

SUMMARY OF CVP QUANTIFICATION

Ref	BP chapter	CVP item	Type of quantification	Quantified for CVP?	Magnitude estimate?	Methodology for quantification	Benefit to consumers (€)	Benefit to consumers (€m)
ET1	Stakeholders	Stakeholder engagement strategy	Estimation not feasible					
	Enable the ongoing transition	Optimisation with ESO						
ET2		A. Optimisation of harmonic filtering	Quantification for CVP	✓		Net present value of estimated savings from a coordinated approach with ESO on harmonic filtering	18,820,000	18.8
ET3		B. Optimisation with ESO to reduce system costs	Quantification for CVP	✓		Net present value of estimated constraint cost savings from better system access and network enhancement	#REF!	#REF!
ET4	Enable the ongoing transition	Optimisation with DNOs to identify whole system opport.	Quantification for CVP	✓		Net present value of expected cost savings	16,615,393	16.6
ET5	Connect and use	Driving efficiency through collaboration, competition and	Quantification for CVP	✓		Net present value of expected cost savings	9,481,610	9.5
ET6	Safe and reliable	Tougher Energy not Supplied (ENS) targets	Quantification for CVP	✓		Present value of rewards foregone due to tougher target	#REF!	#REF!
ET7	External threats	Adding environmental value to flood protection sites	Rough estimate of magnitude*	✓		Applying a 10% increase in natural capital baseline to an estimate of the size of flood protection sites	463,849	0.5
ET8	Environment and communities	Supporting local communities (UfP)	Quantification for CVP	Quanitified by NGET		Estimate based on an assumed benefit cost ratio	22,575,262	22.6
ET9	Environment and communities	Supporting the wider community	Estimation not feasible					
ET10	Environment and communities	Corporate social responsibility in the supply chain	Estimation not feasible					
ET11	Environment and communities	Carbon emissions reductions	Rough estimate of magnitude*	✓		Net present value of carbon avoided through moving to 100% renewables for own use electricity	320,138	0.3
FT12	Environment and communities	Caring for the natural environment	Quantification for CVP	✓		Benefit delivered by a 10% increase in current natural capital value	32,448,203	32.4
ET13	Innovation	Innovating to support vulnerable consumers	Estimation not feasible					
ET14	Innovation	Innovation in decarbonising materials and methods	Quantification for CVP	✓		Net present value of expected carbon savings from research into SF6 and carbon free construction material	13,096,055	13.1
ET15	Innovation	Decide Centre for Innovation	Quantification for CVP	Quanitified by NGET		Estimated based on an assumed benefits multiplier	#REF!	#REF!
ET16	Innovation	Lead decarbonisation, implementing the Clean Growth St	Estimation not feasible					
ET17	Innovation	Digitalisation of all maintenance, monitoring and testing of	Estimation not feasible					
ET18	Innovation	Digitalisation to speed up connections	Estimation not feasible					
ET19	Transparency	Transparency in reporting and sharing expertise	Estimation not feasible					
	Total for CVP						#REF!	#REF!
	Total for rough estimates						€783,986	€0.8

*Where these estimates of magnitude are presented externally, we recommend using the following caveat: "These figures are highly indicative because many of the input assumptions are very uncertain. They should only be interpreted as a rough indication of the possible order of magnitude of these benefits, given the assumptions made."

1. To enable a robust comparison over time, this time series has been produced on a consistent basis. Where there were discontinuities or gaps in the data, a modelling approach was taken to estimate the business counts. These estimates supersede those published in previous BPE (2010-2015) series.

A .. symbol indicates where data is not available.

Numbers of businesses are rounded to the nearest 100. Consequently, totals and sub totals may not exactly match the sum of their parts.

Source: Labour Force Survey (LFS), Office for National Statistics
Produced by Demographic Analysis Unit, Office for National Statistics
pop.info@ons.gov.uk

The latest release for data on Families and Households can be found here:

http://www.ons.gov.uk/ons/_site/family-demography/families-and-households/index.html

1. Estimates are all rounded to the nearest hundred.

2. Totals may not sum due to rounding.

3. The Labour Force Survey is a household survey of people in the UK. It covers people in private households, NHS accommodation and students in halls of residence whose parents live in the UK. However people in other communal establishments such as prisons are excluded.

