

Have your say

Our targeted consultation on the proposed change at this location runs from **12 noon 19 January 2026 to 11:59 pm 23 February 2026**.

If you have any comments regarding this proposed change, please use the location reference **Bulphan**.

If you have previously provided feedback on Norwich to Tilbury, please note that these comments have already been considered. Only comments or feedback relating to the above proposed changes will be considered as part of this consultation.

Our responses to previous feedback can be found in the Consultation Report included in our DCO application. Other matters that have been raised in relevant representations will be addressed during the examination. You can find our Consultation Report on the Planning Inspectorate's website at [national-infrastructure-consenting.planninginspectorate.gov.uk/projects/EN020027](https://planninginspectorate.gov.uk/projects/EN020027).

We will review feedback received as we refine our proposals. We will submit a change application and consultation report for each change to the Planning Inspectorate later this year.

Public information event

We are holding a public information event at Bulphan Village Hall on Wednesday 28 January to give local residents an opportunity to view the proposals near Bulphan and speak to members of the Project team about the proposed change.

- Date and time – **Wednesday 28 January**
11 am - 4 pm
- Venue – **Bulphan Village Hall, Church Road, Bulphan, RM14 3RU**

Webinar

We are also holding a webinar to provide another opportunity to ask the project team questions. The webinar will be held via Microsoft Teams.

The webinar covering this change will be held on **Tuesday 3 February at 6 pm**.

You can sign up for the webinar on our website: nationalgrid.com/norwich-to-tilbury

You can also call us on **0800 915 2497**

Feedback can be provided by:

Completing an online feedback questionnaire: nationalgrid.com/norwich-to-tilbury

Filling out a paper feedback questionnaire and sending it to the Freepost address below – if you haven't been sent one, please call us on **0800 915 2497** and we will post one to you

Sending us an email: contact@n-t.nationalgrid.com

Writing to us (no stamp required) at:
FREEPOST N TO T

The deadline for feedback is 11:59 pm on 23 February 2026

change to third-party access and works (Proposed Change Application 1)

We are proposing a new electricity transmission link between Norwich and Tilbury. This connection will help deliver secure, cleaner, and more affordable energy from where it is generated to where it is needed.

In August 2025, we submitted our application for a Development Consent Order to build and operate the new Norwich to Tilbury line. It is now being examined by the Planning Inspectorate. Since then, we have continued survey work and conversations with stakeholders.

Through this process, we have identified two locations where we want to make very minor changes to enhance our proposals.

These proposed changes are:

- Bulphan, change to third-party access and works (described within this leaflet)
- Little Bromley, change to the East Anglia Connection Node substation (EACN) access.

We are not proposing any other changes to our plans for the rest of the Project.

Making adjustments like this after an application has been accepted for examination is a normal part of the DCO process. We have notified the Planning Inspectorate of our intention to submit two change applications in spring 2026.

Before we finalise the plans, we are seeking feedback on the proposed changes from nearby communities.

The consultation is open from 12 noon on 19 January to 11:59 pm on 23 February 2026.

