range and would not affect any intentional intervisibility with the nearby moated site. Accordingly, no change to the	Potential for change to setting to listed building	High	Negligible	Negligible to minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	Rigbolt House has its origins in the 16th century, likely reflecting establishment of a secular farmstead after the dissolution of the monasteries by Henry VIII. The house was substantially remodelled in later centuries but retains architectural interest resulting from its early post-medieval construction, as well as historic and archaeological interest through its inclusion of medieval stonework, potentially originating in the earlier grange. As a group both the archaeological remains and the house contribute to each other's historic interest, representing different elements of the site's history through its monastic and into polite post-medieval society and farming. There would be no physical impacts to the building or earthwork monument.	asset's setting is anticipated and no impact to the scheduled monument is identified. Rigbolt House is experienced within the boundary of the moated site, and while not extensively visible, the extant remains provide a largely undisturbed immediate setting to the house, contributing to our understanding of the historic development of the site. Views south from the asset towards the proposed overhead line and towers are largely screened by mature tree growth along Beech Bank and woodland beyond. In longer distance views south west and south east towers may be visible, introducing new large industrial features into the otherwise agricultural and pastural flat landscape with few, if any, built features. This would result in a negligible magnitude of impact.				
Moated site of Newhall Grange (NHLE: 1009981)	Earthworks and archaeological remains of a monastic grange farmstead, independent of the secular manorial system, used to provide food and raw materials for the parent monastic house. The site includes a moat and associated earthworks, reflecting medieval agricultural practices and has archaeological and historic interest through its remains and their potential to provide evidence of medieval monastic systems and farming.	The moated site occupies a large field adjacent to a north–south road and has open views across the fenland landscape, with distant views west to the fen-edge escarpment. It forms part of a series of moated sites in the area; the nearest, with which this asset may have historically been intervisible, is at Rigbolt House. The proposed overhead line and associated towers would be highly visible from the asset and would also be apparent in views towards the asset from the north (although, in practice, the site is only readily perceived at close range). The key contribution to significance made by the asset's setting relates to visual and functional relationships with other moated sites and nearby villages. While the surrounding agricultural landscape has altered substantially since the site's establishment—particularly following large-scale drainage from the 17th century onwards—the proposal would not interrupt these principal relationships. The introduction of a new, modern industrial element would therefore result in a small adverse magnitude of impact.	Potential for change to setting	High	Small adverse	**Moderate adverse**
Wykeham Chapel: a moated monastic grange and retreat house (NHLE: 1019096)	The monument includes a medieval moated monastic grange, together with the remains of a retreat house and chapel at Wykeham. The grange was associated with Spalding Priory, which housed a Benedictine order and lay 5 km to the southwest. The moated island is rectangular in plan, measuring 270 m by 140 m, with the centre of the	The site is extensively screened by established vegetation to its boundary edge, therefore it is unlikely any visual impacts would arise from the operation of the scheme approximately 550m north of the monument group. This would result in no impact to the asset. Potential effects during construction will require further consideration for the ES.	Potential for setting change	High	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
The Wykeham Chapel of St Nicholas (NHLE: 1064471) Chapel Farmhouse (NHLE: 1147513) Gate Piers to Chapel Farmhouse (NHLE: 1064472)	island, occupied by the chapel and present farmhouse, raised above the surrounding ground level, indicating the location of the earlier house. On the southern half of the island two raised linear earthworks, aligned north -south and measuring 25 m to 30 m in width are separated by a partly water-filled channel. These features are believed to represent the remains of medieval 'dylings', raised strips that were a means of draining the land for pastoral or arable use. The standing remains of the grade I chapel (NHLE: 1064471) and the adjoining graveyard lie at the centre of the moated grange and are included in the scheduling. The grade II Chapel Farmhouse (NHLE: 1147513) is excluded from the scheduling, although the ground beneath it is included. The moated monastic grange, retreat house and chapel survive well as a series of standing, earthwork and buried remains and are considered together as a group (**Wykeham Chapel**). Its significance is derived from its archaeological, historic and architectural interest, which is demonstrated through the survival of archaeological and built heritage elements. The chapel, earthworks and buried remains will contain valuable information on the layout and use of the site and contribute to the understanding of medieval monastic and rural life. The artificially raised ground, that forms the island within the moat, will preserve evidence of past land use predating construction of the medieval monastic grange. In addition, waterlogging in the moat will preserve organic remains, such as timber, leather and seeds, which will give an insight into the domestic and economic activity on the site. The continued use of the site in the post-medieval period demonstrates its ongoing importance as a feature of the landscape. Its function as a monastic grange and retreat house, together with the unusual survival of the chapel, makes this a particularly rare example of its kind.					
Church of St Lawrence (NHLE: 1064403)	The parish church of Surfleet is the grade I listed Church of St Lawrence, which originates in the 13th century and includes a notably leaning tower (approximately 6ft of difference between base and top). It is a grand church, both in terms of scale and the richness of its stonework and it has a commanding presence not just within the village but also the surrounding fenland fields, within which it is one of the only landmark features.	Views towards the Project from the asset are entirely screened by intervening tree cover afforded within the village immediately to the south. The church spire remains visible at long range across the fenland landscape and may lose a degree of its visual dominance with the introduction of towers in the vicinity. This would result in a small adverse magnitude of impact.	Potential for change to setting	High	Small	**Moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	The church has architectural and artistic and historic interest as a finely decorated fenland church, its grandeur representing the historic wealth and population of what is now a very rural area of the country. It also has some specific artistic and historic interest as one of the many Lincolnshire churches photographed by John Piper for the Shell Guide to Lincolnshire (Ref 9C.2). As a subject of Piper's it forms part of the architectural tapestry of rural Britain he created through the guides and his wider work. The church also has archaeological interest, both for the centuries of burial within the church and within its churchyard, and for the potential for remains of earlier phases of building on the site. There would be no physical impact to the church from the Project.					
Church of St Mary (NHLE: 1064433)	The Church of St Mary, Pinchbeck, is a large parish church of complex medieval development, originating in the 12th century and substantially enlarged and remodelled between the 13th and 15th centuries, with later 19th-century restoration and rebuilding by Butterfield. Constructed in ashlar with lead and slate roofs, it comprises a prominent west tower, clerestoried nave with aisles, chancel, north chapel and south porch. The imposing 14th-century tower features rich Perpendicular detailing, while the exterior is notable for extensive embattled parapets, large traceried windows and ornate doorways, particularly the elaborate west entrance and south porch. Internally, the church retains tall 13th-century arcades, a fine 15th-century timber roof, surviving medieval glass, and later Victorian stained glass by O'Connor. Significant fittings include a 14th-century octagonal font, a restored 15th-century screen, and a series of notable monuments ranging from the 17th to early 18th centuries, reflecting the building's long architectural and liturgical history. It has architectural and artistic interest through the qualities of its medieval design and later modifications. Its 12th century origins are notable in terms of its historic interest, reflecting a population in Pinchbeck of sufficient size and wealth to support it. Today, Pinchbeck could appear more of a suburb of Spalding, but the church illustrates its independent history. It also has archaeological interest through its churchyard and the potential for remains of earlier buildings on the site.	There are no views from the churchyard towards the Project, as established vegetative screening around the churchyard fully encloses the site and prevents visual connection. At the wider landscape scale, the Project will introduce tall tower structures into the open fenland landscape, within which the church tower is currently visible over long distances. These towers may compete with the dominance of the church tower in views from Surfleet, affecting the legibility and relative visual dominance of the church tower. This would result in a small adverse magnitude of impact.	Potential for change to setting	High	Small adverse	**Moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	As with Surfleet to the north, the church tower is an important landmark and is visible for a long distance across the fenland fields. There would be no physical impact to the church from the Project.					
Cottage Farmhouse (NHLE: 1064435)	Cottage Farmhouse is a grade II listed farmhouse dating from the mid-18th century, with alterations carried out during the 19th century. It has historic and architectural interest as a surviving example of a modest rural dwelling associated with the historic agricultural landscape of Pinchbeck. There would be no physical impact to the asset from the Project.	Cottage Farmhouse is sited within a triangle of land, bound to the east and west by arable fields and to the north by the garden of a neighbouring property. Views northeast are screened by a large hedge running north-south along the property. Its setting is characterised by the surrounding flat fieldscape and contributes to its significance as a relatively remote rural farmhouse. Views towards the Project to the northwest are open from the asset meaning the overhead line and associated towers would be visible in these views, however these new elements would not sever the asset from its setting, nor would they change the ability to appreciate its heritage value. This would result therefore in a small adverse magnitude of impact.	Potential for change to setting	Medium	Small adverse	Minor adverse
Manor Farmhouse (1064439)	Manor Farmhouse is a grade II listed farmhouse dating from the early 17th century, with later alterations carried out during the 18th and early 19th centuries. It has surviving early 17th-century features including original wainscot panel doors, contributing to the building's architectural and historic interest as a well-preserved farmhouse associated with the rural development of Pinchbeck. There would be no physical impact to the asset from the Project.	The asset lies outside the draft Order Limits and is oriented south-east, facing away from the Project. A copse of trees to the north-west provides screening to the rear of the farmhouse and restricts views in that direction. The Project is located approximately 650 m to the north of the building, and much of the surrounding area falls within the ZTV, meaning that views of the farmhouse from the south and south-east are likely to include the new overhead line in the background. However, this would not alter the building's functional or visual relationship with the surrounding agricultural land, which is a key aspect of its significance as a farmhouse. As a result, the magnitude of impact would be negligible adverse.	Potential for change to setting	Medium	Negligible adverse	Negligible adverse
The cottage to the rear of 28 Risegate Road (NHLE: 1064462)	The cottage to the rear of 28 Risegate Road is a grade II listed cottage dating from the 18th century. It is constructed of red brick with a thatched roof beneath pantiles, incorporating a brick-coped tumbled gable and two gable stacks. The building is single storey with a garret and has a three-bay principal elevation with dentilled brick eaves, a central planked entrance door, and flanking two-light windows with brick segmental heads. The cottage is designated for its architectural and historic interest as a modest rural dwelling contributing to the historic character of Risegate. There would be no physical impact to the asset from the Project.	The cottage is set back from the southern side of Risegate Road, behind modern single storey residential development. Its setting is characterised by flat field land to the south with which it shares a functional historic relationship. Despite being within the ZTV, it lies just over 2 km north of the overhead line. The change to its setting would result in a negligible adverse magnitude of impact.	Potential for change to setting	Medium	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Church of St Gilbert and St Hugh (NHLE: 1146623)	Small early 20th century church in a stripped back Gothic-style. Though architecturally modest, the church holds local historic interest as a community religious building, retaining its original form and character and contributing to the historic identity of Risegate. There would be no physical impact to the church from the Project.	Although open views extend southwards from the adjacent car park, the churchyard itself is well contained by boundary vegetation, including a developing beech hedge, which limits outward visibility. The church does not function as a visual landmark in the wider landscape and appears to derive its significance primarily from its local communal or familial associations rather than from prominence or long-distance views. The adjacent Clough Road to the north disrupts the otherwise verdant and peaceful character of its setting. Changes to its setting would result in a negligible adverse magnitude of impact.	Potential for change to setting	Medium	Negligible adverse	Negligible adverse
The End Cottage (NHLE: 1146861)	Grade II listed brick 18th century house representing a well-preserved example of local rural domestic architecture. Its simple rectangular form, traditional brick construction, and modest two-storey height reflect the vernacular building traditions of the period. Although plain in overall appearance, the cottage's historic fabric, proportions, and setting contribute to its character and significance as part of the agricultural landscape of Pinchbeck. There would be no physical impact to the asset from the Project.	The agricultural setting in which it lies contributes to the significance of the asset and the understanding of historic and functional relationships between the two. From the asset there are views northwards across the River Glen and the surrounding agricultural landscape. The site lies approximately 1.5 km south of Project, and while it is within the ZTV any view of the Project would be very limited and indistinct. As a result, the potential for effects on setting is considered unlikely. This would result in a negligible adverse magnitude of impact.	Potential for change to setting	Medium	Negligible adverse	Negligible adverse
The Grange (NHLE: 1308755) Traphouse to the Grange (NHLE: 1064440)	**The Grange** is a grade II listed house dating from around 1750. The Grange is designated for its architectural and historic interest as a substantial mid-18th-century house contributing to the historic character of Northgate Road, Pinchbeck. The adjacent traphouse forms a small group with it. There would be no physical impact to the asset from the Project.	While the principal façade of the grange faces south, views to the north are likely to be available from its rear. From the public road, the main façade largely blocks wider views, though limited views northwards may be obtained from either side of the brick-walled garden. The adjacent trap house to the west (NHLE 1064440) forms an important part of its setting, contributing to its significance, as does its rural setting. The site lies over 1.5 km from the Project, and views of towers and overhead line would bring little change to this setting. This would therefore result in a negligible adverse magnitude of impact. The traphouse is located within the enclosing property wall and the Grange is its primary functional and historic relationship. Changes in the landscape from the Project, which would be located approximately 1,645m north, would have no impact to its value.	Potential for change to setting	Medium	Negligible adverse	Negligible adverse
Glen House (NHLE: 1359276)	Glen House is a grade II listed house dating to the late-18th-century, with Georgian architectural character. There would be no physical impact to the asset from the Project.	There are views from Gleb House northwards across the River Glen and the surrounding agricultural landscape, the latter of which forms the setting of the asset. The site lies approximately 1.9 km south of the proposed overhead line and, while partially within the ZTV, views of the Project would be in the distance over fields and would not alter the open rural	Potential for change to setting	Medium	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
		landscape. The Project is also unlikely to affect the appreciation of the asset's setting. The introduction of new towers and overhead line in the distance would be a change, resulting in a negligible adverse magnitude of impact.				
Cheal House, screen gate and wall piers (NHLE: 1359288)	This is a large post-medieval house adjacent to a farmstead complex. It faces south and a gap in the trees along the road opposite has been maintained to allow an uninterrupted view across the flat, fenland fields. It has architectural and historic interest as an example of a wealthy, probably farming family's, post-medieval house from around 1800. There would be no physical impact to the asset from the Project.	The setting of the house is characterised by open views of fields to the south, with views over the flat fenland afforded by the gap in the tree screen on the south side of Cheal Road. This setting allows understanding of the functional and historic link between the land and the house. There are wide, open views towards the Project from this location, which lies approximately 1.1 km to the south. As a result, the proposed development would be likely be visible, although there would not fundamentally change how the building and its setting are appreciated. Changes to the asset's setting would result in a small magnitude of impact.	Potential for change to setting	Medium	Small adverse	Minor adverse
Cuckoo Lane Farm, Sufleet (MLI22595)	Partially extant post-medieval farmstead group. Surviving historic farm buildings are of architectural interest as a characteristic part of the local vernacular and have some historic interest through illustration of the introduction of large, isolated farmsteads as part of the drainage and agricultural intensification in the area in the 18th and 19th centuries. Although within the draft Order Limits, the design avoids physical impacts.	The setting of this post-medieval farmstead is likely to contribute to its significance through the functional historic relationship between farmstead, ancillary farm buildings and surrounding farmland. This would not be affected by the Project.	Potential for physical impact	Low	No change	No effect
Unnamed farmstead, Pinchbeck (MLI22698)	Site of a farmstead, now demolished. There is the potential for some buried archaeological remains of foundations, basements, wells or other deeper features. These may be of some, limited, archaeological interest. The proposed access runs around the perimeter of the former farmstead site and has the potential to have an impact during construction. A worst-case assessment of large adverse magnitude of impact has been made, pending further archaeological surveys.	The value/significance of any buried remains is unlikely to be impacted by changes to their setting from the Project.	Potential for physical impact	Negligible	Large adverse	Minor or negligible adverse
Crowtree Farm, Pinchbeck (MLI122736)	Partially extant post-medieval farmstead. Surviving historic farm buildings are of architectural interest as a characteristic part of the local vernacular and have some historic interest through illustration of the introduction of large, isolated farmsteads as part of the drainage and agricultural intensification in the area in the 18th and 19th centuries.	The setting of this post-medieval farmstead is likely to contribute to its significance through the functional historic relationship between farmstead, ancillary farm buildings and surrounding farmland. This would not be affected by the Project.	Potential for physical impact	Low	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	This asset borders on the draft Order Limits, but would not be impacted by the proposed works, which would use existing an access track next to the farmstead.					
Hill Marsh Farm, Pinchbeck (MLI122741)	Partially extant 19th century farmstead, with a farmhouse attached to a range of working buildings arranged around a regular courtyard. Surviving historic farm buildings are of architectural interest as a characteristic part of the local vernacular and have some historic interest through illustration of the introduction of large, isolated farmsteads as part of the drainage and agricultural intensification in the area in the 18th and 19th centuries. There would be no physical impact to the farmstead, which is located outside of the draft Order Limits.	The farmstead is located approximately 125m north of the proposed overhead line, although it is located outside of the draft Order Limits. The powerlines would be in views directly south, although from much of the farmstead there would be at least partial tree screening. The setting of the farmstead is of extensive drained fenland fields, which are an important contextual and functional part of its setting and contributes to its value. While the agricultural setting would still be legible, the proximity of the Project in views means that there would be some limitation in the contribution of the setting. This would be a small adverse magnitude of impact.	Potential change to setting	Low	Small adverse	Negligible adverse
Flints Farm, Pinchbeck (MLI122740)	Redeveloped 19th Century farmstead in an isolated location. The farmhouse is attached to a range of working buildings. The main yard comprises a regular courtyard with multiple regular yards. Large modern sheds are also present The building is extant and included within the draft Order Limits as the trackway to the farm and beyond is being considered for construction access. There would be no physical impact from construction.	The setting of this post-medieval farmstead is likely to contribute to its significance through the functional historic relationship between farmstead, ancillary farm buildings and surrounding farmland. This would not be affected by the Project, approximately 500m north as the new overhead line would be visually permeable.	Potential for physical impact	Low	No change	No effect
Possible Medieval dyke, known as ‘New Fendike’, now Hammond Beck (MLI20055)	Existing drainage dyke, known as Hammond Beck, which is thought to originate in the 13th century or earlier, when it was referred to in sources as ‘New Fendike’. As such it is a feature of the historic landscape of historic interest, illustrating an early stage in the drainage of the fens, and sherds of medieval pottery which have been found in places along it indicate that there is the potential for archaeological evidence, although this would be limited by its modern management. Potential for physical impact – to be mitigated through design as it is in active use as a dyke.	The dyke is part of an extensive network of historic drainage channels which spread across the fens. The interrelationships between these features and the surrounding agricultural land, and with surviving drainage structures such as mills or pumping engines, are important to how it is understood. These aspects of its setting would not be sensitive to change from the Project.	Potential for physical impact	Low	No change	No effect
Roman settlement remains (MLI20145)	Site of potential Roman settlement indicated by five spreads of Roman pottery dating between the 1st and 4th centuries CE. Buried remains will have archaeological interest and could be of regional or even national importance depending on the extent, character and survival of the remains.	The value/significance of any buried remains is unlikely to be impacted by changes to their setting from the Project.	Potential for physical impact	Medium – high	Medium adverse	**Major or moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	The proposed overhead line would pass through the potential settlement site although the only construction impacts would arise from the haul road which would cross the southern part of the polygon. It may be possible to reduce potential impacts through use of track matting. Further aerial photograph analysis, followed by geophysical survey and trial trenching, is planned which will allow more precise understanding of potential impacts. At this stage, a worst case assumption of medium adverse magnitude of impact has been made, on the basis of the fact only part of the monument is within the draft Order Limits.					
Saxon Settlement (MLI20193)	Site of potential early medieval settlement indicated by spread of pottery, animal bone and slag. Buried remains will have archaeological interest and could be of regional or even national importance depending on the extent, character and survival of the remains. The proposed overhead line would pass through the potential settlement site. The design includes one tower as well as a haul route to the north. It is currently intended that access would use track matting to minimise below ground impacts. Further aerial photograph analysis, followed by geophysical survey and trial trenching, is planned which will allow more precise understanding of potential impacts. At this stage, a worst case assumption of large adverse magnitude of impact has been made, on the basis of the fact that the whole of the monument is within the draft Order Limits.	The value/significance of any buried remains is unlikely to be impacted by changes to their setting from the Project.	Potential for physical impact	Medium – high	Large adverse	**Major or moderate adverse**
Saxon Settlement (MLI20208)	Site of potential early medieval settlement indicated by spread of shell, fired clay, burnt stone, quernstone fragments, animal bone and early-middle Saxon pottery. Buried remains will have archaeological interest and could be of regional or even national importance depending on the extent, character and survival of the remains. The proposed overhead line would pass through the potential settlement site but has been designed to minimise impacts, specifically through relocating a tower proposed at an earlier design stage, to a point outside of the polygon for this settlement. There would still be a haul road required, passing through the northern part of the settlement polygon. It is currently intended that access would use track matting to minimise below ground impacts. Further aerial photograph analysis, followed by geophysical survey and trial trenching, is planned which will allow more precise understanding of potential impacts. At this	The value/significance of any buried remains is unlikely to be impacted by changes to their setting from the Project.	Potential for physical impact	Medium – high	Medium adverse	**Moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	stage, a worst case assumption of medium adverse magnitude of impact has been made, on the basis of the fact that the whole of the monument is within the draft Order Limits but only a part would be impacted by construction.					
Undated cropmarks (MLI20217)	Cropmarks of potential enclosures and infilled watercourses. In an area with Roman and early medieval remains, but it is not known if these are associated. Buried remains of infilled watercourses and ditched enclosures would be of archaeological interest, particularly if dating evidence is found which would allow it to be contextualised with contemporary settlements. Likely to be of local importance unless further complex archaeological remains are found in association with these features. The proposed overhead line would pass through the northern part of the area within which the cropmarks have been identified. The design includes three towers as well as a haul route and access connections from the road to the south. It is currently intended that access would use track matting to minimise below ground impacts. Further aerial photograph analysis, followed by geophysical survey and trial trenching, is planned which will allow more precise understanding of potential impacts. At this stage, a worst case assumption of medium adverse magnitude of impact has been made, on the basis of the fact that only part of the monument is within the draft Order Limits.	The value/significance of any buried remains is unlikely to be impacted by changes to their setting from the Project.	Potential for physical impact	Low	Medium adverse	Minor adverse
Romano-British cropmarks (MLI20218)	Complex of cropmarks interpreted as enclosure boundaries, former watercourses and drove roads, as well as evidence of possible settlement. Artefact scatters of Iron Age and Roman period pottery suggests buried remains of this date. Depending on the extent and character of buried remains, these features of archaeological interest could be of regional or even national importance. The proposed overhead line would pass diagonally through the northern part of the area within which the cropmarks have been identified. There would be four towers as well as a haul route, access connections from the road to the north and a small construction compound. It is currently intended that access would use track matting to minimise below ground impacts, and a similar approach may be possible for the construction compound. Further aerial photograph analysis, followed by geophysical survey and trial trenching, is planned which will allow more precise understanding of potential impacts. At this stage, a	The value/significance of any buried remains is unlikely to be impacted by changes to their setting from the Project.	Potential for physical impact	Medium – high	Medium adverse	**Major or moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	worst case assumption of medium adverse magnitude of impact has been made, on the basis of the fact that only part of the monument is within the draft Order Limits.					
Medieval salterns (MLI23633)	Geophysics and trial trenching indicates substantial remains of medieval salt working including surviving structures. These features are of archaeological interest due to the evidence they contain, which includes paleoenvironmental remains, and is also of considerable historic interest as evidence of one of the major medieval industries in the area and one that physically transformed the landscape, affecting settlement for centuries to come. Medieval saltern remains, depending on their extent, character and survival, could be of regional or even national importance. Likely to be physical impacts resulting from construction. One tower is proposed within this area of salterns, which extends considerably beyond the draft Order Limits, as well as a haul road. At worst, this would be a medium impact as only part of the receptor is within the draft Order Limits.	The value/significance of any buried remains is unlikely to be impacted by changes to their setting from the Project.	Potential for physical impact	Medium – high	Medium adverse	**Major or moderate adverse**
Cropmark linear features, Pinchbeck (MLI90803)	Cropmarks of linear features, likely to be natural watercourses or drains. Of limited historical interest unless associated with further, more complex, features. There may, however, be geoarchaeological and/or paleoenvironmental remains of archaeological interest. Likely to be physical impacts resulting from construction. There is one tower, as well as a temporary haul road. Further consideration of geoarchaeological impacts and mitigation will be considered in the ES, including potential for impacts from dewatering. Impacts would be localised to the northern part of this area of features, resulting in a worst-case magnitude of impact of medium adverse.	Infilled watercourses were part of an extensive network of natural and artificial channels which spread across the fens. The interrelationships between these features and contemporary archaeological sites may form a setting to these features, but this would not be sensitive to change from the Project.	Potential for physical impact	Negligible	Medium adverse	Minor or negligible adverse

9C.3 Section 2: South Kesteven District

Table 9C.2 Potential impact assessment, prior to the application of any mitigation, for Section 2