4. As the estimates are based on a survey, they are subject to sampling variability. This is because the sample selected is only one of a large number of possible samples that could have been drawn from the population.

Statistics are not produced for Northern Ireland. If you have any comments or feedback, please email pop.info@ons.gov.uk.

Further guidance on the use of carbon values is available from the appraisal guidance (Chapter 3) which can be downloaded from the Green Book supplementary guidance section of GOV.UK webpage:

For further details on carbon valuation, see:

<https://www.gov.uk/government/collections/carbon-valuation--2>

Table 3: Recommended Domestic Electricity Willingness to Pay Values (£/consumer/year)

Attributes	WTF
Risk of powercuts	
2 hours decrease in the hours of powercuts at a 1.5% probability	
4 hours decrease in the hours of powercuts at a 1.5% probability	
Every fewer day to recover from a blackout	
Undergrounding Overhead Transmission Lines	
20 miles additional underground in National Parks etc.	
20 miles additional underground in other areas	
Improving visual amenity of Overhead Transmission Lines	
Additional visual impact work in National Parks etc.	
Additional visual impact work in National Parks and other areas	
Additional transmission site environment improved	
25 additional sites	
45 additional sites	1
Investing in innovation projects	
Medium Scale Projects compared to Small Scale Projects	
Large Scale Projects compared to Small Scale Projects	
Supporting local communities	
Current level of community activities	
Current level of community activities and additional funding to charities	
Investing in EV Charging Infrastructure	
Invest before definite need	
Investing in infrastructure to connect to renewable generation	
Invest before definite need	1

Table 6: Recommended Non-domestic Electricity Willingness to Pay values in Percentage (% bill/consumer/year) and Monetary Terms (£/consumer/year)

Attributes	WTP (%)	WT
Risk of powercuts		
2 hours decrease in the hours of powercuts at a 1.5% probability	1.20%	43
4 hours decrease in the hours of powercuts at a 1.5% probability	1.86%	66
Days to recover from a blackout		
2 fewer days to recover form a blackout	0.67%	24
Undergrounding Overhead Transmission Lines		
20 miles additional underground in National Parks etc.	1.25%	45
20 miles additional underground in other areas	1.27%	45
Improving visual amenity of Overhead Transmission Lines		
Additional visual impact work in National Parks etc.	0.76%	27
Additional visual impact work in National Parks and other areas	0.94%	33
Every additional transmission site environment improved	0.05%	1
Investing in innovation projects		
Medium Scale Projects	0.29%	10
Large Scale Projects	0.29%	10
Supporting local communities		

Supporting local communities		
Current level of community activities	0.53%	19
Current level of community activities and additional funding to charities	0.53%	19
Investing in EV Charging Infrastructure		
Invest before definite need	0.90%	32
Investing in infrastructure to connect to renewable generation		
Invest before definite need	1.08%	38

es

Table 4: Recommended Domestic Gas Willingness to Pay values (£/consum

Attributes	WTP (£)
For a 1/10,000 reduction in the probability of a supply interruption.	6.71
Improving environment around transmission sites	
Additional 3 large sites and 10 small sites	3.61
Additional 11 large sites and 30 small sites	5.37
Supporting local communities	
Current level of community schemes compared to no support	4.79
Current level of community schemes and additional funding to charities and other organizations compared to no support	6.85
Investing in innovation projects	
Small scale projects compared to no innovation projects	6.05
Large scale projects compared to no innovation projects	9.40
Supporting consumers in fuel poverty	
Provide information to lower their energy bills compared to no information	1.41
Provide information to lower their energy bills and funding/financing compared to no support	5.06

Table 7: Recommended Non-domestic Gas Willingness to Pay values in Percentage and Monetary Terms

Attributes	WTP (%)
For a 1/10,000 reduction in the probability of a supply interruption.	1.53%
Improving environment around transmission sites	
Additional 3 large sites and 10 small sites	0.31%
Additional 11 large sites and 30 small sites	1.13%
Supporting local communities	
Current level of community schemes compared to no support	1.45%
Current level of community schemes and additional funding to charities and other organizations compared to no support	1.70%
Investing in innovation projects	
Small scale projects compared to no innovation projects	1.36%
Large scale projects compared to no innovation projects	2.25%
Supporting consumers in fuel poverty	
Provide information to lower their energy bills compared to no information	0
Provide information to lower their energy bills and funding/financing compared to no support	0