The proposed change near Bulphan

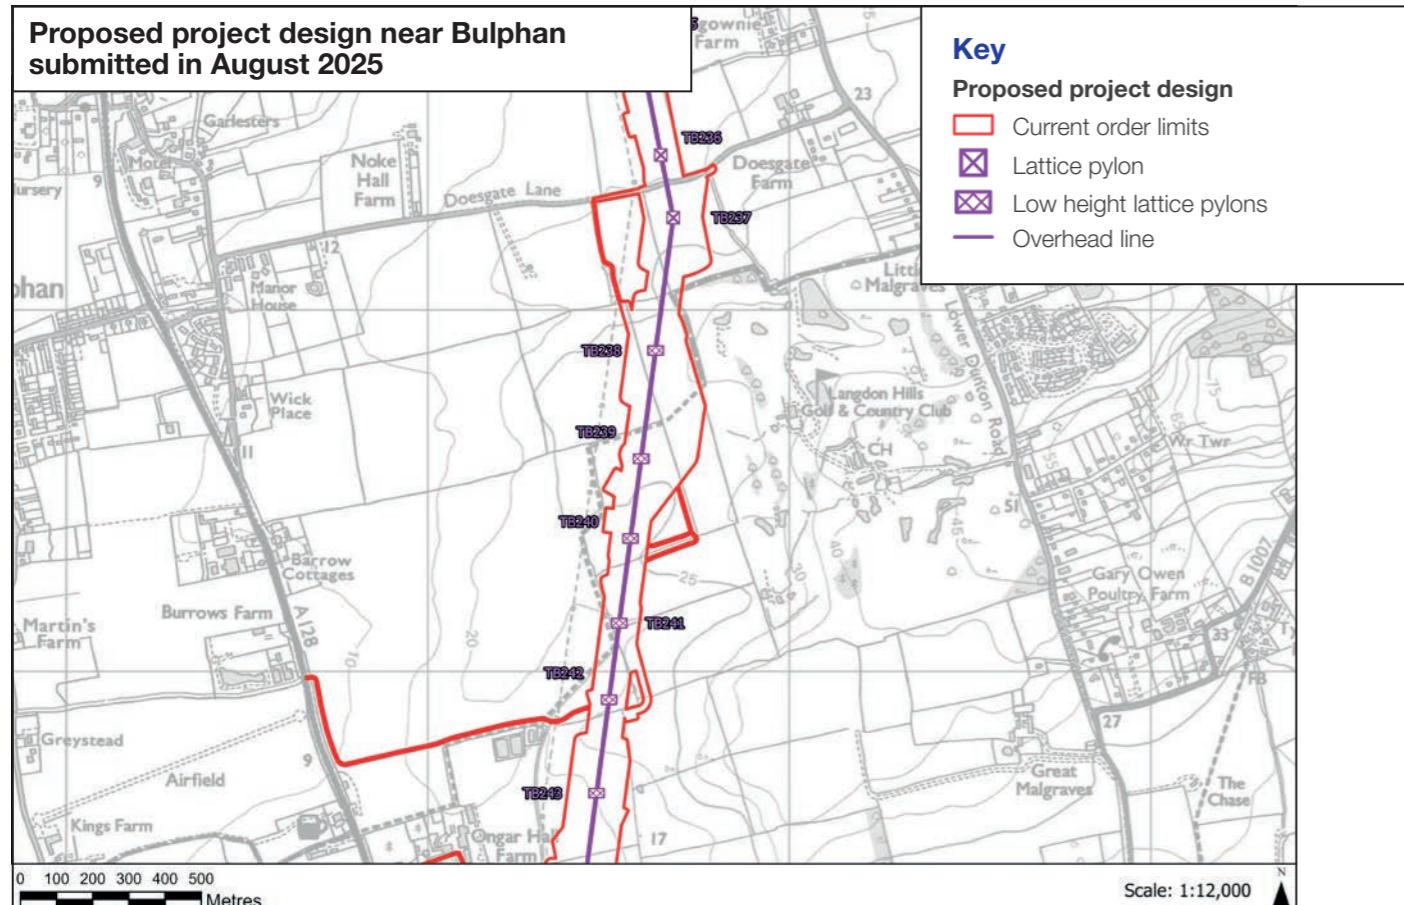

We are proposing a change to our plans where the overhead line crosses a metallic pipeline, west of Langdon Hills Golf Club. This relates only to works on the pipeline and does not affect the route or location of pylons in this area.

The pipeline is part of the national fuel infrastructure and is operated by the British Pipeline Agency Limited (BPA) on behalf of the owner of the pipeline, United Kingdom Oil Pipelines Limited (UKOP). Since we submitted our DCO application, studies have shown that mitigation works are needed to protect the pipeline.