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Assets around Corby Glen which have the potential to be impacted due to visual change from the construction of the new overhead line to the south of the village and WMEL-A to the west, are excluded for DES unless clear evidence of limited contribution of setting, due to change in design at time of writing. These will be included at ES: Scheduled monuments: 1005001 (Corby Castle) and 1004928 (Corby Glen gatehouse) Listed buildings in: • Farmland south of Corby Glen (Round House Farm): 1062819 – potential physical impacts considered below; • Corby Glen: 1062848, 1309158, 1062813, 1062814, 1062815, 1062816, 1062817, 1062849, 1062850, 1062851, 102852, 1062853, 1165913, 1165985, 1165992, 1166014, 1166023, 1166038, 1166042, 1309046, 1309127, 1309175, 1360087, 1360088, 1360089, 1360090, 1360108, 1360109, 1360110, 1453151 • Creeton: 1166154, 1062822, 1166266 • Bitchfield: 1062863, 1062864 • Swinstead: 1062789, 1062779, 1062780, 1062781, 1062782, 1062783, 1062784, 1062785, 1062786, 1360128, 1062788, 1062790, 1360094, 1147011, 1147091, 1146996, 1147018, 1147041, 1147081, 1147105, 1147131, 1147122, 1360129, 1308677, 1360130 • Swayfield: 1360127, 1062774, 1062775, 1062776, 1062777, 1062778, 1146951, 1146960, 1146969, 1146973 • Irnham, associated with **Irnham Hall** in the south of the village: 1146898, 1146902, 1308744, 1062811, 1062812, 1360106) • Little Bytham: 1062772. Non-designated built heritage in: • Corby Glen: MLI99281, MLI99282, MLI126717 • Irham, associated with Irnham Hall: MLI34177 • Swinstead: MLI121771. Conservation areas: Corby Glen, Swinstead, Irnham						
Car Dyke, S of Dyke (NHLE: 1004959)	The scheduled section of the Car Dyke is located approximately 3.5km south of the draft Order Limits and includes a particularly well-preserved section of the dyke, which was originally built by the Romans. The remains are of archaeological and historical interest due to the physical remains preserved and how they make legible an aspect of the historic landscape which has continuity to the present. The scheduled monument would not be physically impacted.	The dyke continues north and south of the scheduled section, and although it is much modernised, it is a non-designated heritage asset (MLI60706) and a component part of the historic landscape of drainage systems in the area. The non-designated sections of the Car Dyke are a key component of the setting of the scheduled section, providing both contextual evidence to its historical interest and, potentially, associated archaeological interest. The overhead line alignment would cross the Car Dyke from east to west, with towers 55 and 56 on either side. A temporary crossing would be required to carry the construction haul road. Due to the localised nature of any impacts of this crossing, there would not be any impact to the scheduled section from this.	Potential change to setting	High	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Settlement between Rippingdale Running Dike and Long Drove (NHLE: 1004976) Settlement between Long Drove and Dowsby Drain (NHLE: 1004977)	Two scheduled areas of buried Roman settlement to the north and south of Long Drove in the Lincolnshire Fens, considered as a single group (**Rippingdale Fen Roman Settlement**). Surface pottery and cropmarks indicate the presence of a field system and droves with settlement enclosures. The settlement was established by a water-course that has now dried up along its eastern boundary, utilising a series of small hillocks on the edge of a gravel island surrounded by fen silts and clays, indicating that the settlement was built on a local area of higher ground above the fen marshes. Today, the site is spread across several large fenland fields with a very large dyke between them; this dyke is part of the post-medieval drainage of the area and would have been instrumental in transforming the landscape around the site from one of marshes to one suitable for intensive year-round agriculture. The remains are primarily of archaeological interest and would not be physically impacted by the Project.	The principal features of the landscape are the embankments and drainage dykes, with only a very small number of scattered trees. Low-voltage (approximately 10 m high) power lines cross the Roman settlement area and form part of the existing infrastructure. At present, two low-voltage north–south aligned power lines are present, one of which serves the pumping station and one immediately to the south of the settlement site. A large farm complex, surrounded by mature trees, lies within the wider views. This vegetation would screen views of the proposed towers from a substantial part of the settlement area; however, in other locations the towers would be visible as they continue across the landscape. In these areas, they would be among the tallest vertical features in the landscape, particularly to the south of the site. The site is quiet and rural in character, with birdsong the dominant sound. Some distant industrial noise is audible, possibly originating from the waterworks on Parsons Drove to the south, but the area is otherwise very isolated. The presence of existing modern low-voltage power lines means that the landscape already contains elements of energy infrastructure; however, any new infrastructure would represent additional development at a greater scale than the current structures. The surrounding landscape is predominantly modern in character. Built development at Dunsby Fen Farm to the south-east is clearly post-medieval to 20th century in date, and no assets in this area would be directly affected by the presence of towers. A further notable aspect of the landscape is the visibility of the rising edge of the Kesteven Uplands to the west. The Project would be visible in the landscape to the south of the monument, but as the landscape would still be legible and it is much modified since the Roman period, this would have a negligible magnitude of impact.	Potential for change to setting	High	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Remains of Knights Templar preceptory, watermill and fishponds (NHLE: 1007688)	Buried and earthwork remains of a Knights Templar preceptory established in the 12th century and in use until the early 14th century. Initially a simple hall with outbuildings, it evolved into a structured farmstead with two halls, a chapel, kitchens, and agricultural and industrial buildings, including a watermill. Excavations between 1965 and 1967 revealed well-preserved earthworks and buried features, such as domestic quarters, barns, workshops for metalworking and tile-making, and a fortified structure. The complex also includes fishponds, water-control systems, and trackways, illustrating its integration with the medieval landscape. After the Templars' suppression in 1312, the site passed to the Hospitallers but remained uninhabited, later becoming grazing land. Its exceptional archaeological survival makes it a key resource for understanding Templar sites in England. It has considerable archaeological interest. As it is outside of the draft Order Limits this would not be impacted by the Project.	The scheduled site is in a field of pasture on an area of higher ground next to the River Witham which is sharply cut away to the north and east. To the east, running along a high ridge, is the A1, the modern road following the approximate course of the prehistoric Jurassic Way and the Roman Great North Road. This routeway continued in use throughout the medieval period and is important for the siting of the preceptory as it allowed the Templar knights to raise money from travellers. There are multiple electrical and transmissions infrastructure in view of the monument, including a small substation immediately south and a large antenna on high ground to the east. The proposed overhead line would be approximately 150m north of the preceptory, and there would also be a temporary construction compound immediately north. The temporary construction activity and permanent presence of modern infrastructure in views from the monument would alter its setting, although there would be no change to the relationship between the site and the A1 and its topographic context. Given the nature of the monument and the contribution of its setting the magnitude of change would be negligible adverse.	Potential change to setting	High	Negligible adverse	Negligible adverse
Roman settlement by Fen Road, south of Poplar Farm (NHLE: 1010000)	A well-preserved example of a small rural settlement within the fenland landscape, dating principally to the second century CE, the site illustrates the characteristic organisation of Roman-period farmsteads in the Fens, including enclosures, yards and paddocks aligned along a drove, reflecting patterns of livestock management and mixed farming adapted to marginal wetland environments. Surviving earthworks and buried remains retain high archaeological value, with the potential to provide important evidence for settlement development, domestic life, agricultural practices and environmental conditions during the Roman occupation. The monument also has enhanced significance as part of a wider, extensive Roman landscape of settlements, droves and field systems recorded through aerial photography in the surrounding area, contributing to understanding regional land use and adaptation strategies. The site is primarily of archaeological interest and would not be physically impacted by the Project.	The asset occupies slightly higher ground within a post-medieval drained agricultural landscape of large open fields and dispersed farmsteads, which differs substantially from its Roman-period setting. Wind turbines are visible at a considerable distance to the north, while the Project lies to the south and would only be perceptible from limited parts of the site where views are not contained by hedgerows. The proposals would not affect the understanding or appreciation of the asset's setting and would result in no impact.	Potential change to setting	High	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Bassingthorpe Manor moated site (NHLE: 1016475)	A well-preserved medieval moated site, representing an important class of monument associated with high-status manorial residence and the expression of wealth and status in the medieval countryside. Its significance lies in the survival of earthworks and waterlogged buried deposits, which have strong potential to preserve structural remains and organic material, providing valuable evidence for medieval domestic life, economy and earlier land use. The site is outside of the draft Order Limits and would not be physically impacted by the Project.	The Manor House and Scheduled Monument have southward views over the existing overhead lines, with the proposed overhead line and towers also visible at distance along the horizon. This would introduce an additional modern element into an existing wire-scape. Although the new line would be located further south than the two existing lines, its larger structures are still likely to be perceptible, resulting in a minor increase in modern visual intervention within the setting. This would be a negligible adverse magnitude of impact.	Potential change to setting	High	Negligible adverse	Negligible adverse
Tower Hill motte castle, Stainby (NHLE: 1019527)	A well-preserved example of an early post-Conquest Norman fortification, representative of a nationally important medieval monuments associated with the establishment of feudal control in England. Surviving earthworks and below-ground archaeology retain strong archaeological interest, with the motte, ditch, and buried structural remains offering insight into the form, construction, and occupation of a defensible manorial centre dating from the 11th to 13th centuries. The site's potential to preserve evidence of pre-motte land use enhances its archaeological importance. Its historical association with the medieval manor of Stainby, recorded in the Domesday Survey and later manorial divisions, contributes to an understanding of the relationship between lordship, settlement, and landscape organisation in the medieval period. The site is outside of the draft Order Limits and would not be physically impacted by the Project.	The asset is situated on the southern edge of Stainby, occupying an elevated position on a north-facing slope that affords views over the historic village and surrounding agricultural landscape. The site is bound to the south by mature trees. Views towards the Project would likely be partially visible to the south and would be additional to existing overhead line transmission in distant views. The Project will result in additional modern elements and wire scape in views from the asset, although this would be in the far distance (approximately 1.8 km) and is not likely to adversely affect the ability to appreciate the asset. Overall there would be a negligible adverse magnitude of impact.	Potential change to setting	High	Negligible adverse	Negligible adverse
Grimsthorpe Castle and north court (NHLE: 1062823) Gardeners Cottage (NHLE: 1166363) 4 garden ornaments on south terrace at Grimsthorpe Castle (NHLE: 1308944) 3 statues east of Grimsthorpe Castle (NHLE: 1360074)	Grimsthorpe Castle and North Court forms the principal element of the **Grimsthorpe Castle** group. The significance of the group is derived from the Castle and closely related ensemble of ancillary buildings, garden structures and landscape features that together illustrate the historic development, function and status of the estate. The Castle itself incorporates medieval remains and successive phases of Tudor, Baroque and later rebuilding, including the monumental early 18th century north façade by Sir John Vanbrugh, reflecting national architectural ambition, aristocratic patronage and long-standing high-status occupation. The associated designated assets, including the stable block, Laundry Cottage (NHLE: 1166357), Gardeners Cottage (NHLE: 1166363) and Grimsthorpe Lodge Cottage (NHLE: 1360099) contribute strongly to an understanding of the estate as a self-contained working	Grimsthorpe Castle and its associated designated assets are set within a rural setting 18 km south of Grantham. The Castle and grounds, including extensive parkland, comprise the grade I listed Registered Park and Garden (NHLE: 1000978). To the north, the park is bound by the A151 with farmland adjacent to western, southern and eastern sides. The group occupies a deliberately designed landscape composed of formal courts and terraces close to the castle, transitioning into more informal parkland, estate yards, avenues and approach routes. This arrangement reflects the evolution of Grimsthorpe as a high-status country house estate, combining ceremonial, domestic, service and agricultural functions within a single, coherent landholding. The castle, set on a ridge running from north-west to south-east through the park, forms the visual and	Potential change to setting	High	Small adverse	**Moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Fountain base in north court of Grimsthorpe (NHLE: 1062824) Conference centre and restaurant (NHLE: 1062825) Stable block (NHLE: 1166342) Laundry Cottage in estate yard (NHLE: 1166357) Garden gate piers on avenue to east drive (NHLE: 1360075) Grimsthorpe Lodge Cottage (NHLE: 1360099) Grimsthorpe Castle (NHLE: 1000978) – registered park and garden	and residential landscape. These buildings illustrate the hierarchy, domestic economy and service functions essential to the operation of a country house and enhance the historic, architectural and artistic interest of the group as a whole. Designed landscape features further reinforce the collective significance of the group. The fountain base in the north court (NHLE: 1062824), garden ornaments on the south terrace (NHLE: 1308944), statues east of the castle and garden (NHLE: 1360074) and gate piers to the east of the drive (NHLE: 1360075) contribute to the aesthetic and ceremonial qualities of the estate, demonstrating the integration of architecture, sculpture and formal landscape design typical of high-status estates from the seventeenth century onwards. Together, these elements enhance important axial views, spaces and approaches, and reinforce the intended grandeur and visual coherence of Grimsthorpe as a landscaped estate.	functional nucleus of the group, with the North Court providing a formal architectural forecourt framed by the principal elevations and features such as the fountain base. To the south and east, terraces, garden ornaments and statues are integrated into formal landscaping that reinforces axial views and enhances the castle's architectural dominance. Lodges, gate piers and approach avenues define key routes into the estate, mediating movement from the wider rural landscape into the designed core. Keys views across the park are towards the Castle, in particular, looking south from the formal north-south approach. The Project may be visible in the view north from the Castle along the formal approach from a distance (just under 2 km). The primacy of the designed landscape as the Castle's' setting would not be affected to such a degree that this affected the significance of the Grimsthorpe Castle group.				
The Manor House (NHLE: 1062860)	The Manor House is a Grade I listed former country house of architectural and historic significance, dating from 1568 and associated with Thomas Coney, a prosperous Tudor merchant, likely on the site of a previous house. Although much reduced from its original extent, it is of importance for the advanced quality and originality of its Elizabethan design. Its significance derives from the survival of high-quality ashlar construction, elaborate crow-stepped gables, distinctive classical chimney stacks, finely detailed mullioned windows and the use of symbolic ornament including Coney's rebus and wool mark. Together with its historic interest for the development of a larger Tudor house, these attributes contribute to its national importance. The site is outside of the draft Order Limits and would not be physically impacted by the Project.	The Manor House sits between the grade I listed St Thomas a Becket's Church to the north with a farmstead group to the south (the eastern most barn is grade II listed). Beyond the farmstead to the south is the remains of a moated site, likely to be the site of the previously existing moated manor house. Further to the south views open out to rolling fieldscape, with existing overhead line and towers visible in the distance. The Project will result in additional modern elements and wire scape in views from the asset, although this would be in the far distance (approximately 1.8 km) and is not likely to adversely affect the ability to appreciate the asset, or to disrupt the important relationship between the Manor House, church and farmstead and fieldscape.	Potential change to setting	High	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Church of All Saints, Dunsby (NHLE: 1165123)	The Grade I listed church is constructed of coursed limestone and ironstone rubble with limestone ashlar dressings, materials typical of high-status medieval buildings in this part of Lincolnshire. The plan comprises a west tower, nave with north and south aisles, south porch, and chancel, illustrating the incremental enlargement of the church over time. The early 14th century west tower is a particularly notable architectural feature, distinguished by its three-stage buttresses with ornate crocketed and finialled gables, carved heads, gargoyles, and battlements. Medieval doorways, including a late 12th-century south doorway and a 13th-century porch doorway, survive and contribute to the building's architectural integrity. The church possesses considerable aesthetic value derived from its balanced proportions, rich stone detailing, and prominent vertical emphasis created by the tower. The survival of medieval decorative elements, including sculpted niches, tracery, and carved capitals, contributes to its architectural richness. The church's materials and form also achieve strong visual harmony with the surrounding village and rural landscape, reinforcing its landmark quality within Dunsby. There would be no physical impact to the church from the Project.	The church lies at the historic core of the Dunsby Conservation Area. Its rural village context, open churchyard, historic built surroundings, and visual prominence within the fen-edge landscape all contribute positively to the understanding, appreciation, and value of the asset. From the churchyard, Haconby Church is visible in views south. It is likely that all, or parts, of up to three towers beyond the tree line would be visible, including when leaf cover is present, given the proximity of the towers and their height. However, this view is limited to a small part of the churchyard on its southern edge. Visibility towards the Project from the church's southern entrance would be screened, and the Project would not be visible in views of the church within the churchyard. The church tower is also not visible in views until relatively close to the village, so presence of towers further south is unlikely to have an impact. Overall, the resulting magnitude of change is considered to be no greater than negligible adverse.	Potential change to setting	High	Negligible adverse	Negligible adverse
Church of St. Mary and All Saints, Kirkby Underwood (NHLE: 1166122)	The church is a Grade I listed building with fabric dating from at least the 11th to 12th centuries. The present church largely reflects phases of Early English and later medieval development, with subsequent alterations and partial rebuilding, including the chancel. The church has remained the spiritual and historic focus of Kirkby Underwood despite the relocation of the village in the 18th century (Ref 9C.3) by the Grimsthorpe Estate, which left the church physically separated from the main settlement. This unusual relationship enhances its historic interest and illustrates significant changes in rural landownership and settlement patterns. The church possesses strong aesthetic value derived from its simple massing, weathered limestone fabric, and prominent tower, which rises above the surrounding countryside. Its isolated position at the end of Church Lane enhances its visual impact, allowing the building to be appreciated in the round and reinforcing its landmark quality within the rural landscape.	The church occupies a slightly elevated and enclosed site, surrounded by its historic churchyard, which forms a distinct and self-contained ecclesiastical enclosure within the wider landscape. The churchyard is enclosed by mature trees which form a strong vegetated boundary, creating a defined and contained setting immediately around the building. This enclosed setting provides a strong visual and physical buffer between the church and surrounding farmland, a clear understanding of the church's historic function as a parish focus and a quiet, contemplative character which contributes to both aesthetic and communal values. Beyond this, the wider setting is predominantly open arable farmland of large, gently rolling agricultural fields characterised by wide, open boundaries, occasional hedgerows, drainage ditches and sporadic trees. Blocks of woodland are visible on the distant horizon to the south-west and north-west, but	Potential change to setting	High	Small adverse	**Moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	Seasonal vegetation within the churchyard further enriches the setting and visual experience of the asset. There would be no physical impact to the church from the Project.	otherwise the setting is notably open and rural in character. The absence of modern or large-scale development in the immediate vicinity allows the church to be appreciated as an isolated rural landmark, a characteristic that is integral to its significance following the loss of its former village context. The Project would be visible in views south from the churchyard. The introduction of new modern components in the landscape, even at a distance, would be a small adverse magnitude of impact.				
Church of St. Andrew, Haconby (NHLE: 1360134)	The church is of high architectural significance, originating in the late 12th century with subsequent early 13th century and 15th century phases of development. It displays features associated with Early English, Decorated and Perpendicular Gothic styles, clearly legible within its fabric. The building is constructed primarily of coursed ironstone rubble with limestone ashlar dressings, under plain tile roofs, contributing to its robust and regionally distinctive character. Particularly notable is the west tower and octagonal spire, dating principally from c.1300 with later medieval embellishment. The spire is richly detailed, incorporating polygonal pinnacles, ornate lucarnes and crocketed gables, making it a dominant visual feature in long-distance views. Other significant architectural elements include the nave with north and south aisles, south porch, chancel and north chapel, together illustrating the church's gradual expansion over the medieval period. Surviving medieval stained glass, together with a probable Norman font, significantly enhances the church's artistic value. There would be no physical impact to the church from the Project.	The church's rural village setting forms a key component of its overall significance. It is slightly set apart from the main body of the village on its southeastern edge, with fields to the south and only the historic manor house immediately north. Mature trees partially enclose the churchyard creating a distinct and intimate enclosure around the building, while beyond this the landscape opens into expansive fields with limited built development in view. The contrast between enclosure and openness enhances the visual prominence of the tower and spire, reinforcing the church's historic role as both a spiritual and visual focus within the wider countryside. Long views across open farmland contribute to the church's aesthetic value and underline the importance of its relationship with the surrounding landscape, as does the view of the spire of the grade I listed Church of St John the Baptist in Morton to the southwest. The Project will not be visible in views towards the church from the village owing to the position of the church. New elements are likely to be visible in views north from the churchyard, however these are unlikely to disrupt the principal contribution made by the setting. There would be a small adverse magnitude of impact.	Potential change to setting	High	Small adverse	**Moderate adverse**
Barn at Glebe Farm (NHLE: 1062311)	Grade II listed agricultural building dating from the early 18th century with 19th century alterations. Constructed in coursed limestone rubble with ashlar dressings and pantile roofing, it is a characteristic example of a rural barn and stable range reflecting traditional agricultural practices and building techniques. Its significance is derived from the survival of historic fabric, evidence of evolving use—including partial conversion for use as a Sunday School—and its group value as part of the historic Glebe Farm complex and the wider village	The barn is one of a small group of listed buildings in Gunby, just north of St Nicholas' Church (NHLE: 1147928) and a cross in its churchyard (NHLE: 1062352). It is in a cluster of historic farm buildings clustered together and facing either internally or to the street (north), away from the Project. Beyond the immediate farmstead, the barn sits within the rural village context of Gunby and Stainby, where historic buildings are interspersed with later development and open spaces. Buildings within the	Potential change to setting	Medium	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	setting, contributing to local character and understanding of the area's agricultural and social history.	group face internally across the farmstead either internally or to the street, facing away from the Project. The surrounding landscape is predominantly agricultural, with fields extending beyond the settlement edge, reinforcing the historic rural character in which the barn was constructed and originally used. The wider setting supports an understanding of the barn as part of a working rural economy associated with glebe land and parish life. Views of the barn are typically localised, experienced in conjunction with nearby buildings rather than as a standalone or landmark structure. As such, its significance is not dependent on long-distance views but on its relationship to the farmstead and village fabric. There would be no impact from the permanent presence of the Project in the landscape to the south. An access route is proposed immediately adjacent to the listed building, along an existing trackway. It is possible that this will result in a temporary construction impact. This will be assessed further at the ES.				
Milestone, 10 yards east of junction with A1 (NHLE: 1062354)	Early 19th century milestone located just east of junction with A1. The listed milestone is located just outside of the draft Order Limits. There would be no physical impact but this will be reassessed at the ES.	The setting of the milestone is intrinsically linked to its roadside location. Road improvements are proposed to facilitate the construction of the Project. It is currently not anticipated that this would alter the setting of the milestone in a way that would have any impact on its value, but this will be reconsidered as part of the ES.	Potential for physical impact and change to setting	Medium	No change	No effect
Haconby Hall (NHLE: 1062713)	The grade II manor house is of architectural and historic significance as a well-preserved rural house originating in the early 17th century, with subsequent phases of alteration reflecting its continued adaptation through the late 18th, 19th and 20th centuries. Its significance derives from the survival of its original T-plan form, coursed limestone construction and Collyweston stone slate roofs, together with characteristic historic detailing such as stone coped gables, mullioned windows and prominent chimney stacks. There would be no physical impact to the asset from the Project.	The agricultural buildings to the south of Hall Road make a positive contribution to the significance of Haconby Hall as part of an historic farmstead, while the surrounding laid out gardens and verdant and tranquil village character beyond allows for an appreciation of the asset within its wider rural context. Situated at the south-western edge of the village, the site occupies low-lying ground, with views to the north largely constrained by hedgerows and later village development. From the north-eastern corner of the Hall's garden, there are longer views eastwards towards St Andrew's Church, visible in the distance beyond the southern edge of the village which comprises postwar dwellings. The established relationship between the Hall, the farmstead, the village and the surrounding fieldscape would not be materially altered by the introduction of additional elements within the view. As such, the Project is likely to result in a negligible magnitude of impact to the	Potential change to setting	Medium	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
		significance of the asset arising from changes to its setting.				
Spa House (NHLE: 1062716)	Spa House remains a legible and representative example of an early 19th century rural farmhouse set within a farm complex. There would be no physical impact to the asset from the Project.	Spa House is situated within an agricultural complex on the eastern side of Hanthorpe Road, in a low-lying and enclosed part of Stainfield. Views southwards towards the Project are limited by the north-facing slope on which the house stands, together with the screening effect of agricultural buildings immediately to its south. The setting of the asset, characterised by its relationship with surrounding farm buildings and uninterrupted views across the open fieldscape to the west and east, would not be affected by the Project.	Potential change to setting	Medium	No change	No effect
Dunsby Hall (NHLE: 1062770) Stable block at Dunsby Hall (NHLE: 1165150) Moated site, Dunsby Hall (MLI125610) Stable block at Dunsby Hall (MLI96234)	The **Dunsby Hall** group comprises the grade II listed Dunsby Hall, the stable block to the east and a non-designated remains of a moated site which encompasses the site, together at the southern end of the Dunsby Conservation Area. Dunsby Hall is an 18th century red brick, largely Georgian farmhouse with later 19th century alterations. The remains of the moated site are visible to the north, south and west of the Hall. There would be no physical impact to the asset from the Project.	The immediate setting is of the group is characterised by open field beyond the Halls' gardens to the south, towards which is faces. A gap in planting along the southern edge of the Hall's gardens allows views across fields to the south. Further to the south established tree planning running east-west provide screening beyond towards the Project. The Project may be visible in views to the south from Dunsby Hall but this is unlikely. Although the key aspects of the setting would not be changed, the presence of new large structures in glimpsed views would be a small adverse magnitude of impact.	Potential change to setting	Medium	Small adverse	Minor adverse
Home Farm House (NHLE: 1062799)	The farmhouse is of architectural and historic interest as a consciously designed early 19th century rural dwelling dated 1837, incorporating reused 17th century fabric that evidences continuity of occupation and building practice on the site. Constructed of coursed limestone rubble with ashlar quoins and dressings, its materials and craftsmanship typify high-quality vernacular building traditions, while the L-plan form and later 19th century alterations illustrate the building's incremental development in response to changing domestic and agricultural needs.	Home Farm is an isolated farmstead with extensive modern agricultural buildings immediately to the east, with further contemporary associated buildings across the farm site. The grade II listed pump (NHLE: 1146759) within the courtyard contributes to the interest of the Farmhouse, reflecting the historic functional relationship between the two. Its wider surrounds comprises arable fields to the north, south and west, with planted woodland to the west. The Farmhouse faces west, with established greenery to the southern boundary of the land adjacent to its western frontage. Its setting contributes to its value as a Victorian farmstead in terms of function and historic interest. The draft Order limits pass through the farmstead, adjacent to the eastern side of the house for construction access to the main overhead line position which is approximately 350 m to the north. As a result, the Project may be clearly visible as new industrial elements within view. This would be a medium adverse magnitude of impact.	Physical impacts during construction/ as a result of traffic – to be assessed at ES Potential change to setting	Medium	Medium adverse	**Moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Round House Farm (NHLE: 1062819)	Partially ruined former folly, later a farmhouse. Built in the late 18th century, possibly designed as a landscape ornament for the Earls of Ancaster. Located within the draft Order Limits approximately 13 m east of the haul road. It is assumed that there would be no physical impact, but this will be reassessed for the ES when more information on construction works will be available.	The building is thought to have been constructed as a landscape ornament for the Earls of Ancaster, who had their seat at **Grimsthorpe Castle**. Although there is no direct intervisibility between the castle and this folly, further setting assessment is required. This will be undertaken in advance of the ES.	Physical impacts during construction/ as a result of traffic – to be assessed at ES Potential change to setting	Medium	No impact	No effect
Bridge on Parish Boundary (NHLE: 1146903)	The bridge is of historic and architectural significance as a late 18th century structure reflecting the evolution of local transport infrastructure, with later enhancement dated 5 August 1824. Its single semi-circular ashlar arch with keystone is characteristic of Georgian bridge design, while the coursed rubble sides illustrate traditional construction methods. The 1824 alterations, comprising ashlar side walls with swept profiles, copings, and hemispherical finials, add a distinct later phase that is clearly legible and commemorated by the inscribed stone panel above the arch. Together, the bridge's form, materials, and dated inscription provide strong architectural interest, illustrating both continuity and change in historic engineering and landscape design across parish boundaries. It would not be physically impacted.	The bridge is situated on Swinstead Road, spanning a small watercourse within a rural agricultural landscape on the boundary between the parishes of Irnham and Swinstead. Its location directly on the parish boundary is fundamental to its historic interest and strongly contributes to its significance, reinforcing its long-standing role as both a physical crossing and an administrative marker within the historic landscape. The surrounding setting is predominantly open and undeveloped, characterised by gently sloping land, watercourse banks, and historic routeways. This rural context allows the bridge to be appreciated as a modest piece of historic infrastructure, where its form, materials, and date inscription are legible within the landscape. The absence of dense modern development preserves important visual and functional relationships between the bridge, the road, and the waterway, reflecting its original purpose and continued use over time. As a boundary structure, the bridge's setting also has historic interest, marking a transition between parishes and reinforcing historic patterns of movement, jurisdiction, and landscape organisation. The bridge is located just over 100 m to the north of draft Order Limits and views south from the asset feature existing overhead line and towers. It is a functional, modest asset- not designed to be a focal point/ landmark. The Project would not detract from its functional quality or relationship with setting although the introduction of new large structures would be a change. This would be a small adverse magnitude of impact.	Temporary effects during construction – to be assessed at ES Potential change to setting	Medium	Small adverse	Minor adverse
Milestone near Norwood Farm (NHLE: 1147109)	Early 19th century milestone in ashlar and cast iron. Although within the draft Order Limits, it has been included to allow for road access during construction. Measures will be put in place to ensure no harm to the milestone in the **Outline Written Scheme of Investigation (OWSI),** which will be included in the ES.	As a milestone, the asset has an important but limited setting relationship with the roadway. This would not be likely to be impacted by the Project.	Potential for physical effects	Medium	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Church of St. Peter (NHLE: 1147921) Old Rectory (NHLE: 1062351)	The Church of St Peter and the Old Rectory form the **Church of St Peter** group. Together they form a coherent ecclesiastical group central to the historic development of Stainby. The church is significant for its architectural and historic interest as a Victorian parish church incorporating earlier medieval fabric, while the Old Rectory reflects the historic role, status and domestic arrangements of the parish clergy. Their close functional and historic relationship gives the assets strong group value, illustrating the operation of the historic parish and the social and ecclesiastical structure of the rural settlement. There would be no physical impact to the assets from the Project.	The Church and Rectory are located on the edge of Stainby, set within an open churchyard that allows clear views of the building from surrounding lanes and the wider village. Their setting is characterised by low-density development, mature trees and adjoining agricultural land, which reinforce its historic function as a rural parish church serving a dispersed farming community. The church tower and spire form a local landmark within the undulating landscape, contributing to its prominence and legibility within the settlement. To its south is the earlier grade II listed Old Rectory. Overall, the rural character, open churchyard and limited surrounding development make a positive contribution to the significance of the asset by sustaining its historical, visual and communal relationships. Views towards the Project to the south may be visible in in the middle distance of possibly designed views from the Old Rectory, resulting in a medium adverse magnitude of impact.	Potential change to setting	Medium	Medium adverse	**Moderate adverse**
Church of St. Nicholas (NHLE: 1147928)	The Church of St Nicholas, Gunby is a Grade II listed parish church of medieval origin, retaining a 15th-century Perpendicular west tower, with the remainder largely rebuilt in 1869 by Richard Coad. Its significance derives from the architectural and historic interest of the surviving medieval fabric, complemented by the high-quality Victorian rebuilding in a Gothic style. The church also has strong historical interest as the principal place of worship within the small rural settlement of Gunby, reflecting continuity of ecclesiastical use and village identity over several centuries. There would be no physical impact to the asset from the Project.	The Church of St Nicholas is located within the small rural hamlet of Gunby, occupying a prominent position along Main Street and set within an open churchyard. Its setting is characterised by a low density of surrounding development, mature trees and adjoining agricultural land, which together reinforce its historic role as a rural parish church. The surviving medieval west tower is visually prominent within the settlement and wider local landscape, contributing to the building's landmark quality and legibility. Overall, the predominantly rural character, limited encroachment and strong visual and functional relationship with the village make a positive contribution to the significance of the asset by sustaining its historic and communal associations. Views south from the church and churchyard are largely screened, with clearer views to the south-east from the eastern boundary where a proposed access route runs adjacent; given existing modern elements within its setting, the magnitude of impact would be negligible and effects from the access would be temporary (further assessment to be included at ES).	Temporary effects during construction – to be assessed at ES. Potential change to setting	Medium	Negligible adverse	Negligible adverse
Dunsby Grange Farmhouse (NHLE: 1165101)	Dunsby Grange Farmhouse is a Grade II listed early 19th century farmhouse, constructed in red brick with slate roofs and later altered during the 20th century. Its significance derives from its architectural interest as a well-preserved example of a post-medieval farmhouse	The farmhouse is located on the edge of the village, set back from Bourne Road within a predominantly rural setting associated with former farmstead buildings and agricultural land. Its setting is characterised by open views across surrounding	Potential change to setting	Medium	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	reflecting agricultural prosperity in the village, and from its historic value as part of a former 19th century farmstead associated with Dunsby's rural economy. The farmhouse contributes to an understanding of the historic development and agrarian character of the village. There would be no physical impact to the assets from the Project.	farmland, boundary vegetation and the presence of modern agricultural sheds, which reflect the ongoing evolution of the farmstead. While later development and modern structures form part of the immediate context, the rural character and historic functional relationship between the farmhouse, the village and the surrounding land continue to make a positive contribution to the asset's significance as a historic agricultural residence. In views south from the asset the landscape falls away beyond the edge of the immediate garden, allowing for the potential of longer-distance views towards the Project. However, the principal setting of the asset remains its relationship with the village and its orientation facing into the village.				
Heath Farmhouse (NHLE: 1165883) Forge, waggon hovel and loose boxes at Heath Farm (NHLE: 1360086)	Heath Farmhouse and the forge together form a coherent historic farmstead group (the **Heath Farm** group) that illustrates agricultural and rural working life in the 18th and 19th centuries. The farmhouse is significant as a rural dwelling reflecting the status and evolution of the farm, while the forge and associated outbuildings provide strong historic interest through their agricultural and service functions, including blacksmithing, horse accommodation and vehicle storage. Their close functional and spatial relationship gives the assets group value, enhancing an understanding of historic farmstead organisation, labour and rural economy.	The farmhouse occupies a relatively remote, rural roadside location, set within a predominantly agricultural landscape associated with the historic Heath Farm complex. Its setting is characterised by open farmland, historic farm buildings and later agricultural structures, reflecting the continued working nature of the site. While the presence of modern farm sheds and the adjacent road introduce contemporary elements, the largely open rural surroundings and retained functional relationship between the farmhouse and surrounding land continue to make a positive contribution to the asset's significance as a historic farmstead residence. The Project would be visible in views to the northwest and southwest given the proximity to the site, introducing modern industrial elements within view. However this would have a limited impact on the contribution made by the asset's current setting. This would be a small magnitude of impact.	Potential change to setting	Medium	Small adverse	Minor adverse
The Old Black Bull (NHLE: 1168232)	The Old Black Bull is significant as a former early-18th century coaching inn that illustrates the historic role of roadside hospitality, travel and social exchange within rural Lincolnshire. Its architectural interest derives from its red brick construction, formal frontage and later 18th and early-19th century alterations, which reflect both its original function and subsequent adaptation. The building retains strong historic interest through its association with historic transport routes and its contribution to the understanding of post-medieval movement, trade and community life in North Witham.	The former coaching inn (now a house), is situated to the east of the A1 within an otherwise rural setting associated with historic agricultural land and farmstead activity. Its immediate surroundings to the east are characterised by open land, boundary planting and associated farm buildings, which together reflect the historic use and evolution of the inn. There is an existing overhead transmission tower on the northern edge of the inn. Although remaining roadside, the asset is severed from its historic context to an extent by the speed and business of the A1 today, which is substantially greater than how it would have been in the 18th century when it began use as a	Potential change to setting	Medium	Small adverse	Minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	There would be no physical impact to the asset from the Project.	coaching inn, which limits the legibility of its historic function. The introduction of the Project would add new large-scale infrastructure, further eroding the historic characteristics of the asset's setting, but would not make the functional historic relationship illegible. This would be a small adverse magnitude of impact.				
Norwood Farmhouse (NHLE: 1360093) Barn at Norwood Farm (NHLE: 1147114)	Norwood Farmhouse and the Barn at Norwood Farm form the **Norwood Farm** group. Together the assets form the core of a historic post-medieval farmstead and derive shared significance through their group value. The farmhouse is significant as a multi-period rural dwelling, while the barn contributes historic interest through its shared agricultural function. Their close physical and functional relationship enhances an understanding of farmstead hierarchy, agricultural practice and rural settlement development, increasing the significance of each asset when assessed as a group. There would be no physical impacts to the assets from the Project.	Norwood Farm situated in a rural setting off Main Road. Despite the presence of modern farm buildings nearby, the setting remains predominantly rural and continues to make a positive contribution to the significance of the group. A proposed access route lies adjacent to the group to the east and the overhead line alignment is approximately 250 m to the north. Views north towards the Project would be changed by the presence of the scheme but this would not result in changes to the setting which would significantly affect the ability to appreciate the asset. There would be a small adverse magnitude of impact.	Potential change to setting	Medium	Small adverse	Minor adverse
Manor House (NHLE: 1360135)	Manor House is significant as a historic rural dwelling that reflects the development of local landownership and domestic life within its parish. Its architectural interest derives from its traditional form, materials and detailing, which contribute to its historic character and legibility as a high-status residence. The building retains historic and architectural interest through its long-standing association with the manorial and agricultural history of the area, and it makes a positive contribution to the understanding of the historic settlement and its evolution. There would be no physical impacts to the asset from the Project.	Manor House is set within a rural village environment that reflects its historic role as a high-status domestic residence associated with local landownership. Its setting is defined by its relationship with surrounding historic buildings, in particular the grade I listed Church of St Andrew, plots and open land, which together preserve the traditional scale and character of the settlement. Despite modern housing development in the village, the immediate setting continues to allow the historic form, function and status of the Manor House to be clearly understood, making a positive contribution to its significance. Views north from the rear of house towards the project will be impacted but will not reduce the ability to understand the significance of the asset.	Potential change to setting	Medium	Negligible adverse	Negligible adverse
Dunsby House (NHLE: 1360143)	Dunsby House is a 19th century grade II listed dwelling that reflects the architectural character and domestic development of the village during the post-medieval period. Its significance derives from its architectural interest and craftsmanship, representative of the period. The building retains historic and architectural interest through its association with a partially extant 19th century farmstead and its contribution to the understanding of historic settlement patterns and rural domestic life within the village.	Dunsby House is sits to the south of the village. Its significance is enhanced by its relationship with adjacent former farmstead elements and open agricultural land beyond. Despite the presence of some later agricultural buildings nearby, the predominantly rural character, low density of development and historic layout of the village allow the form, function and status of the House to be understood, making a positive contribution to its significance.	Potential change to setting	Medium	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	There would be no physical impacts to the asset from the Project.	The House faces south, and views from here towards the project would be changed by the project in middle distant views. However, dense woodland to the south of the House would screen much of this change, resulting in a negligible adverse effect.				
Engine House at Engine Farm (NHLE: 1360161)	Engine House is a 19th century fen drainage engine house, importantly illustrating the technological and agricultural transformation of the Lincolnshire fens. Constructed of brick with slate roofs, the building displays clear functional design with later 19th and early 20th century alterations reflecting its continued use and adaptation. Its intact internal diesel engine further enhances its historic and architectural interest, providing tangible evidence of the evolution of rural draining technology and the management of reclaimed fenland landscapes.	The Engine House stands to the west of the farmhouse at Engine Farm, historically forming part of a coherent functional grouping associated with agricultural improvement and land reclamation. The wider network of drains and fields contributes positively to an understanding of 19th and 20th century fenland management. The open fieldscape, interwoven with drains, and lack of significant modern development results in keys aspects of its historic character and function remaining legible within the landscape, and allows the engine house to be appreciated as an isolated utilitarian structure, reading clearly against the low-lying fenland topography. Views towards the project to the north would be changed by the presence of new overhead line and towers, however this would not impact the contribution made by its setting which is based on historic functional relationships.	Potential change to setting	Medium	No change	No effect
Old Rectory (NHLE: 1360329)	The Old Rectory is a former clerical residence, reflecting the historic social and ecclesiastical importance of the Church (the grade I listed St Mary's Church) within the village.	Its set back position from Rectory Lane and enclosure within its own grounds contribute to its legibility as a former rectory, reinforcing historic patterns of hierarchy and status within the village. Views of and from the building are largely localised, with boundary treatments and vegetation mediating its relationship with neighbouring properties and the street. Views south across the fieldscape towards the Project would be altered by the presence of the new overhead lines and towers, however this would result in a small change given the extent of visual screening afforded by established greenery and hedgerows.	Potential change to setting	Medium	Negligible adverse	Negligible adverse
Morton Conservation Area	The Morton Conservation Area is significant for its well-preserved historic village character, reflecting the organic development of a rural settlement on the fen edge. Its special interest derives from the survival of a historic street pattern, traditional plot layout and a concentration of vernacular buildings in characteristic local materials, set within a landscape that transitions from the Kesteven Uplands to the Lincolnshire Fens, giving the area a strong sense of place and rural identity.	The Morton Conservation Area is set within a rural fen-edge landscape that has strongly influenced its historic form and character, with the village occupying slightly higher ground between the Kesteven Uplands and the Lincolnshire Fens. The surrounding open agricultural land, long views eastwards across the fenland, and the clear distinction between the historic village core and later development reinforce its edge-of-settlement character. Within the conservation area, the compact historic street pattern, mature trees, hedgerows and traditional plot boundaries create a	Potential change to setting	Medium	Small adverse	Minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
		strong sense of enclosure, while outward views to the countryside remain important. This largely intact setting enables an understanding of Morton's historic development and rural function and makes a clear and positive contribution to the significance, character and appearance of the conservation area. Key views are identified as being predominantly east-west along thoroughfares. One key view is identified as facing north from outside the southern boundary towards Manor Farm. The presence of the Project from views within or outside of the conservation area are not likely to detract from the contribution made by the existing setting.				
South Witham Conservation Area	The South Witham Conservation Area derives its significance from its strong historic character as a rural Lincolnshire village, its well-preserved medieval core, and the consistency of its traditional built form and materials. The area retains a legible historic settlement pattern, centred on the church, green, and principal historic routes, giving it a coherent and distinctive sense of place.	The Conservation Area maintains a strong and direct relationship with its surrounding landscape. Open fields at the village edges allow the historic core to be read as a discrete settlement, with gradual transitions between built form and countryside. Views from the edges of the village towards open farmland reinforce the rural character and historic agricultural associations of the area. Conversely, glimpsed views of the village—particularly the church tower and roofscape—across surrounding fields contribute to the wider appreciation of the Conservation Area in the landscape. Key views within the Conservation Area are directed along historic streets and lanes, often terminating in prominent buildings such as the parish church or groups of historic dwellings. These internal views are complemented by outward views towards the countryside, which provide visual relief and contextualise the village within its agricultural setting. The ability to experience these views, both into and out of the Conservation Area, enhances the understanding of its historic layout and contributes positively to its setting. Views out of the conservation area, including a key view northeast away from the conservation area on the northern boundary edge, may change sightly due to the presence of the Project, however this would not diminish the contribution made by the existing setting.	Potential change to setting	Medium	No effect	No effect
Burton-le-Coggles Conservation Area	Burton-le-Coggles Conservation Area is a small rural village whose character and appearance reflect its historic development, architectural cohesion, and close relationship with the surrounding agricultural landscape. Its significance is principally derived from its historic settlement pattern, its surviving vernacular	The Conservation Area is situated within a predominantly rural landscape characterised by open arable farmland, hedgerows, and gently rolling topography. This agricultural context provides a clear visual and spatial separation from other settlements	Potential temporary impacts during construction	Medium	Small adverse	Minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	buildings and materials and its tranquil rural setting. Buildings are arranged loosely along historic routes, with spaces between structures allowing views, glimpses of greenery, and visual connections to the surrounding countryside. Boundary walls, hedgerows and mature trees further shape the streetscape, reinforcing enclosure.	and emphasises the small scale and historic function of the village as a discrete rural community. Views out from the conservation area south towards the Project would experience change, with overhead lines and towers in close range view. However, from the majority of the conservation area, views are screened by the topography and the buildings in the village. As a result, the change in the setting would be a small adverse magnitude of impact. A proposed access track to the south of the conservation area along Back Lane may also result in temporary adverse impacts. This will be considered further in the ES.	Potential change to setting			
Dunsby Conservation Area	Dunsby is a small rural village, whose character and appearance reflect its medieval origins and long-standing agricultural associations. The Conservation Area encompasses the historic core of the settlement, where the form, layout and fabric of the village illustrate its organic development over time.	The asset's significance is enhanced by its relationship with the surrounding rural landscape, which frames the village and reinforces its agricultural origins and historic function. This setting allows the Conservation Area to be experienced as a discrete and coherent historic environment. Views out from the conservation area south towards the Project would experience change, with overhead lines and towers in medium range view. This would result in a small effect.	Potential change to setting	Medium	Small adverse	Minor adverse
Romano-British building and finds, west of the Car Dyke (MLI33107-8) Probable Romano-British settlement site, Dunsby (MLI34391) Romano-British settlement site, Dunsby (MLI34397-8) Romano-British settlement site, Rippingale (MLI86054)	**Romano-British site grouping south of Dunsby and Rippingdale**. Several sites identified from artefact scatters indicative of Romano-British settlement and buildings. These are located outside of the draft Order Limits and would not be physically impacted.	This group of assets is located north of the proposed overhead line in a landscape with several known groupings of Romano-British sites to the south. It is reasonable to assume that these sites formed part of a shared cultural landscape on the fen edge. The presence of the proposed overhead line in the landscape would visually sever these relationships. Although changes to the setting of buried archaeological sites only affect a small part of their interest, which is primarily archaeological, this would be a small adverse magnitude of impact.	Potential change to setting	Low to medium	Small	Minor adverse
Possible priory at Haconby (MLI33133)	Single potential unreliable documentary source describes priory at this location with a farmhouse built from its remains. Medium to high value derived from historic and archaeological interest. No physical impact.	Outside of the draft Order Limits and partially within ZTV. Located on the south side of the village of Haconby, which screens views towards the Project. Although there may be some visibility of the overhead line and towers, these would be seen in the context of the post-medieval and modern buildings north of the	Potential change to setting	Medium to high	Negligible	Minor adverse or negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
		Priory, which are substantially different from the original historic context of a priory.				
Bronze Age settlement(?) site, Dunsby (MLI34387)	Probable site of a bronze age settlement indicated by a faint soil mark. The site is part of group of Bronze Age-Romano era sites between Dunsby and Haconby with which it may have shared a degree of intervisibility. It is of low to medium value, derived from its archaeological and historic interest. The asset would not be physically impacted.	Close to the boundary but outside of draft Order Limits.	Potential change to setting	Low to medium	Small	Minor adverse
Romano-British settlement site, Dunsby (MLI34400-5) Iron Age pottery from a Romano-British settlement site, Dunsby (MLI34685) Romano-British settlement and saltern remains (MLI33116)	The **Romano-British site grouping east of Dunsby**. Indicated by soil marks and surface finds of pottery, tile, fired clay and bone, the settlement is characterised by a cluster of small ditched enclosures with visible as cropmarks. 2nd - 4th century pottery found concentrated on areas of darker soil along low ridges north of the main stream and on both flanks of its minor northern tributary.	Proposed access routes cross the site of possible Romano-British settlement activity.	Potential physical impact	Medium	Small	Minor adverse
Possible Romano-British Settlement Site, Haconby (MLI34423) Prehistoric finds from a Romano-British settlement site, Haconby (MLI34424) Romano-British settlement site, Haconby (MLI34428)	A possible Romano-British settlement site located to the east of Haconby forming the **Romano-British site grouping east of Haconby.** Cropmark enclosures, field systems, and a possible trackway are visible in aerial photographs. The site was also recorded as part of the Fenland Project. Fieldwalking found pottery, rubble, fired clay, sparse quern and tile fragments. Prehistoric finds from this site include some flints and three sherds of iron age pottery. It is of medium value, derived from its archaeological and historic interest.	Proposed access routes cross the site of possible Romano-British settlement activity.	Potential physical impact	Medium	Small	Minor adverse
Pillbox, Corby Glen. (MLI34951)	A second world war Type 22 concrete pillbox built for the defence of a nearby railway line at Corby Glen. Located on a field boundary to the south of Manor Road, it is of low value, derived from its historic and architectural value.	The asset lies within draft Order Limits. There is a potential for physical impacts but it is unlikely to be removed.	Potential physical impact	Low	No change	No effect
Avro Lancaster aircraft crash site, Swayfield (MLI89212)	Site of world war two crash of aircraft based at RAF Donham Market in Norfolk. It is of high value derived from its historic, archaeological and communal interest.	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project to south of the site. To be considered for assessment but evidence suggests it will not be impacted.	Potential physical impact	High	No change	No effect
Hacconby Hall Park (MLI98390)	A historic park is recorded on the first edition Ordnance Survey map at Hacconby Hall. It is not present on the second edition	Historic parkland identified from 1st edition Ordnance Survey mapping. Outside of the draft Order Limits. Partially in ZTV. Dense hedge planted around current boundary limiting views but some potential for impact.	Potential change to setting	Low	Small	Negligible

