

REMIT

Central Collection and Publication Service

Background

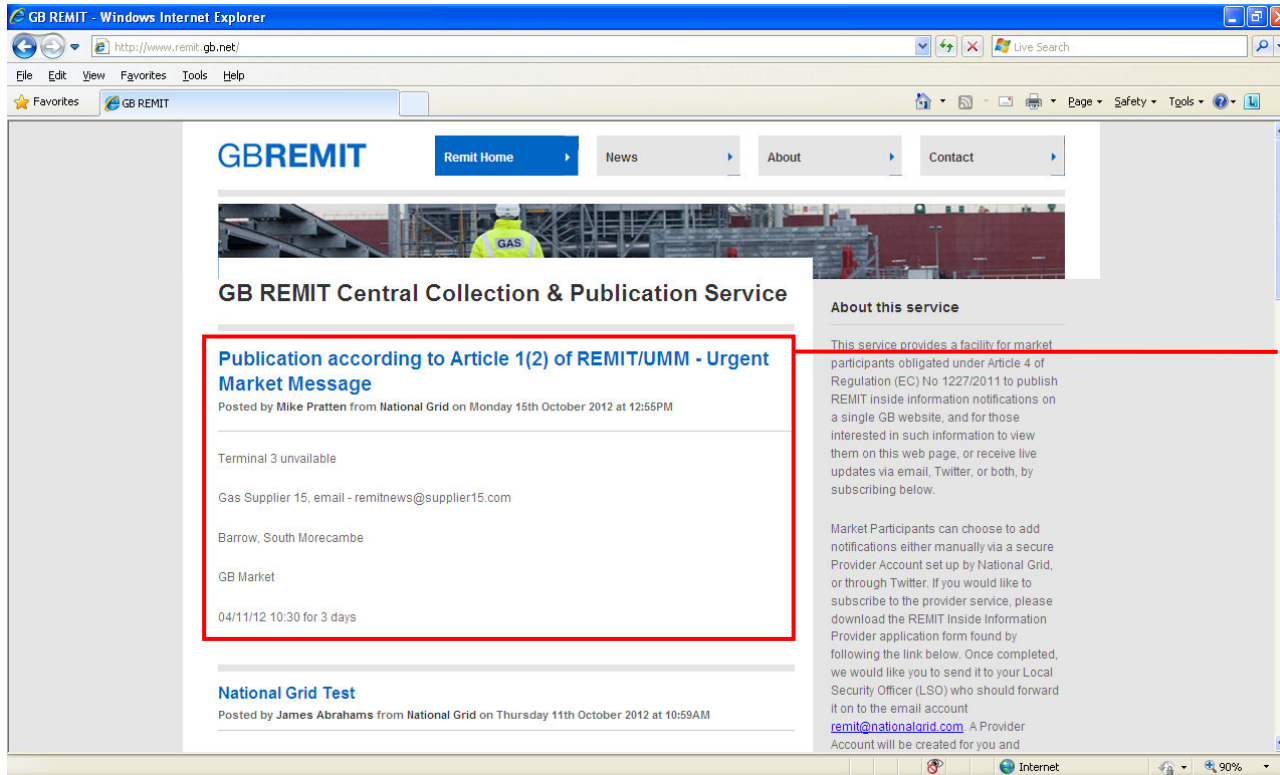

- In December 2011, the new EU REMIT regulation placed an obligation on gas market participants to publish 'inside information' with the aim of preventing market manipulation and insider trading.
- Currently, participants in the gas market who wish to access this data need to know which operators publish data and then monitor each site.
- Earlier this year market participants proposed that given National Grid's current role as a key provider of gas operational data, National Grid provide a REMIT Central Collection and Publication service.
- Our industry wide survey during July/August resulted in overwhelming support for such a GB wide service (in line with ACER guidance)

The Service

- National Grid will provide a GB Central Platform, free of charge, and available to REMIT notification providers and wider market participants
- This is a voluntary service available 24x7 with business support during normal hours
- Users are not required to publish elsewhere (unless the platform is unavailable, and they wish to trade)
- Input via manual update or Twitter feed
- Outgoing notification via web site (primary) supported by Twitter and email subscription
- Publication will be close to real time (Twitter feed according to Twitter service levels)
- Provider service is secured via username and password
- A full archive and audit trail will be kept
- Whilst the solution is scalable (at a cost), a fair use policy forms part of the terms & conditions to protect the service. Hopefully this will not be required

