

BSUoS Daily Balancing Costs Data

National Grid BSUoS Charging Circular

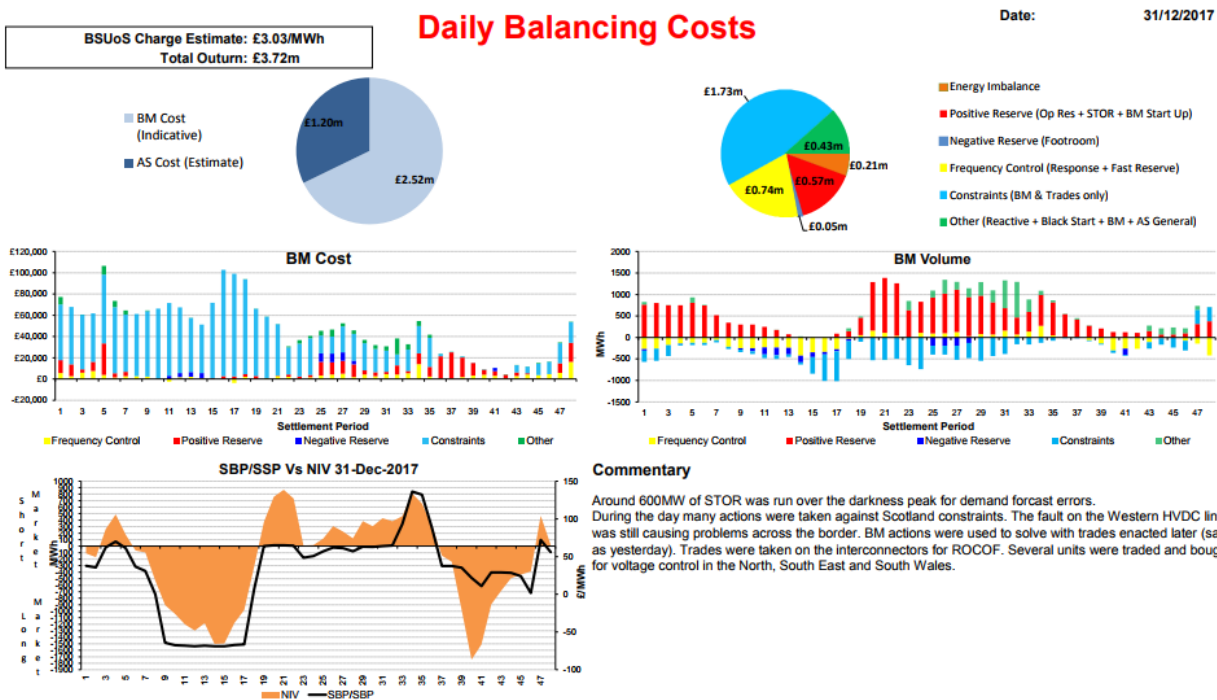

9th January 2018

This circular provides information about the provision of Daily Balancing Costs data on the National Grid website.

Key Information

At our Settlement Forum on the 7th November 2017 we informed attendees about a daily report which was being compiled as part of a customer journey project aiming to increase transparency of our actions to the market. This report would provide a breakdown of daily costs with accompanying commentary on system conditions and actions taken.

We are pleased to be able to report that this data is now being made available on a daily basis and an example of the data in this report is shown below.

Accessing the Data

This data is publically available and can be found by following the link below. Once on the System Balancing Reports Page scroll down and click the **Daily Balancing Costs (BSUoS)** link on the left hand side of the page. Once you have done this you will see a list to the right hand side of this showing the individual reports that are available.

Note: A screenshot of the location of these reports has been included at the end of this document to assist in finding these reports.

Reports have been made available for settlement days from the 25th December 2017 onwards.

System balancing reports

On this page, you will find reports that we publish relating to the commercial operation of the electricity transmission system.

The service reports show the requirements for balancing services and the results of tender assessments. A service by service summary of the cost of balancing services is provided in the monthly balancing services summary (MBSS).

Service reports

The service reports show the requirements for balancing services and the results of tender assessments. A service by service summary of the cost of balancing services is provided in the monthly balancing services summary (MBSS).

Transmission Licence C16 Statements can be found on the [Transmission Licence C16](#) page.