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	Ordnance Survey map. The low value is derived from its historic and archaeological value and its association with Hacconby Hall Farm (MLI125135).					
Parkland associated with Bulby Hall, Irnham (MLI98393)	Park surrounding Bulby Hall recorded on the first and second edition Ordnance Survey maps. Of medium value deriving from its historic association with Bulby Hall (NHLE: 1062802).	Parkland associated with listed Bulby Hall (NHLE: 1062802). Outside of draft Order Limits and ZTV indicates limited potential for views.	Potential change to setting	Medium	Small	Minor adverse
Ridge and furrow, Corby Glen (MLI84057)	Ridge and furrow earthworks surviving in fields south of Corby Glen, identifiable on LiDAR imagery. Ridge and furrow has associative historic interest as part of the historic landscape, aiding in the legibility of earlier settlements and medieval/early post-medieval field systems. On an individual level, a fragment of ridge and furrow has limited value but large, well-preserved areas are important and are vulnerable to loss from a combination of development and modern agriculture. There are three towers currently proposed within the fields which make up this area of ridge and furrow. These would be linked by a haul road. Together, these permanent and temporary works would potentially remove the earthworks across approximately 10-15% of the area. While it may be possible to minimise this through use of track matting, a worst-case assumption of medium adverse is made, based on the fact that the earthworks would remain legible.	The ridge and furrow is a part of the historic landscape and does not have a setting in its own right, although it may contribute to the value of other assets as part of their setting.	Potential for physical impact	Low	Medium adverse	Minor adverse
Cropmark enclosure, Corby Glen (MLI84059)	Cropmark enclosure of low value suggesting evidence of previous settlement. The southern part of the cropmark is within the draft Order Limits, but no temporary or permanent works are currently proposed that would physically impact the remains.	Buried remains are unlikely to have a setting sensitive to change from the Project.	Potential for physical impact	Low	No impact	No effect
Ridge and furrow, Corby Glen (MLI84063)	Late medieval earthwork ridge and furrow, destroyed through modern ploughing, of negligible value. The haul road would pass through this area, potentially locally removing buried traces of the earthworks. This would be no worse than a small magnitude of impact, as only a part of the area would be affected.	Within draft Order Limits. The value of the traces of ridge and furrow is unlikely to be sensitive to change from the Project. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.	Potential for physical impact Potential change to setting	Negligible	Small adverse	Negligible adverse
Unnamed farmstead, Corby Glen (MLI116691)	Redeveloped 19th century farmstead shown on the 1st edition Ordnance Survey map and still extant. It is of architectural interest as a characteristic part of the local vernacular and has some historic interest through illustration of the introduction of large, isolated farmsteads as part of the drainage and agricultural	The setting of this post-medieval farmstead is likely to contribute to its significance through the functional historic relationship between farmstead and surrounding farmland. The extensive development of the fields to the west of the farmstead as a result of WMEL-A, as well as the multiple towers and gantries required to connect it to the north and south, mean	Potential for physical impact –within WMEL-A but in railway offset so no change	Low	Medium adverse	Minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	intensification in the area in the 18th and 19th centuries. Although located within the draft Order Limits for WMEL-A, the building is within the offset required from the railway line so no development is proposed which would physically impact it.	that there would be an interruption in legibility of the farmstead and of its historic agricultural setting. This would be a medium adverse magnitude of impact, reflecting the substantial change to its setting whilst retaining the physical buildings.				
Undated cropmarks, Dunsby (MLI1331278)	Cropmarks of enclosures, field boundaries and other linear features of unknown date, identified in aerial photographs. Buried remains of these features would be of archaeological interest. Likely to be of local importance unless further complex archaeological remains are found in association with these features. Almost the entire archaeological site is located within the draft Order Limits, with a tower proposed within it and the haul road crossing it. At worst, there would be a medium adverse magnitude of impact, as a result of the partial area of the site affected.	The value/significance of any buried remains is unlikely to be impacted by changes to their setting from the Project.	Potential for physical impact	Low	Medium adverse	Minor adverse
King Street Roman Road (MLI33097)	Roman road from Bourne to Ermine Street (Roman road now followed by the A1) at Ancaster. There is clear evidence for the road where it is crossed by the draft Order Limits, which is important as the alignment of Roman roads is often a mixture of evidence and conjecture. Historic England's aerial mapping dataset show that the road has been identified immediately south of the draft Order Limits from historic aerial photographs, and a continuation of this alignment through the draft Order Limits can be seen on Google Earth imagery (dated 1.1.2000). The proposed overhead line crosses the alignment of the Roman Road, with a haul route to the north. The only physical impact would be the haul route, as the two adjacent towers are on either side of it. As only a very small part of the Roman road would be within the draft Order Limits, any removal of archaeological remains would be a small magnitude of impact.	The buried and earthwork remains of the road link with other Roman sites in the vicinity, and are also understood in a specific topographical context, as the Roman engineers worked with the natural landform when surveying routes. These elements of the road's setting contribute to its value, but are not sensitive to change from the Project.	Potential for physical impact. Not at a tower location. However, even if the whole of the road within the draft Order Limits is removed, only a very small section of the road would be impacted	Low - Medium	Small	Negligible - Minor
Saltern material (MLI33127)	An artefact scatter of saltern material (uncertain date) was identified along a slight depression. This potentially indicates evidence of below ground archaeological remains of a saltern, which would have archaeological interest. The relative importance of the site would depend on the level of survival and character of the remains. Although just beyond the draft Order Limits, this is included as there is the potential for archaeological remains associated with the artefact scatter to continue	The buried remains of a saltern would have a setting of its context within the historic environment, particularly any physical relationships to paleochannels and/or nearby contemporary settlement. However, these aspects of the receptor's setting would not be sensitive to change from the project as those elements would still be legible.	Potential for physical impact	Low-medium	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	beyond the ploughzone artefacts. There would be no change at the current stage in the design.					
Square pillow mound, Edenham (MLI33647)	Earthwork, suggested to post-date system of plough lands which it is placed onto, but it could be medieval or post-medieval. The earthwork is assumed to have archaeological interest for the evidence of its origins, but the trees planted on it mean that preservation conditions are likely to be low. Immediately outside of the draft Order Limits so there would be no physical impact, although geophysical survey and additional aerial photograph and LiDAR analysis will confirm if any of the earthworks continue into the draft Order Limits.	Pillow mounds were created as rabbit warrens. Extant earthworks form part of the historic landscape but do not have a setting sensitive to change from the Project, as they are functional structures.	Potential for physical impact but just outside of draft Order Limits	Low-medium	No change	No effect
Deserted Medieval Village of Southorpe (MLI33649)	Potential location for the village of Southorpe, identified from documentary sources. Initial analysis of aerial imagery, lidar and historic mapping suggests this location may not be correct. This will need to be confirmed through archaeological investigation, but an initial 'negligible' value will be assigned for the DES. One tower is proposed within the area of the possible DMV, with a haul road to the north and access along an existing trackway from the south. This would be a small adverse magnitude of impact.	The value/significance of buried remains of a deserted medieval village, if present at this location, are unlikely to be sensitive to change from the Project.	Potential for physical impact	Negligible	Small adverse	Negligible adverse
Deserted Medieval Village of Elsthorpe/Southorpe (MLI33654)	Site of a deserted medieval village, potentially Southorpe which is attested to in documentary sources, although there is a separate suggested location (MLI33649). Unlike the other location, however, there is evidence of earthworks at this site, including a sunken road, building platforms and fishponds. Almost all of this site is within the draft Order Limits. A tower would be located in the northern part of the polygon although this is within the Holloway which overlaps so is not assessed directly to avoid double counting (MLE33654). The haul road would cross the centre of the earthwork features. Although it may be possible to reduce the potential impact of this by using track matting, a worst-case assessment of medium adverse magnitude of impact is made at this stage.	The value/significance of buried and earthwork remains of the deserted medieval village are unlikely to be sensitive to change from the Project.	Potential for physical impact. Current proposal has been designed to minimise impact	Medium to high	Medium adverse	**Major or moderate adverse**
Romano-British pottery and ironworking, Corby Glen (MLI33710)	Two records of artefact scatters in the same location, grouped for assessment of impact as they would be evidence of the same potential buried remains. The first record is of a concentration or iron slag, associated with a 3rd – 4th century CE bowl and baked	The buried remains of a Roman or post-medieval ironworking site would have a setting of its context within the historic environment, but the value/significance of the remains is unlikely to be sensitive to change from the Project as these inter-relationships would still be legible.	Potential for physical impact. Only partially within the draft Order Limits	Low- medium	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Iron cauldron and ironworking site found, Corby Glen (MLI33711)	clay furnace lining. Identified a possible iron smelting site. The second is of baked clay furnace lining and slag, as well as a likely post-medieval iron cauldron. It is unclear from the combination of ironworking and artefacts whether there are likely remains of a Roman or post-medieval ironworking site. Either would have the potential to be of archaeological interest, depending on the survival and character of the remains. A small part of this area is included within the draft Order Limits to allow connection to the proposed overhead line alignment using an existing trackway. On this basis, there would be no impact to any buried remains associated with the findspots.					
Romano-British settlement, Dunsby (MLI34394) Romano-British saltern site, Dunsby (MLI34395)	Two adjacent record points for artefact scatters. The first is associated with a faint soilmark and includes Romano-British pottery sherds on the edge of a major roddon, which may have been a contemporary watercourse. The second is an abundant spread of briquetage and a small number of Romano-British pottery sherds. Interpreted as a saltern. The two artefact scatters have been grouped as they likely indicate the presence of a single area of buried remains of Roman date on the banks of a roddon. There are also several further scatters indicative of Romano-British settlement to the north (MLI34396-8). Buried remains would be of archaeological interest. The two record points are within the draft Order Limits to the south of a proposed tower. Although the extent of the scatters is not known, it is likely that only part of the areas would be impacted, which would be a medium adverse magnitude of impact as a worst case.	The buried remains of a saltern would have a setting of its context within the historic environment, particularly any physical relationships to paleochannels and/or nearby contemporary settlement, but the value/significance of the remains are unlikely to be sensitive to change from the Project as these elements would still be legible	Potential for physical impact	Medium - high	Medium adverse	**Major or moderate adverse**
Romano-British saltern site, Dunsby (MLI34399)	Earthwork mound on the higher part of a roddon, with abundant briquetage and some Romano-British pottery and animal bone. Interpreted as a saltern. The earthwork and any associated buried remains are of archaeological interest. Although within the draft Order Limits, there are no permanent or temporary works currently proposed that would have a physical impact on this feature.	The buried remains of a saltern would have a setting of its context within the historic environment, particularly any physical relationships to paleochannels and/or nearby contemporary settlement but the value/significance of the remains are unlikely to be sensitive to change from the Project as these elements would still be legible	Potential for physical impact	Medium - high	No change	No effect
Romano-British settlement site, Haconby (MLI34426)	Two artefact scatters of Romano-British material on the west side of the Car Dyke (MLI60706). Both scatters included a dark soilmark associated with surface finds of pottery, quern fragments, tile, fired clay	The buried remains of a Romano-British settlement would have a setting of its context within the historic environment, particularly any physical relationships to paleochannels and/or nearby contemporary settlement	Potential for physical impact	Medium - high	Small adverse	**Minor or moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Romano-British settlement site, Haconby (MLI34427)	and rubble. Likely to indicate buried remains of a Romano-British settlement site. Only one of the scatters is within the draft Order Limits, but it is possible that buried remains associated with the artefact scatter extend beyond the central point. There would not be any physical impact from towers or haul road, but a worst-case of small adverse magnitude of impact is included to allow for greater footprint of work.	but the value/significance of the remains are unlikely to be sensitive to change from the Project as these elements would still be legible				
Probable Iron Age Salt Work Site, Haconby (MLI34430) Prehistoric settlement/saltworking site, Haconby (MLI34432) Iron Age(?) saltern site, Haconby (MLI34433)	Probable Iron Age salt working site identified from cropmarks and was then targeted for fieldwalking which found pottery, briquetage, burnt stone, animal bone, oyster shells and stone rubble. Pottery dating between 250 BCE - 150 BCE was found indicating a potential Iron Age date. Two adjacent points close to this (MLI34432-3) include further evidence of Iron Age salt working, although these are beyond the draft Order Limits. The area of the possible Iron Age site is almost entirely within the draft Order Limits, with a tower proposed in its south-western part and a small part within the haul road. At worst, the magnitude of impact is likely to be medium, reflecting the partial area of physical impacts.	The buried remains of a saltern would have a setting of its context within the historic environment, particularly any physical relationships to paleochannels and/or nearby contemporary settlement but the value/significance of the remains are unlikely to be sensitive to change from the Project as these elements would still be legible	Potential for physical impact	Medium - high	Medium adverse	**Major or moderate adverse**
Iron Age settlement at Stainfield (MLI34920) Romano British pottery found at Stainfield (MLI33118)	Evidence of an Iron Age settlement established before the Roman era ‘King’s Road’, which crosses this site. Features including parts of an Iron Age field system and a storage pit were found during the construction of a gas pipeline. Further archaeological remains of this settlement would be of archaeological interest. There is also a record of Romano British pottery to the south, just on the edge of the draft Order Limits (MLI33118). Although these artefact scatters are within the draft Order Limits, there are no permanent or temporary works proposed immediately adjacent to the scatter. At this stage, no impacts have been identified, but further evidence from geophysics and trial trenching will inform the assessment in the ES. overhead line	The buried remains of an Iron Age settlement would have a setting of its context within the historic environment, particularly any nearby contemporary settlements as well as field system ditches and enclosures but the value/significance of the remains are unlikely to be sensitive to change from the Project as these elements would still be legible	Potential for physical impact	Medium - high	No change	No effect
Cropmark ring ditch (MLI34734)	Cropmark ring ditch, identified from aerial photographs and interpreted in the HER as being possibly Bronze Age in date. This would indicate that it is a potential barrow (burial mound), which would make it of substantial archaeological interest. It is within the draft Order Limits to allow for drainage during construction. While it is understood that it will be possible to design around it, at this stage it is assumed that it would be	A cropmark ring ditch is an indication of buried remains, possibly of a Bronze Age barrow. If it is a barrow, it is likely that its setting would contribute to its value, as barrows are typically located carefully in the landscape and it may have been intervisible with contemporary sites. It is located on a slope above a watercourse, not an uncommon location for barrows. Although its setting is likely to be sensitive, the	Potential for physical impact	Medium - high	Large adverse	**Major or moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	partially or fully removed by construction. As a worst case this is assessed as large adverse magnitude of impact.	Project's permanent elements are over 1km to the south and west and are unlikely to result in a significant adverse effect.				
Pillbox, North Witham Road, North Witham (MLI34950)	Second World War pillbox, located on the east side of North Witham Road. While within the draft Order Limits and directly beneath the proposed overhead line, it is not likely that there would be any physical impact. There would be a scaffold location immediately north and an access line to it immediately east, but this would be located in the field on the other side of the hedgerow to the pillbox.	As defensive structures, pillboxes have a setting which is essential to how they are understood. This example appears to guard the road, and it has views out in all directions. Despite this, the introduction of new overhead line into the setting would not change the way the setting contributes to the value/significance of the receptor.	Potential for physical impact. Assumed that it will be avoided as an extant structure	Low	No change	No effect
Ermine Street, North and South Kesteven (MLI60638)	Section of Roman road now followed by the A1 at this location. While remains of the road will likely have been removed by later development of the road in many places, there have been examples of the road surviving slightly away from the modern road, including metalling and road side ditches. Any surviving remains of the road would be of archaeological interest. The proposed overhead line would pass above the A1, with scaffold locations on either side. On this basis, it is not anticipated there would be any impact to remains of the Roman road, if present, although further survey may identify remains surviving offline from the modern road.	Any surviving remains of the road link are associated with Roman sites along its course, and would be understood in a specific topographical context, as the Roman engineers worked with the natural landform when surveying routes. These elements of the road's setting contribute to its value but would not be altered by the Project.	Potential for physical impact. Only partially within the draft Order Limits. overhead line crosses overhead.	Low- medium	No change	No effect
Car Dyke in Lincolnshire (MLI60706)	Roman artificial watercourse, possibly used as a canal in places but mostly not navigable. It was likely primarily used to drain the fen edge. While there are surviving sections which retain Roman components, much of the route has been incorporated into modern drainage system, meaning that archaeological survival is likely to be limited within the draft Order Limits. The proposed overhead line would pass above the line of the Car Dyke, with a haul road crossing it to the south of the alignment. There may be small scale impacts from temporary water crossings.	The Car Dyke is part of an extensive network of historic drainage channels which spread across the fens. The interrelationships between these features and the surrounding agricultural land, features such as salterns and the medieval villages contribute to how it is understood. However, these aspects of its setting would not be altered by the Project.	Potential for physical impact. Only partially within the draft Order Limits	Low- medium	Small adverse	Negligible – minor adverse
RAF North Witham (MLI82379)	Second World War airbase, dating between 1942-1956. Concrete runways, earthen banks of bomb stores and concrete foundations of other buildings have all been recorded and there are likely to be further extant or buried remains. The airbase is of historic interest for its part in the Second World War, including personal stories and regiment histories. Depending on character and survival of buried remains, there may also be archaeological interest. An extremely small amount of the former RAF airbase is within the draft Order Limits. It is unlikely that there	The airfield will have a functional relationship with its setting which would not be changed by the Project.	Potential for physical impact. Only a very small part of the airfield is within the draft Order Limits	Low	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	would be any impact but a negligible adverse magnitude included as worst case at DES.					
Ridge and furrow earthworks, south of Black Bull Farm (MLI82395)	Ridge and furrow earthworks, south of Black Bull Farm. Current LiDAR suggests this has now been ploughed out, although it may still be possible to identify traces below ground. These traces have little archaeological or historical value as they are no longer a legible part of the historic environment, and the aerial photographs survive as a record. Little of the area of former ridge and furrow is within the draft Order Limits. The overhead line would pass above part of the area, and the haul road would cross the south-eastern corner of it.The potential magnitude of impact would, therefore, be negligible.	The value/significance of ploughed out traces of ridge and furrow is unlikely to be sensitive to change from the Project	Potential for physical impact. Only partially within the draft Order Limits	Negligible	Negligible adverse	Negligible adverse
Ridge and furrow earthworks to the west of Black Bull Farm (MLI82396)	Ridge and furrow earthworks recorded to west of the Black Bull Farm in aerial photographs from 1971. Current LiDAR suggests this has now been ploughed out, although it may still be possible to identify traces below ground. These traces have little archaeological or historical value as they are no longer a legible part of the historic environment, and the aerial photographs survive as a record. Little of the area of former ridge and furrow is within the draft Order Limits, with a scaffold to support the overhead line at its eastern edge. The potential magnitude of impact would, therefore, be small.	The value/significance of ploughed out traces of ridge and furrow is unlikely to be sensitive to change from the Project	Potential for physical impact. Only partially within the draft Order Limits	Negligible	Small adverse	Negligible adverse
Cropmark and earthwork hollow way, Edenham (MLI84041)	Cropmark of a Holloway, connecting to the earthwork remains of deserted medieval village MLI33654. The remains of the Holloway would have associative archaeological and historic interest as part of a group with the village, as well as the potential for buried remains of the historic trackway. The proposed overhead line would cross above the Holloway, with a tower located within it. The construction of the tower would result in localised removal of earthwork and buried remains, but the feature would remain legible. This would be a small adverse magnitude of impact.	The Holloway has a functional relationship with the deserted medieval village which contributes to its value as a part of its setting but the value/significance of the remains are unlikely to be sensitive to change from the Project as this inter-relationship would still be legible	Potential for physical impact. Partially within the draft Order Limits	Low	Small adverse	Negligible adverse
Possible Bronze Age round barrow, Elsthorpe Grange, Edenham (MLI84042)	The possible round barrow is not visible on LiDAR, indicating that any archaeological evidence would be below ground remains. These would have archaeological interest. Although within the draft Order Limits, the design evolution has meant that the design avoids physical impacts to the site of the possible barrow, with towers	Barrows are burial monuments and are typically thought to have a close relationship with their setting, including their location in the landscape (e.g. close to rivers or on higher ground), have key views, and/or have intervisibility with other barrows. As this site is not confirmed, it is not possible to comment on the contribution made by its setting, but it can be assumed	Potential for physical impact but avoided through design Possible impact resulting from	High	Medium adverse	**Major adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	and the haul road located to the south. There would, therefore, be no change.	to make a positive contribution should archaeological remains be present. A possible medium adverse magnitude of impact included at DES, pending further survey.	change to setting, pending further survey			
Possible unknown Prehistoric cropmark boundary, Haconby (MLI88496)	Linear feature identified from aerial imagery, possibly a boundary ditch of unknown date. Buried remains would be of archaeological interest. The proposed overhead line would pass above the cropmark and there is a scaffold proposed which would potentially truncate a small area of the possible ditch. Given the small part of the cropmark potentially impacted (less than 5%), this is assessed as a small adverse magnitude of impact.	The value/significance of buried remains of a boundary ditch are unlikely to have a setting sensitive to change from the Project.	Potential for physical impact. Only partially within the draft Order Limits	Low	Small adverse	Negligible adverse
Probable searchlight battery, Corby Glen (MLI88633)	Cropmarks and earthworks of a Second World War battery and gun emplacement. No evidence of structural remains above ground level so remains likely to be limited to foundations. These have limited archaeological interest but do have historical interest as part of the landscape of defence relating to the Second World War. While within the draft Order Limits, this appears to only be included to allow use of an existing trackway for access. As a result, a worst-case assessment of small adverse magnitude of impact has been made.	Buried remains of searchlight footings would not have a setting sensitive to change from the Project.	Potential for physical impact	Low	Small adverse	Negligible adverse
Birkholme Lodge park, Birkholme (MLI92382) Birkholme Manor (Birkholme House), Corby Glen (MLI116709)	Small park around Birkholme Manor (MLI16709) including gardens and paths, planted woodland and ponds shown on the 1st and 2nd edition Ordnance Survey maps. The main building is a 19th century farmhouse, although there has been greater than 50% loss of traditional buildings and the older elements are surrounded by large 20th century agricultural buildings. The parkland, particularly in combination with the 19th century farmstead, have some historic and architectural interest as a group, representing an example of a locally wealthy residence with evidence of at least some element of design in the landscape around the house. Aerial imagery indicates the surviving elements include a formal garden to the south of the house, mature garden trees, and a plantation belt of woodland to the north of the house. The farmstead, Birkholme Manor, which is the principal building, is located outside of the draft Order Limits and would not be physically impacted.	The setting of this small park is formed by the surrounding agricultural land. It is possible that there are designed views that contribute to the architectural and artistic interest of the principal building. Birkholme Manor is private so was not directly assessed as part of the setting assessment, but it is assumed from aerial imagery that views northwards are not a specific contributing factor to its value, as the plantation belt of woodland would screen views in that direction. The woodland would also limit views of the Project, although it would likely be visible, especially to the east and west. The closest towers would be approximately 450 m north and screened by trees. This would be no worse than small adverse magnitude of impact due to the presence of new infrastructure, but this is a worst-case assessment.	Potential for physical impact Potential for change to the setting of the principal building	Low	Small adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	Although within the draft Order Limits, no temporary or physical works are proposed. No impacts are anticipated at this stage.					
Ring ditch about 600m north-east of Haconby village (MLI97701)	Probable ring ditch identified from a 1946 aerial photograph and visible on recent Google Earth imagery (Imagery date: 7.31.2020). Buried remains of a round barrow, which is suggested by the HER as the most likely identification, would be of archaeological interest, providing evidence of Bronze Age ritual and commemoration along the fen margins. Although within the draft Order Limits, the design avoids direct impact, with towers located on either side of the possible barrow, and the haul road to the north. It is assumed there would be no impact.	Barrows are burial monuments and are typically thought to have a close relationship with their setting, including their location in the landscape (e.g. close to rivers or on higher ground), have key views, and/or have intervisibility with other barrows. As this site is not confirmed, it is not possible to comment on the contribution made by its setting, but it can be assumed to make a positive contribution should archaeological remains be present. Currently assessed as medium magnitude of impact, but could be increased or decreased on the basis of survey at ES.	Potential for physical impact but avoided through design Potential for change to setting	High	Medium adverse	**Major adverse**

9C.4 Section 3: Melton Borough

Table 9C.3 Potential impact assessment, prior to the application of any mitigation, for Section 3

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Stapleford Deserted Medieval Village and ice house (NHLE: 1008553) Stapleford Hall with adjoining service wings and orangery (NHLE: 1360859) Stable range at Stapleford Hall (NHLE: 1261728) Stapleford Hall (NHLE: 1000966) Stapleford Park Conservation Area Scalford Hall (MLE22758)	The **Stapleford Park** group demonstrates the early origins of settlement and estate organisation, providing important archaeological evidence for medieval rural life and subsequent manorial re-planning. Stapleford Hall, its adjoining service wings, orangery and stable range together form an architecturally distinguished country house ensemble, reflecting successive phases of development, changing elite tastes and the social hierarchy of estate life. The designated assets are enclosed within the surrounding Registered Park and Garden, whose landscape design, historic planting and estate layout reinforce the visual, historical and functional relationships between buildings, archaeology and landscape. Collectively, the assets derive strong group value from their coherence, legibility and survival, illustrating the historic development of a prominent landed estate within a carefully managed rural setting. There would be no physical impact.	Minor local roads define the western and southern boundaries of the park, with the eastern boundary aligned to a railway corridor. Beyond the boundaries, the setting of the park is characterised by arable fields and woodland in some areas. Stapleford Hall itself is oriented to face west with views over the formal gardens and designed landscape which comprises dense woodland between the house and the western boundary of the park. There is currently no access to Stapleford Hall or its grounds following the closure of the hotel business in 2024. The Stapleford Hall park boundary lies approximately 3 km south of draft Orler Limits, with Stapleford Hall itself located approximately 4 km to the south. Extensive woodland across the park, particularly to the north and west of the Hall, together with tree-lined hedgerows along the northern boundary and the existing railway corridor, provides substantial visual screening towards the Project. As a result, likely impacts arising from the change of setting of the park and associated heritage assets are unlikely.	Potential for change to setting	High	Negligible adverse	Negligible adverse
Blesswell Grange (NHLE: 1008815)	Blesswell Grance comprises the buried and earthwork remains of a mediaeval monastic grange, retaining evidence of a principal farm building, barn, dovecot, field enclosures and fishpond. The site represents an important component of the agricultural and economic system of monastic estates from the 12th century to the Dissolution of the Monasteries during the 16th century. There would be no physical impact.	The site is surrounded by arable field with woodland to its western boundary and along the field boundary further south. The asset is located approximately 4 km from draft Order Limits, therefore views south towards the Project will be in the far distance and not likely to impact the contribution made by its setting.	Potential for change to setting	High	Negligible adverse	Negligible adverse
Kirby Bellars Priory (NHLE: 1009285)	The site of a medieval Augustinian priory established in the 12th century, the remains of the priory retain strong potential to inform further understanding of monastic planning, daily life, economy and land use. The site forms part of a wider network of religious houses dissolved in the 16th century illustrating the role of monastic institutions in shaping medieval settlement and society at both local and national levels. There would be no physical impact.	The site is situated within a nature reserve comprising rough grassland, scrub and created wildflower meadows surrounding two central lakes. It is surrounded by woodland and planted mature trees, the River Wreake running north-south along its eastern edge and two manmade lakes to the north. On higher ground to the south is the grade I listed Church of St Peter. The southern boundary of the priory site is screened by trees along the churchyard's northern boundary. The asset lies out of draft Order Limits but is partially within the ZTV. The site is not currently accessible, however there are limited long distance views north towards the Project	Potential for change to setting	High	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
		from the churchyard. As the priory site is located on lower ground, it is unlikely that changes to the setting will affect its overall contribution to the asset.				
Garden, moat and five fishponds at Kirby Bellars (NHLE: 1010304)	The asset is a well-preserved, multi-phase landscaped site reflecting the evolution of domestic occupation and designed landscapes from the medieval to post-medieval periods. Its medieval rectangular moated site, documented from the 14th century and supported by archaeological evidence of associated buildings, illustrates the social status, defensive concerns and domestic organisation of a manorial complex. The later 17th century formal garden earthworks, including terraced walks, fishponds and prospect mounds demonstrate the adaptation of earlier medieval features into a formally designed landscape aligned with contemporary aesthetic and social values. The survival of extensive and legible earthworks across the site provides strong historic and aesthetic interest, offering insight into continuity, change and landscape design over several centuries. There would be no physical impact.	The area consists of extensive earthworks currently used as pasture. Its primary context relates to water management, with a possible prospect mound from a later period that may have been intentionally designed for views. A busy road is located to the south. Due to the surrounding topography, there are no direct views north toward the site. The site lies outside the draft Order Limits but is partially within the Zone of Theoretical Visibility (ZTV). The presence of the Project in long distance views is unlikely to change the contribution made by the asset's setting.	Potential for change to setting	High	Negligible adverse	Negligible adverse
Moated site at Ab Kettleby (NHLE: 1010705)	The site is an example of a medieval moated enclosure with an integrated fishpond, reflecting high-status occupation and land use within the historic settlement. Its close relationship with the adjacent church highlights its importance within the historic village and ecclesiastical landscape. The remaining earthworks will preserve archaeological evidence of medieval domestic and agricultural activity. The site lies within the Ab Kettleby Conservation Area. There would be no physical impact.	The site lies at the southern end of the village with the grade II* listed Church of St James the Greater to the west and open field land to the south. There are substantial earthworks across the site which is now enclosed by hedge planting, marking the perimeter of the site and providing a sense of enclosure. The asset lies outside of draft Order Limits but within the ZTV. The connection between the site, the church and the ridge and furrow patterns in the surrounding landscape remains clearly legible. It is likely that the Project will be visible against the Leicestershire uplands but not back lit against the horizon. The presence of the Project in views from the site is unlikely to change the contribution made by the asset's setting.	Potential for change to setting	High	Negligible adverse	Negligible adverse
Moated grange at Spinney Farm, Melton Mowbray (NHLE: 1014391)	The moated grange site is a well-preserved medieval moated enclosure with an extensive and integrated water management system. The survival of substantial moat arms, inner and outer banks, feeder channels and associated earthworks allow an understanding of medieval monastic agriculture systems, land and water management. Its documented association with the priory at Lewes contributes to its historic interest, illustrating patterns of ecclesiastic landholding. The site forms a coherent landscape with considerable potential to yield	The monument lies within a pasture field adjacent to the east of Scalford Brook running north-south. There is potential for ridge and furrow within the surrounding field, subject to confirmation through LiDAR analysis. The proposed towers of the Project would cross in front of the existing pylons at Melton Spinney to the north of the site, effectively reducing the spacing between pylons within views and introducing a cumulative effect on its setting. There is also potential intervisibility between the site and the grade II* listed Church of St Egelwin the Martyr in Scalford which may increase the sensitivity of	Potential for change to setting	High	Negligible adverse	Minor - negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	further information about the medieval rural economy and settlement. There would be no physical impact.	the wider historic landscape to change. The primary setting element contributing to its interest is the site's historic and functional association with the brook, which is the Project is not likely to effect, resulting in a negligible adverse magnitude of impact.				
Anglo-Scandinavian cross, St Bartholomew's churchyard (NHLE: 1014512)	A well-preserved example of an 11th century sculptural monument. Its significance lies in its historic and aesthetic interest, demonstrated through its substantial survival, ring-headed form, and richly carved decorative programme, including interlace, plaitwork, zoomorphic imagery and vine-scroll ornamentation characteristic of late Anglo-Scandinavian stone carving. The surviving form and iconography provide important physical evidence for early medieval craftsmanship, religious expression and cultural influences in the region, while its churchyard setting reinforces its historic and communal associations. There would be no physical impact.	The asset is situated on elevated ground within the churchyard of the Church of St Bartholomew (NHLE: 1294595), which itself occupies a prominent topographical position. The church predates the cross, which is 11th century in date, and includes a 13th century tower with the remainder largely rebuilt in the 14th century, reinforcing the long-established historic prominence of the site. The elevated position results in extensive outward views from the churchyard, including clear views towards Waltham Transmission Station approximately 5 km to the south-west. Although these views are experienced more clearly from the wider churchyard than from the immediate vicinity of the cross itself, they demonstrate the openness of the surrounding landscape and the long distance over which modern vertical structures can be perceived. The Project would be located approximately 4 km to the south and would therefore be visible within this broader open setting, forming part of the distant landscape context rather than the immediate setting of the cross.	Potential for change to setting	High	Negligible adverse	Minor adverse
Medieval settlement remains immediately northeast and 210m southeast of White House Farm (NHLE: 1018834)	The abandoned medieval settlement and associated fishponds at Eye Kettleby are of high historic and archaeological interest due to their exceptional survival as extensive earthworks and their strong archaeological potential. Largely undisturbed deposits, including waterlogged remains within the fishponds, are likely to preserve valuable evidence for medieval settlement, economy and environment. The site is particularly significant for its well-documented context and its relationship with the adjacent Saxon settlement, together providing a rare opportunity to understand continuous occupation and landscape use over more than 1000 years. There would be no physical impact.	Although there is no public access to the monument, it appears from the adjacent road that there may be distant views towards the Project in a north-westerly direction at approximately 3.7 km. The asset's setting contributes to its significance chiefly through its relationship with local topography, the stream adapted to form fishponds, and the proximity of an adjacent early medieval archaeological site, together illustrating long-term continuity of settlement. Distant views do not contribute to its significance, and the presence of the Project in the wider landscape is therefore unlikely to result in an effect on the heritage interest of the asset.	Potential for change to setting	High	No change	No effect
Church of St. Peter and St. Paul, Market Overton (NHLE: 1073229)	The church is of high historic interest, notably for the surviving Anglo-Saxon west arch. The predominantly 14th century building displays high-quality medieval craftsmanship in its tower, arcades, windows and carved ornamentation, complemented by later historic additions, monuments and fittings. Together, these elements illustrate the church's architectural evolution and its continuous religious and communal use from the	Church located approximately 4.1km south of the draft Order Limits. The site visit indicates that visibility towards the Project is screened from most of the churchyard, with the exception being the north-eastern corner. Directly north from this location, views of the Project would be screened by woodland. The Waltham Transmission Tower, which is close to where the proposed overhead line would cross from east-west	Potential change to setting	High	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	Anglo-Saxon period onwards. There would be no physical impact.	approximately 10km north-west of the church, is visible in the distance. Noting that this structure is not only on high ground but is also 290m tall, the Project would, comparatively, be much closer to the treeline on the horizon and would blend in to a much greater extent. To the north-east, where the Project would be approximately 5km from the church, the rolling topography makes views of the Project unlikely. Given the limited visibility, it is unlikely that there would be any change to the setting of the church.				
Church of St. Mary Magdelene, Waltham on the Wolds (NHLE: 1188847)	The church is of high historic interest, reflecting a long and complex evolution from Norman origins through substantial 13th and 14th century phases, later medieval expansion, and 19th century restoration by G. G. Scott. Constructed in coursed limestone with a prominent central tower and spire, the church displays high-quality medieval detailing in its windows and arcades. Its aesthetic interest is further enhanced by later historic additions, monuments and stained glass, which together illustrate its continuous religious, architectural and communal use from the medieval period to the present. There would be no physical impact.	Although the church tower and spire are visible within the wider surrounding landscape, the monument is completely screened from the Project and does not fall within the ZTV, therefore it is unlikely that there would be any change to the setting of the church.	Potential change to setting	High	No change	No effect
Church of St. Luke, Upper Broughton (NHLE: 1264583)	The Church of St Luke is of high historic interest, reflecting development from Norman origins through 13th and 14th century phases, later medieval additions, and substantial 19th century rebuilding by S. S. Teulon. Constructed predominantly of ironstone with limestone dressings, the church retains important medieval fabric, including arcades, tower and font, alongside later historic features such as the 18th century porch and memorials. Its significance is enhanced by the survival of early carved elements and fittings, which together illustrate the church's long history of architectural evolution, worship and communal use. There would be no physical impact.	The church is located outside the draft Order Limits, approximately 4.2 km north-west of WMEL-B and around 4.7 km north-west of the nearest section of the proposed new overhead line. Positioned on raised ground within the village, the church has distant views towards the Project. Woodland blocks approximately 450 m north of WMEL-B are visible on the horizon, along with towers associated with the existing north–south overhead line. It is therefore possible that distant views of new towers and/or gantries associated with WMEL-B may be partially visible on the skyline which would result in a negligible adverse impact.	Potential change to setting	High	Negligible adverse	Minor adverse
Church of St. Mary, Garthorpe (NHLE: 1307476)	The parish church is of high aesthetic and historic interest, reflecting successive phases of construction from the early 13th to 15th centuries, with later intervention in the late 19th century. Built of ironstone and limestone, it retains high-quality medieval fabric, including a prominent 15th century west tower and richly detailed windows. The church's interest is further enhanced by its well-preserved medieval plan form and continuing religious and communal use, illustrating its long-standing role within the settlement. There would be no physical impact.	Located outside of the draft Order Limits, approximately 950m south of the proposed overhead line. The ZTV indicates there may be some partial visibility of the Project from the north-western part of the churchyard. The church is on higher ground to the north of the village, with the land rising further to the north towards the Project, meaning that the topography would screen most visibility from the church. Views of the church from the south-east, the direction from which it is approached from the village and where the entrance is, would not be impacted. However, the potential for some visibility in	Potential for setting change	High	Negligible adverse	Minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
		views from the north of the church would mean that there would be an increase of modern industrial presence in the otherwise rural landscape of rolling fields which form a part of its setting.				
Church of St. Peter, Saxelbye (NHLE: 1075032) Row of 7 headstones to south of porch of Church of St. Peter (NHLE: 1188425)	The church is of high aesthetic and historic interest derived from its medieval architectural fabric, including its tower, spire, reflecting development from the 13th to 15th centuries with later restoration. Its interest is enhanced by strong group value with the adjacent row of late 17th and early 18th century Swithland slate headstones, which illustrate post-medieval burial practices and the continuity of use of the church and churchyard. There would be no physical impact.	Beyond the draft Order Limits. The ZTV indicates potential visibility of WMEL-B from the northern (rear) side of the church. This area was inaccessible at the time of the site visit due to potentially falling masonry but appeared to be screened by mature trees. Views of the church from the entrance to the churchyard and from surrounding heritage assets are also screened, mostly by the church itself. On this basis, it is unlikely that there would be an adverse impact to the church from the Project.	Potential for setting change	High	No change	No effect
Brooksby Hall (NHLE: 1075040)	The house is of high aesthetic and historic interest, reflecting its origins as a late 16th century residence with successive alterations in the 18th, 19th and early 20th centuries, including work by Sir Edwin Lutyens. Built of ironstone with limestone dressings, the building retains a strong historic plan form and layered architectural character, illustrating changing tastes and uses over time. Its interest is further enhanced by powerful historic associations, notably as the birthplace of George Villiers, Duke of Buckingham, and through its later connections with prominent figures including Lord Beatty. There would be no physical impact.	Brooksby Hall's interest is closely tied to its historic rural and estate setting. The surrounding open countryside and associated agricultural land allow the Hall to be understood as a principal country house, reflecting its historic function and status. This largely undeveloped setting supports clear views to and from the building and sustains its architectural prominence and historic character. Overall, the rural estate context makes a strong contribution to the asset's significance, and intrusion or intensification of development within this setting could diminish that contribution. There may be long distance views of WEML-B to the northeast but it is unlikely that there would be any change to the setting of the asset.	Potential for setting change	High	Negligible adverse	Minor adverse
Church of St. Bartholomew, Welby (NHLE: 1075115)	The church derives its significance from its medieval origins, with substantial 14th to 15th century fabric and later 17th century repair, clearly expressed in its plan, masonry, and Gothic detailing. Its aesthetic interest lies in the varied and well-preserved windows, west tower, and use of local ironstone and limestone, reflecting regional character. The 19th century restoration by R. W. Johnson forms part of its historic evolution. There would be no physical impact.	The church occupies a locally elevated position within an otherwise open agricultural landscape, formerly associated with the deserted medieval settlement of Wellby, for which no visible above-ground remains survive (potentially legible only as earthworks or through LiDAR). While the immediate lane is relatively quiet, road noise is audible from larger surrounding roads and the industrial park to the south. The setting is further influenced by modern infrastructure, including multiple electricity cables, notably a prominent north–south line serving a solar farm, as well as two nearby wind turbines (approximately 25–30 m high, subject to confirmation). A proposed pylon line would pass between the church and the turbines, resulting in electricity and energy infrastructure on multiple sides of the church, with pylons passing particularly close to its western side and enclosing the asset on at least two sides.	Potential for setting change	High	Small adverse	**Minor-Moderate adverse**