REMIT - CCPS

View Notifications

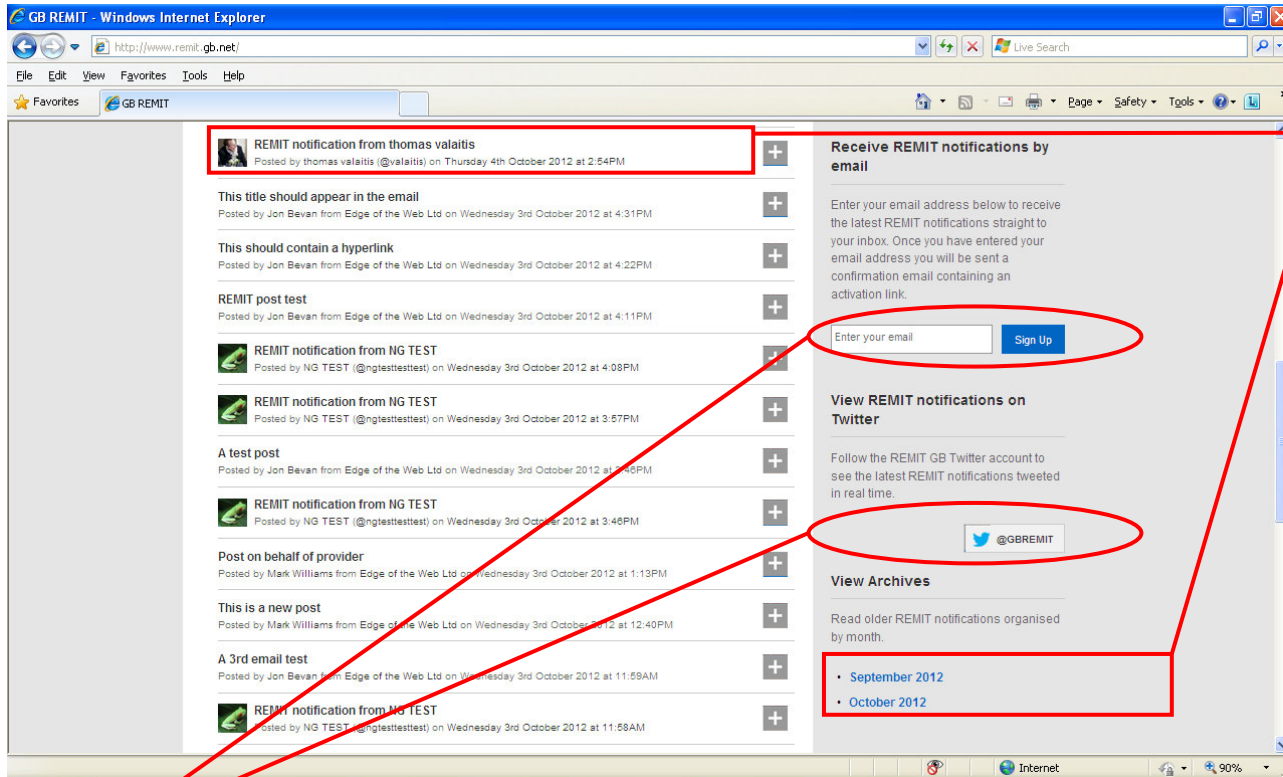

The latest notification appears here.

