

# Transparency Regulation

Alison Wedgwood  
JESG 6 December 2012

## Rationale

---

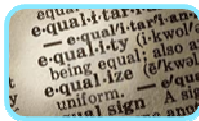

- Regulation 714/2009 Article 15 requires publication of data on
  - Network availability
  - Generation capacity
  - Cross-border interconnector capacity
  - Load
  - Unavailability (planned and unplanned)
- Availability of data underpins decisions on production, consumption and trading

## Key Points

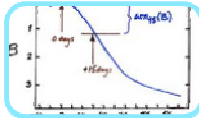

---

- Minimum common set of data that needs to be available to market participants
- Central collection and publication of data
- Role for ENTSO-E
  - Provision of common transparency platform
  - 'Manual of procedures' specifying details and format for submission of data
- Data to be available 12 months after Regulation comes into force (i.e. June 2014??)

Indicative Transparency Regulation project plan

## Stakeholder Engagement

---

- Ad-hoc expert group
  - To advise ENTSO-E on the development of procedures for the new central information transparency platform
  - Nominations to ENTSO-E by 14 December 2012
  - Ad-hoc group members selected to have a broad range of views represented and a good geographical diversity
  - Details on ENTSO-E website and will be included in JESG weekly update
  - Workshop 31 January 2013
  - Continued updates at JESG
