

Firm Frequency Response: OCP to DCP

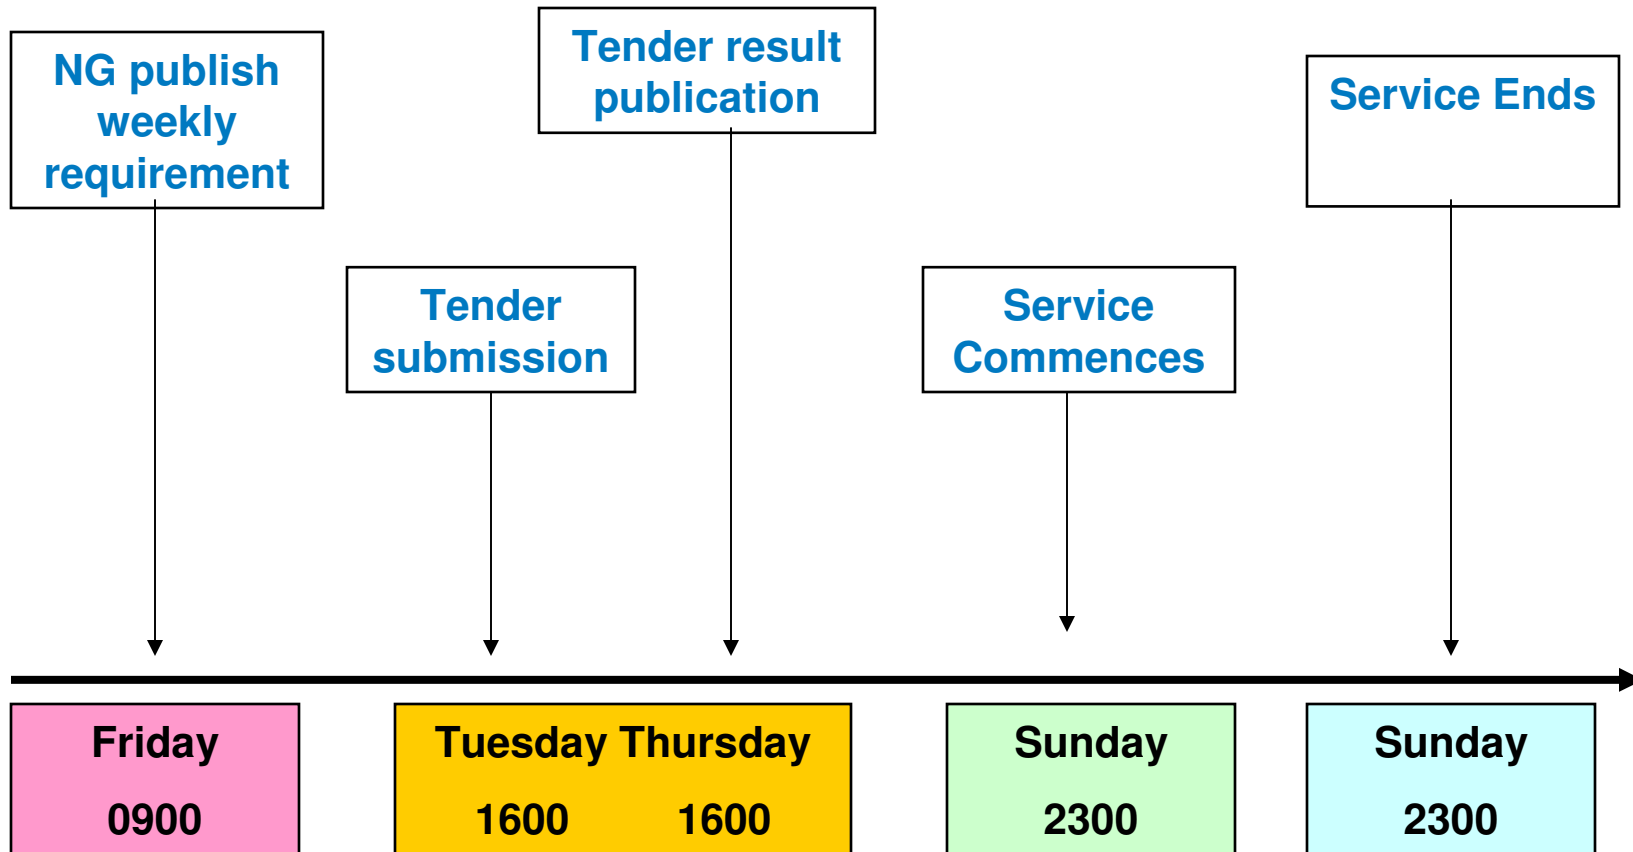

Eleanor Brogden – Account Manager

Firm Frequency Response Review

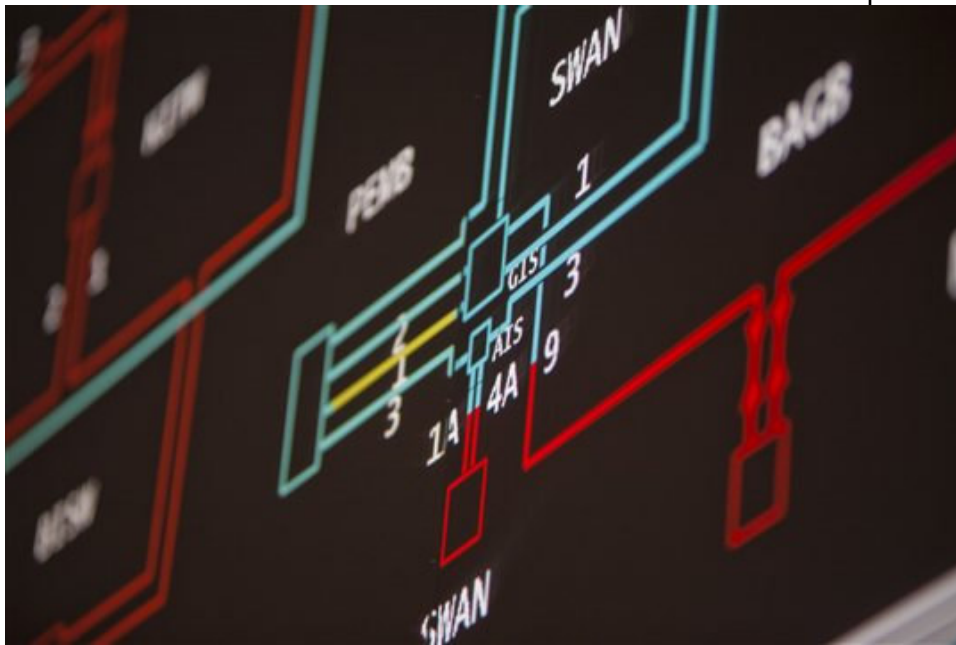

Week Ahead Tender Opportunities

Please note that this is to fine tune the existing monthly procurement.

Commercial Rapid Frequency Response

The automatic increase / decrease in Active Power in response to an decrease / increase in System Frequency, which effectively increases / decreases with time over the period 0 to 5 seconds from the time for the Frequency change (and fully delivered by the latter) and which must be maintained at no less reduction thereafter [25 seconds].

Next Steps

- Publication of DCP documents, March 2014;
- Publication of contract documents, March 2014 (to go live, June 2014);
- Electronic tendering to be implemented, April 2014;
- Internal week ahead modelling, requirement, & assessment methodologies to be implemented, April 2014'
- Frequency response requirements to be published, May 2014.
