

Very Large Daily Metered Consumer (VLDMC) Participation Requirements

All NTS directly Connected loads (VLDMCs) will receive NEC Declarations and emergency stage notifications, the sites will be contacted to validate the emergency contact details held and confirm their ability and time to cease using gas during stage 2 of a NGSE, the sites will receive a GS(M)R Direction Notice to confirm the request.

The NEMT will contact each site individually as part of the emergency communications process; they will not contact dual sites as this may not support the emergency strategy on the same telephone call or contact the shipper(s).

Upon being informed of a Network Gas Supply Emergency the VLDMC must brief all relevant personnel as to the existence and nature of the emergency. It is the site's responsibility to inform their Shipper/agent or commercial trading desk of gas flow amendment to support the NEC instruction.