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Church of St Michael, Wartnaby (NHLE: 1075141) Chest tomb approximately 2 metres west of tower of Church of St. Michael (NHLE: 1178259) Chest tomb approximately 3 metres southwest of southwest angle of Church of St. Michael (NHLE: 1360845)	The church and two adjacent chest tombs form a closely related group, the **Church of St Michael**, whose interest is enhanced by their shared ecclesiastical function and physical proximity. The medieval church is the principal asset, valued for its aesthetic and historic interest and long-standing role as the focus of worship. The chest tombs, positioned close to the church, add historic and communal value by illustrating historic burial and commemoration practices. Together, they demonstrate continuity of religious, social, and funerary use, with strong group value derived from their functional and spatial interrelationship. There would be no physical impact.	The church lies outside the ZTV for WMEL-B, with potential overhead line views screened by the village. The church occupies an elevated position east of the village. Although pylons exist in the wider landscape, they are currently well screened and not visible from the church. Road noise is evident from the south, but strong tree cover and village development screen views to the south and west. To the east and south-east, open views extend across fields, where the upper sections of two or three towers may be visible at distance, appearing small and not visually competing with the church due to topography and screening. Any impact is therefore likely to be minimal. The historic tombs would not be affected.	Potential for setting change	High	No change	No effect
Church of St. Peter, Saxby (NHLE: 1176759)	Designed by George Richardson and built in 1789, the church represents a coherent classical ecclesiastical composition expressed through its ashlar limestone construction and west tower with spire. Its aesthetic interest lies in the refined detailing of the tower and spire, the consistent use of round-headed openings, and the clear legibility of its Georgian design. Later alterations during the 19th century contribute to its historic interest, illustrating Victorian liturgical renewal while respecting original form. There would be no physical impact.	The asset is now in residential use, with no public access to the former churchyard. It lies partially within the ZTV and is located approximately 2 km south of the Project. There is potential for northward views towards the Project, although these are likely to be at least partially screened by intervening features, as a result this would likely result in a negligible adverse effect.	Potential for setting change	High	No change	No effect
Saxelby Manor House (NHLE: 1188434)	Manor House, now farmhouse. Built in the early-mid 16th century with later additions. The building has historic and aesthetic interest as a late medieval or Tudor building of high status, with timber framed structure, stone doorway, and mullion windows. It would not be physically impacted by the Project.	Outside of the draft Order Limits. The ZTV indicates possible visibility of WMEL-B, which would be located approximately 1.3km north-east from the building itself, although not from the ground around it. The building is not publicly accessible, but from assessment of the village and aerial mapping it appears to be screened by trees. It is located to the south of the village and is relatively isolated from the rest of it, although it is very close to the church. Its setting within the village contributes to how it is understood as a manor house. From what is visible from publicly accessible areas, there would be no change to the appreciation of the asset's context and setting, although there may be views from windows within the building. At worst, this would be a negligible adverse magnitude of impact.	Potential change to setting	High	Negligible adverse	Negligible adverse
Church of St. Michael, Brooksby (NHLE: 1188473)	The church ccomprises well-preserved medieval fabric, with a 14th to 15th century west tower and an early 16th century body, clearly expressing its historic development. Aesthetic value derives from the quality of Gothic detailing, including the tower and spire, traceried windows, battlemented parapets, and notably the exceptional 15th early 16th century oak doors with	The church is located in the grounds of Brooksby Hall (NHLE:1075040). There may be long distance views of WEML-B to the northeast, but these are likely to be screened by adjacent buildings across the grounds. Therefore it is unlikely that there would be any change to the setting of the asset as a result.	Potential change to setting	High	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	original ironwork. The 1874 restoration by R. W. Johnson, including the rebuilt spire contributes positively. There would be no physical impact.					
Church of St. Bartholomew (NHLE: 1294595)	The church's significance is enhanced by its historic village setting, within which its 13th century west tower and later medieval fabric are clearly legible as a long-established place of worship. The contrast between the relatively plain, early tower and the more developed late 14th and 19th century elements is best appreciated where the building can be seen in the round, with the south porch, aisle, transept, and chapel reading as later additions. There would be no physical impact.	The church is sited on elevated ground, surrounded by churchyard with the Anglo-Scandinavian cross (NHLE: 1014512) to the south. The elevated position results in extensive outward views from the churchyard, including clear views towards Waltham Transmission Station approximately 5 km to the southwest. The views demonstrate the openness of the surrounding landscape and the long distance over which modern vertical structures can be perceived. The Project would be located approximately 4 km to the south and would therefore be visible within this broader open setting, forming part of the distant landscape context rather than the immediate setting of the church. As a result there would likely be a negligible adverse effect.	Potential change to setting	High	Negligible adverse	Negligible adverse
Church of St. James the Greater (NHLE: 1295154) St. James's Church burial ground, Church Lane, Ab Kettleby (MLE29362)	The church is of high aesthetic and historic significance due to its 13th and 14th century fabric. The mid-19th century restoration and north aisle by Broadbent and Hawley form part of the building's historic evolution and are sympathetic in character, consciously reflecting the medieval fabric. The church forms the **St James the Greater Church** group together with its associated burial ground. There would be no physical impact.	The church lies outside the draft Order Limits but within the ZTV. Its immediate setting comprises the surrounding churchyard, which contains a listed war memorial and listed headstones, reinforcing its communal and commemorative role. The moated site at Ab Kettleby (NHLE: 1010705) lies immediately to the east, and together with surviving ridge and furrow, this historic relationship within the landscape remains legible. The church spire is a prominent local landmark with long views across the Leicestershire uplands, from which towers associated with the Project are likely to be visible but not silhouetted on the skyline. Their presence is therefore unlikely to materially alter the contribution made by the setting. Modern elements, including low-voltage power lines, are already present in village views, and there is no inter-visibility with Holwell church to the north-east.	Potential change to setting	High	Negligible adverse	Negligible adverse
Pair of farmhouses, front railing and boundary wall, Sewstern (NHLE: 1061284)	The pair of farmhouses are significant as well-preserved mid-18th century rural buildings, dated 1752, which express their historic agricultural origins through their symmetrical form, limestone construction, and traditional detailing. Their significance is enhanced by associated historic boundary features, including early C19 cast-iron railings and boundary walls, which contribute to their aesthetic and group value. There would be no physical impact.	The asset lies outside the draft Order Limits and beyond the ZTV. The setting of the pair of farmhouses remains closely tied to their historic rural function and character. Their symmetrical south-facing principal elevation, traditional materials, and associated boundary features are best appreciated within a relatively open domestic and agricultural context. The early 19th century cast-iron railings and boundary wall contribute positively to the immediate setting, reinforcing formality and enclosure to the frontage. Surrounding land and development allow the buildings to be read as a coherent mid-18th century farmhouse pair, and the setting continues to support	Potential change to setting	Medium	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
		understanding of their historic use, architectural form, and group value. As a three-storey building with a south-facing elevation, there is potential for views of the Project from upper-floor windows. The village forms the pair's setting. At worst this would constitute a negligible adverse magnitude of impact.				
Ambleside (NHLEL 1075033)	Late 17th or early 18th century cottage within the village of Saxelby. It is a small one-storey building with an attic, built in local stone. It forms part of a group of historic buildings within the village, and its rural character and small scale contribute to its historic and architectural interest as a vernacular building. There would be no physical impact to the building.	Outside of the draft Order Limits. The ZTV indicates possible visibility of WMEL-B, which would be located approximately 1.2km north-east. The building is located on a narrow, hedgerow and tree-lined lane in the village, and there is a large hedge screening the building from the road. The village forms its setting, with its more enclosed grounds creating a more set apart internal space, all of which will contribute to its value through reinforcing its rural character and connection with the village. From what is visible from publicly accessible areas, there would be no change to the appreciation of the asset's context and setting, although there may be views from windows within the building. At worst, this would be a negligible adverse magnitude of impact.	Potential change to setting	Medium	Negligible adverse	Negligible adverse
Yew Tree Cottage and The Cottage (Numbers 17 and 19) (NHLE: 1075034)	Pair of 18th century cottages in village of Grimston. They would not be physically impacted.	Outside of the draft Order Limits. While the ZTV indicates potential visibility of WMEL-B, which would be located approximately 1.4km east, the building faces southwards onto the road through the village and would not be impacted.	Potential change to setting	Medium	No change	No effect
Church Farmhouse (NHLE: 1075036)	Former farmhouse in the village of Grimston. Dating to the early 18th century in red brick. Of architectural and historic interest as a vernacular building contributing to the rural character of the village. There would be no physical impact.	Outside of the draft Order Limits. The ZTV indicates possible views of WMEL-B, which would be located approximately 1.5km east. In practice, the site visit indicates that this visibility would only be theoretically possible from upper windows as, at street level, all views in the direction of the Project are screened by the tree-lined lane through the village and buildings along it. As a former farmhouse in a village setting, distant views from upper storey windows, if actually possible, would not have an impact on its historic and architectural interest. A worst-case assessment of negligible adverse magnitude of impact has been made to allow for the possibility of visibility.	Potential change to setting	Medium	Negligible adverse	Negligible adverse
Church Farmhouse (NHLE: 1075037)	Early 19th century farmhouse on the northern side of the village of Saxelby. Early origins likely. It has architectural and historic interest as a vernacular building forming part of the historic character of the village. The building would not be physically impacted.	Outside of the draft Order Limits. The ZTV indicates possible visibility of WMEL-B, which would be located approximately 1km north-east. It is located on the northern side of the village and faces the road to the south.	Potential change to setting	Medium	Small adverse	Minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
		As a farmhouse on the edge of a village, the building's setting contributes to its value through both the farmland to the north and the settlement to the south, with one providing context to its function and the other reflecting historic community and connection. It is likely that there would be views of WMEL-B from the rear of the building, which would appear in views over the hedgerow-lined fields to the north of the village. The farmhouse's setting would still be legible and there would be no change to how it is appreciated, as views of the farmstead from the road, which it faces, would not be altered. However, the introduction of large new modern infrastructure would be a change in the historic agricultural landscape, resulting in a small adverse magnitude of impact.			
The Old Vicarage (NHLE: 1075106)	The Old Vicarage is of historic interest as an ancillary building associated with the parish church, reflecting the social and ecclesiastical organisation of the village. Its architectural form, materials, and scale illustrate its historic domestic and clerical function, while its relationship to the church contributes to its historic and communal value. Together, these qualities allow the building to be clearly understood as part of the historic ecclesiastical core of the settlement.	Outside of the draft Order Limits and the ZTV in village of Ab Kettleby. Its setting is the surrounding village, with a functional and historic relationship to the nearby church. The building occupies slightly raised ground and is of polite, designed architectural character, with associated garden views. From this elevated position there are long outward views to the south, and while some minor screening is present, the alignment suggests the Project is likely to be visible from upper-storey windows.	Potential change to setting	Medium	Small adverse	Minor adverse
Potter Hill Farmhouse (NHLE: 1075114)	Historic rural dwelling that illustrates the development of agricultural settlement and domestic rural life. Its architectural form, materials, and scale reflect traditional farmhouse design and contribute historic value relating to its historic function. The building also holds group and contextual value through its relationship with the surrounding farmstead and rural landscape, reinforcing its historic agricultural character.	The farmhouse is located in a group of farm buildings. Although not publicly accessible, aerial imagery and views from the surrounding area suggest that the farmhouse itself will have views towards the new overhead line screened by the buildings to the south of it and a band of woodland. However, the draft Order Limits include an existing trackway that runs past the building, approximately 15m west of the farmstead. This would be used during construction for access. At this stage there is not yet the detail on the number and type of vehicles to allow assessment of potential impacts. This will be included in the assessment at the ES.	Potential change to setting Temporary construction activity	Medium	No change	No effect
Stable range and lodgings at Edmondthorpe Hall (NHLE: 1075129) Carriage store, workshop and adjoining loose box at Edmonthorpe Hall	Group of former estate buildings associated with the (demolished) **Edmonthorpe Hall.**	Outside of the draft Order Limits, but the ZTV indicates potential visibility of the proposed overhead line approximately 3km north. The stable range is on private land so it was not possible to confirm, but the type of building indicates that it is an estate building with a functional and historic relationship to the site of the former hall, and other ancillary buildings (Holly Cottage	Potential change to setting	Medium	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
(1360875) Groom's quarters and service wing at Edmondthorpe Hall (NHLE: 1075130) Holly Cottage (NHLE: 1360874)		– lodge, stables, groom's quarters and carriage store). These aspects of its setting would not be impacted by the Project so there would be no impact.				
Little Belvoir (NHLE: 1075139)	Country house, formerly known as Wartnaby Castle. Built 1839 for Thomas Johnson. The building is not publicly accessible but is assumed from its designation description to be of architectural interest. It would not be physically impacted.	The building would have theoretical visibility of WMEL-B. It is located within formal grounds, which include a tree lined avenue, set back from Six Hills Lane approximately 1.5km north-east of the substation. The grounds have trees planted around the edges which will visually enclose the space and filter views of the Project. However, given the formal design of the building, if there are views of the Project these will likely form part of historic views, albeit only in glimpses at distance. This would be a small adverse magnitude of impact	Potential change to setting	Medium	Small adverse	Minor adverse
The Old Inn (NHLE: 1075140)	The asset derives its interest as a historic public house, reflecting the social and economic history of the settlement. Its architectural form, materials, and surviving historic fabric illustrate its longstanding role as a place of gathering, hospitality, and exchange. The building also holds communal value through its association with village life and contributes positively to the historic character and group value of the surrounding area. There would be no physical impact.	Outside of the draft Order Limits. The ZTV indicates possible visibility of the overhead line, approximately 1.8km south of the building, but this would only be from rear windows. From the street, views beyond the building are screened by the enclosing structures and rising ground around the village. As with other buildings in the village, it faces towards the church and village core to the north. As a result, there would be no impact.	Potential change to setting	Medium	No impact	No effect
Tower Cottage and attached wall, Tower House and attached wall (NHLE: 1075144)	Mid-17th century dwelling dated 1656, illustrating early domestic architecture despite later rebuilding in the 19th and 20th centuries. Its historic interest is enhanced by the incorporation of reused medieval stonework, likely salvaged from the Church of St Michael, Wartnaby, including a complete 13th century doorway and surviving 14th century architectural fragments. These elements provide important insight into medieval ecclesiastical fabric and later attitudes to reuse following church restoration. Together the building's early origins, evolving fabric, and assemblage of medieval architectural features give it strong aesthetic and historic significance. There would be no physical impact.	Outside of the draft Order Limits. The ZTV indicates that there would not be visibility of the proposed overhead line and only very limited possible visibility of WMEL-B to the west. The building is not publicly accessible, and there is existing vegetative screening which prevents views in towards it. This will likely similarly limit any visibility of the Project. On that basis, it is unlikely there would be an effect.	Potential change to setting	Medium	No impact	No effect
Cottage 7 metres northeast of The Old Rectory (NHLE: 1176776)	Early 18th century rural dwelling reflecting modest historic domestic life and agricultural settlement. Its simple two-storey, three-bay form, use of local rubble, brick, and stone dressings, and pantile roof are characteristic of vernacular building traditions of the	The cottage is located approximately 2km south of the proposed overhead line in the village of Saxby. The ZTV indicates some possible visibility of the Project from rear windows, but mature tree screening mean it is unlikely to have an effect, resulting in no impact to the asset.	Potential change to setting	Medium	No impact	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	period. Later 19th century alterations and surviving ancillary remains, including the pigsty, add historic value by illustrating the building's continued adaptation and functional use over time, contributing to its historic and aesthetic interest. There would be no physical impact.					
Church Farmhouse (NHLE: 1178265) Barn approximately 55 metres east of Church Farmhouse (NHLE: 1075142) Implement shed and stable range with Dovecote immediately southeast of Church Farmhouse (NHLE: 1178267) Stable range with implement shed and granary immediately northeast of Church Farmhouse (NHLE: 1075143)	The **Church Farmhouse** group forms a coherent and well-preserved historic farmstead group. Together, the assets illustrate the organisation, function, and hierarchy of a traditional rural agricultural complex, with Church Farmhouse as the domestic core and the surrounding ranges expressing livestock management, storage, and food production. The close spatial relationship between the buildings strengthens their historic and group interest, allowing historic agricultural practices and the working character of the farmstead to be clearly understood. Collectively, the group makes a strong contribution to the historic character of the settlement. There would be no physical impact.	Church Farmhouse faces directly south towards the proposed overhead line approximately 1.3km away, although the site visit indicates that views would be at least partially screened by the woodland to the south. The ZTV indicates potential visibility of WMEL-B, which would be located approximately 1km south-west. As the farmstead is oriented away from WMEL-B, and views to the east are dominated by associated farm buildings, the primary views of the asset are from the south looking north and north-west. In this context, visibility of WMEL-B is unlikely to result in an appreciable impact. The barns and implement sheds are located around a courtyard to the rear (north) of the farmhouse. While there is some potential visibility both the overhead line and WMEL-B, their setting contributes to their value through their functional relationship to the farmhouse, and they would not be impacted.	Potential change to setting	Medium	No change	No effect
Hall Farmhouse (NHLE: 1178271)	18th /early 19th century rural dwelling reflecting the development of agricultural domestic architecture in the post-medieval period. Its simple, symmetrical form, ironstone construction and slate roofs are characteristic of vernacular farmhouses of this date. Later 19th century alterations, including sash windows and a refined central doorway, illustrate continued adaptation while preserving the building's historic character and historic interest. There would be no physical impact.	Outside of the draft Order Limits in the village of Holwell, approximately 1.8km north of the proposed overhead line. The ZTV suggests there is some possible visibility from the building. The ground rises steeply on the land immediately south of the farmhouse, which means that, at ground, level, there would not be views of the Project. The building does not face south, however, so any views from the upper storeys would also be unlikely.	Potential change to setting	Medium	No change	No effect
Manor Farmhouse (NHLE: 1178274)	The house is significant as a former farmhouse of mid-late 17th century origin that illustrates incremental domestic development through 18th and 19th century extensions. Its historic value lies in the legible building phases, varied use of ironstone and brick, and surviving historic detailing, which together reflect changing function and status over time. There would be no physical impact.	Outside of the draft Order Limits in the village of Holwell, approximately 1.8km north of the proposed overhead line. The ZTV suggests there is some possible visibility from the building. Views from street level in front of the account are enclosed by the surrounding village buildings, so any visibility would be limited to those from upper storeys. These would be limited and at a distance from the village which forms the setting of the farmhouse. As a result, there would be no impact.	Potential change to setting	Medium	No change	No effect
Welby Grange (NHLE: 1180096) Stone outbuilding immediately east of Welby Grange (NHLE: 1360869)	Welby Grange and the stone outbuilding form a closely related heritage group whose significance lies in their historic functional and spatial relationship. The outbuilding enhances the historic value of Welby Grange by illustrating its ancillary and service functions,	The farmstead's relatively isolated location adjacent to the watercourse to the west along with the surrounding pastural landscape and extent of development allow the buildings to be appreciated together maintaining their historic scale and rural character.	Potential temporary impacts during construction	Medium	Small adverse	Minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	strengthening the **Welby Grange** group's overall historic legibility. The building is adjacent to draft Order Limits as the trackway to the farm and beyond is being considered for construction access. There would be no physical impact from construction.	Views of the Project would be clear to the north, with little screening provided by greenery along the watercourse.	Potential change to setting			
Grange Cottage (NHLE: 1180103)	Late 17th /early 18th century vernacular rural dwelling that retains evidence of its historic domestic character despite later 20th century alterations. Its ironstone construction, simple two-storey form, and traditional roof materials typify local building traditions. There would be no physical impact.	The setting of the cottage comprises open pastural and arable fields. Views north already include overhead line and towers. Views of the Project would be clear and uninterrupted to the north, with little screening provided.	Potential change to setting	Medium	Small adverse	Minor adverse
Barn Immediately West of Church Farmhouse (Number 16) (NHLE: 1188459)	18th century barn in the village of Grimston. Built with a cart entrance and Flemish garden wall pond in red brick, with irregular windows added later. There was a loft or granary at 1st floor level. It is a historic agricultural building with group value with adjacent farm building and other village buildings. There would be no physical impact.	Outside of the draft Order Limits. The ZTV indicates possible views of WMEL-B, which would be located approximately 1.5km east. In practice, the site visit indicates that the building faces north directly onto the Main Street, so there would not be any actual views from the building. Views of the building are within the close grain of the street and only extend a short distance past the former barn due to trees and other buildings in the village. As a result, there would be no impact.	Potential change to setting	Medium	No change	No effect
Shoby House (NHLE: 1188467)	Early 19th century farmstead in the hamlet of Shoby. The building has aesthetic and historic interest as a fairly grand house with adjacent courtyard farmstead complex. There would be no physical impact.	Outside of the draft Order Limits approximately 2.7km south-west of WMEL-B. The ZTV indicates some partial visibility of WMEL-B and the proposed overhead line, although this would be limited at ground level by the tree opposite and the changes in topography. Any views, therefore, would likely be from the upper storeys. The setting of the farmstead includes several nested spaces, including a walled garden area around the building, the enclosed farmstead grouping adjacent, the small village, and then the rural landscape beyond. The Project, if visible, would be in distant views and would not alter the contribution made by the farmstead's village and rural setting. At worst, the introduction of new industrial features at a distance would be negligible adverse magnitude of impact.	Potential change to setting	Medium	Negligible adverse	Negligible adverse
Sysonby Lodge (NHLE: 1264940)	Syonsby Lodge is an early 19th century building said to have been built as a hunting lodge by the Earl of Plymouth and originally called Plymouth Lodge. Its main façade is on the western side of the building, and it stands on a hill above fields and a brook in a prominent position. It is noted for its architectural and historic interest and includes fine Regency details as well as internal features of an earlier (possibly 17th century) date likely brought from elsewhere. Several historically	Outside of the draft Order Limits approximately 1.1km south of the proposed overhead line. There was no public access to the building, and the ZTV indicates possible visibility from the building itself, although not from the ground around it, so an approximation of potential visibility and the setting of the asset has been made from aerial imagery.	Potential change to setting	Medium	Negligible adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	important figures, including Winston Churchill, Lord Beatty and the American Vanderbilt family hunted there. It would not be physically impacted by the Project.	According to its list description the main façade is on the western side of the building, and it stands on a hill above fields and a brook in a prominent position. Aerial images available online confirm this, showing that the lodge faces directly over a relatively steep drop towards the watercourse, which is to the west of the building. Aerial images also show that, in contrast to how it would have been experienced historically, there is now a modern housing development to the north. The hilltop location and views of the western façade are parts of its setting which contribute to its value, as these are part of its intended design. Due to the development to the north, however, views in that direction do not contribute positively. The building has been substantially modernised and subdivided into apartments. Those on the northern side of the building may have visibility of the proposed overhead line, but these would be viewed in the distance above modern housing. This would not affect the historic or architectural interest of the building, resulting in no worse than negligible adverse magnitude of impact.				
Church Cottage (NHLE: 1294741)	18th century vernacular dwelling that reflects modest rural domestic life. Its simple single-storey-and-attic form, traditional brick construction, and slate roof are characteristic of workers' or rural cottages of this period. Later 19th and 20th century alterations illustrate continued adaptation and use, while the overall scale and plan retain historic interest for historic patterns of rural occupation. It would not be physically impacted by the Project.	Outside of the draft Order Limits. The ZTV indicates possible views of WMEL-B, which would be located approximately 1.5km east. In practice, the site visit indicates that the building faces west away from the Project and that views within the village are extremely limited due to the close grain of the narrow lanes and mature trees. As a result, there would be no impact.	Potential change to setting	Medium	No change	No effect
Ivy House Farmhouse (NHLE: 1295133)	Mid to late 17th century rural dwelling that reflects historic patterns of agricultural settlement and domestic life. Its ironstone construction, multi-unit plan, and simple two-storey form are characteristic of vernacular farmhouses of the period. Later 19the century alterations, including window changes, illustrate continued occupation and adaptation, while surviving early features such as stone mullioned openings and chamfered eaves contribute aesthetic interest and allow the building's historic development to be understood. It would not be physically impacted by the Project.	Outside of the draft Order Limits. The ZTV indicates possible visibility of the overhead line, approximately 1.8km south of the building. However, the site visit indicates that the building faces west, with rear windows facing east, and that at street level, views beyond the building are screened by the enclosing structures and rising ground around the village. As a result, there would be no impact.	Potential change to setting	Medium	No change	No effect
Sycamore House, Saxby (NHLE: 1307741)	The farmhouse and adjoining former cottage is significant as a 19th century rural domestic dwelling. Its ironstone and brick construction, evolving plan form, and surviving 19th century features provide historic interest	Outside of the draft Order Limits in the village of Saxby. The ZTV indicates that there would be no visibility of the Project at ground level, although there is a possibility from upper windows. The site visit indicated that potential impacts from the village are unlikely due to the	Potential change to setting	Medium	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	for understanding historic rural living and later change. It would not be physically impacted by the Project.	fact that it is sunken in the landscape and trees and buildings close off views beyond it. As a result, the potential for visibility is low and it is unlikely there would be an impact.				
Church of Holy Trinity, Sewstern (NHLE: 1360831)	The former Chapel of Rest, now the parish church, is a well-preserved mid-19th century Romanesque Revival church designed by A. Salvin in 1842. Its architectural interest derives from the coherent and deliberately archaic design, expressed through the use of local ironstone and limestone, round-headed openings, scallop-capital shafts, and the distinctive western bellcote. As an example of Salvin's church architecture and a building later adapted to parochial use, it holds architectural, historic, and communal significance. It would not be physically impacted by the Project.	Views of the church are predominantly obtained when looking north. From these vantage points, the Project and associated towers are likely to be visible, but their presence is unlikely to affect the elements of the setting that contribute to the church's heritage significance.	Potential change to setting	Medium	Negligible adverse	Negligible adverse
The Old Rectory (NHLE: 1360837)	Late 18th century clerical residence, likely designed by George Richardson in 1789, reflecting the status and organisation of the Anglican parish. Its architectural interest lies in the balanced classical composition, ironstone and limestone construction, and refined detailing, including floor bands, sash windows, and hipped slate roofs. Later 19the century additions illustrate continued adaptation while respecting the original form. The building holds historic interest through its association with ecclesiastical life and contributes to the architectural character of the settlement. It would not be physically impacted by the Project.	Outside of the draft Order Limits in the village of Saxby. The ZTV indicates that there would be no visibility of the Project at ground level, although there is a possibility from upper windows. The site visit indicated that the former rectory faces south-west into the village rather than northwards towards the Project. It is unlikely that there would be any impact from any glimpsed views from the rear of the building.	Potential change to setting	Medium	No change	No effect
Saxby House (NHLE: 1360856)	Rural dwelling illustrating successive phases of domestic development from the late 17th century through to 18th century remodelling and 19th century additions. Its historic interest lies in the legible evolution of the L-plan form, varied materials, and architectural detailing, including coped gables, quoins and distinctive sash and casement windows. Together, these elements reflect changing agricultural use, status, and living standards over time, contributing to its historic and architectural interest. There would be no physical impact.	Outside of the draft Order Limits in the village of Saxby. The ZTV indicates that there would be no visibility of the Project at ground level, although there is a possibility from upper windows. The site visit indicated that potential impacts from the village are unlikely due to the fact that it is sunken in the landscape and trees and buildings close off views beyond it. As a result, the potential for visibility is low and it is unlikely there would be an impact.	Potential for change to setting	Medium	No change	No effect
New Farmhouse (NHLE: 1360876)	Rural dwelling dated to c.1772, which reflects the architectural confidence and status of agricultural households of this period. Its ironstone construction and use of classical detailing—most notably the Doric columned porch with ashlar dressings—give it strong architectural interest. 19th century alterations and additions illustrate continued occupation and adaptation, while the datestone provides clear historic interest value	Outside of the draft Order Limits and the ZTV (at ground level) within village of Edmonthorpe. Possible visibility from upper rear windows.	Potential for change to setting	Medium	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	for the building's historic development and origins as a farmhouse. There would be no physical impact.					
The Old Rectory (NHLE: 1360906)	House, formerly rectory, in village of Saxelby. Mid-18th century building. There would be no physical impact.	The building is outside of the draft Order Limits. The ZTV indicates likely visibility of WMEL-B from the northern side of the building, although aerial imagery indicates this would be at least partially screened by trees around the property boundary. WMEL-B would be located approximately 1.15km north. The setting of the building is formed by its grounds, the church to the west and the village beyond, and the rural landscape to the north, east and south. The key element of this is the church, for which it served as rectory, although the other aspects of its setting also contribute as part of how it is appreciated as a rural village rectory. The partially screened views of WMEL-B would introduce a new industrial feature into this landscape, although its relationship to the church and village would not be affected. This would be a small adverse magnitude of impact.	Potential change to setting	Medium	Small adverse	Minor adverse
Brook Farmhouse (NHLE: 1360907)	17th century farmhouse in the village of Saxelby. The building would not be physically impacted by the Project.	The building is outside of the draft Order Limits. The ZTV indicates possible visibility of WMEL-B, which would be located approximately 1.2km north-east. The building faces south-east onto the lane and likely has views from the rear of the property looking north-west. There are no windows on its north-eastern gable end, which suggests that views of WMEL-B would not be possible. At ground level, all views towards WMEL-B are screened by the church and trees around it. On this basis, there would be no change from the Project.	Potential change to setting	Medium	No change	No effect
The Red House Farmhouse, Grimston (NHLE: 1360908)	The building is significant as a late 16th /early 17th century former farmhouse, valued for its surviving timber-framed fabric and vernacular character, with later alterations illustrating its continued adaptation and use over time. It would not be physically impacted by the Project.	Outside of the draft Order Limits. The ZTV indicates possible views of WMEL-B, which would be located approximately 1.5km east. In practice views would be screened by the church to the east and trees within the village. As a result, there would be no impact.	Potential change to setting	Medium	No change	No effect
Former schoolroom (NHLE: 1391384)	An unusually intact mid-19th century village school, retaining its original Tudor-style character, cast-iron windows and unaltered interior. Its strong historic and communal value is enhanced by its close group relationship with the adjacent Church of St Peter. It would not be physically impacted by the Project.	Outside of the draft Order Limits. The ZTV indicates possible visibility of WMEL-B, which would be located approximately 1.2km north-east. The building is located on a narrow hedgerow and tree-lined lane in the village and it faces directly up the lane. The site visit indicates that visibility towards the Project is unlikely, and the nature of the building (a former schoolroom) means that the principal contribution of its setting relates to its connection with the church and village, not anything in	Potential change to setting	Medium	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
		the landscape beyond. On that basis there would be no impact.

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Iron Age/Roman site west of Welby (MLE18614)	Buried archaeological site comprising an Iron Age/Roman site including enclosure ditches and other settlement activity, located on a ridge line overlooking a small valley to the west, and the major vale to the south. The site was identified through archaeological surveys but remains undeveloped. It has archaeological interest. It would not be physically impacted by the Project.	The buried archaeological remains have a setting which contributes to their interest. This primarily comprises the topographic location of the site, which is on a ridge line, which informs how we understand its place in the historic landscape and potential intervisibility with contemporary sites. It is within the ZTV for the overhead line to the north. However, the introduction of the proposed overhead line would not alter the legibility of the historic landscape in the context of its archaeological interest. There would, therefore, be no impact.	Potential change to setting	Low to medium	No impact	No effect
St Edmund's Chapel, Sewstern (MLE23131)	Approximated site of medieval chapel of ease known from documentary sources. In addition to sources that reference the chapel in use until around the 16th century, there are also fragments of architectural stone found in the village which may have originated from the chapel. The 19th century tithe award names a plot of land as 'Church Close', which was owned by the churchwardens of the parish. This is the possible location of the chapel and may indicate archaeological remains of the chapel's foundations in the vicinity.	Outside of the draft Order Limits. Although in an area with patrial visibility of the Project, the location of the chapel is only conjectured, so it is not possible to assess potential impact to buried remains from potential change to setting.	Potential change to setting	Unknown	Unknown	Not applicable
Sysonby Lodge Farm, Nottingham Road, Melton Mowbray (MLE23996)	Site of a historic farmstead, no longer extant. There may be buried archaeological remains of the farmstead of archaeological interest, likely to be of low value. Although within the draft Order Limits, no temporary or permanent works are currently proposed that would physically impact the remains.	Buried remains of a farmstead are unlikely to be sensitive to change in their setting.	Potential physical impact	Low	No impact	No effect
Village earthworks near the Church, Wartnaby (MLE3318)	Earthworks of the shrunken medieval village, including at least one fishpond. Remains are of archaeological interest.	Outside of the draft Order Limits and mostly screened from views of the overhead line by woodland to the south. The ZTV indicates possible visibility of WMEL-B, approximately 850m south-west. This would be on the far side of trees and buildings within the village. The earthworks' setting includes the church to the north and the surviving parts of the village to the west, which contribute to the site's value through as connected parts of the historic evolution of the village and, in the case of the church, are contemporary. Mostly screened views of WMEL-B to the west would not change this. Assumed to be no worse than negligible adverse magnitude of change, to be reconsidered at ES.	Possible change to setting	Low to medium	Negligible adverse	Negligible adverse
Medieval village earthworks west of Sewstern (MLE3460)	Village earthworks were noted around Sewstern village, consisting of small close boundaries. Most of the earthworks have been ploughed out, though the westernmost field does appear to still be under grass on c. 2006 aerial photographs. Surviving earthworks and	Area of earthworks on outskirts of village of Welby – mostly outside of ZTV due to screening from topography and other village buildings. While the setting of the earthworks will contribute to their legibility, this primarily relates to the immediately adjacent village which has	Possible change to setting	Low to medium	No change	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	associated below ground remains are of archaeological interest.	shifted/shrunken over time and the construction and operation of the Project approximately 845m south.				
Iron Age site/Roman villa west of Melton Spinney Farm, Scalford (MLE4051)	Immediately south of the draft Order Limits. Substantial scatter of artefacts indicates two possible villa sites with buildings approximately 100m apart. Artefacts include stone, tile, tesserae and 1st-4th century CE pottery. The buried remains indicated by the artefacts would be of considerable archaeological interest.	Located immediately south of the draft Order Limits and, although the ZTV indicates limited or no visibility of the towers due to the topography as the site is immediately adjacent to the Scalford Brook and the ground raises beyond it. The nature of the Roman buildings is not understood in detail, but the artefacts indicate they are likely of high status and their setting is likely to contribute to their value. On the basis of the current ZTV, this is assessed as no change, but this will be reviewed for the ES.	Potential change to setting	Medium to high	No change	No effect
Possible Iron Age enclosure north-east of Framlands Farm, Melton Mowbray (MLE3986)	A double-ditched linear feature was noted on aerial photographs in the 1980s. Interpreted as a large 'D' shaped enclosure constructed up against what seems to be an earlier, rectangular enclosure with an 'entrance' on the east side, and various features perhaps forming an approach to this enclosure. To the south is a double-ditched linear feature. Although extending into the draft Order Limits, no temporary or permanent works are proposed which would have a physical impact on the remains.	The value/significance of any buried remains is unlikely to be impacted by changes to their setting from the Project.	Potential for physical impact	Low-medium	No change	No effect
Area of Medieval ridge and furrow earthworks on the west side of Buckminster (MLE28473)	Area of ridge and furrow identified from aerial imagery and LiDAR. A very small part of the mapped area is included in the draft Order Limits for access. This is a part with no visible earthworks surviving on current LiDAR. At present, it is understood that track matting will be used to prevent impacts to features like this during construction, so there would be no impact. This will be reviewed for the ES.	Small area now in Project boundary for access.	Potential for physical impact	Low to medium	No change	No effect
Great Northern & London & North Western Joint Railway (MLE16075)	Dismantled railway line, opened in 1879, and closed 1962. Earthwork and below ground remains survive. Some archaeological interest, but primarily important for still legible part in the historic landscape. Only a very small part within the draft Order Limits.	The former railway has a functional relationship with its setting which would not be altered by the Project.	Potential for physical impact	Low	Small adverse	Negligible adverse
Midland Railway, Holwell Branch (MLE16123)	Dismantled mineral railway, surviving as earthworks. Built to replace tramways carrying quarried/mined material from Holwell. The first section was opened in 1884. It closed in 1963. Some archaeological interest, but primarily important for still legible part in the historic landscape. Only a very small part within the draft Order Limits.	The former railway has a functional relationship with its setting, particularly the former Holwell works to the south of the draft Order Limits. This relationship would not be altered by the Project.	Potential for physical impact	Low	Small adverse	Negligible adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Scalford Airfield, Melton Mowbray (MLE16181)	First World War landing ground and airfield. Important site – airfields of this date are rare, and lack of later development will have preserved any archaeological remains present from this time. However, there does not appear to be any surviving infrastructure relating to the airfield above ground and, as a grass landing field it is unlikely there were any substantial physical structures. The potential archaeological remains, such as small artefacts surviving in ploughsoil, have the potential to be of archaeological and historic interest, illustrating the lived story of the airfield by those who served there. While the historical interest of the airfield is important, the archaeological remains are likely to be ephemeral and of low value. Only small part within the draft Order Limits. Part of the haul route would pass through the northernmost part of the polygon for the airfield. While some groundworks would be required, any removal of airfield related deposits would be minimal, resulting in no worse than small adverse magnitude of impact.	The airfield will have a functional relationship with its setting which would not be changed by the Project.	Potential for physical impact	Low	Small adverse	Negligible adverse
Turnpike Road, Nottingham to Kettering (MLE20656)	Turnpike road running from Nottingham to Kettering via Melton Mowbray, Oakham, Uppingham and Rockingham. Later became the A606 and A6003. Still extant as a road. It has historic interest as part of the historic landscape. Only a very small part is within the draft Order Limits.	The turnpike road has a functional relationship with its setting which would not be sensitive to change from the Project.	Potential for physical impact	Low	Small adverse	Negligible adverse
Historic routeway, Hose to Burrough Hill (MLE20860)	A historic routeway can be traced across the countryside, running from Burrough Hill, through Melton (along the back of Play Close), to Hose, following various parish boundaries, roads and footpaths. The excavated crossing point at Play Close, Melton had evidence of made ground in the late medieval/early post-medieval period. The former routeway has historic and archaeological interest. Only a very small part of the route is located within the draft Order Limits.	The historic routeway has a functional relationship with its setting which would not be sensitive to change from the Project.	Potential for physical impact. Only partially within the draft Order Limits	Low	Small adverse	Negligible adverse
Turnpike Road, Melton Mowbray to Grantham (MLE21276)	Road running from the Sage Cross, Melton Mowbray, to Grantham. Later became the A607. Still extant as a road. It has historic interest as part of the historic landscape. Only a very small part is within the draft Order Limits.	The turnpike road has a functional relationship with its setting which would not be sensitive to change from the Project.	Potential for physical impact	Low	Small adverse	Negligible adverse
Medieval/Post-Medieval fishpond south of Wartnaby (MLE27131)	Fishpond, thought to be medieval, shown on 1st edition Ordnance Survey map and remaining extant. The fishpond is a part of the historic landscape and may also have archaeological interest in artefactual or paleoenvironmental remains within silted up layers.	Fishponds were functional parts of the historic landscape in the medieval and post-medieval periods. While it may contribute to the setting of other heritage assets, it is unlikely to be sensitive to change within its own setting.	Potential for physical impact (although likely will be	Low to medium	No impact	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	Although within the draft Order Limits, and would be underneath the proposed overhead line, there would be no physical impacts to the fishpond.		avoided through design as it will have ecological sensitivity)			
Ironstone quarry (no. 8), south of Sewstern (MLE27498)	Site of a 20th century ironstone quarry which operated until 1948. The ground has been reinstated but the quarry site would be identifiable archaeologically. However, remains of the quarry would be of very limited archaeological or historical interest. Only a small part is within the draft Order Limits where the haul road would cross over the southernmost extent of the former quarry. Removal of backfilled quarry or other related features would be a negligible adverse magnitude of impact as only a very small part of the area would be affected.	The quarry remains would not have a setting sensitive to change from the Project.	Potential for physical impacts	Negligible	Negligible adverse	Negligible adverse
Jurassic Way (MLE28118) and the Drift, Roman road (MLE5345)	The Jurassic Way is the approximate alignment of a transport corridor known to have been in use since at least the Early Bronze Age. It evolved into later tracks and roadways, including the probable Roman Road which joined Ermined Street via Thistleton. This this section is now the road 'The Drift'. It is possible that remains of the road might survive, although even if precisely located these are likely to be very fragmentary. Any surviving remains of the road would be of archaeological interest. Only a very small part is within the draft Order Limits.	The Jurassic Way is a transport corridor used over a very long period of time. Its setting is not simple to quantify, but it is unlikely that it would be sensitive to change from the Project. Any surviving remains of the Roman road would be associated with Roman sites along its course, and would be understood in a specific topographical context, as the Roman engineers worked with the natural landform when surveying routes. These elements of the road's setting contribute to its value but would not be altered by the Project.	Potential for physical impact	Low	Small adverse	Negligible adverse
Medieval ridge and furrow earthworks east of Buckminster Lodge, Buckminster (MLE28472)	In the 1990s the Lincolnshire NMP recorded ridge and furrow earthworks. Most of it appears to have been ploughed flat. Although it may still be possible to identify traces below ground, these traces have little archaeological or historical value as they are no longer a legible part of the historic environment, and the aerial photographs survive as a record. Only a small part is within the draft Order Limits and is mostly adjacent to an existing road proposed for access. Approximately 2% of the polygon for the ridge and furrow is within the working area proposed for a tower. There could be a small amount of localised removal in this area. This would be a negligible adverse magnitude of impact.	The value/significance of ploughed out traces of ridge and furrow is unlikely to be sensitive to change from the Project.	Potential for physical impacts	Negligible	Small adverse	Negligible adverse
Former Medieval ridge and furrow north-east of Old	Location of ridge and furrow, identified in the 1990s but which current LiDAR indicates is no longer extant. Although it may still be possible to identify traces below	The value/significance of ploughed out traces of ridge and furrow is unlikely to be sensitive to change from the Project.	Potential for physical impacts	Negligible	No impact	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Close Plantation, Garthorpe (MLE28480)	ground, these traces have little archaeological or historical value as they are no longer a legible part of the historic environment, and the aerial photographs survive as a record. Only the northern part of the area of former ridge and furrow is within the draft Order Limits. No temporary or permanent works are proposed that would have a physical impact on them.					
Fishpond at Fishpond Close, Welby (MLE3344)	A large fishpond identified from topographic surveying. On the Welby Tithe Map of 1839 the field is called 'Fishpond Close'. The fishpond has the potential to have deposits of archaeological interest. Although it would have been part of the historic landscape, it is no longer legible above ground without surveying equipment. It is within the draft Order Limits and the access route would come through it. It is located between two towers. Physical impacts may be possible to be minimised/removed by use of track matting or slight diversion. However, only a very small part of the former pond would be impacted if this is not possible, resulting in a small adverse magnitude of impact.	The buried remains of the fishpond are unlikely to be sensitive to change to their setting.	Potential for physical impact	Low	Small adverse	Negligible adverse
Roman road, King Street Lane (MLE3814)	Section of Roman road now followed by a minor road. While remains of the road will likely have been removed by later development of the road in many places, there have been examples elsewhere of Roman roads surviving slightly away from the modern road, including metalling and road side ditches. Any surviving remains of the road would be of archaeological interest.	Any surviving remains of the road would be associated with Roman sites along its course, and would be understood in a specific topographical context, as the Roman engineers worked with the natural landform when surveying routes. These elements of the road's setting contribute to its value but would not be altered by the Project.	Potential for physical impact. Only partially within the draft Order Limits	Low- medium	Small adverse	Negligible – minor adverse
Medieval finds from Potter Hill Farm, Ab Kettleby (MLE8172)	Artefacts may indicate buried remains. However, the part of the polygon reflecting this artefact scatter that is within the draft Order Limits is an existing farm track that would be used for access. If present, buried remains would not be impacted.	Findspot only, remains removed and no longer has a setting at this location.	Potential for physical impact	Unknown	No impact	No effect
Prehistoric cropmark enclosures, Edenham (MLI84040)	Cropmarks indicating buried archaeological remains of enclosures. Within draft Order Limits but no permanent or temporary works proposed that would have a physical impact on the remains.	Buried archaeological remains, unlikely to be sensitive to change in setting.	Potential for physical impact	Low to medium	No impact	No effect
Ridge and furrow (certain) (Turning the Plough: 930)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. This area of ridge and furrow is within the draft Order Limits but no temporary or permanent works are	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	No impact	No effect

