

2017-18 RF Recovery

National Grid BSUoS Charging Circular

25th May 2018

Today, Friday the 25th May 2018 marks the first day of the BSUoS 2017/18 RF recovery and we would like to take this opportunity to advise customers of the overall reconciliation that is currently planned for the year ahead.

The current overall cost difference between the SF and the RF runs is calculated to be **-£716,183.89**

Whilst this is a relatively small difference overall for the year we would like to highlight to customers that there will be significant changes on a day by day basis throughout the RF runs for the year.

To assist customers in trying to predict the effects of the RF runs on their daily charges we have included the table below to show the total adjustments being made on a day by day basis.

Important

The RF Forecast cost is subject to update e.g. if disputes are settled after the end of financial year, to reflect any changes in CSOBM (costs of Bids and Offers), or following OFGEM updates to allowable costs.

If these charges do change significantly in the coming year we will issue updated communications to advise of the reasons for this.

SF v RF Forecast

Date	SF	RF Forecast	% change		
01/04/2017	£2,719,053.14	£2,284,906.00	-15.97%	Total SF	£1,175,186,795.16
