IFA Loss Factor

IFA Access Rules (Version 8.0) Schedule 5, Rule 3.2 states that the Loss Factor applied is to be published on the RTE and NGIL websites. This notice fulfils that requirement.

The physical flow on the Interconnector is subject to losses. The Operators apply a Loss Factor ("LF") to calculate each User's share of the losses in regard of his netted nomination rights (as amended by any curtailment). The Loss Factor is symmetrical between Mid-Channel and either end of the Interconnector (Sellindge and Les Mandarins).

The Loss Factor applied by the Operators is 1.17%.
--

As described in IFA Access Rules (Version 8.0) Schedule 5, Rule 3.2, any change to the loss factor shall be notified to Users at least 5 business days before the change is to take effect.