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	currently proposed within it. At this stage there would be no impact to the earthworks.					
Ridge and furrow (certain) (Turning the Plough: 995)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. This area of ridge and furrow is within the draft Order Limits to allow for access using existing infrastructure. There would be no impact to the earthworks.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	No impact	No effect
Ridge and furrow (certain) (Turning the Plough: 996)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. Within this area of ridge and furrow, a tower, haul road, construction compound and access would be located. Although many of these elements would be temporary, they are likely to have a physical impact through localised removal of earthworks. Given the relatively large area of this parcel of ridge and furrow that would be impacted, this would be a medium adverse magnitude of impact.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	Medium	**Moderate or minor adverse**
Ridge and furrow (certain) (Turning the Plough: 998)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. A small part of the polygon for this area of ridge and furrow is within the draft Order Limits, but the ridge and furrow would not be impacted.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	No impact	No effect
Ridge and furrow (certain) (Turning the Plough: 1001)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. A small part of the polygon for this area of ridge and furrow would be crossed by an access track. Although it may be possible to limit or remove any physical impacts to the ridge and furrow through use of track matting, it is assumed there would be a worst-case impact from localised removal of earthworks. The majority of the ridge and furrow would not be affected and would remain legible. This would be a small adverse magnitude of impact.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	Small adverse	Negligible or minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Ridge and furrow (certain) (Turning the Plough: 1011)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. A tower is proposed within this area of ridge and furrow, as well as a haul road, covering approximately 10% of the polygon for this area. Although it may be possible to limit or remove any physical impacts to the ridge and furrow through use of track matting or routing of the haul road, it is assumed there would be a worst-case impact from localised removal of earthworks along the haul road. The majority of the ridge and furrow would not be affected and would remain legible. This would be a small adverse magnitude of impact.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	Small adverse	Negligible or minor adverse
Ridge and furrow (certain) (Turning the Plough: 1014)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. A tower is proposed within this area of ridge and furrow, as well as a haul road, covering approximately 10% of the polygon for this area. Although it may be possible to limit or remove any physical impacts to the ridge and furrow through use of track matting or routing of the haul road, it is assumed there would be a worst-case impact from localised removal of earthworks along the haul road. The majority of the ridge and furrow would not be affected and would remain legible. This would be a small adverse magnitude of impact.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	Small adverse	Negligible or minor adverse
Ridge and furrow (certain) (Turning the Plough: 1015)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. A tower is proposed within this area of ridge and furrow, as well as a haul road, covering approximately 10% of the polygon for this area. Although it may be possible to limit or remove any physical impacts to the ridge and furrow through use of track matting or routing of the haul road, it is assumed there would be a worst-case impact from localised removal of earthworks along the haul road. The majority of the ridge and furrow would not be affected and would remain legible. This would be a small adverse magnitude of impact.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	Small adverse	Negligible or minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
Ridge and furrow (certain) (Turning the Plough: 1043)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. The haul road is proposed running through three fields of ridge and furrow. Although it may be possible to limit or remove any physical impacts to the ridge and furrow through use of track matting or routing of the haul road, it is assumed there would be a worst-case impact from localised removal of earthworks along the haul road. The majority of the ridge and furrow would not be affected and would remain legible. This would be a small adverse magnitude of impact.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	Small adverse	Negligible or minor adverse
Ridge and furrow (certain) (Turning the Plough: 1044)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. A tower is proposed within this area of ridge and furrow, as well as a haul road, covering approximately 20% of the polygon for this area, although LiDAR indicates that a smaller part of this area is of well preserved LiDAR. Although it may be possible to limit or remove any physical impacts to the ridge and furrow through use of track matting or routing of the haul road, it is assumed there would be a worst case impact from localised removal of earthworks along the haul road. The majority of the ridge and furrow would not be affected and would remain legible. This would be a small adverse magnitude of impact.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	Small adverse	Negligible or minor adverse
Ridge and furrow (certain) (Turning the Plough: 1061)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. A small part of the polygon for this area of ridge and furrow would be traversed by the haul road, covering approximately 5% of the polygon for this area. Although it may be possible to limit or remove any physical impacts to the ridge and furrow through use of track matting or routing of the haul road, it is assumed there would be a worst case impact from localised removal of earthworks along the haul road. The majority of the ridge and furrow would not be affected and would remain	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	Small adverse	Negligible or minor adverse

Receptor	Statement of significance	Setting assessment (or reason not considered)	Description of potential impact	Value of receptor	Initial magnitude	Initial significance of effect
	legible. This would be a small adverse magnitude of impact.					
Ridge and furrow (certain) (Turning the Plough: 1062)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. This area of ridge and furrow is within the draft Order Limits but no temporary or permanent works are currently proposed within it. At this stage there would be no impact to the earthworks.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	No impact	No effect
Ridge and furrow (certain) (Turning the Plough: 1065)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. A small part of the polygon for this area of ridge and furrow is within the construction area for a tower and there may be localised removal of the earthworks. The area which would be impacted is approximately 2% of the polygon for the ridge and furrow. The majority of the ridge and furrow would not be affected and would remain legible. This would be a small adverse magnitude of impact.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	Small adverse	Negligible or minor adverse
Ridge and furrow (certain) (Turning the Plough: 1068)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. This area of ridge and furrow is within the draft Order Limits but no temporary or permanent works are currently proposed within it. At this stage there would be no impact to the earthworks.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	No impact	No effect
Ridge and furrow (probable) (Turning the Plough: 2704)	Area of ridge and furrow identified during the Turning the Plough Survey (2000). Likely to be of medieval date. Assumed to be of low-medium value – further detail will be obtained through the aerial photograph and LiDAR assessment, which will be reported on in the ES. This area of ridge and furrow is within the draft Order Limits to allow for access using existing infrastructure. There would be no impact to the earthworks.	Although forming part of the historic landscape and the setting of other heritage assets, ridge and furrow itself does not have a setting.	Potential for physical impact	Low to medium	No change	No effect

9C.5 Section 4: Harborough District

Pending greater detail about potential construction impacts. Currently likely to be very limited and localised and not likely to result in significant effects. This will be reported on in the ES. *No operational or maintenance impacts are anticipated as there would be no horizontal and limited vertical realignment and, on this basis, it has been agreed with PINS to scope out assessment of potential impacts to heritage assets as a result of changes to their setting.*

9C.6 Section 5: Northamptonshire

Pending greater detail about potential construction impacts. Currently likely to be very limited and localised and not likely to result in significant effects. This will be reported on in the ES. No operational or maintenance impacts are anticipated as there would be no horizontal and limited vertical realignment and, on this basis, it has been agreed with PINS to scope out assessment of potential impacts to heritage assets as a result of changes to their setting.

9C.7 Heritage assets not impacted

Table 9C.4 Heritage assets not impacted – Section 1

NHLE/ HER No.	Name	Justification for screening out
1004975	Settlement South of Bank House	The site lies within a flat field approximately 4km to the south of the proposed overhead line. Views north from the asset are screened by several belts of woodland. As a result, any change to the setting of the buried archaeological site is considered unlikely.
1005037	Elloe Stone	Outside of the draft Order Limits. The stone stands enclosed on three sides by a hedge on the side of a narrow road, with large arable fields all around. Although within the 3km study area, the actual Project infrastructure would be over 4.3km from the stone on the far side of the G2W Project alignment and would not change any aspect of the stone's setting.
1010673	Churchyard Cross, St Mary's churchyard	Outside of the draft Order Limits. No views from churchyard towards Project - existing vegetative screening around churchyard completely closes off views.
1013529	Churchyard cross, St Mary's churchyard	Outside of the draft Order Limits. Cross stands to south-west of church in churchyard screened by trees around the edges. Although there are some gaps in the screening towards the north-west, in the direction of the Project, views are mostly blocked by adjacent light industrial units. Further, the Project would connect to G2W over 2km to the north-west making potential visibility of the Project through vegetative screening and

NHLE/ HER No.	Name	Justification for screening out
		intervening structures, very unlikely. Part of the **Church of St Mary, Weston** group.
1017217	King's Hall moated site, 480m east of Broadwater House Farm	Outside of the draft Order Limits The asset is not directly accessible, however views towards the asset from adjacent land indicate it lies within large flat arable fields which have long views across the surrounding flat landscape. It is one of a number of moated sites in this area, including the Wykeham Chapel group approximately 6.2km north-west. It is within the 5km study area as it is approximately 4.7km south-east of the draft Order Limits, but it is over 6.7km from the closest part of the Project, which would be on the far side of two passes of G2W infrastructure (which at its closest is approximately 675m from the asset). On this basis, there is no potential for change to the asset's setting from the Project, or from a cumulative change with the G2W scheme.
1019526	Medieval moated site and post-medieval gardens at Cressy Hall	Outside of the draft Order Limits The asset is not publicly accessible but, from adjacent road it is clear that it is well screened by trees. The new overhead line would be approximately 2785m south of the asset which would mean that any glimpsed visibility of the Project between trees would not meaningfully alter the asset's setting.
1064002	Spalding War Memorial	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1064425	Church of St Peter and St Paul	Outside of the draft Order Limits. The church faces south towards the Project but views from it are fully screened by trees along the road in front of the church. As the church is more than 4km from the proposed overhead line, it is unlikely that new towers would compete with the church's spire in the landscape – an assessment supported by lack of visibility of the church from points along the alignment.
1064475	Church of St Mary	As with other assets in the **Church of St Mary, Weston** group, the church is outside of the draft Order Limits in a churchyard screened by trees around the edges. Although there are some gaps in the screening towards the north-west, in the direction of the Project, views are mostly blocked by adjacent light industrial units. Further, the Project would connect to G2W over 2km to the north-west making potential visibility of the Project through vegetative screening and intervening structures, very unlikely.

NHLE/ HER No.	Name	Justification for screening out
1306702	Church of St Paul including attached former Sunday Schoolroom	The church is outside of the draft Order Limits and, although within ZTV, the actual arrangement of the church means there would be very little opportunity for visibility of the Project. The church stands facing a busy road and views around it are limited by trees and buildings. The only possible views of the Project could be from rear windows, which are not a facet of the building which contribute to its values.
1308557	Windmill	Outside the draft Order Limits. The windmill is the tallest standing of its type in the country. It was built in 1822, contemporary with a phase of intensive drainage of the fenlands surrounding the village and reflecting both developing industrial technology and the intensification of local agriculture which provided the grain to be milled. Although the building, which is grade I listed, has clear historic and architectural interest, as well as being a landmark locally, it is located to the south-east of the draft Order Limits, on the far side of the proposed G2W infrastructure, and approximately 1.2km south-east of the proposed connection of the Project's overhead line gantries to the G2W substation. At this distance, and with the presence of other infrastructure in between, the potential visibility of the Project is very limited, and would not alter the landmark quality of the building. The other aspects of its setting's contribution to its value relate to the functional association between an industrial agricultural building and the surrounding farmland and villages, which is not sensitive to change from the Project.
1359295	Church of St Mary	Outside of the draft Order Limits. Completely screened by hedge and village beyond from views towards the Project.
1359332	Aysgoughfee Hall	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1359547	Parish Church of St Mary and St Nicholas	Outside of the draft Order Limits. No views of the Project due to screening from the buildings in the surrounding town.
1064460	Cressy Hall	As with the designated medieval moat and gardens, this asset is outside of the draft Order Limits and inaccessible to the public. Views o from the road indicate that the building is well screened by trees.
1392209	Vicarage to Church of St Paul	Located immediately west of the Church of St Paul (NHLE: 1306702), approximately 3.6km south of the proposed overhead line alignment and outside of the

NHLE/ HER No.	Name	Justification for screening out
		draft Order Limits. The building faces south towards the road, although set back from it. Unlikely to have views of the Project from the rear of the building due to trees and buildings, but any glimpsed views would be at considerable distance and would not alter the building's setting in a way which would have an impact on its value, as its important relationships are with the church and nearby settlement.
1063953	White Hart Hotel	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1063959	The Grange	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1063971	The Limes	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1063983	Garden wall to No 21	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1063991	Willesby	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1063999	Constitutional Club	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1064006	The Vicarage	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1147529	Wisteria Lodge	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1147578	Garden wall to the south of No 4	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1169039	Cley Hall	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1307194	The Sycamores	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.

NHLE/ HER No.	Name	Justification for screening out
1359524	Yew Lodge	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1359525	East Elloe	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1359534	The Masters Lodge	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1359539	Welland Terrace	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1359545	1, Sheep Market	Outside of the draft Order Limits The asset is within Spalding town and has no visibility of the scheme due to the screening from the surrounding buildings.
1359567	Old Office Block of Land Settlement Association	This is a building with architectural and historic interest: built in the 18th century but with medieval elements including vaulted rooms at the south-east end, thought to have been part of a dairy to Spalding Priory. The building now stands within a large area of agricultural greenhouses, meaning that views of and from the building are completely altered from both its medieval and post-medieval landscape and, therefore, any changes from the Project would not have an impact on the asset.
1064431	39, Church Street	Outside of the draft Order Limits. This is one of a pair of post-medieval cottages which face the street (west) through the village of Pinchbeck. In addition to screening from the surrounding village, the village context of these cottages, which would have been within a loose area of settlement prior to modern infill, means that their historic and architectural interest would not be altered by the construction of the Project, approximately 1, 755m north.
1064432	Barn to Number 47	Outside of the draft Order Limits. Former agricultural building adjacent to farmhouse (NHLE: 1308859). Located on main road through village of Pinchbeck. In addition to screening from the surrounding village, the agricultural nature of this building means that its setting contributes to its historic interest primarily through its functional association with the adjacent farmhouse and farmland to the east. This would not be altered by the construction of the Project, approximately 1, 755m north.

NHLE/ HER No.	Name	Justification for screening out
1064434	Pinchbeck Hall	Building is outside of the draft Order Limits and completely screened by tall trees and thick hedges around gardens.
1064437	Mill	Windmill located on the north side of the River Glen, a canalised fenland river which has a roadway on each side with extensive views over flat fields from rear of buildings. Due to the completely flat landscape, it is likely that the proposed overhead line and towers would be visible approximately 2.5km north from the windmill. However, windmills are industrial buildings designed for function rather than aesthetics, although they are appreciated for their aesthetic qualities today, so the principal contribution of the asset's setting to its historic and architectural interest is its connection with the intensively farmed fenland fields and, potentially, the River Glen, which was likely used for transporting grain and/or flour. The distant presence of the Project in the landscape would not alter this.
1064438	Graft House wall and store	Outside of the draft Order Limits and ZTV within the village of Pinchbeck. The house facade faces south and views toward it, from the street, do not progress past the building northward. The rear of the house faces the Project but other buildings likely to buildings screen views.
1064441	War Memorial	The war memorial in Pinchbeck is outside of the draft Order Limits and outside of the ZTV. It stands in a small area of parkland in the centre of the village and views towards the Project are completely screened by trees and buildings.
1064461	Barn at Chesspool House	The building is located outside of the draft Order Limits and the ZTV. It is locally screened by trees and a slight change in the topography between the asset and the Project.
1064468	Seasend Hall	The building is outside of the draft Order Limits and approximately 3.7km due east of the new overhead line where it would connect with G2W. although within the ZTV there are a number of factors which would mean that there would not be any impact. Firstly, the building is deliberately enclosed from surrounding open, low drained agricultural landscape by a high hedgerow around the perimeter. Further, the principal outlook of the building is eastward, away from scheme. There are existing high voltage lines in close proximity, which would be joined by the G2W infrastructure in the landscape to the west of the building, with the Project overhead line extending in a fairly straight line directly

NHLE/ HER No.	Name	Justification for screening out
		west on the far side. This would mean that there would be very limited potential change in the landscape from the Project, and those changes would not alter its relationship to its surrounding farmland.
1064473	Cross 9 metres south of south aisle.	As with other assets in the **Church of St Mary, Weston** group, the cross is outside of the draft Order Limits in a churchyard screened by trees around the edges. The key aspect of the cross' setting which contributes to its value is the relationship between it and the church/its churchyard. Given the limited views and the nature of the asset, there would be no potential for impact from the Project.
1064474	Row of 7 Gravestones 1-6 metres to south of church	As with other assets in the **Church of St Mary, Weston** group, the gravestones are outside of the draft Order Limits in a churchyard screened by trees around the edges. The key aspect of the gravestones' setting which contributes to their value is the relationship between them and the church/its churchyard. Given the limited views and the nature of the asset, there would be no potential for impact from the Project.
1064476	Milestone	Outside of the draft Order Limits. Milestones have a functional relationship with their roadside setting. The construction and operation of the Project, regardless of visibility, would not have an impact on the asset.
1064478	Milestone	Outside of the draft Order Limits. Milestones have a functional relationship with their roadside setting. The construction and operation of the Project, regardless of visibility, would not have an impact on the asset.
1064501	Manor House	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1064502	Hazeldean House	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1064504	Hand Pump	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1064505	20, High Street	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.

NHLE/ HER No.	Name	Justification for screening out
1064506	Harrox House	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1064507	10, High Street	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1146713	41, Church Street, Pinchbeck	Outside of the draft Order Limits. This is one of a pair of post-medieval cottages which face the street (west) through the village of Pinchbeck. In addition to screening from the surrounding village, the village context of these cottages, which would have been within a loose area of settlement prior to modern infill, means that their historic and architectural interest would not be altered by the construction of the Project, approximately 1, 755m north.
1146762	The Vicarage	One of three listed buildings in a group south of the Church of St Mary, Pinchbeck (NHLE: 1064433). Views north, towards the Project, are entirely screened by the church and trees.
1146821	Money Bridge Public House	Outside of the draft Order Limits. 18th century public house built opposite the Money Bridge over the River Glen. The building faces south towards the river and was likely built to serve travellers using the road or river as well as agricultural labourers living nearby. Although there is theoretical visibility of the Project from the rear of the building, the presence of new overhead line approximately 2km north would not change anything about its setting which contributes to its value.
1146855	Pigeoncote at Brownlow House	The pigeoncote is a functional building with a historic and physical relationship to the adjacent Brownlow House. The presence of new overhead line approximately 2km north would not change anything about its setting which contributes to its value.
1146891	Nunnerly House	Outside of the draft Order Limits. This farmhouse is located approximately 3.2km south of the proposed overhead line and towers, although they would be visible due to the completely flat fenland fields the farmhouse and Project are located in. Given the distance, and the nature of the farmhouse's setting as being functionally linked to its surrounding fields, the Project would not alter aspects of the building's setting which contribute to its value.

NHLE/ HER No.	Name	Justification for screening out
1146938	Glen House	The building faces south-west towards the River Glen. Although the landscape between the asset and the Project is extremely flat, it is only partially in the ZTV, reflecting intervening trees and other buildings. There could be some limited views from rear windows, but as the new overhead line and towers would be over 1.5km north, this would have no potential to impact the building's value.
1147210	2, Bell Lane	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1147237	Harrington House	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1147257	The Goddards	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1147281	Brooklyn House with attached stables	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1147289	Clifden House Farmhouse	The asset is located outside of the draft Order Limits and outside of the ZTV. Although within 3km of the draft Order Limits, the asset is located to the south-east of the Project, with the closest gantries approximately 4.75km north-west.
1147422	The Swan Public House	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1147449	Methodist Chapel	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1147465	2, Shivean Gate	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1147551	Lychgate	As with other assets in the **Church of St Mary, Weston** group, the lychgate is outside of the draft Order Limits,

NHLE/ HER No.	Name	Justification for screening out
		marking the entrance to a churchyard screened by trees around the edges. The key aspect of the lychgate's setting which contributes to its value is the relationship between it and the church/its churchyard. Given the limited views and the nature of the asset, there would be no potential for impact from the Project.
1147556	Tomb Chest approximately 3 metres south of Church	As with other assets in the **Church of St Mary, Weston** group, the tomb is outside of the draft Order Limits in a churchyard screened by trees around the edges. The key aspect of the tomb's setting which contributes to its value is the relationship between it and the church/its churchyard. Given the limited views and the nature of the asset, there would be no potential for impact from the Project.
1147591	Barn to the south of Oakleigh House	Outside of the draft Order Limits. The barn was built as a functional agricultural building. It is within the village of Weston so views are screened by the surrounding buildings.
1147728	The Elloe Stone	Also scheduled (see NHLE: 1005037). Outside of the draft Order Limits. The stone stands enclosed on three sides by a hedge on the side of a narrow road, with large arable fields all around. Although within the 3km study area, the actual Project infrastructure would be over 4.3km from the stone on the far side of the G2W Project alignment and would not change any aspect of the stone's setting.
1166359	Chesspool House	The building is outside of the draft Order Limits and views towards the Project are screened by a high hedge.
1166366	Mill at Healey and Dobney Limited	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1253327	K6 Telephone Kiosk at the junction of Broad Lane and High Street	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1261851	Oakleigh House	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Weston, where views beyond the village are screened by the surrounding buildings
1308515	Broadgate House and Farmhouse	Historic farmhouse within a complex of other farm buildings locally screened by trees. Outside of the draft Order Limits and the ZTV.

NHLE/ HER No.	Name	Justification for screening out
1308774	West End Lodge	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Pinchbeck on a reasonably busy road. Opposite Baptist church screens views towards the Project.
1308805	Store at the Vicarage	Outside of the draft Order Limits. One of a group of buildings to the south of the church in Pinchbeck. All views towards the Project are screened by the church and surrounding trees.
1308859	47, Church St	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Pinchbeck, where views beyond the village are screened by the surrounding building.
1359268	The Old Vicarage	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1359270	Lychgate	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1359271	Bayfield	The asset is located outside of the draft Order Limits and outside of the ZTV. It is in the village of Moulton, where views beyond the village are screened by the surrounding buildings.
1359277	Northgate Mill	Former windmill located on the edge of a modern industrial estate. While there would likely be views of the Project from the tower, at ground level facing the mill, views north are screened by surrounding buildings. As an industrial building, designed for function rather than aesthetics, any potential views of the Project would not have an impact on the building.
1359278	The Ship	Outside of the draft Order Limits and, although partially within ZTV, site visit indicates views south are screened by trees along the northern side of the River Glen.
1359279	Otway House	Although there is no public access, aerial mapping indicates that the building is screened on all sides by trees, making views towards the Project (approximately 2.2km north) unlikely.
1359289	Panton House	Outside of the draft Order Limits and the ZTV. Large hedge immediately opposite screens views southwards.
1359292	52, Siltside House	Outside of the draft Order Limits and the ZTV. It is located on the north side of the Risegate Eau (Drain)

NHLE/ HER No.	Name	Justification for screening out
		and views south towards the Project are screened by trees and buildings along the drain.
1359313	Stables and traphouse to The Vicarage	Outside of the draft Order Limits. One of a group of buildings to the south of the church in Pinchbeck. All views towards the Project are screened by the church and surrounding trees.
1359314	Traphouse and stables to Pinchbeck Hall	Building is outside of the draft Order Limits and completely screened by tall trees and thick hedges around gardens.
1359315	Brownlow House	This house faces the River Glen to the south and, although there is theoretical visibility of the Project from the rear of the house, the presence of mature trees along the property boundary, and the distance of approximately 2km to the proposed towers and overhead line, would mean that this would be very limited. As a result of these factors, it is unlikely that the Project would alter anything about the building's setting which contributes to its value.
1454594	Moulton Seas End War Memorial	Outside of the draft Order Limits and the ZTV. All views towards the Project screened by surrounding buildings in the village.
1481070	The Mermaid Inn	Outside of the draft Order Limits and the ZTV. Former roadside inn, in village of Surfleet. It faces the road to the east. Even if there were views to the Project (to the south) these would not alter the building's setting, which principally contributes through the relationship of the inn with the road and the village.
1482125	Surfleet War Memorial	Outside of the draft Order Limits and the ZTV. All views towards the Project screened by surrounding buildings, particularly the Church of St Lawrence to the south, and by the hedge which screens the memorial from three sides.
-	Pinchbeck Conservation Area	Although approximately 1.4km south of the proposed overhead line across flat fenland fields, the village of Pinchbeck itself has lots of screening from trees and buildings with very few views northwards and it is almost entirely outside of the ZTV.
-	Moulton Conservation Area	The architectural character and sense of place within the conservation area is shaped by its sense of enclosure, with limited views outwards. The nearest gantries for the Project are approximately 4km north-west and would not have an impact on the conservation area.

NHLE/ HER No.	Name	Justification for screening out
MLI116216	Possible pit, Small Drove, Weston	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI122515	Riverside, Gosberton	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122516	Unnamed farmstead (Beck Farm), Gosberton	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122517	Lowbrand Barn, Gosberton	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122586	Unnamed farmstead, Surfleet	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122587	Unnamed farmstead, Surfleet	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122596	Beach Bank Farm (Surfleet Cheal House), Surfleet	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122597	Drove Farm, Surfleet	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122598	The Chestnuts, Surfleet	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122600	Beach Bank Farm, Surfleet	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122601	Beach Farm Cottage (Beach Farm), Surfleet	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural

NHLE/ HER No.	Name	Justification for screening out
		buildings and fields. The Project would not alter this relationship.
MLI122602	Laurel House, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122603	College Farm, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122610	Unnamed farmstead (Woodbine House), Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122611	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122612	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122613	Vicarage Farm, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122614	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122615	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122616	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122617	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.

NHLE/ HER No.	Name	Justification for screening out
MLI122618	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122621	Cowbit Farm, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122622	White House Farm, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122643	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122644	Bridge Farm, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122645	Westfield House, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122697	Burtey Fen Farm North, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122699	Burtey Fen Farm South, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122716	Oak Wood Barn, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122717	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122718	Bandera, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural

NHLE/ HER No.	Name	Justification for screening out
		buildings and fields. The Project would not alter this relationship.
MLI122731	The Stables, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122732	Sandpit Nurseries, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122733	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122734	Newlands Farm (The Newlands), Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122735	White Cross Farm, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122739	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122742	Unnamed farmstead, Pinchbeck	Although within the draft Order Limits, this farmstead is no longer extant.
MLI122743	Marsh Farm, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122744	Marsh Farm, Spalding	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122745	Home Farm, Spalding	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122917	White House Farm, Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural

NHLE/ HER No.	Name	Justification for screening out
		buildings and fields. The Project would not alter this relationship.
MLI122919	Top Yard, Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122920	Unnamed farmstead (Weston Marsh Farm), Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122921	(Marsh House), Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122922	Unnamed farmstead, Weston	Outside of the draft Order Limits. This is a demolished farmstead. There is the potential for archaeological remains, but these are unlikely to be impacted by changes to their setting from the Project.
MLI22923	Cowhirne Farm, Weston	Outside of the draft Order Limits. This is a demolished farmstead. There is the potential for archaeological remains, but these are unlikely to be impacted by changes to their setting from the Project.
MLI22924	Shepherds Farm, Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122925	St Lambert's Hall, Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122926	Chestnut House (White House), Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122927	Church Farm, Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122928	Unnamed farmstead, Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.

NHLE/ HER No.	Name	Justification for screening out
MLI122929	Unnamed farmstead, Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122930	Mount Pleasant, Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122935	Unnamed farmstead, Weston	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI124932	Undated features, Dean Close, Weston	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI124942	Medieval Saltmaking Waste, Sunnydale Close, Surfleet	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI124943	Undated Pit, Sunnydale Close, Surfleet	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI124944	Medieval Pit, Sunnydale Close, Surfleet	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI124945	Medieval Pottery Scatter, Sunnydale Close, Surfleet	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI12520	Pillbox, St Lambert's Hall, Weston	Outside of the draft Order Limits and the ZTV. Views towards the Project are screened by trees.
MLI125749	Farm Buildings, Crowtree Farm, Surfleet	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI125896	Milestone, Surfleet Road, Pinchbeck	Outside of the draft Order Limits. Milestone has important but limited setting relationship with roadway. This would not be impacted by the Project.
MLI126055	Surfleet Brewery	Outside of the draft Order Limits. Brewery has important but limited setting relationship with adjacent public house. This would not be impacted by the Project.
MLI126650	Primary School, Surfleet	Outside of the draft Order Limits. School buildings have settings within communities, and the visual relationship

NHLE/ HER No.	Name	Justification for screening out
		and interconnectivity contributes to their legibility and value. This would not be impacted by the Project.
MLI126656	Former school, Weston	Outside of the draft Order Limits. School buildings have settings within communities, and the visual relationship and interconnectivity contributes to their legibility and value. This would not be impacted by the Project.
MLI127119	Medieval features, Pinchbeck	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI127120	16th-17th Century jetton, Pinchbeck	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI127121	16th-17th Century crotal bell, Pinchbeck	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI127125	Undated features, Pinchbeck	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI127126	Undated features, Pinchbeck	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI127468	Medieval/ Post-Medieval ditches, Land at Surfleet Road, Pinchbeck	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI127472	Possible undated ditch, land at Surfleet Road	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI127633	Early Medieval/Medieval activity on land at 20 Gosberton Road, Surfleet	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20121	Romano-British Material	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20123	Early to Middle Saxon site at Chopdike Drove, Gosberton	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20126	Early Saxon pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.

NHLE/ HER No.	Name	Justification for screening out
MLI20127	Early Saxon pottery	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI20131	Possible drove road	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20132	Undated cropmarks	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20139	Medieval settlement of Surfleet	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20141	Medieval pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20142	Undated cropmarks	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20143	Romano-British site	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20146	Possible Iron Age pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20147	Undated cropmarks	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20149	Possible duck decoy	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20194	Saxon Settlement	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20197	Saxon Settlement	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20200	Iron Age pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.

NHLE/ HER No.	Name	Justification for screening out
MLI20201	Romano-British site	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20202	Roman Site	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20203	Romano-British site	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20204	Possible Iron Age pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20205	Romano-British Site	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20206	RB/Early Saxon Settlement	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20207	Romano-British/Early Saxon site	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20215	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI20216	Romano-British cropmarks	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20219	Undated cropmarks	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20220	Undated cropmarks	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20222	Undated cropmarks	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI20329	Moated site	Outside of the draft Order Limits. Partially within the ZTV along its western edge. The majority of the moated site has tree coverage, which limits views towards the Project. The site has had limited investigation and is recorded as being ‘undated’ in the HER. LiDAR imagery

NHLE/ HER No.	Name	Justification for screening out
		shows a watercourse but little trace of earthworks and it is not shown on historic mapping. It can be assumed that the site has at least archaeological interest, but it is not known whether the remains would have a setting sensitive to change. However, as the moated site is located approximately 2.1km east of the point where the Project's gantries would connect to the G2W project, it is unlikely that there would be a significant effect from changes to its setting.
MLI20330	Site of Wimberley Hall	Outside of the draft Order Limits. Combination of buried medieval remains and 19th century farmstead.
MLI20331	The settlement of Weston	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI22426	Saxo-Norman pottery near level crossing	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI22466	Possible 18th Century brick-making site, Surfleet	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI22467	Medieval pottery, Surfleet	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI23207	Moated site at Cheal House Farm	Outside of the draft Order Limits and mostly outside of the ZTV due to tree screening along Cheal Road to the south and the buildings at Cheal House Farm. The site is an earthwork, interpreted as a moated site, which has possibly been levelled in recent years. If there are any surviving remains, they would be of archaeological interest. These would have a setting linked to the surrounding agricultural landscape and, potentially, the adjacent Cheal House, which may have its origins as a later house for the family occupying an earlier moated site. Glimpsed views of the Project would not alter these aspects of its setting and, as a result, it is unlikely there would be any impacts.
MLI23595	Undated ditch, Parsons Drove, West Pinchbeck	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI23632	Medieval coin hoard found	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.

NHLE/ HER No.	Name	Justification for screening out
MLI81912	Medieval settlement features, Milestone Lane	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI81913	Undated linear features, Milestone Lane	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI81914	Undated features, Bacon's Lane	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI81915	Early Medieval/Medieval activity, Bacon's Lane	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI81916	Late Medieval activity, Bacon's Lane	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI83167	Undated ditch and ring gullies, Spalding Golf Course	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI85256	Undated trackway on land at Hall Gate, Weston	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI85278	Post-Medieval artefact scatter, Spalding Energy Gas Pipeline	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI85279	Post-Medieval artefact scatter, Spalding Energy Gas Pipeline	Outside of the draft Order Limits. Artefact scatter may indicate buried remains but identified remains have been removed and have no setting.
MLI85841	Methodist Chapel, Surfleet	Outside of the draft Order Limits. Possible views towards the Project from the rear of the building. Set back from the road and enclosed by garages and other residential buildings as it no longer appears to be in use as a chapel. While there might be views from the rear, these do not contribute to its historic and architectural interest as a non-conformist chapel, which relate more to its connections to the village.
MLI86087	Undated natural watercourses, Woolhall Farm, Weston	Outside of the draft Order Limits. Natural feature.

NHLE/ HER No.	Name	Justification for screening out
MLI87004	Post-Medieval cess pit and path at Park Lane, Surfleet	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI87291	Undated ditches at Wool Hall Farm, Wykeham	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI87292	Undated enclosure at Wool Hall Farm, Wykeham	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI88684	Possible archaeological features west of Vicarage Farm, Pinchbeck	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI89196	Undated feature, Stockhouse Lane, Surfleet	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI89197	Post-Medieval features, Stockhouse Lane, Surfleet	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI89823	Undated droveway and enclosure cropmarks near Wool Hall Farm	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI89833	Medieval saltern site adjacent to the sea bank and West Marsh Road	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI89834	Medieval saltern site adjacent to the sea bank and Pinchbeck Marsh Pumping Station	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI90962	Post-Medieval features, 76 Milestone Lane, Pinchbeck	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI92282	Late Saxon activity, Weston Bypass, north of Weston village	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLI92283	Late Saxon activity, Weston Bypass, Weston	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI92284	Medieval activity, eastern end of Weston Bypass, Weston	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI92285	Medieval activity, northeast of Weston village, Weston Bypass	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI97361	Undated ditch on the route of a pipeline between Risegate and West Pinchbeck	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI98445	Medieval Sea Bank in Weston	Outside of the draft Order Limits. The sea bank is a functional structure, and its setting would remain legible and not be impacted by overhead line construction.
MLI98446	Medieval sea bank ('Roman Bank') in Moulton	Outside of the draft Order Limits. The sea bank is a functional structure, and its setting would remain legible and not be impacted by overhead line construction.
MLI99260	Site of a Methodist chapel, High Road, Weston	Outside of the draft Order Limits. No longer extant.

