

Contracting for Commercial Actions

Contracting for commercial actions

- There are a number of drivers for National Grid wanting to take locational actions:
 - Managing operational risk
 - Alternative to investment
 - Facilitating early connection
- National Grid are considering contracting for these actions in advance to guarantee their availability.

Our objectives

- National Grid are interested in talking to any party who could participate in commercial actions to understand:
 - Are you interested in contracting?
 - If so, what types of contract? (turn up, turn down, ...)
 - What factors would influence pricing?

- If this is something you would like to discuss with us further, please contact Jon Dutton:
