

NEW BSUoS Forecast

National Grid BSUoS Charging Circular

11th June 2018

This circular is to inform interested BSUoS parties of a new BSUoS forecast report that is available on the National Grid website and updated monthly.

Key Information

We have published our new BSUoS Report for June on our website: www.nationalgrid.com/uk/electricity/market-operations-and-data/forecast-volumes-and-costs/

The report will replace the monthly BSUoS forecast that is published in the MBSS report.

Based on stakeholder feedback we have made the following improvements; an improved volume forecast, a 24-month rolling forecast, an upper and lower range to the forecast, a volatility and accuracy analysis, commentary for outturn and forecast with explanation for any significant deviations.

The report will be updated monthly and published in the first week of each month, providing the outturn for the previous 12 months and forecast for the next 24.

We are in the process of reviewing the MBSS report and putting in place several improvements to data granularity, we are working to publish the revised version by the 15th of June. The BSUoS forecast will be removed from the new MBSS and replaced by the BSUoS Report, so that the latest BSUoS position and outturn balancing costs can be published sooner.

If you have any questions about this new report please contact Mathew Hofton in the National Grid Performance Review team using the details below.