Table 9C.5 Heritage assets not impacted – Section 2

NHLE/ HER No.	Name	Justification for screening out
1004952	Aslackby Castle	Outside of the draft Order Limits, approximately 4.8km north of the proposed overhead line. The scheduled monument is on higher ground to the north (behind) the church. Views towards the Project are screened by buildings and the intervening topography.
1005023	Bourne Castle	Outside of the draft Order Limits and approximately 4.7km south-east of the proposed overhead line at its closest point. Views north from Bourne Castle are screened by the surrounding town. There would be no change to its setting from the Project.
1005039	The Round Hills earthwork	Outside of the draft Order Limits and approximately 4.8km north of the proposed

NHLE/ HER No.	Name	Justification for screening out
		overhead line. Views south are completely screened by dense block of woodland planting immediately south of the monument.
1009200	Rippingdale village cross	Outside of the draft Order Limits and the ZTV. Located in the centre of the village by the road and views south are screened by buildings in the village.
1009201	Dunsby village cross	Outside of the draft Order Limits and the ZTV. Located in the centre of the village on a small green and views south are screened by buildings.
1009202	Churchyard cross, St Michael's churchyard	Outside of the draft Order Limits and the ZTV. Located in the churchyard south of the church, which blocks views northwards.
1009203	Swinstead village cross	Outside of the draft Order Limits and the ZTV. Located on an island in the main road through the village, with the buildings on the northern side of the road blocking views northwards.
1009204	Corby Glen market cross	Outside of the draft Order Limits. Located in the marketplace in the centre of Corby Glen, which is an enclosed space with buildings on all sides which screen views.
1009205	Churchyard cross, St Mary's churchyard (N Witham)	Outside of the draft Order Limits. Although relatively close to the Project, views south within the North Witham churchyard are screened by buildings.
1009206	Churchyard cross, St Nicholas's churchyard, Gunby	Outside of the draft Order Limits. Although relatively close to the Project, views south from the part of the churchyard where the cross is located, are completely screened by a high, ivy-covered hedge.
1014681	Castle Bytham Castle, associated town defences and ponds	Outside of the draft Order Limits approximately 5km south of the proposed overhead line. Views northwards are screened by village and rising topography.
1016472	Decoy pond 350m south of Aslackby Decoy Farm	Outside of the draft Order Limits. Although not directly accessible, observation from adjacent road indicates that the monument is set lower topographically than the landscape to the south. It is within an area of intensive agriculture, which links in part to the functional history of duck decoy. Today the site survives below ground in a ploughed field, but it is assumed that it was once in a wooded area used for screening the traps

NHLE/ HER No.	Name	Justification for screening out
		laid for the ducks. Due to the loss of original context, and the functional nature of the archaeological remains, as well as the likely limited potential for views of the Project due to the topography, it is unlikely that there would be any impacts.
1016969	The Hermitage moated site, 400m north east of Corby Pasture Farm	Outside of the draft Order Limits. Views south towards the Project are screened by two hedgerows, one immediately south of the monument and one on the other side of the road.
1062325	Church of St. John the Baptist, South Witham.	Outside of the draft Order Limits and the ZTV. Views from the churchyard, which faces south away from the Project, are screened by the village buildings to the north.
1062362	Woolsthorpe Manor House	Outside of the draft Order Limits. Views south towards the Project are screened by the topography and the trees in the foreground.
1062750	Aslackby Manor House	Outside of the draft Order Limits. Views south towards the Project are screened by the topography and buildings within the village.
1062757	Church of St. James, Aslackby	Outside of the draft Order Limits. Although the church is on the highest ground in the village the topography and woodland in views south prevent long distance views towards the Project, which is approximately 4.8km south.
1062858	Church of St. Thomas A Becket	Outside of the draft Order Limits. Views south from the church and its churchyard are screened by the Manor House.
1146549	Church of St. Bartholomew	Outside of the draft Order Limits. Views south very screened by trees around the boundary of the churchyard.
1146587	Church of St. Michael and All Angels	Outside of the draft Order Limits. Views north, towards the Project, are screened by trees within the churchyard for the most part. A small area in the eastern part of the churchyard has longer views, but these are also screened by buildings.
1166383	Church of St. John the Baptist	Outside of the draft Order Limits and the ZTV. Views from churchyard are enclosed.
1168300	Church of St. James, Skillington	Outside of the draft Order Limits, approximately 5km north of the proposed overhead line. Although there are partially screened views south from the churchyard, it is unlikely that towers

NHLE/ HER No.	Name	Justification for screening out
		would be visible given the considerable distance and woodland blocks on the horizon.
1260249	Parish church of St. Peter and St. Paul	Outside of the draft Order Limits within Bourne. Views north from Bourne are completely screened.
1260603	Church of St. Andrew, Rippingdale	Outside of the draft Order Limits and the ZTV. Views south are screened by buildings within the village.
1308771	Church of St. Andrew, Irnham	Outside of the draft Order Limits and the ZTV. The church is on high ground set back from village street and enclosed by a wall that screens views looking south.
1317197	Church of St. Thomas A Becket, Burton le Coggles	Outside of the draft Order Limits and ZTV. Views south are screened by the village.
1360095	Church of St. James, Castle Bytham	Outside of the draft Order Limits. Views north towards the Project are extremely well screened by trees.
1360309	Church of St. John the Baptist, Colsterworth	Outside of the draft Order Limits and the ZTV. Views within Colsterworth are screened towards the Project.
1360327	Church of St. Mary, North Witham	Outside of the draft Order Limits and the ZTV. Although relatively close to the Project, views south from the churchyard are screened by buildings.
1062712	Heggy's Cottage	Outside of the draft Order Limits and ZTV. Although located in Haconby, relatively close to the proposed overhead line, the building is in a quiet and enclosed part of the village, with buildings and trees screening views.
1062773	Castle Farm House	Outside of the draft Order Limits. The site visit indicates that this building is unlikely to be sensitive to change from the Project as it is screened by mature trees around it, with only its chimneys visible from publicly accessible areas.
1062846	The Priory	Outside of the draft Order Limits. Despite elevation, the asset is screened by later village development around it. Longer distance views towards the Project are further blocked by closer ridge line.
1073203	Stoken Hall	Outside of the draft Order Limits. Located within a group of modern buildings. Views toward the

NHLE/ HER No.	Name	Justification for screening out
		Project blocked by rising topography and area of forestry (plantation) woodland.
1164977	Church of St Andrew	Church screened by conifers - No impact, screened by trees. Comparatively shorter tower than other churches, but potentially still visible in landscape from other directions.
1177828	Church of St Nicholas	Outside of the draft Order Limits and the ZTV within village of Thistleton.
1259132	Red Hall	Outside of the draft Order Limits. Located within Bourne – all views towards the Project screened by the townscape.
1317485	Dowsby Hall	Outside of the draft Order Limits. Although no direct public access, viewed from the village it appears to be well screened by trees.
1360115	Gateway to Aslackby Manor	Outside of the draft Order Limits in the village of Aslackby. Views towards the Project screened by the topography.
1361819	Church of St Nicholas	Outside of the draft Order Limits. Entirely screened by trees, the rest of the village and topography between the church and the Project.
1062317	Cross in the churchyard of Church of St Mary	Outside of the draft Order Limits and the ZTV within village of North Witham. Although relatively close to the proposed overhead line, views south are screened by the topography and the buildings south of the churchyard.
1062318	Gravestone, 5 paces south of tower in churchyard of St Mary	Outside of the draft Order Limits and the ZTV within village of North Witham. Although relatively close to the proposed overhead line, views south are screened by the topography and the buildings south of the churchyard.
1062319	Pigeoncote at Manor House	Outside of the draft Order Limits and the ZTV within village of North Witham. Although relatively close to the proposed overhead line, views south are screened.
1062324	14, Church St	Outside of the draft Order Limits and the ZTV within village of South Witham. Although relatively close to the proposed overhead line, views north are screened.
1062326	2, Church St (South Witham)	Outside of the draft Order Limits and the ZTV within village of South Witham. Although relatively close to the proposed overhead line, views north are screened.

NHLE/ HER No.	Name	Justification for screening out
1062353	10, Bourne Road	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Although relatively close to the scheme, the asset faces into the village and views south are screened by modern development.
1062355	39 and 41, High Street	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1062356	Acacia Cottage	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1062357	53, High Street	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1062358	Garden wall to Home Farm	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1062359	War Memorial	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1062360	2 chest tombs at south east end of Church of St John the Baptist, beside main footpath	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1062366	Manor House	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1062687	Wall and gate lodges to The Grange	Outside of the draft Order Limits and the ZTV within the village of Morton. Views north are screened by existing built or natural features.
1062688	18, High Street	Outside of the draft Order Limits and the ZTV within the village of Morton. Views north are screened by existing built or natural features.
1062689	6, Station Road	Outside of the draft Order Limits and the ZTV within the village of Morton. Views north are screened by existing built or natural features.
1062690	War Memorial	Outside of the draft Order Limits and the ZTV within the village of Morton. Views north are screened by existing built or natural features.
1062708	3, Chapel Lane	Outside of the draft Order Limits and the ZTV within the village of Haconby. Although relatively

NHLE/ HER No.	Name	Justification for screening out
		close to proposed overhead lines, views north are screened by existing built or natural features.
1062709	Gateway and garden wall of Fir Tree House	Outside of the draft Order Limits and the ZTV within the village of Haconby. Although relatively close to proposed overhead lines, views north are screened by existing built or natural features.
1062710	Beam Ends House	Outside of the draft Order Limits and the ZTV within the village of Haconby. Although relatively close to proposed overhead lines, views north are screened by existing built or natural features.
1062711	3 table tombs to south of church porch	Outside of the draft Order Limits and the ZTV within the village of Haconby. Although relatively close to proposed overhead lines, views north are screened by existing built or natural features.
1062714	Threshing barn at Haconby Hall	Outside of the draft Order Limits and the ZTV within the village of Haconby. Although relatively close to proposed overhead lines, views north are screened by existing built or natural features.
1062715	14, Hall Lane	Outside of the draft Order Limits and the ZTV within the village of Haconby. Although relatively close to proposed overhead lines, views north are screened by existing built or natural features.
1062723	House directly opposite The Old Rectory and to the east of Irene House	Outside of the draft Order Limits and the ZTV within the village of Kirby Underwood. Views south are limited.
1062724	Milestone	Outside of the draft Order Limits within ZTV. Milestone has important but limited setting relationship with roadway. This would not be impacted by the Project.
1062725	45 and 47, Haconby Lane	Outside of the draft Order Limits and the ZTV on the outskirts of Haconby. Although relatively close to proposed overhead lines, views north are screened by existing built or natural features.
1062726	41, High Street	Outside of the draft Order Limits and the ZTV within the village of Morton. Views north are screened by existing built or natural features.
1062727	19, High Street	Outside of the draft Order Limits and the ZTV within the village of Morton. Views north are screened by existing built or natural features.
1062728	44, High Street	Outside of the draft Order Limits and the ZTV within the village of Morton. Views north are screened by existing built or natural features.

NHLE/ HER No.	Name	Justification for screening out
1062729	Milestone	Outside of the draft Order Limits within ZTV. Milestone has important but limited setting relationship with roadway. This would not be impacted by the Project.
1062768	The Spring Cottage	Outside of the draft Order Limits within ZTV within the village of Morton. Setting assessment concluded its setting is concerned with village context. This would not be impacted by the Project.
1062769	Milepost	Outside of the draft Order Limits within ZTV. Milestone has important but limited setting relationship with roadway. This would not be impacted by the Project.
1062771	Mechanics cottage and adjacent cottage (opposite old stables)	Outside of the draft Order Limits and ZTV indicates limited potential visibility. Site visit indicates that the cottage's setting is the village road it is located on, with visual and historical relationships with the other buildings close by in Irnham. Views unlikely given village screening and would not affect the setting of the asset.
1062787	Tower Farmhouse	Outside of the draft Order Limits and ZTV on outskirts of Swinstead. Screened to the north by shelter band of woodland, however a proposed access track opens opposite so temporary impact possible.
1062793	Ivy Cottage and adjacent cottage	Outside of the draft Order Limits and ZTV within the village of Grimsthorpe. Views screened by topography.
1062794	Rose Cottage	Outside of the draft Order Limits and ZTV within the village of Grimsthorpe. Views screened by topography.
1062795	The Dairy	Outside of the draft Order Limits and ZTV within the village of Grimsthorpe. Views screened by topography.
1062796	Old Post Office cottage	Outside of the draft Order Limits and ZTV within the village of Grimsthorpe. Views screened by topography.
1062797	Black Horse Inn	Outside of the draft Order Limits and ZTV within the village of Grimsthorpe. Views screened by topography.

NHLE/ HER No.	Name	Justification for screening out
1062798	Right hand stable block to Black Horse Inn	Outside of the draft Order Limits and ZTV within the village of Grimsthorpe. Views screened by topography.
1062800	Milestone by Home Farm	Outside of the draft Order Limits and ZTV by gates Grimsthorpe estate. Milestone has important but limited setting relationship with roadway. This would not be impacted by the Project.
1062802	Bulby Hall	Outside of the draft Order Limits and ZTV within the village of Bulby. Views south screened by topography.
1062803	Grange Farmhouse	Outside of the draft Order Limits and ZTV within the village of Bulby. Views south screened by topography.
1062804	Barn and stables at Grange Farm	Outside of the draft Order Limits and ZTV within the village of Bulby. Views south screened by topography.
1062805	6, 7 and 8, Corby Road	Outside of the draft Order Limits and ZTV within the village of Irnham. Views south across Corby Road are blocked by the St Andrew's Church and churchyard which rises above.
1062806	12-14, Corby Road	Outside of the draft Order Limits and ZTV within the village of Irnham. Views south across Corby Road are blocked by the St Andrew's Church and churchyard which rises above.
1062807	Griffin Inn	Outside of the draft Order Limits and ZTV within the village of Irnham. Views south are blocked by topography.
1062808	Gateway, Railings to churchyard of Church of St. Andrew	Outside of the draft Order Limits and ZTV within the village of Irnham. Views south are blocked by St Andrew's Church, tree screening and topography.
1062809	Hawthorpe Farmhouse	Outside of the draft Order Limits and ZTV within the hamlet of Hawthorpe. Views south are limited by topography.
1062810	Hawthorpe Farm Cottages	Outside of the draft Order Limits and ZTV within the hamlet of Hawthorpe. Views south are limited by topography.
1062818	Market Cross, Corby Glen	Also a Scheduled Monument. Outside of the draft Order Limits. Located in the marketplace in the

NHLE/ HER No.	Name	Justification for screening out
		centre of Corby Glen, which is an enclosed space with buildings on all sides which screen views.
1062827	41 and 43, Main Street	Outside of the draft Order Limits and ZTV within the village of Edenham. View north towards project are screened.
1062829	Gate piers to churchyard of Church of St. Michael	Outside of the draft Order Limits and ZTV within the village of Edenham. The setting is limited to the churchyard and village, which will not be affected by the Project.
1062830	Pair of tombs at east end of Church of St. michael (Baron and Lady Willoughby De Eresby)	Outside of the draft Order Limits and ZTV within the village of Edenham. Views north are screened by trees in this part of churchyard.
1062831	Tomb chest in courtyard 16 yards SSW from porch of Church of St. Michael (Thomas Spier)	Outside of the draft Order Limits and ZTV within the village of Edenham. The asset is located in a part of the churchyard with views northward however, views are screened by topography and built development beyond.
1062832	Primary School	Outside of the draft Order Limits and ZTV within the village of Edenham. Views north are screened by topography or built development.
1062847	Milestone, on north side of B676 near Heath Farm	Outside of the draft Order Limits immediately south of WMEL-A. Milestone has important but limited setting relationship with roadway. This would not be likely to be impacted by the Project, however effects resulting from proposals for road improvement will be monitored.
1062865	Bitchfield House	Outside of the draft Order Limits and ZTV within the village of Bitchfield facing into own gardens or building clusters. While extended views of taller structures on the hill to the south may be possible from upper floors, there are no intentionally designed long-distance views south.
1062866	Crown Inn with attached barn	Outside of the draft Order Limits and ZTV within the village of Bitchfield facing into own gardens or building clusters. While extended views of taller structures on the hill to the south may be possible from upper floors, there are no intentionally designed long-distance views south.
1062867	Home Farmhouse	Outside of the draft Order Limits and ZTV within the village of Bitchfield facing into own gardens or building clusters. While extended views of taller structures on the hill to the south may be possible

NHLE/ HER No.	Name	Justification for screening out
		from upper floors, there are no intentionally designed long-distance views south.
1062870	Old Rectory	Outside of the draft Order Limits and ZTV within the village of Burton le Coggles. Although relatively close to proposed overhead lines, views south are screened by existing built environment within the village.
1062871	Barn on street frontage at Manor Farm	Outside of the draft Order Limits and ZTV within the village of Burton le Coggles. Although relatively close to proposed overhead lines, views south are screened by existing built environment within the village.
1073206	Barn at Grange Farm	Outside of the draft Order Limits and ZTV within the village of Thistleton. Views north are screened by topography and/ or built features.
1073207	Barn Close	Outside of the draft Order Limits and ZTV within the village of Thistleton. Views north are screened by topography and/ or built features.
1078192	K6 telephone kiosk	Outside of the draft Order Limits and ZTV within the village of Edenham. Views north are limited by topography and/ or built features.
1146544	45, Main Street	Outside of the draft Order Limits and ZTV within the village of Edenham. Views north are limited by topography and/ or built features.
1146559	Former weighbridge cabin to Edenham and Little Bytham Railway at Copy Lawn Farm	Outside of the draft Order Limits and ZTV within to the north of Edenham. Views north are limited by topography and/ or built features.
1146650	Churchyard cross 5 metres south west of Church of St. Michael	Outside of the draft Order Limits in the village of Edenham. The asset is located within the wooded part of churchyard. Views north are screened by the church and tree screening.
1146665	Set of three gravestones 23 yards SW of south porch of Church of St. Michael (one to John Doughty)	Outside of the draft Order Limits in the village of Edenham. The asset is located within the wooded part of churchyard. Views north are screened by the church and tree screening.
1146759	Pump at Home Farm	Outside of draft Order Limits. Functional structure with setting relationship with adjacent Home Farm (NHLE: 1062799). This would not be affected by the construction or operation of the Project.

NHLE/ HER No.	Name	Justification for screening out
1146777	Stable block at Wood Farm	Outside of the draft Order Limits and ZTV within the village of Bulby. Views south screened by topography and/ or built features.
1146779	Pump at Grange Farm	Outside of the draft Order Limits and ZTV within the village of Bulby. Views south screened by topography and/ or built features.
1146785	Former school and school house	Outside of the draft Order Limits and ZTV within the village of Irnham. Views south screened by topography and/ or built features.
1146820	Stables and coach house to the Griffin Inn	Outside of the draft Order Limits and ZTV within the village of Irnham. Views south screened by topography and/ or built features.
1146836	16 and 17, Corby Road	Outside of the draft Order Limits and ZTV within the village of Irnham. Views south screened by topography and/ or built features.
1146884	2 barns, stables and farm buildings, Hawthorpe Farm	Outside of the draft Order Limits and ZTV within the hamlet of Hawthorpe. Views south screened by topography.
1147118	Waggon hovel and stores at Tower Farm	Outside of the draft Order Limits and ZTV on outskirts of Swinstead. Screened to the north by shelter band of woodland, however a proposed access track opens opposite so temporary impact possible.
1147201	Old Rectory	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1147249	Chest tomb at east end of Church of St. John the Baptist	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1147261	Former reading room and library	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1147268	Thirtle	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1147318	4, Spring Lane	Outside of the draft Order Limits and the ZTV within the village of Colsterworth. Views south are screened by modern development.
1147921	Church of St. Peter	Outside of draft Order Limits. Although within ZTV, site visit indicates that views from the

NHLE/ HER No.	Name	Justification for screening out
		church and churchyard are screened by former rectory building to the south (NHLE: 1062351).
1165140	The Old Rectory	Outside of the draft Order Limits and the ZTV within the village of Dunsby. The asset is not visible from Main Road due to tree screening. Views south are likely to be limited as a result.
1165143	Cottage next, east to Laburnam Cottage	Outside of the draft Order Limits and the ZTV within the village of Dunsby. Views south are screened by the Church of All Saints (NHLE: 1165123).
1165148	The Cottage	Outside of the draft Order Limits and the ZTV within the village of Dunsby. Its setting is limited to its village street context. The Project is unlikely to affect this relationship.
1165529	Manor House and attached outbuilding to roadside front	Outside of the draft Order Limits and ZTV within the village of Bitchfield facing into own gardens or building clusters. While extended views of taller structures on the hill to the south may be possible from upper floors, there are no intentionally designed long-distance views south.
1165676	Barn at Manor Farm	Outside of the draft Order Limits and ZTV within the village of Burton le Coggles. Although relatively close to proposed overhead lines, views south are screened by existing built environment within the village.
1165854	Horse monument in Morkery Woods, Grid Reference 955185	Outside of the draft Order Limits and ZTV. The asset is set within Morkery Woods, limiting visibility north towards the Project.
1165869	Stables and outbuildings at Haconby Hall	Outside of the draft Order Limits and ZTV within the village of Haconby. Views north are limited by topography and/ or built features.
1165890	Farm building to west of Number 3 Chapel Lane	Outside of the draft Order Limits and ZTV within the village of Haconby. Views north are limited by topography and/ or built features.

MLI122126	Unnamed farmstead, Haconby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122127	Unnamed farmstead, Haconby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122128	Middle Farm, Haconby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122129	Bakers Farm, Haconby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122130	Unnamed farmstead, Haconby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.

NHLE/ HER No.	Name	Justification for screening out
MLI122132	Unnamed farmstead, Haconby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122133	Unnamed farmstead, Haconby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122134	Dunsby Hall Farm, Dunsby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122135	White House, Dunsby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122136	Ash Tree Cottage, Dunsby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122137	Fen Farm, Dunsby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122138	Unnamed farmstead, Dunsby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122139	French's Farm, Dunsby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122140	Dunsby Fen Farm, Dunsby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122141	Brackens Farm, Morton & Hanthorpe	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122142	Barley Court, Morton & Hanthorpe	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of

NHLE/ HER No.	Name	Justification for screening out
		other agricultural buildings and fields. The Project would not alter this relationship.
MLI122143	The Barn, Morton & Hanthorpe	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122144	Araucaria Farm, Morton & Hanthorpe	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122145	Unnamed farmstead, Morton & Hanthorpe	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122146	Hanthorpe House, Morton & Hanthorpe	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI122604	Unnamed farmstead, Pinchbeck	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI125004	Ridge and furrow, Gunby	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI125134	Churchyard, Church of St Andrew, Haconby	Outside of the draft Order Limits. The churchyard does not have a setting that contributes to its value that extends beyond the immediate relationship to the church and community beyond.
MLI125135	Hacconby Hall Farm, Haconby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI125136	Undated pits, Hacconby Hall	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI125137	Medieval pottery, Hacconby Hall	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLI125445	Undated enclosures, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI125626	Undated linear cropmarks, Rippingale	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI125806	Control Tower, RAF North Witham	Outside of the draft Order Limits. The control tower is within woodland so views towards the Project would be filtered and are unlikely to be altered by the proposals.
MLI126053	Marl pit, Burton Coggles	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI126392	Medieval ridge and furrow, Corby Glen	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI126393	Iron Age enclosure system, Corby Glen	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI126394	Assemblage of Iron Age pottery from land off Bourne Road, Corby Glen	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI126395	Assemblage of flint from land off Bourne Road, Corby Glen	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI126396	Sheet copper alloy from land off Bourne Road, Corby Glen	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI126397	Assemblage of animal bone from land off Bourne Road, Corby Glen	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI126697	Former school, Haconby	Outside of the draft Order Limits and the ZTV. In the village of Haconby and its aspect, both physically and historically, is towards the village and away from the Project.
MLI126707	Former school and schoolmaster's house, Dunsby	Outside of the draft Order Limits in area of low visibility outside of the village.
MLI126715	Site of former school, North Witham	Outside of the draft Order Limits. Demolished former school. Any buried remains would not

NHLE/ HER No.	Name	Justification for screening out
		have a setting sensitive to change from the Project.
MLI126735	Former schoolhouse, Burton Coggles	Outside of the draft Order Limits and ZTV within the village of Burton-le-Coggles. The village forms the setting of the building.
MLI127124	Likely Post Medieval ditch or furrow, Main Street, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI127691	Ridge and furrow, land east of Corby Glen	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI127692	Undated rectilinear enclosures, Corby Pasture Wood, Corby Glen	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI127693	Ridge and furrow, land north of Irnham Road, Corby Glen	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI127694	Ridge and furrow, land north of Corby Glen	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI20211	Roman pot sherd	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI30582	Ponds, Lobthorpe Hall	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI30583	Remains of Anglo-Saxon cross, St. Mary's Church	Possibly same as designated cross recorded in slightly different location in North Witham churchyard (NHLE: 1062317). Both locations/assets outside of draft Order Limits and ZTV, with buildings to south screening views from this part of the churchyard.
MLI32931-2	Ringstone Hall and Chapel and Ringstone Deserted Medieval Village	The value/significance of buried and earthwork remains of the deserted medieval village are unlikely to be sensitive to change from the Project.
MLI32956	Late Medieval pottery from Rippingale Fen	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI32960	Possible Roman branch canal from Car Dyke	Outside of the draft Order Limits. The Car Dyke is an important part of the historic landscape of

NHLE/ HER No.	Name	Justification for screening out
		drainage along the edge of the fens. The interrelationships between successive phases of drainage from the Roman through post-medieval periods, as well as contemporary Roman sites, are important to how it is understood. However, these aspects of its setting would not be sensitive to change from the Project.
MLI32976	Saxon pottery from Stainfield, Haconby	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33098	Roman pot	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33099	Cinerary urns	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33100	Romano-British finds	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33101	Medieval strap handle	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33102	Romano-British settlement	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33103	Romano-British settlement cropmarks, Dunsby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33104	Cropmark enclosures	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33105	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33106	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33109	Salworking remains	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLI33110	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33112	Saltmaking sites	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33113	Roman artefact scatter, Dunsby	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33119	Roman pottery found east of Stainfield	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33120	Disc brooch	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33123	Stainfield Romano-British settlement, Haconby	The buried remains of a Romano-British settlement would have a setting of its context within the historic environment, particularly any nearby contemporary settlements as well as field system ditches and enclosures but the value/significance of the remains are unlikely to be sensitive to change from the Project as these elements would still be legible.
MLI33125	Roman Road, Haconby	Outside of the draft Order Limits. The buried and earthwork remains of the road link with other Roman sites in the vicinity, as well as being understood in specific topographical contexts – these elements of its setting contribute to its value, but are not sensitive to change from the Project.
MLI33126	Ridge and furrow and Medieval pottery	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI33128	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33129	Saxon pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33130	Medieval pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.

NHLE/ HER No.	Name	Justification for screening out
MLI33131	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33132	Roman finds, Haconby	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33134	Saxon pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33135	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33136	Flint scraper	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33138	Romano-British saltern debris and pottery	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33139	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33140	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33143	Rotary quern	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33144 MLI34437 MLI34410 MLI34411 MLI34414 MLI34415 MLI34416	Romano-British settlement and saltern, Haconby	The buried remains of a saltern/settlement site would have a setting of its context within the historic environment, particularly any physical relationships to paleochannels and/or nearby contemporary settlement. However, these aspects of the receptor's setting would not be sensitive to change from the Project as those elements would still be legible.
MLI33145	Medieval pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33146	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.

NHLE/ HER No.	Name	Justification for screening out
MLI33147	Flint burin	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33149	Romano-British field system, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33152	Post Medieval manorial earthworks	Outside of the draft Order Limits within the village of Haconby. Buildings within the village screen views towards the Project. Although there may be some visibility of the overhead line and towers, these would be seen in the context of the later post-medieval and modern buildings.
MLI33155	Windmill on Hanthorpe Road, Morton	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33157	Enclosures, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33160	Romano-British pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33362	Circular depression, east bank Car Dyke	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33367	Flint scraper	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33368	Flint scrapers	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33369	Possible Medieval jug handle, Dunsby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33370	Flint scrapers	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33371	Flint scraper	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.

NHLE/ HER No.	Name	Justification for screening out
MLI33372	Worked flints	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33373	Pottery scatter	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33374	Medieval pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33375	Post Medieval pottery	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33378	Ring ditch	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33497	Icehouse, Grimsthorpe Castle, Edenham	Outside of the draft Order Limits. Building within the **Grimsthorpe Castle** group. Setting limited to the extent of the parkland where it gains value through group association with the other buildings and designed landscapes.
MLI33616	Possible Anglo-Saxon cemetery, Ermine Street, South Witham	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33655	Iron Axehead	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33659	Medieval pottery found at Elsthorpe Lake	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33695	Early Bronze Age axe, Knights Templar Preceptory, South Witham	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33697	Loomweight found at Manor House Farm	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33698-9	Lobthorpe Hall, North Witham, Site of a chapel, Lobthorpe Hall, North Witham	Earthworks and buried remains outside of the draft Order Limits. Mostly out of the ZTV due to thick copse immediately north of Wooley's Lane but some visibility from the western part of the site towards the Project. Towers visible approximately 350m northwest.

NHLE/ HER No.	Name	Justification for screening out
MLI33700	Medieval Settlement of Lobthrope	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33707	Neolithic flints	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33713	Polished stone axe found, river bank, Corby Glen	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI33714	Cumberland Field, Corby Glen	Outside of the draft Order Limits. Possible site of historic battle. The construction and presence of the Project would not alter the legibility of the landscape, which is the key aspect of the asset's setting that contributes to its value through the way it provides evidence for the battle's topography.
MLI33715	Romano-British pottery and cauldron found, Corby Glen	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33716	Romano-British pottery found, Corby Glen	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33717	Medieval pottery found, Corby Glen	Borders the draft Order Limits, and may continue into it, but would require further evidence. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI33722	Roman Road at Irnham Park	Outside of the draft Order Limits. The remains of the road link with other Roman sites in the vicinity, as well as being understood in specific topographical contexts – these elements of its setting contribute to its value, but are not sensitive to change from the Project.
MLI33875	Earthwork enclosure, Burton Coggles	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33889	Medieval enclosure	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI33890	Iron Age settlement and metalworking site	Outside of the draft Order Limits and ZTV. Within woodland which screens views.

NHLE/ HER No.	Name	Justification for screening out
MLI33891	Romano-British settlement site, Colsterworth	Outside of the draft Order Limits and ZTV. Within woodland which screens views.
MLI33893	Medieval moated building	Outside of the draft Order Limits with limited potential for views of the Project due to plantation woodland and modern agricultural buildings.
MLI34197	Possible fishponds or gravel pits, Corby Glen	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34218	Medieval village remains at Stainfield	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34219	Ridge and furrow, Stainfield	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI34220	Ridge and furrow, Stainfield	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI34302	Mill Wood, North Witham	Outside of the draft Order Limits. Natural feature.
MLI34303	Battlebourn Head, North Witham	Outside of the draft Order Limits. Natural feature.
MLI34305	Mickley Wood, North Witham	Outside of the draft Order Limits. Natural feature.
MLI34308	Twyford Forest, Colsterworth	Outside of the draft Order Limits. Natural feature.
MLI34309	Beaumont Wood, North Witham	Outside of the draft Order Limits. Natural feature.
MLI34312	Little Osgrove Wood, Corby Glen	Outside of the draft Order Limits. Natural feature.
MLI34313	Herricho Wood, Corby Glen	Part of the woodland bis within the draft Order Limits to allow for access. As this is designated as ancient woodland it is assumed that it will be excluded from the boundary. It is a natural feature.
MLI34314	High Wood, Burton Coggles	Outside of the draft Order Limits. Natural feature.
MLI34315	Elliott's Wood, Corby Glen	Outside of the draft Order Limits. Natural feature.
MLI34316	Great Osgrove or Long Wood, Corby Glen	Outside of the draft Order Limits. Natural feature.
MLI34317	Dodsey Wood, Corby Glen	Outside of the draft Order Limits. Natural feature.

NHLE/ HER No.	Name	Justification for screening out
MLI34347	Bitchneaves Wood, Corby Glen	Outside of the draft Order Limits. Natural feature.
MLI34349	South Wood, Irnham	Outside of the draft Order Limits. Natural feature.
MLI34350	Norwood, Little Norwood, Great West and Little West Woods, Irnham	Very edge of the woodland borders on the draft Order Limits. As this is designated as ancient woodland it is assumed that it will be excluded from the boundary. It is a natural feature.
MLI34351	Catbury Wood, Irnham	Outside of the draft Order Limits. Natural feature.
MLI34353	Breache's Wood, Edenham	Outside of the draft Order Limits. Natural feature.
MLI34355	Callan's Lane, Pasture, Thorny and Scullar Woods, Kirkby Underwood	Outside of the draft Order Limits. Natural feature.
MLI34356	Spring Wood, Edenham	Outside of the draft Order Limits. Natural feature.
MLI34357	Gunboro' Wood, Edenham	Outside of the draft Order Limits. Natural feature.
MLI34358	Nab Wood, Hanthorpe	Outside of the draft Order Limits. Natural feature.
MLI34359	Row and Ringstone Woods	Outside of the draft Order Limits. Natural feature.
MLI34361	Dunsby Wood	Small part of the woodland is within the draft Order Limits. As this is designated as ancient woodland it is assumed that it will be excluded from the boundary. It is a natural feature..
MLI34389	Iron Age saltern site, Dunsby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34393	Iron Age(?) material from Romano-British site, Dunsby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34396	Romano-British settlement, Dunsby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34401	Romano-British saltern and settlement site, Dunsby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34408	Section of Car Dyke, Dunsby	Outside of the draft Order Limits. The Car Dyke is an important part of the historic landscape of drainage along the edge of the fens. The interrelationships between successive phases of drainage from the Roman through post-medieval periods, as well as contemporary Roman sites, are important to how it is understood. However,

NHLE/ HER No.	Name	Justification for screening out
		these aspects of its setting would not be sensitive to change from the Project.
MLI34412	Saxon finds from Romano-British settlement site, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34414	Romano-British site (settlement), Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34417	Romano-British saltern site, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34418	Romano-British saltern site, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34419	Romano-British saltern site, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34420	Saxon settlement site, Haconby	Outside of the draft Order Limits. Buried remains at some distance from the proposed alignment so unlikely to be impacted.
MLI34421	Romano-British material from Saxon site	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34422	Undated saltern site, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34425	Saxon potsherd from Romano-British settlement site, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34429	Romano-British saltern site, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34438	Romano-British saltern site, Haconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34735	Cropmark ring ditch	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLI34736	Medieval pottery scatter	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI34737	Flint flake	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI34738	Romano-British pottery	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI34741	Cropmark enclosure and linear feature	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34749	Undated cropmark ring ditch	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34788	Enclosure and linear feature	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34789	Undated features, Gunby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34794	Possible ridge and furrow, North Witham	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI34795	Undated enclosures, North Witham	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34843	Blade end of axe	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI34873	Anglo-Saxon pottery	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI34921	Romano-British field system	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI34965	Village pump, Corby Glen	Outside of the draft Order Limits. Pump has an important but limited setting relationship with its village context. This would not be impacted by the Project.

NHLE/ HER No.	Name	Justification for screening out
MLI35052	Romano coin	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI80057	Moated site and possibly associated feature, Scullar Wood	Outside of the draft Order Limits. The moated site is within woodland so views towards the Project would be filtered and are unlikely to be altered by the proposals.
MLI80332	Post Medieval remains, Ling Lane	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI80863	Undated artefact scatter from east of Ling Lane	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI81158	Possible Post Medieval quarry pit, High Street	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI81159	Medieval pit, Tanners Lane	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI81160	Probable medieval drystone wall, Barleycroft Road	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI81294	Undated agricultural activity, off Barleycroft Road	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI81755	Site of Corby Windmill, south of The Green	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI82370	Ridge and furrow, Thorny Wood	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI82376	Moated enclosure, Twyford Wood.	Outside of the draft Order Limits. The moated site is within woodland so views towards the Project would be filtered and are unlikely to be altered by the proposals.
MLI82377	Possible wall, Twyford Wood.	Outside of the draft Order Limits. Within woodland so towards the Project would be filtered and are unlikely to be altered by the proposals.

NHLE/ HER No.	Name	Justification for screening out
MLI82386	Ridge and furrow, Spring Wood	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI82387	19th Century building, Spring Wood.	Outside of the draft Order Limits. Within woodland so towards the Project would be filtered and are unlikely to be altered by the proposals.
MLI82397	Ridge and furrow earthworks to the north of Black Bull Farm	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI82398	Ridge and furrow earthworks adjacent to Twyford Forest	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI83937	Worked flint north of Bourne Road, Corby Glen	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI83938	Possible structure north of Bourne Road, Corby Glen	Outside of the draft Order Limits. Possible structural remains of a house or agricultural building. Unlikely to have a setting sensitive to change from the Project.
MLI83939	Medieval pottery north of Bourne Road, Corby Glen	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI84018	Ridge and furrow, South Witham	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI84019	Ridge and furrow, South Witham	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI84043	Earthwork ridge and furrow, Edenham	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI84061	Cropmark mound, Corby Glen	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI84064	Ridge and furrow, Corby Glen	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI84066	Former Post Medieval Farmstead, Birkholme, Corby Glen	Outside of the draft Order Limits. There may be buried remains,, but they are unlikely to have a setting sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLI84090	Ridge and furrow earthworks, Colsterworth	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI84095	Medieval earthwork ridge and furrow, Burton Coggles	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI84096	Medieval earthwork ridge and furrow, Burton Coggles	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI85116	Post Medieval pottery, Dunsby	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLI85117	Undated watercourse, Burton Coggles	Outside of the draft Order Limits. Natural feature.
MLI86074	Cropmark enclosures of possible Roman date, Dunsby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI86084	Linear Cropmarks, Dunsby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI86098	Neolithic arrowhead found on Iron Age Site, Dunsby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI86205	Romano-British pit on land at Elthorpe Road, Stainfield	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI88494	Possible Prehistoric cropmark barrow, Irnham	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI88495	Possible unknown date cropmark pits, Irnham	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI88634	Probable late Medieval earthwork ridge and furrow, North Witham	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI88635	Probable late Medieval settlement, North Witham	Outside of draft Order Limits. Overlaid by later village buildings.
MLI88636	Probable late Medieval ridge and furrow, North Witham	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLI88807	Ridge and furrow, Haconby	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLI88815	Hanthorpe settlement	This is a combined HER entry incorporating archaeological and documentary evidence of historic settlement features in Harnthorpe. The archaeological remains have mostly been removed (as they were identified during archaeological work) and the documentary evidence does not represent a specific 'asset'.
MLI88822	Probable Post Medieval cropmark quarry, Irnham	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI89072	Settlement of Haconby	This is a combined HER entry incorporating archaeological and documentary evidence of historic settlement features in Haconby. The archaeological remains have mostly been removed (as they were identified during archaeological work) and the documentary evidence does not represent a specific 'asset'.
MLI91716	Possible moated site at Hanthorpe	Outside of the draft Order Limits. Although it is within the ZTV, the uncertain nature of any buried remains (the site could be a moated site but could also be an infilled pond), means that a more nuanced consideration of setting is not possible.
MLI92377	Hanthorpe House park, Morton	Small area of historic parkland identified from 1st edition Ordnance Survey mapping. Outside of the draft Order Limits. Although within ZTV, it is encircled by a brick wall and mature trees, making any setting related impacts unlikely.
MLI95050	Barn at Pastures Farm, Corby Glen	Outside of the draft Order Limits. This is an agricultural building which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI95939	Slaughterhouse and stable to No.7 Market Place Corby Glen	Outside of the draft Order Limits. This is an agricultural building which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLI97699	Ring ditches just north-east of Hacconby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLI97700	Ring ditch east of Hacconby village	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI97705	Ring ditches on the southern boundary of Dunsby parish	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI98531	Possible iron smelting site, Chapel Hill, North Witham	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI98532	Possible Roman farmstead site, Chapel Hill, North Witham	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI98533	Prehistoric flint, Chapel Hill, North Witham	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLI98605	Possible square enclosure, Corby Glen	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLI99319	The site of the former Primitive Methodist Chapel, Burton-le-Coggles	Outside of the draft Order Limits. No longer extant.

