

EDSS

Operational Forum, April 2014

What is EDSS?

Electronic Data Submission System

- Provides an automated system to allow the input of notifications by external users directly into the National Grid control system;
 - Daily Flow Notifications (DFNs)
 - Offtake Profile Notifications (OPNs)
 - Storage Flow Notifications (SFNs)

What will you require?

- An File Transfer Protocol (FTP) account
- A generic email address;
 - To send the notification electronically
 - To receive a validated response
- A fax number
 - To receive fax rejection notices
 - To facilitate a contingency method (system failures / maintenance)

Next Steps

- Contact us to express your interest
 - Gasoperations.shipperliaison@nationalgrid.com
- Complete the registration form
- Configuration activities (8-10 weeks)
- Complete testing
- Go-Live!