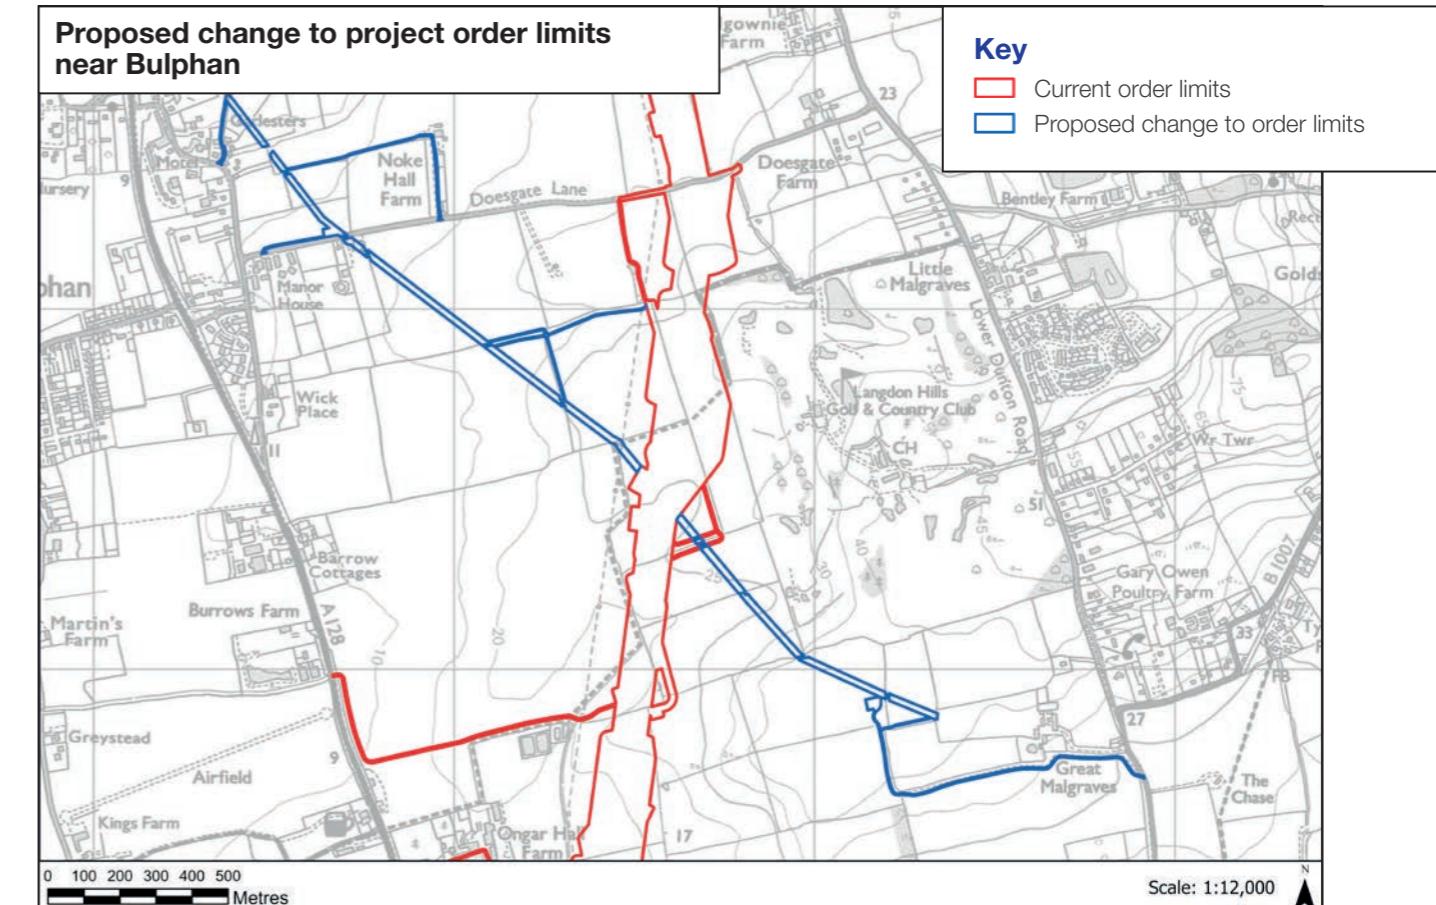

The proposed mitigation work involves installing anti-corrosion earthing strips and adding surface-mounted monitoring equipment units. Temporary construction access as well as temporary working and laydown areas will also be required to complete these works.

This work would usually be carried out by utility companies under their existing permitted development rights. In this case, neither the BPA nor UKOP has these rights, and so we need to include these works within the Norwich to Tilbury proposals.

