

System Operation Network Codes – Update on progress

Carole Hook
JESG – June 2012

Overview

- **System Operation Framework Guidelines** issued December 2011 by ACER
- EC letter in February 2012 outlined mandate to develop the following three network codes:

Network Code	Drafting Start
Operational Security	1 March 2012
Operational Planning and Scheduling	1 April 2012
Load-Frequency Control and Reserves	Drafting to commence 1 July 2012

Operational Security NC

- Code to establish common security principles for system operation

Update:

- 1st draft code published by ENTSOE: 12 April
- ENTSOE public workshop: 20 April
- 1st presentation at JESG: 1 May
- Further ENTSOE public workshop: 2 July
- Planned update to JESG: August
- ENTSOE consultation Sep/Oct 2012

Operational Planning and Scheduling NC

- Code to establish activities and tasks conducted prior to real-time

Update:

- 1st draft code published by ENTSOE: 15 May
- ENTSOE public workshop: 23 May
- Further ENTSOE public workshop: Late July
- Planned update to JESG: August
- ENTSOE consultation Nov/Dec 2012

Load-Frequency Control and Reserves NC

- Code to cover the real-time balancing of generation and demand to control system frequency

Update

- Drafting officially commences: 1 July
- ENTSOE public workshops: 12 July, 25 Sep
- Planned update to JESG: Sep
- ENTSOE consultation: Feb/Mar 2013