Table 9C.6 Heritage assets not impacted – Section 3

NHLE/ HER No.	Name	Justification for screening out
1009174	Preceptory at Old Dalby	Outside of the draft Order Limits and the ZTV. The earthworks and buried remains of the preceptory are located in large field with lots of medieval earthworks, with a curving woodland belt likely marking edge of an area of post-medieval parkland. The scheduled monument is set of a raised spur of ground. Site visit supports ZTV in suggesting it is unlikely that there would be any visibility of the Project due to the topography and woodland belt. The landscape is also very clearly a post-medieval parkland landscape and much altered from the medieval landscape that the preceptory was built within.
1010666	The Mount motte at Melton Mowbray	Outside of the draft Order Limits and ZTV. Within Melton Mowbray views northwards towards the Project are screened.

NHLE/ HER No.	Name	Justification for screening out
1010928	Bescaby Shrunken Medieval Village	Outside of the draft Order Limits. Site visit shows that the earthworks lie just south of a small grouping of buildings which are the surviving element of the village, in a gently rolling rural landscape. The Project is over 4.5km south and would not alter this.
1011244	Croxton Abbey and associated remains	Outside of the draft Order Limits. Views south screened by the topography and the woodland around the later post-medieval parkland.
1011846	Standing cross on Upper Broughton village green	Outside of the draft Order Limits. The cross is located within the village which forms its setting. This would not be impacted by the Project.
1012441	Burrough Iron Age hill fort	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1012560	Moated site north-east of St Remigius' Church	Outside the draft Order Limits. The asset is enclosed by modern form of village, which closes off views towards the Project.
1014510	Churchyard cross, All Saints' churchyard	Outside of the draft Order Limits. The setting of the churchyard cross is limited to the churchyard and adjacent village of Ragdale. The Project would be more than 4km east and would not impact the monument.
1014513 1075135	Stump Cross, approximately 700m south of Main Street, Frisby on the Wreake Stump Cross	The stump cross is located outside of the draft Order Limits but within the ZTV for the overhead line and WMEL-B. Its setting is important to it; it is a medieval standing cross, thought to be still at or near to its original location, and these crosses are known to mark important points. The scheduling description states that this cross, which is situated on a roadside outside of the village core, “illustrates the variety of the functions and forms of this type of monument, which is more often found marking churchyards or markets.” Archaeological evidence around it may provide more evidence, which would be of archaeological interest, but it could mark a processional point, or perhaps a midway point in a dispersed community. Despite this contribution, its setting is also functional: the stone is on the north side of a busy A road, largely obscured visually by the

NHLE/ HER No.	Name	Justification for screening out
		hedgerow behind it which is approximately the same height. The existing transmission line is located approximately 760m east and is visible where it crosses the road on the horizon where it is part of a number of features including trees, road signs and a bus shelter. WMEL-B and the new overhead line would be over 4km north/north-east so, while visible, would be considerably smaller in views. This would not impact any aspect of the cross' setting which contributes to its value.
1015209	Village cross at the western end of Main Street	Village cross located outside of the draft Order Limits and ZTV. Views screened by the surrounding village buildings.
1017492 1188640	Churchyard cross in St Egelwin's churchyard Base of medieval cross to south of parish church of St Egelwin the Martyr	The cross is located approximately 1.4km north of the draft Order Limits within the churchyard of St Egelwin's church (NHLE: 1075018). The ZTV indicates limited visibility, which is mostly borne out by the site visit although there was an opening of views towards the south-east from the corner of the churchyard. From the cross, these are screened by yew trees. The cross is just south of the entrance to the church and is in a prominent position in both the churchyard and the village as the church stands on a high point. Longer distance views from the cross, even if the Project was to be visible, are not a contributing factor to its value.
1017496 1360928 1075008	Churchyard cross in All Saints' churchyard, Hoby Base and shaft of cross immediately south west of Church of All Saints Churchyard cross	Outside of the draft Order Limits. Views towards the Project would be completely screened by the church, as it stands between the cross and the Project.
1017619	Moated site and fishpond at Wyfordby	The moated site is located outside of the draft Order Limits, approximately 3.8km south of the proposed overhead line. Views towards the Project are screened by the rising topography to the north of the monument.
1017798	Churchyard cross in St Peter's churchyard	Located outside of the draft Order Limits approximately 3.2km south of the proposed overhead line. The cross is located on the

NHLE/ HER No.	Name	Justification for screening out
		southern side of the church in Wymondham, and has no views northwards beyond the church.
Cross 160m north east of St Mary Magdalen Church (NHLE: 1017999) Church of St. Mary Magdalen, Stapleford (NHLE: 1176947)	**Church of St Mary Magdalene, Freeby**	There is no current access to Stapleford Hall, within the grounds of which the Church of St Mary Magdalene is located. However, the location of the church, approximately 4.2km south of the draft Order Limits, and the woodland planted all around it means that visibility of the Project is very unlikely. The setting of the church is important, as a component part of a designed estate landscape, but this would not be impacted by the Project.
1471118	Wyfordby wayside cross	The cross stump is located outside of the draft Order Limits, approximately 3.8km south of the proposed overhead line. Views towards the Project are screened by the rising topography to the north of the monument.
1061267	Church of St. Mary, Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061273	Church of St. Andrew, Coston	The church is located approximately 900m north of the draft Order Limits, but in an area of limited visibility of the proposed overhead line. Views south from the church are mostly screened by trees (in summer) and by buildings on the opposite side of the road, as well as by the rising topography to the south. From the closest tower location, looking north, neither Coston or its church tower are visible, which supports an assumption that there will be limited or no visibility.
1061281	Church of St. John the Baptist, Buckminster	The church is located outside of the draft Order Limits and in an area of very limited visibility towards the Project according to the ZTV. The church is a very finely built medieval church on the western edge of the village of Buckminster. The landscape drops away to the west, opening

NHLE/ HER No.	Name	Justification for screening out
		up a sweeping area of fields to the south and west which is visually enclosed by trees along Sproxton Road and overlapping blocks of woodland. There are further trees around the churchyard, which mean that the landscape beyond is only glimpsed and would be screened more thoroughly in summer (visited in winter). On this basis, it is unlikely that the Project will be visible from the church. Group association with the Dysart Mausoleum (NHLE: 1360830) and the Old Vicarage (NHLE: 1061282), as well as Buckminster Conservation Area.
1075004	Church of All Saints, Hoby	Church located approximately 5km south-west of the draft Order Limits at WMEL-B. Views towards the Project are screened by the surrounding village.
1075128	Church of St. Michael, Edmondthorpe	Located approximately 3km south of the draft Order Limits. Views are screened by vegetation to the north.
1177844	Church of St. Peter, Wymondham	Located outside of the draft Order Limits and the ZTV. Views north are screened within the village.
1235286	Parish Church of St. Mary, Melton Mowbray	Located outside of the draft Order Limits and the ZTV. Views north are screened by the buildings within the town.
1261717	Church of St. Peter, Kirby Bellars	Views north from the churchyard are screened by trees along northern boundary and there were no views as far as the draft Order Limits on the day visited, although the ZTV indicates some partial visibility of the Project. The new overhead line would be approximately 3.5km north of the church. Given the vegetative screening and the distance, it is unlikely that there would be any impact.
1307264	Church of St. Andrew, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1307542	Church of St. Luke, Gaddesby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact

NHLE/ HER No.	Name	Justification for screening out
		on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1360855	Church of St. Mary, Freeby	Church located approximately 2.6km south of the Project on high ground within the village of Freeby. The church faces south towards the main street through the village, and there are mature trees screening views north from its churchyard. The ZTV indicates very limited potential for views of the Project from the churchyard.
1360866	Church of All Saints, Asfordby	The church is within a churchyard screened by trees, with no views towards the new overhead line/WMEL-B to the north.
1360878	Church of St. Thomas of Canterbury, Frisby on the Wreake	The church is located outside of the draft Order Limits and the ZTV for the overhead line, although there is possible visibility of WMEL-B approximately 4.5km north-east from the rear of the church. Even though on slightly higher ground, the churchyard is enclosed by walls on one side and buildings within the village screen views towards the Project.
MLE21442	Church of St. Thomas of Canterbury burial ground, Church Lane, Frisby on the Wreake	
1360902	Church of St. Denys, Goadby Marwood	Church located approximately 3.8km north of the proposed overhead line. The site visit indicates that the church and its churchyard are very enclosed visually by the village buildings around it. Even looking south from beyond the village, views towards the Project are screened by a ridge line to the south.
1073204	Old Rectory, Teigh	18th century rectory located west of the Church of the Holy Trinity (NHLE: 1361821) with which it forms an important group in the village of Teigh. Located approximately 4.7km south of the Project. Views towards the Project screened by the topography; site visit indicates no views extending as far as the draft Order Limits.
1074988	Church of St. Peter, Saltby	Located approximately 5km north of the Project on the edge of the village of Saltby. The intervening topography, and the village which progresses up the slope of the hill upon which the church is located, obscures distant views towards the Project, although the nearer rural landscape is clearly in view. Unlikely to have even distant visibility.

NHLE/ HER No.	Name	Justification for screening out
1075015 1188627	**Church of St. Mary, Chadwell** Chest tomb approximately 3 metres south of south porch of Church of St, Mary (NHLE: 1188627)	Located approximately 2km north of the Project. The ZTV indicates some partial visibility of the overhead line is possible from just beyond the churchyard, but not from the churchyard itself. The site visit supports this, indicating that trees in the churchyard, the building opposite, and the topography beyond, would likely screen views of the Project. However, due to the structural instability of the church building, which was fenced off at the time of the visit, the surveyors were unable to examine views directly from the church itself.
1075018	Church of St. Egelwin the Martyr, Scalford	The church stands on a high point in the landscape, with its churchyard further raised from the ground level within the village. Many views south from the churchyard are screened by trees within, but there are long distant views over the landscape to the south from the south-eastern part of the churchyard. The Project is located approximately 1.5km south of the church. The ZTV indicates that views of the Project are unlikely, which suggests that the intervening topography would screen views from the south-east of the churchyard.
1075052	Manor Farmhouse	The Manor House is located approximately 5km north of the Proposed overhead line. The building faces northwards and has a setting formed by its village surroundings, particularly with relationships to the historic church to the east. It has enclosed grounds. Views toward the Project from rear of the building likely screened by the trees which separate from rural landscape beyond the village.
1075059	The Hall (Number 1, Town's Lane), Goadby Marwood	Outside of the draft Order Limits, located approximately 3.8km north of the Project. The hall is lower than church to the south and views are entirely screened by it.
1075069	Church of St. Mary, Nether Broughton	Outside of the draft Order Limits, located approximately 3.4km north of WMEL-B. The churchyard is encircled by mature trees, particularly to the south, screening views towards the Project.
1075107	Manor House	Outside of the draft Order Limits and the ZTV within the village of Ab Kettleby.

NHLE/ HER No.	Name	Justification for screening out
1178375	The Old Hall	Outside of the draft Order Limits and the ZTV within Asfordby.
1187998	Church of St John the Baptist, Old Dalby	Outside of the draft Order Limits and the ZTV.
1188025	Church of St. Remigius	On high ground, setting is village and church yard which it is higher than. Generally enclosed by buildings trees and topography. Views south include high ridge line around Holwell. Project on far side so will either not be visible or will be mostly screened.
1188442	Church of St John the Baptist, Grimston	Views screened from churchyard by buildings around it. Possible glimpsed views but would not be a change.
1188450	Pair of headstones approximately 18 metres south of tower of Church of St John the Baptist	
1188547	Church of All Saints, Rotherby	Located approximately 5km south-west of the WMEL-B and outside of the ZTV, although there is theoretical visibility along the edge of the churchyard. Otherwise the building is screened by trees around the churchyard.
1188553	Church of All Saints	Screened by trees all around east/north of churchyard.
1235477	5, King Street	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1235657	Ye Olde Pork Pie Shoppe	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1265067	Gregory and Hugh tomb	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1265121	Anne of Cleves House	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1265186	Maison Dieu Bedehouses	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1295102	The Old Rectory	Outside of the draft Order Limits and the ZTV within Asfordby.
1295131	Church of St. Leonard, Holwell	Inter-visibility with spire of church in Ab Kettlby. The church here is on natural high point of village and raised again. Can see most of village from mound. Village is a lot lower than church. No impact. Church also has former village

NHLE/ HER No.	Name	Justification for screening out
		earthworks in neighbouring field. Village is really sunken – so views from immediately west of churchyard, but not of or from church itself.
1307233	Wymonham windmill	The windmill is on higher ground approximately 1.7km south of the Project, and land around it and likely from it, is within the ZTV. Views of the windmill are screened locally by a copse immediately north of the windmill. While a fine and aesthetically attractive building, the windmill is a functional industrial structure rather than a building designed to be a landmark. Views from it potentially including the Project would not have an impact on its historic interest.
1307340	Church of St. Mary the Virgin, Burrough on the Hill	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1360830	Dysart mausoleum and railing	The mausoleum is located outside of the draft Order Limits and in an area of very limited visibility towards the Project according to the ZTV. It is located to the east of the Church of St John the Baptist (NHLE: 1061281) and views towards the Project are screened by the adjacent buildings. Group association with the Church of St John the Baptist (NHLE: 1061281) and the Old Vicarage (NHLE: 1061282), as well as Buckminster Conservation Area.
1360835	Church of St. Swithin, Great Dalby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1360948	Church of St. Mary the Virgin, Thorpe Arnold	Outside of the draft Order Limits and the ZTV. Church screened from scheme by the buildings north of it in the village.
1360956	Church of St. Peter, Stonesby	Outside of the draft Order Limits and the ZTV (at ground level). The churchyard is enclosed by buildings which screen views towards the Project.

NHLE/ HER No.	Name	Justification for screening out
1361188	Church of St John the Baptist, South Croxton	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1361821	Church of Holy Trinity, Teigh	Church in village of Teigh, approximately 4.7km south of the Project and part of a group with the 18th century rectory located to the west (NHLE: 1073204) Views towards the Project screened by the topography; site visit indicates no views extending as far as the draft Order Limits.
1061248	The Old School, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061249	Church of St. Michael, Thorpe Satchville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061250	Lewin's Bridge, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061251	The Priory	Outside of the draft Order Limits and the ZTV in the village of Wymondham.
1061252	Former cross 1 metre south of south aisle of Church of St. Peter	Located outside of the draft Order Limits approximately 3.2km south of the proposed overhead line. The cross is located on the southern side of the church in Wymondham, and has no views northwards beyond the church.
1061253	Former Grammar School	Outside of the draft Order Limits and the ZTV within the village of Wymondham.

NHLE/ HER No.	Name	Justification for screening out
1061257	Manor Farmhouse, Freeby	Farmhouse in a complex of farm buildings on the northern side of the main street through the small village of Freeby. The ZTV indicates that views of the Project are unlikely. Even if it is possible to glimpse the Project from upper storey rear windows, this would not affect the asset as its village setting and group value with adjacent farmstead group, would not be changed.
1061263	Magpie Cottage	Outside of the draft Order Limits and the ZTV within village of Frisby on the Wreake.
1061264	The Limes with adjoining outbuildings, boundary wall and pump	Outside of the draft Order Limits and the ZTV within village of Frisby on the Wreake.
1061265	Gaddesby windmill	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061266	Old Oak Cottage, Barsby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061268	Wayside cross at crossroads 1 mile north east of Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061269	Cream cottage at west end of street, Barsby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061270	Lawn Cottage, Gaddesby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact

NHLE/ HER No.	Name	Justification for screening out
		on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061271	The Hermitage, Gaddesby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061272	Park House, Gaddesby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061274	Sundial 50 metres south east of Church of St. Mary, Garthorpe	Outside of the draft Order Limits and the ZTV. Located on the far side of the Church of St Mary (NHLE: 1307476) from the Project, and views would be screened by the building and the topography beyond.
1061282	The Old Vicarage	The Old Vicarage is a large brick building next to the Church of St John the Baptist in Buckminster (NHLE: 1061281). It is located outside of the draft Order Limits approximately 2.3km north of the proposed overhead line. The ZTV indicates there may be visibility of the Project from the building itself, although the land around it is outside of the ZTV. As the building is orientated facing east, any views of the Project would be from the rear of the building and at a distance of over 5km from the overhead line in that direction. It is unlikely that distant visibility of the Project from the rear windows would have an impact on the asset. This is because, although the setting of the Old Vicarage does contribute to its value, this is through its relationship to the adjacent church and to the village and Buckminster Park. Group association with the Dysart Mausoleum (NHLE: 1360830) and the Church of St John the Baptist (NHLE: 1061281), as well as Buckminster Conservation Area.

NHLE/ HER No.	Name	Justification for screening out
1061283	Water pump at stables 30 metres north west of the Tollemache Arms	Functional structure located outside of the draft Order Limits and the ZTV in the village of Buckminster.
1061285	Old Manor Farmhouse, Sewstern	Outside of the draft Order Limits and STV. Listed farmhouse screened by wall, hedge and trees.
1061288	Old Manor Cottage, Gaddesby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061289	The Royal Oak, Great Dalby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1061292	K6 Telephone kiosk, 20 metres south east of Sycamore House and 50 metres south west of The Old Rectory	Outside of the draft Order Limits and the ZTV in the village of Saxby.
1074491	North Manor Farmhouse, South Croxton	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1074965	Former Marquis of Granby public house	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1074966	Garden wall and gate piers at Stoneleigh (Number 17)	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1074967	Wall (approximately 120 metres long) to embanked churchyard of Parish Church of St. Mary Magdelene	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1074968	Gateway Cottage	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.

NHLE/ HER No.	Name	Justification for screening out
1074969	Row of 3 headstone approximately 4 metres south east of south east angle of south aisle of Church of St. Mary the Virgin, Thorpe Arnold	Outside of the draft Order Limits and the ZTV in the churchyard of Thorpe Arnold. Views screened by the church itself.
1074970	The Old Rectory	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1074971	Gale Cottage	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1074972	Milepost at SK 7852 2192	Milepost outside of the draft Order Limits. Milestone setting limited to the roadside location.
1074973	Church of England school and school house	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1074974	Chester House	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1074975	Home Farmhouse	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1074976	Wold House	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1074978	Chest tomb approximately 5 metres east of porch of Church of St Egelwin the Martyr	Outside of the draft Order Limits and the ZTV in village of Scalford.
1074979	The Old Manor Bakery	Outside of the draft Order Limits and the ZTV in village of Scalford.
1074980	Manor Farm	Isolated farmstead north of Scalford. Outside of the ZTV.
1074981	Garden boundary wall to street, gates and gate piers to Ravenholt (Number 8)	Outside of the draft Order Limits and the ZTV in village of Scalford.
1074982	Approximately 7 metres of street boundary wall to garden of Nether Hall Farmhouse (Number 24)	Outside of the draft Order Limits and the ZTV in village of Scalford.
1074983	Yew Tree House	Outside of the draft Order Limits and the ZTV in village of Scalford.

NHLE/ HER No.	Name	Justification for screening out
1074984	Stowleigh, Wycomb	Outside of draft Order Limits and ZTV. The building is set in a cluster of older and some modern buildings in a farm complex at the edge of the village. Set back slightly within own garden from street behind long narrow garden.
1074985	The Old School	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1074986	Church Farm	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1074989	Hall Farmhouse	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1074994	Opal Cottage	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1075006	Orchard House	Outside of the draft Order Limits and the ZTV, although possible views of WMEL-B from upper storey. The building faces the main street in the village of Rotherby, which is lined with mature trees which screen views beyond the village. The appreciation of the house and its setting would not be impacted, nor would the connection between the building and its setting.
1075016	Chest tomb approximately 4 metres south of south west angle of Church of St. Mary, Chadwell	Located approximately 2km north of the Project. The ZTV indicates some partial visibility of the overhead line is possible from just beyond the churchyard, but not from the churchyard itself. The site visit supports this, indicating that trees in the churchyard, the building opposite, and the topography beyond, would screen views of the Project.
1075017	Manor Farmhouse	Outside of the draft Order Limits and the ZTV, within the village of Chadwell. It has a village setting, facing the road and next to associated farm buildings. Roadside and next to farm.
1075019	Chest tomb approximately 1 metre east of porch of Church of St. Egelwin the Martyr	Outside of the draft Order Limits and the ZTV, within the churchyard of Scalford church. Although the churchyard is elevated, views are screened by trees.
1075035	Base and shaft of cross immediately south of Church of St. John the Baptist	Outside of the draft Order Limits and the ZTV in the village of Grimston. Views from within the churchyard are screened by trees.
1075038	Shoby Priory	Outside of the draft Order Limits and the ZTV.

NHLE/ HER No.	Name	Justification for screening out
1075039	Approx 2 metres of wall adjoining west corner of Shoby Priory	Outside of the draft Order Limits and the ZTV.
1075071	The Old Hall, Old Dalby	Outside of the draft Order Limits and the ZTV. The hall has formal grounds with small ha-ha indicating designed views looking out to the north. Views toward the Project are screened by enclosing woodland belts.
1075072	Debdale House, Old Dalby	Outside of the draft Order Limits and the ZTV.
1075073	Rosedale, Old Dalby	Outside of the draft Order Limits and the ZTV.
1075074	Range of outbuildings at Manor Farm to rear of Manor Farmhouse	Outside of the draft Order Limits and the ZTV. Located to the north of the adjacent farmstead in village of Nether Broughton. Views towards the Project would be doubly screened, first by topography and then by the buildings to the north.
1075075 1294966 1360890	23, Main Road Stone mounting block in front of the former Red Lion public house (No. 23), to left of door Stone mounting block in front of the former Red Lion public house (No. 23), to right of door	Outside of the draft Order Limits and the ZTV. Former coaching inn facing north towards the road in a group with two stone mounting blocks.
1075076	Pinfold Farmhouse	Outside of the draft Order Limits and the ZTV. Although on southern edge of the village, it faces east, which would further prevent any views of the Project, which is approximately 3km north of WMEL-B.
1075077	Old Dalby Cottage	Outside of the draft Order Limits and the ZTV.
1075104	K6 telephone kiosk	Outside of the draft Order Limits and the ZTV in village of Ab Kettleby.
1075105	K6 telephone kiosk	Outside of the draft Order Limits and the ZTV in village of Holwell.
1075108	The Willows	Outside of the draft Order Limits and the ZTV in village of Ab Kettleby.
1075109	Well Head	Outside of the draft Order Limits and the ZTV in village of Ab Kettleby.
1075110	Garden boundary wall with gate piers to north west of Beechcroft (Number 15)	Outside of the draft Order Limits and the ZTV within Asfordby.

NHLE/ HER No.	Name	Justification for screening out
1075111	Red Lodge	Outside of the draft Order Limits and the ZTV within Asfordby.
1075112	Coach house and stable at The Old Hall	Outside of the draft Order Limits and the ZTV within Asfordby.
1075113	Village Cross	Outside of the draft Order Limits and the ZTV within Asfordby.
1075126	Apple Tree Cottage	Outside of the draft Order Limits and the ZTV within the village of Wymondham.
1075131	Water pump 10 metres west of The Old School	Outside of the draft Order Limits and the ZTV, in the village of Edmonthorpe.
1075132	The Manor House	Outside of the draft Order Limits and the ZTV within the village of Wymondham.
1075133	Wymondham House	Outside of the draft Order Limits and the ZTV within the village of Wymondham.
1075136	Pigeoncote 150 metres north west of Park Farm	Outside of the draft Order Limits. Although within the ZTV, this is a functional building, and it is located over 4km south of the Project, meaning that there would be no impact to its value.
1075137	The Coach House	Outside of the draft Order Limits and the ZTV within village of Frisby on the Wreake.
1075138	Remains of cross 7 metres south east of Church of St. Peter, Kirby Bellars	Located outside of the draft Order Limits and the ZTV to the south of the church in Kirby Bellars. Any views towards the Project are screened by the church itself.
1075145	York Cottage, Crecca and cottage adjoining (Number 19, Hack Cottage)	Outside of the draft Order Limits and the ZTV in village of Holwell.
1075146	Clifton Cottage (Number 14, Church Cottage)	Outside of the draft Order Limits and the ZTV within village of Holwell.
1096002	9, Burton Street	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1176647	Linby House farmhouse and adjoining stables, Great Dalby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.

NHLE/ HER No.	Name	Justification for screening out
1176666	Dale Farmhouse and adjoining stables, Great Dalby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1177025	Mill House	Outside of the draft Order Limits on Frisby on the Wreak. There are a number of buildings around it which screen views towards the Project.
1177068	Barn 120 metres south east of Gables Farmhouse	Outside of the draft Order Limits and the ZTV within village of Frisby on the Wreake.
1177123	The Cottage, Gaddesby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1177170	The Bedehouses, Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1177272	Summerhouse, 70 metres north of Ashby Folville Manor	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1177284	Gaddesby Hall, Gaddesby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1177301	Harewell House, Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be

NHLE/ HER No.	Name	Justification for screening out
		further considered for the ES when more detail will be available about the construction and operation of the Project.
1177646	Hill Top Farmhouse, South Croxton	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1177803	K6 telephone kiosk adjoining The Old School, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1177877	Lychgate and side gate and walls 70 metres north west of Church of St. Peter	Outside of the draft Order Limits and the ZTV within the village of Wymondham.
1177995	Japonica Cottage and adjoining bakehouse	Outside of the draft Order Limits and the ZTV within the village of Wymondham.
1178014	The Thatches	Outside of the draft Order Limits and the ZTV within the village of Wymondham.
1178238	Headstone approximately 2 metres north east of chancel of Church of St. James the Greater	Outside of the draft Order Limits but within the ZTV. Headstone is within the churchyard, and views towards the Project would be filtered through the trees in the hedgerows in the landscape beyond. The headstone's setting is important to how it is understood, but this contribution is limited to the church and churchyard, and would not be impacted by the construction or operation of the Project.
1178352	Chest tomb approximately 2 metres south west of porch of Church of All Saints	Outside of the draft Order Limits and the ZTV within Asfordby.
1178366	90 and 92, Main Street	Outside of the draft Order Limits and the ZTV within Asfordby.
1180089	The Blue Bell public house	Outside of the draft Order Limits and the ZTV within Asfordby.
1180093	159, Main Street	Outside of the draft Order Limits and the ZTV within Asfordby.

NHLE/ HER No.	Name	Justification for screening out
1188002	Debdale Farmhouse, Old Dalby	Outside of the draft Order Limits and the ZTV.
1188007	The White House	Outside of the draft Order Limits and the ZTV.
1188011	Manor Farmhouse	Outside of the draft Order Limits and the ZTV in Nether Broughton. Part of a group with farm buildings to rear (NHLE: 1075074).
1188015	The Hollies	Outside of the draft Order Limits and the ZTV in Nether Broughton.
1188018	Willow Cottage	Outside of the draft Order Limits and the ZTV.
1188438	Village Stocks	Outside of the draft Order Limits and the ZTV in the village of Grimston.
1188631	Spring Cottage	Outside of the draft Order Limits and the ZTV, within the village of Chadwell. Completely screened, on a private road.
1188670	Stables 10 metres east of Church Farm (Number 22)	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1188678	The Redlands	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1188698	Middle Farmhouse	Outside of the draft Order Limits. Located in the village of Spoxton and is one of several buildings facing into the centre of the village. The village is topographically lower than the surrounding landscape, which further closes off views outwards. There would be no impact.
1188727	K6 telephone kiosk	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1188830	2 and 3, Church Lane	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1188862	Lychgate at east entrance to churchyard	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1188864	The Hall	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1188914	Gale House	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1188917	Milepost at SK 7956 2311	Milepost outside of the draft Order Limits. Milestone setting limited to the roadside location.
1188922	Milepost at SK 77532 2060	Milepost outside of the draft Order Limits. Milestone setting limited to the roadside location.

NHLE/ HER No.	Name	Justification for screening out
1188974	Moorlands Farmhouse	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.

1265125	The United Reformed Church	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1265146	33 and 35, Burton Street	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1265184	Gazebo in garden of Julian Villa	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1265185	7, Burton Street	Outside of the draft Order Limits and the ZTV within Melton Mowbray.

NHLE/ HER No.	Name	Justification for screening out
1294474	Approximately 40 metres of wall and gate piers along street boundary of playground at Waltham on the Wolds Church of England School	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1294518	Base of cross approximately 2 metres south west of tower of Church of St. Mary the Virgin	Outside of the draft Order Limits and the ZTV in the village of Thorpe Arnold, views screened by the church itself.
1294525	Pump shelter	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1294534	Stoneleigh House	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1294569	Thatched Farm	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1294601	Gorse Farmhouse	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1294604	Nook Cottage	Outside of the draft Order Limits and the ZTV, within the village of Sproxton.
1294642	The Homestead, Wycomb	Outside of the draft Order Limits and ZTV. Roadside setting within core of village.
1294643	Manor House	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1294647	Glenroy	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1295072	Barn at The Old Hall	Outside of the draft Order Limits and the ZTV within Asfordby.
1307493	Stoneleigh, Barbsy	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1307507	The Cheney Arms, Gaddesby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail

NHLE/ HER No.	Name	Justification for screening out
		will be available about the construction and operation of the Project.
1307549	Former stables and coach house block at Ashby Folville Manor	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1307604	Thatch Cottage	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1307615	The Cross	Outside of the draft Order Limits and the ZTV within village of Frisby on the Wreake.
1307628	Zion House	Outside of the draft Order Limits and the ZTV within village of Frisby on the Wreake.
1342106	Navvies Cottages Number 2	Outside of the draft Order Limits and the ZTV within the village of Wymondham.
1360824	Gables Farmhouse	Outside of the draft Order Limits and the ZTV within village of Frisby on the Wreake.
1360825	Ivy Cottage, Gaddesby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1360826	The Vicarage, Asbhy Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1360827	Ashby Folville Manor	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail

NHLE/ HER No.	Name	Justification for screening out
		will be available about the construction and operation of the Project.
1360832	The Blue Dog, Sewstern	Outside of the draft Order Limits and the ZTV. Views south screened by the buildings opposite.
1360843	Headstone approximately 2 metres east of chancel of Church of St. James the Greater	Outside of the draft Order Limits but within the ZTV. Headstone is within the churchyard, and views towards the Project would be filtered through the trees in the hedgerows in the landscape beyond. The headstone's setting is important to how it is understood, but this contribution is limited to the church and churchyard, and would not be impacted by the construction or operation of the Project.
1360844	Yew Tree Farm Cottages	Outside of the draft Order Limits and the ZTV in village of Holwell.
1360854	Manor Farmhouse and adjoining stable, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1360860	Mill lock and bridge	Functional structures built in the 18th century as part of the Wreake Navigation. Their setting is integral to how they are understood, but this is limited to the associated navigation and the presence of the Project in the distance would not have an impact.
1360864	Home Farmhouse and attached outbuilding	Outside of the draft Order Limits and the ZTV in village of Ab Kettleby.
1360865	Number 21 and attached outbuilding	Outside of the draft Order Limits and the ZTV in village of Ab Kettleby.
1360867	The Elms at Asfordby Service Station	Outside of the draft Order Limits and the ZTV within Asfordby.
1360868	Pump approximately 30 metres south west of The Old Hall	Outside of the draft Order Limits and the ZTV within Asfordby.
1360873	The Hunters Arms Hotel	Outside of the draft Order Limits and the ZTV within the village of Wymondham.
1360879	Number 3 and adjoining outbuilding	Outside of the draft Order Limits and the ZTV within village of Frisby on the Wreake.

NHLE/ HER No.	Name	Justification for screening out
1360880	Manor House	Outside of the draft Order Limits and the ZTV in the village of Kirby Bellars.
1360885	The Croft, Old Dalby	Outside of the draft Order Limits and the ZTV.
1360886	Home Farmhouse, Old Dalby	Outside of the draft Order Limits and the ZTV.
1360887	Stables approximately 40 metres north north east of the Old Hall, Old Dalby	Outside of the draft Order Limits and the ZTV.
1360888	Debdale Hill House, Old Dalby	Outside of the draft Order Limits and the ZTV.
1360889	The Grange	Outside of the draft Order Limits and the ZTV in Nether Broughton.
1360920	Vine Cottage	Outside of the draft Order Limits and the ZTV, within the village of Sproxton.
1360921	Bank Farmhouse	Outside of the draft Order Limits and the ZTV, within the village of Sproxton.
1360922	House 20 metres north west of Middle Farmhouse (Number 11)	Outside of the draft Order Limits. Located in the village of Spoxton and is one of several buildings facing into the centre of the village. The village is topographically lower than the surrounding landscape, which further closes off views outward. There would be no impact.
1360930	Laburnum Cottage, Post Office Farmhouse	Outside of the draft Order Limits and the ZTV, although possible views of WMEL-B from upper storey. The building faces the main street in the village of Rotherby, which is lined with mature trees which screen views beyond the village. The appreciation of the house and its setting would not be impacted, nor would the connection between the building and its setting.
1360946	Pump at rear of Thatched Farm	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1360947	Barn and granary at Stoneleigh (Number 17)	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1360949	Hall Farmhouse (Number 1) and stone outbuilding adjoining to south	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1360950	Milepost at SK 8002 2456	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.

NHLE/ HER No.	Name	Justification for screening out
1360951	The Royal Horseshoes public house	Outside of the draft Order Limits and the ZTV in the village of Waltham on the Wolds.
1360952	The Rectory	Outside of the draft Order Limits and the ZTV in village of Scalford.
1360953	Ravenholt	Outside of the draft Order Limits and the ZTV in village of Scalford.
1360954	Nether Hall Farmhouse	Outside of the draft Order Limits and the ZTV in village of Scalford.
1360955	Stoneleigh	Outside of the draft Order Limits and the ZTV in village of Scalford.
1360957	Home Farmhouse	Outside of the draft Order Limits and the ZTV, within the village of Stonesby.
1391583	3, Spring Lane	Outside of the draft Order Limits and the ZTV within the village of Wymondham.
1439337	Great Dalby War Memorial	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1440920	Edmondthorpe War Memorial	Located in the churchyard of the Church of St Michael (NHLE: 1075128). Views towards the Project, approximately 3km north, are screened by vegetation.
1441835	Gaddesby War Memorial and associated railings	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1441886	South Croxton War Memorial	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
1455454	Grimston War Memorial Cross	Outside of the draft Order Limits and the ZTV within Grimston.

NHLE/ HER No.	Name	Justification for screening out
1462304	Coventry House and Claret Lodge	Outside of the draft Order Limits and the ZTV within Melton Mowbray.
1464968	Scalford War Memorial	Outside of the draft Order Limits and the ZTV within the churchyard of St Egelwin in Scalford, which is screened by trees.
1467025	Ab Kettleby War Memorial	Outside of the draft Order Limits and the ZTV within village of Ab Kettleby.
1467388	Sewstern War Memorial	War memorial by farmhouse on edge of village. Outside of the draft Order Limits and ZTV.
1469633	Wymondham War Memorial	Located outside of the draft Order Limits approximately 3.2km south of the proposed overhead line. The cross is located on the southern side of the church in Wymondham, and has no views northwards beyond the church.
-	Gaddesby Conservation Area	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
-	Great Dalby Conservation Area	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
-	Gaddesby Conservation Area	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
-	Great Dalby Conservation Area	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.

NHLE/ HER No.	Name	Justification for screening out
MLE15224	7-9, Main Street, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE15261	Trinity Wesleyan chapel, Main Street, Asfordby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE15274	Wartnaby Hall, Church Lane, Wartnaby	Post-medieval building on site with medieval remains within the grounds. It is located in the centre of the village of Wartnaby and the ZTV indicates there is limited potential for views of the overhead line and WMEL-B.
MLE15720	Village Hall, 5 Folville Street, Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE15988	World War II pillbox north-west of Welby	Located on Welby Lane, although may no longer be extant. If surviving, its setting contributes to its historic interest through its defensive relationship to the adjacent road and the construction of the Project would not impact this.
MLE16768	Mound north-east of Buckminster Lodge, Buckminster	Mound of unknown origin. May or may not be archaeological in origin. Although within the ZTV, the contribution, if any, of the asset's setting to its value, is unknown.
MLE17262	Medieval village remains in the western part of the village, Coston	Earthworks clustered to the west of the church in Coston. Outside of the draft Order Limits and the ZTV.
MLE17263	Medieval/Post-Medieval village earthworks in the eastern part of Coston	Earthworks clustered to the east of the church in Coston. Outside of the draft Order Limits and the ZTV.

NHLE/ HER No.	Name	Justification for screening out
MLE17265	Medieval/Post-Medieval village earthworks south-east of the church, Garthorpe	Earthworks clustered to the south-east of the church in Garthorpe. Outside of the draft Order Limits and the ZTV.
MLE17296	Wesleyan Methodist chapel, Main Street, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE17586	Old Star Cottage, 1, Main Street, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE17788	World War II pillbox east of Garthorpe Lodge, Garthorpe	The asset no longer appears to be extant. The site of the former pillbox would not be sensitive to change from the construction of the Project within its setting.
MLE18732	Bronze Age metalworking site, Bran Hills, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE21134	Mesolithic flint knapping site, Flint Drive, Asfordby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE21135	Late Neolithic/early Bronze Age site, Red Deer Close, Asfordby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.

