6th March 2017

Dear All,

Re: OFGEM Forecasting Incentive Scheme – Demand Forecasts

I would like to inform you National Grid's plans to publish day ahead, two days ahead, and seven day ahead national electricity demand forecasts by cardinal points.

- Day Ahead Forecasts will be published by 9 AM
- Two Day Ahead Forecast by 5 PM
- Seven Day Ahead Forecast by 5 PM

Forecasts will be available to download from the National Grid website.

<http://www2.nationalgrid.com/UK/Industry-information/Electricity-transmission-operational-data/Data-explorer/>

Alternatively if you would like to receive forecasts by email as csv files, please send an email to sumit.gumber@nationalgrid.com

It is intended to simultaneously publish forecasts through the website and email. However, due to unforeseen circumstances (particularly for the day ahead forecast), this may not always be possible. Therefore its recommended to join the email distribution list as a back up to ensure that the forecast is always available on time.

If you would like to discuss any of this in more detail please feel free to

Yours sincerely

Jeremy Caplin
