

The Enduring NTS Exit Capacity Regime

12th December 2012

Exit Reform Go Live – snagging list update

| Topic | Resolution/action |
|---|---|
| <p>UIOLI calculation for release of Offpeak requires 30 days of Firm Exit Capacity usage data up to D-7 for Off-peak Capacity release</p> | <p>12th December – The full set of data is available for UIOLI calculation. Transitional process no longer required. Item closed</p> <p><i>17th October - Transitional process in place (until 7th November) to release discretionary Off-peak capacity to meet User needs where possible</i></p> |
| <p>Entry of bids for Daily Exit Products takes longer than expected</p> | <p>12th December – Initial evaluation has highlighted that this would not be a simple change given the number of elements in the system impacted. Analysis is ongoing</p> <p><i>17th October - This is something we're looking at and we'll keep you informed</i></p> |

Exit Reform Go Live – snagging list update

| Topic | Resolution/action |
|--|---|
| <p>OPN files not processed due to:</p> <ol style="list-style-type: none">1.Zero values contained2.When 1 file fails subsequent ones 'back up' | <p>12th December – Investigation for the enduring fix is ongoing. The aim is to have full resolution in readiness for the scheduled deployment in March</p> <p><i>17th October - Files amended such that zero values are not provided for CVs & pressures</i></p> <p><i>Analysis ongoing to determine full resolution for item 2</i></p> |

Exit Reform Go Live – snagging list update

| Topic | Resolution/action |
|---|---|
| <p>There were some issues with Entry Auctions for Gas Day 01/10/12 (unrelated to Exit Implementation)</p> | <p>12th December – Full resolution implemented during November. Item closed</p> <p><i>17th October - Technical issue</i></p> <p><i>Daily auctions now running</i></p> <p><i>Long term fix to ensure this doesn't happen at the next month end is in progress & we'll keep you informed</i></p> <p><i>Some minimal data cleansing necessary</i></p> |
