1 Purpose and Scope

This document identifies and records all Approved procedures for use on the Electricity Transmission System in accordance with the National Grid UK Electricity Transmission plc Safety Rules. These procedures will be Approved or withdrawn in accordance with Management Procedure NSI 31 – ‘Approval / Withdrawal of Procedures for National Grid Electricity Safety Rules and Supporting Documentation’ or the Safety and Engineering Document Development System (SEDDS) as defined within NGUK/PM/SHE/99.

The layout of this guidance note reflects that of legislative codes of practice, where the rule (or mandatory obligation) is identified by a green panel on the left-hand side. The guidance follows after the rule and is identified by a blue panel.

Within National Grid, guidance notes hold equivalent status of an Approved Code of Practice (ACOP) in law. If not followed, you will be required to demonstrate that your safe system of work is of an equal or higher standard.

National Grid UK Electricity Transmission plc Safety Rules and the National Safety Instructions require the following Procedures and Processes to be Approved:

- The Addition / Removal of Equipment to / from the System – Management Procedure NSI 33
- Restoration of Motive Power (ROMP) Procedures
- Sanction for Work (SFW) Procedures
- G3 Special Instructions
- G4 Objections on Safety Grounds
- Live Line Working Specialised Procedures