Users can follow the ACER recommended format or their own format if preferred

REMIT - CCPS

View Notifications

nationalgrid

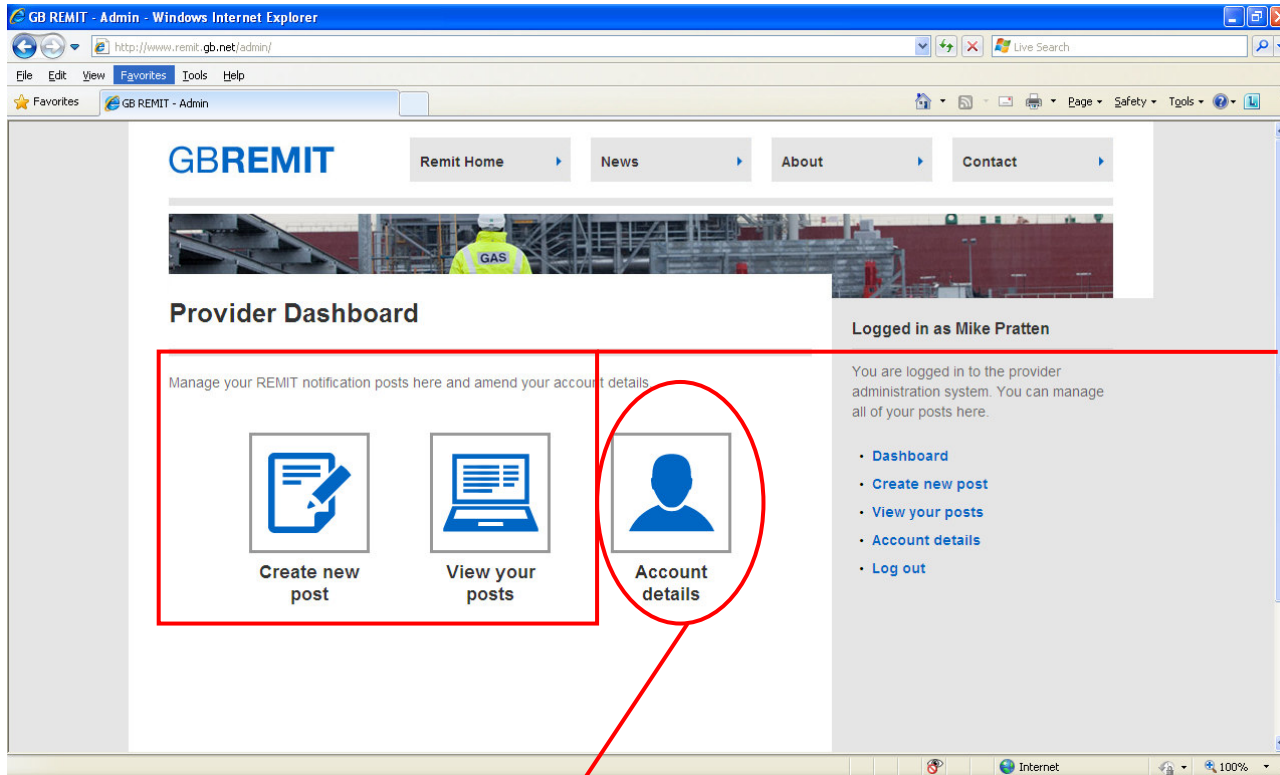

First 30 notifications appear on the Front page

and are then moved to the archive

Users can also subscribe to receive notifications via email and/or Twitter

REMIT - CCPS Provider Dashboard

nationalgrid

Simple dashboard
allows users to create
and view notifications

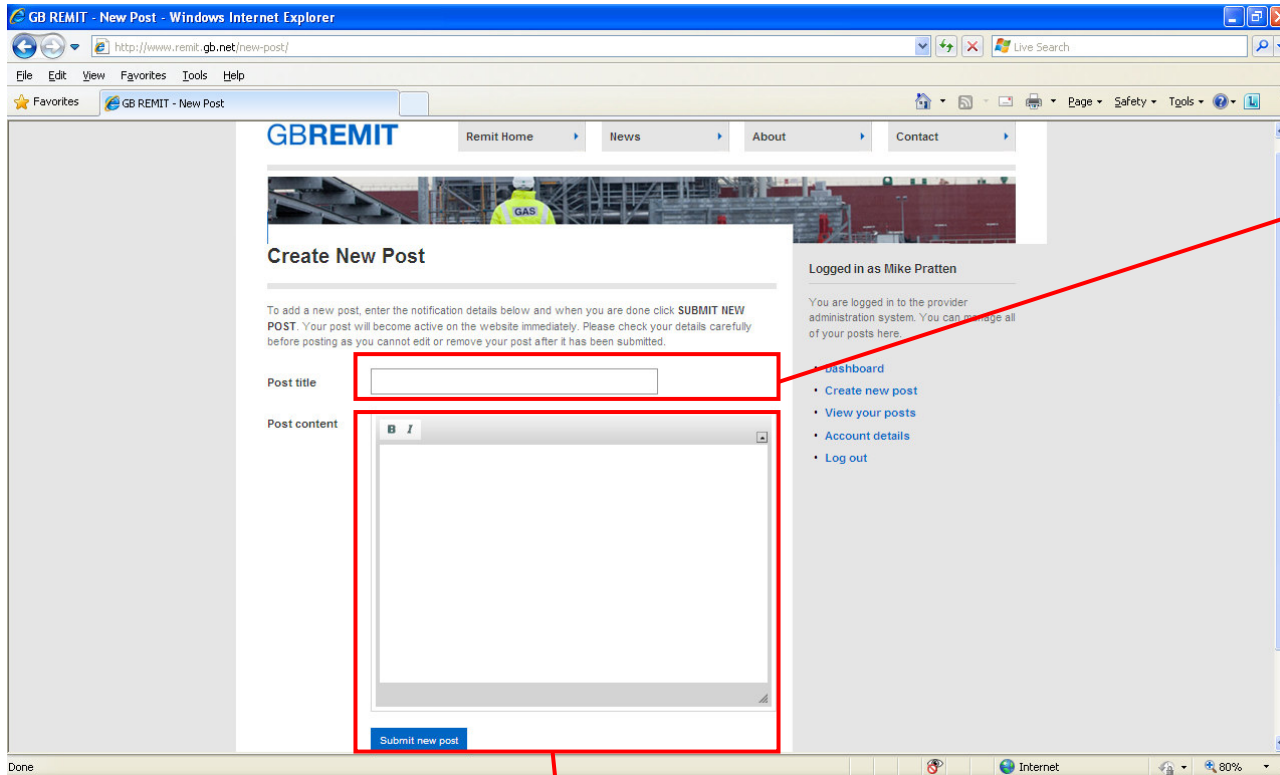

Users can manage their account details

A Provider User Guide is available to help with these functions

REMIT - CCPS

Create Notification

nationalgrid

Acer recommend that messages should start with a common title

Should we auto-populate the title of each message?

Free format text allows for users to structure notification as appropriate

Company Name and
Email can only be
Changed by NG after
notice from LSO

This also applies to
setting up inbound
Twitter feeds

Users can manage their basic account details

Next Steps

- Providers are invited to register (there is no obligation to use the service)
 - Further information can be found at <http://www.nationalgrid.com/uk/Gas/Data/News/GB+REMIT+Launch.htm>
- National Grid will set up Provider access on receipt of a registration form from the Local Security Officer (LSO) as confirmation of authority
- Complete testing of service
- Final review and consultation with Ofgem
- Review against ACER guidance v2
- Go live currently expected 29th October 2012
