

Hinkley Connection Project

Temporary footpath diversions AX24/11, AX24/13, and AX3/42
From 20 August 2021 for six months

We're sorry for any inconvenience this may cause.

We're building a new high new 57 km high voltage electricity line to connect six million homes and businesses to new sources of low carbon energy and help the UK meet its ambitious net zero target by 2050.

As part of this, we're working with Western Power Distribution (WPD) to make changes to the existing electricity network and to connect the new WPD substation at Sandford.