NHLE/ HER No.	Name	Justification for screening out
MLE21395	Roman site, Stump Cross, south of Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE21396	Possible Bronze Age burial site, Stump Cross, south of Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE21878	St. Andrew's Church burial ground, Main Street, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE22294	Post-Medieval house and cellar, Church View, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE22497	Medieval chapel, Chapel Mount, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE22517	Iron Age site, Hilltop Farm, Melton Mowbray	Excavated archaeological site. Located outside of the draft Order Limits but within the ZTV for the overhead line. The site was removed prior to construction of modern housing estate and no longer has a setting.
MLE22695	Oxford Cottage, 12 Main Street, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail

NHLE/ HER No.	Name	Justification for screening out
		will be available about the construction and operation of the Project.
MLE23217	20th Century avenue of elms running south-east from Ashby Folville manor house	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE23667	Iron Age site north of Melton Country Park, Melton Mowbray	Archaeological site identified through geophysical survey and trial trenching in advance of the construction of the Melton Bypass Road. The remains are of archaeological interest, but have likely been fully removed in advance of construction, or will have had their setting completely altered by the immediately adjacent new road. Outside of the draft Order Limits and in an area of only partial potential visibility of the Project. There would be no impact.
MLE25557	Former Primitive Methodist chapel, 82, Main Street, Asfordby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE26142	Wesleyan Methodist chapel, 26, Main Street, Sewstern	Located outside of the draft Order Limits and ZTV in the village of Sewstern.
MLE26143	Site of Wesleyan Methodist chapel, adjacent to 1, Gunby Road, Sewstern	Site of former chapel, no longer extant, in village of Sewstern. Outside of the draft Order Limits. Although there is likely visibility from the site of the chapel, buried remains would not be sensitive to change from the Project.
MLE26214	Wesleyan Methodist chapel, 29, Main Street, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE26788	Old School, 83-85, Main Street	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail

NHLE/ HER No.	Name	Justification for screening out
		will be available about the construction and operation of the Project.
MLE27493	2, Timber Hill, Sewstern	Outside of the draft Order Limits in the ZTV. Building faces the main road and views towards the Project are screened by buildings opposite and a large hedge around the property boundary.
MLE27507	Village Hall, 59, Main Street, Sewstern	Outside of the draft Order Limits but likely visibility of the Project from the rear of the building and in views of it from the north. Brick and timber building dating to the 1960s. Modern date makes introduction of additional energy infrastructure unlikely to have an impact.
MLE27931	Iron Age settlement site south-west of Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE28350	Site of Grimston Station, Main Street, Saxelbye (MLE28350)	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE28425	Medieval churchyard cross socket, St. Peter's Church, Saxelbye	Located to the south of the church in Saxelbye and all views towards the Project screened.
MLE28665	Possible ring ditch west of Twyford Lodge, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29037	The Crown, 106 Main Street, Asfordby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.

NHLE/ HER No.	Name	Justification for screening out
MLE29038	15 Mill Lane, Asfordby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29041	Penarth Cottages, 1-11 (odds) Pump Lane, Asfordby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29344	The Carington Arms, 1, Folville Street, Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29347	Wootton Cottages, Folville Street, Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29558	Possible site of Medieval building, 35, King Street, Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29655	Iron Age/Roman site east of Freeby Woods, Freeby	Buried archaeological site identified by geophysical survey. The site includes a series of abutting rectilinear enclosures appearing to form a settlement complex and possibly contemporary field system. Located outside of the ZTV and in an area of only partial visibility of the Project due to the topography. Visibility of the Project would not make the landscape setting of the remains, or any intervisibility with other sites, illegible. As a result, there would be no impact.

NHLE/ HER No.	Name	Justification for screening out
MLE29656	Possible Prehistoric circular feature, east of Freeby Wood, Freeby	Possibly circular feature identified through geophysics. This could be a barrow, which is a type of burial monument thought to have a close relationship with their setting. However, as this site is not confirmed to be a barrow, it is not possible to comment on the contribution made by its setting, but it can be assumed to make a positive contribution should archaeological remains be present. The possible circular feature is located outside of the draft Order Limits and located in an area of limited or no visibility of the Project according to the ZTV.
MLE29658	Iron Age/Roman site east of Freeby Lodge, Freeby	Series of ring ditches within a large enclosure identified from geophysical survey. Interpreted as a possible Iron Age or Roman settlement site. The site is within the draft Order Limits and the ZTV indicates likely visibility of the Project. As buried remains, visibility of the Project would not make the landscape setting of the remains, or any intervisibility with other sites, illegible. As a result, there would be no impact.
MLE29817	Yew Tree House, Main Street, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29872	The Old Bakehouse, 15 Main Street, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29873	Tudor Cottage, 13 Main Street, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29874	Bean Cottage, 14 Main Street, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is

NHLE/ HER No.	Name	Justification for screening out
		currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29875	Courtyard Cottage, 10 Main Street, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29877	Georgian Cottage, 1 Rotherby Lane, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29878	3 Rotherby Lane, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29879	2, 4, 6, 8 & 12 Water Lane, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29880	Corner Cottage, 3 & 5 Water Lane, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE29888	Oak Cottage, 26 Water Lane, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail

NHLE/ HER No.	Name	Justification for screening out
		will be available about the construction and operation of the Project.
MLE29889	The Old School House, Church Lane, Frisby-on-the-Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE3322	Roman villa at St. James's Church, Ab Kettleby	Possible site of a Roman villa on or near the site of the medieval church indicated by finds of tesserae and roof tile when digging in the churchyard. AS the exact location of a possible villa are not known, it is not possible to consider its setting in greater detail. It is outside of the draft Order Limits.
MLE3328	Holt deserted Medieval village	Located outside of the draft Order Limits and the ZTV.
MLE3329	Bronze Age barrow south-east of Red Lodge Farm, Asfordby	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE3340 MLE3341 MLE3344 MLE26478 MLE26479 MLE8862	**Welby deserted Medieval village** Fishpond at Welby Fishpond at Fishpond Close, Welby Medieval hollow way, Welby deserted settlement Medieval village earthworks, Welby deserted settlement Welby Old Hall	Area of earthworks mostly screened from the Project by the topography.
MLE3345	Roman site at Peas Field, Welby	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLE3349	Possible Roman mosaic north-west of Welby Church	Outside of draft Order Limits. Oral record of mosaic tiles found ‘some years ago’ (in 1988). Due to uncertainty on location it is not possible to consider setting further.

NHLE/ HER No.	Name	Justification for screening out
MLE3737	Possible Medieval manor house site at Hall Orchard, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE3740	Medieval village earthworks north of Great Lane, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE3741	Historic settlement core of Frisby on the Wreake.	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE3768	Moated site, Ashby Pastures, Kirby Bellars	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE3795	Post-Medieval garden earthworks south of the church, Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE3799	Roman site south-west of Folville House, Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE3803	Medieval grange, Grange Farm, Coston	Outside of the draft Order Limits. Possible archaeological site indicated by documentary evidence and possible earthworks of old closes

NHLE/ HER No.	Name	Justification for screening out
		around ‘Grange Farm’. Limited visibility indicated by the ZTV.
MLE3804	Anglo-Saxon/Medieval village remains south of Grange Lane, Coston	Outside of the draft Order Limits. Limited visibility indicated by the ZTV.
MLE3806	Medieval/Post-Medieval village remains south of the church, Garthorpe	Outside of the draft Order Limits and the ZTV.
MLE3807	Possible Roman burial from south of the church, Garthorpe	Outside of the draft Order Limits and the ZTV.
MLE3815	Medieval/Post-Medieval fishponds north of Church Farm, Coston	Outside of the draft Order Limits. Limited visibility indicated by ZTV. Two fishponds are present to the north of the former Manor House. Any visibility of the Project would not have an impact on the fishponds, as their setting is most likely to relate to adjacent medieval earthworks and the former manor house in Coston to the south.
MLE3816	Coston Hall, Coston	Site of Coston Hall, which was depicted on the Tithe Map of 1844 but was a ruin by the 1870s.Outside of the draft Order Limits and with limited visibility of the Project indicated by the ZTV. The buried remains will have a setting, but this will relate to the interrelationship with other contemporary features in Coston and the surviving earlier elements of the village.
MLE4034	Deserted Medieval village and grange, Ringlethorpe/Goldsmith's Grange, Scalford	Outside of the draft Order Limits and the ZTV.
MLE5944	Historic settlement core of Twyford	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE5947	Historic settlement core of Ashby Folville	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.

NHLE/ HER No.	Name	Justification for screening out
MLE8495	Sewstern historic settlement core	Historic settlement core established from historic maps. Not a specific heritage asset to assess an impact on.
MLE8755	Historic settlement core of Garthorpe	Historic settlement core established from historic maps. Not a specific heritage asset to assess an impact on.
MLE8757	Historic settlement core of Coston	Historic settlement core established from historic maps. Not a specific heritage asset to assess an impact on.
MLE8763	Medieval/Post-Medieval building south-east of the church, Garthorpe	Outside of the draft Order Limits and the ZTV.
MLE8840	Iron Age/Roman site south of Kirby Bellars	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE8842	Anglo-Saxon site south of Kirby Bellars	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE8865	Asfordby historic settlement core	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE9111	Ab Kettleby historic settlement core	Historic settlement core established from historic maps. Not a specific heritage asset to assess an impact on.
MLE9112	Wartnaby historic settlement core	Historic settlement core established from historic maps. Not a specific heritage asset to assess an impact on.
MLE9548	Medieval/Post-Medieval burials, Mill Lane, Frisby on the Wreake	This asset is included in the study area for the proposed reconductoring in Section 3, which is currently anticipated to have limited or no impact on the setting of heritage assets. This will be

NHLE/ HER No.	Name	Justification for screening out
		further considered for the ES when more detail will be available about the construction and operation of the Project.
MLE9866	Roman site south-east of Old Close Plantation, Wymondham	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLE10074	Undated cropmarks south of Hall Farm, Garthorpe	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE15259	Spinney Farm, Melton Spinney Road, Thorpe Arnold, Melton Mowbray	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE15983	World War II tank trap east of Welby Lane, Welby	Outside of the draft Order Limits. As defensive structures, tank traps have a setting which is essential to how they are understood. However, the nature of the Project means that it is unlikely to affect the functional relationship between the defence and its setting.
MLE16022	Cold War monitoring post east of High View, Melton Mowbray	Outside of the draft Order Limits. Underground facility for monitoring aircraft and nuclear attacks. As such its setting is unlikely to be sensitive to change from the Project.
MLE16080	Midland Railway, Syston to Peterborough	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE16086	Midland Railway, Nottingham to Kettering	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE16125	Ab Kettleby tramway	Outside of the draft Order Limits. The tramway will have a functional relationship with its setting, including the industrial sites it connected, but this is unlikely to be sensitive to change from the Project.
MLE16126	Holwell Works, Asfordby Hill	Outside of the draft Order Limits. Industrial site unlikely to be sensitive to change from the Project.
MLE16127	Great Northern Railway, Waltham Branch	Outside of the draft Order Limits. Railway established for mineral transport so will have a setting relationship with industrial sites in the

NHLE/ HER No.	Name	Justification for screening out
		area, but is unlikely to be sensitive to change from the Project.
MLE16192	Asfordby Hall	Site of demolished country house outside of the draft Order Limits. No longer extant and buried remains unlikely to be sensitive to change from the Project.
MLE16296	Roman pottery from south-east of the church, Garthorpe	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLE16302	Melton Mowbray Navigation	This is a modified river and would not be impacted by the Project.
MLE16306	Flint found south-east of Old Close Plantation, Wymondham	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLE16331	Medieval pottery from south of the church, Ashby Folville	Outside of the draft Order Limits. Findspot only (found during watching brief), remains removed and no longer has a setting at this location.
MLE16614	Post-medieval ring found south of White Lodge, Kirby Bellars	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE16975	Medieval/Post-Medieval pottery from 14, Woodhouse Road, Asfordby	Outside of the draft Order Limits. Findspot only (found during gardening), remains removed and no longer has a setting at this location.
MLE17264	Enclosure cropmarks north-east of Mount Pleasant Farm, Garthorpe	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE17343	Bronze Age sword fragment found south of Kirby Bellars	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE17520	Post-Medieval farmstead, 37, Folville Street, Ashby Folville	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE17521	Wartnaby Pit tramway	Outside of the draft Order Limits. The tramway will have a functional relationship with its setting, including the industrial sites it connected, but this is unlikely to be sensitive to change from the Project.
MLE18118	Outbuildings at Welby Grange Farm, Welby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of

NHLE/ HER No.	Name	Justification for screening out
		other agricultural buildings and fields. The Project would not alter this relationship.
MLE18615	Possible mineshafts west of Welby	Outside of the draft Order Limits. Industrial site unlikely to be sensitive to change from the Project.
MLE18641	Possible Prehistoric remains, south of Coston	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE18642	Prehistoric pottery from south of Coston	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE18643	Prehistoric saddle quern from south of Coston	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE18731	Bronze Age site south-west of Kirby Bellars	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE18732	Bronze Age metalworking site, Bran Hills, Frisby on the Wreake	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE19459	Site of Asfordby Railway Station, Station Lane, Kirby Bellars	Site of demolished station building outside of the draft Order Limits. No longer extant and buried remains unlikely to be sensitive to change from the Project.
MLE19514	Outbuildings, Manor Farm, Church Lane (east side), Twyford	Outside of the draft Order Limits. Associated with a listed building but unlikely to be sensitive to change in setting from the Project as immediate relationship to farmstead of primary importance.
MLE19777	Iron Age socketed axehead from west of Avondale, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE19799	Undated cropmarks south of Loughborough Road, Asfordby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE19848	Roman site, south of Coston	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE19887	Anglo-Saxon bracteate from near to Ringlethorpe, Scalford	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.

NHLE/ HER No.	Name	Justification for screening out
MLE19921	Glebe Farm, Main Street, Saxelbye	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE21272	Turnpike Road, Melton Mowbray to Leicester	Located outside of the draft Order Limits, within the Study Area of the proposed reconductoring. Potential for impacts arising from change to setting are scoped out.
MLE21136	Iron Age pit, Flint Drive, Asfordby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE21258	Medieval and Post-Medieval pottery, west of John Ferneley College, Melton Mowbray	Outside of the draft Order Limits. Artefact scatter likely created through manuring practices. No setting.
MLE21259	Iron Age/Roman site north of Sysonby Farm, Melton Mowbray	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE21397	Iron Age sword fitting from near Stump Cross, south of Frisby on the Wreake	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE21639	Bronze Age flint from south-east of Red Lodge, Asfordby	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE21640	Medieval and Post-Medieval pottery from south-east of Red Lodge, Asfordby	Although within the draft Order Limits, this is an artefact scatter likely created through manuring rather than indicative of archaeological features.
MLE21945	Possible Prehistoric sub-circular feature south of Red Lodge, Asfordby	Although within the draft Order Limits, these remains were found during excavation and are no longer extant.
MLE22034	Military camp/Polish resettlement camp (Camp 1), Manor House, Ashby Folville	Outside of the draft Order Limits. Setting relationship with manor house and parkland where it was located, but unlikely to be sensitive to change from the Project.
MLE22044	White Lodge, Thorpe Satchville	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.

NHLE/ HER No.	Name	Justification for screening out
MLE22045	Gravel pit south-east of White Lodge, Thorpe Satchville	Outside of the draft Order Limits. Industrial site unlikely to be sensitive to change from the Project.
MLE22250	Iron Age/Roman remains, east of Sysonby Farm, Melton Mowbray	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE22251	Neolithic/Bronze Age flint from north of Sysonby Lodge Farm, Melton Mowbray	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE22252	Neolithic/Bronze Age burin from north of John Ferneley College, Melton Mowbray	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE22296	Medieval and Post-Medieval pottery from the village hall, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only (found during watching brief), remains removed and no longer has a setting at this location.
MLE22297	Post-Medieval pottery from 14, Mill Lane, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only (found during watching brief), remains removed and no longer has a setting at this location.
MLE22298	Post-Medieval coins from Old Farm House (Smithy), Garthorpe	Outside of the draft Order Limits. Findspot only (found during construction), remains removed and no longer has a setting at this location.
MLE22500	Iron Age/Roman enclosure south-east of Ashby Pastures Farm, Kirby Bellars	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE22531	Possible Iron Age linear feature, Sysonby Lodge, Melton Mowbray	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE22628	Saxon/Medieval ditch, land between 15 and 21, Folville Street, Ashby Folville	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE22629	Roman pottery from land between 15 and 21, Folville Street, Ashby Folville	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE22641	Medieval/Post-Medieval remains south-east of the church, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE22642	Saxon pottery from east of the church, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.

NHLE/ HER No.	Name	Justification for screening out
MLE22643	Roman pottery from 7, Mill Lane, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only (found during watching brief), remains removed and no longer has a setting at this location.
MLE22645	Post-Medieval/Modern mushroom sheds between 15 and 21, Folville Street, Ashby Folville	Outside of the draft Order Limits. Functional agricultural buildings unlikely to be sensitive to change from the Project.
MLE22714	Site of cruck-framed house, Main Road, Twyford	Outside of the draft Order Limits. No longer extant.
MLE22761	Brown's Hill Quarry, ironstone quarry, Holwell	Outside of the draft Order Limits. Industrial site unlikely to be sensitive to change from the Project.
MLE22977	Anglo-Saxon finds from east of Welby Lane, Welby	Although within the draft Order Limits, these approximately located metal detected finds do not provide enough evidence to assess potential impacts.
MLE22997	Bronze Age bracelet fragment from west of Asfordby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE23060	Medieval finger ring from Stump Cross area, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE23120	Medieval ridge and furrow earthworks east of Great Lane and north of Leicester Road, Frisby on the Wreake	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLE23128	Roman finds from west of 60, Main Street, Sewstern	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE23129	Medieval stonework from 79, Main Street, Sewstern	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE23130	Medieval stonework from 56, Main Street, Sewstern	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE23461	Medieval ridge and furrow earthworks south of Sysonby Lodge, Melton Mowbray	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLE23605	Former house adjacent (east) to Church of St. Andrew, Main Street, Coston	Site of demolished house outside of the draft Order Limits. No longer extant and buried remains unlikely to be sensitive to change from the Project.
MLE23644	Possible Roman site east of Welby Lane, Welby	Although within the draft Order Limits, this is a possible site indicated by findspots and there is insufficient evidence to assess as a buried site which could be impacted by the Project. Geophysics and trial trenching will be reported on in the ES and this assessment will be updated.
MLE23821	Medieval silver penny, west of Freeby View Farm House, Thorpe Arnold	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE23878	Site of cruck house, Asfordby	Approximate location only. Not enough evidence for assessment.
MLE23963	Asfordby Lodge Farm, Bypass Road, Asfordby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE23964	Former Welby Lodge, west of Welby Lane, Welby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE23965	Church Farm, Church Lane, Wartnaby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE23966	Spring Cottage, Spring Lane, Wartnaby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE23981	Medieval remains, 4, Hollow Lane, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only (found during watching brief), remains removed and no longer has a setting at this location.
MLE23985	Sysonby Farm, Nottingham Road, Melton Mowbray	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE23990	Welby Grange, Welby Road, Welby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.

NHLE/ HER No.	Name	Justification for screening out
MLE23991	Unnamed farm 500m north of Nottingham Road, Melton Mowbray	Outside of the draft Order Limits. No longer extant.
MLE23997	Potter Hill Farm, Potter Hill, Nottingham Road, Ab Kettleby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE23998	Barn Farm, Holwell Lane, Holwell	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE24152	Bronze Age gold ring from north-west of Twyford Lodge, Twyford	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE24247	Outbuilding to rear of 159, Main Street, Asfordby	Outside of the draft Order Limits. Former smithy in Asfordby. Unlikely to be sensitive to change from the Project due to functional nature of setting.
MLE24273	Site of a cruck-framed house, Main Street, Asfordby	Site of demolished house outside of the draft Order Limits. No longer extant and buried remains unlikely to be sensitive to change from the Project.
MLE24449	Bronze Age awl from south-east of Ashby Folville	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE24474	Prehistoric flint from south of Bypass Road, Asfordby	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE24475	Medieval/Post-Medieval pottery south of the Bypass Road, Asfordby	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE24502	Possible Iron Age pit north-east of Sysonby Farm, Melton Mowbray	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE24503	Roman ditches north of John Ferneley College, Melton Mowbray	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE24821	World War II spigot mortar emplacement east side of Twyford	Remains of gun emplacement footings would not have a setting sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLE24962	Anglo-Saxon brooch from south of Red Lodge, Asfordby	Although within the draft Order Limits, this is a findspot that represents an artefact no longer present at this location.
MLE24974	Ironstone wall, southern boundary to Wartnaby Hall, Main Street, Wartnaby	Historic wall outside of the draft Order Limits. Setting likely to be localised and not sensitive to change from the Project.
MLE24976	Anglo-Saxon finds from near the Stump Cross, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE24979	Iron railings and kissing gate, east side of Main Street, Wartnaby	Historic railings outside of the draft Order Limits. Setting likely to be localised and not sensitive to change from the Project.
MLE24980	Telephone box at entrance to Friars Well Estate, Wartnaby	Historic telephone box outside of the draft Order Limits. Setting likely to be localised and not sensitive to change from the Project.
MLE24983	Village pond on Well Lane, Ab Kettleby	Historic pond in village. Setting likely to be localised and not sensitive to change from the Project.
MLE25769	18th Century structure, Main Street, Twyford	Structure found during watching brief, outside of the draft Order Limits. No longer extant.
MLE25770	Post-Medieval wall, perhaps associated with Lewin's Bridge, Main Street, Twyford	Structure found during watching brief, outside of the draft Order Limits. No longer extant.
MLE25800	Friars Well Farm, Main Street, Wartnaby	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE25803	Rosary Farm, Main Street, Saxelbye	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE25805	Manor House Farm, Church Lane, Saxelbye	Outside of the draft Order Limits. This is a farmstead which is likely to have a setting of other agricultural buildings and fields. The Project would not alter this relationship.
MLE25934	Medieval activity north of 25, Water Lane, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE25935	Possible Prehistoric activity north of 25, Water Lane, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.

NHLE/ HER No.	Name	Justification for screening out
MLE26194	Medieval ridge and furrow earthworks, west of Great Lane, south of Frisby on the Wreake	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLE26338	Post-Medieval cufflink from near Shoby Lodge Farm, Shoby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE26480	Neolithic/Bronze Age flint from Welby deserted settlement	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE26481	Roman pottery from Welby deserted settlement	Outside of the draft Order Limits. Findspot only (found during trial trenching), remains removed and no longer has a setting at this location.
MLE26793	Cobble wall, Ashby Folville village centre	Historic wall outside of the draft Order Limits. Setting likely to be localised and not sensitive to change from the Project.
MLE27422	17th Century cuff link, Park Farm, Shoby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE27427	Roman pit, Hilltop Farm, Melton Mowbray	Outside of the draft Order Limits. Findspot only (found during excavation), remains removed and no longer has a setting at this location.
MLE27500	Ironstone quarry (no. 11), between Buckminster and Sewstern	Outside of the draft Order Limits. Industrial site unlikely to be sensitive to change from the Project.
MLE27651	Medieval dagger chape, Gaddesby Brook, Gaddesby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE27733	Possible site of Medieval watermill, south of Spinney Farm, Melton Mowbray	Possible watermill earthworks, outside of the draft Order Limits. Setting of the mill would be functional and would not be sensitive to change from the Project.
MLE27930	Human remains from 35, King Street, Twyford	Remains found during construction, possibly indicating more extensive buried remains. Outside of the draft Order Limits. The known remains have been removed and further buried remains are unconfirmed, so further consideration of setting is not possible.
MLE28426	Medieval wall, east of the moated site and church, Ab Kettleby	Stone wall found during watching brief, outside of the draft Order Limits. No longer extant.

NHLE/ HER No.	Name	Justification for screening out
MLE28427	Neolithic/Bronze Age flint, east of the moated site and church, Ab Kettleby	Outside of the draft Order Limits. Findspot only (found during watching brief), remains removed and no longer has a setting at this location.
MLE28462	Post-Medieval drainage ditches and ridge and furrow, north-east of Hall Farm, Coston	Outside of the draft Order Limits. Ridge and furrow earthworks, and post-medieval ditches, are unlikely to have a setting sensitive to change from the Project.
MLE28471	Former Medieval ridge and furrow earthworks south of Buckminster	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLE28476	Medieval ridge and furrow earthworks north/east of Coston	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLE28478	Medieval ridge and furrow earthworks, Hall Farm, Coston	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLE28481	Former Medieval ridge and furrow south-west of Buckminster	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLE28482	Former Medieval ridge and furrow earthworks north of Coston Covert, east of Coston	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLE28666	Possible pits, west of Twyford Lodge, Twyford	Possible buried remains outside of the draft Order Limits. Nature of buried remains unconfirmed so further consideration of setting is not possible, but may be industrial (extractive) so would not be sensitive to change in setting.
MLE28667	Possible pits, north of Freezeland Farm, Twyford	Possible buried remains outside of the draft Order Limits. Nature of buried remains unconfirmed so further consideration of setting is not possible, but may be industrial (extractive) so would not be sensitive to change in setting.
MLE28747	Outbuildings at The Old Hall, 146, Main Street, Asfordby	Located outside of the draft Order Limits, within the Study Area of the proposed reconductoring. Potential for impacts arising from change to setting are scoped out.
MLE29036	The Old Co-op, Main Street, Asfordby	Located outside of the draft Order Limits, within the Study Area of the proposed reconductoring. Potential for impacts arising from change to setting are scoped out.

NHLE/ HER No.	Name	Justification for screening out
MLE29040	Cast iron bridge, Mill Lane, Asfordby	Located outside of the draft Order Limits, within the Study Area of the proposed reconductoring. Potential for impacts arising from change to setting are scoped out.
MLE29098	Asfordby Coal Mine, south side of Welby	Outside of the draft Order Limits. Industrial site unlikely to be sensitive to change from the Project.
MLE29145	World War II AA site and Prisoner of War camp - Asfordby Hostel, Welby Lane, Welby	Outside of the draft Order Limits. A military site which will have a functional relationship to its setting. This would not be sensitive to change from the Project.
MLE29345	Boundary wall, Folville Street (south side), Ashby Folville	Located outside of the draft Order Limits, within the Study Area of the proposed reconductoring. Potential for impacts arising from change to setting are scoped out.
MLE29346	Boundary wall, Folville Street (south side), Ashby Folville	Located outside of the draft Order Limits, within the Study Area of the proposed reconductoring. Potential for impacts arising from change to setting are scoped out.
MLE29657	Iron Age/Roman site north-east of Freeby Lodge, Freeby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE29661	Possible Iron Age enclosure east of Freeby Wood, Freeby	Outside of the draft Order Limits. Buried remains unlikely to have a setting sensitive to change from the Project.
MLE29716	Medieval ridge and furrow earthworks west of Ashby Folville	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLE29717	Medieval ridge and furrow earthworks south of Ashby Folville	Outside of the draft Order Limits. Ridge and furrow earthworks are unlikely to have a setting sensitive to change from the Project.
MLE3329	Bronze Age barrow south-east of Red Lodge Farm, Asfordby	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE3334	Medieval watermill, Asfordby Mill, Asfordby	Possible watermill earthworks, outside of the draft Order Limits. Setting of the mill would be functional and would not be sensitive to change from the Project.
MLE3335	Post-Medieval watermill, Asfordby Mill, Asfordby	Possible watermill earthworks, outside of the draft Order Limits. Setting of the mill would be

NHLE/ HER No.	Name	Justification for screening out
		functional and would not be sensitive to change from the Project.
MLE3343	Possible kiln site at Potter Hill Farm, Ab Kettleby	Possible location based on documentary sources. Not enough evidence for assessment.
MLE3346	Fishpond at Thorny Plantation, Welby	Archaeological features discovered during excavation. No longer extant.
MLE3348	Watermill at Millfield, Welby	Possible location based on documentary sources. Not enough evidence for assessment.
MLE3351	Welby Osier Beds	Possible osier bed and millpond earthworks, outside of the draft Order Limits. Setting would be functional and would not be sensitive to change from the Project.
MLE3352	Possible Anglo-Saxon moot site at Great Framland, Melton Mowbray	Possible location based on documentary sources. Not enough evidence for assessment.
MLE3453	Wood bank west of Green Hill, Old Dalby	Possible medieval wood bank earthworks, outside of the draft Order Limits. Setting would be functional and would not be sensitive to change from the Project.
MLE3459	Earthwork north of Buckminster Lodge, Buckminster	Possible headland earthworks, outside of the draft Order Limits. Setting would be functional and would not be sensitive to change from the Project.
MLE3461	Ponds north-east of Buckminster Lodge, Buckminster	Possible pond earthworks, outside of the draft Order Limits. Setting of the would be functional and would not be sensitive to change from the Project.
MLE3462	Windmill at Millers Moor, Sewstern	Possible location based on documentary sources. Not enough evidence for assessment.
MLE3463	Sewstern Windmill	Destroyed by quarrying. No longer extant.
MLE3716	Earthwork north of Saxby	Possible headland earthworks, outside of the draft Order Limits. Setting of the would be functional and would not be sensitive to change from the Project.
MLE3725	Possible Roman site north-east of the Grange, Freeby	Outside of the draft Order Limits. Artefact scatter may indicate buried remains, but identified remains have been removed and have no setting.
MLE3728	Medieval/Post-Medieval earthworks west of the	Medieval enclosure and ridge and furrow investigated through archaeological investigation outside of the draft Order Limits. Setting of the

NHLE/ HER No.	Name	Justification for screening out
	Laurels, Frisby on the Wreake	would be functional and would not be sensitive to change from the Project.
MLE3731	Possible medieval watermill site, north-east of Frisby on the Wreake	Possible location based on documentary sources. Not enough evidence for assessment.
MLE3733	Iron Age/Roman pottery from Sunnyside, Frisby on the Wreake	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE3750	Post-Medieval windmill at Chalk Pool Hill, Frisby on the Wreake	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE3794	Site of a Post-Medieval hospital, Ashby Folville	Possible location based on documentary sources. Not enough evidence for assessment.
MLE3801	Enclosure cropmarks north of Mount Pleasant Farm, Garthorpe	Possible headland earthworks, outside of the draft Order Limits. Setting of the would be functional and would not be sensitive to change from the Project.
MLE3811	Garthorpe Mill	Outside of the draft Order Limits. Demolished mill. No longer extant.
MLE3812	Windmill south of Grange Farm, Garthorpe	Possible location based on documentary sources. Not enough evidence for assessment.
MLE3813	Garthorpe Castle, Castle Close, Garthorpe	Possible location based on documentary sources. Not enough evidence for assessment.
MLE3817	Watermill adjacent to Mill Farm, Coston	Possible location based on documentary sources. Not enough evidence for assessment.
MLE3830	Windmill mounds south-east of Manor House, Saxelbye	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE3833	Earthworks north of Saxelbye	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE3985	Possible Iron Age double-ditched linear feature north-east of Framlands Farm, Melton Mowbray	Outside of the draft Order Limits. Buried archaeological remains unlikely to be sensitive to change from the Project.

NHLE/ HER No.	Name	Justification for screening out
MLE3987	Possible Iron Age enclosure north-east of Framlands Farm, Melton Mowbray	Outside of the draft Order Limits. Buried archaeological remains unlikely to be sensitive to change from the Project.
MLE4004	Anglo-Saxon cemetery at Sysonby Lodge Farm, Melton Mowbray	Site of a possible early medieval cemetery, identified in the 19th century while gravel digging from discovery of human bones along with spearheads, a ring, part of a buckle and a shield boss. Investigation in the 1980s identified cropmarks and a possible horse harness and iron slag, although a watching brief during the erection of an agricultural building in the 1990s did not identify anything. Uncertainty over the accuracy of the location, and even the accuracy of the artefact identification, means that although this is within the draft Order Limits, this is will not be assessed for impacts without further evidence from trial trenching or geophysical survey.
MLE4005	Boundary stone, south-west of Scalford Gorse, Melton Mowbray	Outside of the draft Order Limits. Boundary stone will have a very specific relationship to setting which is localised and functional. Not sensitive to change from the Project.
MLE4033	Scalford Windmill, Scalford	Possible location based on documentary sources. Not enough evidence for assessment.
MLE4045	Watermill north-west of Cumberland Lodge, Scalford	Outside of the draft Order Limits. Buried archaeological remains unlikely to be sensitive to change from the Project.
MLE4049	Possible watermill site west of Scalford Lodge, Scalford	Possible location based on documentary sources. Not enough evidence for assessment.
MLE4175	Windmill north-east of the Manor House, Twyford	Possible location based on documentary sources. Not enough evidence for assessment.
MLE4210	Prehistoric cropmarks south-west of Wymondham Lodge, Wymondham	Outside of the draft Order Limits. Buried archaeological remains unlikely to be sensitive to change from the Project.
MLE6366	Bronze Age finds from Welby	Outside of the draft Order Limits. Findspot only (found during gravel digging), remains removed and no longer has a setting at this location
MLE6381	Late Prehistoric flint knife from south of Ivy Cottage, Kirby Bellars	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6383	Bronze Age arrowhead found south-east of Garthorpe	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.

NHLE/ HER No.	Name	Justification for screening out
MLE6502	Iron Age pottery found at Peas Field, Welby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6587	Beehive quern from west of the Manor House, Twyford	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6606	Iron Age/Roman quern from north of Garthorpe	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6807	Medieval seal from south-east of Wartnaby Church, Wartnaby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6809	Medieval pilgrim flask from east of the Welby Osier Beds	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6810	Medieval coin from Welby Lodge, Welby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6814	Medieval tile from The Charlottes, Main Street, Sewstern	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6834	Medieval pottery from The Row, Garthorpe	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6836	Medieval pottery from south-east of Garthorpe	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6880	Medieval coin found north-west of Dairy Farm, Twyford	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6881	Medieval pottery from west of the church, Twyford	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE6882	Medieval find from north-east of Spinney Farm, Thorpe Arnold	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE7066	Pebble hammers from 33, Regency Road, Asfordby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.

NHLE/ HER No.	Name	Justification for screening out
MLE7335	Neolithic axe found south-east of Kirby Bellars	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE7568	Flint cores found south of the Church, Asfordby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE7595	Prehistoric flint from west of Spinney Farm, Scalford	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE7673	Prehistoric quern from south of Abbott Lodge, Garthorpe	On the edge of the draft Order Limits. Findspot only, remains removed and no longer has a physical presence or setting at this location.
MLE7956	Roman coins from 26, Klondyke Way, Asfordby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE7990	Undated column fragment from north-east of Garthorpe	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE7991	Roman pottery from north-east of Garthorpe	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE7992	Roman finds from Saxelbye Park	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8007	Roman pottery from north of Spinney Farm, Melton Mowbray	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8011	Roman pottery found at Ringlethorpe/Goldsmith's Grange, Scalford	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8013	Roman knife handle found south of Scalford Hall, Scalford	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8026	Roman pottery from east of Markham House, Thorpe Satchville	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8027	Roman coin from north-east of the windmill, Wymondham	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.

NHLE/ HER No.	Name	Justification for screening out
MLE8178	Saxo-Norman pottery from north-east of the church, Garthorpe	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8255	Spearheads from Wartnaby Stonepit, Wartnaby	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8263	Worked flint from Spinney Farm, Melton Mowbray	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8305	Quern found south-west of Buckminster Lodge, Buckminster	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8387	Millstone from Gifford Lodge Farm, Ashby Folville	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8435	Flint scraper from north of Ashby Folville	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
MLE8436	Undated walls, Gaddesby Brook, Ashby Folville	Outside of the draft Order Limits. Post-medieval garden walls identified during a watching brief. No longer extant.
MLE8475	Roman pottery, Gaddesby Brook, Ashby Folville	Outside of the draft Order Limits. Findspot only (found during a watching brief), remains removed and no longer has a setting at this location.
MLE8764	Saltway Roman road	Outside of the draft Order Limits. The buried and earthwork remains of the road link with other Roman sites in the vicinity, and are also understood in a specific topographical context, as the Roman engineers worked with the natural landform when surveying routes. These elements of the road's setting contribute to its value but are not sensitive to change from the Project.
MLE8836	Early road surface under Leicester Road, south of Kirby, Frisby on the Wreake	Outside of the draft Order Limits. Remains fond during archaeological watching brief. No longer extant.
MLE8838	Undated pit, Leicester Road, south of Frisby on the Wreake	Outside of the draft Order Limits. Remains fond during archaeological watching brief. No longer extant.
MLE8839	Le Strete, Roman road	Although within the draft Order Limits, this is within the alignment of proposed reconductoring

NHLE/ HER No.	Name	Justification for screening out
		and it is not anticipated that there would be any impact.
MLE8840	Iron Age/Roman site south of Kirby Bellars	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE8842	Anglo-Saxon site south of Kirby Bellars	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE8858	Historic settlement core of Saxelbye	Although within the draft Order Limits, this is within the alignment of proposed reconductoring and it is not anticipated that there would be any impact.
MLE8859	Road surface, Main Street, Saxelbye	Outside of the draft Order Limits. Remains fond during archaeological watching brief. No longer extant.
MLE8866	Medieval remains east of the Church, Asfordby	Outside of the draft Order Limits. Findspot only (found during a watching brief), remains removed and no longer has a setting at this location.
MLE8867	Worked flint found east of the Church, Asfordby	Outside of the draft Order Limits. Findspot only (found during a watching brief), remains removed and no longer has a setting at this location.
MLE8910	Possible Roman Road, Harborough/Melton Road, Tilton on the Hill	Sections of possible Roman road, outside of the draft Order Limits. Not sensitive to change from the Project.
MLE9339	Undated road surface, Main Street, Twyford	Outside of the draft Order Limits. Remains fond during archaeological trial trenching. No longer extant.
MLE9396	Possible Post-Medieval road surface, Water Lane and Main Street, Frisby on the Wreake	Outside of the draft Order Limits. Remains fond during archaeological watching brief. No longer extant.
MLE9626	Medieval and Post-Medieval remains, 7, Mill Lane, Frisby on the Wreake	Outside of the draft Order Limits. Remains fond during archaeological watching brief. No longer extant.
MLE9778	Roman coin from 15 Winchester Drive, Melton Mowbray	Outside of the draft Order Limits. Findspot only, remains removed and no longer has a setting at this location.