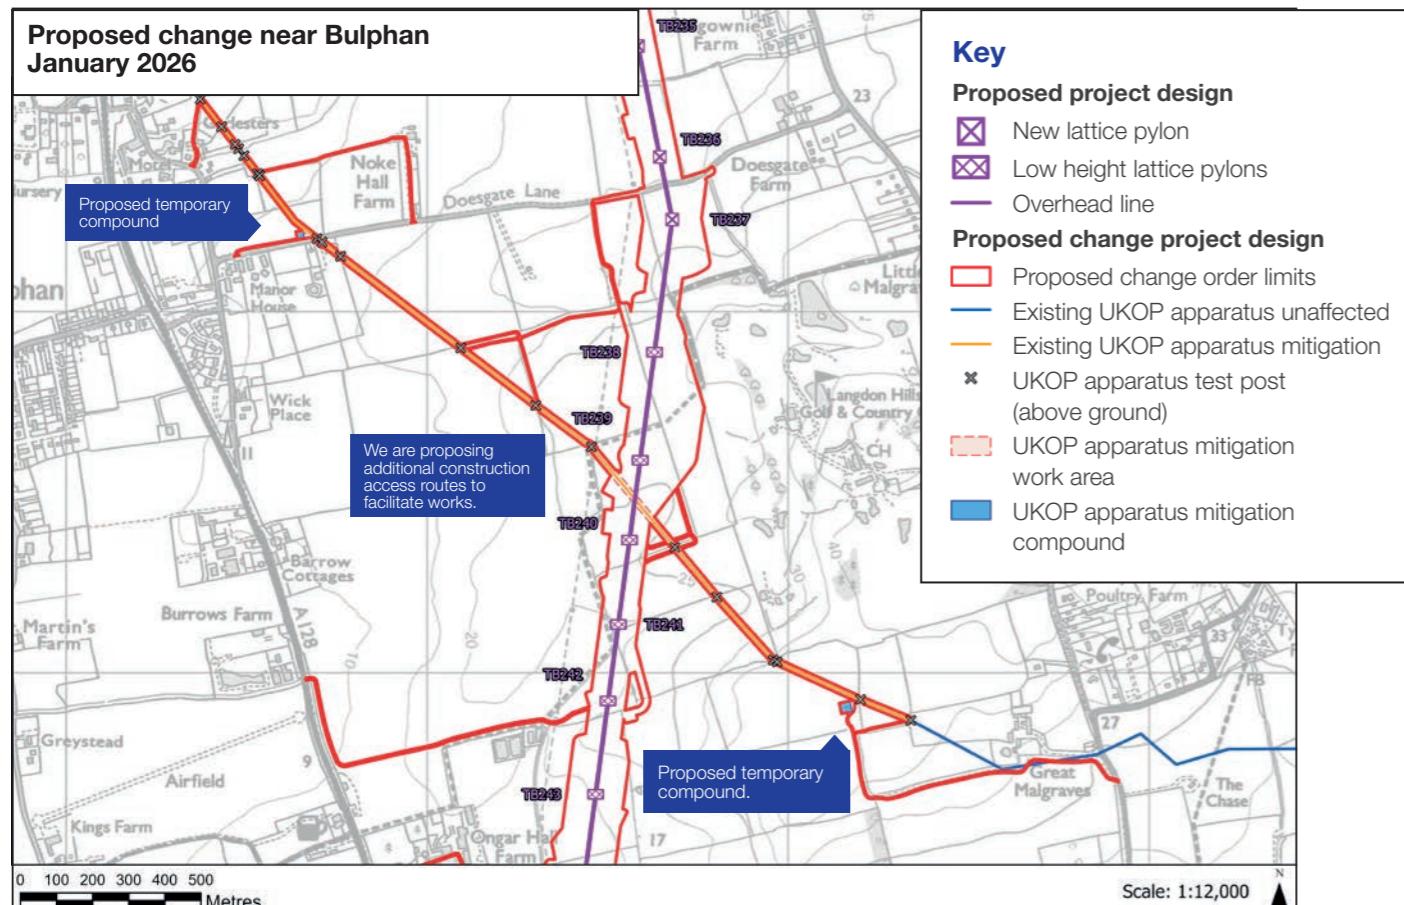

Project design submitted 2025

Proposed change to the order limits

Proposed change 2026

Order limits outline the area within which new infrastructure and temporary construction works would be located. This includes areas where temporary and permanent works to the highways would be needed to facilitate the construction of the Project.

What are the environmental implications of the proposed change?

The proposed change would not result in any new or different likely significant effects, or require additional mitigation measures, when compared to those reported within the Environmental Statement (ES) submitted as part of our DCO application.

For more information please see the Environmental Implications of Change document (EIC) with location reference 'Bulphan', which can be read alongside the information contained here.

If you received this leaflet in the post, the EIC will be enclosed. Alternatively, you can view the EIC on our website at nationalgrid.com/Norwich-to-tilbury.
